Job Description

Role Purpose:

- Advise and assist Vice President on technical issues related to the achievement of the Mission and Vision of the Bank by ensuring proper management of the Banks financial assets and availability of resources to support the Banks financing operations, and formulation of work plans and monitoring of KPIs.

Key Accountabilities and Activities: **Advisory and Technical Support**

- Provide advisory support on technical issues to Vice President on matters related to maintaining the soundness and integrity of the Banks financial position and its long term financial sustainability in line with risk managements parameters for maintenance of the AAA rating.
- Assist Vice President in ensuring the best-in-class suite of financial and asset-liability management policies infrastructure is in place and maintained regularly
- Support Vice President in establishing the proper control frameworks for the monitoring of key financial and ALM risks to ensure effective mitigation actions are taken in timely fashion
- Assist Vice President in the coordination activity of multiple bank departments in engaging with the external rating agencies and hosting the visiting rating analysts for the annual rating exercise
- Prepare response on the key issues raised to Vice President based on inputs of the various departments
- Prepare reports as and when requested by Vice President; coordinate with other Complexes/Departments to gather necessary information
- Provide advisory support in monitoring budget for Finance Complex to ensure efficient use and distribution of resources
- Support Vice President in external forums or events
- Support in monitoring of Finance Complex KPIs
- Manage and facilitate the implementation of projects, particularly IT projects, in the Finance Complex in collaboration

21
