Unsatisfactory project management refers to all such shortcomings and lapses on account of which the project could not be executed in a timely, transparent and efficient manner. Lack of project planning and poor feasibility led to projects getting stuck up during execution. Delays in finalization of project documents, allocation of land, timely arrangement of financial resources etc led to significant cost overruns for a subject project. On the other hand, myopic need / unrealistic growth assessment of the projects led to mere procurement exercises with surplus stock getting piled up in the DISCOs/NTDC.

During course of completion of project, as the requirement and cost of a project changed, the revision of the PC-1 was mandated which in many cases was not sought making the project expense irregular and void of due administrative sanction.

Moreover, project completion reports were delayed/not prepared for completed projects which implied that management could not objectively review whether the project had been executed in a successful manner, due processes adopted and envisaged benefits materialized or not.

On the above lines, audit has analyzed the issues of unsatisfactory project management in the DISCOs/NTDC/GENCOs, on a sample analysis basis to highlight the in-efficiencies, lack of transparency, irregularities and internal control lapses which are illustrated in the following paras:

1.7.1 Delay in achieving the financial / technical benefits due to non-execution of Lalian G/S Project - Rs.3,014.94 million

According to PC-I of 220 kV Lalian Grid Station along with In/Out Transmission Lines, the commissioning date of the G/S was set as June, 2013 with the certain financial / technical benefits comprising annual profit earning, reduction in system losses, reduction in overloading and increasing the voltage level at nearby grid stations and 132 kV transmission lines.

During audit of NTDC, a project comprising 220 kV Lalian Grid Station along with in/out Transmission lines was approved in PC-I with estimated cost of Rs.1581 million and commissioning in June, 2013. The project was to be financed through the ADB (MFF-I) Tranche-IV Loan No.3203. However, despite lapse of seven (07) years and closure of ADB loan, the project could not be executed just for want of acquisition of land. Had the said project been executed, annual profit earning of Rs.2,703.25 million, reduction in system losses amounting to Rs.311.69 million together with other technical / social and economic benefits (Annex-IX) could have been achieved as envisaged in PC-I.

Poor project management resulted in delay in achieving the financial / technical benefits amounting to Rs.3,014.94 million due to non-execution of Lalian G/S Project up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that three (03) sites were selected successively but could not be acquired due to land reserved for forest and litigation of land owners. Now the fourth site was under acquisition and construction of grid station would be started in February, 2021 with completion period of 12 months. Audit contended that non-acquisition of land even after elapsing a period of about eight years beyond the commissioning date of PC-I reflected poor project management.

The DAC in its meeting held on April 12, 2021 did not agree with the management reply and directed to submit revised reply duly signed by MD NTDC containing project wise break up with date of completion / commissioning, calculation of delay, time / cost overrun and its impact as per PC-I. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No further progress was intimated till finalization of the report.

Audit recommends that the management needs to inquire the matter regarding non-execution of Lalian G/Station project and delay in reaping the financial & technical benefits of Rs.3,014.94 million.

(Draft Para No.1313/2023-24)

1.7.2 Illegitimate expenditure undertaken beyond the approved scope of the project - Rs.1,572.042 million

According to Para-6.11 of Manual for Development Projects issued by Ministry of Planning, Development and Reform (Govt. of Pakistan), "Once PC-I is approved, the executing agency is required to implement the project in accordance with the PC-I. It has no authority to change and modify any approved parameter of the project on its own. If the sponsoring agency feels that the project could not be implemented in accordance with the approved parameters, a revised PC-I be submitted for approval of the competent forum immediately. No expenditure may be undertaken beyond the approved scope and cost of the project, and if done, it would be considered as illegitimate expenditure."

During audit of NTDC, the project "New 220 kV Bandala Grid Station (2x160MV PTs) with 10 KM 220 kV Gatti-Kala Shah Kaku D/C In/ Out Transmission Line" was approved by ECNEC. According to approved scope of PC-I, the existing site of 132 kV Bandala grid station was to be utilized for construction of 220 kV grid station and new 2 X 160 MVA transformers along with 10 KM transmission lines was to be constructed. But contrary to this, the site of 220 kV grid station along with length of transmission line were changed by NTDC on its own. Further, three (03) 160 MVA transformers against 02 were installed. The revision of approved scope of work without approval from the competent forum was irregular and expenditure of Rs.1,572.042 million in this regard cannot be termed as legitimate.

Violation of the provisions of Manual for Development Projects, issued by Ministry of Planning, Development and Reform (Govt. of Pakistan), resulted in illegitimate expenditure of 1,572.042 million on construction of New 220 kV Bandala Grid Station and transmission line.

The matter was taken up with the management on September 25, 2020 and reported to Ministry on December 29, 2020. The management replied that the new 220 kV Banda Grid Station was to be constructed in the existing premises of 132 kV Bandala Grid Station as per PC-I. Later on, at detailed designing stage, it was revealed that the new GS could not be accommodated in the existing GS and new site was selected accordingly. As per provisions of PC-I, two transformers were installed in 2014 but three bays were constructed to accommodate the future enhancement, hence the third one was installed in 2019 to meet the growing demand. Audit contended that the deviation from parameters / scope of the project as approved in PC-I and expenditure incurred thereon was against the government instructions.

The DAC in its meeting held on April 12, 2021 did not agree with the management reply and directed to submit revised reply. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No further progress was intimated till the finalization of report.

Audit recommends that the management needs to inquire the matter for illegitimate expenditure incurred in violation of instructions of Ministry of Planning, Development and Reform (Govt. of Pakistan) besides implementing DAC's decision.

(Draft Para No.1120/2023-24)

1.7.3 Un-necessary/excess purchase of earth rods – Rs.661.12 millions

According to Para-5 of WAPDA office memorandum dated January 17, 1978 on irregularities of purchases of stores and equipment, purchases should be made only of such items and in such quantities as are required for a specific work. In no case should these purchases be made for storing an item for indefinite period.

During audit of CEO IESCO, 147,224 HT/ LT Steel Structures and 511,032 Earth Rods were purchased during the period from February 2018 to September 2023 & November, 2019 to October, 2023 respectively for installation on different locations. It is worth mentioning here that one HT/LT Steel Structures required only one Earth Rod for earthing. Previously purchased Earth Rods were not installed at sites and NEPRA had already taken serious view on non-installation of earth rods. Therefore, the Purchase of 336,000 Earth Rods amounting to Rs.661.12 million in excess of requirement was unnecessary and unjustified.

Non-adherence to the authority's instruction/rules resulted in un-necessary/excess purchase of earth rods amounting to Rs.661.12 million up to the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in December, 2023. The management replied that earth rods were purchased on the directions of NEPRA.

The DAC in its meeting held on December 14 & 15, 2023 directed the management to investigate the excess purchase of earth rods at PPMC level and provide report to audit within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.1339/2023-24)

1.7.4 Loss due to defects in Mari-Guddu Gas Pipeline – Rs.243.48 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of GENCO-II, 27.54 GWH units valuing Rs.243.48 million were less generated during the period started from April 12, 2019 to July 17, 2019 due to pin-hole leakages from 20-inch dia 60 km long Mari-Guddu gas pipeline. However, neither the matter was investigated nor responsibility of loss was fixed.

Non-adherence to the Authority's instruction resulted in loss due to pin-hole leakages from gas pipeline amounting to Rs.243.48 million up to the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that the gas pipe line was installed in 1984-85 and useful time period of this line had expired. CPGCL successfully attended the pinhole leakages within shortest possible time and got the gas supply restored.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to inquire the matter and submit its report within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.743/2023/24)

1.7.5 Irregular excess expenditure on SDG schemes - Rs.82.542 million

As per para-C (i) of Deposit work "Deposit work shall be undertaken only after getting full amount of sanctioned work. Estimate deposited with WAPDA, with an undertaking from the depositor to meet variation.

During audit of CEO FESCO, 152 SDG schemes with estimated cost of Rs.151.97 million were executed by incurring expenditure of Rs.234.38 million. Hence, an excess expenditure of Rs.82.542 million was incurred against the estimated amount. Further analysis of executed works revealed that ratio of excess expenditure was 41% to 111%. The excess expenditure was required to be regularized besides recovery from the sponsor, which was not done.

Non-adherence to rules resulted in non-recovery of excess expenditure on SDG schemes Rs.82.542 million up to the Financial Years 2021-23.

The matter was taken up with the management on October, 2023 and reported to the Ministry in November, 2023. The management replied that all the works were completed within permissible limits of + 10% and final position of the expenditure would be determined after completion/ capitalization of all works.

The DAC in its meeting held on December 20 & 21, 2023 DAC did not agree with reply of the management and directed to inquire the matter at Technical Director's level for fixing of responsibility within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.576/2023-24)

1.7.6 Loss due to inordinate delay in tendering process - Rs.60.58 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of NTDC, an inquiry committee was constituted by GM HR to probe into the matter of delay in tendering process of construction of boundary wall around 220/132 kV Electrode station Khipro, District Sanghar. While going through the inquiry report, it transpired that land for subject work was handed over to NTDC during January 2019. But the contract for construction of boundary wall was awarded during June 2022 with a delay of almost 41 months which caused not only time over run but the cost overrun was also observed to the tune of Rs.60.58 million (difference of cost of project due to retendering). Surprisingly, the committee after establishing

the facts relating to delay caused by different offices of NTDC had not recommended any responsibility/action against any office/officer. This state of affairs showed that an undue favour was extended by inquiry committee to the responsible at cost of loss to NTDC amounting to Rs.60.58 million.

Non-adherence to rules resulted in loss of Rs.60.58 million due to inordinate delay in tendering process during the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in December, 2023. The management replied that the committee in its report had pointed out different offices/departments for major delays. However, it was also intimated by the inquiry committee that before fixing responsibility, it was important to take into account: i) The situation of the Covid-19 pandemic during 2020. ii) Lack of indigenous expertise by NTDC Project in Pakistan, and NTDC was mainly dependent on Owner's Engineer i.e., M/s Barqaab & M/s HATCH. iii) Lack of clarity among different stakeholders regarding scope of work. Furthermore, the implementation/ execution of 660kV Matiari-Lahore HVDC Line project was not effected in anyway by delay in construction of this boundary wall.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to re-inquire the matter at DMD level and submit report within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.954/2023-24)

1.7.7 Substantial loss to the company due to defective construction of transmission line Muzaffargarh - DG Khan by the contractor – Rs.48.95 million

As per SE GSO Letter No 8179-83/SCADA dated June 28, 2022, "it is pertinent to mention here that the discrepancies pertaining to new installed towers of new Muzaffargarh- DG Khan Transmission Line section (MD1, MD&, MD 11) along with one tower BR-2 if 132 kV Bahawalpur-AP East are on part of GSC." Moreover, SE (GSO) Multan intimated to PD GSC Multan vide NO 14622-27 dated December 23, 2022 that discrepancies were still exist.

During audit of GSC MEPCO, a work was awarded to M/s I.H Malik & Company, initially, at the cost of Rs.36.24 million vide work order No. 8194-98 dated April 08, 2015 and work was delayed at the part of company. Afterwards in 2018, an addendum-2 was issued by PD GSC Multan dated March 06, 2018, and its cost increased to Rs.48.95 million with direction to immediately start the work and complete within time. Sub Divisional Officer T/L, (C) reported that the site was handed over to the contractor M/s I.H Malik on March 16, 2018 and the same would be the date of commencement. In January, 2019, XEN (T&G) of PD GSC vide dated January 04, 2019 reported that the subject line had been completed and ready for patrolling to point out any discrepancy. After patrolling XEN SS&TL Division GSO Muzaffargarh clearly stated that M/s I.H Malik was not in a position to complete the job as per specifications and standard of MEPCO. Likewise XEN T&G division GSC Multan endorsed the discrepancies to the said contractor vide dated January 21, 2019. XEN SS&TL GSO Multan again requested to remove discrepancies on the above stated line work vide dated January 27, 2022. Despite, several correspondences and requests to the contractor, the defects were still there up to June, 2023. It is pertinent to mention here, that a fatal accident involving Muhammad Rashid, Assistant Line Man (ALM) SS&TL Muzaffargarh had also occurred due to these discrepancies on this line. An inquiry committee was constituted to probe the fatal accident as per directives of the MD PPMC Islamabad. In fact-finding report of the inquiry committee, they recommended at point-iv that high level technical inquiry committee be

constituted at MEPCO level to probe into the matter of irregularities as mentioned in the findings to fix the responsibility for poor quality of construction of 132 kV transmission line Muzaffargarh - DG Khan. All the deliberated situation apprehended that the contractor M/s I.H Malik did the low quality work and was unable to complete the job which not only put the lives of MEPCO line staff at risk but also financial loss of Rs.48.95 million due to defective work.

Poor mismanagement resulted in loss of Rs.48.95 million to the company due to defective construction by contractor up to the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that as per directions of GM (HR) PPMC a high-level technical committee was constituted vide CEO MEPCO O/O No. 1306/20176-80 dated December 20, 2022. The inquiry committee had done the inquiry. The progress achieved in this regard would be communicated to audit in due course.

The DAC in its meeting held on December 20 & 21, 2023 directed the management to get the record verified from audit within 15 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 434/2023-24)

1.7.8 Unjustified expenditure incurred on Surface Drainages already covered in original scope of work - Rs.47.21 million

According to Note-3 to Bill of Quantity of Contracts ADB-72R-2016 (Package-I, Lot-I), ADB-72R-2016 (Package-I, Lot-II) & ADB-72R-2016 (Package-II), for Civil Works, Erection, Testing and Commission at 220 kV Grid Stations at Chakdara, D.I Khan & Nowshera Substations, "Switchyard trenches shall be provided with gradual slope for proper disposal/ drainage of rain water keeping in view the safety of other equipment in the switchyard."

During audit of NTDC, the Contracts No. ADB-72R-2016 for Civil Works, Erection, Testing and Commission at 220 kV Grid Stations at Chakdara, D.I Khan & Nowshera were awarded to the contractors. However, there was no provision of "Surface Water Drainage" in the original scope of work of these contracts. According to Bill of Quantity of the said contracts, switchyard trenches were to be provided by the contractor with gradual slope for proper disposal / drainage of rain water. Hence, the drawings of the switchyard trenches were required to be prepared / amended by keeping in view the disposal / drainage of rain water. But contrary to this, the scope of work was increased by including separate Surface Drainages and amount of contracts were increased through variation orders amounting 47.21 million (Rs.13.51 million, 16.13 million & 17.57 million for Chakdara, D.I Khan & Nowshera Substations respectively). Since the contractors were required to construct switchyard trenches by accommodating the rain water too, inclusion of new component of surface drainages with financial implication of Rs.47.21 million was not justified. Had the drawings of switchyards trenches amended by taking into account the disposal of rain water, an amount of Rs.47.21 million could have been saved.

Non-revision / modification of drawings for switchyard trenches in the light of BoQ for accommodating rain water resulted in unjustified expenditure of Rs.47.21 million incurred on Surface Drainages at Chakdara, D.I Khan & Nowshera Substations up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that separate surface drainage was required in the grid stations for excess flow of rain water in order to protect the cables in the trenches. Audit contended that according to Note-3 to Bill of Quantity, the contractor was responsible for provision of switchyard trenches for proper disposal / drainage of rain water by keeping in view the safety of other equipment in the switchyard.

The DAC in its meeting held on April 12, 2021 did not agree with the reply and directed the management to provide detailed / revised reply. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No reply was furnished till finalization of the report.

Audit recommends that the management needs to inquire the matter of extra financial burden on public exchequer due to non-adherence to the provisions of Bill of Quantity besides implementing DAC's decision.

(Draft Para No. 1042/2023-24)

1.7.9 Loss due to payment of detention charges – Rs.42.01 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of MP&M, NTDC, Lahore, an amount of Rs.42.01 million was paid on account of detention charges due to late clearance of material from port. No action was taken by the management regarding delay in clearance of material and authority sustained a loss up to the stated extent.

Non-adherence to Authority's Guidelines resulted in loss due to payment of detention charges of Rs.42.01 million due to delay clearance of material from port up to the Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that detention charges amounting to Rs.42.01 million charged on NTDC against Consignment No. MPM-257, MPM-265 & MPM-275 due to plenty of technical & Non-technical obstacles. The delay in provision of the Bank and Consignee Endorsed Documents to CC&L office by the consignee delayed the Delivery Order (D/O) issued by shipping line and the clearance was delayed, resultantly. The delay was also caused due to Non-availability of Consignments Fund. The extra time spent in arranging reduced custom duty/taxes benefits from customs after filing GD.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 849/2023-24)

1.7.10 Irregular capital expenditure incurred /capitalized against projects ledger without inclusion and approval of project in PC-I - Rs.34.94 million

As per PBF-2 (Capital Expenditure Budget) of DISCOs Accounting Manual, concerned department assess the capital expenditure requirements for the next year. In order to assess the capital expenditure requirements of next year for the preparation of estimated capital budget, PC-I of DOP, ELR, STG and other projects along with other sources is issued by the concerned departments.

During audit of GSC LESCO, three (03) Civil Works amounting to Rs.34.941 million were executed relating to construction of Brick Masonry wall at 132 kV G/S DHA-T Sector and OPF Housing Society. The expenditure of these works was capitalized under these works and debited to GSO Directorate. However, neither these works of 132 kV Grid Station were included in PC-I of STG-7&STG-8 nor approval of construction of 132 kV G/S was accorded by the competent authority. Hence, in the absence of works in PC-I and approval from the competent authority, capital expenditure incurred and capitalized under project ledgers was irregular.

Non-adherence to Accounting Manual resulted in irregular capital expenditure incurred /capitalized amounting to Rs.34.94 million against projects ledger without inclusion and approval of project in PC-I up to the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that the expenditure Rs.135.75 million on three works had incurred on account of “Miscellaneous/Construction of Boundary Wall / Leveling Dressing of Grid Station GSO Emergency Grid Station works and any unforeseen expenditure etc.” Moreover, the construction of said boundary walls was commenced after the approval of Competent Authority.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the record verify in support of reply within 15 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 634/2023-24)

1.7.11 Loss due to non-recovery of rent on account of stringing T&P/Machinery from the contractor – Rs.7.45 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of Project Directorate EHV-I NTDC, Islamabad, stringing T&P/Machinery was handed over to five (05) contractors on rental basis in 2019 from NTDC store. A period of more than four (04) years was elapsed, but neither rental charges amounting to Rs.7.45 million were recovered from the contractors nor material was received back. Resultantly, the company sustained loss to the stated extent.

Non-adherence to the Authority’s Instruction resulted in loss of Rs.7.45 million due to non-recovery of rent on account of stringing T&P/Machinery up to the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that NTDC had issued final notice to all four contractors for recovery of rental charges and T&P items cost. NTDC had sufficient amount of retention money/running invoices of the contract and would be adjusted against retention money.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to recover or adjust the rent and get the record verified from audit within thirty (30) days. No further progress was reported till

finalization
of
the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 595/2023-24)

1.7.12 Loss due to unjustified payment to third party consultant - Rs.1.70 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (as amended up to January, 2014), "all losses whether of public money or of store, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of PMU FESCO, an amount of Rs.1.70 million was paid to M/s EnMasse (Pvt.) limited on account of consultancy services fee against contract agreement No. 9857 dated June 20, 2022 to decide the extension of time (EOT) case of M/S Pinggao Group China. The Pinggao Group China was entrusted for procurement of Design, Supply and Installation for conversion of existing Air Insulated Switch Gear from 66 kV to the level of 132 kV at four No. Grid Stations vide contract No. ADB-trench-III-FESCO-02-2015 re-tendering dated May 24, 2016 and the Project was delayed up to 243 days as per FESCO. Due to delay, the liquidated damages worth Rs.97.104 million was deducted from Pinggao Group China. As the contractor applied for extension of time, the case was forwarded to Board of Directors (BOD) for decision. BOD decided for hiring of third-party consultant to decide the extension of time case. As per direction, consultant M/s EnMasse (Pvt.) Limited was hired to decide the case for extension of time (EOT) and the case was decided by the consultant in favour of Pinggao Group China and the consultant completely negated the version of FESCO Management and decided that only 17 days delay occurred due to fault of FESCO Management instead of 243 days. Consultant recommended for extension of time (EOT). As per consultant's recommendations, BOD granted extension of time (EOT) which resulted in refund of LD to M/S Pinggao Group of China amounting to Rs.97.104 million. The whole case was decided in favour of contractor M/S Pinggao Group of China but the consultancy charges were paid from FESCO funds. Audit holds that the payment should have been made by the M/S Pinggao and the matter of payment to consultant should have been decided between FESCO and Pinggao before written agreement with the consultant. Due to payment to consultant, FESCO sustained loss of Rs.1.70 million which could have been saved with timely decision.

Non-adherence to the rules/regulations of the Authority resulted in Loss due to unjustified payment to third party consultant amounting to Rs.1.70 million during the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that in order to settle EOT issue of contractor, third party consultant was hired on the recommendations of the BOD FESCO.

The DAC in its meeting held on December 20 & 21, 2023 DAC did not agree with reply of management and directed to inquire the matter at FD/ CFO FESCO level within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 730/2023-24)

1.7.13 Irregular appointment of Project Director ERP- Rs.1.50 million

As per directions of establishment division, Government of Pakistan dated 08 March, 2011, Prime Minister has been pleased to direct that measures should be taken to authenticate degrees/certificates of all Federal Government Employees of respective Ministries/Divisions, their attached departments, subordinate offices and autonomous bodies under their administrative control. As first step, the degrees/certificates of employees of both Federal Government as well as autonomous/semi-autonomous bodies/corporations working in BPS-17 to BPS-22 may be got verified from the concerned universities and the HEC.

During audit of NTDC, Mr. Faisal Ahmed Hashmi was appointed as Project Director (ERP) NTDC with salary package of Rs.500,000/- per month in September, 2022. But the required experience certificates were missing at the time of evaluation/short listing of candidates and mentioned in evaluation sheet as well. The said candidate had not qualified interview even, but he was selected as Project Director (ERP), which needs justification.

Non-adherence to direction of establishment division resulted in irregular appointment of Project Director (ERP) costing Rs.1.50 million during the Financial Year 2022-23.

The matter was taken up with the management in June, 2023 and reported to the Ministry in December, 2023. The management replied that requisite missing documents i.e Educational Degrees & Experience Certificates of Mr. Faisal Ahmed Hashmi Project Director ERP, were available for verification of record.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 916 /2023-24)

1.7.14 Inordinate delay in completion of Mansehra Grid Station due to incomplete and delayed submission of Technical Data / Drawings

According to Clause-2.5 Section 6-Employer's Requirement, "the manufacturer/ supplier shall submit copies of all drawings and technical data to employer for approval within 30 days of the issuance of the Notification of Award.

During audit of NTDC, Notification of Award for turnkey Contract No. ADB-67R-2012 valuing CNY 65.86 million + Rs.172.90 million for design, manufacturing, supply, erection, testing and commissioning of 220 kV Substation Mansehra was issued to M/s Chint Electric Co. Ltd. on February 13, 2015 and subsequently contract was signed on March 13, 2015. The contractor was liable for furnishing all drawings and technical data to the employer for approval within 30 days of the issuance of Notification of Award. Contrarily, the contractor failed to adhere to the time lines for furnishing the drawings and technical data. The first submittal for SLD, equipment layout and section drawing were received on May 11, 2015 i.e. after elapse of almost 03 months. The contractor could not furnish complete drawings / data even after elapse of two years from the date of issuance of NOA as depicted by CE MP&M letter CE/MP&M/ DP/Dm-II/AM-I/26965-69 dated April 03, 2017. Resultantly, the said grid station could not be completed within its scheduled completion period. This scenario also put a question mark on the capability of the contractor for execution of turnkey projects.

Non-adherence to the contractual timelines for submission of drawings / technical data resulted in inordinate delay in completion of 220 kV Grid Station, Mansehra up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that it had been a practice of NTDC to include in contract a general blank timelines of approval for complete technical data / drawings (within 30 days from NOA), whereas the same was not followed being practically impossible. Audit contended that the contractor failed to adhere to contractual provisions regarding timely furnishing of drawings and technical data.

The DAC in its meeting held on April 12, 2021 did not agree with the reply and directed the management to provide detailed / revised reply. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No reply was furnished till finalization of the report.

Audit recommends that the management needs to inquire the matter regarding submission of incomplete and delayed drawings / technical data that caused inordinate delay in completion of project besides implementing DAC's decision.

(Draft Para No. 1040/2023-24)

1.7.15 Mis-procurement due to deficient bid evaluation and leakage of confidential bidding information of mega project of 600 KM Jamshoro-R.Y Khan T/Line and Grid Stations

According to Para 2.47 of ADB's Procurement Guidelines, "After the public opening of bids, information relating to the examination, clarification, and evaluation of bids and recommendations concerning awards shall not be disclosed to bidders or other persons not officially concerned with this process until the publication of contract award".

During audit of NTDC, a tender No.ADB-65-2010 for package-I & Package-II for 500 kV Transmission Lines 3rd Circuit Jamshoro-Moro-Daduto Rahim Yar Khan (600 km) and 500 kV Switching Station at Moro & extension works at existing 500 kV Substations at Jamshoro, Dadu& Rahim Yar Khan was opened on May 21, 2011 and May 23, 2011 respectively. A consultancy contract valuing Rs.435.92 million was signed with M/s NESPAK on March 06, 2010 w.e.f November 16, 2009, which was amended up to Rs.960.08 million. The Bid Evaluation Reports (BER) for both the Packages made by the NESPAK were sent to ADB on November 22, 2011, which were not approved by ADB due to discrepancies / deviations with ITB clauses, incomplete information and incomplete technical evaluation. The ADB during loan review mission on April 16-24, 2012 showed its grave concern over leakage of confidential information pertaining to BER, inconsistencies in BER, non-determination of non-conformities into major or minor deviations and application of conflict of interest and advised for supplementary BER. Accordingly the SBERs were prepared by NTDC but the SBER only for Package-II was submitted to ADB on July 02, 2012 which remained unapproved as the issues raised in original BER were still not fully addressed. Instead of addressing the same and providing the SBER of Package-I to ADB, the bidding process for package-I was annulled / scrapped unilaterally by NTDC on September 06, 2012 without seeking prior concurrence of ADB. After publication of the annulment of Package-I, ADB was apprised accordingly vide letter dated September 11, 2012 but astonishingly the same was withdrawn on the very next day i.e. September 12, 2012 abruptly by NTDC. Instead of going for post annulment concurrence of ADB, the NTDC now with changed stance conveyed its desire on September 12, 2012 for seeking concurrence of ADB for annulling of both the packages due to allegations of leakage of BERs and lot of presentations about transparency of BE process. This grave

contradiction on the part of NTDC was beyond comprehension. Without waiting for concurrence, Package-II was also annulled by publication on September 28, 2012 unilaterally by NTDC. The ADB vehemently rejected the NTDC's proposal for annulment and declared it mis-procurement due to systematic breaches in the confidentiality, NTDC's unilateral decision to cancel procurement of both the packages without seeking ADBs no objection, inconsistent application of ITB, NTDC's inability to provide clarification and issues pertaining to NTDCs approach to ITB.

Violation of ADB's Procurement Guidelines resulted in mis-procurement due to deficient bid evaluation and leakage of confidential bidding information of mega project of 600 KM Jamshoro-R.Y Khan T/Line and Grid Stations up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that the bidding process was declared as mis-procurement by ADB and advised to proceed for rebidding. As regards the annulment of the bidding process, the BoD NTDC had constituted an inquiry committee vide notification dated November 11, 2012. Audit contended that documentary evidence for fixing responsibility upon the delinquents causing mis-procurement was needed to be furnished.

The DAC in its meeting held on April 12, 2021 directed the management to provide detailed / revised reply. The DAC in its meeting held on December 18 & 19 upheld the earlier decision. No reply was furnished till finalization of the report.

Audit recommends that the matter needs to be inquired at Ministry level for fixing responsibility regarding mis-procurement laden with the said grave issues afflicting the bidding process of ADB65-2010. Moreover, the management also needs to implement DAC's decision.

(Draft Para No. 1116/2023-24)

1.7.16 Non-preparation of revised PC-I(s) for cost overrun projects

According to Para 6.13 of the Manual for Development Projects (Revised 2019) of Ministry of Planning, Development and Reform, Government of Pakistan, "as per the direction of the ECNEC, if the project cannot be completed with 15 per cent increase in the cost, the executing agency should immediately prepare the revised PC-I and submit for approval of the competent forum".

During audit of NTDC, seven (07) projects comprising Transmission Lines/Grid Stations were executed under MFF-I ADB Loan. The actual cost incurred on the said projects remained more than 15% of the cost approved in PC-I. However, revised PC-I(s) were not prepared for approval of Planning Commission. The detail is as under:-

Sl. No.	ADB Loan No.	Tranche No.	Description of Projects	PC-I	Capitalized cost	Increase in cost	%age Increase
			New 500 kV D.G. Khan G/S with T/Lines	467	10052.64	5585.64	125.04
			New 220 kV Rohri G/S with T/Lines	877	7285.21	2438.21	30.90
3311	28462289	III	220 kV transmission line from the GHAZI Breda substation to the Muzaffargarh substation.	533	698.79	165.79	31.11
			and (ii) In/Out arrangement between the Udh-Expansion plant and Muzaffargarh 500 kV power plant	508	3234.12	726.12	28.95
			New 220 kV transmission line for 220/132 kV G/S	1007	1504.12	497.12	49.37
				050.27	1580.53	675.53	74.64

Non-adherence to Manual for Development Projects resulted in non-preparation of revised PC-I(s) in respect of the projects having cost increased beyond 15% than original PC-I up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that in past, there had been no practice of preparing revised PC-I of any project(s), however recently it had been made necessary to revise the same where applicable and would be complied in future. Audit contended that being a mandatory requirement of Planning Commission, the PC-I(s) was needed to be revised, where the cost of the projects increased by more than 15%.

The DAC in its meeting held on April 12, 2021 did not agree with the management reply and directed to submit revised reply. The DAC in its meeting held on December 18 & 19 upheld the earlier decision. No reply was furnished till finalization of the report.

Audit recommends that the management needs to inquire the matter regarding non-preparation of revised PC-I(s) besides ensuring their preparation and submission to Planning Commission expeditiously. Moreover, the management also needs to implement DAC's decision.

(Draft Para No.1139/2023-24)

Concluding Recommendations

Project management is a reflection of the professionalism with which the relevant field experts can carry out mega assignments. The above-mentioned shortcomings in project management reflect poor institutional work of the company and imply that the company's long-term targets envisaged through such projects were not being achieved. It is proposed that the ministry may look into the project-based shortcomings to identify control lapses and facilitate improvements in the project work of the companies.

1.8 Theft / Misappropriation / Fraud

As in any organization, theft, misappropriation or fraud incidents highlight material lapses and failures present in the respective organization. The subject issue indicates malpractices existing in the concerned organization, causing the financial losses as well as being a source of significant operational in-efficiencies.

In the following paras, audit has stated on a sample test check basis its findings on the issue.

1.8.1 Loss due to embezzlement of funds / material - Rs.1,579.48 million

According to instructions issued by WAPDA dated July 17,1982 all losses whether of public money or of stores shall be subjected to preliminary investigation by the officer in whose charge they were to fix the cause of the loss and the amount involved.

During audit of DISCOs, it was observed that funds and material amounting to Rs.1,579.48 million were embezzled by the official(s)/officer(s). In most of the cases departmental inquiries were concluded and certain responsibilities / penalties were fixed upon the delinquents whereas in some cases the matter was under investigation in FIA and NAB. However, neither the funds / material were recovered nor the recovery of penalty amounts was forthcoming from record. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Amount (Rs.in million)
1	FESCO	1143/2023-24	0.72
2	GEPCO	281,528,667 & 803/2023-24	37.79
3	IESCO	944/2023-24	2.66
4	HESCO	779/2023-24	1,534.65
5	NTDC	981/2023-24	3.66
TOTAL			1,579.48

(Source: DISCOs Disciplinary / Inquiry Files)

Non-implementation of recommendations of the inquiry reports resulted in no-recovery of embezzled amount of Rs.1,579.48 million as well non-initiation of disciplinary actions against the delinquent (s) during the Financial Year 2022-23.

The matter was taken up with the management during October to November, 2023 and reported to the Ministry during November and December, 2023. The management replied that the departmental inquiries were conducted and legal course of action was taken. The disciplinary proceedings and charging of penalties were either completed or under process. It was added that in few cases, the recovery was effected from the employees.

The DAC in its meeting held on December 14-23, 2023 directed the management to get the record of completed action verified from audit, expedite the remaining cases vigorously as per SOPs and finalize the inquiries within 30 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.8.2 Loss due to theft of electrical material - Rs.461.83 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of DISCOs, it was observed that electrical material valuing Rs.461.83 million was stolen by unknown culprits in 980 cases. Though FIRs were lodged with the concerned police station(s) but no administrative inquiry / action was carried out / finalized for fixing responsibility and deciding the fate of loss. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No. of cases	Amount (Rs.in million)
1.	FESCO	78,88,159,534,972 & 1145/2023-24	183	33.08
2.	GEPCO	39,254,357 & 688/2023-24	91	29.83
3.	HESCO	685 & 793/2023-24	12	4.71
4.	IESCO	141, 223 & 229/2023-24	50	10.19
5.	LESCO	333, 647, 878 & 933/2023-24	103	49.86
6.	MEPCO	285, 305, 435, 652 & 926/2023-24	179	94.06
7.	PESCO	208, 400 & 549/2023-24	107	53.82
8.	QESCO	07, 318, 424, 428, 432, 456 & 1033/2023-24	202	132.73
9.	SEPCO	15, 236 & 586/2023-24	23	17.91
10.	TESCO	191/2023-24	6	1.50
11.	NTDC	578 & 980/2023-24	24	34.14
TOTAL			980	461.83

(Source: Progress Reports of Formation)

Non-adherence to rules for safeguarding the companies' assets resulted in loss of Rs.461.83 million up to the Financial Year 2021-23.

The matter was taken up with management during March to April, 2023 & August to November, 2023 and reported to the Ministry in June, 2023 & October to December, 2023. The management replied that FIRs were lodged and departmental action was either completed or under process.

The DAC in its meeting held on August 26, 2023, September, October 9, 2023 and December 14-23, 2023 directed the management to pursue the FIRs and inquire / expedite the departmental proceedings and submit its

report to audit within 30 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC’s decision besides fixing responsibility.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No. 1.8.1 having financial impact of Rs.180.41 million. Recurrence of same irregularity is a matter of serious concern.

1.8.3 Misappropriation of electrical material / fuel & funds - Rs.311.09 million

According to Section-III (1) of WAPDA guidelines for enforcing responsibility for losses due to fraud, theft or negligence of individuals, 1982 (amended up to January 2014) “All losses whether of public money or of stores shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of DISCOs, it was observed that electrical material, fuel and funds amounting to Rs.311.09 million were misappropriated by the officers/officials. In most of the cases departmental inquiries were concluded and certain responsibilities / penalties were fixed upon the delinquents whereas in some cases the matter was under investigation in FIA and NAB. However, neither the material/funds were recovered nor the recovery of penalty amounts was forthcoming from record. The detail is as under:

Sr. No.	Name of Formation	Draft Para No.	No. of Items	Amount (Rs.in million)
1.	GEPCO	279 & 862/2023-24	84	119.26
2.	HESCO	778/2023-24	2	25.21
3.	IESCO	222/2023-24	3	5.46
4.	LESCO	880, 902/2023-24	2,186	101.62
5.	MEPCO	319 & 896/2023-24	17	22.97
6.	PESCO	299, 302, 507/2023-24	31	21.26
7.	QESCO	871/2023-24	0	4.56
8.	SEPCO	583/2023-24	0	10.75
Total			2,323	311.09

(Source: Correspondence files of formation)

Non-adherence to Authority’s instruction / guidelines resulted in misappropriation of electrical material/POL/funds amounting to Rs.311.09 million up to the Financial Year 2022-23.

The matter was taken up with the management in August to October, 2023 and reported to the Ministry during October to December, 2023. The management replied that the departmental inquiries were

conducted and legal course of action was taken. The disciplinary proceedings and charging of penalties were either completed or under process. It was added that in few cases the recovery was effected from the employees.

The DAC in its meetings held on December 14, 2023 to December 23, 2023 directed the management to get the record of completed action verified from audit, expedite the remaining cases vigorously as per SOPs and finalize the inquiries within 30 days. As regards QESCO, the DAC also directed to re-examine the inquiry recommendations by CEO and take strict disciplinary action within 30 days. The DAC directed the management of SEPCO to expedite the disciplinary action and Special Audit be conducted by Internal Audit within 30 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC’s decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No. 1.8.2, 1.8.3, 1.8.5, 1.8.6, 1.8.7, 1.8.10 having financial impact of Rs.28.33 million. Recurrence of same irregularity is a matter of serious concern.

1.8.4 Loss due to theft of electricity – Rs.236.13 million

According to Guidelines for Policy and Procedure on Detection Bills circulated vide letter dated October 26, 1999, “whoever found to connect his installation appliances and apparatus for the purpose of supply of energy without its (with the work of license) written consent commits an offence to be prosecuted under Section 39 & 39A of Electricity Act, 1910 which requires FIR to be lodged with police. Further to compensate the loss sustained on account of theft, assessment bills were to be served as per laid down procedures to such illegal and unregistered consumers”.

During audit of DISCOs, it was observed that an amount of Rs.236.13 million was recoverable from 4,485 consumers involved in theft of electricity through illegal direct connections, tempering in meters and bogus installation of meters. Departmental and legal actions were neither taken nor finalized for fixing responsibility and recovery of the energy charges. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No of Consumers	Amount (Rs.in million)
1.	FESCO	170 & 173/2023-24	360	10.48
2.	HESCO	816 & 820/2023-24	05	5.87
3.	IESCO	1101 & 1103/2023-24	16	14.35
4.	LESCO	337,882 & 907/2023-24	2,209	137.52
5.	MEPCO	304/2024-24	1,761	54.71
6.	PESCO	708/2023-24	134	13.20

TOTAL	4,485	236.13
--------------	--------------	---------------

(Source: Monitoring and Testing (M&T) / Surveillance & Investigation (S&I) Reports of DISCOs)

Non-adherence to the instructions resulted in loss of Rs.236.13 million due to theft of electricity up to the Financial Year 2022-23.

Audit is of the view that theft of electricity was serious issue for all DISCOs and needs strong remedial measures in collaboration with all stakeholders enabling the DISCOs to reduce their losses.

The matter was taken up with the management during August to November, 2023 and reported to the Ministry during October to December, 2023. The management replied that efforts were being made for recovery from responsible persons and departmental as well as legal proceedings were under progress.

The DAC in its meeting held on December 14-23, 2023 directed the management to get the record of completed action verified from audit within 15 days and expedite the pending actions. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.1.4.8 having financial impact of Rs.1,795.29 million. Recurrence of same irregularity is a matter of serious concern.

1.8.5 Fraudulent issuance of salary slips to retired and ghost employees -Rs.5.24 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of CEO QESCO, it was observed that the salary slips valuing Rs.5.24 million were issued to retired and deceased employees fraudulently during the Financial Year 2022-23. The Management Information System (MIS) of QESCO maintains and updates Human Resource Database of all employees and generates salary slips in order to make payment to employees. This database was being updated when concerned formations submit Up-dation Form regarding status of employment (on Retirement / Death / Resignation of employees), the same was not done. Moreover, MIS did not maintain the credentials like (data of birth, date of joining and length of service) of employees in salary slips, which was a serious irregularity.

Non-adherence to provisions of guidelines resulted in fraudulent issuance of salary slips to retired and ghost employees Rs.5.24 million.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that the names of employees mentioned in the audit observation were not ghost employees. They all were QESCO employees appointed as per rules. Further, no extra payment on account of salary was made to those employees after their retirement. The names from pay bills issued by MIS were deleted by the DDO before payment of salaries.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to inquire the matter immediately under the TORs prepared by audit and share the inquiry report within 60 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 869/2023/24)

1.8.6 Loss due to illegal installation of transformers of higher capacity against stolen transformers of tube well consumers without fulfilling codal formalities – Rs.2.17 million

According to instructions issued by WAPDA dated July 17,1982 all losses whether of public money or of stores shall be subjected to preliminary investigation by the officer in whose charge they were to fix the cause of the loss and the amount involved.

During audit of CEO FESCO, two (02) transformers of 100 kVA & 25 kVA of tubewell consumers bearing Reference No. 29-13171-301800 & 29-13171-3917104 were installed against stolen transformers of 50 kVA & 15 kVA. However, codal formalities regarding registering of FIRs against theft of said transformers and obtaining approval for installation of new transformers of higher capacities as well as effecting recovery of capital cost were not fulfilled. Resultantly, the company sustained loss in shape of theft as well as installation of new transformers, without effecting capital cost amounting to Rs.2.17 million.

Non-adherence to the instructions of authority resulted in loss of Rs.2.17 million due to illegal installation of transformers of higher capacity against stolen transformers of tube well consumers without fulfilling codal formalities during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that after inquiry, the disciplinary proceedings against the delinquents had been initiated.

The DAC in its meeting held on December 20 & 21, 2023 directed the management to re-inquire the matter by focusing source of provision of higher capacity transformers installed against stolen transformers of lower capacity. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 1144/2023-24)

1.8.7 Fraudulent practice of M/s Chint Electric Company Ltd

According to Clause-1.14 of Asian Development Bank Procurement Guidelines, "fraudulent practice" means any act of omission, including a misrepresentation, that knowingly or recklessly misleads, or attempts to mislead, a party to obtain a financial or other benefit or to avoid an obligation."

During audit of NTDC, it came to notice that M/s Power Grid Company of Bangladesh had requested the NTDC vide letter 01/PGCB/CE (PnD)/2014/6971 dated December 08, 2014 to verify the authenticity of end user certificates regarding Rohri Grid Station (ADB-41-2009) furnished by M/s Chint Electric Co. Ltd. China while

participating in bidding process in Bangladesh. But no response was given to M/s Power Grid Company of Bangladesh. Later on, while replying to the email of Corporate Research and Investigation (Pvt) on January 19, 2018, one of the end user certificate, already requested for authentication by M/s Power Grid Company of Bangladesh, was found fictitious and bogus. This clearly depicted that M/s Chint Electric Company was involved in “fraudulent practice” and needed to be proceeded against in the light of ADB’s procurement guidelines. Had the authenticity of the end user certificates been probed in 2014 by responding to the request of M/s Power Grid Company of Bangladesh and action taken in the light of ADBs procurement guidelines for indulging in fraudulent practice of M/s Chint Electric Company Ltd, the subsequent NTDC Contracts i.r.o ADB-67-R-2014 & ADB-65R-Package-II could not have been awarded to M/s Chint Electric Company Ltd. Moreover, after establishment of corrupt practice of M/s Chint Electric Co. Ltd. neither the matter was reported to ADB, nor any action was taken by NTDC against the said contractor.

Non-adherence to the ADB Procurement Guidelines resulted in fraudulent practice of M/s Chint Electric Company Ltd. up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that the work against Contract ADB-41-2009 was completed by the contractor before the receipt of letter for verification of authenticity of end user certificate from Power Grid Company of Bangladesh. Further, the works were awarded to M/s Chint with bona-fide intentions and there was no information to the contrary available with NTDC to decide otherwise. Audit contended that verification of end user certificate was not carried out in time. Further, after establishment of corrupt practice of M/s Chint Electric Co. Ltd. neither the matter was reported to ADB, nor any action was taken by NTDC against the said contractor.

The DAC in its meeting held on April 12, 2021 did not agree with the reply and directed the management to provide detailed / revised reply. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No further progress was reported till finalization of the report.

Audit recommends that the management needs to inquire the matter regarding non-responding to request of M/s Power Grid Company of Bangladesh for the authenticity of end user certificates of Rohri Grid, which later on, turned out to be fake and non-reporting the matter to ADB for appropriate action besides rechecking the bidding information / documents provided by M/s Chint in all the awarded contracts. Moreover, the management also needs to
implement
DAC’s decision.

(Draft Para No. 1179/2023-24)

Concluding Recommendations

Audit recommends strict actions against those responsible besides expediting recovery identified in the above paras in pursuance of DACs’ decisions.

1.9 Unsatisfactory Management of Foreign-Aided Loan Initiatives

Despite financial constraints, the Government of Pakistan was actively engaged in making improvements in the working of the power sector enterprises through donor funded programmes. The loans were acquired from the donor agencies (such as the ADB, World Bank, JICA etc.) after detailed working of the tasks to be performed through such funding and envisaged benefits to be attained. In NTDC and GENCOs, key objectives of these

programmes were enhancement and modernization of the National Transmission Grid and development of new and more efficient power plants respectively.

In this context, audit observed under-utilization of loans due to lack of proper planning and delayed execution of projects. Resultantly, envisaged benefits from the donor-funded program could not be fully achieved. The project management also could not adequately resolve bottlenecks faced during execution of the projects. Delayed material procurements, design flaws, delays in tendering processes and right of way problems contributed towards the slow execution of projects causing under-utilization of donor funds.

Moreover, overall donor-funded package was linked with commitment charges payable to the donor agency. The borrower i.e. “the power sector entities” committed that they had demand for and would seek a certain amount of loan over a specified period of time from the donor. The donor agency then made arrangements for availability of such loan on defined timelines as agreed with the borrower and charged commitment charges accordingly. Due to poor planning and over-estimations, extra funds were sought from the donor which were eventually never drawn and utilized. Resultantly, commitment charges were paid to the donor for the whole loan amount causing extra financial burden on the companies.

Another indicator of unsatisfactory loan-management was poor utilization of material acquired through the donor-funded programme. In a few instances, either excessive material was procured or procurement was made well in advance without proper timelines for the utilization of the said material. Warranties of material got lapsed and shelf-life diminished without drawing any benefit from these assets. The same indicated poor material management / procurement on part of the management towards carrying out a donor funded initiative.

On the above lines, audit has analyzed the issue of unsatisfactory management of Foreign-Aided Loan initiatives in NTDC and GENCOs on a sample basis to highlight shortcomings observed which are illustrated in the following paras:

1.9.1 Less/under-utilization of loan -Rs.68,344.866 million

According to agreement signed on February 12, 2014 Loan No.3092-PAK & 3090-Pk amounting to US \$ 658 million & 26.400 million between ADB and Govt. of Pakistan for Jamshoro Power Generation Project.

According to PC-I (infrastructure sectors) clause-4 (iv) “the present plan for addition of 2x660 MW Coal fired Capacity at TPS Jamshoro has been prepared to meet the shortage of generating capacity and to avoid load shedding in the country in near future. The project also aims to reduce the cost of power by use of a lower cost fuel and consequently the quantum of circular debt.”

During audit of GENCO-I, funds of US \$ 26.400 million & US \$ 658 million were allocated to Jamshoro Power Generation Project under Loan No.3092-PK & 3090-PK respectively to facilitate the project. However, the management was unable to use funds amounting to US \$ 11.646 million & US \$ 227.33 million as on June 30th 2023 which was 44.11% & 34.55% respectively of total loan amount. Due to un-satisfactory utilization of these funds US \$ 238.976 million (Rs.68,344.866 million) planned objectives of the Loan No.3092-PK & 3090 PK could not be achieved. Delay in completion of project was also loss in the shape of not getting benefits and huge inflation/fluctuation in exchange rate.

Non-adherence to loan agreement between ABD and Govt. of Pakistan resulted in under-utilization of funds available at the disposal of JPCL amounting to Rs.68,344.866 million during Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that less utilization of ADB loan 3090-Pak was due to unavoidable circumstances including inadvertent delay in bidding process due to absence of finance for 2nd unit, relocation of CMS, Covid-19, change in design of T/line by NTDC, ash pond issues and non-injection of equity by GoP. As regards ADB Loan 3092, the amount allocated for consultancy services had been fully utilized and further would be re-appropriated from capacity development allocation to meet the consultancy expenses till completion of project. An inquiry committee was constituted by Ministry of Energy (Power Division) on December 29, 2020 to probe the delay, further progress achieved would be informed to audit accordingly.

The DAC in its meeting held on December 01 & 02, 2023 wherein the management was directed to provide evidence regarding justification for delay of utilization of loan for verification within three days. The DAC in its meeting held on December 22 & 23, 2023 upheld its earlier decision. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 377/2023-24)

1.9.2 Non-payment of interest on foreign relent loans - Rs.11,359.50 million

According to Rule-4(3) of Public Sector Companies Corporate Governance Rules-2013, "the chief executive is responsible for making appropriate arrangements to ensure that funds and resources are properly safeguarded and used economically, efficiently and effectively and in accordance with all statutory obligations".

During audit of PMU GEPCO, interest payable on foreign relent loans of ADB & Exim Bank stood at Rs.10,222.39 million as of June, 2022, which was accumulated to Rs.11,359.50 million due to addition of Rs.1,137.11 million during July 2022 to May 2023. The payment of interest on relent foreign loans had not been made to Economic Affairs Division since long nor GoP was approached to set off / adjust the same against subsidy, which impacted Company's financial position adversely.

Inefficient financial management resulted in non-payment of interest of Rs.11,359.50 million on foreign relent loans up to the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that the PPMC had constituted an inquiry committee on March 28, 2023 regarding non-payment / settlement / adjustment of foreign relent loans. Therefore, the payment / adjustment / settlement of the loans would be made as per recommendation of the committee, which were still awaited.

The DAC in its meeting held on December 18 & 19, 2023 directed the management of PPMCL to expedite the inquiry and share its report with audit within a month. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 295/2023-24)

1.9.3 Unknown whereabouts of remaining material of ABD Works - Rs.72.592 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses whether of public money or of stores, shall

be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of PMU QESCO, material of ADB works amounting to Rs.173.129 million was lying in warehouse. The said material was to be shifted to STG store for completion of running STG works. Contrary to this, only material valuing to Rs.100.537 million existed in books of accounts. Record of balance material amounting to Rs.72.592 million (Rs.173.129 - Rs.100.537) was not available which needs to be justified.

Non-adherence to the WAPDA Guidelines resulted in shortage of material amounting to Rs.72.592 million up to the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that value of ADB foreign material was calculated in Pak rupees by the consignee store at the time of receipt of material from the contractor for which dollar to rupees exchange rate was taken on the day of GRN whereas the actual rate of conversion which was taken for payment by ADB or booking of loan liability was of the date on which actual payment was made by ADB to the supplier. Therefore, the factor of exchange rate of loss or gain was not incorporated in the accounts of PMU.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to inquire the matter and submit its recommendations to audit within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 261/2023-24)

1.10 Unsatisfactory Management of Power Generation Capacity, Power Purchase Agreements and Allied Infrastructure

The “Power Sector” represents a network of entities linked with one another having key attributes of electricity generation, transmission and utilization. Fuel generation companies (e.g PSO, SNGPL etc) provide fuel to power generation companies (e.g IPPs and GENCOs) for generation of electricity. The “Energy” so generated is transmitted in-bulk over the national grid system and provided to the distribution companies, from where it is sold to the electricity consumers.

Efficient management of the power sector requires that the electricity is generated from cheaper fuel alternatives and adequately utilized. However, audit observed that there was imbalance in the demand and supply of electricity and cheaper fuel sources were not fully utilized by the power sector which negatively impacted the economy.

In-line with power purchase agreements, the power generation companies maintained a certain generation capacity at all times and charged capacity payments to the CPPA-G accordingly. Idle capacity (i.e. surplus power generation capacity) in the system meant that the capacity payments being made could not be off-set with generation of revenue through electricity sale. This also attributed towards an increase in the overall price of electricity as the price of idle capacity was passed on to the consumers.

Another important aspect was the inadequacy of the power transmission network to efficiently evacuate electricity from the generation facility and deliver it to the power distribution companies. Poor management of the

transmission system including its limitation to sustain high electricity loads meant that surplus electricity could not be transmitted through the system.

On the above lines, audit has analyzed the issue of unsatisfactory management of power sector capacity and its allied infrastructure to highlight significant shortcomings which are illustrated in the following paras:

1.10.1 Non-recovery/ settlement of long outstanding Liquidated Damages and other issues with GENCOs – Rs.105,860.49 million

According to article XVI of Power Purchase agreement of GENCOs, “in the event that a dispute arises, the parties shall attempt in good faith to settle such dispute by mutual discussions in the meeting of coordination committee within 30 days and in the event that the parties are unable to resolve the dispute then either party may refer the dispute to an Expert”.

During audit of Central Power Purchasing Agency (CPPA-G) (Guarantee), Islamabad, liquidated damages and other issues relating to GENCOs for an amount of Rs.105,860.57 million were neither recovered nor settled since 2014. CPPAG and GENCOs neither resolved the issue through mutual discussion in the meeting nor referred the matter to Expert for settlement.

Non-recovery/settlement of long outstanding liquidated damages claims and other issues reflects inefficient financial management.

Nonadherence to the provisions of power purchase agreement resulted in non-recovery/ settlement of LD and other issues amounting to Rs.105,860.49 million up to the Financial Year 2021-22.

The matter was taken up with the management in May, 2023 and reported to the Ministry in June, 2023. The management replied that on November 16, 2022, a Special Committee was formed to resolve GENCOs' outstanding issues, including LD disputes. The reconciliation process was ongoing, with progress updates promised to the audit. No further developments were reported by the report's finalization.

The DAC in its meeting held on October 09, 2023 directed the management to resolve the matter expeditiously within a month. No further progress was reported till finalization of the report.

Audit recommends that the management needed to look into the matter and make concerted efforts for earlier recovery/ settlement of matters pertaining to GENCOs.

(Draft Para No.96/2023-24)

1.10.2 Unjustified payment of Capacity Purchase Price (CPP) without conducting Annual Dependable Capacity Test (ADCT) – Rs.54,002.43 million

According to CPPA-G office memo dated November 25, 2021, ADCT should be performed by GENCOs on regular basis. Moreover, NEPRA has given strict directives for the same. The Authority may disallow the payments to NPGCL for capacity charges in near future.

During audit of Central Power Purchasing Agency Guarantee (CPPA-G), Islamabad, CPPAG made a payment of Rs.54,002.43 million on account of Capacity Payment to Power Generation Companies without

conducting Annual Dependable Capacity Test which was unjustified and a violation of Power Purchase Agreement (PPA). The annual dependable capacity test is a critical component of the capacity payment calculation process. By not conducting the test, payments made on account of Capacity Payment do not accurately reflect the actual capacity available. This could lead to overpayment or underpayment of capacity payments, which could have a significant impact on the company's financial statements.

Non-adherence to the relevant provision of PPAs resulted in Unjustified payment amounting to Rs.54,002.43 million on account of Capacity Purchase Price (CPP) without conducting Annual Dependable Capacity (ADC) Test up to the Financial Year 2021-22.

The matter was taken up with the management in May, 2023 and reported to the Ministry in June, 2023. The management replied that despite efforts, no progress was made on issues raised with CPPA's BoD and the Ministry. To address this, a Special Committee was formed on November 16, 2022, led by JS (PF) MoE (Power Division) with GHCL & CPPA members, focusing on resolving pending issues including GENCOs' ADC test performance.

The DAC in its meeting held on October 09, 2023 directed the management to pursue the matter and share the decision of committee with audit. No further progress was reported till finalization of the report.

Audit recommends that the management needs to conduct annual dependable capacity test as required by the regulatory framework. It would also ensure that the capacity payment calculation accurately reflects the actual capacity available and minimize the risk of overpayment or underpayment of capacity payments.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.3.1.8.5.12 having financial impact of Rs.473,537.42 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.107/2023-24)

1.10.3 Heavy financial burden passed on to consumers due to under-utilization / non-utilization of efficient power plants in determination of fuel price adjustments - Rs.23,262.00 million

According to Section 31(2) of NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 states that The Authority, in the determination, modification or revision of rates, charges and terms and conditions for the provision of electric power services shall keep in view— (a) the protection of consumers against monopolistic and oligopolistic prices; (d) The encouragement of economic efficiency in the electric power industry; (e) The economic and social policy objectives of the Federal Government; and (f) The elimination of exploitation and minimization of economic distortions.

During audit of NEPRA, Islamabad, the Regulator in its Industry Report, had identified non-availability of RLNG or transmission / distribution constraints behind non-utilization / underutilization of efficient power plants and operation of out of merit (order) power plants. The detail of financial impact is as under; -

- Due to RLNG shortage expensive plants were operated having financial impact of Rs.19,332 million.
- Due to System constraints, financial impact of Rs.3,670 million was born.
- Due to underutilization/non-utilization of efficient power plants, the financial impact was of Rs.260 million.

NEPRA had directed the CPPA-G and NPCC to keep check on out-of-merit operated power plants on daily basis but the same was not complied with as was evident in the determinations of fuel cost charges as well as in Industry Report. Accordingly, NEPRA initiated legal proceedings against them. However, the violation of EMO by the system operator and market operator was still being observed during determinations of fuel cost adjustments by NEPRA.

Despite considering the very fact that the power plants were under-utilized and operated in violation of merit order by CPPA-G and NPCC, the financial impact / burden of Rs.23,262 million of such under-utilized plants and system constraints were allowed and shifted to consumers by NEPRA.

Non-adherence to NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 resulted in heavy financial burden passed on to consumers due to under-utilization / non-utilization of efficient power plants in the determination of fuel price adjustments Rs.23,262 million for the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Cabinet Division in June, 2023. The management replied that the audit para pertained to the Regulatory Functions of NEPRA and it had already been clarified to Audit vide letter dated February 24, 2023 that the audit of regulatory functions of NEPRA might not be carried out as the same was beyond the statutory scope under section 14(2) of NEPRA Act and opinion of the Attorney General for Pakistan. The reply was not agreed to as the consumers' interest should also have been considered / protected while passing over the fuel cost burden, arising out of under-utilized plants and system constraints, to them.

Audit recommends that the management needs to look into the matter besides ensuring the protection of the interest of electricity consumers while determining tariff.

(Draft Para No.54/2023-24)

1.10.4 Loss to the public exchequer due to the extension in Revised Commercial Operation Date (RCOD) of Thal Nova Power Thar Limited (TNPTL) - Rs.21,697 million

According to Section 9.4 (d) of PPA if the Company is in breach of its obligation under section 4.1b to achieve the Commercial Operation Date by the Required Commercial Operation Date, then for each month (or any portion thereof, prorated daily) thereafter, until the commercial operation date is actually achieved, the Company shall pay the Power Purchaser, as Liquidated Damages an amount equal to 2.5 US\$ per kW/PM (or portion thereof, prorated daily) until the commercial operation date is achieved.

During audit of Central Power Purchasing Agency Guarantee (CPPA-G), Islamabad, Thal Nova Power Thar Limited (TNPTL) and CPPAG signed Power Purchase Agreement on July 21, 2017 for procurement of 300.7 MW through ± 660 kV HVDC Transmission Line. TNPTL did not achieve its Scheduled Commercial Operation Date i.e. December 31, 2020 which was revised as June 30, 2022. Operational analysis submitted by National Power Control Centre (NPCC) showed that due to delay in COD of cheapest coal fired power plant (TNPTL), additional cost of Energy Purchase Price and net loss to public exchequer for shifting of TNPTL from March, 2021 to June, 2022 worked out as Rs.21,697 million.

Non-adherence to provision of PPA and Energy Mix resulted in loss of Rs.21,697 million to the public exchequer due to extension in Revised Commercial Operation Date (RCOD) of Thal Nova Power Thar Limited (TNPTL) up to the Financial Year 2021-22.

The matter was taken up with the management in May, 2023 and reported to the Ministry in June, 2023. The management replied that the RCOD was initially set for December 31, 2020, extended to March 31, 2021 by the Cabinet Committee on Energy, and further to June 30, 2022 following the Prime Minister's approval. CPPA's Legal Department suggested granting TNPTL's extension request to avoid litigation risks. Consequently, the CPPA Board approved the RCOD extension, subject to HVDC charge payments. Additionally, CPPA-G & NTDC imposed LDs on TNPTL for late commissioning and HVDC line non-utilization.

The DAC in its meeting held on October 09, 2023 directed the management to conduct a fact-finding inquiry and get it vetted from GM T/S PPMC within a month. No further progress was reported till finalization of the report.

Audit recommends that the management needs to implement DAC's decision.

(Draft Para No.101/2023-24)

1.10.5 Non-recovery of claim from (O&M) contractor - Rs.10,800.00 million

According to the findings of the inquiry committee constituted by GHCL regarding damage of GT-14, "Rs.10.8 billion was required to be recovered from M/s GE (O&M Contractor)."

During audit of GENCO-II, an Inquiry committee regarding damage of Gas Turbine -14 was constituted by GENCO Holding Company (GHCL) on 11.01.2022. The said committee determined that damages to GT-14 occurred due to the negligence of (O&M) M/s GEE and recommended to recover the loss of Rs.10,800.00 million from the said contractor. However, recovery of loss had not been affected from the said contractor. It is pertinent to mention here that four (04) inquiries regarding the damage of GT-14 were constituted by GENCO Holding Company and sent to CGPCL for implementation of the findings and recommendations. Moreover, the implementation status of the findings and recommendations of these inquiry reports was not intimated to Audit.

Non-implementation of the findings and recommendations of the inquiry committee resulted in non-recovery of claim valuing Rs.10,800.00 million from (O&M) contractor during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that after seeking legal opinions from M/s Rizwan Faiz Associates and M/s RIA Barker Gillette, it was determined that a case against M/s GE was weak and could cause embarrassment and financial impact for the ministry. Consequently, the BoD, in its 164th meeting, decided not to pursue recovery from M/s GE as per Power Division instructions.

The DAC in its meeting held on December 22 & 23, 2023 directed the CFO GENCO-II to submit revised reply after getting clarification / response from GHCL in the matter within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 766/2023/24)

1.10.6 Loss due to disallowed fuel cost by NEPRA against violation of economic merit order – Rs.8,119.51 million

As per National Grid Code 2005 clause (g); A Scheduling and Dispatch Code, which sets out principles, processes and procedures to ensure minimum-cost generation dispatch, the relationship between NTDC and Generators, including the dispatch process and requirements for ancillary services and provisions for frequency control. It also places an obligation upon users to supply certain data information to the NTDC in a timely manner.

During audit of Managing Director, NTDC, the NTDC did not implement the Economic Merit Order based on fuel prices for economic dispatch of thermal power plants (GENCOs & IPPs). The CPPA-G issued Debit Notes due to disallowed fuel cost by NEPRA on account of violation of Economic Merit Order and NTDC, resultantly, sustained a loss of Rs.8,119.51 million.

Non-adherence to Grid Code resulted in a loss due to disallowed fuel cost by NEPRA against violation of economic merit order amounting to Rs.8,119.51 million during the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in November, 2023. The management replied that dispatch decisions for power plants were considered on the basis of factors beyond Economic Merit Order, as per NEPRA Grid Code 2005 SDC 1.4.3, with justifications regularly provided to NEPRA. A high-power committee, convened by DMD (P&E) and reporting on December 12, 2023, concluded that NEPRA's EMO deductions misinterpreted its regulations and recommended legal action.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to pursue the case with court for final outcome. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.1.10.1 having financial impact of Rs.17,156 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.830/2023-24)

1.10.7 Loss due to deviation from Economic Merit Order - Rs.3,327.30 million

According to the Fuel Cost Adjustment of February 2021 System Operator shall report to CPPA-G within 24 hours, dispatch of generation plant (s) out of merit order along with reasons thereof. A copy of report shall be sent to NEPRA simultaneously. CPPAG shall scrutinize the above-mentioned dispatch report in terms of Scheduling and Dispatch Code (SDC) of Grid Code and prepare a report which shall comprise of; a) all dispatch deviation from merit order; b) the plants available but not dispatched; and c) dispatch deviation justified or Unjustified in terms of SDC of Grid Code along-with their financial impact. As per SDC 1.3.2.1, the System Operator shall be responsible for developing a daily Forecast of System Demand (in accordance with OC 2) on the National Grid for the next Schedule Day (initially for each hour of the schedule day, but for a finer time resolution, if required by System Operator (SO) in the future).

During audit of Central Power Purchasing Agency Guarantee (CPPA-G), Islamabad, it was noticed through monthly reports on Merit Order Deviation submitted by NPCC to CPPA-G on the direction of the Regulator that significant deviation from the Economic Merit Order (EMO) occurred due to system constraints. Due to the said significant deviations of EMO, Public Exchequer sustained a loss of Rs.3,327.30 million.

Non-adherence to the Scheduling and Dispatch Code resulted in loss of Rs.3,327.30 million due to deviation from Economic Merit Order during the Financial Year 2021-22.

The matter was taken up with the management in May, 2023 and reported to the Ministry in June, 2023. The management replied that NPCC, as the custodian of merit order, operated plants according to system demand, requirements, and constraints. CPPA assisted NPCC in preparing the economic merit order. As a Market Operator, CPPA-G, under NEPRA's direction, calculated financial implications of merit order deviations, reporting monthly to the Authority. However, this reply was deemed untenable because CPPA-G, as a market operator, should scrutinize the EMO list to establish NPCC's responsibility as a System Operator, which hadn't been done.

The DAC in its meeting held on October 09, 2023 directed that an inquiry committee be constituted headed by GHCL with three members from NTDC, NEPRA, CPPAG to probe the matter within a month. No further progress was reported till finalization of the report.

Audit recommends probing the matter for deviation from EMO and fixing the responsibility of person(s) at fault under intimation to Audit.

(Draft Para No.97/2023-24)

1.10.8 Extra financial burden due to mismanagement in the induction of IPP - Rs.3,041.38 million

As per Guidelines for setting up of Private Power Projects under short term capacity addition initiative dated August 2010, the projects are required to start commercial operations within 33 months after issuance of Letter of Support (LOS) or 24 months after execution of Project Agreements & Financial Closing (FC), whichever is earlier.

During audit of Private Power and Infrastructure Board (PPIB), the Letter of Support (LOS) was issued to M/s CIHC Pak Power Company Ltd. for the establishment of 300 MW based on imported coal on 23rd August, 2019. Later on, the matter regarding utilization of local (Thar) coal was deliberated by PPIB with all stakeholders and it was concluded that it was preferable to relocate the Project at mine mouth at Thar, Sindh and connect it with the national grid for supply of electricity to Gwadar rather than transporting coal from Thar to Gwadar for the Project. However, the M/s CIHC Pak Power Company Ltd. refused to relocate the Project and the use of local (Thar) coal. Meanwhile, the said Sponsor/Project Company approached NEPRA to revise tariff due to delay in supplemental (Implementation Agreement) and got the revised tariff approved at the rate of Rs.8.1227/kWh (against initial tariff of Rs.6.9654 /kWh). This resulted in extra financial burden of Rs.3,041.38 million per year on national exchequer due to mismanagement by PPIB.

Non-adherence to the guidelines resulted in extra financial burden due to mismanagement in the induction of IPP amounting to Rs.3,041.38 million during the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in June, 2023. The management replied that the CPPCL in August 2022, filed a review petition against NEPRA's tariff determination of 31st May 2019. NEPRA determined revised Tariff on 26th July 2023. However, the Project Company expressed dissatisfaction on tariff determination, despite being revised twice. CPPCL intended to file another review petition and requested NEPRA for additional time to prepare and submit the review petition.

The DAC in its meeting held on October 09, 2023 directed the management to conduct a fact-finding inquiry by CPPAG within 30 days. No further progress was reported till finalization of the report.

Audit recommends that the management needs to implement DAC's decision.

(Draft Para No.138/2023-24)

1.10.9 Loss due to blackout in the country due to negligence of NTDC- Rs.2794.19 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of Managing Director NTDC, an inquiry report regarding a blackout occurred in the country. The total power on load was 9091 MW. The frequency fluctuation was observed in system which caused blackout in the country. The NTDC was held responsible by NEPRA for full blackout and generation loss of 9091 MW and sustained loss amounting to Rs.2794.19 million to national exchequer. This state of affairs showed that the non-serious attitude of NTDC which needs justification.

Non-adherence to guidelines resulted in loss due to blackout in the country due to negligence of NTDC-Rs.2,794.19 million during the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in December, 2023. The management replied that partial system collapse occurred on October 13, 2022, a high-level Inquiry committee was constituted by NEPRA on April 13, 2023 to determine its causes/faults & recommend remedial measures to avoid recurrence of such events in future. After thorough investigation the said Inquiry Committee concluded that the causes & faults which resulted in Partial System Collapse are: "Mechanical failure of hardware/conductor of 500kV K2/K3 —NKI T/Line & 500kV K2/K3 — Jamshoro T/Line and false signal generated from 500kV Gatti G/Station caused tripping of 500kV T/Lines in the South and partially in North, which resulted in the tripping of power plants on account of under-frequency & over-voltage."

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance verified from audit with documentary evidence and share the inquiry report within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

1.10.10 Loss due to discrimination of Uniform System and allowing financial benefit to K-Electric at the cost of consumers of XWDISCOs - Rs.1,641 billion

According to Section 6.1.4 (I)(a) of Commercial Code “the Capacity Transfer Charge (CTC) is calculated as CTR and multiplied by the Monthly MDI of each respective Participant Representing Demand as below:

$$CTC = CTR \times MDI_{Market\ Participant\ Representing\ Demand}$$

Capacity Transfer Rate (CTR) is applied to Market Participants Representing Demand to recover payments to Generation Companies for Capacity Payments. CTR is calculated by adding Capacity Generation Costs of all Generation Companies for each billing month and subtracting sum of Liquidated Damages payable by generation companies for the billing month. The result of which is further divided by the sum of Maximum Demand Indicator recorded at all CDPs for each billing month.

During audit of Central Power Purchasing Agency Guarantee (CPPA-G), Islamabad, a tripartite Power Purchase Agency Agreement (PPAA) was signed between CPPAG, NTDC and K-Electric for provision of 150 MW power to K-Electric. CPPAG issued settlement advices to KE for basket price as calculated under the transfer pricing mechanism pursuant to the relevant clauses of Commercial Code of CPPAG as approved by the Authority. Settlement of CPP was based on non-coincidental MDI. The CDP points are the two power transformers installed at each of the three plants from where KE was drawing electricity. On meter reading, the collective non-coincidental MDI may exceed the capacity of the power plants. KE disputed the monthly CPP settlement advices of transfer charges claiming that the MDI is over and above the installed capacity of the generation plants and the matter was referred to NEPRA and decided that CPPAG should restrict the MDI to 150MW. This decision resulted in unfavorable revision of the CPP for all the months from June, 2019 to September 2020 as Rs.1,641 billion which was discrimination of uniform system and allowed financial benefits to K-Electric at the cost of the consumers of the rest of the country.

Non-adherence to Commercial Code and irrational decision of the regulator resulted in loss of Rs.1,641 billion due to discrimination of Uniform System and allowing financial benefit to K-Electric at the cost of consumers of XWDISCOs up to the Financial Year 2021-22.

The matter was taken up with the management in May, 2023 and reported to the Ministry in June, 2023. The management replied that after KE raised the issue with NEPRA, a tribunal favored KE in their dispute with CPPA-G over Transfer Charges. Despite CPPA-G's concerns about discrimination and Commercial Code violations, they recalculated the Capacity Charges, resulting in a Rs.1.641 billion increase for DISCOs and a decrease for KE. NEPRA approved the revised settlements, which CPPA-G, then, issued accordingly.

The DAC in its meeting held on October 09, 2023 directed the management to provide the working papers presented to NEPRA to audit for review within 07 days. No further progress was reported till finalization of the report.

Audit recommends that the management needs to implement DAC's decision.

1.10.11 Loss to the public exchequer due to extension in Revised Commercial Operation Date (RCOD) of Thar Energy Limited (TEL) – Rs.1,537.99 million

According to Section 9.4 (d) of PPA that if the Company is in breach of its obligation under section 4.1b to achieve the Commercial Operation Date by the Required Commercial Operation Date, then for each month (or any portion thereof, prorated daily) thereafter, until the commercial operation date is actually achieved, the Company shall pay the Power Purchaser, as Liquidated Damages an amount equal to 2.5 US\$ per kW/PM (or portion thereof, prorated daily) until the commercial operation date is achieved.

During audit of Central Power Purchasing Agency Guarantee (CPPA-G), Islamabad, Thal Energy Limited (TEL) and CPPAG signed Power Purchase Agreement on July 27, 2017 for procurement of 330 MW through ±660 kV HVDC Transmission Line. TEL did not achieve its Scheduled Commercial Operation Date i.e. December 31, 2020 which was revised as March 31, 2021 due to the fact that ±660 kV HVDC Transmission Line was not available to evacuate the power from TEL. HVDC line achieved its COD on September 30, 2021 at that time TEL was not available. However, CPPAG granted 2nd RCoD to TEL as November 23, 2021 but it actually achieved its COD on October 01, 2022 with the delay of 10 months. As per contractual clause 9.4 D, an amount of Rs.1537.99 million (*US\$ 7.508 million * PKR 204.8467 as on June 30, 2022*) was recoverable from TEL.

Non-adherence to the provision of PPA and Energy Mix resulted in loss to the public exchequer due to extension in Revised Commercial Operation Date (RCOD) of TharEnergy Limited (TEL)-Rs.1,537.99 million up to the Financial Year 2021-22.

The matter was taken up with the management in May, 2023 and reported to the Ministry in June, 2023. The management replied that after NTDC's Force Majeure Events (FME) duration declaration, CPPA-G's BoD extended TEL's RCoD by 237 days on December 21, 2021. Despite this, CPPA-G and NTDC imposed LDs for late commissioning and non-utilization of the ±660 HVDC T/L from November 23, 2021 to October 01, 2022, which TEL acknowledged. CPPA-G has adjusted/recovered USD 950,950 of the USD 7,707,702 from TEL's invoices. However, this approach was questioned due to the required but unachieved transmission infrastructure expansion, impacting the availability of cheaper electricity in the national grid.

The DAC in its meeting held on October 09, 2023 directed the management to conduct a fact-finding inquiry and get it vetted from GM T/S PPMC within a month as already decided in PDP-101/2023-24.

Audit recommends that the management needs to conduct an independent inquiry for giving extension in CoD of the project which resulted in massive loss to the Public Exchequer besides fixing responsibility of person (s) at fault under intimation to Audit.

(Draft Para No.102/2023-24)

1.10.12 Blockage of investment due to non-functioning of Gas equipment- Rs.1,465 million

According to Rule-5(5) of Public Sector Companies Corporate Governance Rules-2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented at all levels within the Public Sector Company, to ensure compliance with the fundamental principles of probity and propriety; objectivity, integrity and honesty and relationship with the stakeholders”.

During audit of GENCO-II, Gas Booster Compressor Station valuing 1,464 million was not functioning for the last three years. The said equipment was installed at power station in order to maintain required gas pressure

for smooth operation of gas turbines. Non-functioning of the same not only hampered the operational efficiency of power plants but also resulted in blockage of huge investment of Rs.1,465 million. It is pertinent to mention here that the said equipment stopped functioning during Defect Liability/ Warranty period. However, action taken against the EPC contractor was not made known to Audit.

Non-adherence to the provisions of the Public Sector Corporate Governance Rules resulted in blockage of investment amounting to Rs.1,465 due to the non-functioning of Gas Booster Compressor Station million during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that CPGCL had served the final notice to the firm on March 05, 2021 for completing the incomplete jobs and failing which CPGCL reserved the rights to en-cash the performance guarantee of Rs.127,829,685 but M/s Al-Tariq Constructors filed a suit before Honorable High Court of Sindh and Court passed interim order on March 15, 2021 by restraining encashment of PG. The outcome of the decision of the court would accordingly be communicated.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to pursue the court case vigorously. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 860/2023/24)

1.10.13 Non-recovery of Take-or-Pay invoices from supplier amounting to -Rs.1,288.94 million

According to Section-9 (ii) of Gas Sales Term Sheet between Mari Petroleum Company Limited (Seller) and Central Power Generation Company Limited (Buyer), "if the Seller fails to deliver to the Buyer a minimum of 70 % of the Monthly Contract Quantity in any month, it shall pay the Buyer for the shortfall in supply at the invoice value of the shortfall amount."

During audit of GENCO-II, M/s Mari Petroleum Company supplied less gas during the month of August & September, 2022. Resultantly, in the light of Gas Sales Term Sheet, Take-or-Pay invoices amounting to Rs.1,288.94 million were issued to the said company. However, recovery was not affected by the said supplier.

Non-adherence to provisions of the Gas Sales Term Sheet has resulted in non-recovery of Take-or-Pay invoices from supplier amounting to Rs.1,288.94 million during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that M/s Mari Petroleum Company Limited responded that the claim was not valid as the term sheet for sale of Mari Gas field to CPGCL expired on 8th Feb-2020. Subsequently, the term sheet extension on similar terms of "Take or Pay" basis beyond 08th Feb, 2020 was not agreed by MPCL despite the approval by BOD CPGCL. However, MPCL continuously supplied gas till Oct 31, 2022.

The DAC in its meeting held on December 22 & 23, 2023 directed to inquire the matter at GHCL level and submit its report within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

1.10.14 Loss due to payment on account of “Non-Project Missed Volume”–Rs.985.17 million

According to Energy Purchase Agreements, “Non-Project Missed Volume or NPMV” is the volume of Net Delivered Energy not delivered by the complex which non-delivery is due to a Non-Project Event(s). As per NEPRA Grid code CC 4.2(b), the preliminary estimate for connection fee and registration fee, fees shall be determined and shall be payable on submission of application for connection, and shall cover the reasonable costs of all works anticipated to arise from investigating the application to connect and preparing the associated offer to connect. This should include additional capital cost related to the new connection, and to make the connecting transmission system at par with the system before the connection.

During audit of Central Power Purchasing Agency (CPPA-G), Islamabad, an amount of Rs.985.17 million was made to thirty-six (36) Wind Power Plant and seven (7) Solar Power Projects on account of NPMV. The extra payments were made only due to the inefficiency of NTDC system as the projects were ready to deliver the energy as per agreements but the NTDC system was not capable enough to sustain full load of wind power/solar energy project. Hence, the payment of Rs.985.17 million made by the company without taking benefit of wind power/solar power had gone waste and the company had to sustain a loss to the tune of Rs.985.17 million.

Non-adherence to Grid Code resulted in loss of Rs.985.17 million due to payment on account of Non-Project Missed Volume up to the Financial Year 2021-22.

The matter was taken up with management in May, 2023 and reported to the Ministry in June, 2023. The management replied that NTDC was responsible for power evacuation and procurement from WPPs, with WPPs entitled to NPMV payments in case of failure. CPPA-G repeatedly urged NTDC for transmission line upgrades for efficient power evacuation. NTDC and NPCC, however, cited system integrity and reliability for curtailing WPPs' load. This response was deemed untenable as WPPs, being clean energy sources, are must-run projects, and load curtailment due to system constraints was considered unjustifiable.

The DAC in its meeting held on October 09, 2023 directed to conduct an inquiry at PPMC level within a month. No further progress was reported till finalization of the report.

Audit recommends that the management needs to investigate the matter for fixing responsibility for the loss due to non-upgradation of system before signing of contracts agreement without consideration of capability of existing infrastructure.

1.10.15 Loss on account of higher consumption of gas due to excess heat rate than NEPRA’s determination - Rs.887.05 million

NEPRA has determined the heat rate of 10,353 BTU/kWh on open cycle i.r.o 747 MW CCPP Guddu.

During audit of GENCO-II, the heat rate was found excessive as compared to the permissible limits fixed by NEPRA. As a result of excess heat rate, gas amounting to Rs.887.05 million was excess utilized in generation of electricity, which caused loss to Company.

Non-adherence to the NEPRA's standards resulted in loss on account of higher consumption of Gas due to excess heat rate than NEPRA's determination amounting to Rs.887.05 million during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that the actual amount was Rs.767.79 million. The major maintenance could not be performed timely due to financial constraints and load demand of the system operator. The major overhauling of GT-15 was in progress and the unit would be on the bar up to the end of this month and overhauling of GT-14 was scheduled in February 2024. After maintenance, the heat rate would be achieved.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to provide the record in support of reply to audit for verification within a week. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.1.10.9 having financial impact of Rs.491.72 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.775/2023/24)

1.10.16 Non-imposition of penalty on CPPA-G due to non-inclusion of cost of legal charges to market operator fees - Rs.545.55 million

According to Section 27(B) of NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 states that any person who acts in contravention of this Act or the rules and regulations made thereunder or fails to comply with the conditions of a license issued or registration granted to that person and such person is a party to such contravention shall be punishable in case of :- (a) a company, with a minimum fine of ten million Rupees which may extend to two hundred million Rupees and, in the case of a continuing default, with an additional fine which may extend to one hundred thousand Rupees for every day during which the contravention continues.

During audit of NEPRA, CPPA-G had claimed the legal charges amounting to Rs.545.55 million as a part of capacity charges in periodic tariff adjustment of 2nd quarter of FY 2019-20 to 4th quarter of FY 2021-22 but the same was being disallowed by NEPRA consistently. NEPRA directed the CPPA-G to make the cost of legal charges as part of market operation fees in determination of market operation fees for the FY 2020-21 & 2021-22. Accordingly, CPPA-G did not include the cost of legal charges in its capacity costs billed to DISCOs.

This scenario indicates that the cost of legal charges is being piled-up and financial impact / burden of such cost would be passed on to the consumers at the time of determination in periodically tariff adjustment. Despite non-compliance of NEPRA's directives, no penal action was taken against the CPPA-G.

Non-adherence to NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 resulted in non- imposition of penalty to CPPA-G due to non-inclusion of cost of legal charges of Rs.545.55 million to market operator fees up to the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in June, 2023. The management replied that the audit para pertained to the Regulatory Functions of NEPRA and it had already been clarified to Audit vide letter dated February 24, 2023 that the audit of regulatory functions of NEPRA might not be carried out as the same was beyond the statutory scope under section 14(2) of NEPRA Act and opinion of the Attorney General for Pakistan. The reply was not agreed to as the issue raised by Audit pertained only to non-imposition of penalty on CPPA-G due to non-compliance with NEPRA's directives.

Audit recommends that the management needs to look into the matter and take action against CPPA-G for non-compliance with NEPRA's directives.

(Draft Para No.51/2023-24)

1.10.17 Shifting the burden of capacity purchase price of net metering consumers to non-net metering consumers - Rs.380.52 million

According to Section 7, 31(4) and 31(7) of the NEPRA Act 1997, NEPRA is mandated to determine a uniform consumer end tariff at national level.

During audit of GEPCO, cost of electricity was recovered through sale of energy to end consumers on volumetric basis i.e. the cost of electricity is distributed on units consumed by the consumers. As a result, more the number of units are sold the lesser will be the per unit rate and vice versa. Shifting the consumers on net energy metering had increased the cost of electricity for consumers without net metering. Capacity charges due to reduced consumption of electricity from the national grid by the net energy metering consumers was allocated by DISCOs across its customer base. Thus, net energy metering increased the marginal cost of capacity charges for the consumers without net energy metering system. In GEPCO, net energy metering consumers averted the share of capacity purchase price to the extent of Rs.380.52 million during the year 2022-23 which was shifted on to the non-net energy metering consumers resulting in increase of per unit cost to non-net energy metering consumers.

Implementation of net-metering tariff resulted in shifting the burden of capacity purchase price of net metering consumers to non-net metering consumers entailing financial impact of Rs.380.52 million up to the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that matter was already under active consideration at the apex levels of national policy and plan. GEPCO, being licensee of distribution and supply businesses, was bound to regulatory regulations, determinations, injunctions and directives for charging consumer tariff to different categories including net metering consumers. The relevant office in the matter was NEPRA. However, audit observation and recommendations were noted for serious considerations and taking up with concerned stakeholders appropriately.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to devise / formulate the policy and expedite the matter with concerned stakeholders. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No.1314 /2023-24)

1.10.18 Loss due to Capacity Payment Charges due to reduction/ variation in fuel gas supplies - Rs.17.21 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved". According to terms and condition of Gas Supply Agreement between M/s Pakistan Petroleum Ltd and CPGCL & GOP allocation of gas, the fuel supplier was bound to supply 250 MMscfd gas from Kandhkot gas field being dedicated for Thermal Power Station Guddu.

During audit of GENCO-II, 4,767,610 kWh units were less generated during the months of August and September, 2022 due to reduction/ variation in fuel gas supplies from Kandhkot Gas Field. In the light of provisions of the Gas Supply Agreement, the Supplier was responsible for supply of dedicated fuel gas to Thermal Power Station Guddu. Failure of the supplier to meet with the contractual obligation warranted punitive/ remedial actions but no action was taken by the management. This resulted in generation loss of said units and deprived the company from capacity payment charges of Rs.17.21 million (4,767,610 x 3.61).

Non-adherence to the provision of Gas Supply Agreement resulted in generation loss due to capacity payment charges amounting to Rs.17.211 million due to reduction/ variation in fuel gas supplies during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that the gas allocation of Kandhkot gas field was 200 MMCF per day as per GSA. However, the minimum obligation of seller to supply gas was 145 MMCFD, which was 72.50% of Take or Pay quantity approved by ECC. During the period from August 19, 2022 to September 05, 2022, seller had supplied more than 145 MMCFD, hence, there was no short supply from seller and as such no generation loss occurred.

The DAC in its meeting held on December 22 & 23, 2023 directed to inquire the matter at GHCL level and submit its report within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 774/2023/24)

1.10.19 Non-recovery of service charges from IPPs - Rs.10.53 million

According to Energy Purchase Agreement Section 7.7(a) Not later than one hundred and twenty (120) days prior to the commercial operation date and in any event before any net delivered energy is delivered from the complex to the interconnection point, the seller shall at its own cost and expense procure and shall have installed and have operational the equipment listed.

During audit of NTDC Telecommunication, Lahore, the Service Charges Invoices amounting to Rs.10.53 million were issued to seven (07) IPPs. No payment was being paid by these IPPs due to non-inclusion of clause of Service Charges in Energy Purchase Agreement (EPA). The Chief Engineer Telecommunication providing continuous services to IPPs, but due to non-payment of Service Charges the company sustained a continues loss which shows negligence on the part of the management.

Non-adherence to EPA section 7.7 and prudent utilization of resources Chief Engineer Telecommunication providing services without any cost and incurred loss of Rs.10.53 million up to the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in June, 2023. The management replied that total invoice amounted to Rs.99,75,871 instead of Rs.10.53 million. The total invoice recovered supporting EPA clause was Rs.16,52,300 (40.31%). The matter related to remaining recoverable invoice was already taken up with the concerned IPPs.

The DAC in its meetings held on August 26, 2023 directed the management to submit revised reply and get the recovery record verified from audit and expedite the pending recoveries. No further progress was reported till finalization of the report.

Audit recommends that the management needs to implement DAC's decision.

(Draft Para No.68/2023-24)

Concluding Recommendations

Unsatisfactory management of power sector capacity and its allied infrastructure was a mega and multi-faceted issue faced by all government stakeholders of the power sector. If not addressed, the same would continue to negatively impact the economy and create further financial bottlenecks for the government. Moreover, highlighted cases of transmission failure and usage of expensive fuel may be looked into for future remedial measures.

1.11 Delay in Finalization / Implementation of Inquiry Cases

In order to achieve desired efficiency in the Power Sector, it was of paramount importance that an effective mechanism of administrative check and balance was implemented i.e. those found involved in negligence, irregularities or fraud should have been promptly and decisively proceeded against. This was necessary to ensure a transparent working environment and to prevent spread of irregular practices. On the identification of irregularity/fraud etc. inquiries were initiated at the level of respective companies. Serious embezzlement / unlawful incidents were probed through inquiries by PEPCO / PPMC which acts as an overall monitoring body over the power sector government entities on behalf of the ministry.

In the context of the above mechanism, it was analyzed that inquiries were not being concluded adequately in the power sector companies. There were instances where long delays were found in the processing of subject inquiries. Further even after finalization of inquiries by PEPCO/PPMC, there were cases of delays and inaction on the findings of the inquiries by the respective companies. This scenario implied that identified miscreants were not timely proceeded against, creating a negative and irregularity prone environment in the subject companies.

On the above lines, audit has analyzed the issue of unsatisfactory inquiry management, on sample basis, and shortcomings found are illustrated in the following paras:

1.11.1 Delayed determination of quarterly tariff adjustments affecting the entire cycle of revenue receipts - Rs.160,057.00 million

According to Section-31, Sub-section (7) (ii) of NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997, the Authority may, on a quarterly basis and not later than a period of fifteen days, make quarterly adjustments in the approved tariff on account of capacity and transmission charges, impact of transmission and distribution losses, variable operation and maintenance and, policy guidelines as the Federal Government may issue and, intimate the tariff so adjusted to the Federal Government prior to its notification in the official Gazette.

During audit of NEPRA, the Quarterly Tariff Adjustments (QTAs) claimed by DISCOs were not timely determined by NEPRA in contrary to the NEPRA Act. Delay in determination of tariff ranging from 4 to 8 months. This state of affairs caused cash shortfall for DISCOs exposing them for credit crunch and liquidity risk with respect to dwindling financial position. Delayed determination of QTAs by NEPRA created the snowball effect of late billing to consumers and thereafter, late collection from them added up to circular debt. Resultantly, the financial statements did not comply with the IFRS and did not reflect the fair and true presentation of receipts.

Non-adherence to NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 resulted in delayed determination of quarterly tariff adjustments of Rs.160,057.00 million affecting the entire cycle of revenue receipts from consumers to payments to IPPs/ debt servicing for the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Cabinet Division in June, 2023. The management replied that the audit para pertained to the Regulatory Functions of NEPRA and it had already been clarified to D.G Audit vide letter dated February 24, 2023 that the audit of regulatory functions of NEPRA might not be carried out as the same was beyond the statutory scope under section 14(2) of NEPRA Act and opinion of the Attorney General for Pakistan. The reply was not agreed to as only the matter of delay in determination of quarterly tariff adjustments was highlighted in contrary to timelies defined in NEPRA Act.

Audit recommends that the management needs to look into the matter besides determining the quarterly tariff adjustment as per time line given in NEPRA Act-1997.

(Draft Para No.50/2023-24)

1.11.2 Non-initiating the action of blacklisting due to non-execution / completion of the contract - Rs.3,455.40 million

According to Rule-19 regarding blacklisting of suppliers and contractors of PPRA Rules, 2004, the procuring agencies shall specify a mechanism and manner to permanently or temporarily bar, from participating in their respective procurement proceedings, suppliers and contractors who either consistently fail to provide satisfactory performances or are found to be indulging in corrupt or fraudulent practices. Such barring action shall be duly publicized and communicated to the authority.

During audit of Project Directorate EHV-II NTDC, Multan, a contract No.200-2018 (Lot-I) under ADB Loan for procurement, design, manufacturing, supply, installation, testing and commissioning of 220 kV Mirpur

Khas substation and extension at Hala Road Substation was awarded to M/s Power China SEPCO-1 Electrical Power Construction Company Limited China at cost of Rs.3,455.40 million (US\$10.036 million + Rs.431.195 million + Provisional Sums Pak Rs.154.00 million) on November 18, 2019. The date of commencement was started on January 17, 2020 and the contractor was required to complete the work within 540 days i.e. July 10, 2021. But the contractor did not start the construction activities at site and failed to execute / complete the work despite serving several notices for termination by the Chief Engineer (Project Delivery / GSC South) NTDC, Hyderabad vide letter dated September 30, 2021, which resulted in unsatisfactory field performance. Neither performance guarantee was encashed under contract clause, nor the action of blacklisting was initiated against the contractor in the light of contract clause-42 and PPRA Rules.

Non-adherence to the PPRA Rules resulted in non-initiating the action of blacklisting against the contractor during the Financial Year 2021-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the said project had gained significant completion progress 60.44%, however, the Contractor would be evaluated in the light of Contract Provisions if work was not completed within stipulated period.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the record verified from audit in support of reply within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 698/2023-24)

1.11.3 Non-finalization of inquiries / disciplinary cases having financial impact - Rs.476.08 million

According to Commercial Procedure, "Revenue Officer is responsible for: i) Implementing in conjunction with the Executive Engineer, the commercial policy laid down from time to time by the Authority through the Company. ii) Efficient application of billing and collection procedures". According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of DISCOs & PPMC, it was observed that 107 inquiries were constituted to probe into the cases of poor quality of material, theft, shortage of material, mis-appropriation, embezzlement and release of LD etc having financial impact o Rs.476.08 million. In some cases, the inquiry committees had been concluded, however, implementation of their recommendations and finalization of remaining inquiries were not forthcoming from the record. The detail is as under:

Sr. No.	Company	Draft Para No.	No. of Cases	Amount (Rs.in million)
1.	FESCO	1126/2023-24	16	145.43
2.	GEPCO	49/2023-24	1	20.86
3.	HESCO	783/2023-24	4	25.41
4.	MEPCO	899/2023-24	2	24.28

5.	PESCO	853/2023-24	1	0
6.	QESCO	957/2023-24	80	260.10
7.	PPMC	773/2023-24	3	0
TOTAL			107	476.08

(Source: Disciplinary Case File)

Non-adherence to the Authority's instructions resulted in non-finalization of inquiries / disciplinary cases having financial impact of Rs.476.08 million up to the Financial Years 2019-23.

The matter was taken up with the management in April & November, 2023 and reported to the Ministry in May & December, 2023. The management replied that in some cases inquiries / disciplinary cases had been finalized while remaining were under process.

The DAC in its meetings held on December 14, 2023 to December 23, 2023 directed the management to get the record of completed action verified from audit within 15 days and expedite the inquiry proceedings in remaining cases. The DAC did not agree with the reply of FESCO and directed the management to get all inquiries reviewed at Director Operations' level and also directed the management of QESCO to expedite the matter and prepare special committee for early finalization of inquiries and submit its report to audit within 30 days. No further progress was intimated till the finalization of report.

Audit recommends implementation of DAC's decision.

1.11.4 Financial implication of cost of capacity charges of KAPCO due to non-inclusion in periodic tariff adjustment - Rs.227.00 million

Section-31,Sub-section(7)(ii) of NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 states the Authority may, on a quarterly basis and not later than a period of fifteen days, make quarterly adjustments in the approved tariff on account of capacity and transmission charges, impact of transmission and distribution losses, variable operation and maintenance and, policy guidelines as the Federal Government may issue and, intimate the tariff so adjusted to the Federal Government prior to its notification in the official Gazette.

During audit of NEPRA, Islamabad, cost of capacity charges of Rs.227.00 million on accounts of trueing up of costs pertaining to previous periods of KAPCO was claimed in periodic tariff adjustment by the CPPA-G. The said amount was neither disallowed nor allowed in quarterly tariff adjustment up to 4th quarter of FY 2021-22 by NEPRA.

Hence, the cost of capacity charges of KAPCO had been piled-up and financial impact / burden of such cost would be passed on to consumers at the time of determination in periodically tariff adjustment.

Non-adherence to NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act, 1997 resulted in financial implication of cost of capacity charges of Rs.227 million of KAPCO due to non-inclusion in periodic tariff adjustment up to the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in June, 2023. The management replied that the audit para pertained to the Regulatory Functions of NEPRA and it had already been clarified to Audit vide letter dated February 24, 2023 that the audit of regulatory functions of NEPRA might not be carried out as the same was beyond the statutory scope under section 14(2) of NEPRA Act and opinion of the Attorney General for Pakistan. The reply was not agreed to as the matter of KAPCO’s capacity charges was needed to be addressed.

Audit recommends that the management needs to look into the matter besides ensuring to decide the cost of capacity charges of KAPCO in periodic tariff adjustment.

(Draft Para No.52/2023-24)

1.11.5 Non-recovery of penalty imposed on employees – Rs.9.21 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of PESCO and NTDC, it was observed that the inquiry committees recommended stern disciplinary actions and imposed penalties amounting to Rs.9.21 million on officers/officials involved in different types of irregularities including theft of transformer / misappropriation and shortage of material. However, no action was taken by the management as neither the disciplinary actions was taken, nor the amount was recovered from the delinquents. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Amount (Rs.in million)
1.	PESCO	1099/2023-24	2.60
2.	NTDC	478/2023-24	6.61
TOTAL			9.21

(Source: DISCOs Disciplinary Case File)

Non-adherence to the authority’s directions resulted in non-recovery of penalty imposed amounting to Rs.9.21 million regarding during the Financial Year 2022-23.

The matter was taken up with the management in September and October, 2023 and reported to the Ministry in November and December, 2023. The management of PESCO replied the management replied that in light of the inquiry committee's recommendations, actions against the officials had been taken and the management of NTDC replied that the matter was being pursued in court.

The DAC in its meeting held on December 14-23, 2023 directed the management of PESCO to get the record verified in support of reply within 15 days from audit and DAC also directed the management of NTDC to pursue the court case vigorously. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.11.6 Delay in determination of monthly Fuel Charges Adjustment (FCAs) by NEPRA

According to Section-31; Sub-section(7)(iv) of NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 states that the Authority may, on a monthly basis and not later than a period of seven days, make adjustments in the approved tariff on account of any variations in the fuel charges and policy guidelines as the Federal Government may issue and, notify the tariff so adjusted in the official Gazette.]

During audit of NEPRA, Islamabad, CPPA-G submitted monthly data of actual fuel cost components to NEPRA in order to make adjustments in the approved tariff of the Ex-WAPDA DISCOs due to variation in the fuel charges. NEPRA was required to determine adjustment on account of variations in fuel charges in the approved tariff of XWDISCOs not later than a period of seven days, which was not done. The detail is as under:

Period (2021-22)	NEPRA Notification dated	Actual Fuel Charges Rs/kWh	Corresponding Reference Fuel Charge Rs/kWh	Fuel Price Variation Rs/kWh	Billing Month
July,2021	10.09.2021	6.6570	5.2798	1.3771	September,2021
August,2021	08.10.2021	6.6873	4.7334	1.9539	October,2021
September,2021	08.11.2021	7.5502	5.0229	2.5272	November,2021
October,2021	09.12.2021	9.9179	5.1733	4.7446	December, 2021
November,2021	13.01.2022	8.0401	3.7381	4.3020	January,2022
December,2021	11.02.2022	8.6315	5.5347	3.0968	February,2022
January,2022	10.03.2022	12.4614	6.5124	5.9490	March,2022
February,2022	14.04.2022	9.1046	4.2516	4.8530	April,2022
March,2022	06.05.2022	9.0975	6.2295	2.8680	May,2022
April,2022	09.06.2022	10.6010	6.6087	3.9923	June,2022
May,2022	07.07.2022	13.8363	5.9322	7.9040	July,2022

June,2022	12.08.2022	15.8316	5.9344	9.8972	August,2022
-----------	------------	---------	--------	--------	-------------

While deciding the fuel price adjustment (FPA) for the month of May, 2022 under scheme of Law, one of the NEPRA’s Member raised the issue in detail by giving the following descending note;

“The adjustment should have been done within first 07 days. In term of time value of money - how and to whom this delay will effect? The delay in processing of adjustment ultimately affects the electricity consumers or the tax payers. The amount claimed on account of previous adjustment is more than Rs.6.5 billion. In view of time Value of Money, this needs to be audited that for which period this amount pertains to. Considering the Judgment of the Honorable Supreme Court with regard to pass on the FCA amount, NEPRA has already decided that previous claims, if any, shall be submitted as early as possible but beyond the period of 180 days the petitioner shall have to justify it. Therefore, in the instance case, it is required to carry out an audit regarding period of previous adjustment claim and calculate the financial impact of the delay”.

Late determination of monthly Fuel Cost Adjustment (FCA) did not allow the DISCOs to pass on and recover the electricity dues from consumers timely, hence, the same was causing pilling up of receivables and badly affecting the liquidity position of the company,

Non-adherence to NEPRA Regulation of Generation, Transmission and Distribution of Electric Power Act 1997 resulted in delay in determination of monthly Fuel Charges Adjustment (FCAs) by NEPRA up to the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in June, 2023. The management replied that the audit para pertained to the Regulatory Functions of NEPRA and it had already been clarified to D.G Audit vide letter No. NEPRA/Dir (Finance)/MCM-01/4062 dated February 24, 2023 that the audit of regulatory functions of NEPRA might not be carried out as the same was beyond the statutory scope under section 14(2) of NEPRA Act and opinion of the Attorney General for Pakistan. The reply was not agreed to as only the matter of delay in determination of Fuel Cost Adjustment (FCA) was highlighted in audit observation the matter.

Audit recommends that the management needs to look into the matter besides determining the FCA adjustments as per time line given in NEPRA Act-1997.

(Draft Para No. 53/2023-24)

1.11.7 Non-implementation of BoD’s decision regarding auditing of AEDB from Chartered Accountant Firm

As per Minutes of 55th AEDB Board Meeting Agenda Item No.08 “AEDB Section 14(2) act provides that the accounts of Board, Institute and Organization shall be audited by a reputable firm of Chartered Accountants,

who are within the meaning of Chartered Accountants 1961 (X of 1961) from a panel of Chartered Accountants proposed by the Board on such terms and condition as the Board may determine.

During audit of AEDB, it was observed from Minutes of the 55th AEDB Board meeting that the accounts of Board, institute and Organization shall be audited by a reputable firm of chartered Accountants but the same has not yet been audited since, 2008. The passive approach indicates lack of interest on the part of AEDB towards implementation of BoD's decision.

Non-adherence to BoD decision resulted in non-audited of financial statements from Chartered Accountant firm up to 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that the services of M/s Baker Tilly Mehmood Idrees Qamar, Chartered Accountants for conducting audit of AEDB (now PPIB) accounts for the fiscal years 2007-08 to 2021-22. The execution process of external audit was started from June 14, 2023 and now was at final stage.

The DAC in its meeting held on December 14 & 15, 2023 directed the management to provide the record in support of reply to audit besides furnishing the approval of the office of the Auditor-General of Pakistan in hiring the services of Chartered Accountant within a week. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.3.2.8.2.3.18 having financial impact of Rs.657.85 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.729/2023-24)

1.12 Unsatisfactory Maintenance of Accounts

In order to have transparent and efficient business operations it was essential to maintain the accounts in an accurate and timely manner. Accounts represent a key final manifestation of the overall working of an organization and its business outcomes. Lapses in account management practices create an environment highly vulnerable towards financial misappropriations and irregularities.

In this context, audit observed instances of in-ordinate delay in accounts finalization, inaccurate recording of data etc. Comments on the financial statements of the companies are placed in Chapter-2 whereas shortcomings pertaining to accounts management, analyzed on sample basis, are illustrated in the subsequent paras.

1.12.1 Non-updation of security amounts in consumer account / profile - Rs.5,048.60 million

According to Para 5.4 of Consumer Service Manual, DISCO shall maintain a separate bank account for the security deposits in accordance with the provisions laid down under Section 217 of the Companies Act 2017. DISCO (DISCO to insert its name) shall not utilize this amount for any of its purposes. The profit so received from this security deposit account shall be mentioned in the tariff petition for passing on the benefit to the consumers.

During audit of DISCOs, it was observed that 1.264 million running consumers of different categories having sanctioned load one and above show zero security amounts in their respective accounts and profile. However, security amounts deposited by the consumers have not been updated in security deposit register as per commercial procedure manual form No.26 (old) and new form 45 (New) accounts by the concerned revenue officers. This shows that in case of default of consumer's connection, DISCOs had nothing to adjust against their arrears. Due to non-updation of security amounts in respective consumer account, the chances of misappropriation of security amounts in bank account could not be ruled out. Hence, security amounts Rs.5,048.60 million (approx) at prevailing rates were required to be updated and reconciled with security bank accounts. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No of Consumers	Amount (Rs.in million)
1.	FESCO	81 & 969/2023-24	699,009	2,940.95
2.	GEPCO	363 & 717/2023-24	494,583	1,864.02
3.	LESCO	339/2023-24	501	1.16
4.	PESCO	564/2023-24	65,039	192.37
5.	QESCO	1309/2023-24	4,382	50.10
TOTAL			1,263,514	5,048.60

(Source: DISCOs MIS generated report)

Non-adherence to instructions of Consumer Service Manual resulted in non-updation of security of Rs.5,048.60 million in consumers' account/profile up to the Financial Year 2022-23.

The matter was taken up with the management during April to October, 2023 and reported to the Ministry in June to December, 2023. The management replied that account number wise lists had been forwarded to field formations to check / verify the security amount from record and update the security amount, if not already updated. It was added that some of the cases were updated and the matter was being inquired in few cases.

The DAC in its meeting held on December 14-23, 2023 directed the management to get the record of completed action verified from audit within 15 days and expedite the **pending actions within 60 days. The DAC also directed the management of GEPCO and PESCO to expedite the inquiry and submit its report to audit within a month.** No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.12.2 Non-recovery from consumers as pointed out in agreed audit notes – Rs.630.33 million

According to Section-7.3 of Power Distribution Companies Internal Audit Manual, internal audit is responsible for follow up process for significant audit results, which involves tracking, monitoring, and validating

management actions to ensure that the operating effectiveness of relevant controls has been corrected and / or controls have been implemented to achieve the desired results.

During audit of PESCO and SEPCO, it was observed that 1,822 audit notes amounting to Rs.630.33 million were issued to the concerned formations by Internal Audit, which were agreed / accepted by the concerned formations for recovery from consumers but the recovery was not made. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No of Audit Note	Amount (Rs.in million)
1.	PESCO	1241/2023-24	1,788	626.98
2.	SEPCO	661/2023-24	34	3.35
TOTAL			1,822	630.33

(Source: Manager Internal Audit Reports for the year 2022-23)

Non-adherence to Authority's instructions resulted in non-recovery from consumers as agreed audit notes amounting to Rs.630.33 million during the Financial Year 2022-23.

The matter was taken up with the management in September and November, 2023 and reported to the Ministry during November to December, 2023. The management replied that all the field formations had been strictly directed to debit and recover the amount.

The DAC in its meeting held on December 14-23, 2023 directed the management to expedite recovery and get the record verified from Audit within 30 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.12.3 Over-statement of assets due to irrational booking of employee's retirement benefits to works - Rs.610.41 million

As per FAM-1 (9)(10) (Fixed Assets Management) of DISCOs accounting manual, the amounts of Labor and Overheads [8% and 12% respectively] are debited to Labor CWIP and Overhead CWIP and credited to Labor Pool Clearing Accounts respectively.

During audit of CEO GEPCO, a debit advice of Rs.610.41 million on account of employee's post-retirement benefits raised to the office of PD Construction and PD GSC, which were booked / charged to works being executed in respective offices. Since charging of employees' retirement benefits had caused excess charging of overheads to the works in hand beyond permissible limit of 20%. This showed that charging of post-retirement benefits was made on the calculation of the strength of employees performing their duties in these offices, which made the assets overstated.

Financial mis-management resulted in overstated assets due to irrational booking / charging of employees' retirement benefits amounting to Rs.610.41 million to works during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that there was shortage of staff against the sanctioned strength.

The increase in overhead was mainly attributable to increased salaries, wages and other benefits and keeping in mind the prevailing inflationary factor in the country. However, the recommendation of audit for not charging the Post Retirement Benefits to the said offices to keep their overheads within limit would be adopted after consulting with Commercial Auditors.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to submit revised reply to audit by justifying the stance with reference to GEPCO accounting manual / SOPs / Rules etc besides expediting consultation with commercial auditors. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 1299/2023-24)

1.12.4 Non-initiating of SDGs'/SAP Schemes within the specified Financial Year of identification - Rs.540.33million

According to Para-ii of letter No.20 (1) PIA-I/PC/2021 dated December 28, 2022 of the Ministry of Planning, Development and Special Initiatives of Government of Pakistan, "If the project does not start functioning within 12 months of its approval or does not achieve financial close, then it will be reconsidered by the approving forum."

During audit of Project Directorate (C&O) PESCO, 237 SDGs'/SAP schemes costing Rs.540.33 million were approved from competent forum in the Financial Year 2022-23. However, execution on these works were not started and these works remained untouched. Neither these schemes were started nor the funds were surrendered to the Federal Government/Cabinet Division.

Non-initiating of SDGs' schemes amounting to Rs.540.33 million resulted in violation of guidelines of the Ministry of Planning, Development and Special Initiatives of Government of Pakistan during the Financial Year 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that the administrative approval and funds were received during different months. The processing of estimates and procurement of material and the award to contractor was a time-consuming process, however most of the works were completed and the remaining / in progress work would be completed, and audit would be informed accordingly.

The DAC in its meeting held on December 14 & 15, 2023 directed the management to submit revised detailed reply along with verification of completed actions within 15 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 300/2023-24)

1.12.5 Irregular booking of gas consumed at TPS colony to power plants – Rs.508.29 million

According to Rule-5(5) of Public Sector Companies Corporate Governance Rules-2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented at all levels within the Public Sector Company, to ensure compliance with the fundamental principles of probity and propriety; objectivity, integrity and honesty and relationship with the stakeholders”.

During audit of GENCO-II, the gas was utilized without gas metering in Thermal Power Station Colony Guddu. A survey for gas consumption in colony was conducted by SNGPL team during 2020-21 which depicted 657 MMCFT annual consumption of gas at TPS Colony Guddu. Resultantly gas amounting to Rs.508.291 million (including 17% GST) was utilized in TPS Colony Guddu. However, the said cost was booked against generation plants instead of recovery of the same from the inhabitants of colony.

Non-adherence to Public Sector Companies Corporate Governance Rules-2013 rules resulted in irregular booking of gas consumed at TPS colony to power plant amounting to Rs.508.29 million during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that CPGCL had been making continuous attempts for getting gas but SNGPL conveyed that GoP had imposed ban on new gas connections. The assertion challenging the reported consumption of 657 MMCFT of gas in TPS Colony Guddu for the year 2022-23, as pointed out in SNGPL survey maintained that the survey report did not mention any such consumption quantity.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to devise the plan for disconnecting the gas connections along with recovery of cost of gas from residents / consumers of TPS Colony Guddu and present this plan before BoD for decision within a month. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC’s decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.1.12.5 having financial impact of Rs.460 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No. 776/2023/24)

1.12.6 Non-adjustment / recovery on account of de-escalation from contractor – Rs.235.73 million

According to Appendix-2 (Price Escalation/Adjustment) of contract, the employer was entitled to adjust / recover any sum on account of price de-escalation.

During audit of NTDC, the Consultant M/s NESPAK had pointed out a sum of Rs.235.73 million (RMB 10.33 million) to be recovered from contractor on account of de-escalation of price in contract no. ADB-65(R)-2012 (Package-I) for procurement of plant, design, supply, installation, testing & commissioning of 500 kV transmission line 3rd Circuit Jamshoro-Moro-Dadu to Rahim Yar Khan Lot-III (Goth Qazi Mahar- Rahim Yar Khan Section). However, the adjustment / recovery of the de-escalated amount was not forthcoming from record.

Non-adherence to Contract Clause resulted in non-adjustment / recovery of Rs.235.73 million (RMB 10.33 million) on account of de-escalation from contractor up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that the case of price adjustment was under review with Consultant i.e. NESPAK and de-escalation amount would be recovered from the Performance Guarantee and Retention Money of the contractor. Audit contended that the said amount was to be recovered from the progress payment invoices of the contractor instead of Performance Guarantee / Retention Money.

The DAC in its meeting held on April 12, 2021 did not agree with the reply and directed the management to provide detailed / revised reply. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No reply was furnished till finalization of the report.

Audit recommends that the management needs to expedite the adjustment / recovery on account of price de-escalation.

(Draft Para No. 1122/2023-24)

1.12.7 Irregular booking of overheads in dubious project ledger - Rs.221.35 million

As per accounting DISCOs accounting manual, the amounts of Labour and Overheads [8% and 12% respectively] are debited to Labour CWIP and Overhead CWIP and credited to Labour Pool Clearing Accounts respectively.

During audit of GSC LESCO, an amount of Rs.221.35 million comprising overheads, civil & other expenses was charged / booked against a project No.201191076 namely "Construction of Security Room" at 132 kV grid station Raiwind. However, no expenses on account of material and labor was incurred / booked against the said work, which indicated that no such project / work was being carried out at site. This scenario indicated that a dummy project ledger was being used to park the excess overheads (above 20%). The expenses on account of overheads were required to be charged against respective works, which was not done. Such practice was against the fundamental principles of fair presentation of financial statements and raised questions on the authenticity of financial statements.

Non-adherence to Accounting Manual resulted in irregular booking of overheads amounting to Rs.221.35 million in dubious project ledger during the Financial Year 2022-23.

The matter was taken up with the management in August; 2023 and reported to the Ministry in November, 2023. The management replied that the booking of overhead in dubious project ledger had been stopped as per advice of the Audit and the such expenditure was being charged to ongoing works as practice in vogue.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to carry out the Special Audit of this specific project ledger from Manager internal Audit LESCO and finalize the report within one month. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 633/2023-24)

1.12.8 Incorrect charging of expenditure of temporary grid station Rohri to O & M head of accounts – Rs.204.97 million

According to basic accounting principle, all the expenditure incurred on acquisition of assets are capitalized and accounted for in the proper designated Head of Account whereas expenditure on operation and maintenance are accounted for in the respective Expenses Head of Account.

During audit of NTDC, an expenditure of Rs.204.97 million was incurred on construction of temporary grid station at Rohri without any provision in the approved PC-I. However, while preparing estimates, the cost was charged to O & M head of account. The charging of capital expenditure to expense head was not admissible as it was against the basic accounting principle.

Non-adherence to the accounting principle resulted in incorrect charging of expenditure amounting to Rs.204.97 million incurred on Temporary Grid Station Rohri to O&M head of accounts up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that the project cost was recorded under 'Capital Work in Progress' and capitalized later on. Further, there was no O&M account existed in the books of project management. Audit contended that the estimates revealed charging of cost of temporary grid to O&M head.

The DAC in its meeting held on April 12, 2021 directed the management to constitute fact finding committee and submit its report to Audit under the signature of MD NTDC. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No further progress was reported till finalization of the report.

Audit recommends that the management needs to implement DAC's decision.

(Draft Para No. 1205/2023-24)

1.12.9 Irregular issuance of debit advices without capitalization of completed work - Rs.194.39 million

According to FAM-2.3 Form AB-161 Sr. No. 28 of Financial Accounting Manual: "a) Debit Advice(s) prepared from the transfer of each project to the concerned Division of GSO with the supporting documents which includes: i) A-90 Form ii) AB 161 Form.

During audit of GSC HESCO, electrical material was procured amounting to Rs.1, 223.03 million under Loan No. 7565-Pak through various purchase orders during the Financial Year 2013-14. Out of this, A.B.C cable was drawn by XEN TLC Division amounting to Rs.194.39 million for construction of electrical work at different sites through various SRs. After examination/scrutiny of record it was observed that 11 No. debit advices valuing Rs.194.39 million were issued to different formations without provision of completion report A-90, handing/taking over certificate of the concerned formation. Hence due to non-availability of the completion report A-90 handing/taking over certificate authenticity of debit advices could not be ascertained.

Non-adherence to the Financial Accounting Manual resulted in irregular issuance of debit advice without capitalization of completed work amounting to Rs.194.39 million during the Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that procurement of material was not under the purview of PD GSC.

This work was not carried out through GSC division hence handing /taking over certificates did not pertain to GSC directorate. The debit advices were issued just only to regularize the books.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to inquire the matter and submit report to Audit within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 632/2023/24)

1.12.10 Non-charging/recovery of markup against extension in due date for payment of energy bills -Rs.99.09 million

According to Para-1.3 of Commercial Procedure, “the Revenue Officer and Assistant Manager are responsible for; i) implementing in conjunction with the Executive Engineer, the commercial policy laid down from time to time by the Authority through the Company, ii) efficient application of billing and collection procedures”.

During audit of CEO GEPCO, due date of payment of 29,132 consumers were got extended during the year but markup amounting to Rs.99.09 million was not charged and collected. Moreover, the company had not any built-in mechanism for charging of markup in billing and collection software. GEPCO had to pay supplemental charges on the delayed payments of IPPs as CPPA-G had raised invoices against the same but due to no mechanism of charging/ recovery of mark up of electricity from the consumers, it had sustained loss to the stated extent.

Non-adherence to commercial procedures resulted in non-charging/recovery of markup amounting to Rs.99.09 million against extension in due date for payment of energy bills during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that mark up on extended due dates being charged as per rules. However, account number wise lists had been forwarded to field formation to check and charge mark-up if not already charged. The progress in this regard would be intimated to audit in due course of time.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to complete the pending action expeditiously and get it verified from audit within a month. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC's decision.

(Draft Para No. 800/2023-24)

1.12.11 Non-clearance of deferred amount adjusted under Category “C” - Rs.62.47 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of Operation Circle MEPCO Muzaffargarh, it was observed that four million excess units were charged under “C” category to M/s PARCO amounting to Rs.62.47 million and the same amount was deferred by department up till now and inquiry was held long ago for it but decision was pending. Moreover, inquiry showed that the action of charging 4 million units was taken to manage the line losses of the circle. The SDO was under pressure from high ups therefore, he took the step. It blatantly highlights the routine of the company to go for overbilling to the consumers in order to minimize the line losses.

Non-adherence to Authority guidelines resulted in non-clearance of deferred amount under category “C” amounting to Rs.62.47 million up to the Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that an inquiry committee was constituted by the competent authority vide dated November 25, 2016 which was finalized and it was recommended to take action against the three officers accordingly as per departmental inquiry finalized against all officers, who were held responsible in recommendation. The revision of unjustified charging of Rs.62.47 million was under process in Commercial Directorate MEPCO Multan; vide S.E (OP) MEPCO Circle M/Garh dated December 15, 2023 for approval to withdraw the amounting to Rs.62.47 million without units.

The DAC in its meeting held on December 20 & 21, 2023 directed the management to re-inquire the matter and submit its report to audit within 30 days. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC’s decision.

(Draft Para No. 611/2023-24)

1.12.12 Non-adjustment of security deposits against the arrears of P-Disc. consumers - Rs.31.86 million

According to Para-5 of Commercial Procedure Manual, “When a Permanent Disconnection has been effected and final bill prepared by W.C.C the amount of the Security Deposits held against the consumer is adjusted against his outstanding bill”.

During audit of FESCO and GEPCO, it was observed that 24,674 consumer connections had permanently been disconnected due to having arrears. The security amounting to Rs.18.11 million was appearing against profile of GEPCO’s consumers, however, the same was not adjusted against arrears by placing the consumers under Dead Defaulters Batches-26 & 36. Moreover, arrears of Rs.13.75 million were appearing against the FESCO consumers. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No of Consumers	Amount (Rs.in million)
1.	FESCO	1064/2023-24	20,611	13.75
2.	GEPCO	365/2023-24	4,063	18.11
TOTAL			24,674	31.86

(Source: DISCOs MIS generated report)

Non-adherence to Commercial Procedure resulted in non-adjustment of security deposits of Rs.31.86 million against the arrears of P-Disc. consumers up to the Financial Year 2022-23.

The matter was taken up with the management in September and October, 2023 and reported to the Ministry in October and December, 2023. The management replied that recovery so achieved would be posted against consumers’ security accounts and progress would be placed before Audit.

The DAC in its meeting held on December 14-23, 2023 directed the management to expedite the matter and record of completed action be provided to audit for verification within a month. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC’s decision.

1.13 Miscellaneous Issues

1.13.1 Loss due to non-obtaining of insurance coverage - Rs.40,000.16 million

As per NEPRA determination, NEPRA had allowed insurance cost component to GENCO-II in the tariff determination of 747 MW Combined Cycle Power Plant vide its Tariff determination dated April 24, 2016. The Board of Directors CPGCL (GENCO-II) in its 64th BoD meeting held on February 03, 2016 accorded approval to get the insurance cover for assets of 747 MW CCPP, Guddu through competitive bidding”.

During audit of GENCO-II and MoE, it was observed that due to a fire incident happened on July 10, 2022 at Steam Turbine-16, Steam Turbine and its allied equipment valuing (approx.) Rs.38,969.41 million were damaged and the Gas Turbines-14&15 remained under forced outage in January, 2023 for 431 hours and 744 hours respectively on the pretext of “no insurance coverage” which caused generation loss of 285.525 GWH units and loss of Capacity Payment Charges amounting to Rs.1,030.75 million. The insurance coverage of the said plant was not obtained despite having the provisions of insurance cost component in NEPRA Tariff determination and clear-cut directions of the BOD. Resultantly, the company had to suffer loss of Rs.40,000.16 million due to non-obtaining of insurance coverage. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Cases	Amount (Rs.in million)
1.	GENCO-II	728 & 767/2023-24	2	40,000.16
2.	MoE	158/2023-24	1	0
TOTAL			3	

(Source: Contract Correspondence File)

Non-adherence to the provision of NEPRA Tariff determination and directions of the BOD resulted in loss due to due to non-obtaining of insurance coverage (approx.) -Rs.40,000.16 million up to the Financial Year 2022-23.

The matter was taken up with the management in March & October, 2023 and reported to the Ministry in November, 2023. The management replied that an inquiry committee constituted to probe into the fire incident upon the directives of Prime Minister Pakistan submitted its report on October 19, 2022. The committee recommended, concluded and held collectively responsible top management of CPGCL, BOD as well as NICL & PRCL. Since 2015, a series of efforts carried out to get the insurance for the plant but the efforts were not fruitful due to various reasons at different stages. However, as per schedule, the plant would be insured by the end of February, 2024. Audit contended that the responsibility of huge loss sustained to company due to non-obtaining of insurance cover needed to be fixed.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to inquire the matter at GHCL level and expedite the insurance process and submit its report to audit within 30 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.13.2 Non-contribution to WWF & WPPF - Rs.10,280.08 million

According to section 4 of Punjab Workers Welfare Fund Act 2019 "every establishment or a part thereof, the total income of which in any year of account commencing on or after the date of closing of accounts on 30th June or 31st December, as the case may be, is not less than rupees five hundred thousand, shall be liable to pay to the Fund in respect of that year a sum equal to two percent of its total income."

According to Section 3 of Companies Profit (Workers Participation) Act 1968 "Every company to which the scheme applies shall - establish a Workers Participation Fund in accordance with the scheme as soon as the accounts for the year in which the scheme becomes applicable to it are finalized, but not later than nine months after the close of that year."

During audit of NPPMCL, it was observed that NPPMCL had not made any contribution towards the WWF and WPPF amounting to Rs.10,280.08 million. The outstanding payable amount, as reported in financial statements on June 30, 2023, was Rs.2,616.85 million for WWF and Rs.7,663.23 million for WPPF.

Non-adherence to Section 4 of Punjab Workers Welfare Fund Act 2019 and Section 3 of Companies Profit (Workers Participation) Act 1968 NPPMCL had outstanding payables of Rs.10,280.08 million up to the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that the Company had sought clarification from Federal Government through letter dated April 15, 2022 and reminders dated November 24, 2022, February 22, 2023, May 08, 2023, and July 31, 2023 however, response was awaited from Federal Government. Latest clarification had again been sought recently. Once the response is received, the Company would disburse the WWF and WPPF contributions accordingly.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to resolve the matter at ministry level and get the record verified from Audit. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 822/2023-24)

1.13.3 Loss due to fire incidence at Steam Turbine - Rs.8,049.30 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of GENCO-II, a fire incident was occurred at Steam Turbine-16 in July, 2022 which resulted in generation loss of 2,229.723 GWh units and loss of Rs.8,049.30 million in shape of capacity charges. In order to probe in the matter, a technical audit and two (02) inquiry reports were finalized on the directions of competent authorities. The findings of both the inquiries warranted severe punitive actions against the delinquents but the implementation of which was not forthcoming from the record, despite the inquiry reports being recommended by BoD of CPGCL for compliance.

Violation of Authority’s instructions resulted in loss of Rs.8,049.30 million due to fire incidence at Steam Turbine during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that initially an inquiry was held wherein punitive actions were recommended against the delinquents. Subsequently, on the directions of Prime Minister of Pakistan and Ministry of Energy a foreign consultant namely M/s V.A Consultancy Services was hired in order to analyze the root cause of the incident. The said foreign consultant in its report declared that heavy rain water flow had not been stopped by the generator terminal seals and no one was declared responsible for the said fire incident. Therefore, no action was taken against any one on the basis of previous inquiries.

The DAC in its meeting held on December 22 & 23, 2023 directed the management that the action taken on the recommendations of inquiry committees’ reports be shared with audit within a week. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No.858/2023/24)

1.13.4 Non-refund of long outstanding tax claims from FBR - Rs.4,800.910 million

According to Clause-10 of refund of input tax that if the input tax paid by the registered person on taxable purchases made during a tax period exceeds the output tax on account of zero-rated local supplies or export made during that tax period, the excess amount of input tax shall be refunded to the registered person not later than forty-five days of filing of refund claim in such manner and subject to such conditions as the Board may, by notification in the official Gazette specify.”

During audit of CEO HESCO, an amount of Rs.4,800.910 million was due from Government of Pakistan for the period from 2009 to 2011. However, the refund of amount was pending since then. Audit is of the view that the matter was required to be taken up with FBR vigorously for refund of claims to prevent the Company from loss.

Non-adherence to the rules resulted in non-refund of long outstanding tax claims from FBR amounting to Rs.4,800.910 million up to the Financial Year 2022-23.

The matter was taken up with the management in October 2023 and reported to the Ministry in December, 2023. The management replied that in refund claim of Rs.993.161 million, decision in favour of HESCO was given vide Appellant Tribunal order dated September 20, 2022, wherein Tribunal directed to the respondent i.e. the Commissioner IR Karachi to proceed the subject refund claim. Refund claim of Rs.3,807.749 million was pending before Secretary IR-ST&FE (Law, Procedure & Exemption), FBR, Islamabad.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to pursue the matter for adjustment with FBR under intimation to audit. No further progress was intimated till the finalization of report. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 1289/2023-24)

1.13.5 Non-release of Agricultural subsidy @ 40% -Rs.3,345 million

In terms of rule 3 (3) and 31B of schedule-II of the Rules of Business, 1973, the following business of government is assigned to the Power Division:

Matters relating to development of power resources of the country and relating to electric utilities.

During audit of Ministry of Energy, Power Division Islamabad, an amount of Rs.3,345 million was required to be paid by the Government of Pakistan to K-Electric. KE provides electricity to the Agricultural Tube wells as per policy and subsidy claims were being filled in accordance with the notification No.PF-05(09-AGR)2020 BAL dated March 20, 2020. By the end on June 2022, outstanding balance due from Government of Pakistan, which is 40% share in respect of agricultural subsidy, was Rs.3,345 million. Non-release of agricultural tube-wells subsidy consistently widens the cash flow gap, which has seriously constrained the cash flow position of the company and would adversely affect the planned investments. Moreover, non-release of amount will ultimately add in vicious circle of circular debt.

Non-adherence to the rules resulted in weak internal controls and non-release of Agricultural subsidy @ 40% amounting to Rs.3,345 million during the Financial Year 2021-22

The matter was taken up with the management in March, 2023 and reported to the Ministry in June, 2023. The management replied that Tariff & Subsidy wing verified the subsidy claims of DISCOs / K.E on the basis of actual sales made in the light of Notification/SROs by the respective DISCO. K.E submitted the claims in the absence of valid SROs during FY 2011 to 2014 so the claims were returned, which were to be resubmitted after doing the needful. K.E submitted the claims on invalid pattern after July 2019, which were returned un-actioned with the remarks to resubmit after correction as per agreed format of agri subsidy @40%. Ministry of Energy (Power Division) had constituted a committee to physically verify the installed meters and billing in order to settle the long outstanding dues claimed by K.E.

The DAC in its meeting held on October 17, 2023 directed the management to submit the revised reply so that the figures with regard to the amount of subsidy could be reconciled. No further progress was intimated till the finalization of the report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 118/2020-21)

1.13.6 Loss due to demurrage and detention charges sustained by NTDC for delayed custom clearance – Rs.558 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During Thematic Audit of procurement and material management in NTDC, it was observed that an amount of Rs.558 million was paid on account of demurrage and detention charges for delayed custom clearance. This showed sheer negligence on the part of management of NTDC and resultantly, company sustained a huge loss.

Non-adherence to authority’s instructions resulted in loss due to demurrage and detention charges sustained by NTDC for delayed custom clearance amounting to Rs.558 million up to the Financial Year 2022-23.

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that recent shipments incurred significant demurrage and detention charges due to a series of hurdles i.e., delays in document submission, temporary funding shortfalls, complex customs arrangements for reduced duty benefits, and limited port free time all contributed. These unfortunate obstacles ultimately led to the unwanted additional costs. The reply was not tenable as imposition of demurrage and detention charges depicted poor performance of management in timely clearance of imported material.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days. No further progress was reported till finalization of the report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No.1160/2023-24)

1.13.7 Irregular procurement of vehicles in violation of austerity measures – Rs.446.99 million

According to Para (i) of Finance Division letter dated July 15, 2021, “There shall be complete ban on purchase of all types of vehicles both for current and development expenditure excluding motorcycles, students’ buses, ambulances and firefighting vehicles.”

During audit of DISCOs & PPIB, it was observed that 99 vehicles amounting to Rs.446.99 million were procured despite imposition of complete ban on procurement of vehicles. Hence, the procurement of vehicles was irregular. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No. of vehicles	Amount
----------------	------------------------	-----------------------	------------------------	---------------

				(Rs.in million)
1.	FESCO	238/2021-22, 1071/2023-24	2	152.15
2.	GEPCO	770/2023-24	94	284.31
3.	MEPCO	924/2023-24	1	5.12
4.	PPIB	65/2023-24	2	5.41
Total			99	446.99

(Source: Purchase Order File)

Non-adherence to the memorandum issued by finance division resulted in irregular procurement of vehicles amounting to Rs.446.99 million up to the Financial Year 2022-23.

The matter was taken up with the management in March & October, 2023 and reported to the Ministry in June & December, 2023. The management replied that operational vehicles were procured after getting approval from Ministry of Energy (Power Division). The management of GEPCO replied that austerity measures issued by Ministry of Finance were not binding on GEPCO subject to the approval of the BoD being the Competent Authority. Audit contended that austerity measures were imposed by Finance Division (GoP) and accordingly relaxation in ban was required to be obtained from the Finance Division.

The DAC in its meetings held on December 14 - 23, 2023 directed the management to refer the matter to Finance Division GoP for seeking its clarification through Ministry of Energy (Power Division) within a month. No further progress was reported till the finalization of report.

Audit recommends implementation of DAC's decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide Para No.1.6.16 having financial impact of Rs.793.62 million. Recurrence of same irregularity is a matter of serious concern.

1.13.8 Irregular adoption of transport policy and imprudent financial burden on account of provision of 2nd new car, reimbursement of drivers' salary, maintenance & POL charges without approval of Finance Division – Rs.329.47 million

As per office memorandum issued by Finance Division (Regulation Wing) Government of Pakistan issued vide F No.3(37)R-14/2022 dated February 01, 2023, it is mandatory for every Ministry / Division / Department to consult Finance Division while initiating their legislative proposals having financial implications, relating to framing their rules on pay and allowances, retirement benefits, leave benefits as well as other financial terms and conditions of service. In the light of these rules, Regulations wing of Finance Division vets all the legislative proposals having financial implications, which are referred to this Division by the concerned Autonomous / Semi-autonomous bodies Corporations through their respective Ministries / Divisions concerned. According to rule 5(1)

of the Corporate Governance Rules 2013, “the directors of a Board shall be persons who, in opinion of the Government, shall assist the Public Sector Company to achieve its principal objective and the Board shall accordingly exercise its powers and carry out its fiduciary duties with a sense of objective judgment and in the best interest of the company.” Further, rule 5(a) of the Corporate Governance Rules 2013, “the principle of probity and propriety entails that company’s assets and resources are not used for private advantage and due economy is exercised so as to reduce wastage.”

During audit of GEPCO, it was observed that the BoD had approved the Transport Policy-2019 & 2022 in its 103rd & 139th meeting held on August 20, 2019 & January 14, 2022 entitling thereby the officers of BS 17 to 20 for providing the cars with 60% cost deposit in 60 monthly installments, per month payments on account of POL for field / office duties, maintenance charges and drivers’ salary. However, the GEPCO’s Transport Policies-2019 & 2022 had not been got approved from Finance Division. Accordingly, 131 different types of new cars valuing Rs.113.40 million were procured from GEPCO’s funds and provided to the officers as 2nd time. Moreover, a payment of Rs.216.07 million was made against reimbursement claims on account of drivers’ salary, maintenance and PoL Charges on lump sum basis without ascertaining the actual expenditure incurred thereof, which was irregular. This showed that GEPCO’s Transport policy was unique in its nature containing no limit in provision of vehicles to the officers during entire service period as an officer in his / her 30 years of service would get ownership of six (6) new cars on repayment of 60% cost of previous Car through installments and 40% cost borne by the company, which ultimately passed on to the consumers in shape of tariff determination.

Non-compliance to the directions issued by Finance Division resulted in irregular adoption of transport policy and imprudent financial burden on account of provision of 2nd new car, reimbursement of drivers’ salary, maintenance & POL charges amounting to Rs.329.47 million up to the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that keeping in view the clarification of finance division dated February 14, 2013 duly endorsed by the Ministry of Energy (Power Division) on February 03, 2021, clarification of PEPCO, NEPRA’s approval and power(s) of BOD, BOD GEPCO was the Competent Authority regarding formulation of any policy including GEPCO Transport Policy 2019 & 2022. However, BoD being the Competent Authority already considered the financial viability of the transport policy and confidently allowed the 2nd and onwards cycle(s) of the GEPCO Transport Policy. The savings in transport related expenditures was already passed to the consumers through tariff being NEPRA’s approved policy. The net saving of Rs.1,206.00 million on account of POL, maintenance charges and driver’s salary during 1st Cycle of the policy proved that the objective had been achieved. The reply was not agreed to as the GEPCOs transport policy needed to be got approved from finance division of Government of Pakistan besides reviewing the rationality of the provision of 2nd vehicle and incurrence of expenditure on account of maintenance /POL / drivers’ salary.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the transport policy reviewed from PPMCL within a month. No further progress was reported till finalization of the report.

Audit recommends implementation of DAC’s decision.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2015-16 vide Para No. 11.4.2 having financial impact of Rs.349.38 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para Nos. 798, 873 & 1075/2023-24)

1.13.9 Over payment of house rent allowance - Rs.269.02 million

As per Government of Pakistan Finance Division Office Memorandum dated July 02, 2018 “The President has been pleased to allow the increase in the House Rent Allowance by 50% of existing amounts being drawn on the basis of Pay Scale 2008 by the Federal Government employees”.

During audit of NTDC, the employees of NTDC had drawn House Rent Allowance amounting to Rs.361.52 million on the basis of 30% of their running basic but this payment was in contradiction of Finance Division notification referred above. Hence, over payment of Rs.269.025 million was made on account of House Rent Allowance which needs justification.

Non-adherence to the rules resulted in over payment of House Rent Allowance of Rs.269.02 million during the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in December, 2023. The management replied that BoD NTDC being competent authority had sanctioned to award the payment of House Rent Allowance @ 30% of running basic pay to all employees of NTDC living outside big cities; to enhance the motivational level of employees for being posted outside the big cities for timely completion of the Projects and in the best interest of the Company.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to take up the matter with Finance Division for clarification / regularization. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 953/2023-24)

1.13.10 Unjustified payment of hardship allowance - Rs.242.20 million

According to Rule-10 (i) of GFR, “every public officer is expected to exercise the same vigilance in respect of expenditure incurred from public moneys as a person of ordinary prudence would exercise in respect of expenditure of his own money”. As per direction of NEPRA in tariff determination dated January 12, 2023 (SEPCO) that such incentives are given by the organizations out of their profits returns. Therefore, if the Petitioner wants to incentivize its employees by allowing hardship allowance, it needs to be paid by petitioner out of its profits returns and shall not be charged as cost to power sector consumers”.

During audit of QESCO, Board of Directors approved grant of hardship allowance to all employees (Regular/Contract/Deputation) equal to one month’s running basic pay amounting to Rs.242.20 million. It is important to mention that such agenda item was neither approved/ deliberated by any committee of BoD. Moreover, according to the Regulator (NEPRA) such incentives could be given by the organizations out of their profits/returns and shall not be charged as cost to power sector consumers. Therefore, payment of hardship allowance without approval of NEPRA, recommendation of Sub-Committee of BoD and budget provisions was unjustified.

Non-adherence to provision of Rule-10 (i) of GFR resulted in unjustified payment of hardship allowance amounting to Rs.247.20 million without approval of the Regulator and deliberation in meeting of BoD QESCO during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that BoD in its 188th Meeting held on 20th December, 2022 had approved hardship

allowance equal to one basic pay to all QESCO employees on account of services rendered during heavy rains/flood in Balochistan. The amount was within the budget FY 2022-23 duly approved by BoD. The amount had already been allowed by NEPRA in tariff determination under the head of salaries and wages.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to obtain approval from NEPRA within 60 days otherwise recovery be made from the concerned. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.1269/2023/24)

1.13.11 Non-finalization / non-indemnification of insurance claims - Rs.212.71 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of PESCO, QESCO & SEPCO, electrical equipments valuing Rs.212.17 million were damaged at different locations. Insurance claims of damaged material were lodged with General Manager (Insurance & Pension) WAPDA but were not finalized and kept pending since long due to non-pursuance / non-provision of complete information by the field formations. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Cases	Amount (Rs.in million)
1.	PESCO	207/2023-24	1	93.95
2.	QESCO	01/2023-24	4	81.61
3.	SEPCO	17/2023-24	28	37.15
TOTAL			33	212.71

(Source: Insurance Claim File)

Non-adherence to Authority's instructions resulted in non-finalization / non-indemnification of insurance claims of Rs.212.71 million up to the Financial Year 2022-23.

The matter was taken up with the management in March & October, 2023 and reported to the Ministry in June & November, 2023. The management replied that the efforts were being made to indemnify the claims.

The DAC in its meetings held on September 09, 2023 and December 14, 2023 to December 23, 2023 directed the management to expedite the matter with WEPS for settlement of claims within three months. No further progress was intimated till the finalization of report.

Audit recommends implementation of DAC's decision.

1.13.12 Loss due to imposition of penalties by NEPRA - Rs.190 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subject to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of HESCO, GENCO-II, NTDC & NPPMC, fine of Rs.190 million was imposed by NEPRA on account of fatal / non-fatal accidents, non-compliance to license, tariff, NEPRA Act and Grid Code and other regulations. However, the matter was not inquired for fixing responsibility of loss sustained by the Companies due to violation of NEPRA Regulations. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No. of cases	Amount (Rs.in million)
1.	HESCO	1305/2023-24	7	10
2.	GENCO-II	740/2023-24	1	150
3.	NTDC	950/2023-24	1	10
4.	NPPMC	746/2023-24	2	20
TOTAL			11	190.00

(Source: NEPRA Correspondence file)

Non-adherence to Authority instructions resulted in loss of Rs.190.00 million due to imposition of penalty by NEPRA up to the Financial Year 2022-23.

The matter was taken up with the management in October & November, 2023 and reported to the Ministry in November & December, 2023. The management replied that appeals had been filed in NEPRA Appellate Tribunal against the imposition of fine. The management of NPPMC replied that all the actions were within the permissible technical limits, however, NEPRA had decided the matter unilaterally.

The DAC in its meetings held on December 14 - 23, 2023 directed the management to pursue the matter with NEPRA vigorously and outcome be shared with Audit. No further progress was reported till the finalization of report.

Audit recommends implementation of DAC's decision.

1.13.13 Irregular adoption of NEPRA policy of official vehicles without approval of Finance Division - Rs.153.72 million

As per Office Memorandum issued by Finance Division (Regulation Wing) Government of Pakistan issued vide dated February 01, 2023 regarding guidelines for approving of Financial Rules of Autonomous Bodies Semi-Autonomous Bodies/Corporations of the Federal Government stated that under Section-18 of Public Finance Management Act, 2019, it is mandatory for every Ministry/Division/Department to consult Finance Division while initiating their legislative proposals having financial implications, relating to framing their rules on pay and allowances, retirement benefits, leave benefits as well as other financial terms and conditions of service. In the light of these rules, Regulations wing of Finance Division vets all the legislative proposals having financial implications, which are referred to this Division by the concerned Autonomous/ Semi-autonomous bodies Corporations through their respective Ministries / Divisions concerned.

During audit of NEPRA, Islamabad, it was observed that the management procured official vehicles for regular employees and contract employees like advisors and consultants. Subsequently, official vehicles were replaced and bought back by the employees under NEPRA policy. It is worth mentioning that NEPRA's policy of official vehicles has not been approved from Finance Division under Section-18 of Public Finance Management Act, 2019.

Hence, expenditure Rs.153.72 million incurred on account of procurement, maintenance and replacement of official vehicles was irregular.

Non-adherence to Section-18 of Public Finance Management Act, 2019 resulted in irregular adoption of NEPRA's policy of official vehicles amounting to Rs.153.72 million up to the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Cabinet Division in June, 2023. The management explained that Official Vehicle Policy of NEPRA was in line with the provisions of Act & Service Regulations. Furthermore, NEPRA generated its own funds from its operations and adopted policies to achieve its objectives as enunciated in the Act and did not require approval from Finance Division. Besides, NEPRA designed its policies to recruit and retain the best professionals. Audit contended that NEPRA had procured the official vehicles for regular employees, contract employees like legal advisors, Assistant legal advisors, consultant. Official vehicles were replaced and buy back by the employees under such policy was irregular and needed approval from Finance Division.

The DAC in its meeting held on January 16, 2024 constituted a committee to deliberate and review the reported matter, within one month, as per following composition:

- | | | |
|------|------------------------------------|----------|
| i. | Chief Finance & Accounts Officer. | Convener |
| ii. | Joint Secretary (RA). | Member |
| iii. | Joint Secretary (Exp-Cabinet) /FA. | Member |
| iv. | Representative from NEPRA | Member |

Audit recommends the implementation of DAC's decision.

(Draft Para No.60/2023-24)

1.13.14 No plan for recovery of colossal amount of penalties from two serving delinquent officials - Rs.72.37 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended to date), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of Project Directorate Construction GEPCO, a penalty of Rs.12.02 million was imposed on a Line Superintendent-I of Construction Sub-Division Mandi Baha ud Din. Besides this, the said official had also paid an amount of Rs.4 million to GEPCO. Similarly in two (02) cases, a colossal penalty of Rs.60.34 million (Rs.2.54 million + Rs.57.80 million) was imposed upon another Line Superintendent-II of the said Sub-Division. Moreover, the said LS-II had also received minor penalty of censure in two (02) cases and major penalty of withholding one increment for a period of one year. Both the said officials were in service and LS-II had also been given the look after charge of SDO Const. Gujrat. The recovery of the penalties from the said officials was not forthcoming from the record nor any plan has been chalked out to realize the colossal recoveries within reasonable time period.

Non-adherence to Authority’s instructions and weak internal controls resulted in non-recovery of colossal amount of penalties of Rs.72.37 million from two serving delinquent officials up to the Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in October, 2023. The management replied that an amount of Rs.0.91 million had been recovered up to 11/2023 leaving a balance of Rs.71.46 million.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter at CEO level for fixing responsibility as to why the look after charge of SDO was given to LS despite committing serious irregularity and formulate recovery plan and submit its report to audit within a month. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 243/2023-24)

1.13.15 Irregular expenditure incurred on account of House Acquisition & Vehicle expenses – Rs.72.10 million

As per accounting manual of DISCOs “Budget is allocated to all D&D offices from the total Budget approved by the BOD keeping aside on approved Revised Budget for allocating any Justifiable additional Budget Demand. Moreover, Lack of regular analysis of actual expenditure in comparison with budget targets, may result in excessive spending being identified towards the end of the budgetary period which may ultimately defy the whole purpose of budgetary process”.

During audit of Project Directorate Construction LESCO, an amount of Rs.179.23 million was received on account of house acquisition, vehicle expenses and vehicle repair against which expenditures of Rs.7.36 million were booked into books of accounts through ledger posting summary. However, expenditure of Rs.251.33 million were booked in trial balance under these head of accounts as on Jun-2023. Hence, this showed that excess expenditure of Rs.72.10 million were incurred/booked in trial balance out of allocated/IOT cash received which needs justification.

Non-adherence to Authority's instructions resulted in irregular expenditure of Rs.72.10 million incurred on account of house acquisition & vehicle expenses during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that IOT Cash received was Rs.179.23 million in respect of house acquisition, vehicle repair expenses and vehicles' POL but as per their ERP record, they had received IOT Cash received and expenses during the Financial Year 2022-23 amounting to Rs.57.4 million, which was due to not following of matching principle. Demands of Financial Year 2021-22 were entertained in Financial Year 2022-23 and the expenses of previous year related to relevant heads booked in Financial Year 2022-23. Further expenses of TA/DA and medical bills were also booked in the relevant Heads.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the record in support of reply verified from audit within 15 days. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 1232 /2023-24)

1.13.16 Non-payment by the Irrigation Department - Rs.54.732 million

According to Rule-10 (i) of GFR, "every public officer is expected to exercise the same vigilance in respect of expenditure incurred from public moneys as a person of ordinary prudence would exercise in respect of expenditure of his own money".

During audit of GSC TESCO, a deposit work valuing Rs.301.255 million on behalf of Irrigation Department was under execution for construction of 132 kV Grid Station at pump house Jamrud. Irrigation Department had paid Rs.246.528 million out of total amount of Rs.301.255 million. The work was stopped in 04/2022 due to non-payment of balance amount of Rs.54.732 million by the irrigation department which may cause delay as well as financial/ revenue loss to the company.

Non-adherence to GFR resulted in non-payment of the balance amount by the Irrigation Department valuing Rs.54.732 million during Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in October, 2023. The management replied that the procurement of materials for the said Grid Station along with associated T/Line has already been completed. Physical work on site is 75% complete. The remaining work was pending due to ROW issues at 02 locations of said T/Line. TESCO had a close liaison with the concerned Department & fruitful result would be achieved soon.

The DAC in its meeting held on December 14 & 15, 2023 directed the management to pursue the recovery from concerned department and get it verified from Audit. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No. 187/2023-24)

1.13.17 Undue burden on Exchequer due to aversion of recovery of Inter DISCO Tariff Rationalization Surcharge (IDTRS) - Rs.54.72 million

As per NEPRA Act Section 31.8 “Notwithstanding anything contained in this Act and in addition to the tariff, rates and charges notified under sub-section (7) and this sub-section, each electric power supplier shall collect such surcharges from any or all categories of consumers, as the Federal Government may charge and notify in the official Gazette from time to time, in respect of each unit of electric power sold to any or all categories of consumers and deposit the amount so collected in such manner as may be prescribed. The amount of such surcharges shall be deemed as a cost incurred by the electric power supplier and included in the tariff notified under sub-section (7):”

During audit of CEO GEPCO, in order to maintain a uniform consumer end tariff at national level, the consumer end tariff of better performing DISCOs was enhanced by inter DISCOs tariff rationalization surcharge which was built-in consumer end tariff to provide relief to consumers of in-efficient DISCOs. However, the net metering consumers avoided the payment of IDTRS through self-generation of energy units to the extent of Rs.54.72 million during the year 2022-23. Non-recovery of IDTRS from net energy consumers of GEPCO would be an extra burden on national exchequer as the GOP had to inject more subsidy into the system to maintain uniform rate of tariff.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that IDTRS and promoting distributed generation net metering, both, were governed under relevant national policy, legal and regulatory framework well beyond the control and scope of GEPCO. The matter was already under active consideration and action at the apex levels of national policy and plan however, audit observation and recommendations were noted for serious considerations and would be taken up with the concerned stakeholder.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to submit revised reply to audit within a week. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 918/2023-24)

1.13.18 Loss to public exchequer due to non-recovery of Retailer Sales Tax – Rs.48.94 million

According to FBR (Revenue Division) letter No.C.No.3(1)ST-L&P/2019(pt), sales tax is to be charged and collected from retailers (other than Tire-1) under section 3(9) of sales Tax Act, 1990 through their monthly electricity bills as under:- i) At the rate of five percent where the monthly bill amount does not exceed rupees twenty thousand; and (ii), At the rate of seven and half percent where the monthly bill amount exceed rupees twenty thousand.

During audit of DISCOs, it was observed that 779 commercial consumers were not being billed under correct classification codes meant for charging of Retailer Sales tax. Due to incorrect classification codes, Retailer Sales Tax amounting to Rs.48.94 million could not be recovered from the said consumers. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No of Consumers	Amount (Rs.in million)
----------------	------------------------	-----------------------	------------------------	-------------------------------

1.	FESCO	931/2023-24	383	12.21
2.	GEPCO	21, 509 & 664/2023-24	183	30.72
3.	LESCO	371/2023-24	213	6.01
TOTAL			779	48.94

Non-compliance to provision of Finance Bill-2019 resulted in loss due to non-recovery of Retailer Sales Tax amounting to Rs.48.94 million during the Financial Years 2022-23.

The matter was taken up with the management in April, 2023 & September to October and reported to the Ministry in June, 2023 & October to December, 2023. The management replied that retailer sales tax were charged to those commercial tariff consumers who came under this domain / category of the commercial tariff as prescribed by the FBR. The management of GEPCO replied that account wise lists had been forwarded to field formations to ensure recovery of sales tax from concerned customers.

The DAC in its meeting held on August 26, 2023 and December 14-23, 2023 directed the management to complete the action within one month expeditiously and provide the record to audit for verification. DAC also directed the management of FESCO to refer the matter to FBR for getting clarification within 30 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.13.19 Loss to electrical equipment due to fire incidents – Rs.48.31 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of SEPCO and NTDC, fire incidents were occurred and electrical equipment's valuing Rs.48.31 million were damaged. However, the said fire incidents were neither inquired for fixing of responsibility nor loss was got indemnified from insurer. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Amount (Rs.in million)
1.	SEPCO	12/2023-24	11.31
2.	NTDC	545/2023-24	37.00
TOTAL			48.31

Non-adherence to Authority's guidelines resulted in loss due to fire incident Rs.48.31 million up to the Financial Year 2023-23.

The matter was taken up with the management in March & September, 2023 and reported to the Ministry in June & November, 2023. The SEPCO management replied that the insurance claim against the loss had already

been lodged with Director General Insurance WAPDA, but the fate of case had not been finalized as yet. The NTDC management replied that the damaged transformer was successfully energized during May, 2023.

The DAC in its meeting held on September 9 and December 19, 2023 directed the management to inquire the matter and report be submitted to Audit.

Audit recommends implementation of DAC's decision.

1.13.20 Non-clearance of hazardous trees under ±660 kV HVDC Transmission Line - Rs.46.77 million

According to the section 3.7 of O&M Services Agreement that the O&M Company (NTDC) shall, during the term take the responsibility for the safety operation of the facility and keep safe clearance of the ROW including the removal of targeted species (e.g., tall growing trees and invasive woody shrubs and crops) within the portion of the ROW occupied by the facility (the Vegetation Control), as well as the trimming or removal of tress within adjacent areas that may grow closer than minimum allowed distances to conductors (the side trimming).

During audit of HVDC NTDC Lahore, an amount of Rs.46.77 million was paid to Divisional Forest Officer (Lal Sohanra National Park, Bahawalpur) to remove hazardous trees existing underneath of ±660 kV HVDC Transmission Line but no progress was achieved so for which may result in financial penalties on O&M Company by M/s PMLTC.

Non-adherence to contractual clause resulted in non-clearance of hazardous trees under ±660 kV HVDC Transmission Line amounting to Rs.46.77 million during the Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the matter of tree cutting was regularly being pursued with the Divisional Forest Officer (DFO) Lal Sohanra by HVDC field formations. On the directions of Audit, an Inquiry committee had been constituted by the competent authority to investigate the matter.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to provide inquiry report and to get the record verified from audit in support of reply within fifteen (15) days. No further progress was intimated till the finalization of report.

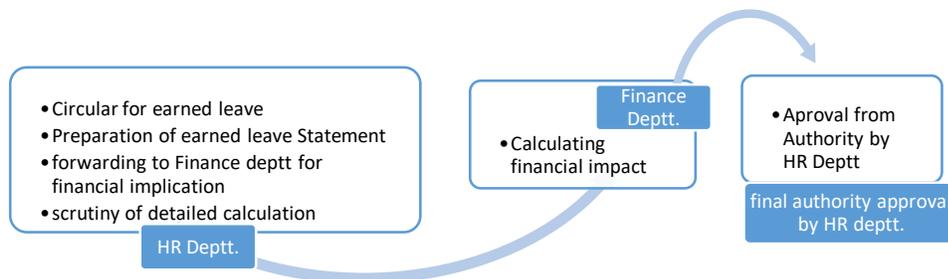

Audit recommends the implementation of DAC's decision.

(Draft Para No. 615/2023)

1.13.21 Deficient internal controls regarding encashment of earned leave balances of employees - Rs.32.47 million

According to the regulations 29, amended vide SRO dated September 23, 2020, a regular employee of the NEPRA shall earn leave at the rate of two days for every calendar month of duty period rendered by him/her as may be amended or prescribed from time to time. This leave will be admissible to the employee on full pay drawn just before proceeding on leave less the allowance i.e., daily allowance, missing and other allowance related to the performance of duty in office.

During audit of NEPRA, an amount of Rs.32.47 million was paid to employees and random checking of earned leaves calculation revealed that documentation was incomplete, inaccurate or insufficient. This made it difficult to verify the accuracy and completeness of the transactions and could result in errors or fraud. Audit reviewed encashment and payment mechanism of earned leave as illustrated below and found discrepancy:

A list for encashment of unavailed earned leave was prepared by Human Resource Department (HRD) for the year 2021. Mr. Muhammad Ramzan, the then Director HR, showed his earned leave balance as 60 days, which was fake and got calculated with financial implication as Rs.1.417 million from finance department. For the accuracy of unavailed earned leave figures, finance department relied on certificate of HRD. The complete list involving Rs.27.907 million was signed by the said HR Director and forwarded to the Authority for approval, which was returned for quoting relevant NSR provisions on 15.2.2022. Later on, the said HR Director was transferred and list was manipulated by excluding his name and presented to Authority. This showed weak internal control over reporting mechanism. The original list, on which honorable member raised query, was misplaced and discrepancy went unnoticed.

Reporting and Approval Channel

As per reporting mechanism, if Authority seeks any clarification then it should be answered on the same sheet. However, in the said case, working papers were changed / manipulated and such discrepancy went unnoticed which showed that chances of misappropriation and embezzlement cannot be ruled out in payment of earned leave. The authorization controls over earned leave encashment transactions were weak as there was no mechanism to ensure its authorization by the appropriate personnel. This increases the risk of unauthorized encashment of earned leaves.

The matter was taken up with the management in March, 2023 and reported to the Cabinet Division in June, 2023. The management explained that it was developing Leave Management Software to reduce the chances of erroneous reporting of leave record. However, meanwhile a committee headed by a Director General had been constituted to scrutinize and audit all earned leave encashment cases prior to approval by the Authority. NEPRA further elaborated that special audit of encashment of leave for last 5 years had been assigned to Chartered Accountant firm as required by Audit.

The DAC in its meeting held on January 16, 2024 directed the management to get the record verified, within one week, and share report of Chartered Accountant firm with Audit. No Further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.62/2023-24)

1.13.22 Irregular payment of remuneration of BoDs committee and sub-committee members - Rs.19.84 million

According to rule 5 (a) i & ii of the Public Sector Companies (Corporate Governance Rules 2013), the Board shall establish a system of sound internal control, which shall be effectively implemented at all levels within the Public Sector Company, to ensure compliance with the fundamental principles of probity and propriety; objectivity, integrity and honesty and relationship with the stakeholders, in the following manner, (a) the principle of probity and propriety entails that company's assets and resources are not used for private advantage and due economy is exercised so as to reduce wastage. The principle shall be adhered to, especially with respect to the following, (i) handling of public funds, assets, resources and confidential information by directors, executives and employees; and (ii) claiming of expenses. According to the Finance Division (Regulation Wing), vide its letter No. F.15 (5) R.14/91 – 423 dated June 25, 1992 notified its directions for members of Board of Director of the Corporations/ Companies wherein Government owns major or partly shares, not to allow excess benefits to the employees of the Corporations which are otherwise not admissible under the Government policy.

During audit of DISCOs and NTDC, it was observed that the BoDs had approved and enhanced the remuneration package for members of BoDs meeting fee, road transport rate and hotel stay per night without getting approval / concurrence from Finance Division / Power Division which is irregular and unjustified. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Amount (Rs.in million)
1.	HESCO	788/2023-24	1.98
2.	QESCO	1028/2023-24	7.82
3.	NTDC	1022/2023-24	10.04
Total			19.84

(Source: Payment Voucher)

Non-adherence to Finance Division instructions resulted in irregular payment of remuneration of BoDs committee and sub-committee members - Rs.19.84 million up to the Financial Year 2022-23.

The matter was taken up with management during October to November, 2023 and reported to the Ministry during November to December, 2023. The HESCO and NTDC management replied that Board in exercise of the powers contained in the Article-53 of the Article of Association read with Section-170 of Companies Act 2017, revised the TA and DA rates for the Board of Directors after due diligence and thorough

deliberations in line with consumers price Index of Federal Bureau of Statistics of October 2016 indexed to February 2023, keeping in view the long span of time of previous revision and unprecedented inflation in rates and escalation of fuel prices. The QESCO replied that enhancement of remuneration was made after 5 years and in accordance with the law.

The DAC in its meetings held on December, 18 to 23- 2023 directed the management to substantiate the reply and get the record verified, otherwise ensure recovery of amount.

Audit recommends implementation of DAC's decision.

1.13.23 Irregular payment of allowances to employees – Rs.19.114 million

According to Finance Division (Regulations Wing) office memorandum F No. 3(37)R-14/2022 dated February 01, 2023, "it is mandatory for every Ministry/ Division/ Department to consult Finance Division while initiating their legislative proposals having financial implications, relating to framing their rules on pay and allowances, retirement benefits, leave benefits as well as other financial terms and conditions of service".

During audit of CEO FESCO, different types of allowances amounting to Rs.19.11 were allowed to different officers/ officials without consulting/ vetting of Finance Division (Regulations Wing). In the absence of endorsement of these allowances by the concerned quarters, payment of Rs.19.114 could not be termed as regular.

Violation of directions of the Finance Division resulted in irregular payment of allowances amounting to Rs.19.11 million during the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that allowances were paid after approval of BoD FESCO and were in line with the provisions of Company Act-2017.

The DAC in its meeting held on December 20 & 21, 2023 did not agree with reply of management and directed to investigate/ check legitimacy of allowances in the light of directions of Finance Division and submit its report to Audit within 30 days.

Audit recommends the implementation of DAC's decision.

(Draft Para No.1073/2023-24)

1.13.24 Irregular payment of Head Quarter Allowance- Rs.16.59 million

The BoD NTDC in its 50th meeting allowed "Head quarter allowance @ 20% of existing basic pay not exceeding the limit of Rs.6,000/- per month w.e.f. March 01, 2010 to the NTDC head office employees working in Chief Executive Office and allied offices, G.M (GSO) NTDC, G.M (WPPO) NTDC, GM (GSC) NTDC, Lahore, GM Services Division NTDC, G.M (Projects) NTDC, G.M Planning (Power) NTDC, C.E (MP&M) NTDC, C.E (Design) NTDC, Manager Internal Audit NTDC, C.E (System Protection) NTDC & C.E Telecommunication, NTDC".

During audit of NTDC and PPMC, it was observed that 165 officers / officials posted at other locations than head office were drawing "Head Quarter Allowance" in violation of above notification. Hence, the payment of Head Quarter Allowance amounting to Rs.16.59 million was irregular. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	No of Employees	Amount (Rs.in million)
1.	NTDC	885/2023-24	141	13.14
2.	PPMC	702/2023-24	24	3.45
TOTAL			165	16.59

(Source: Pay voucher)

Non-adherence to the instructions of BOD resulted in irregular payment on account of Head Quarter Allowance for Rs.16.59 million during the Financial Year 2022-23.

The matter was taken up with the management during October to November, 2023 and reported to the Ministry during November to December, 2023. The management of NTDC replied that the employees working in Head office on attachment basis were drawing Head quarter allowance granted by BoD. The management of PPMC replied that all employees working in PPMC either in Islamabad or Lahore were considered working in PPMC Head Office and getting Head Office Allowance. However, the temporarily retained staff at Lahore would be reported to Islamabad shortly as the assignment was near to completion.

The DAC in its meeting held on December 14-23, 2023 directed the management of NTDC to justify the attachment of field staff with Head Office within 30 days and directed the management of PPMC to take up the matter in BoD for decision within a month. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision.

1.13.25 Loss due to bogus/excess payments of pension – Rs.10.63 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to January 2014), "all losses whether of public money or of store, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of CEO LESCO, an excess amount on account of pension and commutation was paid to Mst. Shafqat Azra (PPO No. 28147/28294-RP) and Mr. Saleem Masih (PPO No. 9550/R/LESCO) in the office of Deputy Manager (Op) Ravi Road LESCO, Lahore. The newly introduced system of centralized pension had failed to detect the overpayments timely. Moreover, the Dy. Manager Operation Ravi Road referred the case to FIA to cover his negligence. As per rules the preliminary inquiry needed to be conducted to detect the facts of fraud and to fix responsibility against the culprits which was not done. Similarly, no responsibility had been fixed against the DDO, pension section and CFO office.

Non-adherence of the authority's instructions resulted in loss of Rs.10.63 million to bogus/excess pension up to the Financial Year 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that the recovery of excess payment Rs.600,000/- had been deposited by the culprit

Mr. Tanveer ALM of Xen Ravi Road Division in the Pension fund account (045-1650504623) through receipt No 927. Moreover, registries of 05 marla and 02 marla plots in the vicinity of Ferozwala had been handed over by Mr. Tanveer pension clerk to Xen LESCO Ravi Road and assessment of market value was under process for the purpose of recovery. Further pension of Shafqat Azra W/o Muhammad Younas Butt and Saleem Masih had been stopped since May, 2023 and also an amount of Rs.359,262 recovered up to November 2023, however efforts were being made for the total loss sustained to the LESCO.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the action taken verified in this matter and also pursue the case with FIA vigorously. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.1005/2023-24)

1.13.26 Non-recovery of penalty imposed on junior storekeeper - Rs.6.61 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), "all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of MP&M NTDC, Lahore, a penalty amounting to Rs.6.61 million on account of misappropriation/shortage of material was imposed upon a Junior Storekeeper with stoppage of annual increment for three years. The official filed an appeal in court of law but his petition was dismissed by the court in favor of NTDC on February 21, 2023. The said amount was yet to be recovered from the quarter concerned.

Non-adherence to Authority's Guidelines resulted in non-recovery of penalty imposed from junior storekeeper amounting to Rs.6.61 million up to the Financial Year 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that NIRC in connection with Case No. 4B (169)/2022-L which was actually related to matter of shortage of Rs.6.61 million had restrained NTDC from effecting recovery from the concerned store keeper which is still intact. NTDC was vigorously pursuing the court case proceeding in NIRC. Next date of hearing was fixed on Jan-2024. Further action would be taken by NTDC as per decision of the honorable court.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to pursue the case. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.478/2023-24)

1.13.27 Irregular hiring the services of lawyers and law firms and payment made on account of legal fees - Rs.6.47 million

According to Rule-42(b)(i) of PPRA Rules 2004, a procuring agency shall engage in this method of procurement only if the following conditions exist, namely: - "where the value of procurement is more than one

hundred thousand Pakistani Rupees but does not exceed five hundred thousand Pakistani Rupees, the procuring agency may engage in procurement through request for three quotations from GST registered firms, original equipment manufacturers or authorized dealers, without resorting to bidding.”

During audit of NEPRA, Islamabad, services of various lawyers / law firms were hired for legal assistance in arbitration cases of NEPRA in contrary to amended provision of PPRA Rules-2004. However, law firms/lawyers were engaged in arbitration cases out of panel approved by NEPRA committee. Hence, payment of Rs.6.47 million made on account of legal fees / professional charges to the lawyer / law firms for the year 2021-22 was quite irregular.

Non-adherence to clause of PPRA Rules resulted in irregular hiring the services of lawyers and law firms and payment made on account of legal fees amounting to Rs.6.47 million during the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Cabinet Division in June, 2023. The management replied that actual expenditure on legal fee was Rs.5.69 million and not 6.47 million during FY 2021-22. Furthermore, the engagement process of lawyers and law firm followed a meticulous evaluation by Litigation Committee. Three quotations for external counsels / law firms, as per approved SOPs, were obtained and approval was granted.

The DAC in its meeting held on January 16, 2024 settled the para subject to verification of record, within one week. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No.58/2023-24)

1.13.28 Undue benefits to the employee on account of 2nd buy back vehicle - Rs.3.24 million

The vehicles replacement clause-III, sub-clause (a) of Appendix-9 of NSR-2003 provides that entitled vehicles will be replaced as per: i) Toyota Corolla GLI/Honda City (Automatic) 5 years, ii) Toyota Corolla XLI/Honda City (Manual) 5 years, iii) Locally Manufactured 1000 CC engine capacity (upper limit) 5 years.

During audit of NEPRA, Islamabad, Mr. Safer Hussain, ex-registrar opted to buy the official vehicle Honda City 1.2 LS after completion of five years. He requested to procure the new entitled official vehicle Toyota Yaris 1.3 CVT having ceiling amount Rs.3.420 million. Subsequently, he requested for 2nd time buy back of new official vehicle on December 29, 2022 with request to adjust the cost of car in its terminal benefits due to attaining the age of superannuation on December 31, 2022. 2nd vehicle valuing Rs.3.24 million was given to the said employee without assessing the market value of the vehicle.

Non-adherence to Appendix-9 of NSR-2003 resulted in award of undue benefit amounting to Rs.3.24 million to the employee on account of sale of 2nd vehicle under buy back provision up to the Financial Year 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Cabinet Division in June, 2023. The management replied that NEPRA explained that 1st vehicle (Honda City 1.2 LS) was bought back by the officer in term of Class III (a) of Appendix-9 of NSR 2003. The 2nd vehicle was bought back by the officer as per Class III (c) of Appendix-9 of NSR 2003.

The DAC in its meeting held on January 16, 2024 directed the management to get the record verified from Audit. Further progress was not intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No.57/2023-24)

1.13.29 Less deduction of income tax on contract payments - Rs.2.62 million

According to Para 13.8 (X) of WAPDA Accounting and Financial Reporting Manual withholding tax shall be deducted from the gross amount of the contractor’s bills at the prevailing tax rates, unless contractor provides Tax Exemption Certificate issued by the relevant tax authority for the related period.

During audit of Project Director Construction SEPCO, an amount of Rs.127.351 million was paid to contractors and consultants for construction and consultancy services. The Income Tax of Rs.8.644 million was deducted on gross amount of payment exclusive of sales tax, which was irregular. Hence, the less deduction of income tax resulted loss of Rs.2.623 million to the national exchequer.

Non-adherence to accounting manual resulted in less deduction of income tax on contract payments amounting to Rs.2.62 up to the Financial Year 2021-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that amount of income tax valuing Rs.2.62 million would be recovered from the contractors and consultants and audit would be informed accordingly.

The DAC in its meeting held on December 22 & 23, 2023 directed the management to ensure recovery besides issuance of explanation letter for non-deduction of income tax. No further progress was intimated till finalization of the report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 237/2023-24)

1.13.30 Irregular acting/additional/current charge to Line Superintendent as Sub-Divisional Officer in Violation of PAC directives

The Sub-Committee of the PAC in its meeting dated August 09, 2021 directed DISCOs to make sure that Line superintendents shall not be posted as Sub Divisional Officers as one step above and all vacant posts in PEPCO and it’s all DISCOs and NTDC may be filled at once.

During audit of DISCOs, seventy-three (73) Line Superintendents were posted as Sub-divisional Officers as one step above which was in contravention to the directives of PAC. This state of affairs showed that right persons were not employed which needs justification. The detail is as under:

Sr. No.	Company	Draft Para No.	No. of officials involved
1.	FESCO	1110/ 2023-24	69

2.	LESCO	650/ 2023-24	04
Total			73

(Source: Office Order File)

Non-adherence to PAC directives resulted in irregular award acting/additional/current charge to Line Superintendents as Sub-divisional Officers in violation of PAC directives up to the Financial Year 2022-23.

The matter was taken up with the management in September & October, 2023 and reported to the Ministry in December, 2023. The LESCO management replied that LSs were assigned the duties of Sub-division Officers on stop gap arrangements due to non-induction of junior Engineers. The FESCO management replied that presently 60 new Sub-divisional Officers were inducted and posted in sub-divisions and acting/ current/ additional charge was entrusted to Line Superintendents due to acute shortage of staff.

The DAC in its meeting held on December 18 to 21, 2023 directed the management to submit revised reply and get the record verified from audit within a week and discontinue practice of entrusting acting/ current/ additional charge of SDO to LSs. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

1.13.31 Loss of lives due to no safety arrangements by the contractor

According to Caluse-22.2.7(b) of Contract No.ADB-65(R)-2012 (Package-1), “the contractor shall appoint an accident prevention officer at the site, responsible for maintaining safety and protection against accidents. As per Clause-22.8, “the contractor shall provide and maintain at its own expense lighting, fencing, and watching when and where necessary for proper execution and the protection of the Facilities, or for the safety of the owners and occupiers of adjacent property and for the safety of public”. As per GCC Clause-34.1 (c), Third Party Liability Insurance covering would be provided for bodily injury or death suffered by third parties including the employer’s personnel occurring in connection with the supply and installation of the Facilities. According to Clause-A (c) under Appendix-3 of Section-I, “an amount of Rs.2 million for any one accident or series of accidents arising out of one accident with number of accidents unlimited”.

During audit of NTDC, while the stringing activities were underway at tower location 4 to 21 by the Contractor M/s TBEA, children playing nearby took hold of the bull wire and fell down to earth at some height at tower location no.17(M-D) Section on April 21, 2018. This fatal accident claimed the precious lives of two innocent children at the spot leaving third one seriously injured. This accident at construction site was sufficiently evident that the contractor did not make security and safety arrangements including appointment of an Accident Prevention Officer at site as provided in contract agreement. This was also a serious lapse on the part of the employer and consultant for not getting the contractual obligations fulfilled from the contractor even no inquiry was conducted for fixing responsibility. The invoking of third party insurance clauses were also not forthcoming from record to get the bereaved families obtained compensation.

Non-adherence to the safety Clauses of the Contract resulted in loss of precious innocent lives of children during construction of transmission line by the contractor up to the Financial Year 2019-20.

The matter was taken up with the management on September 25, 2020 and reported to the Ministry on December 29, 2020. The management replied that the unfortunate incident occurred despite taking all the safety measures. M/s TBEA compensated the affected families and borne all the funeral as well as treatment expenses of the victims. Furthermore, no complaint from the victims' families was reported to the concerned authorities as the incident didn't occur due to negligence of the contractor / supervisory staff. Audit contended that the contractor failed to maintain security arrangements as required under the provisions of contract agreement and not even a formal inquiry was conducted.

The DAC in its meeting held on April 12, 2021 did not agree with the reply and directed the management to provide detailed / revised reply. The DAC in its meeting held on December 18 & 19, 2023 upheld the earlier decision. No further progress was intimated till the finalization of report.

Audit recommends that the management needs to inquire the matter regarding loss of lives of children due to non-observance of safety measures by the contractor and non-fulfilling the due obligation by the consultants in overseeing the contractor's performance. Further, family of the victims might be indemnified as per the NEPRA's directives.

(Draft Para No.1124/2023-24)

1.13.32 Non-production of record

According to the directives of the Public Accounts Committee issued on June 30, 2004, "to make available all information/ record to Audit as and when required by them, otherwise, disciplinary action will be initiated against persons responsible for the delay under Section-14 C (2&3) of the Auditor-General's Ordinance, 2001.

During audit of GEPCO, GENCO-II and SEPCO, despite serving of requisition of record, verbal requests, personal visits and a chain of correspondence exchanged with quarter concerned, the record was not produced to audit which hampered the working of audit in order to discharge its statutory functions. The detail is as under:

Sr. No.	Name of Company	Draft Para No.	Amount (Rs.in million)
1.	PESCO	727/2023-24	-
2.	GENCO-II	914/2023-24	-
3.	NTDC	1315/2023-24	-
TOTAL			-

(Source: Requisition of record)

Non-adherence to the clauses of Auditor-General of Pakistan Ordinance 2001 resulted in non-production of record up to the financial year 2022-23.

The matter was taken up with the management during September to October, 2023 and reported to the Ministry during November and December, 2023. The management of PESCO replied that the record required by audit was already in custody for special audit in the office of Internal Audit PESCO, as and when the same released from Internal Audit the record would be produced to Audit. The management of GENCO-II replied that the record

had already been provided to audit. The management of NTDC replied that PMU NTDC after providing its record, requested the audit to collect other auditable record from concerned formations. Audit contended that no record was provided.

The DAC in its meetings held on April 12, 2021 and December 14-23, 2023 directed the management of PESCO and NTDC to submit revised reply within 15 days and directed the management of GENCO-II to fix the responsibility against the Company Secretary within 15 days. No further progress was intimated till finalization of the report.

Audit recommends implementation of DAC's decision besides fixing responsibility.

1.13.33 Irregular appointment of Chairman Board of Directors NTDC

According to SOE Act 2023, Chapter-5 Clause 11, "the following persons shall not be appointed or continue to hold office as an independent director: (g) a person who is in the service of Pakistan; (j) an employee of a state-owned enterprise".

During audit of NTDC, the appointment of Mr. Khalid Ishaq (Chairman BOD) was made while being Senate member of the "Pakistan Institute of Fashion & Design" (a Public Sector department within the Ministry of Federal Education and Professional Training). He was also serving as Advocate General of Punjab. Audit was of the view that according the provisions of SOE Act 2023, Mr. Khalid Ishaq was not qualified for appointment as independent director.

Non-adherence to the provisions of SEO Act 2023 resulted in irregular appointment of Chairman Board of Directors NTDC during the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in November, 2023. The management replied that Mr. Khalid Ishaq was appointed as Chairman Board of Directors NTDC with the approval of Federal Government. Mr. Khalid Ishaq was not serving as Advocate General of Punjab at the time his appointment as Chairman Board of Directors NTDC. Moreover, he was also not considered employee of Public Sector department within the Ministry of Federal Education and Professional Training) being Senate member of the "Pakistan Institute of Fashion & Design" at the time of his appointment as Chairman BoD NTDC. However, that Mr. Khalid Ishaq, had already tendered his resignation as Chairman Board, NTDC.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance verified with documentary evidence within 30 days. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC's decision.

(Draft Para No.829/2023-24)

1.13.34 Irregular promotion of NTDC officer on Deputation with PEPCO

According to ESTA Code SL-No. 8, "Government servant on deputation retains a lien on the permanent post in his parent office, he is ordinarily governed by the rules of the lending Government in matters of pay, leave, pension, etc., and continues to be under the rule-making control of the lending Government which has a right to recall him. The lending Government accordingly has a right to determine in consultation with the borrowing

Government the terms of his employment under the latter, and these terms should not be varied by the borrowing Government without consulting the lending Government”.

During audit of NTDC, the officers remained on deputation with PEPCO and after completion of deputation period repatriated to NTDC, it transpired that these officers had gone on deputation in lower scales and got promoted in higher scales by the borrowing department and repatriated to parent department in higher scales. Promotion of deputationist by the borrowing department was against the deputation policy, rules and terms of deputation which needs justification.

Non-adherence to the provisions of deputation policy resulted in irregular promotion of NTDC officer on deputation with PEPCO during the Financial Year 2022-23.

The matter was taken up with the management in November, 2023 and reported to the Ministry in December, 2023. The management replied that the PEPCO was exercising the mandate of promotion/time scale upgradation in respect of officers on deputation (BPS-18 & above) on behalf of their parent companies i.e. DISCOs/GENCOs /NTDC. And it is admissible to the employees from the date of their eligibility and the arrears are to be paid by the borrowing companies (if any). In the instant case, the borrowing company i.e. PEPCO granted upgradation to the officers at Sr. No. 1, 2 & 4 after fulfilling the pre-requisite criteria as per prevailing policy.

Moreover, it is added that the officer at Sr. 6 i.e. Mr. Sohail Babar was allocated to NTDC from GENCO vide dated April 09, 2012 (Annex-A). The time scale upgradation right from BPS-18 to BPS- 19 in respect of the said officer was accrued w.e.f. November 15, 2011 during his stay in GENCO, therefore, the said company granted the Time Scale Upgradation to the officer with retrospective date i.e. November 15, 2011 vide office order dated July 04, 2012 (Annex-B) as par prevailing policy.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report within 30 days. No further progress was intimated till the finalization of report.

Audit recommends the implementation of DAC’s decision.

(Draft Para No. 982/2023-24)

CHAPTER-2

INTRODUCTION OF ENTITIES AND COMMENTS ON FINANCIAL STATEMENTS

2.1 POWER PLANNING & MONITORING COMPANY (PPMC)

2.1.1 Introduction

Power Planning and Monitoring Company (PPMC) was established for implementation of the Strategic Plan of Power Division. In its defined role, PPMC is responsible for assisting the Power Division, Ministry of Energy, Government of Pakistan in effectively monitoring and oversight of the Distribution Companies (DISCOs) in the following areas:

- Performance monitoring according to specified Key Performance Indicators (KPIs).
- Monitoring & Evaluation of financial performance.
- Monitoring of revenue and commercial operation.
- Effective HR control to boost up efficiency (not limited to promotions on the basis of integrated seniorities of BPS-18 and above officers and inter-Company transfers but include other HR matters).
- Surveillance & Investigation & Federal Complaint Cell
- Timely and uniform implementation of emerging technologies like AMI, Smart Grids, etc.
- Performance-based career progression to replace the present seniority basis system to promote and retain high-quality HR and weeding out non-performers
- Standardization of benchmarks across the Companies like financial, management, technical, and HR
- Capacity building of the Companies to cater to future challenges
- Uniform implementation of Government policies and programs
- Evolve the corporate governance structures to ensure compliance with applicable laws/rules.

The detail of formations and expenditure audited was as under:

(Source: Audited Financial Statement of PPMC Financial Year 2022-23)

2.1.5 Comments on Audited Accounts:

i) Profitability / Loss of the Company

During the Financial Year ended on June 30, 2023, PPMC earned a Profit of Rs.327.124 million which is 37.17% of the total Revenue earned by the company. Out of the total Revenue earned, company had an Operating Expense of Rs.422.861 million which is 48% of the Revenue. There was a nominal Finance Cost of Rs.2.4 million, which is 0.28% of the total Revenue. These two Expenses stand at Rs.425.318 million which are 48.32% of the Revenue, and make Earnings before Interest and Taxes of Rs.454.820 million which is 51.68% of the Revenue.

ii) Sale and Cost of Sale

Total Revenue generation for the FY 2022-23 is Rs.880.138 million, which was Rs.534.875 million in the previous year. In the current FY 2022-23, company improved its total earning by 345.262 million registering an increase of 64.55%. This Revenue in FY 2022-23 comprises of Management Fee of Rs.209.988 million (2022, Rs.27.663 million), Inspection Fee of Rs.495.535 million (2022, Rs.476.153 million) and Other Income of Rs.174.613 million (2022, Rs.31.058 million).

iii) Trade Debts and other Receivables

Company had Loans, Deposits, Advances and other Receivables of Rs.13.706 million in FY ended on June 30, 2023 which was Rs.20.114 million in the last year. These receivables mainly comprise of Loans and Advances to employees amounting to Rs.5.025 million, in the previous year 2022 this amount was Rs.11.484 million. Another constituent of Loans and Deposits is other Receivables of Rs.7.092 million which are receivables from WAPDA and GHCL, this amount was same in the previous year. Company also had a receivable of Rs.11.570 million on account of accrued Profit on bank Deposits and Investments in the FY 2022-23, which was Rs.2.689 million in the previous year 2021-22. Company should adopt long-term consistent measures to ensure timely recovery of these long outstanding receivables from related parties.

iv) Trade and other Payables

Trade and other Payables of the company reduced to Rs.467.554 million in the Financial Year ended on June 30, 2023 from Rs.1,007.913 million in the previous year. Out of this Rs.467.554 million, an amount of Rs.452.101 million was payable to CPPA-G.

v) Operating Expenses

The Operating Expenses of the company were reduced from Rs.524.137 million to Rs.422.861 million in the Financial Year ended on June 30, 2023. Thus, there was decrease of Rs.101.275 million from the previous year. The reason for reduction in Operating Expenses is reduction in the amount of salaries and other benefits due to reduction in staff and reduction in rental expenses.

2.1.6 Classified Summary of Audit Observations

Audit observations amounting to Rs.3.45 million were raised in this audit. Summary of the audit observations classified by nature is as under:

Sr. No.	Classification	Amount (Rs.in million)
1.	Irregularities

2.2.2 Comments on Financial Statements

2.2.2.1 Financial Overview

As per the audited Financial Statements for the year 2022-23, the Company incurred loss of Rs.14,983.387 million at the year ended on 30th June, 2023. Loss of Rs.1,984.844 million for the Financial Year 2021-22 decreased due to increase in sale of electricity, registering 17% increase. Moreover, the net electricity sale increased from Rs.337,812.484 million in the Financial Year 2021-22 to Rs.377,787.368 million in the Financial Year 2022-23, registering 12% increase.

2.2.3 Extracts of the Financial Statements

2.2.5 Comments on Audited Accounts

i) Profitability

The Company suffered a net loss of Rs.14,983.387 million during the Financial Year 2022-23. However accumulated losses have reached to the tune of Rs.96,762.693 million resulting in net capital deficiency. As on June 30, 2023, the Company's current assets exceeded current liabilities by Rs.21,476.297 million. This condition indicated the Company's ability to continue as a going concern.

ii) Sales and Cost of Sales

The sales of the Company were Rs.377,787.368 million including the subsidy received from the Government of Pakistan for an amount of Rs.51,244.289 million and cost of sales of the Company stood

at Rs.360,599.528 million which is 95% of the total the sales. This means that Company was unable to recover operating expenses for the year.

iii) Trade Debts and other Receivables

Total Receivables of the Company were Rs.106,472.339 million as on June 30, 2023. An amount of Rs.6,531.405 million was receivable from Government of Pakistan against tariff differential subsidy, Rs.68,479.551 million from various consumers, other receivables of Rs.31,087.146 million and Rs.374.237 million from employees and suppliers on account of loan and advances.

There was a decrease of trade debts amounting to Rs.14,164.60 million (Rs.82,644.147million – Rs.68,479.551 million) or 17% as compared with previous Financial Year. Huge pending receivables were a significant business sustainability risk for the Company and required long term rectification measures. Decrease in balance of receivables depicted good recovery efforts of the Company.

iv) Trade and other Payables

Payables of the Company decreased from Rs.116,269.492 million in the Financial Year 2021-22 to Rs.116,126.576 million in the Financial Year 2022-23. There is no significant change in payables as compared to previous year the same showed satisfactory financial management and better liquidity position of the Company. Prudent long-term actions are needed to stop the accumulation of payables and ensure steady reduction of pending payables in the future.

v) Non-Recognition of Debit Notes of Rs.13,694.27 million on account of mark up paid by CPPA-G

The External Auditors of FESCO during their certification audit exercise on FESCO's accounts for the Financial Year 2022-23, highlighted that the Company had not given due disclosure of its liabilities towards CPPA-G as on June 30, 2023. The claims included supplementary charges, being the markup charged on CPPA-G by independent power producers on account of delayed payments aggregated to Rs.13,694.27 million. Had these charges been applied, it would have enhanced the expenditure and increase the current year loss to the stated extent. In order to avoid financial impediment in the Power Sector supply chain, it was necessary that difference between CPPA-G and FESCO was resolved timely.

vi) Operating Expenses

The Operating expenses of the Company increased from Rs.28,091.755 million during the Financial Year 2021-22 to Rs.38,989.394 million during the Financial Year 2022-23, registering an increase of Rs.10,897.639 million.

vii) Re-valuation of Company Assets

As per detail given at note 15 of the Financial Statements, date of valuation of land has not been stated in the statements. The total land-freehold of the entire company has been valued at Rs.31,246.169 million only. Under IFRS 16.31, re-valuation should be carried out regularly so that the carrying amount of assets

does not differ materially from its fair value at the balance sheet date. The same apparently is not being done in the subject company.

2.2.6 Classified Summary of Audit Observations

Audit observations amounting to Rs.40,136.22 million were raised in this audit. The amount also includes recoveries of Rs.1,770.09 million as pointed out by the Audit. Summary of the audit observations classified by nature is as under:

Sr. No.	Classification	Amount (Rs.in million)
1.	Reported cases of fraud, embezzlement, misappropriation and theft	33.80

2.3.5 Comments on Audited Accounts

i) Profitability/Loss of the Company.

The company was remained loss of Rs.20,586 million during the year 2021-22. However, Company earned profit of Rs.22,884 million during the year 2022-23. The reason of the Profit was increased in the sale of electricity and recovery of subsidies from Government of Pakistan. However as on June 30, 2023, Company's current assets exceeded current liabilities by Rs.66,153 million.

ii) Sales and Cost of Sale

The sales of company were Rs.305,023 million including the subsidy received from the Government of Pakistan amounting to Rs.23,220 million and cost of sales of the company stood at Rs.258,627 million, which was 85% of the sale.

iii) Trade Debts and other Receivables

Major Receivables of the Company were Rs.134,769 million as on June 30,2023. This included an amount of Rs.23,614 million which was receivable from Government of Pakistan against Tariff Differential Subsidy. The trade debts stood at Rs.91,579 million, and Rs.13,034 million from tax authorities; however, other Receivables stood at Rs.6,404 million. Huge pending receivables were a significant business sustainability risk for the Company requiring long term rectification measures. Huge balance of receivables depicted poor recovery efforts of the Company, which needed justification.

iv) Trade and other Payables

Trade and other Payables of the company substantial increased from Rs.5,493 million in the Financial Year 2021-22 to Rs.88,080 million in the Financial Year 2022-23. The major amount of Rs.61,378 million was payable to CPPA-G on account of purchase of electricity. Payables towards CPPA-G are increased to Rs.4,097 million from the previous Financial Year indicating increase of 7%. Immediate short-term measures and prudent long-term action were needed to stop the accumulation of payables and ensure steady reduction of pending payables in the future.

v) Operating Expenses

The Operating Expenses of the company increased from Rs.24,307 million in FY2021-22 to Rs.30,385 million in FY 2022-23. Thus, there was an increase of Rs.6,078 million from the previous year 2021-22 which indicates increase of 25%. The reason of increase was in salaries and wages due to revision of pay scales and vehicle running and maintenance expenses etc.

2.3.6 Classified Summary of Audit Observations

Audit observations amounting to Rs.66,184.11 million were raised in this audit. The amount also includes recoveries of Rs.3,701.82 million as pointed out by the Audit. Summary of the audit observations classified by nature is as under:

2.5 ISLAMABAD ELECTRIC SUPPLY COMPANY (IESCO)

2.5.1 Introduction

Islamabad Electric Supply Company (IESCO) was registered as a public limited company under Companies' Ordinance 1984 in 1998 to take over the assets, functions and responsibilities of the erstwhile Islamabad Area Electricity Board, which was then a division of WAPDA. IESCO falls in the category of public limited Company under the third schedule of Companies Act, 2017.

IESCO's core function is to supply, distribute and sell power (electricity) in the area from Attock to Jhelum, and from the river Indus to River Neelum in Kashmir.

The Company is owned by the Government of Pakistan, and the Administrative Ministry is the Ministry of Energy (Power Division). It obtained its distribution license from National Electric Power Regulatory Authority (NEPRA). It services 3.2 million consumers directly, but touches the lives of more than 25 million people living in the 6 districts.

The detail of formations and expenditure audited was as under:

Sr. No.	Description	Total Nos.	Audited	Budget FY 2022-23 (Rs.in million)	Expenditure audited FY 2022-23 (Rs.in million)	Revenue / Receipts FY 2022-23 (Rs.in million)

2.	Assignment Accounts (excluding FAP)	Nil	Nil	Nil	Nil	Nil
3.	Authorities / Autonomous Bodies etc. under the PAO	N/A	N/A	N/A	N/A	N/A
4.	Foreign Aided Projects (FAP)	02	02	4,293.594	4,293.594	Nil

2.5.2 Comments on Financial Statements

2.5.2.1 Financial Overview

As per audited financial statements for the year 2022-23, the company sustained a loss of Rs.666.706 million in FY 2022-23 which was Rs.16,392.90 million in the preceding year. During the FY 2022-23 this reduction in the loss was because of higher gross profit. In the FY 2022 gross profit was Rs.13,247.790 million which increased to Rs.34,059.80 million in the FY 2023. Accumulated loss was Rs.83,718.990 million in FY 2022 which slightly increased to Rs.92,301.799 million. Even though Company sustained a loss of Rs.666.706 million

in FY 2023, but addition in accumulative loss was Rs.8,582.8 million; reimbursement benefits, related deferred income tax and incremental depreciation transferred from surplus on revaluation of operating fixed assets to accumulated loss added up in accumulative losses. There was 18.41% increase in the net sale of electricity (other than government subsidy) and 14.74% increase in gross revenue generated through sale of electricity and subsidy from the Government.

2.5.5 Comments on Audited Accounts

i) Profitability / Loss of the Company

During the FY ended on 30 June 2022, IESCO sustained a loss of Rs.16,392.90 million which was 6.83% of the gross revenue, but in the subsequent year ended on June 30, 2023 company reduced its loss position both in percentage terms and in absolute value. During the current year, Company sustained of loss of Rs.666.71 million which is only 0.24% of the gross revenue. Company reduced its administrative cost to Rs.7,084.97 million in FY 2022-23 from Rs.7,918.26 million in the previous year. However, there was an addition of Rs.4,446.52 million in distribution cost in FY 2022-23 which are recorded as 24,644.18 million in the Financial Year ended on June 30, 2023.

ii) Sale and Cost of Sale

The sales of company were Rs.275,323.628 million including the subsidy received from Government of Pakistan amounting to Rs.24,238.529 million. However, cost of electricity stood at

Rs.241,263.825 million which is 87.63% enabling the company to record a gross profit of Rs.34,059.80 million.

iii) Trade Debts and other Receivables

Major Receivables of the Company were Rs.90,035.84 million against trade debts as on June 30, 2023. This included an amount of Rs.31,691.746 million receivable from non-Government consumers and Rs.59,479.133 million receivables from Government consumers. However, company also recorded an allowance for expected credit losses amounting to Rs.1,135.043 million in FY 2023. Company also recorded an amount of Rs.9,264.983 million on account of other receivables, which comprises on other companies of water and power sector. Receivables from Government of Pakistan stand at Rs.5,479.502 million at the end of June 30, 2023, out of this amount an amount of Rs.1,751.185 million is against Tariff Differential Subsidy, balancing amount is receivable on account of other subsidy packages announced by the Government of Pakistan from time to time. Company should adopt long-term consistent measures to ensure timely recovery of these long outstanding receivables.

iv) Trade and other Payables

Trade and other Payables of the company have been reduced to Rs.178,964.91 million in the Financial Year ended on June 30, 2023 from Rs.212,990.08 million in the previous year. Out of this 178,964.91 million, amount of Rs.107,331.583 million is payable to CPPA-G on account of purchase of electricity. Even though there is a decreasing trend in the amount payable to CPPA-G, company should adopt an immediate prudent measures to stop the accumulation of payables and ensure steady reduction of pending payables in future.

v) Operating Expenses

The Operating Expenses of the company were increased from Rs.29,361.78 million to Rs.33,269.19 million in the Financial Year ended on June 30, 2023. Thus, there was an increase of Rs.3,907.41 million from the previous year. The reason of increase was revision of salaries and wages, and inflation impact on other items.

2.7.2 Comments on Financial Statements

2.7.2.1 Financial Overview

Brief on the Opinion (Qualification/Emphasis of Matter):

M/S Yousaf Adil, Chartered Accountant Firm given opinion about true and fair presentation of the state of the Company's affairs as on June 30, 2023 comprising the Statement of financial position as on 30 June, 2023, Statement of Profit and loss, other comprehensive income, the changes in equity and its cash flows thereof conform with the accounting and reporting standards as applicable in Pakistan.

a) Non-recognition of Debit Note of Rs.46,408.338 million on account of mark up paid by CPPA-G

The company has received various invoices from CPPA representing late payment charges being the share of the Company in the markup charged to CPPA by IPPs on account of delayed payments. MEPCO has not recognized the impact of debit notes issued by Central Power Purchasing Agency (Guarantee) Limited (CPPA) for Supplementary Charges aggregating to Rs.46,408.338 million.

b) Matter of Tax Contingencies

Tax contingencies which cannot be presently determined, hence, no provision for the same has been made in the financial statements.

c) Overview on the Profit & Loss Account Statement and Accumulated Losses

As per the audited Financial Statements of MEPCO for the Financial Year 2022-23, Company sustained loss of Rs.23,373 million at the year ended on June 30, 2023, reflecting poor management and weak controls to functionalize its operations. The trend of loss is on increasing side as Company sustained loss of Rs.22,814 million during the Financial Year 2021-22 too. In addition to this, the accumulated loss given in Financial Statements has also increased from 147,180 million to 190,836 million registering 29.661% increase, putting a question mark upon performance of BOD and management of the Company.

2.8 PESHAWAR ELECTRIC SUPPLY COMPANY (PESCO)

2.8.1 Introduction

Peshawar Electric Supply Company Limited (PESCO) is a subsidiary of PPMC and started its operation in May 1998 as a public limited Company, registered under Companies Ordinance, 1984. The Company has obtained distribution license from National Electric Power Regulatory Authority (NEPRA). The Company purchases electricity from NTDC. The Company sells electricity to whole area of Khyber Pukhtunkhwa (KPK). However, the business of FATA circle, which consists of tribal areas of KPK, was transferred to Tribal Electric Supply Company Limited (TESCO). PESCO receives supply from NTDC on 220 kV Grid Stations at Daud Khel, Domail, Mardan and 500 kV Grid Station at Tarbela and Peshawar. It also receives supply from Warsak Power House, Kot Addu Power House, Dargai Power House, Jagran Power House, AJK Chashma Nuclear Power Plant, and Kurram Garhi Power House.

The jurisdiction of PESCO includes Nine Operation Circles, one Project Director Construction Circle, one Grid System Construction Circle and one Grid System Operation circle.

The detail of formations and expenditure audited was as under:

Sr. No.	Description	Total Nos.	Audited	Budget FY 2022-23 (Rs.in million)	Expenditure audited FY 2022-23 (Rs.in million)	Revenue / Receipts FY 2022-23 (Rs.in million)

ix) 2.8.4.1 Qualified Opinion given by the External Auditors on the Financial Statements of PESCO FY 2022-23

It was observed that External Auditors had expressed qualified opinion about the accounts of PESCO for the Financial Year 2021-22 on the following basis: the company has not recorded supplemental charges since 2010 being charged by Central Power Purchasing Agency (CPPA) which are delayed payment charges of Independent Power Producers (IPPs). In our view, had these charges been recorded, trade and other payables and negative equity would have been higher by Rs.113.999 billion (2022: Rs.99.556 billion) and loss for the year would have been higher by Rs14.443 billion (2022: Rs.23.187 billion).

2.8.5 Comments on Audited Financial Statements

x) i) Profitability

The company has suffered a net loss of Rs.80594 million for the Financial Year ended on June 30, 2023 and at that date, the accumulated losses were Rs.548,912 million. Similarly, the current liabilities exceeded the current assets by Rs.276,773 million at the year end. These factors indicate the existence of a material uncertainty, which may cast significant doubts on the company's ability to continue as a going concern. The company was suffering from consistent losses over the years which reflected operational inefficiencies as well policy bottlenecks requiring urgent remedial action.

xi) ii) Sales and Cost of Sale

The sales of the Company were 279,495 million including subsidy received from Government of Pakistan for an amount of Rs.39,271 million and cost of sales of the company stood at Rs.322,563 million which was 115.41% of the sales. This meant that the company was unable to recover the operating expenses for the year.

xii) iii) Trade Debts and other Receivables

Total Receivables of the Company were Rs.224,349 million as on June 30, 2023. An amount of Rs.26,091 million was receivable from Government of Pakistan (Ministry of Finance) against Tariff Differential Subsidy, Rs.96,905 million from other Associated companies, tax authorities and other receivables, Rs.97,620 million from various consumers on account of electricity sold and Rs.3,732 million of loans and advances. Huge balance of receivables depicts the poor recovery efforts of the company, which needed justification.

Trade Debts	97,620,337,566
Loans and advances – considered good	3,732,288,648
Other receivables – considered good	96,905,868,230
Receivable from GoP (Ministry of Finance)	26,091,064,330
TOTAL	224,349,558,774

xiii) iv) Trade and other Payables

Payables of the company substantially increased from Rs.462,689 million during the FY 2021-22 to Rs.512,133 million during the FY 2022-23. The major amount of Rs.449,380 million was payable to CPPA-G on account of purchase of electricity which indicated the poor liquidity position of the company and needed justification.

v) Non-reconciliation of CPPA-G claims

The company has not recorded supplemental charges since 2010 being charged by Central Power Purchasing Agency (CPPA) which are delayed payment charges of Independent Power Producers (IPPs). In our view, had these charges been recorded, trade and other payables and negative equity would have been higher by Rs.113.999 billion (2022: Rs.99.556 billion) and loss for the year would have been higher by Rs.14.443 billion (2022: Rs.23.187 billion).

2.8.6 Classified Summary of Audit Observations

Audit observations amounting to Rs.162,945.99 million were raised in this audit. The amount also includes recoveries of Rs.623.45 million as pointed out by the Audit. Summary of the audit observations classified by nature is as under:

2.12.5 Comments on Audited Accounts

i) Profitability / Loss of the Company

The company has improved its financial position from Rs.1.546 million in the year ended 30 June 2022 to Rs.4.991 million in the year ended on June 30, 2023. A significant contribution in this improved position is of other income, which improved to the tune of Rs.4.41 million in the current year. In the year ended

30 June 2022, other income was Rs.0.704 million which improved to Rs.5.109 million in year ended on June 30, 2023. Another contribution was proportionate taxation, in the year FY ended 2022 it was RS.17.142 million against Rs18.688 million Profit before taxation. However, in the current year, taxation is Rs.18.294 million against a profit before taxation of Rs.23.285 million.

ii) Revenue

The company recorded a Revenue of Rs.223.255 million in the year ended 2023. However, this revenue was Rs.222.981 million in the year ended 2022. Company generated its revenue mainly from management fee and has recorded a very small amount against tendering and bidding fee.

iii) Due from related parties

The company has reduced its receivables from related parties, in the year ended 2023 due from related parties was Rs.31.577 million which was Rs.47.066 million in the year ended 2022. This amount is receivable from GENCOs, WAPDA welfare Fund and NTDC.

iv) Right to use Assets

The company has significantly increased its right to use assets from Rs.12.689 million in FY 2022 to Rs.25.271 million in the FY ended 2023. This increase of Rs.12.58 million is for acquiring assets on lease for office use.

v) Trade and other Payables

The company has reduced its accrued and other Payables from Rs46.564 million in FY 2021-22 to Rs.43.874 million in the FY ended on June 30, 2023. These accrued and other payables mainly comprises on payables to Director General Medical Services, WAPDA. There was also a significant decrease in the amount named as due to related parties. Payable to related parties was Rs.96.729 million in FY 2021-22, which reduced to Rs.46.360 million in the FY ended on June 30, 2023. This amount is payable to, GENCOs, DISCOs, WAPDA and PPMC. Therefore, the company should have an efficient reconciliation mechanism to adjust these figures.

vi) Operating Expenses

Administrative and general expenses of the company slightly reduced from Rs.203.553 million in FY 2022 to Rs.203.244 million in the FY 2023. However, this decrease was only of Rs.0.31 million.

2.12.6 Classified Summary of Audit Observations

Audit observations amounting to Rs.586.48 million were raised in this audit. Summary of the audit observations classified by nature is as under:

Sr. No.	Classification	Amount (Rs.in million)
1.	Irregularities:

2.16 NATIONAL ELECTRIC POWER

REGULATORY AUTHORITY (NEPRA)

2.16.1 Introduction

National Electric Power Regulatory Authority was established as a body corporate under Regulation of Generation, Transmission and Distribution of Electric Power Act, 1997 for the regulation of power sector in the Country. NEPRA is a regulator of the power sector of Pakistan, though it is not involved in the execution of commercial transactions, but it provides the basis for sale and purchase of electricity i.e. determination of tariffs. It is responsible to safeguard the interests of power generation companies, distribution companies and consumers of electricity, so that the flow of electricity may be continued without any shortfall / circular debt. Furthermore, being a monitory body, its role is also to take necessary actions to improve the efficiency of distribution companies in addition to the timely determination of electricity tariffs, thereby containing the accumulation of circular debt. The Authority operates through Head Office located in NEPRA Tower, Attaturk Avenue (East), Sector G-5/1, Islamabad and three regional offices across Pakistan.

The detail of formations and expenditure audited was as under:

2.17 PRIVATE POWER AND INFRASTRUCTURE BOARD (PPIB)

2.17.1 Introduction

The Private Power and Infrastructure Board (PPIB) was created on August 2, 1994 under Ministry of Water and Power, Islamabad as "One Window Facilitator" to promote private sector participation in the power sector of Pakistan. PPIB facilitates investors in establishing private power projects and related infrastructure, executes Implementation Agreement (IA) with Project Sponsors and issues sovereign guarantees on behalf of Government of Pakistan.

Main functions of PPIB are to implement the power policies, award projects to sponsors or private power companies, prepare all necessary or appropriate documentation, execute any of such documentation with private power companies, their sponsors, lenders and, whenever necessary or appropriate.

PPIB comprises of the following members:

- | | |
|---|-------------------------|
| 1. Federal Minister for Water & Power | Chairman |
| 2. Secretary, Water & Power/Chairman PEPCO | Member |
| 3. Secretary, Ministry of Finance | Member |
| 4. Secretary, Ministry of Petroleum & Natural Resources | Member |
| 5. Chairman, Federal Board of Revenue | Member |
| 6. Secretary, Planning Commission | Member |
| 7. Chairman, WAPDA | Member |
| 8. Managing Director, PPIB | Member/Secretary |
| 9. Mr. Zahid Rafique, | (Private Member) Member |
| 10. Mr. Amir Naseem | (Private Member) Member |

In addition to above Provincial Chief Secretaries and other departmental heads are included as Board Members (as and when required) for such meetings where items/projects pertinent to the particular Province/AJ&K form part of the agenda for board meetings.

Fourteen (14) thermal power projects having 2,898 MW capacities were launched by Independent Power Producers (IPPs) under Power Policy-1994 and twelve (12) IPPs having capacity of 2,409 MW were inducted under Power Policy-2002 by the PPIB.

The detail of formations and expenditure audited was as under:

2.18 MINISTRY OF ENERGY

(POWER DIVISION)

2.18.1 Introduction

The Ministry of Energy (Power Division) is Government of Pakistan federal and executive level ministry created on August 4, 2017 after merging of the Ministry of Petroleum and Natural Resources with the power division of the Ministry of Energy, respectively. The ministry has two divisions i.e. petroleum and power. The Power Division is responsible for general monitoring of power generation, transmission and its distribution as well as the power projects in the implementation stages. The following power sector entities come under the supervision of Power Division:-

- Power Planning & Monitoring Company (PPMC) along with its corporate entities
- GENCO Holding Company Limited (GHCL) along with generation companies
- Alternative Energy Development Board (AEDB)
- Private Power Infrastructure Board (PPIB)
- National Energy Efficiency & Conservation Authority (NEECA)
- Central Power Purchasing Agency Guaranteed (CPPA-G)
- Power Holding Limited (PHL)
- National Power Parks Management Company Limited (NPPMCL)

The detail of formations and expenditure audited was as under:

Sr. No.	Description	Total Nos.	Audited	Budget FY 2020-21 (Rs.in million)	Expenditure audited FY 2020-21 (Rs.in million)	Revenue / Receipts FY2020-21 (Rs.in million)

2.	Others	3,345.00

2.19 CENTRAL POWER PURCHASING AGENCY GUARANTEED (CPPA-G)

2.19.1 Introduction

The Central Power Purchasing Agency Guaranteed (CPPA-G) was incorporated in January, 2009 under the Companies Ordinance, 1984. The Company is registered as non-profit organization with the object to implement and administer market mechanisms for electricity procurement and sale by undertaking and performing functions and discharging responsibilities as are or may be laid down from time to time for the company. Since June 2015, CPPA-G has assumed the business of National Transmission and Dispatch Company under Business Transfer Agreement (BTA) pertaining to the market operations and presently functioning as the Market Operator in accordance with Rule-5 of the NEPRA Market Operator (Registration, Standards and Procedure) Rules, 2015. On November 16, 2018 National Electric Power Regulatory Authority (NEPRA) has approved the registration of CPPA-G as market operator under Rule 3 of the Market Rules.

CPPA-G being a market operator, purchases electricity from power generation companies (GENCOs) and sells it to DISCOs. It bills the distribution companies for sold electricity and makes payments to the power generating units. It is responsible for making payments to the IPPs on account of electricity and capacity charges after ascertaining that payments & deductions are made in accordance with the Power Purchase Agreements.

2.20 ALTERNATIVE ENERGY DEVELOPMENT BOARD (AEDB)

2.20.1 Introduction

Alternative Energy Development Board (AEDB) has been established as a statutory organization by announcing and promulgating the AEDB Act in May 2010. The Act bestowed upon AEDB the authorities and the responsibilities for the promotion and development of ARE. The main objective is to introduce, facilitate, promote and encourage development of Alternative Renewable Energy (ARE) in Pakistan at an accelerated rate. The administrative control of AEDB was transferred to Ministry of Water and Power (now Ministry of Energy Power Division) in 2006. The Government of Pakistan has inter alia mandated AEDB to:-

- Implement policies, programs and projects through private sector in the field of ARE.
- Assist and facilitate development and generation of ARE to achieve sustainable economic growth.
- Encourage transfer of technology and develop indigenous manufacturing base for ARE Technology.
- Promote provision of energy services that are based on ARE resources.
- Undertake ARE projects on commercial scale (AEDB Act 2010).

The Government of Pakistan has tasked the AEDB to ensure that 5% of total national power generation capacity be generated through alternative renewable energy technologies by the year 2030. In addition, under the remote village electrification program, AEDB has been directed to electrify 7,874 remote villages in Sindh and Balochistan provinces through ARE technologies.

4.	Foreign Aided Projects (FAP)	Nil	Nil	Nil	Nil	Nil

2.21.2 Comments on Financial Statements

According to Section-223 of Companies Act 2017, “the board of every company must lay before the company in annual general meeting its financial statements for the period, in the case of first such statements since the incorporation of the company and in any other case since the preceding financial statements, made up to the date of close of financial year adopted by the company”.

In NPPMCL, financial statements of the company for the financial year 2022-23 could not be finalized by the management up till December 31, 2023.

2.21.3 Classified Summary of Audit Observations

Audit observations amounting to Rs.114,365.42 million were raised in this audit. Summary of the audit observations classified by nature is as under:

Sr. No.	Classification	An amount (Rs.in million)
1.	Irregularities	
	A. Procurement related irregularities	14,769.28
	B. Irregularities pertaining to violation of Regulatory Laws & Regulations	10,315.08
2.	Others	89,281.06

CHAPTER-3

THEMATIC AUDIT ON PROCUREMENT AND MATERIAL MANAGEMENT IN NTDC

3.Thematic Audit on Procurement and Material Management in NTDC

3.1 Introduction

The National Transmission and Despatch Company (NTDC), established in 1998 and licensed by the National Electric Power Regulatory Authority (NEPRA) in December 2002 is playing a crucial role in the energy infrastructure of the country. Its primary responsibilities encompass a wide array of activities that contribute to the efficient transmission and seamless evacuation of electricity generated from various sources such as hydel, thermal, nuclear power stations, renewable energy plants, and independent power producers (IPPs). Once the electricity is integrated into the grid, NTDC employs its advanced 660/500/220 kV transmission system to transmit the electricity across the network, ensuring its widespread distribution to all distribution companies (DISCOs) and K-Electric.

A critical aspect of NTDC's operations lies in its procurement and material management functions. The procurement process involves securing the necessary materials essential for the development projects undertaken by NTDC. This process goes beyond mere acquisition and extends to negotiating favorable terms and conditions in contracts. Any modifications or changes are meticulously documented and agreed upon by both parties. Material management, a parallel facet of NTDC's operations, adheres to a rigorous compliance framework outlined in the NTDC Store and Procedure Manual. The primary objective of material management is to ensure the efficient utilization of acquired material for timely completion of projects while minimizing wastage which includes maintaining stringent standards for the receipt, issuance, and return of materials stored at the four strategically located NTDC warehouses in Jamshoro, Multan, Lahore, and Faisalabad.

In essence, NTDC stands as a pivotal entity in Pakistan's energy landscape, orchestrating the efficient transmission of electricity and upholding a rigorous framework for procurement and material management. Its comprehensive oversight extends to the timely acquisition of high-quality goods and services and ensures reliable and widespread distribution of electricity while upholding the highest standards of efficiency, compliance, and resource utilization.

3.2 Background

NTDC is responsible for construction, operation and maintenance of transmission network of electricity. Resultantly, NTDC requires huge procurement of material for construction of 660/500/200 kV transmission line and grids throughout the country for which it signs contracts, both national and international, funded through loans from esteemed partners. The timely execution of these contracts is pivotal for realizing NTDC's ambitions and advancing the nation's electricity infrastructure. These endeavors underpin the development and enhancement of transmission and distribution systems.

NTDC relies on foreign loans from partners like ADB, WB, JICA and AFD for significant procurements, crucial for acquiring resources. The procurement process under these loans is meticulously orchestrated with thorough oversight and approval at each stage from the development partner, ensuring transparency and alignment with

overarching objectives. This careful engagement extends from project inception to contract award and post-award monitoring, ensuring meticulous compliance with stipulated terms and guidelines.

Optimization hinges on factors like demand forecasting, inventory control, supplier management, technology integration and adherence to environmental and regulatory considerations, ensuring the efficacy of material management for NTDC's multifaceted projects. Efficient material management involves synchronizing resources to meet operational demands, ensuring timely availability of the right materials within budget constraints. As custodians of the nation's electricity infrastructure NTDC's mission-critical focus on effective material management supports uninterrupted electricity flow, sustains infrastructure and maintains reliability benchmarks.

3.3 Establishing the Audit Theme

3.3.1 Reasons of selection

The key points for selection of thematic audit on procurement and material management in NTDC are narrated below:

- i) **Critical function:** Procurement and material management are vital for NTDC's smooth project execution and infrastructure maintenance.
- ii) **Diverse activities:** NTDC procures various electrical and civil materials including complex EPC projects through both national and international competitive bidding.
- iii) **Robust practices:** Strategic planning, careful vendor selection and vigilant oversight ensure efficient and effective procurement and contract management.
- iv) **Effective material management:** International best practices minimize waste and prevent disruptions caused by theft, obsolescence or deterioration. It should be aligned with government priorities and SDGs.
- v) **Financial importance:** Substantial financial resources involved in material procurement necessitate a risk-based review for compliance and optimal resource allocation.
- vi) **Pivotal role:** Effective procurement and material management are crucial for project progress, risk mitigation and sustainability goals.
- vii) **Commitment to excellence:** The audit demonstrates NTDC's dedication to transparency, efficiency and responsible resource management in energy infrastructure.

In essence, efficiently managing procurement and materials is key to NTDC's success, and this audit evaluates sustainability, transparency and financial responsibility.

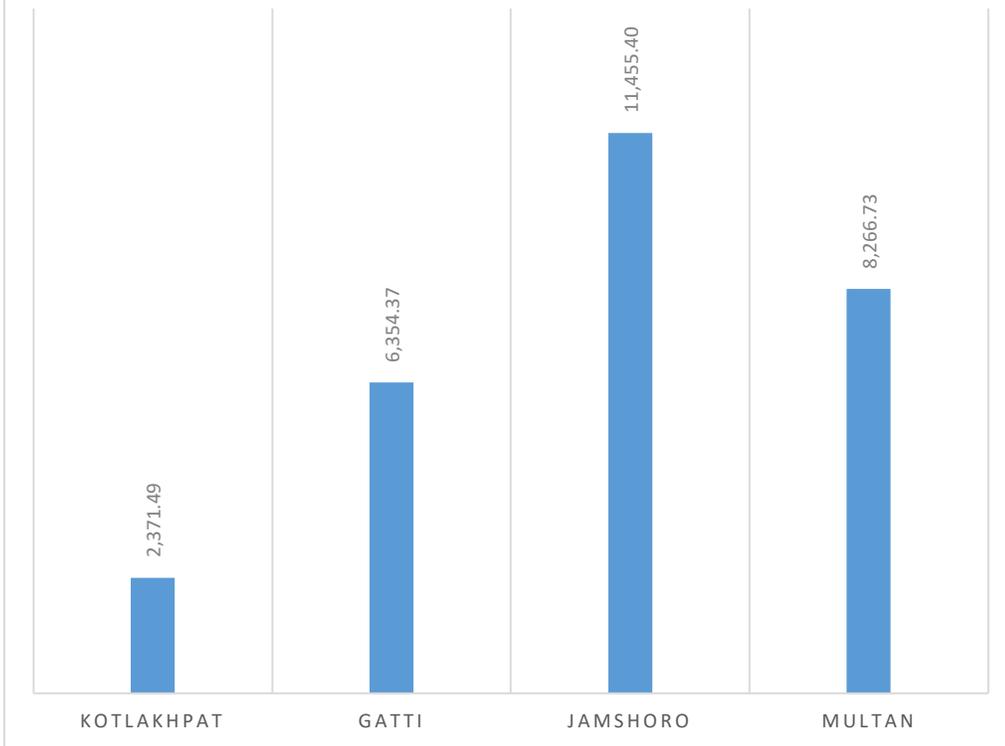

Financial Summary of Electrical Material

(Rs.in million)

Sr. No.	Warehouse	Opening Balances	Receipts	Issues	Closing Balances
1.	KOTLAKHPAT	2,341.52	674.77	644.79	2,371.49
2.	GATTI	4,390.74	2,491.76	528.13	6,354.37
3.	JAMSHORO	13,237.28	8,343.35	10,125.23	11,455.40
4.	MULTAN	5,316.32	6,913.88	3,963.47	8,266.73
Grand Total		25,285.86	18,423.76	15,261.62	28,447.99

NTDC WAREHOUSES STOCK BALANCES FY-2022-23

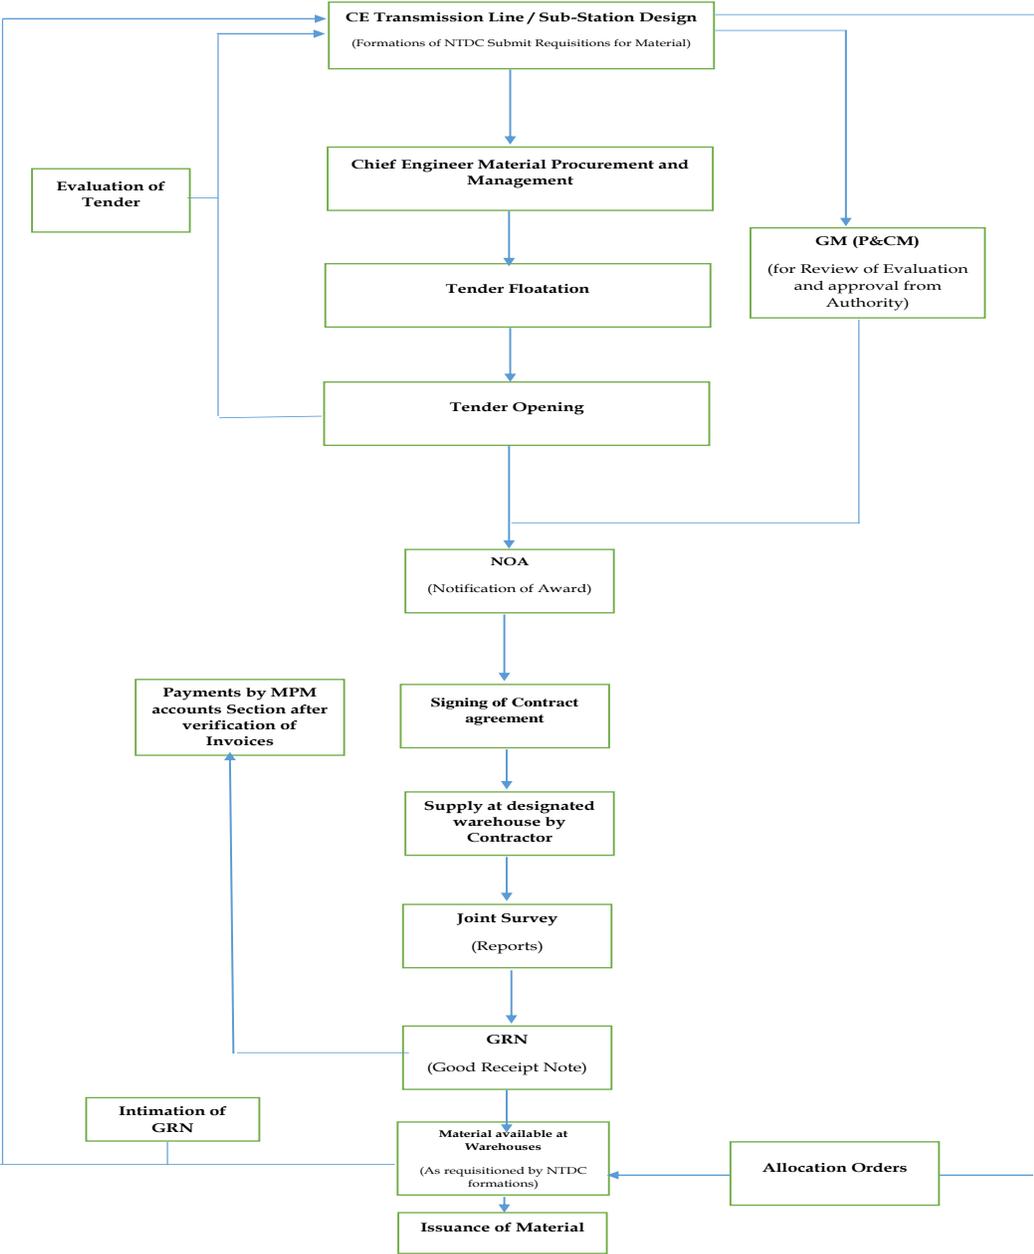

Operations Flow of Chief Engineer Material Procurement and Management NTDC

Within NTDC, a complex procedure ensures acquiring the right materials for efficient power transmission. Field formations initiate by requesting specific electrical equipment. The Transmission Line/Substation Design department of NTDC meticulously assesses these requests, verifying technical compatibility

and compiling detailed specifications.

This information then reaches the MP&M department of NTDC, its launch a competitive bidding process. Pre-qualified suppliers submit bids, which are carefully evaluated by the Design department against technical and qualitative criteria. After thorough review and approval, contracts are signed with chosen suppliers and deliveries are made to designated warehouses.

Workflow Chart of Chief Engineer Material Procurement and Management

3.3.2 Purpose

Thematic audit of Procurement & Material Management in NTDC aims to expose operational weaknesses and enhance the cost-effective procurement of materials, aligning with the NTDC Warehouse Control and Procedure Manual. The audit scrutinizes internal controls, seeking to identify gaps, ensure judicious resource utilization, strengthen internal controls, optimize procurement strategies and improve operational efficiency. The theme addresses major issues related to material assessment, annual procurement plans and overstocking, aligning with SDG No. 12 which represent sustainable public procurement in accordance with national priorities.

Thematic audit aims to identify weaknesses in NTDC's material acquisition processes, covering vendor selection, bid evaluation, contract negotiation, and material allocation. Corrective actions will be suggested to enhance overall procurement effectiveness. The audit also evaluates adherence to NTDC's Warehouse Control and Procedure Manual, ensuring efficient resource utilization. Recommendations from the audit will serve as a roadmap for NTDC's improvements in procurement and material management.

3.3.3 Objectives

To test the objectives of audit, we have developed hypothesis to be tested during course of audit. The objectives of thematic audit activity were as follow but not limited to:

- i. Whether Procurement in NTDC is the sole reason for overstocking?
- ii. Whether functioning of two major warehouses of NTDC i.e. Jamshoro and Multan is in line with NTDC Warehouse Control and Procedure Manual?

3.3.4 Scope

Thematic audit will encompass the office of the Chief Engineer (MP&M) NTDC and its two primary warehouses in Jamshoro and Multan for the Financial Years 2021-22 to 2022-23. To address audit objectives effectively, thematic audit will specifically focus on the following aspects to enhance efficiency, minimize risk and optimize the vital operations of NTDC.

- Assess the presence and effectiveness of controls to ensure alignment with NTDC Warehouse Control and Procedure Manual.
- Review procedures for material distribution from warehouse to field stores and from field stores to field formations, including the return of material in backward hierarchy.
- Evaluate the maintenance of proper records for Goods Received Notes (GRN), Material Requisition Slips (MRS), Material Return Notes (MRNs) and Stock Accounts.
- Review the Warehouse Inventory Management System (WIMS) to evaluate its efficiency and effectiveness.
- Assess how effectively and transparently materials are procured, stocked, and distributed while adhering to established rules and minimizing costs.

- Ascertain if Reserve Stock limits of inventory are observed to avoid unnecessary procurement.
- Review procedures to ensure proper forecasting of demand during the planning phase for material procurement.
- Analyze the mechanism for the disposal of unserviceable material.
- Assess whether due disposal procedures including survey reports and proper tender processes are consistently followed.

The primary formations/offices involved in thematic audit on procurement and material management within NTDC are outlined below:

- General Manager (D&E) - prepares bidding documents, evaluates bids and allocates materials against the projects.
- Chief Engineer PMU manages foreign-aided projects
- Manager (Procurement) - handles post-contract award activities
- Manager (Material Management) - oversees overall material management
- Manager (Inventory Control) - monitors stock levels
- Deputy Managers Warehouses in Multan and Jamshoro – incharge of warehouses and responsible for receipt and issuance of materials

3.4 Legal Framework Governing the Theme

- **The Public Procurement Regulatory Authority Ordinance, 2004** (as amended up to June 28, 2021) provides for the establishment of a Public Procurement Regulatory Authority (PPRA) for regulating procurement of goods, services, works and disposal of public assets in the public sector and for matters connected therewith. The authority has been mandated to ensure transparency, economy, efficiency and accountability of the public sector agencies through proper implementation and monitoring of PPRA Rules – 2004.
- **Public Sector Companies (Corporate Governance) Rules, 2013** (as amended up to July 01, 2019), the significant issues to be placed before the Board in order to formalize and strengthen the corporate decision-making process including policies related to the award of contracts and purchase and sale of raw materials, finished goods, machinery etc.
- **Procurement guidelines** of the development partners i.e Asian Development Bank and World Bank were to be adhered to loan-based procurements by NTDC.
- **NTDC Warehouse Control and Procedure Manual** which encompasses the complete procedure to be compliant with for receipt, issuance, return, stock verification, valuing and other allied matters related to material management in NTDC warehouses.
- **Warehouse Inventory Management System (WIMS)** is a web-based application developed by the National Transmission and Dispatch Company (NTDC) and aimed to provide real-time data and streamlined inventory management for its warehouses. The key objectives of WIMS are as under:
 - Improve inventory accuracy and control.
 - Enhance efficiency of warehouse operations.
 - Reduce costs associated with inventory management.
 - Provide real-time data and transparency to stakeholders
- **International Accounting Standard (IAS-2)** is an International Financial Reporting Standard (IFRS) that sets out the principles for how companies should account for inventories in their financial statements. It covers the measurement, subsequent recognition and disclosure of inventories. The objective of IAS-2 is to prescribe the accounting treatment for inventories. This includes:
 - Determining the cost of inventories
 - Recognizing the cost of inventories as an expense
 - Writing down inventories to net realizable value
 - Disclosing information about inventories

3.5 Stakeholders and Governmental Organizations Identified as Directly / Indirectly involved

Following stakeholders and governmental organizations were involved:

- i. Public Accounts Committee (PAC)
- ii. Ministry of Energy - MoE (Power Division)
- iii. Power Planning and Monitoring Company (PPMC)
- iv. National Transmission & Despatch Company (NTDC)
- v. Public Procurement Rules Authority (PPRA)
- vi. NTDC warehouses
- vii. Development Partners i.e. Asian Development Bank (ADB), Japan International Cooperation Agency (JICA) and World Bank etc.

3.6 Role of Important Organizations

National Transmission & Despatch Company (NTDC) is directly related to the instant theme being involved in the process of Procurement and Material Management and made arrangements for the material required for the projects of NTDC. The worth of NTDC's property, plant and equipment was Rs.390.73 billion and its profit after tax for the FY 2021-22 was Rs.16.56 billion. The Company operates and maintains sixteen (16) 500 kV Grid Stations and forty-five (45) 220 kV grid stations along with 5,970 Km 500 kV transmission lines having 22,350 MVA capacity and 11,322 Km 220 kV transmission lines having 31060 MVA capacity in Pakistan. Its total transmission system had the capacity to handle 53410 MW demand¹⁸. Besides incurring considerable expenditure for operating and maintaining the system, NTDC has to invest in its operational transmission system / network for augmentation, up-gradation and expansion in order to cater for upcoming generation capacity, overloading and system constraints. The material management in NTDC is crucial to ensure the smooth functioning of its operations. Efficient material management helps in maintaining adequate inventory levels, reducing costs, preventing wastage, and ensuring availability of materials needed for transmission and dispatch activities which resultantly leads to improved reliability of power supply, reduced downtime, and effective utilization of resources within NTDC.

3.7 Organization's Financials

NTDC utilizes its own resources, receives PSDP funds and foreign loans from development partners. NTDC's overall comparative financial summary of FYs 2018-19, 2019-20, 2020-21 & 2021-22 is as under:

(Rs.in million)

Sr. No.	Particulars	FY	FY	FY	FY
		2021-22	2020-21	2019-20	2018-19
1.	Total Assets of NTDC	554,349.27	484,692.32	443,679.46	401,813.49

¹⁸<https://ntdc.gov.pk/220kV-gird-station>

2.	Total Liabilities	372,812.07	308,653.76	287,886.60	251,231.00
3.	Share Capital and Reserves	181,537.21	176,038.57	155,792.86	150,582.49
4.	Revenue from use of system / wheeling charges - CPPA-G	76,325.97	53,943.91	43,445.04	41,989.37
5	Profit after tax for the year	16,564.42	12,740.95	9,246.19	11,235.76
6	Cash and cash equivalents at beginning of the year	7,275.06	9,517.82	13,836.66	8,319.76
7.	Cash and cash equivalents at end of the year	6,548.23	7,275.06	9,517.82	13,836.66

(Source: Audited Financial Statements)

3.7.1 Comparative Analysis of Balances of Electrical Material

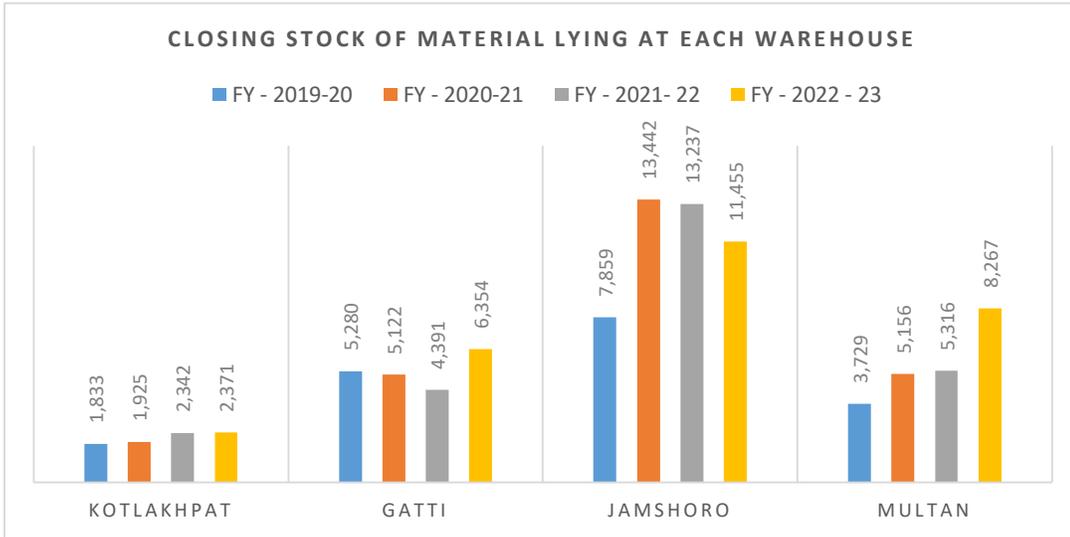

The closing balances of electrical material which was stored in four warehouses operated by the National Transmission and Despatch Company (NTDC) are provided below in a comparative form:

(Rs.in million)

Sr. No.	Warehouse	FY- 2019-20	FY- 2020-21	FY- 2021-22	FY- 2022-23
1.	KOTLAKHPAT	1,833	1,925	2,342	2,371
2.	GATTI	5,280	5,122	4,391	6,354
3.	JAMSHORO	7,859	13,442	13,237	11,455
4.	MULTAN	3,729	5,156	5,316	8,267

(Source: WIMS & Manager IC)

3.7.2 Graphical presentation of closing stock of material

3.7.3 Aging of Electrical Material lying at NTDC Warehouses

NTDC operates four warehouses to manage its electrical material. The total value of inventory held across these four warehouses amounts to a significant sum of rupees 28,447 million.

To gain a deeper understanding of the aging of the materials lying in two specific warehouses, namely Jamshoro and Multan, the assessment considered the closing balances of material for the Financial Year 2022-23. The results of this assessment revealed valuable insights into the aging of materials stored in these two warehouses.

In Multan warehouse, it was determined that there were materials worth Rs.37.41 million that had been stored for a period ranging from 31 to 39 years. These materials have remained in inventory for an extended duration and their aging is a noteworthy aspect of the warehouse's inventory profile.

Similarly, in Jamshoro warehouse, an examination of the inventory for the Financial Year 2022-23 unveiled materials worth Rs.20.43 million that had been in storage for a considerable period ranging from 31 to 46 years. This aging of materials in the Jamshoro warehouse indicates a significant historical aspect of the inventory, with some items having been retained for several decades.

The financial data and aging analysis of inventory in the NTDC's warehouses provide valuable insights into the composition and history of their materials. The aging of certain materials in both the Multan and Jamshoro warehouses highlights the need for careful management and strategic decisions regarding these long-retained inventory items.

3.7.4 Aging of closing stock of electrical material lying at NTDC Warehouses (Multan and Jamshoro) – FY 2022-23

The combined aging of closing stock of electrical material lying at NTDC warehouses i.e. Multan and Jamshoro ranges from 02 to 46 years amounting to Rs.9,409 million, which tantamount to mis-management of warehouse inventory that why such material was procured if not required. The excessive procurement of material caused extra burden on the financial management of NTDC.

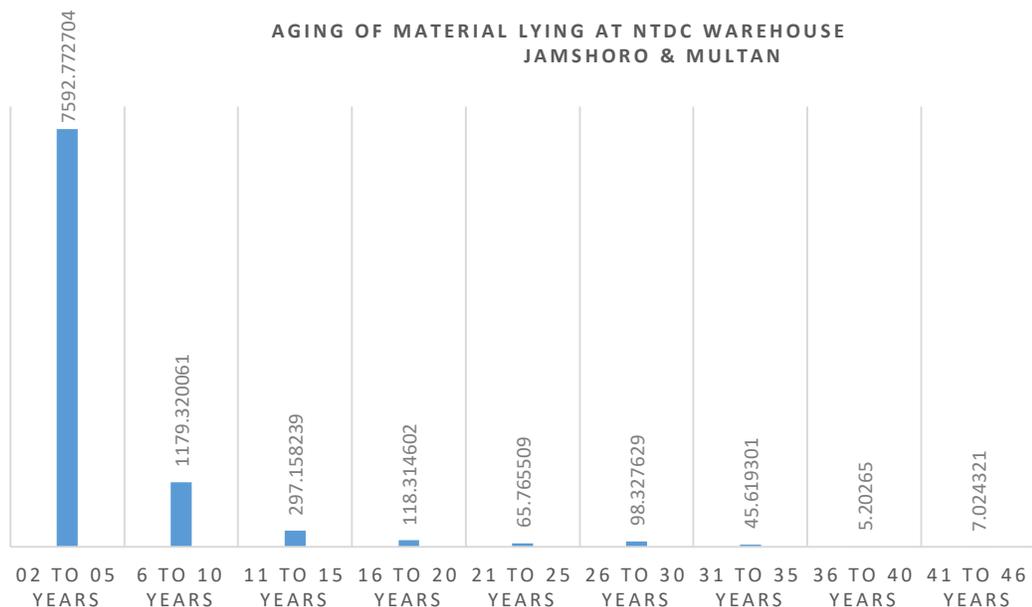

(Rs.in million)

Sr. No.	Range of Years	Material Value in Millions
1.	02 to 05 Years	7,592.77
2.	6 to 10 Years	1,179.32
3.	11 to 15 Years	297.16
4.	16 to 20 Years	118.31
5.	21 to 25 Years	65.77
6.	26 to 30 Years	98.33
7.	31 to 35 Years	45.62
8.	36 to 40 Years	5.20
9.	41 to 46 Years	7.02

(Source: WIMS)

3.7.5 Graphical representation of aging of closing stock of electrical material lying at NTDC Warehouse (Multan and Jamshoro) – FY 2022-23

The combined graphical representation of aging of material in Jamshoro and Multan warehouse is presented below:

3.8 Analysis of Tendering Process for Material Procurement

The examination of the tendering process for procurement reveals significant delays indicating that NTDC is not adhering to the prescribed timelines. This failure to follow the established schedule has led to untimely project completion, exceeding time allocations, increased contract costs due to exchange rate fluctuations, and the inefficient use of limited public resources. The detail regarding delayed procurement contracts is provided at **Annex-I & II**. However, specific observations include:

- Technical bid opening delays ranging from 33 to 117 days from the issuance of tender documents.
- Financial bid opening delays ranging from 59 to 263 days after Technical Bid Opening.
- Approval of Board of Directors (BoD) delays ranging from 31 to 152 days after Financial Bid Opening.
- Issuance of award delays ranging from 32 to 168 days after the issuance of Notice of Award (NOA)

3.9 Field Audit Activity

3.9.1 Methodology

The following quantitative and qualitative audit methodology was adopted during execution of Thematic Audit: -

3.9.1.1 Quantitative Methodology

- Receipt/issuance of material, Stock/Material Reconciliation Reports, GRNs/MRNs/SRs, Stock verification reports compiled by stock verification committee, Cost reports and Budgets, records of disposal of scrap / obsolete / unserviceable material were evaluated
- Data extracted from WIMS for aging of stock balances of two warehouses – i.e. Master warehouse Jamshoro and Multan
- Review of Financial Statements of National Transmission and Despatch Company
- Analysis of procurements of material contracts awarded during the Financial Years 2019-20 to 2022-23 to evaluate timely completion of the projects.
- Regression analysis was conducted to evaluate the impact of procurement levels on closing stock.

3.9.1.2 Qualitative Methodology

- Interview and discussion with the management.
- Examined the Loan Agreements, Project Agreement, Progress Reports, development partner Procurement Guidelines and PPRA Rules
- Evaluated the Tender / Bidding documents, Bid Evaluation Reports
- Evaluated the award of Purchase Orders, Contracts repeat / variation orders, EOT cases, Correspondence files of suppliers / contractors
- Evaluated the security controls and Incidents / theft reports
- Evaluated the Warehouse Control and Procedures Manual and Inventory records
- Obtained Warehouse Inventory Management System (WIMS) read only access to generate Financials and Stock Reports of Material lying at four warehouses of NTDC

3.10 Audit Analysis

3.10.1 Review of Internal Controls:

The internal controls for procurement of material in NTDC were not up to the mark and poor internal controls were evident from the fact that almost all the contracts / projects executed by NTDC failed to adhere to the timelines of PC-I / Donor Agencies/ Contract Agreement and Warehouse Control and Procedure Manual 2009. The following deficiencies in internal controls with reference to procurement and material management in NTDC were observed:

- Procurement of electrical material for multiple nature of projects are being carried out by CE (Design) without coordination with concerned Deputy Manager Warehouse and without assessing the factual position of material for which procurement tender is floated. The consumption of material is not according to the project-based procurement due to non-implementation of procurement plan.

- The reserve stock limit of NTDC warehouses were the same as the closing stock balances of inventory at the end of Financial Year which rendered deviation from best inventory control practices. Minimum/Maximum limit of warehouse material/inventory was not defined in warehouses of NTDC.
- The security measures were found insufficient to safeguard the huge volume of electrical material lying at NTDC warehouses i.e. Master warehouse Jamshoro and Multan
- Most of the electrical material was issued to contractors on rental basis including EPC contractors without maintaining separate register and observing due diligence for allocation of material on rental basis.
- Warehouse Inventory Management System (WIMS) was not designed to provide adequate reporting and organized inventory categorization for further analysis and transparent decision making in terms of efficient and cost-effective processes like aging of stock, warranty of stock, project based procurement etc which was not extractable as compared to best international inventory applications.
- Electrical material procured in two Warehouses was lying un-utilized since long ranging from 02 to 46 years which tantamount to mis-procurement and overstocking of material.
- Warehouse Inventory Management System was showing 38,480 No. of items as un-serviceable material for which no disposal mechanism was devised.

Sr. No.	Name of Warehouse	No. of Un-Serviceable Item
1	Master Warehouse Jamshoro	698
2	Multan Warehouse	7540
3	Gatti – Faisalabad	22352
4	Kotlakhpat	7890
	Total	38,480

(Source: WIMS)

- Huge quantity of surplus/left over material (Tower & Line Material) was returned to NTDC Warehouses from the completed EPC/Turnkey projects which shows that the estimates of the projects were not carefully prepared as per requirements of the projects.
- In emergency, material was being issued to contractor without getting Material Requisition Slip (MRS) from formations concerned and sometimes material was issued to contractor without taking on the record of WIMS or issuance of Goods Receipt Note (GRNs) against the material received in warehouses.
- The practice of storing electrical materials at the sites of other Distribution Companies (DISCOs) introduces a complex dimension to NTDC's material management. This arrangement is involved with shared storage spaces or materials left under the jurisdiction of other entities.

- There was no proper operational vehicle and equipment for proper handling of material which is the main cause of unstacking and damage of material etc. Owing to improper handling of material, working of warehouses has obstructed and led to reduced staff morale, inefficient use of available storage with poor facility layout.

However, by implementing following internal controls in line with NTDC Warehouse Control and Procedure Manual, NTDC can improve the efficiency, transparency and cost-effectiveness of its material management system.

1. **Standardized Procurement Process:** Implement a formal purchase requisition and approval process involving CE (Design), CE (MP&M) and Deputy Manager Warehouse.
2. **Project-Based Procurement:** Integrate project requirements with procurement planning to ensure material aligns with actual needs.
3. **Inventory Review:** Conduct regular physical inventory counts and reconciliation with WIMS to identify discrepancies and prevent overstocking.
4. **Warehouse Security:** Upgrade security measures at warehouses (Jamshoro & Multan) with Closed-Circuit Television (CCTV), access control systems, and trained security personnel.
5. **Rental Equipment Management:** Maintain a dedicated register for rental equipment, establish clear criteria for allocation, and implement due diligence checks before issuing.
6. **Obsolete Inventory Disposal:** Develop a disposal mechanism for unserviceable items through auctions.
7. **Issuance Control:** Implement strict procedures for material issuance, requiring Material Requisition Slips (MRS) and recording all transactions in WIMS and Goods Receipt Notes (GRNs)

3.10.2 Overall Assessment

NTDC requires a comprehensive overhaul of its electrical material management system, starting with addressing the critical control deficiencies identified. By implementing the proposed controls, focusing on high-risk areas and adopting a risk-based approach, NTDC can significantly improve the efficiency, transparency and cost-effectiveness of its operations - mitigating financial losses and project delays.

3.10.3 Risk Matrix Analysis

Control Deficiency	Likelihood	Impact	Risk Score	Mitigation Controls
Bypassing warehouse and procurement plan in material acquisition	High	High	Very High	Standardized procurement process, project-based procurement, inventory review

Inappropriate reserve stock limits and lack of minimum/maximum levels	Medium	Medium	Medium	Define minimum/maximum limits based on usage and lead times
Insufficient warehouse security	Medium	High	High	Enhance security measures with CCTV, access control, and trained personnel
Poor rental equipment management	Medium	Medium	Medium	Implement dedicated register, allocation criteria, and due diligence checks
Inadequate WIMS functionality for analysis and decision-making	Medium	Medium	Medium	Upgrade WIMS to provide better reporting, categorization, and analysis
Un-utilized and unserviceable material	High	High	Very High	Implement disposal mechanisms for obsolete and unserviceable items
Surplus material returned due to inaccurate project estimates	High	Medium	High	Improve project estimation accuracy and integrate with procurement planning
Issuing material without proper documentation or recording	High	Medium	High	Implement strict issuance procedures with MRS, WIMS recording, and GRNs
Complexities due to storage at DISCOs	Medium	Medium	Medium	Formalize agreements with DISCOs regarding shared storage and responsibilities
Inadequate handling equipment and poor facility layout	Medium	Medium	Medium	Provide proper equipment and optimize warehouse layout for efficient handling

3.11 Critical Analysis

3.11.1 Factors leading to overstocking of material in Warehouses of NTDC

Following issues are the main causes of overstocking of material in the warehouses and blockage of funds of the company/ NTDC.

- a) NTDC makes project-based procurement of material. The procurement is made according to requirement/assessment of future projects. So, procured material should have been utilized/consumed for the specified project but in reality it is not the case as for a single project, the material is allocated from many other projects which compromises the spirit of project based procurement. Eventually it

contributes to piling up of material in warehouses of NTDC. The audit noted observation 3.13.6 highlighting the failure to implement the procurement plan for material management in NTDC.

- b)** Huge procurements have been made for maintenance of transmission lines like Disc Insulators, Transmission Line Conductors and Tower Material. As per record of inventory, the procured material is very slow moving and it seems that it has been procured more than the requirements of the company because it is present in warehouses in huge quantity. Such procurement of material which has not been consumed so far is one of the reasons of overstocking of material. The audit identified concerns noted in observations 3.13.4, 3.13.2 and 3.13.35, highlighting the blockage of significant funds arising from the prolonged storage of Disc Insulators at the Jamshoro Warehouse. Moreover, inefficient and unnecessary procurement of electrical materials resulted in an excess beyond project requirements, causing a financial loss to NTDC.
- c)** Many mega projects of the company had been awarded on Turnkey basis (EPC Contracts) wherein it was the sole responsibility of the contractors to complete the projects (arranging all the material/resources/services at their own). However, it was transpired from the record that even in EPC Contracts, the material was allocated/provided from the warehouse of NTDC on loan basis to complete the projects. Following completion of EPC projects, firstly the material is not returned timely to NTDC, secondly, the returned material causes overstocking of inventory in Warehouses because it is returned at a time when it is not required for the purpose it was procured. Audit noted issue detailed in observation 3.13.12, underscoring unjustified favoritism towards EPC contractors arising from the provision of materials on a loan basis.
- d)** Moreover, it was found from the record that huge quantity of surplus/left over material (Tower & Line Material) was returned to NTDC Warehouses from the completed EPC/Turnkey projects which show that the estimates of the project were not carefully prepared as per requirements of the projects. Accordingly, the material had been procured by the contractor against the unrealistic survey and estimates. The leftover/surplus returned material from completed EPC projects rendered overstocking of material in the warehouses of NTDC. Audit identified concerns detailed in observation 3.13.10 emphasizing redundant procurement practices for Turnkey/EPC contracts that lead to an excess of leftover materials from completed projects.
- e)** Un-necessary purchase of material is also one of the causes of overstocking of material in warehouses in NTDC. Huge quantity of tower material, Disc Insulators, panels and Greely Conductors is lying dumped in warehouses which show that above mentioned material was procured beyond the actual requirements of the company. Such superfluous procurement of material is the main cause of blockage of funds and overstocking of material. Audit identified concerns detailed in observation 3.13.30 highlighting substantial likely loss owing to dumping of surplus Tower material at sub-warehouse Rahim Yar Khan.

3.11.2 Overstocking of Material - Transmission Line & Grid – in Warehouses of NTDC

Upon visit to the warehouses of NTDC (Jamshoro & Multan), it was seen that the warehouse was full with electrical material. Even huge quantity of material was placed outside the premises of warehouses. In NTDC, 2,079 electrical material items (Transmission Line & Grid Station material) worth Rs.9,409.51 million was lying at Jamshoro and Multan Warehouses ranging from 02 to 46 years. The dumping of such a huge quantity of material without utilization indicated that it was purchased beyond the requirement which caused blockage of funds. This act of NTDC management refers to superfluous procurement and wastage of funds without witnessing the realistic approach. With the passage of time, this electrical material is turning into obsolete/outdated. Resultantly NTDC may sustain significant financial loss. Moreover, overstocking also led to blockage of funds by investing in huge quantity of same type of material without further utilization which indicates that it was purchased beyond the requirement and unsubstantiated the project-based procurement. Audit noted concerns specified in observations 3.13.2 and 3.13.32 emphasizing a significant loss to the company stemming from the damage of materials for Grid Stations and Transmission lines along with the expiration of warranty claims for materials and an accumulation of excess electrical material resulting from ineffective or unnecessary procurement beyond project requirements. Top of Form

3.11.3 Ineffective Material Procurement Process

Procurement processes are designed to ensure efficient use of funds and resources. Effective and efficient procurement can help to ensure that products are available when needed for project and that the necessary supplies are available in the correct quantities as well as to ensure that the quality of products is high.

In NTDC, procurement of electrical material for multiple nature of contracts are being carried out by CE (Design) without coordination with concerned Deputy Manager Warehouse and without assessing the factual position of material for which procurement tender is floated and there is no any annual procurement plan and mechanism for significant procurement and fixation of reserve stock limit, resultantly NTDC is enduring with overstocking and unhealthy procurement of material. Moreover, information system/ Warehouse Inventory Management Control (WIMS), functional in NTDC, is not effective because procurement is not being planned by using this control system.

Non-compliance with principal procurement instructions resulted in wasted resources, significant financial losses through overspending, missed savings opportunities, procurement of unhealthy material. Moreover, overstocking also led to blockage of funds by investing in huge quantity of same type of material without further utilization which indicates that the same was purchased beyond the requirement and unsubstantiated the project-based purchase. The audit highlighted concerns specified in observations 3.13.1 with a focus on the absence of a mechanism for determining a reserve stock limit. NTDC was engaged in eighteen (18) contracts during the fiscal year 2022-23, all without a designated annual procurement plan.

3.11.4 Ineffective Warehouse Operations/Storage of Material/Security Measures

The purpose of effective warehouse operations is to arrange the materials in a manner that will ensure expeditious supply of the material to the user organizations. An efficient storage process in

warehouses is critical because it ensures that you're making full use of all the available space in your warehouse. Efficiency in warehouse storage also keeps the stocks organized without compromising productivity. Effective security arrangements are established to protect and safeguard materials against pilferage and theft. The D.M. (W/House) and A.M. (W/H) in charge are responsible for the efficient operations of their respective Ware Houses.

In NTDC, following discrepancies were found in terms of warehouse operations, storage of material and security matters.

- There was no allocated storage space/assigned location for each item in either the yard area and in the shed area. The material of same nature was kept at different locations of warehouses making it him possible to check/verify/count the number of a single item available in the warehouse.
- There was no floor layout for storage bins, racks and bays etc.
- There was no adequate space for passages, gates and doors for the movement of equipment and personnel.
- There was no identified storage location, in both yard and warehouse, with a unique storage locations code.
- All material was unstacked and not possible to count.
- Mostly material was dumped, broken and obsolete especially Disc Insulators.
- Security measures were not sufficient due to the inadequacy of necessary protective measures i.e. deficient security staff, non-installation of CCTV Cameras and non-availability of walkie-talkie etc. to safeguard its electrical material from theft, damage, unauthorized access, or other potential risks. Material was even placed outside the warehouse boundary.

Non-compliance with principle warehouse operations/storing/security instructions resulted in delay/slow moving of items, theft of material, damage of material, unable to access 100 per cent stock taking position and failing to execute FIFO inventory method etc for which NTDC sustained potential loss. Moreover, NTDC remained unable to rationalize the discrepancies during 100 per cent stock taking verification because of unstacked material and ineffective warehouse controls. Audit noted issues detailed in observation 3.13.38 emphasizing insufficient security measures attributed to the lack of necessary protective measures. This deficiency compromised the capability to protect electrical materials from theft, damage, unauthorized access, and other potential risks.

3.11.5 Imprudent Transactions of Material and Maintenance of Inventory Records

The purpose of transactions of material is to ensure that all aspects of material handling is being carried out in right way in order to facilitate the warehouse staff to perform their functions efficiently, correct preparation of documents and accurate accounting of material.

In NTDC, it was witnessed that in emergency, material was being issued to contractor without getting Material Requisition Slip (MRS) from EHV and sometime material was issued to contractor without taking on the record of WIMS or issuance of Goods Receipt Note (GRNs) against the material received in warehouses. Resultantly, most of the

returned healthy material of completed projects is lying dumped in unsafe conditions and has not been taken on the record of NTDC Warehouse and WIMS yet. In addition, most of the material lying at sub-warehouses/DISCOs have become out of design because it has been declared/found unserviceable, obsolete, broken, damaged, rusty and hardened in use.

Non-compliance with prudent transactions of material and maintenance of inventory records instructions resulted in potential risk of misappropriation due to non accountal of issued/returned material on WIMS. Therefore, resultantly it could not be further allocated to any other project yet. The audit identified issues detailed in observations 3.13.13, 3.13.3, 3.13.30, PDP # 1161/2023-24 and 3.13.18 highlighting potential risks of misappropriation of inventory. These risks included the non-accounting of returned balance material from the ADB financed EPC Project, absence of issuance of Goods Receipt Note (GRN) and failure to record the material in the inventory, a substantial potential loss arising from the disposal of surplus Tower material without the receipt of Material Requisition Note (MRN) and issuance of material to contracts without the receipt of Material Requisition Slips (MRS) and Super Subscribed (SS-Cheque) from the relevant formations of NTDC.

3.11.6 Poor Management against Issuance of Material on Rental Basis

The purpose of effective material management is to control the issue of materials from Ware Houses to Field Formation within NTDC, Non NTDC Formations, Temporary Issues on Loan Basis and Return of Material to the suppliers in case the material supplied is do not conform with the specification/ Inspection Certificate or if the physical condition of the material supplied is not good etc. or if the material is found defective with in the stipulated warrantee period.

In NTDC, it was witnessed that most of the electrical material was issued to contractor on rental basis without maintaining separate register and non- observance of due diligence for allocation of material on rental basis. Moreover, rent of most of the issued material was uncalculated yet and most of the rented material/equipment was not returned by contractor despite completion of the project. Resultantly, capital and assets of NTDC is putting at high potential risk due to slack management.

Ineffective management of material issued on rental basis resulted in non-recovery of rental charges and non-return of equipment from contractors which may cause misappropriation of material and loss to the company. The audit identified issues detailed in observations PDP # 1223/2023-24 emphasizing the allocation of stringing equipment on a rental basis to the contractors without the calculation and finalization of rental charges, neglecting codal formalities and lacking a dedicated register for tracking the material issued on a rental basis.

3.11.7 Inadequate Reporting On WIMS

By introducing Warehouse Inventory Management Control (WIMS), NTDC can leverage a number of advantages including better inventory planning, transparent inventory tracking, organized inventory categorization and ensuring goods and materials movement through warehouses in the most efficient and cost-effective way and individual item wise categorization showing detail of opening/closing balances in order to rationalize the discrepancies in the system.

In NTDC, Warehouse Inventory Management System (WIMS) was not designed to provide adequate reporting and organized inventory categorization for further analysis and transparent decision making in terms of efficient and cost-effective processes like aging of stock, warranty of stock, project-based procurement etc. Non-upgrading of WIMS resulted in non-provision of complete and comprehensive analysis of data for effective decision making in future. The WIMS does not reflect the material issued on Loan basis to different entities other than NTDC because “Allocation on loan basis” Module is not developed yet. The audit noted concerns outlined in observations PDP # 1224/2023-24 underscoring that the Warehouse Inventory Management System (WIMS) lacked sufficient design to offer comprehensive reporting and systematic inventory categorization. This deficiency hindered further analysis and transparent decision-making regarding efficiency and cost-effectiveness factors such as stock aging, stock warranties, project-based procurement and allocation on a loan basis.

3.11.8 Miscellaneous issues of Warehouse Material: Following issues related to the material placed in the warehouses of NTDC were observed which are detailed below:

a) Excessive Procurement of Disc Insulators: The excessive procurement of insulators, as witnessed in the case of Disc Insulators, reflects inefficiencies in NTDC's procurement processes. This led to overstocking of Disc Insulators, financial strain, and the risk of material deterioration over time. To rectify this issue, NTDC should implement a more robust procurement strategy, incorporating accurate demand forecasting, inventory optimization, and a transparent approval process for material requisitions. The audit raised concerns as detailed in observations 3.13.4 and 3.13.35 emphasizing that 701,087 units of Disc Insulators valuing Rs.4,446.59 million have been stored in the warehouse for an extended period. These insulators were acquired between 1987 and 2022 for the construction of new projects and the operational maintenance of transmission lines. The accumulation of such a substantial quantity of insulators without deployment suggests an over-purchase beyond actual requirements, resulting in a financial bottleneck of the specified magnitude. Furthermore, 3,176 units of 160 KN Disc Insulators were allocated from Purchase Order ADB-79-2015 (VI) to the civil work contractor M/s NPCC for activities under Contract No. ADB-108-2017. Subsequently, these disc insulators were deemed "unhealthy".

b) Storage of Electrical Material at Other DISCOs: The practice of storing electrical materials at other Distribution Companies (DISCOs) introduces a complex dimension to NTDC's material management. This arrangement may involve shared storage spaces or materials left under the jurisdiction of other entities. It not only complicates tracking and accountability but also poses risks of mismanagement or misplacement. To mitigate these challenges, NTDC should establish more spaces for such storage arrangements, ensuring strict adherence to inventory control and security measures. The audit expressed apprehensions as outlined in observations 3.13.27 highlighting that electrical material worth Rs.42.07 million were stored in the warehouses of DISCOs (SEPCO and QESCO) without proper security and safekeeping. The majority of these electrical materials have become obsolete due to being declared unserviceable, outdated, broken, damaged, rusty and hardened from use. Owing to managerial neglect, this material has not been employed for the company's benefit and has ultimately become worthless.

c) Material Lying Outside Boundary Wall/Premises of Warehouse: The presence of material (conductor reels, tower and line material) lying outside the boundary walls of the warehouse represent a significant security breach and likely potential loss to the company. It is crucial that NTDC enhances its security measures to protect valuable assets. This includes the installation of surveillance systems, improving fencing, and implementing

stringent access controls. Additionally, staff should be trained and empowered to promptly report and address any irregularities in material storage and security. The audit raised concerns as specified in observations 3.13.38 pointing out that a security sergeant at the Jamshoro Warehouse reported theft of control cable. This incident occurred because a significant portion of the electrical material was placed outside the warehouse's boundary wall.

d) Absence of Stock Limits: The absence of clear stock limits presents a challenge for NTDC's material management. This can lead to overstocking, increased storage costs, and difficulties in tracking inventory levels accurately. To address this issue, NTDC should establish a comprehensive mechanism for determining reserve stock limits. This mechanism should consider factors such as historical usage patterns, demand forecasting, and industry best practices to ensure optimal material storage levels. The audit expressed concerns as detailed in observations 6.2.4.1 highlighting that instead of setting a reserve stock limit beforehand, the closing balance of electrical material at NTDC warehouses was designated as the reserve stock limit. Retrospective approval was granted to establish the total available stock balance as the reserve stock limit in warehouses. The lack of predefined criteria for determining the reserve stock limit in stores is leading to an unnecessary accumulation of materials.

e) Utilization of Material: Efficient material utilization is critical to ensure that resources are maximized and potential waste is minimized. NTDC should implement robust procedures to monitor and evaluate material usage across its projects. This includes tracking the allocation of materials to specific projects, conducting regular audits to assess usage against project requirements, and implementing the change management processes to reallocate surplus materials to where they are needed most. The audit raised concerns as detailed in observations 6.2.4.8, PDP # 1250/2023-24 and 6.2.4.31 underscoring the existence of incomplete tower material components within NTDC Warehouses and material reconciliation reports identified surplus/balance items intended for return by contractors. The extended non-utilization of the material is contributing to its deterioration and loss of strength, potentially resulting in significant losses for the company. Furthermore, for five EPC Development Projects under "Design-Build" the required processes of material return and subsequent preparation of material reconciliation statements for completed projects were not adhered to, as per the findings of the audit.

f) Procurement and retaining of 132 kV Tower Material: The procurement and retention of 132 kV Tower Material across NTDC's warehouse Jamshoro indicate complexities in inventory management and oversight as its retention does not fall under the purview of NTDC. It is imperative that NTDC standardizes its material procurement and allocation procedures, ensuring that all materials are efficiently distributed to projects in a timely manner. Additionally, clear guidelines should be established for the retention and handling of tower and line material of 132 kV in warehouses of NTDC to prevent any misappropriation in future. The audit expressed concerns as narrated in observations 6.2.4.17 emphasizing that 132 kV tower material valuing Rs.480.78 million was stored at NTDC warehouses in Jamshoro and Multan. This situation is irregular as the storage or retention of 132 kV tower and transmission line material is not within the jurisdiction of NTDC. Such actions result in the blocking of funds and a reduction in warehouse storage capacity.

g) Inadequate material handling due to non-functional vehicles and equipment: To enhance the movement of materials and storage efficiency, it is imperative to implement a material handling system. A well-designed system has the potential to reduce costs and minimize the risks of accidents and damage. The NTDC warehouses currently face challenges due to the absence of appropriate operational vehicles and equipment for effective material handling, resulting in issues like material unstacking and damage. Auctioning off-road vehicles and equipment presents NTDC with the opportunity to reap various benefits, including the acquisition of new

vehicles and equipment to ensure the smooth functioning of warehouses. The lack of necessary vehicles and equipment has hindered warehouse efficiency, leading to diminished staff morale, inefficient use of available storage, and a suboptimal facility layout. The audit raised concern as detailed in observation PDP # 1222/2023-24, highlighting that six off-road vehicles valuing Rs.17.5 million were supposed to be auctioned or disposed of but this process was not carried out. The failure to dispose of these vehicles is resulting in additional deterioration and a decrease in their salvage value. Furthermore, the absence of suitable operational vehicles and equipment in NTDC warehouses is a primary factor contributing to improper handling, unstacking, and damage of materials resulting in loss to the company etc.

3.12 Regression Analysis for Assessing Relationship/Impact of Procurement Activities on Closing Stock in NTDC

3.12.1 Data set for regression analysis

The selected analysis employs regression, with procurement as the independent variable and closing stock as the dependent variable. Its purpose is to evaluate how procurement levels affect closing stock levels. The detailed datasets for procurement and closing stock are provided in **Annex-III** and **Annex-IV**, respectively. **Annex-V** displays the comprehensive summary output of the regression analysis conducted using Microsoft Excel.

Years	Procurement (independent variable – X-axis) (Rs)	Closing Stock (dependent variable - Y-axis) (Rs)
2019-20	13,364,892,380	18,700,952,161
2020-21	6,950,610,064	25,644,851,605
2021-22	5,569,018,955	25,285,858,685
2022-23	15,408,809,614	28,133,096,159

(Source: WIMS and MP&M Department, NTDC)

Hypothesis of the study: Null Hypothesis (H_0) = There is no relationship between procurement and closing stock.

Alternative Hypothesis (H_1) = There is relationship between procurement and closing stock.

Regression Model/Equation

$$Y = \beta_0 + \beta_1X_1 + \beta_2X_2 + \dots + \beta_nX_n$$

Where:

- Y is the predicted or estimated value of the dependent variable.
- β_0 is the intercept, representing the value of Y when all independent variables are zero.
- $\beta_1, \beta_2, \dots, \beta_n$ are the coefficients for the respective independent variables (X_1, X_2, \dots, X_n).
- X_1, X_2, \dots, X_n are the values of the independent variables.

The coefficients (β values) in the equation represent the impact of each independent variable on the dependent variable. A positive coefficient means that an increase in the independent variable is associated with an increase in the dependent variable, and a negative coefficient means the opposite.

3.12.2 Results/statistics of Regression Analysis

Multiple R	0.999901658
R Square	0.999803326
Standard Error	30753979.19

ANOVA

	Df	F-Stat	Significance F
Regression	1	5083.545	0.008928291

Microsoft Excel is used to perform the regression analysis to access the relationship/impact of procurement activities on closing stock. The interpretation of results/statistics of regression model is as under:

Multiple R (Correlation Coefficient): This value 0.999901658 (close to 1) represents an extremely high correlation between these two variables (Procurement and closing stock). It means, as Procurement increases or decreases by a certain amount, closing stock also increases or decreases by a consistent and constant multiple of that amount.

R Square (Coefficient of Determination): R-square is a statistical measure that tells us how well one variable (in this case, procurement) can explain or predict the changes in another variable (closing stock). An R^2 of 0.999803326 indicates that approximately 99.98% of the variability in the Y-axis is explained by the X-axis. This suggests an almost perfect fit.

Standard Error: The standard error is a measure of the accuracy of the model's predictions. In this case, a standard error of 30753979.19 suggests that there is some degree of variability or dispersion in the data points for "procurement" and "closing stock." This means that there may be other factors or sources of variation not accounted for in this model. A lower standard error would indicate a more precise model, while a higher standard error suggests that there is more variation in the data that the model has not explained.

3.12.3 Analysis of Variance (ANOVA):

It is used to determine whether there are statistically significant differences between two or more variables. The F-statistic and its associated p-value (Significance F) are used to determine whether the regression model is statistically significant. The breakdown in this regard is as under:

Regression Degrees of Freedom (df): The regression model has 1 degree of freedom, indicating that there's one independent variable (or one parameter estimated in the model).

F-statistic (F): The large F-statistic of 5083.545 suggests that there is a significant amount of variability in the dependent variable that is explained by the regression model. It suggests that changes in procurement are associated with changes in closing stock in a way that is statistically significant.

Significance F: This is the p-value associated with the F-statistic. It tells you whether the F-statistic is statistically significant. In this case, the significance level is 0.008928291, which is less than a typical significance level of 0.05. This suggests that the regression model is statistically significant.

3.12.4 Auxiliary Results of Regression Analysis

	<i>Coefficients</i>	<i>T- Stat</i>	<i>P-value</i>
Y-axis	23645035695	563.6984658	0.001129
X-axis	0.291054558	71.29898253	0.008928

Coefficients represent the relationship between independent and dependent variable(s). The interpretation of above-mentioned table in terms of t-statistics and p-value of selected two variables (procurement and closing stock) are narrated below:

Coefficient for Y-axis: The value (23,645,035,695) represents the predicted value of the closing stock when the procurement is zero.

Coefficient for X-axis: The coefficient for the X-axis is 0.291054558, which means that for every one-unit increase in the X-axis (procurement), the Y-axis (closing stock) is expected to increase by approximately 0.291.

T-Statistic: It assesses the statistical significance of the coefficient. A higher absolute t-statistic value indicates that the coefficient is more statistically significant. In both cases, the t-statistics are relatively high, indicating that both Y-axis and X-axis coefficients are statistically significant in the regression model. This means that changes in independent variable has a significant impact on the dependent variable.

Probability (P-value): A p-value, ranging from 0 to 1, reveals how likely our results are if there is actually no distinction. In both cases, the p-value for Y-axis & X-axis 0.001129 & 0.008928 (less than 0.05) respectively is low, indicating that this relationship is statistically significant. This means that statistical evidence to support the existence of a relationship between procurement and closing stock is established.

3.12.5 Conclusion

Based upon the P-value, the null hypothesis is rejected in favor of alternate hypothesis. The very high R-square and low p-values suggest that the model fits the data exceptionally well and there is a strong and statistically significant relationship between closing stock and procurement. The coefficient suggests a positive relationship between both variables, indicating that increase in procurement have a direct impact on closing stock, resulting in an escalation of inventory.

3.13 Significant Audit Observations

3.13.1 Non-preparation of annual procurement plan and no-mechanism for fixation of reserve stock limit - Rs.28,447 million

According to Rule-8 & 9 of Public Procurement Rules, 2004, “all procuring agencies shall devise a mechanism for planning in detail for all proposed procurements and shall announce it for each Financial Year for proceeding accordingly without any splitting or regrouping by advertising in advance on the Authority’s website as well as on the website of the procuring agency.

During Thematic Audit of Procurement and Material Management in NTDC Warehouse(s), it was observed that the closing balance of electrical material lying at warehouses of NTDC was worth Rs.28,447 million, neither the procurement plan was prepared nor reserve stock limit has been identified, instead of fixing reserve stock limit ex-post facto approval was granted for fixing total available stock balance as reserve stock limit in warehouses. There is no pre-defined criteria to ascertain the reserve stock limit in stores which is leading to overstocking of material. Moreover, NTDC entered into eighteen (18) contracts amounting to PKR 2525.35 million, CNY 290.60 million, Euro 11.74 million, USD 31.79 million during the F.Y 2022-23 without any annual procurement plan. This very act has resulted in overstocking which is the reason of dumping of electrical material without utilization and implies that the same was procured beyond the requirement and this wasteful spending caused blockage of funds to the stated extent.

Non-adherence to PPRA Rules and Warehouse Control and Procedure Manual resulted in overstocking owing to absence of any mechanism for fixation of reserve stock limit and non-preparation of procurement plan up to the Financial Year 2022-23.

Audit recommends that the management needs to look into the matter and frame mechanism in the light of Warehouse Control and Procedure Manual for avoiding overstocking of electrical material.

(Draft Para Nos. 1153 & 1259/2023-24)

3.13.2 Overstocking of material and expiration of warranty claims at NTDC warehouses - Rs.9,409.51 million

According to NTDC Warehouse Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2009, clause 1.5 & 3.4, CE (Design), NTDC, the engineer for the procurement of materials, inspect the specifications according to the requirement of the projects/ field formations and their ultimate allocation to the works or otherwise from warehouses and the supplier will bring the material to the Ware House along with warranty/guaranty certificate in order to assure that the material is free from defects.

During Thematic Audit of Procurement and Material Management in NTDC, warranty claims of 2,079 electrical material items worth Rs.9,409.51 million lying at Jamshoro and Multan NTDC Warehouse(s) ranging from 02 to 46 years have been expired. The dumping of such a huge quantity of material without utilization indicated that the same was purchased beyond the requirement and caused blockage of funds to the state extent. This very act renders to ineffective material/procurement management which may cause the loss to company in case of malfunction/damages occurred under normal use of material. There are chances that a large quantity of material has become defective and it cannot be claimed from the contractors which can cause a substantial loss to the company due to overstocking. The justification for lapsing of warranty claims of material is required.

Ineffective procurement/material management resulted in expiration of warranty claims owing to ineffective/superfluous procurement of electrical material beyond the requirement of projects worth Rs.9,409.51 million up to the Financial Year 2022-23

Audit recommends that the management needs to look into the matter and fix responsibility upon the person at fault.

(Draft Para Nos. 1152 & 1220/2023-24)

3.13.3 Excess booking of cost of material as compared to Stock Measurement Book (SMB) - Rs.5,110.96 million

According to Para-5 (5) of Public Sector Companies (Corporate Governance) Rules, 2013 “the board shall establish a system of sound internal control, which will be effectively implemented at all levels within the public sector company, to ensure compliance with the fundamental principles of probity and propriety; objectivity, integrity and honesty and relationship with the stakeholders.

During thematic audit of procurement and material management in NTDC, it was observed that cost of material amounting to Rs.5,110.96 million was booked in excess of actual Store Measurement Book (SMB) against 22 number purchase orders (P.Os) in two warehouses i.e. Multan and Jamshoro. This very act reflects irrational approach of NTDC management.

Non-adherence to authority’s instructions resulted in excess booking of cost of material as compared to Stock Measurement Book (SMB) - Rs.5110.96 million

Audit recommends that management needs to look into the matter and ensure to rationalize booking of cost of material.

(Draft Para No. 1214/2023-24)

3.13.4 Blockage of huge funds due to superfluous procurement of Disc Insulators lying at Jamshoro Warehouse since long – Rs.4,446.59 million

According to NTDC Ware House Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2009, clause 1.5, CE (Design), NTDC deals with the procurement of materials, inspection according to the specifications, consigning new material to the ware house according to the requirement of the projects/ field formations and their ultimate allocation to the works or otherwise, from warehouses.

During Thematic Audit of procurement and material management in NTDC Warehouse Jamshoro, it was witnessed that 701,087 Disc Insulators valuing Rs.4,446.59 million were lying at the warehouse since long which were purchased during the period of 1987 to 2022 for construction of new projects and operational maintenance of the transmission lines. The dumping of such a huge quantity of insulators without utilization indicates that the same was purchased beyond the requirement which caused blockage of funds to the stated extent. The crates/boxes of Disc Insulators are not properly stacked and broken which are lying on the ground in open place of the warehouse. Among them a large number of Disc Insulators are broken/damaged which are not fit for use. As the warranty period of the purchased material has already been expired so it cannot be reclaimed from the suppliers as well which is sheer negligence on the part of the NTDC management. Even Toughened Glass Insulators (latest technology) recently procured are placed in open place. The total value of inventory lying at the Jamshoro Warehouse is Rs.11.445 billion and it is pertinent to note that out of which Rs.4.446 billion is the value of insulators (40 per cent of total inventory). Moreover, the Disc Insulators (single item) are occupying more than 70 per cent of the total space of the warehouse. This very act resulted in overstocking of Disc Insulators owing to inefficient/superfluous procurement which does not substantiate the claim of project-based procurement of material.

Unnecessary procurement resulted in blockage of huge funds due to superfluous procurement of Disc Insulators lying at Jamshoro Warehouse since long valuing Rs.4,446.59 million up to the Financial Year 2022-23.

Audit recommends that the management needs to inquire the matter to fix responsibility for such wasteful procurement besides timely utilization and disposal of the Disc Insulators.

(Draft Para No. 1237/2023-24)

3.13.5 Irregular release of payment due to non-obtaining of extended warranty from contractor - Rs.3,632.355 million

According to Para-4 of Notification of Award (NOA) against Tender No. TLM-09M-2019 (Lot-I), “ninety percent (90%) of contract price of goods shipped shall be paid upon presentation of the document specified in Particular Condition of Contract (PCC) Sub-Clause-12.1(A) of Bidding Documents stipulates that the supplier shall submit certain non-negotiable documents including original copy of manufacturer’s/ supplier’s warranty certificates.” According to Chief Engineer (T/Line) Design letter No. CED/ NTDC/MTL-II/H-165 (Lot0I)/374-76 dated April 19, 2021, “approval for witnessing of FATs by third party for material procured under contract No. TLM-09-2019 (Lot-I) was grant to the supplier subject to provision of extended warranty period of 60 months (05 years).

During Thematic Audit of procurement and material management in NTDC, it was observed that ninety percent (90%) of the contract price of goods amounting to Rs.3,632.355 million shipped under contract TLM-09-2019 (Lot-I) was released to the supplier without obtaining of extended warranty of 60 months (05 years). The release of payment to contractor without extended warranty was against the instructions of authority/ provisions of Notification of Award and hence cannot be termed as regular.

Violation of instruction of authority and provisions of NOA resulted in irregular release of payment amounting to Rs.3,632.355 million to contractor due to non-obtaining of extended warranty up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility for irregular release of payment to contractor.

(Draft Para No. 1215/2023-24)

3.13.6 Non-implementation of procurement plan for project construction – Rs.3,049 million

According to PC-1 of the Project TLC-14 “Evacuation of Power from 2x660 MW Thar Coal Based SSRL/SECL Power Plant at Thar” Total cost of Project Rs.21,782.99 million included material value of Rs.11,318.69 million as detailed below:

Sr. No.	Material Description	Amount (Rs.in million)
1.	Steel Towers	4,110.44
2.	Conductor (Greeley)	4,102.66
3.	OPGW	100.71
4.	Insulator strings	2,466.01
5.	Insulator Hardware, grounding, material, stringing & construction equipment and accessories	538.87
Total		11,318.69

During thematic audit of procurement and material management in NTDC, it was witnessed that three (03) contracts TLM-09M-2019, TLM-10-2020 and TLM-11(R)-2022 were awarded for procurement of material for construction of project TLC-14 (Evacuation of Power from 2x660 MW Thar Coal Based SSRL/SECL Power Plant at Thar). However, the material amounting to Rs.3,049 million was issued to TLC-14 from 14 Purchase Orders which were not related with the TLC-14. Such arrangement for managing supply of material for the projects compromises the fundamental principles of project-based procurement as claimed by NTDC management because allocation orders of material against the contract No. TLC-14 were made from 14 Purchase Orders (POs) and

material was lifted from three Warehouse of NTDC i.e. Gatti, Jamshoro and Multan despite the fact that this material was not specifically procured for TLC-14. This depicts that utilization/allocation of material During Thematic Audit of procurement and material management in NTDC is not being done on actual basis against project/contract for which procurement was made. This very act of management refers to non-compliance with the project-based procurement and led to overstocking of material which needs justification.

Ineffective management resulted in non-implementation of procurement plan for construction of project amounting to Rs.3,049 million up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility for not issuing the material for which it was originally procured under report to audit.

(Draft Para No.1167/2023-24)

3.13.7 Un-authentic physical stock taking/verification position being unstacked/dumped/untraced material lying at NTDC Warehouses - Rs.2,947 million

NTDC Warehouse Control and procedure Manual deals with the receipt of material in ware house, stacking, updating of Ware House record, Issuance of material, preparation of periodic returns and includes the formats of transaction documents etc. guide lines / formats for the Stock Taking Teams in order to rationalize the discrepancies found during the verification of stock. The DM (IC) will be responsible for training the store staff in their duties and handling with the material as well as their stacking and counting.

During Thematic Audit of procurement and material management in NTDC, it was witnessed from 100% stock taking/verification reports that different types of Grid Station & Transmission line material valuing Rs.2,947 million lying at NTDC Warehouses(s) were lying unstacked, dumped, in rainy water. It was astonishing that material as per record and as per ground was verified by 100% stock taking committee but counting of unstacked/dumped material is not feasible to present accurate stock taking position. Moreover, the remarks noted in the SVR by the committee are very clear that the stock could not be counted due to above mentioned reasons. Therefore, the 100 percent verification and counting of material is not reliable. This very act renders to poor internal control system and indefinite counting of stock which caused deterioration of packing of material and ambiguous stock taking position.

Ineffective material management resulted in un-authentic physical stock taking position being unstacked/dumped/untraced material lying at NTDC Warehouses(s) having financial impact of Rs.2,947 million up to the Financial Years 2022-23.

Audit recommends that management needs to improve internal controls by taking actions in line with approved NTDC Warehouse Control and procedure Manual to rationalize the discrepancies found during the verification of stock besides expediting the process of stacking of material.

(Draft Para No. 1248/2023-24)

3.13.8 Non-allocation/non-disposal of incomplete tower material – Rs.1,679.91 million

NTDC Warehouse Control and Procedure Manual deals with the receipt of material in ware house, stacking, updating of Ware House record, issuance of material, preparation of periodic returns and includes the formats of transaction documents etc. guide lines / formats for the Stock Taking Teams in order to rationalize the discrepancies found during the verification of stock.

During Thematic Audit of procurement and material management in NTDC Warehouse Multan, it was witnessed on test check basis that incomplete components of tower material which had been purchased against four (04) Purchase Orders (POs) valuing Rs.1,679.91 million were lying in Multan Warehouse since long, but the same was not allocated to any project. Due to non-utilization, the subject material is deteriorating day by day and losing strength which may cause massive loss to the company.

Non-adherence to NTDC Warehouse Control and Procedure Manual resulted in non-allocation of incomplete components of tower material – Rs.1,679.91 million up to Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility for unnecessary procurement of material, laxity of the management for not arranging complete tower material and non-allocation/non-disposal of the available incomplete tower material under intimation to audit.

(Draft Para No. 1147/2023-24)

3.13.9 Unscrupulous procurement for Turnkey/EPC contracts resulting in surplus/left over material from the completed projects – Rs.1,477 million

According to NTDC Ware House Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2009, clause 1.5, CE (Design), NTDC deals with the procurement of materials, inspection according to the specifications, consigning new material to the ware house according to the requirement of the projects/ field formations and their ultimate allocation to the works or otherwise, from warehouses.

During thematic audit of procurement and material management in NTDC, it was witnessed that following the material reconciliation reports of the completed EPC/Turnkey Projects, material valuing Rs, 1,477 million was found surplus/balance material due to be returned to the warehouses of NTDC which depicts that the survey, estimates and procurement for the EPC Contracts were not made on actual basis as per requirements of the projects. Resultantly, a huge quantity of material turned extra which led to the wastage of funds and overstocking of material.

Inadvertent procurement for Turnkey/EPC contracts resulted in surplus/left over material from the completed projects – Rs.1,477 million.

Audit recommends that the management needs to inquire the matter for fixing responsibility besides expediting utilization/disposal of balance/left over material under intimation to audit.

(Draft Para No. 1166/2023-24)

3.13.10 Irregular placement of Tower Material at sub-warehouse stationed at Moro and unjustified recording of stock of Moro sub-warehouse in the books of accounts of Jamshoro Warehouse – Rs.1,147.21 million

According to Rule-5(5) of Public Sector Companies (Corporate Governance) Rules-2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented at all levels within the Public Sector Company, to ensure compliance with the fundamental principles of probity and propriety; objectivity, integrity and honesty and relationship with the stakeholders”.

During Thematic Audit of procurement and material management in NTDC, it was witnessed that 10 containers of 500 kV D/C Steel Towers against Contract TLM-08M-2019-LOT-I and various materials against TLM-09M-2019 valuing Rs.1,147.21 million were lying at undesignated NTDC Warehouse stationed at Moro. It is astonishing that stock/material lying at Moro Warehouse is being recorded in the books of accounts of Jamshoro Warehouse as per inventory record of WIMS provided by D.M Jamshoro Warehouse. This depicts that Moro Warehouse is not operational in books/record of NTDC. This very act renders to irregular placement and recording of stock at undesignated Warehouse which requires justification. Moreover, there is no proper staff available except Deputy Manager to handle and look after the inventory placed at Moro Warehouse. The temporary arrangement made for

storage of material at Moro under unsafe/un-protected conditions without proper security/staff is at risk and can cause huge loss to the company.

Non-adherence to Corporate Governance Rules resulted in irregular placement of stock at undesignated Warehouse stationed at Moro and unjustified recording of Stock of Moro Warehouse in the books of accounts of Jamshoro Warehouse amounting to Rs.1,147.21 million.

Audit recommends that the management needs to look into the matter and share the updated status of Moro Warehouse in terms of inventory and its operations with audit.

(Draft Para No.1256/2023-24)

3.13.11 Excess booking of Incidental Charges to Cost of Material - Rs.952.81 million

According to Notification No. CEx/CE(MP&M)/IC/DMIC/59/7868-88 dated June 27, 2008 “The provision of incidental charges on the material received During Thematic Audit of procurement and material management in NTDC warehouse, is hereby revised w.e.f. July 01, 2008 till further orders: (a) 24% of the Carriage and Freight (C&F) value on the imported material which is also manufactured in Pakistan. (b) 11.5% of the C&F value on the imported material which is not manufactured in Pakistan. (c) 02% of the Ex-Works value on the material purchased locally.”

According to International Accounting Standard (IAS) No. 02: Inventory cost should not include: [IAS 2.16 and 2.18] abnormal waste storage costs administrative overheads unrelated to production selling costs foreign exchange differences arising directly on the recent acquisition of inventories invoiced in a foreign currency interest cost when inventories are purchased with deferred settlement terms.

During thematic audit of procurement and material management in NTDC, it was observed that incidental charges amounting to Rs.952.81 million in two warehouses i.e. Multan and Jamshoro were excessively booked to the cost of material against six number contracts in violation of allowed percentages. The Jamshoro warehouse booked Rs.423.10 million excess cost against two no. of contract while Multan warehouse booked Rs.529.70 million against 04 no. contracts. This excess booking of incidental charges inflated the material cost to the extent of Rs.952.81 million which needs justification.

Non-adherence to authority’s instructions and IAS-02 resulted in excess booking of incidental charges amounting to Rs.952.81 million.

Audit recommends that management needs to investigate the matter for fixing responsibility upon the person(s) at fault and to make rectification in the books of accounts under report to audit.

(Draft Para No.1156/2023-24)

3.13.12 Undue favor to EPC contractors due to issuance of material on loan basis – Rs.851.05 million

According to General conditions of EPC Contract - Scope of facilities - the contractor’s obligations cover the provision of all Plant and the performance of all Installation Services required for the design, the manufacture (including

procurement, quality assurance, construction, installation, associated civil works, pre-commissioning and delivery) of the plant and the installation, completion, and commissioning of the Facilities in accordance with the plans, procedures, specifications, drawings and codes). Such specifications include, but are not limited to, the provision of supervision and engineering services; the supply of labor, material, equipment, spare parts and accessories, contractor's equipment, construction utilities and supplies, temporary materials, structures and facilities, transportation and storage

During thematic audit of procurement and material management in NTDC, it was witnessed that four (04) Engineering Procurement and Construction (EPC) / Turkey contracts i.e. ADB-201, ADB-301-A, SU-NT/2009-101, WB-05B-2020 were awarded. According to EPC Contract, responsibility for procurement of all material was on the EPC Contractor but NTDC management issued/supplied material to EPC Contractors on loan basis amounting to Rs.851.05 million which tantamount to undue favor to EPC contractors due to irregular issuance of material on loan basis. Moreover, recovery of rental charges or return of material from EPC Contractors were not forthcoming from the record available to audit. This very act refers to poor internal control of NTDC which may lead to misappropriation of material and loss to company.

Non-adherence to spirit of EPC contracts resulted in undue favor to EPC Contractors due to issuance of material on loan basis amounting to Rs.851.05 million up to the Financial Year 2022-23.

Audit recommends that the management needs to inquire the matter for fixing responsibility of irregular issuance of material on loan basis along with recovery/return of material besides ensuring non-issuance of material to EPC Contractors on loan basis in future under report to audit.

(Draft Para No.1149/2023-24)

3.13.13 Irregular retention of material for non-issuance of GRN and not taking the material on record of inventory– Rs.652 million

According to NTDC Warehouse Control and Procedure Manual notified vide letter dated December 31, 2019, clause 3.6, the Store Keeper will prepare three legible copies of goods received note. He will enter the description and quantity of the delivery and will append his full signature at the bottom of each GRN. He will also enter the Purchase Order Number, Inspection Certificate No: and details of the supplier. The Dy. Manager (warehouse) will check the GRN and if it is correct, he will then countersign the note himself.

During Thematic Audit of procurement and material management in NTDC Warehouse Jamshoro, it was witnessed on test check basis that tower material valuing Rs.652 million was received at Jamshoro Warehouse in three lots against Purchase Order No. TLM-12R-2021 on October 05, 2022, but it was astonishing that GRN for the said material has not been issued by Store Keeper/DM (Warehouse) nor Joint Survey Report has been conducted so far. Furthermore, the subject material was stored at sub-warehouse Jhampir in open space (on temporary arrangement) without any proper security because no staff is posted there. On enquiry, it was informed by the management that some material of the same PO (parts of tower material - tower leg extensions) was not received yet so that is why the GRN has not been issued. Despite being not available on the records of WIMS, material to the extent of Rs.37.79 million was allocated to Gawadar Turnkey project during September-October 2022. This very act renders to gross negligence on part of management of Warehouse and it may lead to misappropriation of material and loss to the company.

Non-adherence to NTDC Warehouse Control and Procedure Manual resulted in likely misappropriation of tower material for non-issuance of GRN against the received material in the warehouse and not taking on record of inventory (WIMS) – Rs.652 million

Audit recommends that the management needs to investigate the matter for non-issuance of GRN against the received material for the last ten months to fix the responsibility and to resolve the issue under intimation to audit.

(Draft Para No.1247/2023-24)

3.13.14 Loss due to demurrage and detention charges sustained by NTDC for delayed custom clearance – Rs.558 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During Thematic Audit of procurement and material management in NTDC, it was observed that an amount of Rs.558 million was paid on account of demurrage and detention charges for delayed custom clearance. This shows sheer negligence on the part of management of NTDC and resultantly company sustained a huge loss.

Non-adherence to authority’s instructions resulted in loss due to demurrage and detention charges sustained by NTDC for delayed custom clearance amounting to Rs.558 million up to the Financial Year 2022-23.

Audit recommends that the management needs to inquire the matter for fixing responsibility upon the person(s) at fault.

(Draft Para No.1160/2023-24)

3.13.15 Loss due to award of contract to 2nd lowest bidder caused by defective bid evaluation - Rs.530.043 million

According to Rule-5 (5) of Public Sector Companies Corporate Governance Rule 2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented within Public Sector Corporate to ensure compliance with the fundamental principles of probity and propriety: objectivity, integrity and honesty and relationship with stakeholders.” According to Rule 2 (h) of the Public Procurement Rules, 2004, “most advantageous bid” means,- (i) a bid or proposal for goods, works or services that after meeting the eligibility or qualification criteria, is found substantially responsive to the terms and conditions as set out in the bidding or request for proposals document; and (ii) evaluated as the highest ranked bid or proposal on the basis of cost or quality or qualification or any combination thereof, as specified in the bidding documents or request for proposal documents which shall be in conformity with the selection techniques to be issued by the Authority.

During Thematic Audit of procurement and material management in NTDC, it was observed that M/s SiChuan YiBin Global Group Co. Ltd. (SYGG) was declared as lowest responsive bidder with quoted price of

Rs.1,789.325 million against Tender No. NPP-04M(R)-2020 regarding Design, Manufacturing & Supply of complete hardware strings including Pre-RTV coated Disc. Insulators (porcelain or toughened glass) for 500 kV D/C Q/B T/Line for evacuation of power from K-2/ K-3 Nuclear Power Plants. However, the 2nd lowest bidder M/s Sediver SAS France went to NTDC Grievance Redressal Committee (GRC) against qualification of 1st lowest bidder. Resultantly, the GRC vide its report dated May, 2021, on the basis of Chief Engineer T/Line Design letter dated April 12, 2021 regarding non-conforming of authenticity of performance certificate of POWERGRID, India, declared the 1st lowest bidder non-responsive. However, in this regard, the response of 1st lowest bidder dated June 18, 2021 regarding provision of Performance Report from POWERGRID was not taken into account and contract amounting to Rs.2,319.368 million was awarded to 2nd lowest bidder M/s Sediver SAS France on July 01, 2021. Resultantly the public exchequer suffered loss of Rs.530.043 million due to award of contract to 2nd lowest bidder.

It is pertinent to mention that the procedure adopted for getting authenticity of performance certificate submitted earlier by 1st lowest bidder i.e. M/s SYGG with its bid was incorrect as authenticity of said certificate was sought from Corporate Office of POWERGRID, Dehli instead of issuing authority i.e. Regional Office of POWERGRID, Nagpur.

The said issue was also taken with NTDC by PPRA on July 15, 2021, however, outcomes in this regard was not made known to Audit. Further, the GRC report Tender against Tender NPP-04M (R)-2020 dated May, 2021 concluded with remarks that “irregularities in the bid evaluation process of have been observed.” However, neither the bidding process was annulled nor responsibility against irregularities in bid evaluation process was fixed upon delinquent (s).

Violation Public Sector Companies Corporate Governance Rule 2013 and PPRA Rules resulted in loss amounting to Rs.530.043 million due to award of contract to 2nd lowest bidder caused by defective bid evaluation up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility of loss.

(Draft Para No.1159/2023-24)

3.13.16 Loss due to non-award of contract during bid validity period – Rs.489.70 million

According to Rule-5(5) of Public Sector Companies Corporate Governance Rule 2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented within Public Sector Corporate to ensure compliance with the fundamental principles of probity and propriety: objectivity, integrity and honesty and relationship with stakeholders.”

During Thematic Audit of procurement and material management in NTDC, it was observed that Technical Bid Evaluation Report for bids against Tender-TLM-11-2021 for procurement of AAAC Greely Conductor for 500 kV Double Quad Bundle Transmission Line was opened on May 27, 2021, and approved by MD NTDC on October 05, 2021. The bid validity period of the subject tender was 150 days from bid opening. Since the bid validity period was near to expire, the two (02) technically responsive bidders i.e. M/s Henan Tong-Da Cable Co. Ltd. and M/s Jiangsu Zhongtian Technology Ltd. (ZTT) were asked for extension in bid validity period but both the bidders refused to extend the bid validity period. Resultantly the bidding process was annulled on December 08, 2021 and re-tendering for procurement of said material under Tender TLM-11R-2021 was floated and contract was awarded

to M/s Fast Cables having lowest evaluated landed cost of Rs.5,327.437 million. However, the landed cost of one of technically responsive bidder i.e. M/s Henan Tong-Da Cable Co. Ltd. in the previous tender TLM-11-2021 was Rs.4,837.737 million. (calculated from the 2% bid security of bidder i.e. CNY 2.300 million at conversion rate of Rs.24 as on 30.04.21). Resultantly loss to the tune of Rs.489.7 million was suffered to the company due to non-award of contract under TLM-November, 2021 during the bid validity period. It is pertinent to mention here that an inquiry committee to probe into reasons behind inordinate delay and subsequent scrapping of tendering process for procurement of AAAC Greely Conductor vide Tender No. TLM-09M-2019 and TLM-11-2021 was constituted on January 26, 2022. However, the outcomes of the said inquiry report were not forthcoming from the record.

Non-adherence to the provisions of the Public Sector Governance Rules resulted in loss of Rs.489.7 million due to non-award of contract during bid validity period up to the Financial Year 2022-23.

Audit recommends that management needs to investigate the matter for fixing responsibility of loss.

(Draft Para No.1157/2023-24)

3.13.17 Irregular retaining of 132 kV Tower Material lying at Jamshoro and Multan Warehouses being not under purview of NTDC Warehouse(s) – Rs.480.78 million

According to NTDC Warehouse Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2009, clause 1.2. National Transmission and Dispatch Company is responsible for the smooth and efficient operation of the Ware House, proper record keeping and to develop uniform inventory reporting system throughout the jurisdiction of the Company.

During Thematic Audit of procurement and material management in NTDC, it was witnessed on test check basis that 132 kV tower material valuing Rs.480.78 million was lying at NTDC Warehouses Jamshoro and Multan which is irregular because storage/retaining of 132 kV tower and transmission line material is not covered under jurisdiction of NTDC. This very act renders to blockage of funds and decreased storage space of Warehouse which requires justification in terms of stocking of 132 kV transmission line/tower material which has been retained without any utility for the company. The detail is as under:

Sr. No.	No. of Items (132 kV tower material)	Warehouse	Amount (Rs.)
1.	20	Jamshoro	103,095,368.43
2.	378	Multan	377,680,790.31
			480,776,158.74

Non-adherence to NTDC Warehouse Control and Procedure Manual resulted in irregular stocking of 132 kV Tower material lying at Jamshoro and Multan Warehouses being not falling under the purview of NTDC amounting to Rs.103.09 million

Audit recommends that the management needs to look into the matter besides expediting the disposal/issuance process of 132 kV tower and line material to save the funds of NTDC.

(Draft Para No.1255/2023-24)

3.13.18 Irregular issuance of material without receipt of Material Requisition Slips (MRS) and SS cheques – Rs.272.76 million

According to Warehouse Control and Procedure Manual (4) issue of Material “The store keeper will issue the materials listed on the requisition and will make entries on the relevant bin cards. According to International Accounting Standard (IAS) – 01, the financial statement should present fairly the financial position, financial performance and cash flows of the enterprise.

During thematic audit of procurement and material management in NTDC, it was witnessed from Gate Passes that multiple nature of material valuing Rs.272.76 million was issued to contractors without receipt of Material Requisition Slips (MRS) and SS Cheques for value of the material issued from the concerned formations of NTDC. This very act refers to poor internal control and may lead to misappropriation of material amounting to Rs.272.76 million.

Non-adherence to warehouse control and procedure manual resulted in irregular issuance of material without MRS Rs.272.76 million

Audit recommends that investigation may be made to fix responsibility upon the person(s) at fault for irregular issuance of material without MRS(s) – Rs.272.76 million under report to audit.

(Draft Para No.1151/2023-24)

3.13.19 Non-disposal of un-serviceable stock / material at NTDC warehouses - Rs.212.26 million

According to NTDC Warehouse Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2009, clause 308 (b) Value Ledger Keeper will prepare the Value Sheet for each item of the consignment and submit the same to the Accounts Officer who will check it with the Purchase Order and make necessary deductions (If applicable) and obtain the signature of Deputy Manager as a token of recheck by the In-charge Ware House. (c) The Warehouse manager will then carry out a physical inspection of the material brought to the Warehouse in order to assess its condition and value according to the policies laid down in the Disposal Procedure.

During Thematic Audit of procurement and material management in NTDC warehouses, it was observed that in 100 cases material of various types valuing Rs.212.26 procured against different purchase orders was lying at Jamshoro, Multan, Gatti & Kotlakhpat warehouses which was declared un-serviceable being not useful for the transmission system of the NTDC. This very act caused blockage of funds and rendered the decrease in the value of material kept in adverse environmental circumstances. Moreover, in 67 cases material of various types declared as un-serviceable was lying without having any

valuation for the period 2022-23. In absence of valuation of un-serviceable material, malafide disposal may be done and this very act will render the loss to the ex-chequer.

Non-adherence to disposal procedure of Warehouse Control and Procedure Manual resulted in non-determination of value of un-serviceable material and its disposal up to the Financial Year 2022-23.

Audit recommends that the management needs to inquire the matter and fix responsibility upon the person(s) at fault besides expediting the process of valuation and disposal of un-serviceable materials lying at NTDC Warehouse(s).

(Draft Para No.1253/2023-24)

3.13.20 Non-installation of Nitrogen Injection Explosion Prevention and Fire Protection System procured for shunt reactors and auto-transformer banks – Rs.140.00 million

According to Rule-5(5) of Public Sector Companies Corporate Governance Rule 2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented within Public Sector Corporate to ensure compliance with the fundamental principles of probity and propriety: objectivity, integrity and honesty and relationship with stakeholders.”

During thematic audit of procurement and material management in NTDC, it was observed that five (05) Nitrogen Injection Explosion Prevention and Fire Protection System valuing Rs.140.00 million (US\$ 700,000 @ Rs.200/US\$) were procured along with three (03) shunt reactors and two (02) auto transformer banks under Contract No. ADB-300D-2018 (Lot-I&II) for the protection of system. The procured shunt reactors and auto transformers banks were got installed at the grid stations. However, the corresponding Nitrogen Injection Explosion Prevention and Fire Protection System were not got installed and the same were lying at NTDC warehouse/ grid stations. Resultantly, the costly equipments were put into operation by compromising safety and protection of grid stations.

Violation of Corporate Governance Rules has resulted in non-installation of Nitrogen Injection Explosion Prevention and Fire Protection System procured for shunt reactors and auto-transformer banks valuing Rs.140.00 million up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility for insecure operation of shunt reactors and auto transformer banks besides expediting installation of Nitrogen Injection Explosion Prevention and Fire Protection System at the respective grid stations.

(Draft Para No. 1164/2023-24)

3.13.21 Irregular award of contract due to deficient bid evaluation – Rs.2,110.391 million

According to Rule-5 (5) of Public Sector Companies Corporate Governance Rule 2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented within Public Sector Corporate to ensure compliance with the fundamental principles of probity and propriety: objectivity, integrity and honesty and relationship with stakeholders.”

During Thematic Audit of procurement and material management in NTDC, it was observed that Contract TLM-10-2020 regarding Design, Manufacturing & Supply of complete insulator hardware assemblies including 160 kN disc insulators (Anti-fog type Porcelain or Glass) for 500 kV D/C Q/B T/Line from Thar Coal Block-I to Matiari Converter Station amounting Rs.2,110.391 million was awarded to M/s Sediver SAS France on November 10, 2021. The award of contract to the said contractor was not regular due to following deficiencies in the Bid Evaluation process:

1. M/s SiChuan YiBin Global Group Co. Ltd. (SYGG) was declared “non-responsive” as per Evaluation Report published on August 31, 2021 with remarks “Bidder determined to be non-responsive & rejected on account of submitting false information. Further the bidder was asked to clarify his position in this context but the bidder in its reply has failed to provide satisfactory response & authentic evidence till today. Audit observed that the said bidder provided verified copy of performance certificate from end user on June 24, 2021 but the same was not taken into consideration before determining non-responsiveness of the said bidder. Further, the procedure adopted for getting authenticity of performance certificate submitted earlier by said bidder with its bid was incorrect as authenticity of said certificate was sought from Corporate Office of POWERGRID, Dehli instead of issuing authority i.e. Regional Office of POWERGRID, Nagpur.
2. The grievance of one of the bidders i.e. M/s Shandong Ruitai Glass Insulator was not addressed on the plea that the same was received after lapse of permissible period of 15 days. Audit observed that Evaluation results against the said tender were published on PPRA website on September 02, 2021 whereas grievance from the said bidder was received on September 17, 2021. This depicted that the grievance was received within permissible period of 15 days from the date of announcement of Bid Evaluation Report on PPRA website. Further the grievance of M/s SiChuan YiBin Global Group Co. Ltd. (SYGG) regarding qualification of M/s Sediver SAS France was not properly addressed in the GRC Report dated September, 2021.
3. As per findings of Grievance Redressal Committee (GRC) Report against Tender No. 10-2020 dated September, 2021, some of the performance certificates provided by M/s Sediver SAS-France along its bid were without designation of signing authority, address, contract number, websites, contact information, stamps etc which was against the provisions of the Performance Criteria – Clause IB-3A(a) 4, Section-II of bidding documents. Moreover, some of the Contract Agreements provided by M/s Sediver SAS-France along its bid were either not English translated or not notarized which was against the Manufacturing Experience Criteria-IB-3A (a) 3 iii, Section-II of bidding documents.

It is pertinent to mention that the above irregularities in bid evaluation process have already been highlighted by GRC in its report dated May, 2021 against Tender No. NPP-04M (R)-2020 wherein it was recommended that management may look into issues seriously. However, no punitive/ corrected actions were taken by the management and the same irregularities were repeated in the instant tender TLM-10-2020.

Violation of Public Sector Companies Corporate Governance Rule 2013 resulted in Irregular award of contract amounting to Rs.2,110.391 million due to deficient bid evaluation up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility of irregular award of contract due to deficient bid evaluation.

(Draft Para No.1260/2023-24)

3.13.22 Non-finalization of inquiries/ disciplinary cases having financial impact - Rs.104.03 million

According to Rule-5(5) of Public Sector Companies (Corporate Governance) Rules-2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented at all levels within the Public Sector Company, to ensure compliance with the fundamental principles of probity and propriety; objectivity, integrity and honesty and relationship with the stakeholders”.

During Thematic Audit of procurement and material management in NTDC, it was witnessed on test check basis that twenty-three (23) inquiries/ disciplinary cases having financial impact of 104.03 million regarding shortage of material etc. and most of the cases were under investigation with NAB but not finalized despite lapse of considerable time period. This very act renders to poor internal control system and accountability mechanism.

Violation of provisions of Corporate Governance Rules-2013 resulted in non-finalization of inquiries/ disciplinary case having financial impact of 104.03 million up to the Financial Years 2022-23.

Audit recommends that management needs to improve internal controls by taking actions in line with approved mechanism/SoPs to finalize the inquiries / disciplinary cases.

(Draft Para No.1251/2023-24)

3.13.23 Loss due to non-forfeiture of bid securities of bidders involved in corrupt and fraudulent practices – Rs.98.00 million

According to clause-19.6 (d) of Section-II: Bidding Data and Appendices, “the bid securities of the bidder (s) found involved in corrupt and fraudulent practices shall be forfeited.” According to clause 1.1 of Section-IV, Part-I: General Conditions of Contract, “corrupt and fraudulent practices include *misrepresentation of facts* in order to influence a procurement process.”

During Thematic Audit of procurement and material management in NTDC, it was observed that the bids of M/s Shandong Ruitai Glass Insulators Co. Ltd. China, M/s Nanjing Electric Group Co. Ltd. China and M/s Sichuan Yibin Global Group Co. Ltd. (SYGG), China against Tender No. TLM-10-2020 were rejected during bid evaluation process due to submission of false/ materially inaccurate information. Since the act of misrepresentation of facts in order to influence a procurement process fall under the ambit of corrupt and fraudulent practices, the bid securities of these bidders amounting to Rs.98.00 million were required to be forfeited. But neither bid securities of the said bidders were forfeited nor the said bidders were blacklisted/ debarred.

Violation of provisions of bidding documents resulted in loss due to non-forfeiture of bid securities of the bidders involved in corrupt and fraudulent practices valuing Rs.98.00 up to the Financial Year 2022-23.

Audit recommends that the management needs to fix responsibility of loss for effecting recovery besides initiating process of blacklisting/ debarment of the bidder involved in corrupt and fraudulent practices.

3.13.24 Irregular receipt of material from the manufacturer not specified in the contract agreement – Rs.80.713 million

According to Schedule-H & J to Bid against Tender No. TLM-10-2020, M/s Mosdorfer GmbH, Austria was described and approved as sub-contractor for supply of Grounding Material and manufacturer's authorization in this regard was submitted by the bidder with its bid.

During Thematic Audit of procurement and material management in NTDC, it was observed that Contract No. TLM-10-2020 for procurement of insulator hardware assemblies including 160 kN Glass Disc Insulators for 500 kV D/C Q/B Transmission Line from thar Block-I to Matiari Converter Station for power evacuation from coal power plants was awarded to M/s SEDIVER SAS. In the said contract, M/s Mosdorfer was approved as sub-contractor/ manufacturer for supply of grounding material. But contrary to this, grounding material manufactured by another manufacturer i.e. M/s Kumwell, Thailand valuing Rs.80.713 million (equivalent to Euro 405,596 x Rs.199) was supplied which was against the provisions of the contract agreement.

Non-adherence to provisions of the contract agreement resulted in irregular receipt of material valuing Rs.80.713 million from the disapproved/ unspecified sub-contractor/ manufacturer up to the Financial Year 2022-23.

Audit recommends that the management needs to fix responsibility for irregular receipt of material from disapproved/ unspecified sub-contractor/ manufacturer.

3.13.25 Undue financial favor to contractor due to receipt of AAAC Greely Conductor winded on unspecified reels – Rs.73.144 million

According the Bidding Documents of Tender No. TLM-11(R)-2022, the bidder was required to offer AAAC Greely Conductor on reels as per the standard reel design given in the bidding documents having weight of 550 Kg / per reel.

During Thematic Audit of procurement and material management in NTDC Warehouse(s), it was observed that instead of supplying AAAC Greely Conductor on reels as per standard reel design given in Bidding Documents, the contractor M/s Fast Cables supplied 846 reels of conductor on the auctioned/ used reels. The said used empty reels were provided to the Contractor by NTDC at the auctioned rate of Rs.23,541/- per reel. On the other hand, as per the Bid Evaluation Report, the price bid of one of the bidders i.e. M/s ZZT China was loaded/ added with the cost of underweight steel @ Rs.200 kg. Accordingly, the cost of one empty reel as per standard reel design stated in the bidding documents was Rs.110,000 (550kg x Rs.200). Due to non-receipt of conductor on reels as per standard reel design given in bidding documents, undue financial favor to the extent of Rs.73.144 million $\{(110,000 - 23,541) \times 846 = 73,144,314\}$ was accorded to the contractor.

Violation of provisions of the bidding documents resulted in undue financial favor to the contractor amounting to Rs.73.144 million up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility for extending undue financial favor besides recovering amount in question from the contractor.

(Draft Para No.1165/2023-24)

3.13.26 Unjustified allocation of Material for 132 kV Temporary Substation – Rs.68.88 million

According to Rule-5(5) of Public Sector Companies (Corporate Governance) Rules-2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented at all levels within the Public Sector Company, to ensure compliance with the fundamental principles of probity and propriety, objectivity, integrity and honesty and relationship with the stakeholders”.

During thematic audit of procurement and material management in NTDC, it was observed that material was allocated for temporary arrangement regarding construction of 132 kV temporary substation (as interim arrangement) near Lucky Power Plant for feed-back supply to 660 MW Lucky Electric Power Company Limited (LEPCL) from exiting K-electric network for testing and commissioning purposes. NTDC made irregular expenditure outside the purview / mandate on temporary substation of 132 kV amounting to Rs.68.88 million which needs justification that why the original plan for construction of 132 kV substation was not executed and wasteful expenditure was incurred on temporary arrangements.

Non-adherence to corporate governance rules resulted in unjustified construction and allocation of material for 132 kV for temporary substation during the Financial Year 2022-23

Audit recommends that investigation may be made to fix responsibility upon the person(s) at fault for allocation of 132 kV material for temporary substation under report to audit.

(Draft Para No.1150/2023-24)

3.13.27 Irregular placement of electrical material belonging to Warehouse Jamshoro at DISCOs’ Warehouses – Rs.42.07 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During Thematic Audit of procurement and material management in NTDC Warehouse(s), it was witnessed on test check basis that electrical material valuing Rs.42.07 belonging to Jamshoro Warehouse of NTDC was lying at the warehouses of DISCOs (SEPCO and QESCO) without security and safe custody. The most of electrical material has turned out of design because it has been declared unserviceable, obsolete, broken, damaged, rusty and hardened in use. Due to negligence of the management, the material to the stated extent has not been utilized for the benefit of the company and eventually rendered useless. There are likely chances of misappropriation of electrical material which can cause a substantial loss to the company.

Ineffective material management resulted in massive loss and likely misappropriation of electrical material of NTDC Warehouse Jamshoro lying at SEPCO and QESCO Warehouses amounting to Rs.42.07 million up to the Financial Year 2022-23.

Audit recommends that the management needs to inquire the matter to fix responsibility upon the person(s) at fault besides ensuring the disposal of electrical materials lying at SEPCO & QESCO Warehouses under intimation to audit.

(Draft Para No.1254/2023-24)

3.13.28 Wasteful expenditure on rewinding of Conductor Reels having financial impact - Rs.40.11 million

According to NTDC Warehouse Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2019, (JD-4), Deputy Manager (Inventory Control) is responsible for the implementation and administration of policies, procedures and systems for the efficient operation of the warehouse.

During Thematic Audit of procurement and material management in NTDC warehouses Jamshoro & Multan, it was observed that a contract of ACSR Rail, Drake & AAC Greeley Conductors for rewinding of damaged Reels to healthy was awarded to M/s MN Enterprises at a price of Rs.40.11 million. The said conductor Reels were damaged while lying/stored in the premises of warehouses under neglected conditions due to mismanagement and improper handling of inventory of warehouses, which caused loss to the company to the stated extent. In this regard, no inquiry has been conducted to probe into the matter to ascertain the loss and fix responsibility.

Non-adherence to Warehouse Control and Procedure Manual resulted in wasteful expenditure on rewinding of Conductor Reels having financial impact of Rs.40.11 million up to the Financial Year 2022-23.

Audit recommends that the management needs to inquire the matter and fix responsibility upon the person(s) at fault besides implementation of Warehouse Control and Procedure Manual in letter and spirit under report to audit.

(Draft Para No.1257/2023-24)

3.13.29 Irregular release of balance payment and performance guarantee due to acceptance of material without pre-shipment inspection/ Factory Acceptance Tests – Rs.26.381 million

According to Chief Engineer (T/L Design) NTDC letter No. CED/ NTDC/ MTL/G-204 (Hardware)/ 844-46 dated February 28, 2018, material comprising of grounding sets, being procured against Purchase Order No. 820, was rejected during pre-shipment inspection/ FATs due to non-conformance to the requirement of project specifications and the contractor was directed to re-offer the material for inspection after necessary rectification/ make up.

During thematic audit of procurement and material management in NTDC, it was observed that contrary to the above, material comprising of grounding sets which was procured against Purchase Order-820 was delivered by the contractor at NTDC Warehouse Multan without pre-shipment inspection/ Factory Acceptance Tests. Later on, Chief Engineer (T/L Design) NTDC nominated inspectors for carrying out of post-delivery inspection/ FATs of the grounding sets in October, 2018. However, the contractor did not offer the said material for post-delivery

inspection uptill now. In the meantime, 10% balance payment and Performance Guarantee amounting US \$ 80,062 and US \$ 82,785/- (equivalent to Pk Rs.26.381 million @ 1 US\$ = Rs.162) respectively was released to the contractor during December, 2018 & May 2022. In the absence of post-delivery inspection/ FATs, the material should not have been declared as “accepted” and hence, payment/ release of 10% balance payment/ performance guarantee was irregular and tantamount undue contractual favor to the contractor.

The acceptance of material without inspection/ Factory Acceptance Tests resulted in irregular release of balance payment and performance guarantee amounting to Rs.26.381 million.

Audit recommends that the management needs to investigate the matter for fixing responsibility of irregular release of balance payment & performance guarantee to contractor besides carrying out the post delivered inspection/ FATs of material.

(Draft Para No.1212/2023-24)

3.13.30 Substantial loss owing to dumping of surplus Tower material at sub-warehouse Rahim Yar Khan without receipt of MRN - RMB 24.532 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During Thematic Audit of procurement and material management in NTDC, it was witnessed on test check basis that left over/surplus healthy tower material from Contract No. ADB-65(R)-2012, ADB Loan 2846-PAK (Package-I) Lot-1 M/s CNEEC, valuing 24.532 million (RMB) was lying at Sub-warehouse Rahim Yar Khan without receipt of MRN and taking it on records of WIMS. The subject tower material has been dumped unstacked which is lying in the mud grounds and without observing mandatory codal formalities of Warehouse Manual. The material reconciliation report has been finalized by the stakeholders on 27.01.2020 but the returned material by the EPC contractor has not been accounted for yet. Moreover, the return of such a huge quantity of surplus/left over material from the completed EPC Contract transpires that the survey, design and estimates were not prepared as per actual requirements of the project. This very act can lead to misappropriation of material to the stated extent due to ineffective material management and not taking it on the inventory management system of NTDC which may cause massive loss to company and further deterioration and decrease in salvage value of tower material.

Ineffective material management resulted in substantial likely loss owing to dumping of surplus Tower material at Sub-warehouse Rahim Yar Khan without receipt of MRN amounting to 24.532 million (RMB).

Audit recommends that the management needs to inquire the matter for fixing responsibility and expediting the disposal/allocation of returned material lying at RYK sub-warehouse in the best interest of company.

(Draft Para No.1221/2023-24)

3.13.31 Misappropriation of material due to less return of left-over material from Balloki Power House Transmission line to warehouse - Rs.13.856 million

According to Para-6 of NTDC Warehouse and Procedure Manual, at the completion of project or a specific work, the surplus material may be returned to a warehouse as “serviceable material”.

During thematic audit of procurement and material management in NTDC, it was observed that surplus material from Balloki Power House Transmission Line under Contract No. GPP-02-2015 valuing Rs.13.856 million was less returned to the NTDC Multan Warehouse. The quantities of material returned as per the Material Return Note (MRN) issued by the Warehouse Multan was less than that stated in MRN duly approved by the concerned Executive Engineer EHV.

Violation of NTDC Warehouse and Procedure Manual resulted in likely misappropriation of less returned surplus material up to Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility for less return of surplus material to warehouse.

(Draft Para No.1252/2023-24)

3.13.32 Loss due to damage of Grid Station & Transmission line Material –Rs.10.39 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During Thematic Audit of procurement and material management in NTDC, it was witnessed on test check basis that different types of Grid Station & Transmission line material valuing Rs.10.39 million lying at NTDC Warehouse(s) was damaged. However, any inquiry/disciplinary action against concerned persons/quarters was not forthcoming from the record available to audit. This very act renders to poor internal control system and accountability mechanism.

Ineffective material management resulted in loss due to damage of Grid Station & Transmission line Material lying at NTC Warehouse(s) - Rs.10.39 million up to the Financial Year 2022-23.

Audit recommends that the management needs to look into the matter for fixing responsibility upon the person(s) at fault to make the loss good.

(Draft Para No.1148/2023-24)

3.13.33 Potential risk of misappropriation due to non-accountal of returned balance material from ADB financed EPC Project at Warehouse Multan – 8.784 million (RMB)

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to Fraud, Theft or Negligence of Individuals, 1982 (amended up to June 01, 2001), “all losses whether of public money or

of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During Thematic Audit of procurement and material management in NTDC, Warehouse(s), it was witnessed that the Asian Development Bank (ADB) financed EPC contract No. ADB-65(R)-2012 for Procurement of Plant, Design, Supply, Installation, Testing and Commissioning of 500 kV Transmission Line 3rd Circuit (Lot-II: Dadu to Goth Qazi Mahar) M/s TBEA CO. was completed and accordingly the contractor had returned the surplus balance material to the Warehouse Multan on September 16, 2021. In this regard, the MRNs for the balance/left over material from the completed project duly signed and forwarded by the Addl: Chief Engineer EHV-II Construction Project Multan were available in the office Deputy Manager Warehouse NTDC Multan. However, the material is lying dumped outside the boundary wall of warehouse in unsafe conditions and has not been taken on the record of Warehouse Multan and WIMS yet, therefore, resultantly it cannot be further allocated to any other project. Despite lapse of two years, the fate of returned healthy balance material to the stated extent has not been finalized yet by the management of Warehouse Multan which can lead to misappropriation of material and loss to the company.

Ineffective material management resulted in potential risk of misappropriation due to non-accountal of returned balance material from ADB financed EPC Project at Warehouse Multan – 8.784 million (RMB).

Audit recommends that the management needs to inquire the matter for fixing the responsibility and expediting utilization/disposal of balance/left over material under intimation to audit.

(Draft Para No. 1238/2023-24)

3.13.34 Non-recovery of cost of already completed and accepted type tests – Rs.8.525 million

According to provisions of Notification of Award Tender No. NPP-04 M (R)-2020, the cost of any type test, if already completed and accepted by Chief Engineer (T/L Design) NTDC, shall be deducted/ adjusted”

During Thematic Audit of procurement and material management in NTDC, it was observed that Notification of Award (NOA) against Tender No. NPP-04M(R)-2020 regarding Design, Manufacturing & Supply of complete hardware strings including Pre-RTV coated Disc. Insulators (porcelain or toughened glass) for 500 kV Double Circuit Quad Bundle Transmission Line for evacuation of power from K-2/ K-3 Nuclear Power Plants was issued to M/s Sediver SAS, France on June 09, 2023. In the light of provision of NOA, the cost of any type test, if already completed and accepted by Chief Engineer (T/L Design), shall be deducted/ adjusted. In this regard type test reports submitted by the contractor against hardware fittings, provided by M/s Mosdorfer GmbH, were already completed before award of the said contract. Hence cost of type testing amounting to Rs.8.525 million (Euro 38,750 x Rs.220) was required to be deducted/ adjusted from the contractor but same was not done.

Non-adherence to the provisions of the Notification of Award resulted in non-recovery of cost of already completed and accepted type tests valuing Rs.8.525 million from the contractor up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility of non-recovery besides effecting recovery of the same from the contractor.

(Draft Para No. 1217/2023-24)

3.13.35 Loss due to procurement of un-healthy 160 KN Disc Insulators – Rs.7.172 million

According to Rule-5(5) of Public Sector Companies Corporate Governance Rule 2013, “the Board shall establish a system of sound internal control, which shall be effectively implemented within Public Sector Corporate to ensure compliance with the fundamental principles of probity and propriety: objectivity, integrity and honesty and relationship with stakeholders.”

During thematic audit of procurement and material management in NTDC, it was observed that 3,176 160 KN Disc Insulators were allocated from P.O ADB-79-2015 (VI) to civil work contractor M/s NPCC against works to be carried out under Contract No. ADB-108-2017. Later on, the said disc insulators were declared as “unhealthy” and subsequently, the insulators from another purchase order were re-allocated to the contractor on December 13, 2019 with directions to return unhealthy disc insulator to Warehouse Multan. The exact quantity of the said unhealthy disc insulators valuing Rs.7.172 million were still lying in closing balance inventory at Warehouse Multan and were not issued since November, 2019. However, neither the reasons for un-healthiness of the disc insulators were determined nor the loss was made good from the concerned quarters.

Violation of Corporate Governance Rules has resulted in loss of Rs.7.172 million due to procurement of un-healthy 160 KN Disc Insulators up to the Financial Year 2022-23.

Audit recommends that the management needs to investigate the matter for fixing responsibility upon the delinquent (s).

(Draft Para No.1163/2023-24)

3.13.36 Non-supply of short transformer oil by contractor – Rs.5.405 million

According to Clause-24.2 of Particular Conditions of Contract NOR-70R2-2019, “Should a loss be sustained the supplier shall replace or repair any loss or damage and complete the supplies of Goods in accordance with the Contract as soon as possible after such loss or damage without waiting for the settlement of the insurance claim.”

During thematic audit of procurement and material management, it was observed that shortage of 14,530 liters transformer oil in two (02) 220/132 kV auto transformer banks procured under Contract no. NOR-70R2-2019 was pointed out during Joint Insurance Survey. Although, the insurance claim for shortage of oil due to damage of oil tank was lodged with the insurance company but, in the light of contractual provisions, the short oil valuing Rs. $\{(14530 \times 9.30 \text{ CNY} = 135,129 \text{ CNY} \times \text{Rs.}40 = \text{Rs.}5,405,160/- (1 \text{ YEN}=40 \text{ Pk Rs})\}$ has not been supplied by the contractor so far.

Violation of contractual provisions has resulted in non-supply of short transformer oil by the contractor valuing Rs.5.405 million up to Financial Year 2022-23.

Audit recommends the management needs to investigate the matter for violation of contractual provisions besides ensuring supply of short transformer oil by the contractor.

3.13.37 Irregular award of contract to ineligible/ debarred contractor – CNY 12.986 million

According to Clause-2.1.3 of NTDC’s SOP for blacklisting of contractors dated July 25, 2017, “if it is established that the firms is involved in any kind of corruption or corrupt practices anywhere in the world, the said firm would be taken into consideration for debarment/ blacklisting by NTDC.” According to Clause-4.4 of Section-1: Instructions to Bidders of bidding document for ADB-110-2021, “a firm shall not be eligible to participate in any procurement activities under ADB-financed, -administered, or -supported project while under temporary suspension or debarment by ADB Anticorruption Polity, whether such debarment was directly imposed by ADB, or enforced by ADB pursuant to the Agreement for Mutual Enforcement of Debarment Decisions. A bid from temporary suspended or debarred firm will be rejected.”

During Thematic Audit of procurement and material management in NTDC, it was observed that invitation to Bids against tender No. ADB-110-2021 (Lot-I) for supply of 550 kV, 245 kV & 145 kV Current Transformer & 245 kV Coupling Capacitor Voltage Transformer was called on May 26, 2021 and Notification of Award valuing CNY 12.986 million was issued to M/s Sieyuan Electric Co. Ltd. China on December 21, 2021. The said supplier was debarred by African Development Fund on June 16, 2020 for a period of twelve (12) months due to fraudulent practices in a tender in Rwanda. In the light of Agreement for Mutual Enforcement of Debarment Decisions and NTDC’s SOP for blacklisting, the said supplier was also ineligible for participation in ADB financed projects upto June 16, 2021. Audit holds that the contractor was ineligible for availing any invitation to bid /bidding opportunities notified by procuring agency within the debarred period. Since the bids for the said tender was invited on May 26, 2021 i.e before expiry of debarment period, the said bidder was not entitled to participate in the bidding process of said tender. But contrary to this, contract valuing CNY 12.986 million was awarded to the said bidder.

Non-adherence to the provision of bidding documents/ NTDC’s SOP for blacklisting of contractors resulted in irregular award of contract valuing 12.986 CNY to a debarred contractor up to the Financial Year 2022-23

Audit recommends that the management needs to investigate the matter for fixing responsibility of irregular award of contract to a debarred contractor.

3.13.38 Insufficient security measures and poor physical conditions at NTDC warehouses

According to NTDC Warehouse Control and Procedure Manual notified vide letter No. 6612-24 dated December 31, 2019, clause 2.1.3, effective security arrangements will be established to protect and safeguard materials against pilferage and theft, effective arrangement are: a) trained security guards on duty 24 hours per day. b) A perimeter walls or wire fence at least eight (8) feet high with three (3) strands of barbed wire on top. c) Minimum system of gate passes to control entrance and exit of personnel, vehicles and materials. d) Proper system of perimeter security lights for night security. e) Secured doors and windows in all buildings. f) Removal of trees and brush from all wall or fence areas.

During Thematic Audit of Procurement and Material Management in NTDC Warehouses Jamshoro and Multan, it was witnessed on test check basis that theft of control cable was reported by security sergeant, Jamshoro Warehouse because most of the electrical material was lying outside the boundary wall of Warehouse. Neither FIR report of this theft nor any action/inquiry thereon was found from the record available to audit. The security measures were not sufficient due to the inadequacy of necessary protective measures i.e. deficient security staff, non-installation of CCTV cameras and procurement of walkie-talkie etc. to safeguard its electrical material from theft, damage, unauthorized access, or other potential risks in future. Moreover, there was dry grass everywhere in grounds of warehouses where material was placed which may lead to any fire incident, and loss to the company. The ground area was uneven, muddy and open to sky. The material lying on the ground is at higher risk of deterioration and theft. Management is required to beef up security measures in conformity with provisions of Warehouse Control and Procedure Manual.

Owing to insufficient security arrangements and placement of material in poor physical condition cause theft of electrical material up to the Financial Year 2022-23.

Audit recommends that the management needs to look into the matter besides fixing responsibility upon the person(s) at fault and ensuring security measures in conformity with arrangements enlisted in Warehouse Control and Procedure Manual for the protection of electrical material worth billions of rupees from any such incident in future.

(Draft Para Nos. 1239 & 1249/2023-24)

3.14 Departmental Responses

3.14.1 Response to Audit Observation 3.13.1

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that, NTDC primarily procured materials for large projects while a small portion covers operational needs. Consequently, stock levels were kept adequate, including mandatory spares. As per procedure, Chief Engineer (MP&M) approved year-end stock reserves. The reply was not tenable as the material in both warehouses i.e., Jamshoro and Multan was lying unused for the last 40 years.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to provide policy of NTDC for inventory management and documentary evidence regarding aging of material along with approval of Procurement Plan.

3.14.2 Response to audit observation 3.13.2

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that, NTDC maintained substantial inventory for its vast transmission network due to long procurement times for critical equipment. This could lead to expired warranties, but was necessary to ensure network stability and quick response to emergencies. No documentary evidences in support of reply were furnished till finalization of audit report.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.3 Response to audit observation 3.13.3

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that in order to address incidental charges, a committee formed by NTDC's MD recommended real-time recording and the same would be implemented after approval of the Board's Audit Committee. The reply was not justified that the real-time recording of incidental charges not depicting the true picture of organization financials.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to share inquiry report alongwith agenda item with audit within 30 days.

3.14.4 Response to audit observation 3.13.4

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that material tenders include buffers (10%) and were based on inflated line lengths from project proposals (PC-1s). The high inventory levels due to long overseas procurement times accounted for these buffers. Existing inventory, like insulators at Jamshoro, would be used for upcoming lines to avoid redundant procurement. The reply was not tenable as no documentary evidences in support of reply were produced.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.5 Response to audit observation 3.13.5

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that as per provision of the contract, 24 months warranty was required and the same was provided by the contractor. However, the contractor had been advised to provide extended warranty of 5 years (60 months). As soon as it received the same would be provided to audit. The reply was not tenable as no expeditious efforts of the management were found on record.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.6 Response to audit observation 3.13.6

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that NTDC generally followed project-based procurement. Since most of the equipment/ material was imported from abroad so there were many issues involved in the award and execution processes, which might lead to variation in timelines of material delivery. The reply was not tenable as the proper planning was not made for the procurement of such material.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.7 Response to audit observation 3.13.7

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that, recently the Stock taking/verification team had performed 100% Stock verification for the period ending June, 2023 at NTDC warehouses. The stock verification team had not claimed any dumped and untraced material at warehouses. The reply was not tenable as the stock verification reports showed clear remarks as the material was unstacked, uncountable, dumped, under FIA, NAB inquiry etc.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.8 Response to audit observation 3.13.8

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that material valuing Rs.1.95 million had been allocated to different formations in order to attend emergency situations for rehabilitation of collapsed material. The remaining material amounting to Rs.14.84 million was lying at warehouse Multan and ready for allocation as per requirement of T/L. The reply was not tenable as the material in both warehouses remained unallocated since 40 years.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance verified from audit with documentary evidence within 30 days.

3.14.9 Response to audit observation 3.13.9

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that as per previous practice the material was procured in EPC/Turnkey projects on the basis of tentative length of T/Line as mentioned in PC-I of projects. The balance /surplus material of said T/Line projects had been earmarked for upcoming T/Line projects and was also being allocated on day-to-day basis for O&M activities & ongoing T/Line construction projects. The reply was not tenable as no documentary evidences were furnished to audit in support of management stance.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.10 Response to audit observation 3.13.10

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that material was stored temporarily at new Moro warehouse due to overloading of Jamshoro warehouse. Officer and security deployed onsite and approval of remaining staff was

awaited for approval from BoD. The reply was not tenable as the scattered placement of material made shortage of space in Jamshoro warehouse.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to expedite the matter.

3.14.11 Response to audit observation 3.13.11

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that incidental charges were initially estimated and added to material value (as per 2008 policy). Actual charges were recorded later on when documents arrived. A committee formed by MD NTDC recommended real-time recording, which would be implemented after approval of the Board's Audit Committee. The reply was not tenable as the real-time recording of incidental charges did not depict the real picture of financial position of the organization.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to share inquiry report alongwith agenda item with audit within 30 days.

3.14.12 Response to audit observation 3.13.12

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that in order to fast-track Iran-Gwadar power line construction as per PM's directive, NTDC had provided material to the contractor on loan basis from existing inventory. The contractor was procuring additional material and the cost of said material would be recovered from the contractor. The reply was not tenable as there was no clear instructions for provision of material to contractor on loan basis

The DAC in its meeting held on December 18 & 19, 2023 directed the management to share Prime Minister's directives with audit and justify the issuance of material on loan basis.

3.14.13 Response to audit observation 3.13.13

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that the material arrived in 3 batches, but joint survey was delayed. Meanwhile, Design NTDC had allocated some towers to EHV Hyderabad for urgent Gwadar project after proper formalities. The reply was not tenable as the joint survey report was part and parcel for material management in the warehouse.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.14 Response to audit observation 3.13.14

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that recent shipments incurred significant demurrage and detention charges due to a series of hurdles i.e. delays in document submission, temporary funding shortfalls, complex customs arrangements for reduced duty benefits and limited port free time all contributed. These unfortunate

obstacles ultimately led to the unwanted additional costs. The reply was not tenable as imposition of demurrage and detention charges depicted poor performance of management in clearance of imported material.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.15 Response to audit observation 3.13.15

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that SYGG, the lowest bidder, was disqualified for submitting a fake certificate, violating clause 35.1 of the bidding documents. Their later attempt to provide a different certificate didn't change their non-responsive status. The case was currently under investigation by FIA Lahore (Inquiry No. 70/2023). Audit contends that expeditious efforts be made to pursue the case with FIA.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to pursue the case with FIA.

3.14.16 Response to audit observation 3.13.16

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that tenders TLM-09M and TLM-11 were floated, evaluated & processed during COVID-19 pandemic which was the reason for delay in contract award and refusal of bidders to extend bid validities owing to price volatility & market uncertainty during the pandemic, which led to scrapping of these tenders. The reply was not tenable as the NTDC hadn't achieved milestones for effective procurement.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and share inquiry report with audit.

3.14.17 Response to audit observation 3.13.17

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that Chief Engineer MP&M NTDC had taken up the matter with Managing Director PPMC for utilization of the 132 kV Tower Material related to DISCOs system and lying in NTDC Warehouses from the time of unified WAPDA, . The reply was not tenable as no expeditious efforts were found on record.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.18 Response to audit observation 3.13.18

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that in order to attend the emergency situations at site, material was issued to different field formations. Material was issued on emergency gate passes to save the process time of codal formalities at that moment. The supporting documents such as MRS, SS cheque and revised allocation from O/o

Chief Engineer (T/L) Design and an amount Rs.47.49 million had been received and properly booked in record. The reply was not tenable as no documentary evidences in support of reply were furnished.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.19 Response to audit observation 3.13.19

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that the bidders for disposable material lying at Kot Lakhpat & Jamshoro had failed to submit required payment even after extensions. Resultantly bid securities were forfeited and contracts were cancelled. At present, the bidder had filed a court petition, which was under process. Meanwhile, surveys for material lying at Gatti & Multan warehouse were done.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.20 Response to audit observation 3.13.20

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that recent delivery of NIEP & FPS (December 06, 2023 & December 08, 2023) for addressing DISCO system issues prompted NTDC to request C.E.(PD/GSC) North & South to expedite their installation at designated sites. The reply was not tenable as no documentary evidences were found on record to support the management stance.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.21 Response to audit observation 3.13.21

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that Bidder SYGG was disqualified for submitting a fake certificate, violating the bidding documents (clause 35.1). Their later attempt to provide a different certificate didn't change their non-responsive status. The original certificate, bearing the name and signature of Mr. Patanjali Sharma was verified as fake directly from POWERGRID India, confirming the validity of the decision. The reply was not tenable as no documentary evidences were found on record to support the management stance.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.22 Response to audit observation 3.13.22

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that efforts were being made to improve internal controls by taking actions in line with approved mechanism / SoPs in order to finalize the inquiries / disciplinary cases expeditiously. The reply was not tenable as the cases for finalization of inquiries had been lying for awaiting decisions since long.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.23 Response to audit observation 3.13.23

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that same observations were taken previously and DP-954/2020-21 had already been framed. The reply was not agreed to as the said Draft Para did not relate with the instant audit observation.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.24 Response to audit observation 3.13.24

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that the bid submitted by M/s. Sediver SAS France included material from manufacturers/sub-contractors which was evaluated accordingly and consequently, the contract was awarded. The reply was not tenable as no documentary evidences were furnished to audit in support of management reply.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.25 Response to audit observation 3.13.25

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that supplier's 10% balance payment was withheld and Performance Guarantee was also valid up to June 06, 2025. After consulting with CE (T/L Design), the amount would be deducted from future invoices of the contractor.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.26 Response to audit observation 3.13.26

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that LEPCL construction began in 2020, but connecting facilities were delayed due to missing permits. To expedite things, NTDC built a temporary 132kV grid station using materials from another temporary substation under PPRA Rule 42(d)(iii) approval. The reply was not tenable as no documentary evidences for delay were furnished to audit.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.27 Response to audit observation 3.13.27

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that due to lack of space and to avoid transportation cost, the material was not shifted and the material related to NTDC system was being used on need basis. However, currently major portion comprised 66 kV / 33 kV / 11 kV material had been offered to DISCOs on cash payment basis.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to expedite the matter.

3.14.28 Response to audit observation 3.13.28

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that unused spare conductor reels from past contracts risked deterioration. To prevent this and contribute to crucial projects, they were rewound and deployed in critical national projects like Gwadar-Iran and Thar-Matiari lines, ensuring timely completion. Audit held that the NTDC planning was very poor in the matter.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.29 Response to audit observation 3.13.29

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that detailed response would be submitted after consultation with field formations. However, cost of 6 sets had already been recovered from supplier and amount of remaining grounding set, if required, would be recovered from any ongoing contracts. The reply was not tenable as the recovery from the contractor has not been made.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to submit revised reply to audit within 30 days.

3.14.30 Response to audit observation 3.13.30

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that material nearly worth Rs.40 million was lying at NTDC's Rahim Yar Khan sub-warehouse. EHV-II Hyderabad was actively reconciling the record of material, including physical counting and handing over procedures and WIMS system would be updated accordingly.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.31 Response to audit observation 3.13.31

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that all payments in lieu of less return of material had been deducted. The reply was not tenable as no documentary were furnished to audit.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.32 Response to audit observation 3.13.32

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that detailed reply would be furnished in due course of time.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to submit detailed reply to audit within 30 days.

3.14.33 Response to audit observation 3.13.33

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that material was properly stacked and placed within the defined boundary. Physical counting of material had been completed with contractor's representative. When the queries would be resolved and all the codal formalities i.e. physical counting of remaining material, formal handing/taking over of material and MRN from concerned formations fulfilled, the material would be recorded on WIMS. The reply was not tenable as no expeditious efforts were found on record in support of management reply.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.34 Response to audit observation 3.13.34

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that performance guarantee of the contractor was valid up to August-2024. The cost of type test not done would be deducted from the PG of the manufacturer in consultation with the CE TL design and record would be provided to the audit for verification.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.35 Response to audit observation 3.13.35

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that the committee constituted for amicable settlement with the contractor had asked for extended warranties and additional quantities of the insulators to cater for any mishap/breakage of insulators supplied under the said contracts. The reply was not tenable as no documentary evidences were produced to audit.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.36 Response to audit observation 3.13.36

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that the matter had been taken up with the insurance company and a number of meetings were carried out. Since the shortage likely happened during transit, hence the claim against loss was to be paid by the Insurance Company i.e. NICL. Furthermore, NTDC had also recovered an amount of Rs.2.4 million from the contractor against shortage of T/F Oil.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to get the stance with documentary evidence verified from audit within 30 days.

3.14.37 Response to audit observation 3.13.37

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that the bids for the subject tender were opened after the finishing date of debarment period (i-e June 16, 2021) of M/s Sieyuan, china. Moreover, after getting approval/no objection letter from ADB, NTDC issued Notification of Award (NOA) to M/s Sieyuan, China. There were no irregularities during award of contract to the responsive lowest bidder. The reply was not tenable as no documentary evidences were found on record.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.14.38 Response to audit observation 3.13.38

The matter was taken up with the management of NTDC in September, 2023 and reported to the Ministry in December, 2023. The management replied that at Multan warehouse all the possible precautionary measures had been taken collectively by all stakeholders to safeguard the NTDC Installations. The security staff at warehouses comply with same SoPs as defined by the management for the safety/security of NTDC installations. Audit contended that pictorial evidences depicted poor physical condition in the NTDC warehouse.

The DAC in its meeting held on December 18 & 19, 2023 directed the management to inquire the matter and submit report to audit within 30 days.

3.15 Recommendations

In view of audit findings and physical visit of 02 Warehouses of NTDC (Jamshoro & Multan), the following measures / suggestions are recommended for the management of NTDC to improve its procurement processes, inventory management and internal control lapses:-

- Purchases may be made in competitive manner through proper evaluation of bids by adhering to Public Procurement Rules and bidding clauses.
- Performance guarantee needs to be forfeited timely in case of default on the part of suppliers.

- The material needs to be properly inspected to ensure its receipt in accordance with the standard specifications without any alteration in joint inspection clause.
- Un-necessary procurement and retention of material over & above the Reserve Stock Limit needs to be avoided and procurement be made within the same year for which it was planned.
- Type tests of the material need to be ensured as per bidding documents / P.O. clauses and not to be waived off in lieu of extended warrantee.
- Asset management measures need to be beefed up in order to reduce the frequent instances of damage of electrical equipment and incidents of breakdown.
- The management is required to ensure judicious utilization of World Bank/ADB loans and working capital for procurement of material, through proper cost estimation/analysis.
- Economy, efficiency and transparency needs to be ensured in the inventory management system to maximize the benefit by allocating minimum financial and human resources besides taking appropriate action for any lapses in the matter.
- Ensure to follow timelines of tendering process in order to avoid cost/time overrun.
- NTDC management needs to strengthen its internal controls in an economic, efficient and effective manner to achieve the objectives by implementing Warehouse Control and Procedure Manual in letter and spirit for smooth running of the Company.
- Devise an effective procurement plan to avoid superfluous procurement and blockage of funds.
- Devise an effective inventory utilization plan /viable strategy to increase proper utilization and to reduce losses due to piling up of inventory and its obsolescence/deterioration. Moreover, expedite disposal of unserviceable material to avoid further deterioration and decrease in salvage value of material and the disposal/issuance process of 132 kV tower and line material as well as utilization/disposal of balance/left over material returned from completed projects.
- Ensure to complete implementation of procurement plan against which procurement was made.
- Upgrade WIMS in the most efficient and cost-effective way and individual item wise categorization showing detail of opening/closing balances etc in order to rationalize the discrepancies.
- Enhance the proper security and stacking system of designated warehouses of NTDC so that temporary arrangement of material at sub-warehouses (Moro and RYK) under unsafe/un-protected conditions could be avoided in order to save the funds of the company. Moreover, ensure security measures in conformity with arrangements enlisted in Warehouse Control and Procedure Manual for the protection of electrical material worth billions of rupees from any incident in future.
- Devise pre-defined criteria to ascertain the reserve stock limit in stores in order to avoid overstocking of material.

- Expedite the process of disposal of off-road vehicles and ensure availability of specific vehicles and equipment for efficient handling of material to avoid damages and unstacking.
- Investigate and fix responsibility in terms of;
 - a) Demurrage and detention charges for delayed custom clearance and loss sustained by NTDC.
 - b) Non-issuance of GRN or not taking inventory on record of WIMS
 - c) Issuance of material to EPC Contractor on loan basis
 - d) Damage of electrical material lying at warehouses of NTDC
 - e) Non-disposal of un-serviceable/dumped material
 - f) Theft of material from warehouses
 - g) Non-return of surplus/left over material from completed projects

3.16 Conclusion

In the light of above narrated facts, it is concluded that:

- A transparent and efficient procurement and Inventory Management System is a pre-requisite for effective and efficient operations & service delivery. At present, there are procedural lapses in the procurement & inventory management procedures and maintenance of warehouses. Violations of PPRA provisions and NTDC Warehouse Control & Procedural Manual have also been highlighted in the report. Hence, strong adherence to procurement procedures, NTDC warehouse control and procedural manual & regulations along with an IT based Integrated Inventory Management System is required in order to ensure transparency and improvement in operational capacity of NTDC.
- NTDC, being a custodian of the nation's electricity transmission and distribution network, undertakes a spectrum of procurement contracts. These substantial contracts are being awarded without due diligence, procurement plan, assessing the factual position of material, resultantly NTDC is facing challenges with overstocking and unhealthy procurement of material.
- Information system/ Warehouse Inventory Management Control (WIMS), functional in NTDC, is not effective because procurement is not being planned by using this control system which resulted in wasted resources, significant financial losses through overspending, missed savings opportunities, procurement of unhealthy material.
- NTDC compromises the spirit of project based procurement, eventually it contributes to piling up of material in warehouses of NTDC. Moreover, overstocking also led to blockage of funds by investing in huge quantity of same type of material without further utilization which indicates that the same was purchased beyond the requirement and it unsubstantiates the project based purchase.
- There are severe chances of mis-appropriation of material as the material was being issued to contractors without getting Material Requisition Slip (MRS) from concerned formations and

sometime material was issued to contractor without taking on the record of WIMS or issuance of Goods Receipt Note (GRNs) against the material received in warehouses which may cause huge loss to the company.

- Owing to poor internal control, returned healthy surplus/balance material from EPC projects were not taken on record of WIMS. Resultantly, most of the returned healthy material of completed projects is lying dumped in unsafe conditions which may lead to misappropriations.
- Due to poor management of NTDC, material lying at sub-warehouses/DISCOs have become out of design because it has been declared/found unserviceable, obsolete, broken, damaged, rusty and hardened in use and non-compliance with essence of prudent transactions of material and maintenance of inventory records resulted in potential risk of misappropriation due to non accountal of issued/returned material on WIMS, resultantly it could not be further allocated to any other project yet.
- Ineffective management of material issued on rental basis resulted in non-recovery of rental charges and non-return of equipment from contractors which may cause misappropriation of material and loss to the company.
- Due to slack management of NTDC, the presence of material (conductor reels, tower and line material) lying outside the boundary walls of the warehouse represent a significant security breach and likely potential loss to the company.
- Non-upgrading of WIMS resulted in non-provision of complete and comprehensive analysis of data for effective decision making in future. The WIMS does not reflect the material issued on Loan basis to different entities other than NTDC because “Allocation on loan basis” Module is not developed yet.
- Security measures in warehouses of NTDC are not in line with arrangements enlisted in Warehouse Control and Procedure Manual to ensure protection of electrical material worth billions of rupees.

CHAPTER-4

IMPACT AUDIT ON NET-METERING INITIATIVE IN LESCO AND IESCO

4. IMPACT AUDIT ON NET-METERING INITIATIVE IN LESCO AND IESCO

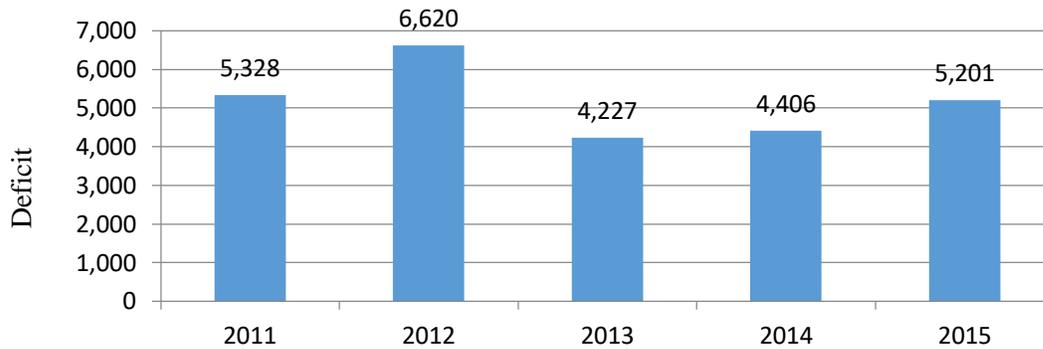

4.1 Introduction

Net energy metering is an electricity policy that enables consumers with renewable energy facilities to both consume electricity as needed and receive credit for supplying excess energy to the grid.

4.2 Background

In past, Pakistan has grappled with a substantial energy crisis characterized by a significant disparity between energy demand and supply. The nation frequently faced substantial energy deficit resulting in frequent load-shedding and severe power outages. The actual position of demand and supply of the electric power during peak hours in the NTDC's system have been reproduced in the following graph:

Year wise Deficit in Demand and Supply during Peak Hours(MW)

{Source: NEPRA State of Industry Report 2015 – (table 27)}

Recognizing these challenges, the Pakistan government has been actively promoting the use of renewable energy as a fundamental component of its future plans aimed at stabilizing the country's power sector. In pursuance of this vision of the GoP, NEPRA, referring to the international studies and the data indigenously collected, proposes that renewable energy projects are best suited to be commissioned as distributed generation, specifically for the scattered load. The preferable proposition for induction of renewable energy projects should be at the distribution network, near the load centers, and at locations where the adequate resource is available. This approach minimizes the need for extensive enhancements to the transmission network, streamlining the incorporation of renewable energy sources into the existing energy infrastructure.¹⁹The same vision led to the initiatives like net energy metering which was facilitated by the Alternative Energy Development Board. Under this scheme, individuals and businesses were encouraged to invest in renewable energy infrastructure,

¹⁹ 2015, State of Industry Report, NEPRA, p. 120

especially solar panels, which allowed them to not only meet their own electricity needs but also enabled them to contribute surplus energy to the national grid. This strategy aligned with Pakistan's endeavors to address its energy crisis while simultaneously promoting sustainable and greener energy solutions.

4.3 Role of the Program

On September 01, 2015, the National Electric Regulatory Authority (NEPRA) introduced the official Distributed Generation and Net energy metering Regulations. These regulations had broad implications, opening up opportunities for a wide range of electric grid customers, particularly those with three-phase connections, to participate in the Net energy metering program. This program enabled the installation of small-scale renewable energy systems by eligible customers, allowing them to seamlessly integrate their renewable energy generation with the existing grid infrastructure. Under these regulations, any customer with a three-phase connection can take advantage of Net energy metering, making it accessible to a more extensive segment of the population.²⁰

4.4 Overview

The purposes for the promotion of net energy metering include the encouragement of the individuals, businesses, and industries to invest in renewable energy sources like solar and wind power, thereby reducing reliance on fossil fuels and promoting a cleaner and more sustainable energy mix.²¹ Furthermore, net energy metering initiative is undertaken to mitigate the country's chronic energy shortages by incentivizing the generation of additional electricity through distributed renewable energy systems, helping bridge the gap between supply and demand. The State of Industry Report of NEPRA 2022 highlights that net energy metering significantly contributes towards minimizing T&D

²⁰ 2015, SRO 892(1)/2015, NEPRA

²¹ Notification dated 06, February, 2018, AEDB

losses and provides flexibility in investments for augmentation or development of distribution facilities.²²As per the data acquired from AEDB, the current status of Net Energy Metering in Pakistan, up to June 30, 2023, is exhibited in the table below:

Table-1

Sr. No.	Name of DISCO	Installed Net energy metering Connections	Capacity Installed (MW)
1	IESCO	10,968	130.5
2	LESCO	20,511	311.80
3	MEPCO	9,775	187
4	FESCO	5,165	92.11
5	HESCO	176	6.66
6	SEPCO	61	5.19
7	QESCO	13	.80
8	TESCO	1	.18
9	GEPCO	4,871	85.59
10	*BTPL	492	4.63

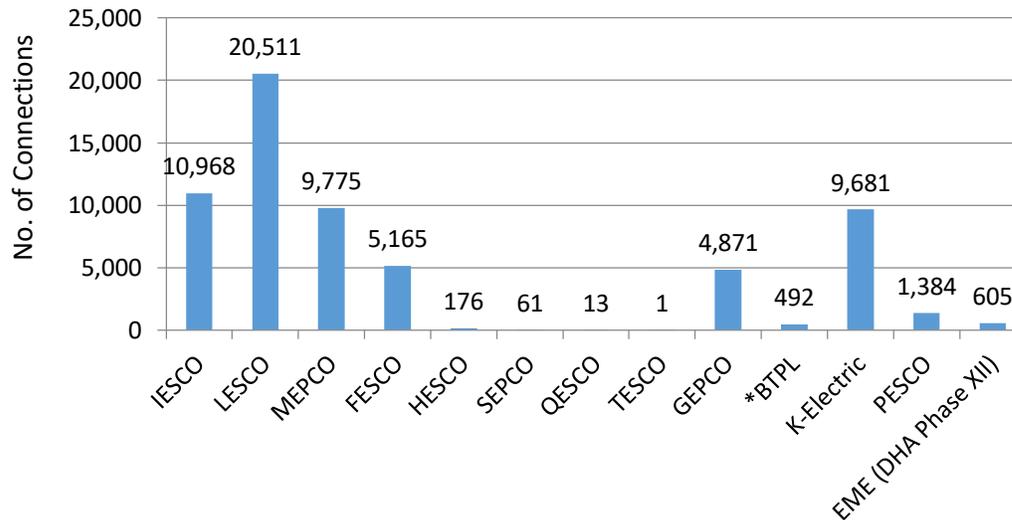

²² 2022, State of Industry Report, NEPRA, p. 68

11	K-Electric	9,681	202.49
12	PESCO	1,384	20.97
13	EME (DHA Phase XII)	605	7.14
Total		63,703	1,055.03

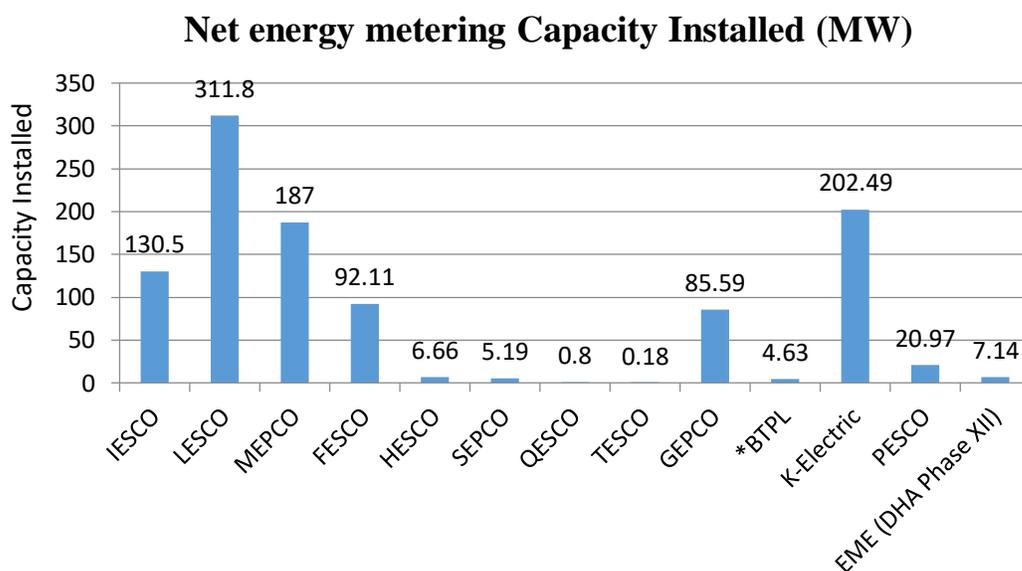

(*Bahria Town Private Limited)

LESCO and IESCO lead the rest by having maximum numbers of net energy metering connections. However, the efforts of HESCO, TESCO, SEPCO and QESCO with regard to the promotion of net energy metering seem abysmal and discouraging.

Installed Net Metering Connections

As far as the installed capacity for generation is concerned, LESCO is the frontrunner, followed by K-Electric and MEPCO.

4.5 Scope & Methodology

4.5.1 Scope

The impact audit was carried out during the year 2023-24 in two electricity distributing companies in Pakistan i.e., LESCO and IESCO, along with CPPA-G. The purpose of the audit was to understand any notable differences that were brought in by the net energy metering initiative.

In particular, the study sought to investigate whether the implementation of net energy metering has a measurable impact on reducing Transmission and Distribution (T&D) losses in the electricity grid. To address this question, a systematic sampling technique was used to identify feeders with the highest number of net energy metering connections. Due to constraints such as time limitations and other practical factors, a subset of the top 15 feeders was selected as sample for further inspection.

4.5.2 Methodology

The methodology employed for the impact audit consists of a broad and comprehensive approach, involving the collection of data from various key stakeholders in the power sector. These stakeholders include the distributing companies, the Central Power Purchasing Agency-Guaranteed (CPPA-G), the Alternative Energy Development Board (AEDB), and the National Electric Power Regulatory Authority (NEPRA). This diversified data was diligently gathered to form a strong and robust foundation for conducting in-depth analyses. To ensure the data was effectively utilized, it was meticulously organized into spreadsheets. This systematic arrangement facilitated comparisons and contrasts among different variables. Scatterplot tool was employed to ascertain a correlation between variables; furthermore, regression analysis was carried out to shed light on whether net energy metering can be associated with the reduction in T&D losses. Moreover, to gain insight into the viewpoints of Net energy metering Consumers, questionnaire was developed and administered. This qualitative aspect added depth to the study's findings, leading to a more comprehensive assessment of the implications and effectiveness of net energy metering from the consumer's standpoint.

4.6 Audit findings

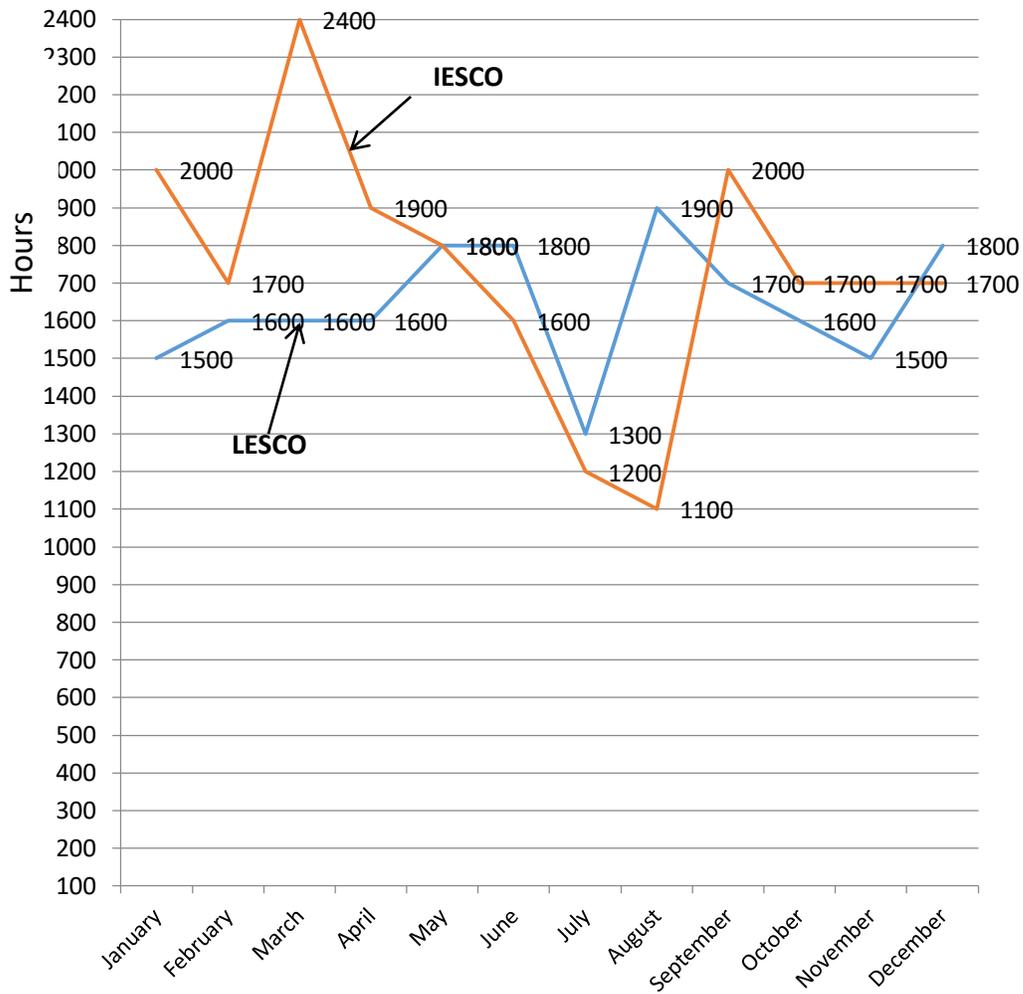

4.6.1 Impact of Net Energy Metering to Decrease the Deficit of Electricity during the Hours of Peak Demand in a Month

One of an important objective of the net energy metering initiative is to mitigate the shortage of electricity in the country especially during the time of peak demand. The data gathered from both LESCO and IESCO highlights that the peak demand for electricity typically occurs between 1300 and 1900 hours in LESCO and between 1100 and 2400 hours in IESCO in a day during the whole year.

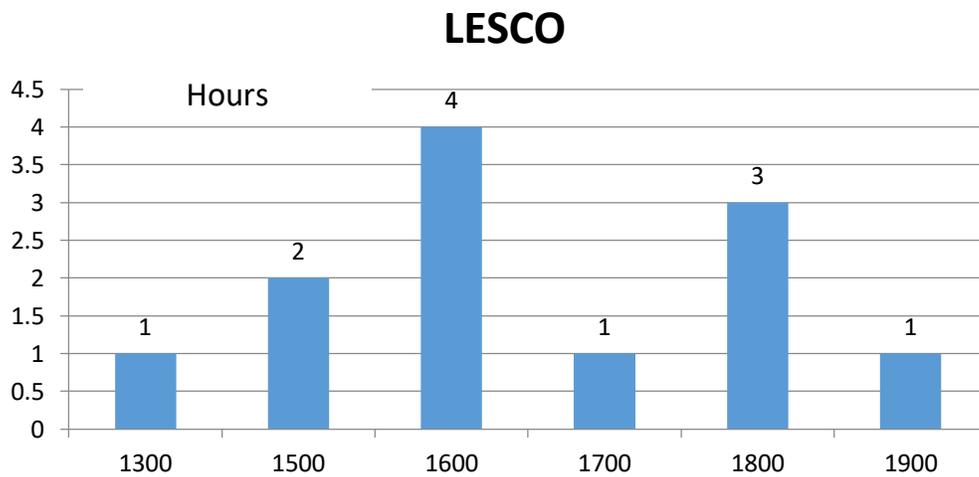

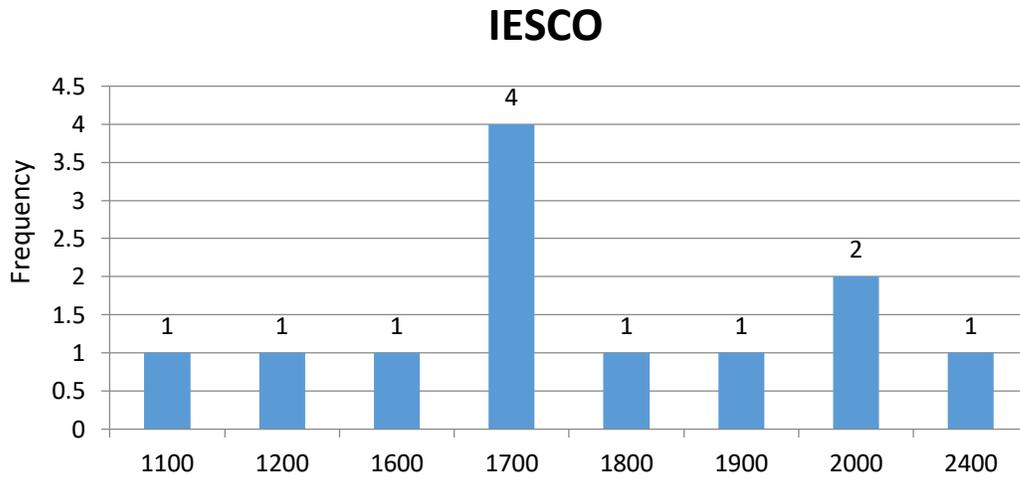

Table-2

Period	Date & time of peak in LESCO	Date & time of peak in IESCO
July-2022	05-07-2022 (1500 HRS)	07.07.2022 (2000 HRS)
Aug-2022	13-08-2022 (1600 HRS)	10.08.2022 (1700 HRS)
Sept-2022	01-09-2022 (1600 HRS)	01.09.2022 (2400 HRS)
Oct-2022	04-10-2022 (1600 HRS)	01.10.2022 (1900 HRS)
Nov-2022	01-11-2022 (1800 HRS)	24.11.2022 (1800 HRS)
Dec-2022	27-12-2022 (1800 HRS)	29.12.2022 (1600 HRS)
Jan-2023	24-01-2023 (1300 HRS)	24.01.2023 (1200 HRS)
Feb-2023	01-02-2023 (1900 HRS)	03.02.2023 (1100 HRS)
Mar-2023	16-03-2023 (1700 HRS)	15.03.2023 (2000 HRS)
Apr-2023	17-04-2023 (1600 HRS)	17.04.2023 (1700 HRS)
May-2023	23-05-2023 (1500 HRS)	23.05.2023 (1700 HRS)
June-2023	14-06-2023 (1800 HRS)	23.06.2023 (1700 HRS)

The data reveals that in LESCO there is a consistent pattern in the occurrence of maximum demand of electricity; however, the pattern in IESCO for maximum demand in a day is more sporadic.

To be more exact, when we remove the outliers from the considerations, it can be deduced that the maximum demand in IESCO happened with greater frequency between 1500 and 1800 hours, while, the same phenomenon occurred in IESCO between 1700 and 2000 hours.

In order to develop a relation between the time of maximum demand and the contribution from net energy metering during the same time, it was necessary to look into

the presence of sunshine, which is the primary element for the generation of energy through solar panels, during the hours of peak demands. As per the study conducted by the University of Queensland, Australia, “PV output rises with increasing sunshine levels.”²³ The World Meteorological Organization defines sunshine as the sum of the time during the day for which the direct *normal irradiance exceeds 120 W/m2*.²⁴ If the fact of the availability of sunshine could be established then it will be easier to determine the efficacy of net energy metering during the hours of peak demands in both of the companies.

For this purpose, solar radiation data pertaining to Pakistan was collected from the World Bank website.²⁵ The threshold of 120 W/m2 was applied on the direct normal irradiance received in Lahore for the year 2016-17. The output highlights the availability of sunshine during the day. Thereafter, a comparison was made between the presence of sunshine and the time of the peak demand occurred during the day so that the contribution of net energy metering in the generation of electricity is determined.

Table-3

**indicates that +/- 15 minutes net energy metering contributes in the system*

***points to no contribution of net energy metering in the system*

The analysis highlights a significant contribution of net energy metering towards the system from April to September and in January. However, October and March are categorized as medium in terms of energy generation during peak demand. On the other hand, there is no observed contribution to energy generation during peak demand in November, December, and February.

Table-4

Islamabad Electric Supply Company

23.05.2023 (1700 HRS)	1720 HRS
23.06.2023 (1700 HRS)	1747 HRS

**points to no contribution of net energy metering in the system*

In the case of IESCO, it was observed that during July, September, October, November and March the sunshine diminished before the onset of peak demand time. Nevertheless, apart from these five months, net energy metering positively contributed towards the system during peak demand period.

The amount of contribution made by net energy metering in the system is reflected in the table below:

Table-5

IESCO					
Month	Max Demand (MWH)	Drawl (MWH)	Shortfall (MWH)	Export by Net Metering (MWH)	% Shortfall saved by Net Metering
Jul-22	2554	2140	414	7.6	1.80

Aug-22	2550	2285	265	8.2	3.00
Sep-22	2347	2019	328	9.8	2.90
Oct-22	1808	1717	91	12.1	11.74
Nov-22	1253	1237	16	11.1	40.96
Dec-22	1475	1279	196	8.9	4.34
Jan-23	1656	1356	300	7.5	2.44
Feb-23	1498	1383	115	10.1	8.07
Mar-23	1332	1200	132	14.2	9.71
Apr-23	1698	1652	46	19.7	29.98
May-23	2220	2009	211	23.9	10.17
Jun-23	3035	2644	391	20.5	4.98

Table No. 5 highlights that the shortfall of electricity during the peak demand time is curtailed by net energy metering. Had there been no net energy exported, the amount of shortfall would have risen by the equal amount. To elaborate further let's take the example of the month of July-2022. In this month IESCO faced the shortfall of 414 MW. Presumably, if there was no export witnessed from net energy metering during July the shortfall would have risen to 421.6 MW (414+7.6). Thus, the net energy metering saved the shortfall by 1.80% during that month.

However, it is important to mention here that in order to evaluate the data on realistic grounds table no. 5 needs to be read along with table no. 4. The comparison between both the tables will lead to the conclusion that the aversion of shortfall as described in table no. 5 may be disregarded for the months of November, December and February as there was no sunshine available during the time of peak demand.

Table-6

LESCO					
Month	Max Demand (MW)	Drawl	Shortfall	Export by Net Metering	% Shortfall saved by Net Metering
Jul-22	6099	5450	649	6.5	0.99
Aug-22	5539	4929	610	8.2	1.33
Sep-22	5115	4535	580	8.7	1.48
Oct-22	4411	3967	444	12.2	2.67
Nov-22	3042	2949	93	11.6	11.09
Dec-22	3033	2681	352	9.3	2.57
Jan-23	3288	2258	1030	7.5	0.72
Feb-23	3062	2792	270	11.8	4.19
Mar-23	3111	2801	310	17.1	5.23
Apr-23	4140	3756	384	22.5	5.54
May-23	5074	4660	414	22.6	5.18
Jun-23	5779	4980	799	20.6	2.51

Table No. 6 may also have the same explanation as given above with regard to table no. 5. Moreover, the comparison of table no. 6 is to be drawn with table No. 3 for considering the impact of sunshine on the contribution of net metering.

It may be concluded that net energy metering curtails the shortfall during the time of peak demand; however, it is influenced by other variables such as the availability of sunshine for the generation of energy through solar panels. Thus, if the time of the availability of sunshine and that of the peak demand of electricity coincide, net energy metering will have a valuable contribution margin to the system, reducing shortfall in the process.

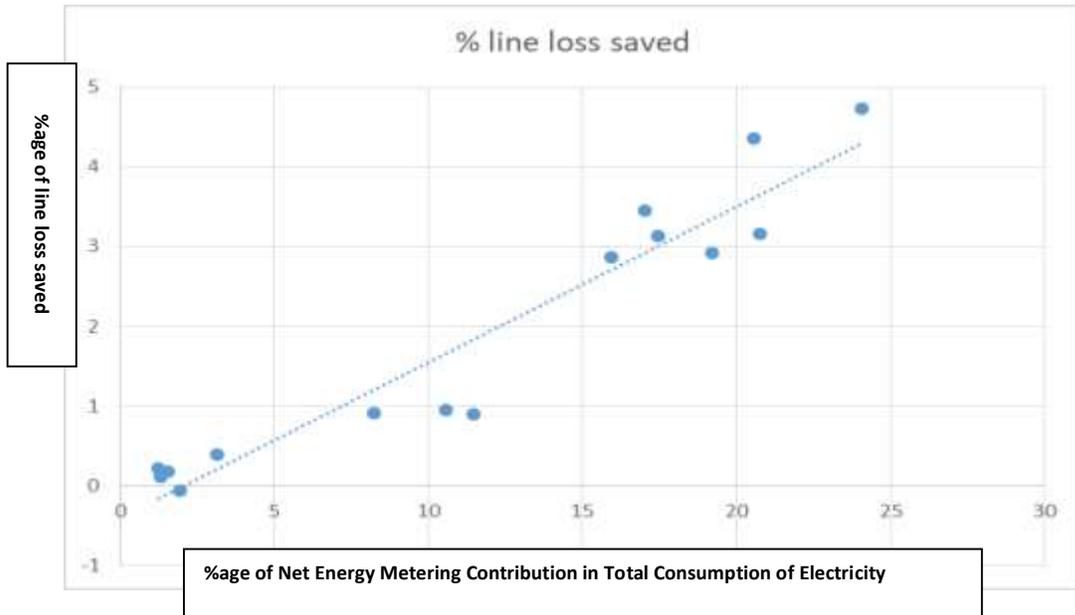

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they recognized the 2015 Distributed Generation & Net Metering Regulations, updating over time. The AEDB, now PPIB, played a key role, supporting the 2020 goal of 20-30% renewable energy by 2030. The 2021 and 2023 policies emphasized net metering and renewable targets, with LESCO compliant since 2016, aiming for 60% by 2030, improving system efficiency

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.6.2 Line Losses saved with the impact of Net energy metering - Rs.65.781 million

Line losses are generally defined as those losses that occur at HT lines due to distance of feeders from consumers, and excessive load on the feeders. As NMCs do not use HT lines therefore the amount of line losses equaling to the units exported through net energy metering are saved.

In order to analyze the above-mentioned argument, a sample of 15 feeders with maximum number of Net energy metering consumers was taken from LESCO and IESCO. The data was meticulously organized as reflected in table no. 7; Column no. 5 in the table elaborates the actual losses suffered by the respective feeder. However, in column no. 11, those losses are shown which could have occurred at the feeders had there been no energy supplied by the net energy metering consumers (NMCs). In the presumed absence of the NMCs, the exported units as shown in column 6 would have been transmitted by the feeder, thus enhancing the line losses.

In order to ascertain the correlation between percentages of net energy metering in total consumption of electricity (explanatory variable) and that of line losses saved

(dependent variable), data was incorporated in scatterplot; the trend line exhibited a positive relationship between both the variables.

Table-7

After establishing a strong correlation between the two variables a regression analysis was carried out. Following two hypotheses were tested:

H₀: There is no relationship between percentage of net energy metering in total consumption and percentage of line losses saved.

H_a: There is strong relationship between percentage of net energy metering in total consumption and percentage of line losses saved.

Microsoft Excel was used to execute the regression analysis:

Table-8

Summary Output of Regression Analysis carried out on Microsoft Excel	
Multiple R	0.9575
Coefficients for % of Total Consumption	0.19527
P-value	2.155E-08

Multiple R is the “correlation coefficient”. It is a measure of the applicability of the regression model. Moreover, it also indicates the strength of the linear relationship between the variables. For example, a value of 1 means a perfect positive relationship and a value of zero means no relationship at all. In this case, the value of multiple R is .9575 i.e. 96% which is significantly on higher side showing a strong positive correlation between the two variables.

The coefficient for percentage of Total Consumption is approximately 0.195. The positive sign indicates that as Consumption of net energy metering increases, percentage of line losses saved also tends to increase. There is a positive correlation between these two variables. For every 1% increase in consumption of net energy metering in total share of electricity, percentage of line losses saved

increases by an average of .195%. The p-values for the coefficients indicate whether the dependent variable is statistically significant. When the p-value is less than the significance level (.05), the null hypothesis can be rejected. In this case, the p-value of 2.155E-08 is extremely small. Such a minuscule p-value strongly suggests that the observed correlations between the percentage of net energy metering in total energy consumption and the percentage of line losses saved are not mere coincidences. Instead, they are highly statistically significant. Thus, the null hypothesis stands rejected. The results are conclusive enough to establish the argument that as the contribution of net energy metering increases in the system, the percentage of line losses saved is also increased.

Furthermore, the effect of other variables such as the sacking of line superintendents cannot be incorporated in this finding because it is the policy of the company to rotate and transfer the line superintendents as per the need. Moreover, during discussion with the management it was revealed that the company generally avoids transferring the line superintendents because of their knowledge and understanding of a particular area. So, due to the shortage of the availability of staff including the LSs, it is important that workers with broader experience are retained in the field. Lastly, the changes in line losses may not be solely attributable to a qualitative variable like sacking of line superintendent.

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they recognized the 2015 Distributed Generation & Net Metering Regulations, updating over time. The AEDB, now PPIB, played a key role, supporting the 2020 goal of 20-30% renewable energy by 2030. The 2021 and 2023 policies emphasized net metering and renewable targets, with LESCO compliant since 2016, aiming for 60% by 2030, improving system efficiency

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.6.3 Shifting the burden of capacity purchase price (CPP) from Net energy metering consumers to Non net energy metering consumers in LESCO & IESCO - Rs.3,408.937 million

According to Section 7, 31(4) and 31(7) of the NEPRA Act 1997, NEPRA is mandated to determine a uniform consumer end tariff at national level.

During the activity of impact audit for the year 2022-23 on net energy metering it is observed that the cost of electricity is recovered through sale of energy to end consumers on volumetric basis i.e. the cost of electricity is distributed on units consumed by the consumers. As a result, the more the number of units are sold the lesser will be the per unit rate and vice versa. The shifting of net energy metering consumers on alternative resources results in increased cost of electricity for other non-net energy metering consumers. As per NEPRA determined consumer end tariff, dated July 22, 2022, the capacity purchase price component represented 49.7% of power purchase price during the year 2022-23, whereas the capacity charges for the financial year 2023-24 is worked out at around 71% of the total projected power purchase price of DISCOs as per NEPRA's determined power purchase reference for the financial year 2023-24. The net energy metering facility is not a firm capacity; therefore, a suitable size of firm capacity power plant is also required in order to meet the power demand of net meter consumer. The distribution companies have to reserve the energy quota for the net energy consumers as the net energy consumers are fully dependent on centralized generation during night hours for which the capacity payments have to be made to IPPs. Moreover, long term contracts with take or pay capacity regime are already committed resulting in capacity adequacy for next few years. As per state of industry report 2021-22, the installed capacity of power plants is 40,813MW against a peak demand of 28,253MW. The Indicative Generation Capacity Expansion Plan (IGCEP) has forecasted demand of 41,338MW against installed capacity of 69,372MW by the year 2031.

The financial impact of capacity charges due to reduced consumption of electricity from the national grid by the net energy metering consumers is allocated by DISCOs across its customer base. Thus the net energy metering increases the marginal cost of capacity charges for the consumers without net energy metering system. The net energy metering consumers averted the share of capacity purchase price to the extent of Rs 3,408.937 million [Average per unit cost of CPP X (Units produced by NM generators – Units purchased by IESCO & LESCO)] during the year 2022-23, which was shifted on the non-

net energy metering consumers resulting in increase of per unit cost to non-net energy metering consumers.

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they guided by AEDB (now PPIB) and NEPRA, had embraced net metering since 2015. Actively implementing since 2016, these efforts aligned with policies targeting up to 30% renewable energy by 2030. The National Electricity Plan of 2023 aimed for 60% renewables, reflecting a nationwide, collaborative push for distributed generation and efficient energy use.

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.6.4 Non-recovery of use of system charges (UoS) from net energy metering consumers in LESCO & IESCO - Rs.638.300 million

According to Section 7, 31(4) and 31(7) of the NEPRA Act 1997, NEPRA is mandated to determine a uniform consumer and tariff at national level.

The Net energy metering consumers use DISCOs system wires for import and export of energy however the UoS charges and system services are not being recovered from them. Non-recovery of use of system charges and system charges increases the marginal cost of distribution, transmission and ancillary services and cause extra burden on non-metering consumers. The NTDC use of system charges and CPPA-G fee (System services) should also be applicable to all net energy metering consumers. This system service charge is not addressed in the existing regulation resulted in non-recovery of UoS charges for an amount of Rs.638.300 million [Average per unit cost of UoS x (Units produced by NM generators – Units purchased by IESCO & LESCO)] during 2022-23.

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they guided by AEDB (now PPIB) and NEPRA, had

embraced net metering since 2015. Actively implementing since 2016, these efforts aligned with policies targeting up to 30% renewable energy by 2030. The National Electricity Plan of 2023 aimed for 60% renewables, reflecting a nationwide, collaborative push for distributed generation and efficient energy use.

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.6.5 Undue burden on Exchequer due to aversion of recovery of Inter DISCO Tariff Rationalization Surcharge (IDTRS) in LESCO & IESCO - Rs.549.238 million.

As per NEPRA Act Section 31.8 “Notwithstanding anything contained in this Act and in addition to the tariff, rates and charges notified under sub-section (7) and this sub-section, each electric power supplier shall collect such surcharges from any or all categories of consumers, as the Federal Government may charge and notify in the official Gazette from time to time, in respect of each unit of electric power sold to any or all categories of consumers and deposit the amount so collected in such manner as may be prescribed. The amount of such surcharges shall be deemed as a cost incurred by the electric power supplier and included in the tariff notified under sub-section (7):”

During the impact audit of LESCO & IESCO it is revealed that in order to maintain a uniform consumer end tariff at national level, the consumer end tariff of better performing DISCOs is enhanced by inter DISCOs tariff rationalization surcharge which is built-in consumer end tariff to give relief to the consumers of inefficient DISCOs. However, the net energy metering consumers avoided the payment of IDTRS through self-generation of energy units to the extent of Rs.549.238 million [Average per unit cost of IDTRS X (Units produced by NM generators – Units purchased by IESCO & LESCO)] during the year 2022-23. Non-recovery of IDTRS from net energy consumers would be an extra burden on national exchequer as the GoP has to inject more subsidy into the system to maintain uniform rate of tariff.

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they guided by AEDB (now PPIB) and NEPRA, had embraced net metering since 2015. Actively implementing since 2016, these efforts aligned with policies targeting up to 30% renewable energy by 2030. The National Electricity Plan of 2023 aimed for 60% renewables, reflecting a nationwide, collaborative push for distributed generation and efficient energy use.

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

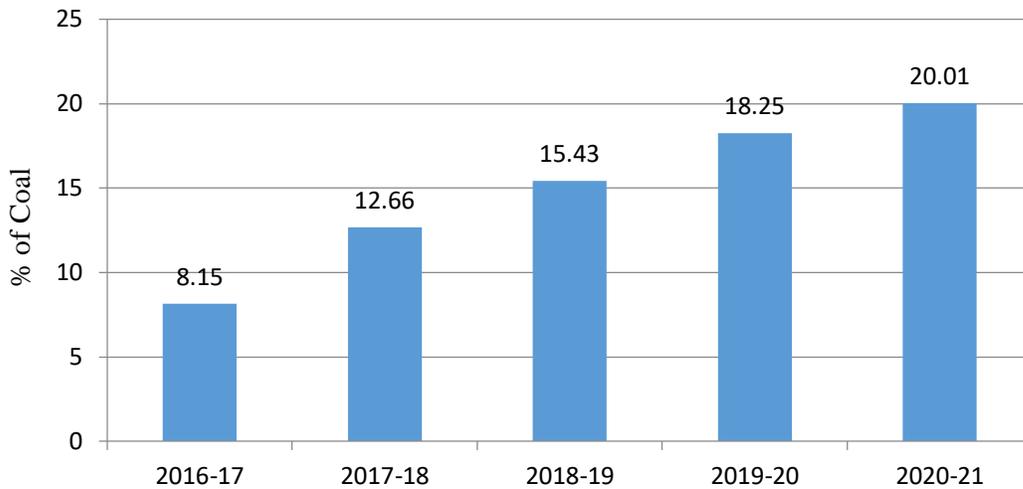

Audit recommends implementation of DAC's decision.

4.6.6 Environmental Impact of Net energy metering – Reducing Carbon Emissions by 374,206.5 tons a year

Net energy metering policy by NEPRA highlights the importance of net energy metering in the generation of cleaner and greener energy. Pakistan's two-third electricity generation is based on fossil fuels and this has been a trend over the past decade.²⁶ Notably, in recent years Pakistan has shifted its focus towards coal-fired electricity, resulting in substantial growth in coal-based production of energy over the past five years.

²⁶ 2021, Dawar Butt, Sunil Dahiya, CO₂ Emissions from Pakistan Energy Sector

% of Coal in the production of Energy

[Source: NEPRA State of Industry Report 2022 (p. 103)]

Here, a comparison is drawn examining the carbon footprints generated by coal and net energy metering to uncover any noteworthy environmental effects attributed to net energy metering.

The report titled “The Promise of Solar Energy: A Low-Carbon Energy Strategy for the 21st Century” published by United Nations mentions that the Carbon dioxide (CO₂) emissions for PV panels are in the range of 25 to 32 g/kWh, while a coal-fired power plant emits about 200g/kWh.²⁷

Table-9

²⁷ 2007, United Nations, <https://www.un.org/en/chronicle/article/promise-solar-energy-low-carbon-energy-strategy-21st-century>

Type	Capacity (MW)	Units kWh (million)	Per unit Carbon Footprints (grams)	Carbon Footprints (grams in million)	Carbon Footprints (tons)	Carbon emission Saved (Tons)	Carbon Footprints saved	Equal to Trees Plantation (M)
Solar	1005	1,496.6	32	47,892.7	52,792.62			
Coal	1005	1,936.8	200	387,367.2	426,999.1	374,206.5	87.6%	15.6

(*Calculation are attached as Annex-I)

It can be deduced from the table above that implementing net energy metering has a significant and beneficial impact on reducing carbon emissions. Even though the solar panels used in net energy metering do carry the “Carbon Debt” which means that the mining of the components used in solar panels, the production of solar panels and the transportation of the same cause carbon emission, yet, when it is compared with the carbon footprints of a coal-fired power plant, the adoption of net energy metering results in a remarkable reduction of 87.6% of carbon emissions into the atmosphere.

As the current installed capacity of net energy metering in Pakistan stands at 1,005 MW, almost 374,206.5 tons of carbon emission in the atmosphere is saved each year in comparison to a coal plant of the same generation capacity. This achievement is equivalent to the environmental benefit of planting approximately 15.6 million trees.

Pakistan ratified Paris Agreement in 2016, which necessitated the stricter greenhouse gases regulations. The Paris Agreement (Article 4, paragraph 2) requires each Party to prepare, and communicate to the UNFCCC, every five years, successive nationally determined contributions (NDCs) that it intends to achieve. Net energy metering can be an important factor contributing towards the satisfactory accomplishment of the goals set by Paris agreement.

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they complied with NERRA's updated Net Metering Regulations since 2015. Led by AEDB (now PPIB) and NEPRA, this initiative aligned with policies targeting 20-30% renewable energy by 2025-2030, aiming for 60% by 2030, necessitating continuous regulatory updates.

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.6.7 Aversion of cost of establishing a Power Plant amounting to Rs.437,250.11 million

As per the Article 9 of the NEPRA ARE (Alternative & Renewable Energy) Distributed Generation/Net energy metering Rules issued by NEPRA in 2014, the responsibility of the installation and maintenance of the Distributing Generation system lies with the Distributed Generator. Thus, it emancipates the company as well as the government of Pakistan from bearing any burden of investment for the generation of electricity. A comparison is generated between the Quaid e Azam Solar Park and Net energy metering facilities to further elucidate the above-mentioned argument.

The first phase of Quaid e Azam solar Park was completed in 2015 with the capacity of generating 100 MW of electricity. As per NEPRA, the establishment of QeA Solar Park cost 144.92 million²⁸ dollars and the annual operating cost is 3.07 million dollars.

Table-10

Source	Capacity (MW)	CAPEX (\$)	OPEX (\$)
Quaid-e-Azam Solar Power Plant	100	144.92M	3.07M
Net energy metering	1055	1,528.9M**=Rs.437,250.11	32.39M***

***Estimated Cost, had a solar power plant of the capacity of 1055MW was to be established (144.92*1055/100)*

**** (3.07*1055/100)*

To date, the cumulative installed capacity of net energy metering in the country stands at 1055 MW. This achievement has not incurred any expenses for

²⁸ Case no. NEPRA/TRF-303/QASPL-2015/8359-8361, NEPRA, dated: June 2nd, 2016, Page. No. 2

the government, as there has been no investment required for the installation of net energy metering facilities. If a solar power plant with the capacity of 1055 MW was to be established then, extrapolating the cost of Quaid e Azam Solar Power Plant, the new project would have an estimated cost of 1582.5 million USD. Moreover, net energy metering has been saving the annual operational cost as well which would have had an impact of around 32.39 million USD per annum.

One of the key objectives of the net energy metering initiative is to promote renewable energy so that the dependence on expensive fuels may be minimized. The results drawn from the comparison of net energy metering with Quaid e Azam Solar Park underscores the notion that, in this regard, the initiative of net energy metering along with ensuring a cleaner and greener production of energy may also alleviate the national exchequer from any sort of expense-related burden.

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they complied with NERRA's updated Net Metering Regulations since 2015. Led by AEDB (now PPIB) and NEPRA, this initiative aligned with policies targeting 20-30% renewable energy by 2025-2030, aiming for 60% by 2030, necessitating continuous regulatory updates.

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.6.8 Credit unpaid to Distributed Generators - Rs.1,154.588 million

As per the clause 3 of rule 11 of the NEPRA ARE (Alternative & Renewable Energy) Distributed Generation/Net energy metering Rules issued by NEPRA in 2014, “if the kWh supplied by Distributed Generator exceed the kWh supplied by DISCO, the net kWh shall be credited against Distributed Generator’s next billing cycle for future consumption, or shall be paid by the DISCO to the Distributed Generator annually in accordance with the Applicable Tariff at the option of Distributed Generator.”

Out of total consumers of Net energy metering, LESCO and IESCO had credit balances to be received against 10,522 and 11,475 consumers respectively. The total amount to be paid to these consumers was Rs.1,154.588 million. According to the rule mentioned in the criteria, the Distributed Generators had the option to either get paid against the credited units in their favor or get the units stored in the system for future netting off against the imported units. The net credit balance in favor of 21,997 DGs in both companies highlighted that there was unwillingness on the part of the management to pay the Distributed Generators their due credit amounts.

Table-11

Company	Consumers with unpaid Credits	Total Amount of Credit (Rs.)
LESCO	10,522	528,888,374
IESCO	11,475	625,699,819
Total	21,997	1,154.588 M

The finding was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management of IESCO was unresponsive, however, LESCO management replied that they complied with NERRA's updated Net Metering Regulations since 2015. Led by AEDB (now PPIB) and NEPRA, this initiative aligned

with policies targeting 20-30% renewable energy by 2025-2030, aiming for 60% by 2030, necessitating continuous regulatory updates.

The DAC in its meeting held on December 15 & 18, 2023 directed the management of IESCO & LESCO to take into consideration the Impact Audit on Net Metering and give their joint input within a month.

Audit recommends implementation of DAC's decision.

4.7 Conclusion

With prudent management, the net energy metering program can prove to be a powerful tool to encourage distributed power generation from Pakistan's indigenous renewable resources and establish a distributed renewable energy industry in the country. The net metering offers significant benefits to increasing the supply of sustainable energy at peak demand time thus relieving the overburdened/ overloaded distribution system, reduction in T&D losses and improvement in voltage profile of local area network. Moreover, the Distribution Generation using solar helps control environmental degradation through reduced carbon emissions.

In this context of this study, following recommendations are proposed:

1. Encouraging the net energy metering program to promote distributed power generation from Pakistan's indigenous renewable resources, fostering a distributed renewable energy industry.
2. Addressing the financial implications for non-net metering consumers, as they bear the increased marginal costs of distribution, transmission, and ancillary services due to reduced electricity consumption from the national grid by net metered consumers.
3. Recovering Use of System charges from net metering consumers for the use of the distribution system, as net metering involves the wheeling of power from generators to consumers using the distribution system.

4. Reviewing tariff regulations for net metering consumers and the introduction of a two-part tariff in the schedule of tariff to recover capacity charges from net metering consumers
5. Carrying out a detailed technical study to determine the maximum feasible induction of net metering into the system, to ensure system stability and efficiency

AUDIT REPORT

ON

THE ACCOUNTS OF

PAKISTAN RAILWAYS

AUDIT YEAR 2023-24

AUDITOR-GENERAL OF PAKISTAN

DIRECTORATE GENERAL AUDIT (RAILWAYS)

Chapter -1

Public Financial Management Issues in PR

The financial statements (Balance Sheet and Profit & Loss Account) of Pakistan Railways have not been prepared in accordance with the requirements of International Financial Reporting Standards (IFRS), International Public Sector Accounting Standards (IPSAS) and Pakistan Railways Accounts Code. The financial statements do not present the true and fair view due to recording revenue receipts on accrual basis, expenditure on cash basis and non-maintenance of books of accounts on double entry system. An incessant qualified audit opinion on appropriation accounts of Pakistan Railways is being given for the last one decade and adverse opinion is being given on commercial accounts since 2018-19. But no substantial remedial/ corrective measures were taken by PR management particularly on abiding issues i.e. following of accounting principles, presentation of fixed and deferred assets, recording of GPF interest, accumulation of suspense balances, non-realization of accounts receivable and incorrect recording of foreign loans. Qualifications on appropriation accounts and financial statements of PR are based on the following observations.

1.1.1 Audit Paras

1.1.2 Overstatement of revenue receipts due to booking on accrual basis and understatement of expenditure owing to booking on cash basis

Para 1001 of Pakistan Railway Code for the Accounts Department (Vol-I) provides that Pakistan Railways is as much a government concern as a commercial enterprise. Its accounts should, therefore, not only follow the essential formalities of commercial accounting but also conform to the requirements of government accounting.

Contrary to this, Pakistan Railway recognizes its earnings both on accrual and cash basis i.e. sale of tickets was recognized on cash basis whereas leasing of property & land and receivables from government departments and private parties

were recognized on accrual basis. Further, all working expenses were recognized on cash basis. This issue relates to accounting policy of PR and was being raised since last one decade but the management failed to take any measure for its resolution.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the FA&CAO/PR to submit a revised reply based on the discussion and the progress mentioned in the area of adoption of accrual accounting systems within one week.

Audit recommends that accrual basis of accounting be implemented as per the decision of Railway Board and progress be shared with audit.

1.1.2 Overvaluation of fixed assets due to non-recording of depreciation expense, losses, thefts and accidents

Para 377 of Pakistan Railways Code for the Accounts Department provides that losses or deficiencies should be recorded in the books of account in accordance with the chart of accounts. If any transactions under these categories are recorded under a respective head, the losses relating thereto should be written off under respective head also. Further, the objective of IAS 16 is to prescribe the accounting treatment for property, plant, and equipment. The principal issues are the recognition of assets, determination of their carrying amounts, depreciation charges and impairment losses to be recognized in relation to them. Furthermore, Para 3.2.7 of Accounting Code for Self-Accounting Entities provides that statement of fixed assets will provide the following details:

- Owner division/departments
- Assets categories
- Cost at the beginning of reporting period (for each category)
- Additions during the reporting period (at cost)
- Disposal during the period (at cost)
- Cost at end of reporting period (for each category)

Moreover, the Para 3.2.7.2 of Accounting Code for Self-Accounting Entities states that the statement will be based on information supplied by the

division/departments on a specified form (from their fixed assets register) as set out in chapter 13 of (APPM) before the 7th of each month. The form supplied by the division/departments shall be signed by the Principal Accounting Officer of each concerned division/department.²⁹

During review of the commercial accounts of the Pakistan Railways as on 30th June, 2023 and respective notes thereon, it was observed that all fixed assets in the balance sheet were shown at their original/historic cost instead of depreciated cost. Furthermore, if any asset was disposed-off by sale, obsolescence or damaged due to accidents or any other contingency, its value was not deducted from the total assets appearing in the balance sheet. As the entity was not charging depreciation on fixed assets and proper record of assets was not being maintained over the system, assets were being overstated. Furthermore, capital replacement /improvement expenditure was not being added to the relevant head of fixed asset which resulted in under valuation of fixed assets. The value of land was also shown at original/ historic cost and the improvement/ appreciation in the value of land over the years was not taken into accounts.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the PO (FA&CAO/PR) to convene a meeting with CEO/PR and all AGMs to resolve the matter and come up with the way forward within a period of one month.

Audit recommends that mechanism for transfer of information between executive and accounts regarding depreciation, loss of assets, accidents, thefts etc. may be decided beside formulation of accounting policy to incorporate changes in the accounts.

1.1.3 Non-recording of accrued liability on account of interest and exchange risk premium on foreign loan -Rs 29.35 billion

International Accounting Standard 1.15 provides that the financial statements must “present fairly” the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the

²⁹Management Report on Accounts of Pakistan Railways FY 2022-23

effects of transactions, other events, and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the framework. Economic Affairs Division after taking foreign loans from donor agencies re-lends these to Pakistan Railways at 8% interest rate and 6% exchange risk premium. Further, Para 5.3.3.3 of Accounting Code for Self-Accounting Entities stipulates that liabilities will be recognized on cash or on a committed basis, with the commitment or expense being made against the appropriation given for that expenditure.

Contrary to the above, Audit observed that closing balances of foreign loans and credits amounting to Rs 29.35 billion did not include the amount of interest and exchange risk premium at the rate of 8% and 6% respectively accrued as on 30th June, 2023. Balances were reflected in the accounts using principal amount in Pak rupees instead of foreign currency. This resulted in inadequate disclosure of liability on account of principle and interest on foreign loans. Further, it was observed that during the year no payment on account of interest or exchange risk premium was made which depicts that it has been accrued but not disclosed in financial statements.³⁰

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the PO (FA&CAO/PR) to submit a revised reply along-with documentary evidences based on the discussion within one week.

Audit recommends that the commercial accounts of PR be prepared as per IPSAS and liabilities be recorded in the books of accounts from FY 2023-24 and onward as Railway Board has accorded approval to shift the accounts of PR on accrual basis.

1.1.4 Non-recording of accrued pension liability in financial statements of Pakistan Railways - Rs 9.15 billion

³⁰ Management Report on Accounts of Pakistan Railways FY 2022-23

International Accounting Standard 1.15 provides that the financial statements must “present fairly” the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events, and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the framework.

During audit of commercial accounts of Pakistan Railways, it was observed that an amount of Rs 9,149.81 million stood as payable on account of pension, gratuity, commutation, arrears of GPF etc. However, this liability has not been accounted for in the financial statements of Pakistan Railways as on 30th June, 2023. This state of affair shows that liabilities were understated and the balance sheet has not been prepared fairly. Moreover, this amount should be treated as current liability in balance sheet as it is payable to the employees of Pakistan Railways and if this liability was recorded in the books of accounts the loss of PR would increase by that amount (**Annexure-3**).³¹

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the PO (FA&CAO/PR) to submit a revised reply along with documentary evidences based on the discussion within one week. The PO assured the DAC that once the ERP system is in place the compliance of the said para shall be completed by 2023-24.

Audit recommends that this liability should be recorded from next FY which was accumulating since 2021-22 and PR is unable to make payments to retired employees but nothing is disclosed in financial statements. Further, the compliance of DAC directives and commitments made by the PO should be ensured.

1.1.5 Non-recording of accrued liability on account of interest on long term debt (overdraft) – Rs 5.59 billion

As per IAS 1.15, the financial statements must "present fairly" the financial position, financial performance and cash flows of an entity. Fair presentation

³¹ Management Report on Accounts of Pakistan Railways FY 2022-23

requires the true representation of the effects of transactions, other events, and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the framework.

During audit it was observed that SBP converted the overdraft facility of PR into long term debt namely Pakistan Investment Bond (PIB) with the residual maturity of eight years and carrying market based yield in April 2022. However, accrued liability on account of interest on long term debt amounting to Rs 5.59 billion payable by PR was not shown on liability side of balance sheet. The bookkeeping necessitates that all the business transactions are required to be recorded through journalizing system but the transaction of accrued liability was neither journalized in the books of accounts nor it was recorded in June final account of PR. This resulted in non-recording of interest on account of long term debt and the financial statements did not depict true and fair picture of liabilities of PR towards SBP.³²

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. The PO (FA&CAO/PR) assured the DAC that once the ERP system is in place the compliance of the para shall be completed by 2023-24. DAC directed that the recoding of accrued liabilities on account of interest on long term debt shall be ensured.

Audit recommends that current portion of interest should be booked in accounts as PR has to make payment of principal and interest after eight years. Further, the compliance of DAC directives and commitments made by the PO be ensured.

1.1.6 Understatement of goods earnings due to incorrect recording – Rs 596.79 million

Para 1018 of Pakistan Railways Code for the Accounts Department (Vol-II) provides that the essential duty of accounts officer in the matter of check of traffic earnings is to see, that the person to whom the service is rendered pays the

³² Management Report on Accounts of Pakistan Railways FY 2022-23

proper amount and that Pakistan Railway servants or agents receiving payment correctly account for the same.

During audit of SAO/Revenue for the year 2022-23, while reviewing the goods balance sheets of following stations, it was observed that the goods earnings was understated by Rs 596.79 million due to incorrect recording of goods earnings. The earning was incorrectly accounted for by these stations resulted into understatement of goods revenue.

Understatement of goods earnings (FY 2022-23)

(Rs in million)

SN	Name of Railway Stations	Division	Amount
1	Jhimpir	Karachi	13.79
2	Bin Qasim	Karachi	583.00
Total			596.79

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the concerned PO to complete the revision of accounts in accordance with the CGA guidelines. DAC further directed the audit team to verify the compliance of the directives and after the satisfactory compliance this para shall settle. 33 Audit verification revealed that some rectifications have been made in the record and verified by audit but the amount of Rs 596.79 million has not yet been booked in the accounts and has not been rectified. This caused understatement of earnings of PR.

Audit recommends that necessary rectification may be carried out and duly reconciled record be provided to Audit.

1.1.7 Non-existence of policy for the redemption/adjustment of deferred assets of Rs 142.06 billion and non-reflection of change in policy for booking of expenditure

As per accounting guidelines the term deferred assets is defined as, a deferred asset is an expenditure that is made in advance and has not yet been consumed. The expenditure is made in advance and items purchased are expected to be consumed either within a few months or a large number of reporting periods. The deferred assets concept is not applied when a business uses the cash basis of accounting. Thus, these items would be charged to expenses at once under the cash basis of accounting. Further, as per IAS-1 the financial statements comprise the

³³ Management Report on Accounts of Pakistan Railways FY 2022-23

notes to the accounts, summary of significant accounting policies and other explanatory notes and IAS 8 prescribe the criteria for selection and changing accounting policies, together with the accounting treatment and disclosure of changes in accounting policies.

During audit, it was observed that the balance under the head Deferred Assets was Rs 142.06 billion as on 30th June, 2023 and no expenditure was booked to this head during the year. Further, no policy exists regarding the redemption/adjustment of deferred assets. However, as per IAS/IFRS the renewal and replacement expenditure also falls under the capital expenditure and should have been charged to relevant class of fixed assets along with detail of assets developed. This not only resulted in non-redemption of deferred assets but also incorrect valuation of fixed assets of PR. ³⁴ Moreover, previously the Depreciation Reserve Fund expenditure was booked to this head of account but during the current year the expenditure was charged to the fixed assets. There was a major shift in policy of booking of expenditure under this head which has not been disclosed in the FS.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed that this issue may be reviewed and re-examined at the level of clearing house for final decision.

Audit recommends that the policy may be decided and communicated to audit.

1.1.8 Wrong booking of interest as receivable on GPF not accepted by Finance Division - Rs 17.46 billion

According to Para 316 of Pakistan Railway Code for the Accounts Department, the amounts due to Pakistan Railways for services rendered, supplies made, or for any other reason, are correctly and promptly assessed and recovered as soon as they fall due, that all receipts are properly brought into account and that all receipts are correctly classified. Moreover, International Accounting Standard

³⁴ Management Report on Accounts of Pakistan Railways FY 2022-23

1.15 provides that the financial statements must “present fairly” the financial position, financial performance and cash flows of an entity. Fair presentation requires the faithful representation of the effects of transactions, other events, and conditions in accordance with the definitions and recognition criteria for assets, liabilities, income and expenses set out in the framework.

During audit, it was observed that an amount of Rs 17,455.64 million was shown as receivable from Federal Government on account of interest charged on GPF on the balance held by Federal Government after separation of account from Federal Government during 1971. This amount was appearing as current assets in the balance sheet of Pakistan Railways as on 30th June, 2023 against note No. 17(1). However, Finance Division vide its letter No. F 4 (6) CF. 11/97 Part 1411 dated 15th September, 2006 did not agree with the above referred liability towards Pakistan Railways. The respective issue relating to accounting policy of PR was being raised since last one decade but the management could not take any measure for its resolution. Moreover, in the clearing house meeting held in December 2017, it was decided that Rs 1.5 billion would be allocated each year under revenue grant to amortize the balance in subsequent years; however, no provision of fund has been made in budget for the FY 2022-23.³⁵

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the concerned PO to refer the matter to Finance Division and pursue the matter vigorously to get a final decision in this regard to resolve the issue.

Audit recommends that current status of matter with Finance Division be provided and clarification may be given regarding write off of Rs 17.46 billion under this head. Further interest on GPF should be charged to profit & loss account as an expense from the F.Y 2023-24.

1.1.9 Non-adjustment of inventory/store suspense balances – Rs 13.01 billion

³⁵ Management Report on Accounts of Pakistan Railways FY 2022-23

According to Para 1601 of Pakistan Railways Code for the Accounts Department (Vol-I) every balance should be proved each month as far as possible, i.e. it should be compared and reconciled with other parts of the accounts where the figures appear, and it should be seen that the total is supported by details, and that the items are current and efficient. The proof of the balances at the end of each financial year must be completed. Para 1122 further provides that the various subsidiary registers should be totaled up, and reconciled with the General Books before the closing of next month's accounts. Further, there is no provision of suspense adjustments/ balances in Code for Self-Accounting Entities.

During audit, it was observed that the suspense accounts were being shown in balance sheet under inventories note no.12 these balances under revenue grant were accumulating unnecessarily since 2010-11 except for reversal entry which was being made during the year on account of capital grant.

Inventory/stores suspense balances

		(Rs in million)	
SN	Description	2021-22	2022-23
1	Sales (scrap)	3,918.63	3,625.25
2	Balance in workshop manufacturing suspense accounts	5,636.04	5,069.89
3	Suspense-other accounts	3,089.33	2,478.65
4	Adjustment/ reversal suspense	-	1,839.15
Total		12,644.00	13,012.94

Moreover, balances under aforementioned revenue heads of inventory have been showing an increasing trend for the last many years. In the year 2010-11 this amount was Rs 2,985 million, which rose to Rs 13,013 million (336%) in 2022-23. The suspense balances represents unadjusted expenditure which may result in increase of working expenses, if adjusted.³⁶

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC viewed the issue very seriously and directed FA&CAO/PR to make strenuous efforts for clearing the

³⁶ Management Report on Accounts of Pakistan Railways FY 2022-23

suspense account as early as possible. He should prepare a road map and share with the D.G Audit.

Audit recommends that necessary steps may be taken for adjustment of suspense balances at the earliest. Further, the road map for the adjustment of suspense balances be shared with audit.

1.1.10 Accumulation and non-adjustment of miscellaneous advance (suspense balances) on account of revenue and capital – Rs 5.40 billion

According to Para 1601 of Pakistan Railways Code for the Accounts Department (Part-I) every balance should be proved each month as far as possible, i.e. it should be compared and reconciled with other parts of the accounts where the figures appear, and it should be seen that the total is supported by details, and that the items are current and efficient. The proof of the balances at the end of each financial year must be complete. Further, section-16.4.2.1 of Accounting Policies and Procedure Manual stipulates that the suspense account should be cleared on monthly basis. There is no provision of suspense adjustments/balances in Code for Self-Accounting Entities.

During audit, it was observed that advances against local purchases Rs 1,603.12 million was not being adjusted regularly. Similarly, Pakistan Railways paid utilities bills like electricity, sui-gas and others to its service providers and subsequently recover the amount partially from domestic consumer. The amount paid to utility providers was much higher than actually recovered from domestic consumers. Resultantly, PR is suffering losses on account of less recovery/adjustment of advances for local purchase and utility charges. Further, an amount of Rs 3,794.96 million on account of capital suspense was being shown under the head purchases. The amount is shown under prepayments and advances on assets side of balance sheet which has not been adjusted (**Annexure-4**).³⁷

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC viewed the issue very

³⁷ Management Report on Accounts of Pakistan Railways FY 2022-23

seriously and directed FA&CAO/PR to make strenuous efforts for clearing the suspense account as early as possible, prepare a road map and share with Audit.

Audit recommends that these pre-payments and advances are required to be adjusted in books of accounts at the close of FY. The write off of Sui-Gas charges be expedited besides adjustment of remaining amount. The compliance of DAC directives be ensured.

1.1.11 Non-adjustment of Railway remittances (transfer divisional) – Rs 12.34 billion

Para 1133 of Pakistan Railways Code for the Accounts Department provides that every endeavor should be made to bring to account all the transactions of a year in the accounts of the year to which they pertain, but if any transactions are advised to the Accounts Officer for adjustment after the books of the year have been finally closed, they should be reported to the Member Finance (MoR) as required under paragraph 1428.

Railway remittances (transfer divisional) represent net balance of remittance transactions between different accounting units of Pakistan Railways. The amount under this head was Rs 625.27 million in the Financial Year 2010-11. Presently, the amount under this head has reached to Rs 12,342.91 million as on 30th June, 2023. Hence, there was a substantial increase of Rs 11,717.64 million (1,874%) during last one decade. Further, there was a substantial increase of Rs 4,785.05 million (63%) during the current year.³⁸

This state of affair shows that the adjustments in the accounts of PR were not being made and pending due to multiple issues like late origination of Transfer Certificates by the originating units, non-acceptance by the responding units for want of verification of vouchers by the consumers, insufficiency of vouchers and inadequacy of budget under the relevant heads etc. Audit is of the view that if PR

³⁸ Management Report on Accounts of Pakistan Railways FY 2022-23

adjusted this amount in books of accounts the amount of loss would increase to that extent.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC took a serious view and showed displeasure over no progress being made since the last directives for resolving the issue. DAC directed the PO (FA&CAO/PR) to immediately take action and submit compliance to the audit with documentary evidence.

Audit recommends that there was substantial increase of Rs 4.78 billion (63%) during the current year, therefore, efforts should be made to minimize the balance under transfer divisions in compliance of DAC directives.

1.1.12 Unauthorized utilization of cash balances of security deposit of private parties and GPF - Rs 18.60 billion and Rs 8.35 billion respectively

Rule-7 of General Financial Rules regarding withdrawal of moneys from the public account provides that unless otherwise expressly authorized by any law or rule or order having the force of law moneys may not be removed from the public account for investment or deposit elsewhere without the consent of the Ministry of Finance.

During audit, it was observed that securities and deposits amounting to Rs 20.07 billion was shown under current liabilities of PR. This represents security deposit of contractors, private bodies, freight deposit and employees. This consisted of public money deposited into PR account which was required to be adjusted or paid back to the depositors. PR maintains a separate bank account in SBP i.e. Railway deposit account with SBP-XX and the balance available under this head was Rs 1.47 billion. Thus, there was a difference of Rs 18.60 billion which, represents that the amount has been utilized by PR for meeting its operational requirements.³⁹

Similarly, the liability of PR on account of GPF was Rs 8.36 billion and the cash balance available in Account XXI with SBP was Rs 14.29 million. The

³⁹ Management Report on Accounts of Pakistan Railways FY 2022-23

remaining amount of Rs 8.34 billion has been utilized by PR for meeting its operational requirements. This resulted in unauthorized utilization of security deposits of contractors and GPF of employees by PR amounting to Rs 26.95 billion. Detail is given below;

Public account liabilities and available balance with SBP

(Rs in billion)

Liability on account of	Amount	Amount available in SBP accounts	Amount utilized by PR
Securities and deposits SBP AC-XX	20.07	1.47	18.60
GPF SBP AC- XI	8.36	0.01	8.35
Total	28.43	1.48	26.95

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the FA&CAO/PR for the verification of record regarding account No.20 and 21 for the financial year 2022-23.

Audit recommends that the security deposit of employees, contractors and freight deposit kept in account-III has been utilized by PR for making payments. Security deposits should be kept in account-XX instead of Consolidated Fund account-III. The amount kept in account-XXI is far less than the GPF liability and no budgetary provision is provided for making these payments.

1.1.13 Non-recovery of account receivables (claims) - Rs 11.63 billion

Para 316 (a) of Pakistan Railways Code for the Accounts Department provides that the amounts due to Pakistan Railways for services rendered, supplies made, or for any other reason, are correctly and promptly assessed and recovered as soon as they fall due. Accounts Receivable represents the credit sales of a business, which have not yet been collected from its customers. Companies allow

their clients to pay for goods and services over a reasonable extended period of time, provided that the terms have been agreed upon.

During audit, it was observed that no efforts appear to have been made by the management to realize long outstanding receivables ranging from prior to 2005-06 to 2022-23. As per record of aging of bills receivables (claims) an amount of Rs 2,045.60 million is more than (05) five years old and its recovery seems to be doubtful and an amount of Rs 3,143.45 million is less than (05) five years old. Further, an amount of Rs 6.29 billion was also receivable on account of unrealized earnings on traffic accounts and its recovery seems to be doubtful and it may become bad debt sooner or later.⁴⁰

Receivables of PR (FY 2022-23)

(Rs in billion)	
Description	Amount
Unrealized earnings (Traffic Account)	6.29
Bills receivable	5.34
Total	11.63

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the FA&CAO/PR to prepare the break-up of the receivable and resubmit the reply after incorporating the disclosure in the financial statements.

Audit recommends that disputed amounts more than 10 years old should be written off as these are bad debts and no chances of recovery. Efforts should be made to recover the remaining amounts under bills receivable and unrealized earnings. Proper disclosure as per directives of DAC be given.

⁴⁰ Management Report on Accounts of Pakistan Railways FY 2022-23

1.1.14 Irregular/ unauthorized transfer of funds from PSDP account to revenue account-III and deposit account-XX- Rs 642.17 million and Rs 500.00 million

Para 5.4 of General Financial Rules (DDO Handbook) that no authority can incur expenditure or enter into any liability involving expenditure from the public, account, until the expenditure has been sanctioned by a general or special order of the President of Pakistan or of any other authority, to which the powers have been delegated. Further the proposed expenditure should have been provided for in the authorized grants and appropriations for the year. No money can be removed from the public account for investment or deposit elsewhere without the prior consent of Ministry of Finance. Further para 5.7 (i) states that the duty of controlling officer is not only to see that the total expenditure is kept within the limits of the appropriation, but he has also to see that the funds are expended in the public interest and for those objects only for which the money was provided.

During audit it was observed during the reconciliation of bank accounts that amount of Rs 642.17 million and Rs 500.00 million were transferred to Revenue Account-III and Deposit Account-XX respectively from PSDP Account -XVIII. These funds were provided by Finance Division with the approval of President of Pakistan for approved projects of PR. This payment constitutes Federal Government investment in Pakistan Railways. Therefore, the PSDP funds provided to PR by Finance Division for specific approved projects could not be transfer/ utilized for any other purpose. Thus the transfer of funds by PR management from PSDP account to other accounts was unauthorized and constitutes incorrect utilization of funds. ⁴¹

Transfer of funds from PSDP account

(Amount in Rs)

SN	PSDP (A/C XVIII)	Revenue (A/C III)	Deposit (A/C XX)
1	No.FD/B-I/Misc-1/2022 Date 11/09/2023	1,483,191	

⁴¹ Management Report on Accounts of Pakistan Railways FY 2022-23

2	No.FD/B-I/Misc-1/2022 Date 23/05/2023	404,980	
3	No.FD/B-I/Misc-1/2022 Date 03/04/2023	535,648	
4	No.FD/B-I/Misc-1/2022 Date 10/03/2023	8,855,564	
5	No.FD/B-I/Misc-1/2022 Date 08/02/2023	413,648,866	
6	No.FD/B-II/AC-XVII/2022 Date 19/01/2023		500,000,000
7	No.FD/B-II/AC-XVII/2022 Date 26/09/2022	382,359	
8	No.FD/B-II/AC-XVII-1/2022 Date 13/09/2022	17,952,322	
9	No.FD/B-II/AC-XVII-1/2022 Date 06/07/2022	198,903,251	
Total		642,166,181	500,000,000

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC conveyed displeasure over this action of irregular transfer of funds from PSDP account to Revenue account and D.G/Planning MoR was directed to ensure that such practice should be stopped with immediate effect. D.G/Planning was directed to issue displeasure letters to the PDs involved in such practices as a final warning.

Audit recommends that amounts were transferred without the approval of Finance Division. The practice may be discontinued and the compliance of DAC directives be ensured.

1.1.15 Overstatement of revenue of Pakistan Railways due to incorrect recognition policy of gain on sale of scrap – Rs 2.61 billion

Para 176 of Pakistan Railways Stores Manual provides that when stores are scrapped from stock, they have to be written off the relevant new or second-hand ledgers. Before this is done, responsibility for these losses should, as far as possible, be fixed on consuming branches and their acceptance obtained for raising debit against them. Para 181 further provides that a copy of the issue-note referred to in Para 176 will be sent to the departmental officer and submitted along with the minus depot stock sheet, which should not be prepared until responsibility for the loss has been fixed. If no consuming branch can be held responsible, the loss issue note should be sent to the Controller of Stores for acceptance.

During audit of SAO/Revenue for the financial year 2022-23, it was observed that Pakistan Railways' revenue was overstated by Rs 2,608.73 million

due to incorrect recognition of gain on sale of scrap under the sub-head 542 of the Abstract-Z. The gain was recorded being the difference of amount realized on sale of the scrap minus book value of the scrap. However, audit apprehends that gain recognition policy was incorrect as Pakistan Railways did not recognize depreciation/losses in the Financial Statements. This resulted into over statement of revenue of Pakistan Railways.⁴²

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed that a committee comprising AGM/M (head), F&CA/PR and CCS should come up with proper SOPs for correct recognition of gain on sale for scrap and other assets (capital/revenue). The recommendations of the committee duly approved by CEO/PR may be forwarded to Railway Board for final decision.

Audit recommends that the practice of recognizing gain on sale of scrap is not in accordance with the IAS standards and it distorts profit and loss account. Further, losses on account of fixed assets have not been booked in accounts. The report of committee constituted by DAC may be shared with audit.

1.1.16 Unauthorized cash deposit to account-III for amount kept under Deposit Misc.-XX –Rs 105.00 million

Para-1455 of Pakistan Railways General Code Volume-I stipulate, that the correct head of Chart of Accounts should be recorded on each voucher by the drawing officer. This head of account should also show whether the expenditure is charged or other than charged and should mention the fund from which payments are being made.

During audit of SAO/GB for the financial year 2022-23, while reviewing Journal Slip No. 10 of December-2022 of AO/X Section, it was observed that a TC No. TAB-05/X dated 23.11.2022 was sent by Traffic Accounts Branch to AO/X for crediting the Deposit Misc./X Account. The amount was correctly credited to Deposit Misc./X vide above stated journal slips. However, the amount was

⁴² Management Report on Accounts of Pakistan Railways FY 2022-23

incorrectly deposited in account-III with SBP instead of account-XX maintained for deposit misc. The account-III was maintained for crediting revenue earnings of PR and was utilized for incurring revenue expenditure. Therefore, the amount of Rs 105.00 million kept for deposit Misc. was utilized for meeting revenue expenditure.⁴³

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the PO to take the corrective measures and provide the documentary evidence to audit.

Audit recommends that latest status of transfer of funds be shared with Audit for verification.

1.1.17 Unauthorized booking of capital expenditure to revenue and vice versa – Rs 102.70 million

Para 1455 of Pakistan Railways General Code provides that the correct head of Chart of Accounts should be recorded on each voucher by the drawing officer. This head of account should also show whether the expenditure is charged or other than charged and should mention the Fund from which payments are being made.

During audit at divisional levels it was observed that capital expenditure of Rs 64.51 million relating to PSDP and Rs 26.07 million relating to deposit work was misclassified and booked to revenue heads. Further, expenditure of Rs 12.11 million on account of capital cost of handing over of PR colonies to WAPDA electricity distribution companies for direct billing was booked to revenue expenditure. The capital cost includes installation of electricity transmission lines, meters and transformers etc. in PR colonies. This expenditure was of capital nature and was required to be booked to capital head, however, it was booked to revenue head A03303 (electricity). This resulted in unauthorized booking of capital/deposit work expenditure Rs 102.70 million to revenue (**Annexure-5**).⁴⁴

⁴³ Management Report on Accounts of Pakistan Railways FY 2022-23

⁴⁴ Management Report on Accounts of Pakistan Railways FY 2022-23

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 14.11.2023. DAC directed the FA&CAO/PR to submit documentary evidence to DG audit for verification where the verification is involved.

Audit recommends that the instances of misclassification of expenditure have been noticed at different accounting unit level which needs to be rectified. The supporting record has not been provided for verification.

Chapter -2 PAKISTAN RAILWAYS

2.1 A) Introduction

Pakistan Railways is a state owned enterprise with a mission “to provide a competitive, safe, reliable, market oriented, efficient and environment friendly mode of transport”. It is managed by the Railway Board. The Secretary, Ministry of Railways is the Principal Accounting Officer and also ex-officio chairperson of the Railway Board. The affairs of Pakistan Railways are administered by the following authorities.

- i. CEO/Senior General Manager
- ii. GM/Manufacturing
- iii. GM/Welfare and Special Initiatives

The core functions of Railway operations are administered by the Chief Executive Officer/Senior General Manager, who is assisted by three Additional General Managers in infrastructure, mechanical and traffic units besides the principal officers of respective departments. There are seven operational divisions viz Peshawar, Rawalpindi, Lahore, Multan, Sukkur, Karachi, Quetta and one Workshop Division at Mughalpura Lahore. Each division is administered by a Divisional Superintendent (DS). The divisional superintendent is assisted by divisional officers in their respective fields. The fields include civil, mechanical, electrical, signal, telecom engineering, traffic, commercial and personnel. Likewise, manufacturing unit is headed by the General Manager/ M&S who is assisted by MD/Locomotive Factory Risalpur, MD/Carriage Factory Islamabad

and MD/Concrete Sleeper Factory Lahore.

The welfare activities of Pakistan Railways are administered by the GM/Welfare and Special Initiatives (W & SI), who is assisted by Director General/Pakistan Railway Academy Walton, Director Education and Chief Health & Medical Officer.

The administrative head of the Railway Accounts Department is Member Finance in the Railway Board who is assisted by three Financial Advisors & Chief Accounts Officers. Moreover, there is a Chief Internal Auditor who heads the Internal Audit Wing and reports directly to the Principal Accounting Officer.

There are four subsidiaries of Pakistan Railways, each headed by a Chief Executive Officer. These companies are registered under the company's Ordinance 1984 repealed by Companies Act 2017 and their financial audit is conducted by chartered accountants.

- a) Pakistan Railways Advisory & Consultancy Services (PRACS)
- b) Railway Constructions Pakistan Limited (RAILCOP)
- c) Pakistan Railway Freight Transport Company (PRFTC)
- d) Railway Estate Development and Marketing Company (REDAMCO)

PRACS was established in 1976 as a public limited company. Its main objectives are to prepare the feasibility reports for new Railway lines and render technical assistance in connection with the designing, modernization and maintenance of Railway installations, workshops, bridges and rolling stock. Presently, its main activities are sale of Railway tickets and managing certain trains on joint venture basis. RAILCOP was established in 1980 as a public limited company. Its main objective is to develop and upgrade Railway infrastructure.

PRFTC was established on 8th Jan, 2015 with the objective to explore avenues of public private partnership and to enter into joint venture with private entities, domestic as well as international, for procurement of rolling stock (locomotives & hoppers wagons) or to bring in any other private investment in Railway system as and when required.

REDAMCO was established on 12th March, 2012 with the objective to manage the non-rail business of PR under MoR. Mandate of the company was to act on behalf of MoR for the purpose of land development/ commercialization and non-core businesses excluding train tariff revenues, rolling stock manufacturing and repair/ maintenance facilities of PR. REDAMCO remained dysfunctional from October 2019 to November 2022 and was revived by the Federal Cabinet on 24th May, 2022.

B) Comments on Budget and Accounts

Pakistan Railways prepares appropriation accounts and commercial accounts. In appropriation accounts the revenue and capital grants are presented while in commercial accounts the financial statements are presented. Since last decade the qualified audit opinion is being given on appropriation accounts and qualified and adverse audit opinion on commercial accounts. The comments on appropriation and commercial accounts are given hereunder:

2.1.1 Comparative analysis of budget and expenditure

Revenue grant

A comparative analysis of revenue budget and revenue expenditure depicts the variation of original/final grant and expenditure.

Revenue budget and expenditure FY 2022-23

(Rs in million)

Items	Original Allocation	Supplementary Allocation (Surrender)	Final Allocation	Expenditure	Variation	
					Excess/ (Saving)	% age
Grant No. 85 Revenue Expenditure						
Voted	104,515.00	6,271.32	110,786.00	111,819.98	1,033.98	1.00
Charged	0	0	0	0	-	-
Total	104,515.00	6,271.32	110,786.00	111,819.98	1,033.98	1.00

Source: Appropriation Account of PR 2022-23

The comparison between allocated budget and actual expenditure clearly showed that the actual expenditure incurred under “voted” portion of revenue grant was more than the final allocation and there was excess of Rs 1,033.98 million

(1%). The budget allocation was not made under the charged portion and no expenditure incurred even though liability on account of interest on foreign loans was outstanding. The overall excess under both heads of revenue grant was 1%. Financial assistance of Rs 47.5 billion was provided by Federal Government for payment of pay and pension and to meet the operational shortfall of PR.

2.1.2 PSDP grant

The actual expenditure of PSDP grant was less than the original allocation which resulted in saving of Rs 2,794.44 million i.e. 11.03%. This clearly depicts inability of PR management for efficient spending of the allocated budget.

PSDP budget and expenditure FY 2022-23

(Rs in million)

Grant No.131 PSDP grant of Pakistan Railways						
Items	Original allocation	Supplementary Allocation	Final Allocation	Expenditure	Variation	
		(Surrender)			(Saving)	% age
Voted (Capital)	32,648.04	(7,304.51)	25,343.52	22,549.07	(2,794.44)	(11.03)
Charged	-	-	-	-	-	-
Total	32,648.04	(7,304.51)	25,343.52	22,549.07	(2,794.44)	(11.03)

Source: Appropriation Account of PR 2021-22

2.1.3 Comparative analysis of financial statements of Pakistan Railways

Para 4.3.3.1 of the Accounting Code for Self Accounting Entities stipulates that all revenue receipts will be accounted for on cash received basis whereas Pakistan Railways recognizes its earning on accrual basis, and all expenses on cash basis. Resultantly, earnings of Pakistan Railways are overstated and expenditures

are understated. The analysis of financial statements of Pakistan Railways i.e. profit and loss account and balance sheet for the FY 2022-23, is given hereunder.

2.1.3.1 Profit & Loss Account

Pakistan Railways suffered net loss of Rs 48,195.28 million during the FY 2022-23, it was Rs 963.15 million (2.04%) higher as compared to previous year.

Profit and loss account of PR (FY 2020-21 to 2022-23)

(Rs in million)

Particulars	2022-23	2021-22	2020-21	Variation	% age
				Increase (Decrease)	
1	2	3	4	5 (2-3)	6
Gross Earnings	63,717.92	60,091.72	48,648.81	3,626.20	6.03
Total Working Expenses	111,914.79	107,136.39	95,465.23	4,778.40	4.46
Operating Surplus/ Loss	(48,196.87)	(47,044.67)	(46,816.42)	(1,152.20)	2.45
Interest on Debt	-	(422.89)	(418.56)	422.89	100.00
Miscellaneous Receipts	1.59	1.73	2.86	(0.14)	-8.09
Net Profit / (Loss)	(48,195.28)	(47,232.13)	(50,152.41)	(963.15)	2.04

Source: Financial statements of Pakistan Railways FY 2022-23 (Commercial Account)

The profit & loss account indicated that:

- i) Total operational working expenses amounting to Rs 111,914.79 million were much higher than the gross earnings of Rs 63,717.92 million. The difference between working expenses and gross earnings was quite high which resulted in operational loss of Rs 48,196.87 million. This indicated that Railway administration could not achieve the breakeven point even since many years.
- ii) Interest on overdraft was accrued of Rs 5.59 billion during the year 2022-23 which was not charged to profit & loss account.
- iii) Federal Government provided Rs 47,500 million in the form of subsidy (grant-in-aid) to set off loss of Rs 48,195.27 million.

2.1.3.2 Balance Sheet

Balance sheet is a financial statement that reports an entity's assets, liabilities and equity. The financial position of Pakistan Railways for last two years depicts the increase in total assets.

Balance sheet of PR (FY 2020-21 to 2022-23)

(Rs in million)

Particulars	2022-23	2021-22	2020-21	Variation	
				Increase/ (Decrease)	% age
1	2	3	4	5 (2-3)	6
Capital & net worth	276,904.39	247,333.94	237,916.56	29,570.45	11.96
Revenue reserves	57,293.28	57,988.55	58,410.06	(695.27)	(1.20)
Long term liabilities	80,930.46	79,673.37	75,804.81	1,257.09	1.58
Current liabilities	26,722.45	24,497.01	19,349.69	2,225.44	9.08
Total liabilities & capital	441,850.58	409,492.87	391,481.12	32,357.71	7.90
Fixed assets	211,173.42	186,858.84	175,630.74	24,314.58	13.01
Deferred assets	142,056.51	142,056.51	142,056.51	0.00	0.00
Current assets	88,620.67	80,577.52	73,793.87	8,043.15	9.98
Total assets	441,850.60	409,492.87	391,481.12	32,357.73	7.90

Source: Financial Statements of Pakistan Railways FY 2021-22 (Commercial Accounts)

Balance sheet reflected the following areas of concern:

- i) The overdraft facility of PR was converted by SBP into long term debt of Rs 43,157.38 million including suspended mark up of Rs 4,563.30 million.
- ii) Increase in capital & net worth by Rs 29,570.45 million (11.96%) was due to investment by the Federal Government for development programs and booking of assets received from PRFTC.
- iii) The increase in current liabilities (9.08%) was less than the increase in current assets (9.98%). The current ratio of PR is 1:4. This depicts that PR is unable to meet its obligations when fall due.

2.1.4 Comments on the Financial Statements of Subsidiaries of Pakistan Railways

A) Pakistan Railway Freight Transport Company (PRFTC)

PRFTC was established on 8th January, 2015 with the objective to explore avenues of public private partnership and to enter into joint venture with private entities, domestic as well as international, for procurement of rolling stock (locomotives & hoppers wagons) or to bring in any other private investment in Railway system as and when required.

Comparative analysis

PRFTC earned net profit of Rs 74.53 million after tax during the FY 2022-23, last year the company earned net profit of Rs 53.42 million. This state of affair shows that the net profit of company after tax had increase by Rs 21.11 million (39.5%) as compared to previous year.

Profit & Loss Account of PRFTC

(Rs in million)

Particulars	Note	2022-23	2021-22	Variation	% age
Revenue	16	120.16	120.00	0.16	0.1
Cost of revenue	17	12.58	15.99	(3.41)	(21.4)
Gross profit		107.58	104.01	3.57	3.4
Administrative and general expenses	18	52.31	60.25	(7.95)	(13.2)
Other income	19	49.76	31.53	18.23	57.8
Operating profit		105.03	75.29	29.75	39.5
Bank charges	20	0.07	0.05	0.02	36.0
Profit before taxation		104.96	75.24	29.73	39.5
Taxation	21	30.44	21.81	8.63	39.6
Profit after taxation		74.52	53.43	21.10	39.5
EPS		7.45	5.34	2.11	39.5

Source: Financial statements of PRFTC for the FY 2022-23

The analysis of profit and loss account of PRFTC indicated the following facts:

- i. The revenue of the company on account of “facilitation services” remained stagnant at Rs 120.00 million. A small amount of revenue Rs

0.16 million on account of “freight operation of Sukkur Express” (new business) has been recognized during 2022-23.

- ii. Other income identified hefty growth of 57.80% (Rs 18.23 million) as compared to previous year. This was mainly due to rise in profit on deposits and profit on Habib Metro Bank Treasury Bills.
- iii. Cost of revenue showed significant decrease of 21.40% (Rs 3.42 million) as compared to previous year. This has positive impact on profitability of the company which was mainly due to reduction in expenses on account of salaries, transshipment charges and transaction advisory services.
- iv. Administrative and general expenses indicated decrease of 13.20% (Rs 7.95 million) which raised the net profit of the company. This was mainly due to reduction in expenses on account of salaries, utilities, advertisement and repair and maintenance costs.
- v. Taxation on company’s profit has been increased by 39.60% (Rs 8.63 million) which was mainly due to growth in profit before taxation.
- vi. Profit after taxation signified substantial growth of 39.50% (Rs 21.11 million). This was mainly due to two factors i.e. increase in other income and decrease in administrative expenses. Earnings per share (EPS) have also showed significant positive growth of 39.50% in 2023 as compared previous year.

Balance Sheet of PRFTC

(Rs in million)

Particulars	Note	2022-23	2021-22	Variation	% age

Source: Financial statements of PRFTC for the FY 2022-23

The analysis of balance sheet of PRFTC indicated the following facts:

- i. The property and equipment indicated a 61% decrease in current year. The decrease was mainly due to depreciation on fixed assets and cancellation of contract of installation of weighbridge. The company has paid an amount of Rs 19.20 million to the contractor. The contract has been terminated and an amount of Rs 11.76 million is recoverable from contractor.
- ii. The loan and advances showed 9% decrease in the current year. Loan and advances includes advance income tax amounting to Rs 45.31

million forcibly collected by FBR through an order dated 28.06.2023 based on demand for the tax year 2016. Further, advance for expenses has been increased from Rs 1.99 million to Rs 4.33 million.

- iii. Trade and other receivables indicated 20 % increase in the current year. This comprised of receivables from PR and receivable from Hussain Corporation, contractor of weighbridge.
- iv. Trade and other payables showed 53% escalation as compared to previous year. This increase was mainly due to increase in other payables. However, detail of other payable is not provided in notes to the Financial Statements.
- v. Financial liabilities showed 16% rise in current year. This liability comprised of un-utilized portion of finance facility provided by Energy Department, Government of the Punjab (finance facility less cost of Yousafwala project). The raise in financial liabilities was mainly due to disposal of leftover stock of project during the year.

B) Railway Estate Development and Marketing Company (REDAMCO)

REDAMCO was established on 12th March, 2012 with the objective to manage the non-rail business of PR under MoR. Mandate of the company was to act on behalf of MoR for the purpose of land development/ commercialization and non-core businesses excluding train tariff revenues, rolling stock manufacturing and repair/ maintenance facilities of PR.

REDAMCO generated total revenue of Rs 2,128.00 million from 2012 to 2019 when the company decided to wind up its operations. The winding up proceedings of the company have not been carried out and the company remained dysfunctional until before 2nd August, 2022 when the company has been revived

by MoR dated 3rd August, 2022 after revival by the Federal Cabinet on 24th May, 2022. However, the company started its operations in November 2022.

Profit & Loss Account of REDAMCO

(Amount in Rs)

Source: Audited financial statements for the FY 2022-23

- i) There was a substantial increase in the income and expenses of the company due to the fact that company carried out its operations only for one month in FY 2021-22 as compared to FY 2022-23.
- ii) Record of land and selling rights projects were taken up by the REDAMCO from the concerned Railway offices and divisions.
- iii) The company incurred administrative expenses of Rs 7.21 million, which mainly include salaries of Rs 4.80 million.

Source: Audited financial statements for the FY 2022-23

- i) The significant amount of Rs 26.82 million of income tax refund under the head current assets was challenged in appellate tribunal inland revenue which is still not fixed for hearing.
- ii) The value shown in operating assets under the head non-current assets depicted transfer of four vehicles from MOR.

- iii) The increase in bank balances of Rs 60.35 million represents amount collected by REDAMCO against selling rights, rent due and bank profits.
- iv) Land leasing charges collected by the REDAMCO from the projects are treated as payable to MOR after deducting company's share @15%. An amount of Rs 129.70 million has been shown under the head Current Liabilities as trade payables out of these payables, an amount of Rs 122.79 million is payable to Pakistan Railways.

C) Pakistan Railways Advisory & Consultancy Services (PRACS)

PRACS was established in 1976 as a public limited company. Its main objectives are to prepare the feasibility reports for new Railway lines and render technical assistance in connection with the designing, modernization and maintenance of Railway installations, workshops, bridges and rolling stock. Presently, its main activities are sale of Railway tickets and managing certain trains on joint venture basis.

Comparative analysis

PRACS suffered net loss of Rs 138.02 million after tax during the FY 2022-23, last year the company earned net profit of Rs 12.80 million after tax. This state of affair shows that the net loss of company after tax had drastically increased by Rs 150.82 million (1,178%) as compared to previous year.

Profit & Loss Account of PRACS

(Rs in million)

Particulars	2022-23	2021-22	Variation	%age
Revenue- net	123.61	258.20	(134.58)	(52.10)

(Loss)/profit after tax	(138.02)	12.80	(150.82)	(1,178.20)

Source: Audited financial statements for the FY 2022-23

- i. The company suffered gross loss of Rs 94.04 million during FY 2022-23 due to reduction in revenue by Rs 134.58 million (52%) and increase in cost by Rs 25.05 million (13%) as compared to previous FY 2021-22.
- ii. The revenue generation from operating activities revealed that PRACS sustained loss on sale of tickets of Rs 40.62 million, on train management Rs 48.63 million, on consultancy services Rs 2.68 million and on heritage cell department Rs 2.12 million.
- iii. During the FY 2022-23 there was significant increase of Rs 59.27 million in cost of revenue of train management of Rehman Baba Express, as it was 'nil' in FY 2021-22.
- iv. The major cause of loss was due to failure of management to explore new business ventures from open market as the company was totally dependent upon Pakistan Railways to generate revenue.

Source: Audited financial statements for the FY 2022-23

- i) There was an outstanding amount of Rs 291.73 million depicted under the head trade receivable which has not been recovered, only a meager amount of Rs 11.27 million was recovered in comparison to last year.
- ii) There was substantial decrease of Rs 175.38 million (25%) under the head retained earnings during the FY 2022-23.
- iii) There was decline in current ratio from 19.8:1 to 18.6:1 as compared to previous year; it was mainly due to reduction in deposit accounts under cash and cash equivalents by Rs 140.21 million.

D) Railway Constructions Pakistan Limited (RAILCOP)

The financial statements of RAILCOP have not been provided to Audit till finalization of this report. Therefore, comments on the accounts of RAILCOP have not been offered.

2022-23	87	0	0	0	0
---------	----	---	---	---	---

Compliance of PAC directives remained in the range 11% to 100% during the period of 1985-2000 except for the year 1996-97. However, after the year 2000 with few exceptions, there has been a continuous downward trend in compliance of PAC directives till 2023. Non-compliance of PAC directives is challenging the course corrective measures on part of PR, resulting in recurrence of irregularities of similar nature.

2.5 Audit Paras

Fraud and Serious Irregularities

2.5.1 Loss due to deficiencies/pilferage in Coaching and Goods Stock –Rs 80.00 million

Modified Standard Operating Procedure as communicated vide Chief Mechanical Engineer's letter No. 264-W/0/21/12/2008-09 dated 09.12.2010 laid down detailed internal controls to be put in place to stop theft/pilferage of material from Railway coaches and wagons.

During audit of the Mechanical Department Workshops Mughalpura, Lahore in September 2023, it was observed that internal controls to prevent theft/pilferage as suggested in the above mentioned Modified Standard Operating Procedure were not put in operation due to which deficiencies of fittings in coaching and goods stocks valuing Rs 80.00 million were observed for the year 2022-23. Audit further observed that value of deficiencies was calculated by the PR management at 25% of the actual cost of items instead of actual impact of the loss. Thus, PR suffered loss of Rs 80.00 million due to slackness of the management.

The matter was taken up with the management in September 2023 and discussed in DAC meeting dated 01.02.2024. DAC constituted a fact finding inquiry committee comprising DG/Vigilance and CMM to probe the matter and submit report within one month. Compliance of DAC directives was awaited.

Audit recommends that Railway management should immediately devise a strategy with the help of concerned departments to minimize such losses. Disciplinary action be taken against those held responsible for non-implementation

of SOP besides recovery of the amount from them. The loss may also be reported in Financial Statements of Pakistan Railways.

DP 12545

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2019-20, 2021-22 & 2022-23 vide paras No 2.5.6, 2.5.66 & 2.5.54 having financial impact of Rs 181.90 million. Recurrence of same irregularity is a matter of serious concern.

2.5.2 Loss due to theft of imported material installed at Bin Qasim Station - Rs 47.22 million

According to para 1801 of Pakistan Railway General Code, means should be devised to ensure that every railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part.

During audit of project “Rehabilitation of Railway Assets Damaged during Riots of December 2007” in April 2022, it was observed that signaling system at Bin Qasim Railway Station was upgraded in 2017-18 by installing imported material and equipment. Theft cases of signaling material and equipment valuing Rs 47.22 million were occurred at Bin Qasim Railway Station from May 2021 to January 2022. These theft incidences resulted in loss of Rs 47.22 million to PR due to poor security arrangements.

The matter was taken up with the management in September 2023 and discussed in DAC meeting held on 29.12.2023. DAC constituted an inquiry

committee comprising Deputy COPS/Time Table, Deputy/CSE and Deputy/CME/C&W to conduct a fact finding inquiry, fix responsibility, suggest course corrective measures and submit report with proper evidence within fifteen (15) days. Compliance of DAC directives was awaited.

Audit recommends that security arrangement should be improved and strenuous efforts be made by Pakistan Railways Police to reach the criminals.

DP 12211

2.5.3 Embezzlement of government money through fake procurement – Rs 15.99 million

According to para 1801 of Pakistan Railway General Code, means should be devised to ensure that every railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part. Further, in terms of Federal Board of Revenue (FBR) letter No 1 (42)/ STM/2009/99638 dated 24.07.2013, purchase of taxable goods may only be made from sales tax registered persons against sales tax invoices and payment be made through Banking Channels.

During audit of the project “Special Repair of 100 DE Locomotives (New)” in March 2023 it was observed that the Project Director initiated 101 local purchase cases for furniture & fixture and office equipment valuing Rs 15.99 million for the period from December 2020 to May 2021. The office equipment and furniture of the closed Project “Special Repair of 100 DE Locomotives (Old)” was transferred to this new project. Therefore, initiation of 101 cases for procurement of office equipment and furniture was unjustified. Further, following irregularities were also observed in procurement cases:

i. Funds of Rs 2.19 million only were provided in the PC-I for office equipment and furniture. Whereas, PD initiated procurement cases of Rs 15.99 million which also include procurement for other departments valuing Rs 6.79 million.

ii. The members of shopping committee of these cases stated that quotations were obtained by the PD himself. Moreover, in 67 cases out of 101, bills and tax invoices of M/s Baria Enterprises, Lahore were provided who refused to own them. This indicated that fake quotations and invoices were provided by the PD.

iii. The PD drawn cash himself and payment to the firms was not made through cheques as instructed by the FBR.

iv. These purchases were made during the year 2020-21. However, the material valuing Rs 10.56 million was not received till March 2023 despite alleged payment.

This resulted in embezzlement of government money of Rs 15.99 million through fake local purchase cases in the absence of proper shopping committees, genuine quotations/ bill/invoices and non-receipt of materials.

The matter was taken up with the management in August 2023 and discussed in DAC meeting held on 05.09.2023. DAC was informed that an inquiry was conducted by PD 75 Locos, CCP and FA & CAO and the case was also under trail with Federal Investigation Agency (FIA). DAC directed the PO to vigorously pursue the case with FIA for early recovery of the amount. The Railway administration should also strengthen its internal controls to avoid such practices in future. The PO will submit progress report within one month. Compliance of DAC directives was awaited.

Audit recommends that case with FIA be perused vigorously besides recovery of the misappropriated amount. Procurement and financial management controls be strengthened to avoid recurrence.

DP 12187

2.5.4 Loss due to tempering of record to enhance the leased area, lease terms and reducing lease rentals – Rs 21.71 million

According to Rule 19 (vi) of General & Financial Rules, the contracts should be placed only after tenders have been openly invited. Moreover, as per

Pakistan Railways competitive leasing policies, the leasing for stacking purposes should be for one year extendable for another term of 1 years with 20% increase.

During audit of the Property & Land, Karachi in September 2023 it was observed that the auction was held on 17.06.2015 for leasing out of 1,277.67 sq. yards for stacking purpose at Karachi City Station and possession of the land was handed over to the lessee on 18.08.2015. Subsequently agreement was executed on 15.04.2016 with increased area to 1,787 sq. yards. Deputy Director, P&L manipulated the lease rentals from Rs 3,790,000 to Rs 2,710,000 and lease term from 1 year to 3 years. Later, the lessee occupied excess area of 383 sq. yards as per measurement taken by the Divisional Engineer-I and DD/P&L, Karachi on 15.08.2016. Thus the lessee had possession of 2,170 sq. yards due to tempering of PR land record by connivance of PR management and lessee. This resulted in loss to PR on account of short deposit of lease charges due to tempering of record and lease rentals amounting to Rs 21.71 million for the period from August 2015 to January 2019.

The matter was taken up with management in December 2023 and discussed in DAC meetings dated 16.01.2024 and 25.01.2024. DAC directed a fact-finding inquiry by DG/P&L, CEN/Open Line and COPS, to be completed within three weeks. It was also directed to file recovery suit within one week. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular enhancement of leased out area, lease terms and reducing lease rentals by tempering the record and short recovery of lease rentals. Action be taken against culprit(s) besides strengthened the internal controls.

DP 12509 & 12520

Note: The issue was also reported earlier in the Audit Report for Audit Year 2018-19 vide para No. 2.4.9 having financial impact of Rs 1.52 million. Recurrence of same irregularity is a matter of serious concern.

2.5.5 Embezzlement of vending stall earnings -Rs 3.35 million

According to para 1801 of Pakistan Railway General Code, means should be devised to ensure that every Railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part.

During audit of Commercial & Transportation Department, Sukkur in February 2023, it was observed that the contractor of Super Model Stall at Rohri Railway Station deposited only Rs 421,900 in booking office on 28.12.2019 through self-generated fake letter. However, the contractor was asked to deposit 30% of bid money amounting to Rs 2,421,900 for third year on 02.12.2019. This resulted in short deposit of Rs 2,000,000. The matter was inquired by a committee of Divisional Officers, who pointed out four other cases of similar fraud amounting to Rs 1,347,300. In three (03) cases out of four (04) the same contractor was involved. This resulted in fraudulent short deposit of PR dues amounting to Rs 3.35 million.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 12.01.2024. DAC directed the CCM to submit a comprehensive reply. DAC further directed the CCM that the contractor should also be blacklisted and the case with the FIA be vigorously pursued for recovery of remaining amount. Compliance of DAC directives was awaited.

Audit recommends that amount involved be recovered besides lodging an FIR. Financial management controls be strengthened to avoid recurrence.

DP 12622

Land Management

2.5.6 Non-mutation of title of 20,830 acres land in favour of Pakistan Railways

According to the Presidential Order 1 and 2 of 1970 subsequently covered through Article No. 274 (2) of the Constitution of Islamic Republic of Pakistan,

Railways again became federal subject and assets owned by Railways were ordered to be transferred back in the name of federal government.

During audit of the following four (04) formations of Property & Land Department in September 2023, it was observed that the title of 20,830.04 acres Railway land over four divisions was not transferred to Pakistan Railways by the provincial governments. The Railway land was under possession and use of the provincial governments. Moreover, PR has no dedicated revenue trained staff at sectional level to reconcile unclaimed land.

(Rs in million)				
SN	DP No.	Formation	Area (acres)	Value of land
1	12448	P&L, Multan	782.51	13,772.00

3	12407	P&L, Rawalpindi	4,382.00	-
4	12431	P&L, Karachi	15,432.00	-
Total			20,830.04	13,853.52

The matter was taken up with the management in November to December 2023. DAC in its meeting held on 16.01.2024 and 29.12.2023 directed the DG/P&L to provide documentary evidence regarding mutation of land in favour of Pakistan Railways and implement verdict of Supreme Court in remaining patches of land. Compliance of the DAC directive was awaited.

Audit recommends that matter be taken up at appropriate level to resolve the issue, deployment of dedicated revenue staff and maintenance of independent land record. Title of the land be got transferred in favor of Pakistan Railways as per Presidential Order 1970 and orders of Honorable Supreme Court of Pakistan.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2020-21 vide para No. 2.5.2 having financial impact of Rs 977.19 million. Recurrence of same irregularity is a matter of serious concern.

2.5.7 Encroachment of 3,502 kanals Railway land – Rs 13,819.53 million

Para 803 of Pakistan Railways Code for the Engineering Department provides that it is the duty of Railway administration to preserve unimpaired the title to all land in its occupation and to keep it free from encroachment.

During audit of seven (07) formations of Property & Land Department, Vigilance Directorate and Commercial & Transportation Department in September 2023, it was observed that 3,502.52 kanals of commercial Railways land valuing Rs 13,819.53 million was encroached by private parties and government departments, during the period from 1988 to 2023, (**Annexure-6**). Thus, PR was deprived of valuable assets and potential earnings due to unauthorized occupation of Railway land.

The matters were taken up with the management in August to December 2023 and discussed in DAC meetings from September 2023 to January 2024. The DAC showed displeasure on the laid back attitude of the POs over the encroachments and directed to retrieve the land and lodge FIRs against all encroachers. Compliance of DAC directives was awaited.

Audit recommends that action be taken for early retrieval of sites and responsibility be fixed against those found negligent. Land management be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20 & 2021-22 vide paras No. 2.4.68, 2.5.49, 2.5.8, 2.5.11, 2.5.14 having financial impact of Rs 13,197.49 million. Recurrence of same irregularity is a matter of serious concern.

2.5.8 Unauthorized inclusion of 776 kanals Railway land in katchi abadis by Government of Punjab – Rs 4,474.62 million

As per para 2 (iii) and category-III of Director Property & Land's letter No. 469-W/KA-202/Pt-III (P&L) dated 23.05.2008, katchi abadi entirely located on

such Railway Land which is required for operational/commercial purpose falls in category-III. The land that falls in category-III is not recommended for issuance of NOC. Whole abadi needs to be relocated on provincial government land. Para 803 of Pakistan Railway Code for the Engineering Department provides that it is duty of Railway administration to preserve unimpaired the title to all land in its occupation and to keep it free from encroachment.

During audit of Property and Land Department, Multan and Rawalpindi in September 2023, it was observed that Railway management issued NOC for 382 kanal and 01 marlas Railway land on 17.04.2001 in order to regularize the katchi abadis established before 23rd March, 1985 in Multan and Rawalpindi Divisions. However, DG Katchi Abadis, Government of Punjab regularized 1,158 kanals of Railway land vide notification dated 05.11.2001. This resulted in unauthorized inclusion of Railway land measuring 775 kanal 19 marlas valuing Rs 4,474.62 million in katchi abadis by Government of Punjab as detailed below.

(Rs in million)

SN	DP No.	Formation	NOC issued by PR (area)	Regularized by DG Katchi Abadis (area)	Excess area	Value of land
1	12447	P&L Multan	345 kanal 7 marlas	1,048 kanal	702 kanal 13 marlas	3,254.84
2	12403	P&L Rawalpindi	36 kanal 14 marlas	110 kanals	73 kanal 06 marlas	1,219.78
Total			382 kanal 01 marlas	1158 kanal	775 kanal 19 marlas	4,474.62

The matter was taken up with the management in November and December 2023. Against Sr.No.1, DAC in its meeting held on 16.01.2024 directed the DG/P&L to vigorously pursue the matter for vacating the stays of the encroachers in katchi abadis and take over the possession as soon as the litigation was over. Against Sr.No.2, DAC in its meeting held on 29.12.2023 directed the PO to vigorously pursue this important issue of retrieval of precious land in the court of law. Further, DAC constituted an inquiry committee comprising D.G/Vigilance and CCM to enquire and fix responsibility for negligence of officers and loss of land on account of katchi abadis. The inquiry report should be submitted within one month. Compliance of DAC directives was awaited.

Audit recommends that the matter may be taken up with the Chief Secretary, Government of Punjab for retrieval of excess land and relocation of excess katchi abadis to provincial government land. Internal controls regarding assets management be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20 and 2020-21 vide paras No. 2.4.14, 2.5.106 and 2.5.21 having financial impact of Rs 1,606.26 million. Recurrence of same irregularity is a matter of serious concern.

2.5.9 Unauthorized commercial utilization of land leased out for Al-Shifa Trust Eye Hospital – Rs 466.73 million

According to clause 1 and 3 of the agreement dated 30.06.1997 executed between Pakistan Railways and Al-Shifa Trust Eye Hospital, the lessee shall use the land only for the purpose of Al-Shifa Trust Eye Hospital.

During audit of the Property & Land Department, Sukkur in September 2023, it was observed that 20,538 square yards of commercial land was leased out at nominal rent of Rs 1 per square yard for a period of 33 years to a welfare project Al-Shifa Trust Eye Hospital vide two agreements dated 30.06.1997 and 25.06.2009. In violation of the agreements, Al-Shifa Trust Hospital sublet its premises on revenue sharing basis to Educareer Sindh Institute, Sukkur in March 2019. Moreover, Al-Shifa Trust Eye Hospital is also operating a marriage lawn since 2012 and also allowed cellular companies to install BTS towers in 2018.

Thus, PR was deprived of premium and annual rent amounting to Rs 466.73 million of land used by the Al-Shifa Trust Eye Hospital for commercial purposes.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 02.01.2024 wherein DAC showed displeasure over negligence and irregularities committed in leasing of land to Al-Shifa Trust Eye Hospital. DAC constituted three-member committee comprising DG/Vigilance, DIG and CCFM to conduct inquiry to fix responsibility and submit the report within one month. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for not taking appropriate action for commercial leasing of land which was originally leased out for welfare purpose. Action be taken against those held responsible besides recovery of lease premium and rent on commercial basis.

DP 12411

2.5.10 Loss due to lease of marquees at low benchmark - Rs 218.37 million

According to policy dated 07.12.2020, for leasing of land for marriage lawn/marquee, the base rate for annual rent was required to be calculated on the basis of 10 % of average market and DC price (commercial rate) of the approved sites of big cities and 8% on the average of market and DC price for small cities. Moreover, as per clause 8 of the policy, the annual rent would be increased @ 15% compound per annum of the approved bid price for remaining years respectively.

During audit of following two formations of Property & Land Department in September 2023, it was observed that two pieces of Railway land measuring 630.92 marlas were auctioned for marriage lawn. Railway management auctioned the land by fixing low benchmark which resulted in loss of Rs 218.37 million to PR as detailed below.

(Rs in million)

SN	DP No.	Formation	Area in marlas	Period	Benchmark should be fixed	Benchmark fixed	Total Loss

					(base year)	(base year)	
1	12402	P&L, Rawalpindi	78.60	2021-26	25.49	1.10	189.12
2	12395	P&L, Multan	552.32	2020-24	6.63	0.77	29.25
Total			630.92				218.37

The matter was taken up with the management in November 2023. Against Sr. No.1, DAC in its meeting held on 02.01.2024 showed displeasure over negligence and irregularities committed in leasing of land for Marquee. DAC constituted a three-member inquiry committee comprising DG/Vigilance, CPO and CF&AO to fix responsibility and submit report to the DAC within one month. Against Sr. No.2, DAC directed the CEO/Sr.GM to personally look into the matter. DAC further directed the PO to submit comprehensive reply. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for incorrect fixation of rent in violation of the policy in vogue. Action be taken against those held responsible besides revisiting the agreements and recovery of the amount involved.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20 and 2021-22 vide paras No. 2.4.55, 2.5.84 and 2.5.49 having financial impact of Rs 3,866.25 million. Recurrence of same irregularity is a matter of serious concern.

2.5.11 Non-recovery of commercialization charges from LARECHS due to change of purpose – Rs 177.37 million

The Executive Committee of Railway Board in its meeting held on April 2002 approved the policy regarding commercialization of plots in Railway

Housing Societies. The committee approved commercialization charges at 50% of the average of the D.C price and current market value of land. Market value will be considered only if it will be higher than DC value.

During audit of Property and Land Department Workshops, Mughalpura in November 2023, it was observed that residents of Lahore Railway Employees Cooperative Housing Society (LARECHS) utilized the residential plots for commercial activity in the form of petrol pumps, hotels, restaurants, general stores, shops, and clinics without obtaining NOC and payment of commercialization charges. Audit observed that ninety (90) sites were being used for commercial activity. This resulted in loss of Rs 177.37 million to PR due to irregular utilization of residential land for commercial activity without obtaining NOC and payment of commercialization charges.

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 16.01.2024. DAC nominated a fact finding inquiry committee comprises of DG/P&L, CEN/OL and DIG to fix responsibility for failure to implement the policy and assessment of commercialization fee to be realized within one month. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular utilization of railway land for commercial purpose without obtaining NOC and paying commercialization fee. Action be taken against the defaulters besides recovery of the amount involved. Internal controls regarding assets management be improved to avoid recurrence.

2.5.12 Non-regularization of commercial encroachment under Remedial Management Policy - Rs 97.13 million

According to Policy for Remedial Management of Unauthorized Commercial Structures of Railway Land circulated by Joint Director/P&L vide letter dated 01.06.2016, in case of regularization of encroachment, the unauthorized occupants would pay 50% of DC value of land as premium with 7% of present DC value as annual rent. The outstanding rent of the previous years shall liable to be paid since 01.01.2002 by depreciating the present day rent @ 25% to preceding 3 years up to 01.01.2002.

During audit of following three (3) formations of Property and Land Department in September and November 2023, it was observed that 633 shops were illegally constructed by the private individual on Railway land during 1980 to 2020. Further, a piece of land measuring 6.88 marlas was under occupation of Hamza Sugar Mills since 2016. The occupants of these shops and commercial land showed willingness for regularization of their structures under remedial management policy; however, their cases were not finalized till audit.

(Rs in million)

SN	DP No.	Formation	Description	Period	Loss of revenue
1	12404	P&L Rawalpindi	409 Shops	1980 to 2020	49.52
2	12626	P&L Lahore	120 Shops	-	31.36
3	12423	P&L Multan	104 Shops	2016	13.55
			6.88 marla land encroached by Hamza Sugar Mills	2016	2.70

Total	97.13
--------------	--------------

PR management failed to retrieve or regularize these shops under remedial management policy due to which PR was deprived of potential revenue of Rs 97.13 million.

The matter was taken up with the management in November 2023. Against Sr. No.1, DAC in its meeting held on 02.01.2024 directed the DG/P&L to conduct survey of 409 shops within one month and start anti-encroachment operation after completion of one month. DAC further directed to fix responsibility and take action against those held responsible. Progress against each encroachment should be shared with DAC. Against Sr. No.2, DAC in its meeting held on 25.01.2024 directed the DG/P&L to expedite the process and submit supporting documents in support of progress made so far within two weeks. Against Sr. No.3, DAC in its meeting held on 25.01.2024 directed to issue charge sheet to the concerned IOW and AIOW and displeasure note to Dy: Director/P&L, Multan Division for their negligence. Recovery notices be served to all the encroached area shops and Hamza Sugar Mills with timeline of one month and in case of negative response, encroached area should be retrieved under intimation to this forum. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-regularization of commercial encroachments under remedial management policy. Action be taken for regularization or retrieval of PR land. Assets management controls be improved to avoid recurrence.

2.5.13 Non-recovery of commercial rent and electricity charges from illegal occupants of Railway accommodations - Rs 55.33 million

As per Rule-8 of Pakistan Railways policy for allotment of Railway accommodation 2019, occupation of house beyond authorize retention period shall be treated as unauthorized occupation and apart from any other action, which may be taken under the rules, rent at 7½% per annum of the updated assessed capital value of the house including the cost of land will be charged for this period.

During audit of the Deputy General Manager in August 2023, it was observed that five (05) retired Railway offices were in illegal possession of Railway accommodations in Mayo Garden, Lahore and a bungalow at Pringle Road, Lahore for the period ranging from 2016 to 2023. Further, an official was residing in Officer's Flats Walton, Lahore without any allotment since 2008. As per PR policy, commercial rent was required to be recovered from the illegal occupants but neither commercial rent and electricity charges were recovered nor got these accommodations vacated till date of audit. This resulted in loss of Rs 55.33 million to PR due to non-recovery of commercial rent and electricity charges from the illegal occupants of Railway accommodations.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 05.01.2024. DAC directed the DGM that the objected residences be got vacated and amount raised against the defaulters be recovered. Documentary evidence of vacation/recovery be shared with DAC within one week. Compliance of DAC directives was awaited.

Audit recommends that responsibility may be fixed for non-vacation of Railway accommodations and non-recovery of commercial rent and electricity charges despite lapse of seven years. Action be taken against those found at fault besides recovery of the amount involved.

DP 12473

2.5.14 Irregular handing over of land without realizing advance lease charges – Rs 7.73 million

According to clause-3(d) of the revised Railway Land Leasing Policies dated 07.12.2020, the successful bidder shall be liable to pay 50% of the annual rent on the date of auction in the Railway treasury. Further clause-3(f) provides that in case of successful bidder failed to deposit the remaining 50% amount within a week, the already deposited money shall be confiscated in favour of Pakistan Railway. Moreover, successful bidder who failed to deposit the remaining amount shall not be allowed in future to participate in bidding.

During audit of Property and Land Department, Multan in September 2023, it was observed that agricultural land measuring 17.21 acres was auctioned, for 05 years, on 17.05.2023 at Railway Station, Vehari. The highest bid of Rs 305,000 per acre offered by M/s Abid Hussain was approved by the Divisional Superintendent on 15.06.2023 and offer letter was issued on 16.06.2023. The bidder failed to deposit the remaining bid money of Rs 2.57 million within 07 days of approval of bid but applied for cancelation of bid by virtue of misunderstanding on lessee's part about rental charges. Railway administration made no decision on the fate of leased property although the possession of the property had been handed over to the lessee without observing codal formalities and realizing rental charges amounting to Rs 5.16 million. Audit observed that even after lapse of 106 days Railway administration neither recovered the remaining bid money nor forfeited the already deposited money Rs 2.57 million. This resulted in loss of Rs 7.73 million to PR on account of non-forfeiture of bid money of first highest bidder and non-offer to second highest bidder.

The matter was taken up with the management in December 2023 and discussed in DAC held on 25.01.2023. DAC directed the PO that amount pointed out by Audit be recovered and documentary evidence be furnished to Audit within 15 days. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-recovery of rental charges and non-vacation of land under intimation to Audit.

DP 12457

2.5.15 Non-realization of land lease charges from Airport Housing Society – Rs 25.05 million

According to Clause-1 of the agreement dated 24.04.2007 executed between Pakistan Railway and Airport Housing Society, the rental charges shall be paid yearly in advance on receipt of bill from Railway administration. The rental charges shall be reassessed after every three years according to market value at that time and the agreement shall be revised after every three years.

During audit of Property & Land Department, Rawalpindi in September 2023, it was observed that Pakistan Railways leased out 183.3 marla Railway land to Airport Housing Society, Rawalpindi for construction of road vide agreement dated 24.04.2007. Airport Housing Society paid one-year rental charges of Rs 1.02 million in advance on 16.02.2007. Subsequently, Railway administration failed to recover the annual lease charges for the period from July 2008 to June 2023. Moreover, the lease agreement was also not revised after every three years. This resulted in non-revision of agreement and non-recovery of rental charges of Rs 25.05 million.

The matter was taken up with the management in September 2023 and discussed in DAC meeting held on 29.12.2023. DAC directed the CPO to convey displeasure to the Joint Director/P&L who came unprepared for the meeting. DAC further directed the DG/P&L to submit reply within three days. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-revision of agreement and non-recovery of outstanding rent. Action be taken against those held responsible besides recovery of the amount involved. Contract and financial management controls be strengthened to avoid recurrence.

DP 12399

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19 & 2021-22 vide audit para No. 2.5.53 & 2.5.11 having financial impact of Rs 20.06 million. Recurrence of same irregularity is a matter of serious concern.

2.5.16 Loss of earnings due to non-construction of shops - Rs 12.67 million

As per para 7 (ii) of revised Railway Land Leasing Polices for construction of rail market on Railway land dated 12.12.2018, the rent will be deposited by lessee before the start of 7th month as a rent of six months.

During audit of the Property and Land Department, Quetta in September 2023, it was observed that one hundred and twenty (120) shops were demolished on request of Government of Baluchistan in 2018 for widening of Joint Road, Quetta. The Project Director, Quetta Development Package deposited Rs 550 million with PR in 2018 for construction of shops but shops had not been constructed despite lapse of five years. This resulted in loss of earnings of Rs 12.67 million to PR on account of rent of shops.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 25.01.2024. DAC directed the DG/P&L to expedite the construction work and share compliance report with the Audit. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-construction of shops and action be taken against those found at fault besides recovery of the amount involved. Internal controls regarding land management be strengthened to avoid recurrence.

DP 12552

2.5.17 Loss due to irrational fixation of benchmark for lease of shops - Rs 11.02 million

According to Para 807 of Pakistan Railway Code for the Engineering Department, all Railway land should be managed on commercial lines, and each Railway administration should endeavor to develop the resources of, and put to profitable use, any areas in its occupation which, though not eligible for disposal are lying idle and can be put to profitable use. Such land is referred to hereinafter as 'available' land.

During audit of the Property and Land Department, Sukkur in September 2023, it was observed that auction of 21shops at market No. 2 near Ayub Gate

Sukkur held on 19.09.2019 and highest bid of Rs 28.22 million was received which was delayed due to court cases by existing occupants. However, a fresh auction of these shops was held on 15.06.2023 and highest bid of Rs 17.20 million against 21 shops was accepted by the management. The benchmark for auction dated 15.06.2023 was fixed as Rs 800,000 per shop which was 47% below the benchmark of Rs 1,500,000 fixed in last auction dated 19.09.2019. This resulted in loss of Rs 11.02 million to PR due to irrational fixation of benchmark.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 02.01.2024. DAC showed displeasure over negligence and irregularities committed in the auction of 21 commercial shops. DAC constituted three-member inquiry committee comprising DG/Vigilance, DIG and CCFM to conduct inquiry within one month to fix responsibility and submit the report to the DAC. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irrational fixation of lesser benchmark. Action be taken against those held responsible besides recovery of the loss under intimation to Audit.

DP 12391

2.5.18 Irregular handing over of possession of land before auction -Rs 7.66 million

According to clause 1 of the Revised Policy for re-licensing of already constructed shops on Railway land dated 27.12.2020, the open auction shall be conducted for licensing the already constructed shops for a period of 05 years in transparent manner by advertising the shops in print and electronic media.

During audit of the Property & Land Department, Multan in September 2023, it was observed that PR management leased out fourteen (14) already constructed shops during the period from 2019 to 2021 in Bahawalpur and Bhakkar. Possession of the shops was handed over to the lessees even before commencement of auction proceedings. The auction proceedings were mere

travesty and comparative statements were fabricated to extend favor to specific individuals as evident from joint possession certificate endorsed by concerned Inspector of Works. Thus, fraudulent handing over possession of shops before auction proceedings made revenue of Rs 7.66 million suspicious. Further, the lease agreements were neither endorsed nor objected by senior management which tantamount to evasion of responsibility and exposed significant loopholes in internal control framework.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 16.01.2024. DAC nominated a fact finding inquiry committee comprises of J.D/P&L, Dy: DS/Multan and DAO/Multan to look into the matter and fix responsibility for the anomalies pointed out by Audit within three weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for commission of fraud and evasion of responsibility. Action be taken against those held responsible besides recovery of the loss. Internal controls regarding land management be strengthened to avoid recurrence

DP 12456

2.5.19 Extension in lease of defaulter lessee by extending undue favour - Rs 7.44 million

According to clause-4 of the agreement dated 21.04.2020, the licensee was bound to pay six months' rent in advance on expiry of every due period with grace period of one month. Further, clause-18 provides that late deposit would warrant imposition of penalty @ 2 % per month on the default amount. Any delay beyond

30 days would constitute breach liable to forfeiture of security money and termination of the contract or as deemed fit by the Divisional Superintendent (DS).

During audit of the Property and Land Department, Sukkur in September 2023, it was observed that marriage hall at Railway Swimming Pool, Sukkur was leased out to Mr. Asad Ali for a period of three years w.e.f. 06.01.2020. The lessee had not deposited lease charges of Rs 2.12 million for the period from 06.01.2020 to 05.01.2023 but the Railway management had not terminated the contract or imposed any penalty. Further, the DS Sukkur extended the lease period w.e.f. 06.01.2023 with occupancy charges of Rs 590,500 per month which was also not recovered from 06.01.2023 to 05.10.2023. This resulted in loss of Rs 7.44 million to PR due to extending undue favour to the defaulter lessee by the Railway management.

Furthermore, on 27.04.2023, a fresh auction was held and the highest bid of Mr. Muhammad Ali for Rs 6.31 million per annum was accepted on 30.05.2023. However, possession was not handed over as the old lessee had not vacated the site up to 05.10.2023 with the connivance of Railway management.

The matter was taken up with the management in November 2023 and discussed in the DAC meeting held on 29.12.2023. DAC directed the PO to file recovery suit against the contractors and blacklist them. DAC further directed the PO to review the extension of all defaulting contractors and conduct new auctions after terminating their contracts within one month. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for extension in lease period without recovery of outstanding rental charges from former lessee and non-handing over possession of marriage hall to the new successful bidder. Action be taken against those held responsible besides recovery of the amount from lessee or from employee responsible under intimation to Audit.

DP 12419

2.5.20 Loss due to non-handing over of Railway land to highest bidder – Rs 3.68 million

According to Para 807 of Pakistan Railway Code for the Engineering Department, all Railway land should be managed on commercial lines and Railway administration should endeavor to develop the resources of, and put to profitable use, any areas in its occupation which are lying idle and can be put profitable use. Further, Para 803, stipulates that Railway administration should preserve unimpaired the title to all land in its occupation and keep it free from encroachment.

During audit of the Property & Land Department, Lahore in November 2023, it was observed that 01 Kanal land was leased out to Mr. Noor Muhammad for stacking purpose vide agreement dated 26.06.2015 @ Rs 53,000 per year with 20% annual increase. The new auction was held on 09.06.2018 wherein Mr. Muhammad Boota was declared highest bidder @ Rs 515,000 per year. The bidder deposited the 50% bid money of Rs 275,000. The procession of land was not handed over to successful bidder and after 03 years his bid money was refunded on 20.08.2021. Thus, due to negligence and connivance of PR management, procession of land was not handed over to Mr. Boota in 2018 which resulted in loss of Rs 3.68 million to PR. Further, audit also observed that Rs 757,852 was recoverable from ex-lessee Mr. Noor Muhammad and land was still under his possession.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 25.01.2024. DAC showed displeasure over inaction at division and headquarters level. DAC constituted an inquiry committee

comprising DG/Vigilance and DG/P&L with the direction to furnish report within two weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-retrieval of land from ex-lessee and not handing over its possession to the new successful bidders. Action be initiated against those held responsible besides recovery of the loss from the ex-lessee or employee (s) found at fault under intimation to Audit.

DP 12498

2.5.21 Loss due to leasing of shops at lower rates – Rs 2.66 million

According to Para 1801 of General Code, means should be devised to ensure that every Railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part.

During audit of Property & Land Department, Multan in September 2023, it was observed that open auction for leasing constructed shops at Double Pattak, Multan was conducted on 30.04.2021. Two adjacent shops No.4 and 6 were leased out to Mr. Ilyas Ali at huge difference of rates i.e. Shop No. 6 was leased out at annual rent of Rs 60,000 and No. 4 at Rs 215,000. Audit also observed that another auction was held on 17.04.2023 for leasing of shop No. 7 & 8 at same location. The highest bids of annual rent ranging from Rs 63,500 to Rs 67,000 were received and accepted by PR management without considering the annual rent of shop No. 4 before fixation the benchmark. This reflected that due care was not exercised by the Divisional administration while leasing out of these shops and undue favour was extended to the lessees. Thus Pakistan Railways sustained a loss of Rs 2.66 million due to leasing of shops at lower rates.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 16.01.2024. DAC nominated a fact finding inquiry committee comprises of J.D/P&L, Dy DS/Multan and DAO/Multan to look into the matter, reassess the bench mark for auction and fix responsibility for the anomalies pointed out by Audit within three weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for negligence in fixation of benchmark. Action be taken against those found at fault besides recovery of the amount involved. Financial management controls be strengthened to avoid recurrence.

DP 12428

Note: The issue was also reported earlier in the Audit Report for Audit Year 2019-20 vide paras No 2.5.59, 2.5.84 having financial impact of Rs 640.47 million. Recurrence of same irregularity is a matter of serious concern.

Civil Works

2.5.22 Non-realization of revised cost of deposit work – Rs 135.90 million

According to Para 9 of the Chief Engineer/Open Line's notification dated 08.07.2008, it would be mandatory for sponsors that the entire estimated cost is deposited in advance and in case of part payment the tenders would not be invited and the period of completion would start from the date of full deposit of estimated cost. Further, Para 10 provides that the division will invite tenders only after approval of plan, sanction of estimate and deposit of funds.

During audit of following two formations in August 2023, it was observed that Railways management prepared estimate of Rs 144.33 million for deposit work of new siding at PAF Shahbaz Base, Jacobabad in January 2019. Following irregularities were observed;

- i. The sponsoring agency deposited an amount of Rs 132.74 million from February 2018 to October 2019. Railway management also reduced the cost of estimate to Rs 132.74 million in November 2019. The work was delayed due to which its cost increased to Rs 224.15 million as per revised estimate dated March 2023 but increased cost of Rs 91.41 million was not deposited by the sponsoring agency.

- ii. Establishment & maintenance charges of Rs 17.01 million were not revised and departmental charges of Rs 27.48 million were not included in the estimate.

This resulted in non-recovery of Rs 135.90 million from the sponsoring agency as detailed below:

(Rs in million)

SN	DP No.	Formation	Details	Amount
1	12344	Civil Engineering Department HQ	Non-recovery of increased cost of work	91.41
2	12334	Civil Engineering Department Sukkur	Non-inclusion of departmental charges	27.48
3	12320	Civil Engineering Department Sukkur	Non-revision of establishment & maintenance charges	17.01
Total				135.90

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 21.11.2023. DAC directed the PO to pursue the matter for recovery of remaining amount under intimation to Audit. Compliance of DAC directives was awaited.

Audit recommends that estimate of the work be revised by including revised costs of departmental, establishment and maintenance charges and increased cost be recovered from the sponsoring agency. Internal controls regarding deposit works and contract management be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No 2.5.79 having financial impact of Rs 1.34 million. Recurrence of same irregularity is a matter of serious concern.

2.5.23 Non-encashment of performance guarantee of contractors failed to complete the work - Rs 130.67 million

According to clause 5.1 and 10.4 of contract agreement executed between Pakistan Railways and Equinox (Pvt) Ltd for up-gradation of Bin Qasim Yard, the contractor would furnish an unconditional and irrecoverable Bank Guarantee (Performance Bond) representing 5% of the total contract amount. The Performance Bond shall be kept valid by the contractor till defect liability period and forfeited in case of contractor's default.

During audit of following three (03) formations in March and August 2023, it was observed that contractors failed to complete the works and to rectify the defects pointed out by Railway management. The bank guarantees and retention money amounting to Rs 130.67 million submitted by the contractors were not encashed/ forfeited by Railway management as the same had expired.

(Rs in million)

SN	DP No.	Formation	Details of irregularity	Amount
1	12258 12264 12437	Rehabilitation of Railway Assets Damaged during Riots of December 2007 Project	The contractor of up-gradation of Bin Qasim Yard failed to complete the work and defects valuing Rs 35.92 million pointed out by PR were not rectified. Performance Bond of Rs 66.38 million	120.91

			and retention money of Rs 54 million were not forfeited.	
2	12266	Project of Replacement of Old and Obsolete Signal Gear (LON-SDR)	Completion date of train dispatch office at Lahore station was 31.05.2018 but contractor failed to complete the work despite three extensions up to 31.12.2022. Bank guarantee of Rs 5.45 million and retention money of Rs 2.73 were not forfeited.	8.18
3	12378	Civil Engineering Department, Peshawar	The contractor of Improvement/ up gradation of Station Yard, Station Building, of Jahangira, left the work incomplete on 10.10.2023. The bank guarantee was expired on 10.02.2023 but was not got renewed and en-cashed.	1.58
Total				130.67

The matter was taken up with the management from September to December 2023. Against Sr. No.1, DAC in its meeting held on 02.01.2024, 23.01.2024 & 01.02.2024, constituted a fact finding inquiry committee comprising DG/Vigilance and FA&CAO/PR to probe the matter of non-submission of appeal in the appellate forum against the award given by the arbitrator against Pakistan Railways. Against Sr. No. 2, DAC in its meeting held on 01.02.2024 directed the CS&TE to immediately submit a compliance report against recovery of Rs 10.38 million. Against Sr. No. 3, DAC in its meeting held on 23.01.2024 directed the CEN/Open Line to ensure recovery of Rs 1.58 million from pending bills of the contractor and recovery particulars be shared with Audit. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-encashment of bank guarantees and retention money of contractors who failed to complete the works despite expiry of completion period. Internal controls regarding contract management be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2019-20 & 2021-22 vide paras No 2.5.46 & 2.5.36 having financial impact of Rs 7.72 million. Recurrence of same irregularity is a matter of serious concern.

2.5.24 Short/non-recovery of train detention charges - Rs 56.77 million

According to Para 6(iv) of instructions regarding execution of deposit works circulated by Chief Engineer, Open Line vide letter dated 08.07.2008, in case of temporary arrangements the detention to trains charges for the entire period of construction would be worked out and debited to the sponsors and included in the estimated cost.

During audit of following two formations of Civil Engineering Department in August 2023, it was observed that two deposit works regarding widening/conversion of three girder bridges between Kalanchwala - SamaSatta and construction of road underpass bridge at km 16/3-7 between Golra-Fathejang Railway Station on Golra Sharif-basal section (CPEC) were executed by PR during the period from 2020 to 2022 for Irrigation Department, Punjab and National Highway Authority respectively. The train detention charges were not charged and short charged as per actual train detention during of execution of works. This resulted in loss of Rs 56.77 million to PR due to non/short recovery of train detention charges from sponsoring agencies.

(Rs in million)

SN	DP No.	Formation	Sponsor	As per estimate	Actual Charges	Amount recoverable
1	12381	Civil Engineering Department, Multan	Irrigation Department Punjab	Nil	47.10	47.10

2	12432	Civil Engineering Department, Rawalpindi	National Highway Authority	16.99	7.02	9.67
Total						56.77

The matter was taken up with the management in November 2023. Against Sr. No.1, management replied that reconstruction of these bridges was requirement of Railways because the bridges were submerged; therefore, train detention charges were deleted from the estimate to keep the estimate within the deposited amount. The reply was not acceptable because estimate was required to be prepared before execution of work including train detention charges. Against Sr. No.2, DAC in its meeting held on 12.01.2024 directed the CEN/Open Line to submit a revised reply. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for non-recovery of train detention charges and non-inclusion of detention charges in estimate. Action be taken against those held responsible besides recovery of the amount involved either from sponsoring agencies or from those found at fault.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19 & 2021-22 vide paras No 2.5.53 & 2.5.69 having financial impact of Rs 24.06 million. Recurrence of same irregularity is a matter of serious concern.

2.5.25 Non-execution of maintenance agreements of upgraded level crossings – Rs 47.10 million

According to Para 2035 of Pakistan Railways Code for the Engineering Department, a formal agreement should be executed between the parties concerned before a deposit work is undertaken.

During audit of Civil Engineering Department, Rawalpindi in August 2023, it was observed that seven unmanned level crossings were upgraded to manned level crossings on the requests of provincial governments during 2016-17. However, PR had not executed agreements with sponsoring agencies for their operation and maintenance. Pakistan Railways incurred an amount of Rs 47.10

million on the maintenance and operation of these level crossings from January 2017 to June 2023 but the same had not been recovered from sponsoring agencies due to non-availability/execution of agreements. Thus, non-execution of agreements for operation and maintenance of upgraded level crossing resulted in loss of Rs 47.10 million to the PR.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 23.01.2024. DAC directed the CEN/Open Line to expedite the matter of recovery of Rs 47.10 million with provincial governments and make an action plan to streamline the recovery of operational & maintenance charges of level crossings timely. DAC further directed the CEN/Open Line and DS/Rawalpindi to expedite recovery under intimation to this forum.

Audit recommends that matter be taken up at higher forum of road owning authorities for signing of operation and maintenance agreements. Amount already incurred by the PR be recovered and contract management controls be improved to avoid recurrence.

DP 12382

2.5.26 Short recovery of land lease charges from CDA against deposit work – Rs 38.25 million

As per para 5(i) policy for leasing out the Railway land to government departments for construction of roads dated 11.11.2014, the lease period shall be 33 years with further extension of 33 years on the mutual consent of both the department. Further para 5 (ii) provides that the concerned government department shall be liable to pay 100% of the DC rate of the ongoing year as land lease charges in advance. In addition, the ground rent shall also be liable to pay in advance for the lease period 33 years @ 2 per Sft per annum.

During audit of Civil Engineering Department, Rawalpindi in August 2023, it was observed that Railway management requested the Capital Development Authority (CDA) in February 2020 to deposit estimated cost of Rs 96.65 million including land lease charges of Rs 76.50 million for 204 marlas of land regarding construction of road over bridge at Khayaban-e-Margala from G.T. road to sector D Islamabad. Subsequently, Railway management reduced the land lease charges

to Rs 38.25 million in violation of ibid policy. This resulted in short recovery of land lease charges of Rs 38.25 million from CDA.

The matter was taken with the management in December 2023 and discussed in DAC meeting held on 16.01.2024. DAC directed the DG/P&L to revisit the policy and chalk out plan for early recovery from the department and submit a revised reply within two weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired at an appropriate level to fix responsibility for less recovery of land lease charges in violation of policy. Action be taken against those held responsible besides recovery of the amount involved. Financial management controls be strengthened to avoid recurrence.

DP 12611

2.5.27 Non-imposition of penalty on incomplete portion of supply of ballast – Rs 28.45 million

Clause-12.1 of conditions of contract stipulates that if the contractor has not taken all practicable steps to remedy the default with fourteen (14) days after receipt of the employer's notice, the employer may by a second notice given within a further twenty-one (21) days, terminate the Contract and after termination the employer shall be entitled to a sum equivalent to twenty percent (20%) of the value of the works not executed.

During audit of following two formations of Civil Engineering Department in August 2023, it was observed that four contracts for supply of ballast worth Rs 163.54 million were awarded to contractors during 2021-22. The contractors made supply of ballast valuing Rs 21.30 million and stopped further supply for want of price escalation. The request of the contractors was not accepted by the management being not covered under the agreements; therefore, remaining ballast valuing Rs 142.24 million was not supplied by the contractors till August 2023. On default of the contractors, the Railway administration neither terminated the contracts nor recovered penalty of Rs 28.45 million (@ 20% of balance supply.

(Rs in million)

SN	DP No.	Formation	No. of Works	Total value of works	Value of Works executed	Value of works not executed	Penalty amount @20%
1	12326	Civil Engineering Department, Multan	03	145.557	14.145	131.412	26.28
2	12321	Civil Engineering Department Quetta	01	17.990	7.156	10.834	2.17
Total				163.547	21.301	142.246	28.45

The matter was taken up with the management in October 2023. Against Sr. No.1, DAC in its meeting held on 21.11.2023 directed the PO to immediately expedite the action and compliance report along with evidence may be submitted to Audit within two weeks. Against Sr. No.2, DAC in its meeting held on 29.12.2023 directed the CEN/OL to blacklist the contractor and his blacklisting should be informed across all Railways Divisions. Compliance of the DAC directives was awaited.

Audit recommends that matter may be inquired to fix responsibility for non-recovery of 20% value of unsupplied ballast according to the terms of the contracts and its recovery should be ensured. Contract management should also be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19 & 2019-20 vide paras No 2.4.75 & 2.5.37 having financial impact of Rs 14.67 million. Recurrence of same irregularity is a matter of serious concern.

2.5.28 Imposition of penalty for breach of agreement by PR – Rs 13.96 million

Para 1801 of Pakistan Railway General Code stipulates that means should be devised to ensure that every Railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained through fraud or negligence on his part.

During audit of the Civil Engineering Department, Sukkur in August 2023, it was observed that an open auction of 38 shops at Auto Plaza, Rohri held on 21.09.2016. The highest bid amounting to Rs 13.96 million of Syed Shafqat Ali Shah was approved on 16.02.2017 but Railway management failed to construct the shops. The bidder filed a suit in court of Civil Judge, Sukkur on 29.09.2021. The court ordered PR on 16.05.2022 to construct and handover the shops within four months otherwise a sum of Rs 27.93 million including penalty of Rs 13.96 million be paid to the bidder. In complete disregard to the orders of the court, the shops were not constructed and handed over to the successful bidder by PR. This resulted in loss of Rs 13.96 million to PR on account of penalty imposed by the court. This depicts negligence and slackness on the part of Railway management.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 02.01.2024. The DAC was informed that the department had challenged the decision of the civil court in High Court and next hearing date was fixed for 12.01.2024. Further, PR had not paid any penalty so far and no loss was sustained by the department. DAC directed the PO to hire the best RCL to contest the case in the best possible manner in favour of the department. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for inordinate delay in construction of shops and action be taken against those held responsible. Land and contracts management should be improved to avoid recurrence.

DP 12377

2.5.29 Less recovery of land lease charges from a sponsor - Rs 6.08 million

According to Clause 15 of the Policy for leasing out the Railway land to government department for construction of roads dated 20.05.2019 in case the request for construction of road on Railway land is received from private housing

society with the NOC from District administration or road authority, the same shall be referred to Secretary/Chairman Railways for approval by recommending 100% DC/Market value (commercial rate) whichever is higher as land lease charges and Rs 3 per Sft per annum as ground rent for five years in advance.

During audit of the Civil Engineering Department, Rawalpindi in August 2023, it was observed that the estimate No.150/21-22 dated 30.09.2022 of deposit work for construction of underpass at km 1374/6-7 on Lalamusa-Rawalpindi Section was framed on the request of CEO/Buraq City. The value of 43.43 marla land was required to be assessed at market rate of Rs 700,000 per marla whereas value of land was calculated on DC rate of Rs 560,000 per marla which was lesser than market rate. Thus, PR sustained loss of Rs 6.08 million due to less recovery of land lease charges from the sponsor due to poor contract management and non-observance of rules.

The matter was taken up with the management in August 2023 and also discussed in DAC in meeting held on 19.01.2024. DAC took a serious view of the irregularity and ordered a fact-finding inquiry committee comprising CNE/Open Line, COPS and DG/Vigilance. DAC directed to submit inquiry report within three weeks with proper recommendation and responsible officials/officers. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for less recovery of land lease charge in violation of policy in vogue and amount involved be recovered from the sponsor. Internal controls be strengthened to avoid recurrence.

DP 12620

2.5.30 Non-deduction of 25% shrinkage of pitching stone – Rs 5.31 million

According to Para 1227 of Pakistan Railways Code for Engineering Department, it is not usually convenient to record in measurement books detailed measurement of work done by contractor in connection with the working of pitching stone. Further, as per Joint Engineering, Accounts and Operating Circular No.1, deduction of shrinkage for pitching stone at 25% of the quantity be made.

During audit of the Civil Engineering Department Sukkur in August 2023, it was observed that a contract for embankment of PAF Siding Jacobabad including supply of 179,050 Cft pitching stone was awarded to M/s Muhammad Shafique Ahmed & Co. in September 2022. The contractor supplied 196,751 Cft pitching stone for which payment of Rs 21.25 million was made without deduction of shrinkage charges @ 25% of the quantity supplied. This resulted in loss of Rs 5.31 million to the PR due to non-deduction of shrinkage of pitching stone.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 02.01.2024. DAC directed the CEN/OL to submit the revised reply along with documentary evidence within one week. Compliance of DAC directives was awaited.

Audit recommends that amount involved be recovered from the contractor. Financial and contract management controls be strengthened to avoid recurrence.

DP 12315

2.5.31 Unauthorized excess issuance of material for sidings – Rs 4.90 million

According to Para 9 of the Chief Engineer/Open Line's notification dated 08.07.2008, it would be mandatory for sponsors that the entire estimated cost is deposited in advance and in case of part payment the tenders would not be invited and the period of completion would start from the date of full deposit of estimated cost.

During audit of Civil Engineering Department, Multan in August 2023, it was observed that:

- i. PR received Rs 5.49 million for repair of Military Siding, Rajput Nagar. However, material worth Rs 9.29 million was issued resulting in excess issuance of material valuing Rs 3.80 million. Later on, completion report was drawn on the basis of amount already received from sponsor instead of actual material issued to the Siding. The cost of excess material Rs 3.80 million was not recovered from sponsor.

- ii. Track material valuing Rs 1.09 million was issued irregularly for maintenance of private siding at Piranghaib without receipt of funds from the sponsor and without approval of competent authority.

This resulted in loss of Rs 4.89 million to PR due to unauthorized and excess issuance of material.

The matter was taken up with the management in October 2023 and also discussed in DAC meeting held on 21.11.2023. DAC directed the PO to submit comprehensive reply along with documentary evidence within two weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for unauthorized and excess issuance of material. Action be taken against those held responsible besides recovery of the amount involved either from the sponsoring agencies or from those found at fault.

DP 12337

Procurement Management

2.5.32 Misprocurement in violation of PPRA Rules – Rs 3,395.35 million

Para 3 of PPRA's letter dated 26.08.2022 clarifies that imposing the prerequisite of enlistment/registration of the bidder to participate in procurement process is not permissible under procurement regulatory framework. Since such practices defeat the spirit of principles of procurement and polarize the market, prevent new entrants, discourage competition. The National Accountability Bureau (NAB) after consultation with PPRA issued instructions vide letter dated 08.01.2014 that registration or enlistment of contractors by a procuring agency is not needed under PPRA Rules 2004 nor any charging of fee on this account is admissible and this practice should be stopped forthwith as it supports corrupt practices.

During audit of the project "Special Repair of 100 DE Locomotives (New)" in March 2023, it was observed that five (5) Tender Bulletins were issued from June 2020 to June 2022 for procurement of material on FOB and FOR basis. These

tenders were advertised on single stage two envelop method basis. It was mentioned in the eligibility criteria that only LP approved local firms and regular approved firms for FOB were allowed to participate. The whole process was in violation of PPRA rules and clarifications, which restricted the competition and resulted in irregular procurements. Thus, irregular procurement of material valuing Rs 3,995.35 million was made only from registered firms in violation of the rules *ibid*.

The matter was taken up with the management in April 2023 and discussed in DAC meeting held on 02.01.2024. DAC evaluated the reply of CME/Loco which affirms the practice/policy of Pakistan Railways regarding registration of firm. DAC directed the CME/Loco to get the clarification from the PPRA authorities. Compliance of DAC directives was awaited.

Audit recommended that matter be inquired to fix responsibility for restricting the competition irregularly and making irregular procurement against PPRA Rules. Action may be taken against the defaulter(s) and internal controls be strengthened to avoid recurrence.

DP 12278

2.5.33 Irregular award of contract and non-supply of material – Rs 329.90 million

In terms of Clause 20 of Special Terms & Conditions of Tender, the successful bidder will have to deposit the security money @ 5% of the total value of contract within 14 days from issuance of letter of acceptance. Further, Clause 7 (c) provides that bid security shall be forfeited if the successful bidder fails to submit performance security within specified period. Furthermore, Clause 9 (iii) of the purchase order provides that the warranty shall be valid for 12 months from date of receipt of last supply of material. Inspectors (AENs) will be appointed as member of inspection committee for different lots to ensure quality of material.

During audit of the Chief Controller of Purchases in August 2023, it was observed that contract for procurement of 15,000 Wooden Sleepers (56,250 Cft) valuing Rs 310,500,000 and 50,000 kg Coal Tar Creosote valuing Rs 19,400,000 was awarded to M/s I. Trade Karachi vide Purchase Order dated 26.05.2022. Following irregularities were observed:

- i) Acceptance letter was issued to contractor on 25.02.2022 whereas performance security was submitted by contractor after a period of more than two months instead of 14 days. The bid should have been cancelled after forfeiture of bid security.
- ii) The contractor supplied only 2,284 sleepers (15%) valuing Rs 47.26 million within delivery period i.e. 25.05.2023. However, Railway management neither terminated the contract by forfeiture of security deposit nor extended the delivery period with imposition of LD charges amounting to Rs 14.48 million. Moreover, the bank guarantee of Rs 16.49 million submitted by the firm was expired but same was not got renewed.
- iii) The supplied wooden sleepers were inspected by one AEN whereas different inspectors were required to be appointed for each lot as per purchase order.

This resulted in irregular award of contract valuing Rs 329.90 million in violation of terms & conditions of tenders besides loss to PR on account of non-recovery of LD charges and non-renewal of bank guarantee.

The matter was taken up with management in December 2023 and discussed in DAC meeting dated 01.02.2024. DAC directed the CCP to submit revised reply along with supporting documents within three days. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular award of contract and non-renewal of bank guarantee causing loss due to non-supply of material. Procurement and contract management controls be improved to avoid recurrence.

DP 12472

2.5.34 Non-forfeiture of performance guarantee and commission of contractor due to defective functioning of Electric Arc Furnace –Rs 124.80 million

Clause 8 of Purchase Order No. 15/0046/00-0/1-2017 dated 07.03.2018 for Supply, installation and commissioning of Electric Arc Furnace provides that in case of warranty replacement/short shipment, freight, custom duty/sales tax, charges will be paid/recovered from the firm M/s Trans Globe. PR will be at liberty to deduct the outstanding/recoverable amount from any payment from firm due from Railways or through encashment of Bank Guarantee/CDR or any other financial document available with Railway against security deposit, earnest money etc.

During audit of Steel Shop Mughalpura in November 2023, it was observed that the work for installation and commissioning of Electric Arc Furnace costing USD 1,480,560 was not completed as per terms and conditions of purchase order. The workshop management pointed out certain deficiencies in supply, installation and commissioning in August 2023. Resultantly, the Electric Arc Furnace was not properly operational due to contractor's fault despite lapse of five years. The Railway management had neither taken steps for proper functioning of furnace nor performance guarantee of Rs 41.60 million and commission Rs 83.20 million were forfeited.

The matter was taken up with the management in November 2023 and discussed in DAC meeting dated 01.02.2024. DAC directed the CCP to submit revised reply along with supporting documents within three days Compliance of DAC directives was awaited.

Audit recommends that matter be inquired at appropriate level for non-rectification of deficiencies in supply, installation and commissioning of electric arc furnace. The shortcomings be corrected by forfeiting the available security deposits of contractor.

DP 12525

2.5.35 Fudge payment on procurement of imported spare parts and non-receipt of material – Rs 102.95 million

According to POO 580 dated 27.01.2016 and POO 582 dated 10.10.2017, Letter of Credit (LC) would be established on Original Equipment Manufacturer (OEM), however in special cases it would be established in the name of authorized principal of manufacturer on the recommendation of tender committee. In this scenario firm would submit manufacturer compliance certificate along-with shipping documents to the bank at the time of LC negotiation.

During audit of Railway Constructions Pakistan Limited (RAILCOP) in March 2023, it was observed that Ballast Cleaning Machine (BCM) along with spare parts was procured from Plasser & Theurer, Austria in 2016. RAILCOP management prepared a purchase requisition on 25.03.2021 for procurement of spare parts for BCM valuing Rs 102.95 million through LC-39 in 2022. Audit observed that no LC was opened by RAILCOP and spare parts were purchased from a local supplier M/s Waris International. Further, audit verification revealed that alledged newly procured material was not found in the store of Track Machine Shop at Raiwind rather spare parts purchased in 2016 were available. The review of record revealed that 73% inventory was available in the store at the time of new procurement and only 27% of inventory was consumed during last 5 years. Moreover, manufacturer compliance certificate and shipping documents showing authenticity of procurement were not available on record. This resulted in fudge payment against already available spare parts of Ballast Cleaning Machine amounting to Rs 102.95 million.

The matter was taken up with the management in December 2023 and discussed in the DAC meeting held on 30.01.2024. DAC directed the MD/Railcop to resubmit the reply in the light of discussion held during the para within one week. Further, DAC directed DG/Vigilance to conduct a fact finding inquiry and submit report within one month. Compliance of DAC directives was awaited.

Audit recommends that matter be investigated to fix responsibility for fudge payment to a contractor without receipt of material and amount of loss be recovered from the defaulter(s). Procurement management controls be improved to avoid recurrence.

2.5.36 Irregular expenditure in violation of PPRA rules – Rs 64.76 million

Rule 9 of the Public Procurement Regularity Authority (PPRA) Rules-2004, provides that a procuring agency shall announce in an appropriate manner all proposed procurements for each financial year and shall proceed accordingly without any splitting or regrouping of the procurements so planned.

During audit of two formations of PSDP Projects instances of splitting of purchases worth Rs 64.76 million in violation of PPRA rules were observed. It was also observed that splitting of purchases was done to avoid the approval and concurrence of higher authorities.

(Rs in million)

SN	DP No	Formation	Description	Amount
1	12160	“Special Repair of 100 DE Locomotives (New)”	Locomotive spare parts	59.41
2	12223	Project of re-commissioning of 05 accidental locos	Locomotive spare parts	5.35
Total				64.76

The matter was taken up with the management in August and September 2023 and discussed in DAC meetings held on 19.09.2023 and 17.10.2023. DAC directed the PO to submit a comprehensive reply along with documentary evidence within one week. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for splitting up of procurements of similar nature resulting in mis-procurement. Irregular expenditure be got regularized from the concerned forum, and Internal controls be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20 & 2020-21 vide paras No 2.4.17, 2.5.44 & 2.5.6 having financial impact of Rs 510.04 million. Recurrence of same irregularity is a matter of serious concern.

2.5.37 Loss due to non-receipt of imported parts despite advance payment – Rs 25.60 million

As per Article-4 of contract agreement-2016 executed between Pakistan Railways and Equinox (Pvt) Ltd regarding terms of payment, the total contract price shall be paid to the contractor as per the invoices submitted according to the respective scope of work as detailed in Appendix-I and allowing partial payments against partial delivery /shipment and services.

During the audit of project, “Rehabilitation of Railway Assets Damaged during Riots December 2007”, it was observed that a contract was awarded to Equinox (Pvt) Ltd for procurement of imported material on FOB basis for up-gradation of Bin Qasim Yard including all new signaling works and provision of communication with adjacent stations in 2016. As per Appendix-1 (bill of quantities) 08 sets of Axle Counter Block Section (Imported) were required to be supplied by Equinox. However, only 04 sets were received and installed and balance quantity of 04 sets was not provided but payment had been made. Resultantly, PR suffered loss of Rs 25.60 million on account of excess payment to Equinox due to non-supply of desired quantity as per BoQ.

The matter was taken up with the management in September 2023 and discussed in DAC meeting held on 17.10.2023 directed the PO to submit comprehensive revised reply within one week to Audit. Compliance of DAC directives was awaited.

Audit recommends that matter be taken up with the contractor for supply of material without further delay otherwise punitive action be taken against them as per provisions of the agreements. Contract management controls be strengthened to avoid recurrence.

DP 12212

2.5.38 Installation of defective weighbridge – Rs 19.20 million

As per Clause 3.1 of bidding documents, the manufacturer/supplier shall guarantee the weighbridge components regarding appropriate and safe design, material, and workmanship and for satisfactory performance for a period of 18 months from date of installation in the track or 24 months from date of shipment, whichever is earlier. Further, Clause 3.2 provides that the manufacturer/supplier shall provide warranty for carrying out repair free of cost or by replacing the parts which became defective during warranty period.

During audit of the Pakistan Railways Freight Transportation Company (PRFTC) in March 2023, it was observed that contract for supply, installation, commissioning, operating and maintenance of computerized weighbridge (Dynamic System) at Begmaji (Rohri) with cost of Rs 34.38 million was awarded to M/s Hussain Corporation on 16.06.2021. The contractor installed the weighbridge on 26.02.2022 and conducted seven trials that gave imperfect weight measurement. However, an amount of Rs 19.20 million (60% of bid value) was paid to the contractor in April 2022 despite the fact that the weighbridge was not working properly. After lapse of eight (8) months, PRFTC terminated the contract on 02.12.2022. This resulted in loss of Rs 19.20 million to the PRFTC due to installation of defective weighbridge.

The matter was taken up with the management in September 2023 and discussed in DAC meeting held on 12.09.2023. DAC was informed that an amount of Rs 10.50 million had been recovered from the contractor and remaining amount would be recovered from his payments against other works. DAC directed the PO to get the recovered amount verified from Audit within one week and balance amount be recovered latest by 30.09.2023. Compliance of DAC directives was awaited.

Audit recommends that documentary evidence in support of already recovered amount be provided and efforts be made to recover the balance amount under intimation to Audit.

DP 12220

2.5.39 Loss due to award of contract at higher rates – Rs 18.18 million

Rule 4 of PPRA Rules 2004 provides that procuring agencies while engaging in procurements shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value of money to the agency and the procurement process is efficient and economical.

During audit of the Chief Controller of Purchases in August 2023, it was noticed that tenders dated 06.12.2019 for procurement of two overhead cranes were not finalized within bid validity and same were purchased at higher rate, from the same bidder, through subsequent tender. Further, it was observed that tenders dated 11.03.2021 for procurement of ten DG Sets were not finalized at the first instance on the plea of higher rate, however same were purchased through subsequent tenders at higher rates.

(Rs in million)

SN	DP No.	Items	Qty	1 st Tender		2 nd Tender		Amount
				Rate	Date	Rate	Date	
1	12322	Overhead Cranes	02	31.42	06.12.2019	36.20	09.04.2021	9.55
2	12342	DG Sets	10	2.39	11.03.2021	3.25	01.10.2022	8.63
Total								18.18

This resulted in loss of Rs 18.18 million to Pakistan Railways due to delay in finalization of tender case of overhead cranes and unjustified dropping of first tenders of DG sets.

This matter was taken up with the management in October 2023 and discussed in DAC meeting held on 21.11.2023. DAC was not satisfied with management reply and directed the PO to submit revised reply within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed and action be taken against those held responsible for non-finalization of tenders in time which caused loss to the PR. Internal controls regarding procurement management be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20 & 2022-23 vide paras No 2.5.59, 2.5.87, 2.5.59 having financial impact of Rs 7,376.80 million. Recurrence of same irregularity is a matter of serious concern.

2.5.40 Unjustified acceptance of unsuitable material – Rs 16.65 million

Clause 3.2 of the Purchase Order No. 3CF/4P/0700/2021 dated 23.11.2021 provides that all ways and means would be used for inspection of the material to certify that the material is in conformity with specifications/ standards/designs mentioned in the purchase order. Further, as per Clause 9 of the enclosure to the above Purchase Order, the seller warrants that material would be in accordance with the particulars mentioned in the Purchase Order.

During audit of the project Special Repair of 600 Coaches and 1200 Bogie Wagons in March 2023, it was observed that 181 sets of Rubber Bulge valuing Rs 16.65 million were procured from M/s Pak Alliance, Lahore vide Purchase Order No. 3CF/4P/0700/2021 dated 23.11.2021. The material was tested by the Chief Chemist & Metallurgist, Lahore and reported that the Average Shore Hardness was 67 against minimum requirement of 70. This indicated that material was unsuitable but the same was accepted by Railway management. This resulted in acceptance of unsuitable material valuing Rs 16.65 million by extending undue favour to the contractor.

The matter was taken up with the management in August 2023 and discussed in DAC meeting held on 05.09.2023. The DAC directed the PO to submit comprehensive reply along with documentary evidence within one week. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for acceptance of material not conforming to Railway specifications. Internal controls regarding procurement be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22, 2022-23 vide paras No 2.4.65, 2.5.90, 2.5.24, 2.5.25, 2.5.9, 2.6.12, 2.5.9 having financial impact of Rs 326.66 million. Recurrence of same irregularity is a matter of serious concern.

2.5.41 Non/short recovery of performance security – Rs 14.65 million

According to Chief Engineer/Open Lines Letter No. 128-W/ 0/24/PT-II(W-I) dated 09.02.2017, 10% performance guarantee of works having face value more than Rs 10 million was required to be recovered from the contractor in the shape of CDR or bank guarantee as per standard specimen of PEC.

During audit of the Civil Engineering Department, Sukkur in August 2023, it was observed that four works of supply, stacking and loading into Railway wagons 2” size mechanically crushed stone ballast at Khanpur, Walhar, Sadiqabad and Sukkur valuing Rs 200.57 million were awarded to different contractors from April 2022 to July 2023. All the contracts had value more than Rs 10 million but performance security @ 10% was not obtained. In two cases, performance guarantee was obtained @5% and in remaining two cases no guarantee was obtained. This resulted in short/ non-recovery of performance guarantee of Rs 14.65 million due to non-observance of rules.

The matter was taken up with the management in October 2023 and discussed in the DAC meeting held on 12.01.2024. DAC directed the CEN/Open Line to resubmit a reply and reconcile the amount with Audit. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for short/non-recovery of performance guarantee and amount of performance guarantee be recovered from the contractors. Internal controls regarding contract and procurement management be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21, 2021-22, 2022-23 vide paras No 2.4.72, 2.5.28, 2.5.5,

2.5.36, 2.5.38 having financial impact of Rs 216.08 million. Recurrence of same irregularity is a matter of serious concern.

2.5.42 Irregular award of a civil work without open competition – Rs 14.09 million

According to Rule 20 of Public Procurement Rules - 2004, the procuring agencies shall use open competitive bidding as the principal method of procurement for the procurement of goods, services and works.

During audit of the Civil Engineering Department, Multan in August 2023, it was observed that Railway management awarded a contract for widening/conversion of bridges No. 131, 131A and 131B along with permanent raising of track between Kalanchwala and Samasatta Railway stations for Rs 136.98 million to M/s Techno Time Construction in January 2022. During execution of work, another work for providing temporary diversion of double track valuing Rs 14.09 million was also awarded to the same contractor in December 2022 without open competition through addendum slip. This resulted in irregular award of a civil work valuing Rs 14.09 million without open competition.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 21.11.2023. DAC directed the CEN/Open Line to resubmit a reply based on the discussion held. Compliance of the DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for award of work without open competition, in violation of PPRA Rules-2004 and action be taken against the defaulter(s). Internal controls regarding contract and procurement management be strengthened to avoid recurrence.

DP 12328

2.5.43 Irregular award of cash collection contract – Rs 7.73 million per annum

According to Rule 31 (1) no bidder shall be allowed to alter or modify his bid after the bids have been opened. However, the procuring agency may seek and accept clarifications to the bid that do not change the substance of the bid. Rule 40 (1) also provides that without changing the cost and scope of work or services, the

procuring agency may negotiate with the successful bidder with a view to streamline the work or task execution, at the time of contract finalization.

During audit of the Pakistan Railway Advisory and Consultancy Services (PRACS) in March 2023, it was observed that cash collection contract of Rahman Baba Express was awarded to Silk/Emaan Islamic Bank for Rs 7.73 million per annum which was irregular due to following reasons:

- i. Tender was advertised on 09.10.2022 without formulating and issuance of bidding documents to the bidders. Minutes of pre-bid conference were not available on record in clear violation of PPRA rules *ibid*.
- ii. In violation of PPRA rules, the bid offered by Silk / Emaan Islamic Bank was altered from Rs 800 per outlet to Rs 650 per outlet.
- iii. The bank was not collecting cash from all the designated points as per MOU and booking agencies were depositing the cash into Allied bank at their own. Further, the bank was also not collecting cash on daily basis and in certain cases cash was deposited in to Allied bank instead of Silk bank by the security companies nominated by the bank for cash collection. This made the whole process of cash collection risky and cumbersome. No action was taken by the management against the bank for violation of MOU.

The matter was taken up with the management in December 2023 and discussed in the DAC meeting held on 30.01.2024. DAC directed the MD/PRACS to collect all the relevant documents from Audit and resubmit reply along with documentary evidence to Audit. Compliance of the DAC directives was awaited.

Audit recommends that responsibility be fixed for irregular award of contract without observance of PPRA rules and violation of MOU by bank. Action be taken against those held responsible besides regularization of contract from competent forum.

2.5.44 Short and defective supply of material - Rs 5.88 million

Para 316 (a) of Pakistan Railways Code for the Accounts Department provides that the amounts due to Pakistan Railways for services rendered, supplies made, or for any other reason, are correctly and promptly assessed and recovered as soon as they fall due.

During audit of Railway Constructions Pakistan Limited (RAILCOP) in March 2023, it was observed that M/s RAILCOP executed an agreement dated 25.02.2022 with M/s MI Enterprises for supply of 600 metric ton 3mm Mild Steel Shuttering at Marshaling Yard Pipri, Karachi. RAILCOP made 100% advance payment of Rs 6.97 million from March to May 2022 but contractor delivered only 300 metric ton shuttering and remaining 300 metric ton valuing Rs 3.48 million was not supplied. Further, the same contractor supplied 3,200 Y Angles worth Rs 2.40 million on 18.03.2022, which were returned by RAILCOP being substandard. Security money of the contractor Rs 2.25 million was released but replacement of defective material was not received. This indicated that unjustified payment of Rs 5.88 million was made to the contractor against short and defective supply of material due to negligence of management and weak internal controls.

The matter was taken up with the management in August 2023 and discussed in DAC meeting held on 05.09.2023. DAC took serious view of the issue and directed the PO to strengthen internal controls. DAC further directed pursue the case with FIA vigorously and recoveries be made. Compliance report along with documentary evidence be submitted to Audit within one month. Compliance of the DAC directives was awaited.

Audit recommends that responsibility be fixed for making unjustified 100% advanced payment. Action be taken against those held responsible besides recovery of the amount involved either from the contractor or from the person found at fault.

DP 12194

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22 vide paras No 2.4.15, 2.5.36, 2.5.22 & 2.5.22 having financial impact of Rs 465.97 million. Recurrence of same irregularity is a matter of serious concern.

2.5.45 Unauthorized amendments in bid after opening of LC - Rs 4.76 million

In terms of clause 18 of the terms & conditions of tender No. 15/0010/00-0/1-2021 dated 09.11.2021, the bidder must supply the warranty certificate (in original), from the manufacturer along with technical bid. Clause 6 further stipulates that 100 % FOB value of the order shall be paid to the manufacturer through a confirmed and irrevocable Letter of Credit (LC). However, on recommendation of tender committee, the LC can be opened in the name of authorized principal of manufacturer.

During audit of the Chief Controller of Purchases Lahore in August 2023, it was observed that a single bid of M/s Tecno worldwide Impex Lahore for supply of Probe Search Units for Ultrasonic Flaw Detector Rail Tester was accepted without original warranty certificate of the manufacturer. LC valuing Rs 4.76 million (JPY 3,133,104) was opened on 14.06.2022 wherein, warranty certificate was modified on the request of the firm as 'warranty certificate from manufacturer/principal'. Purchase order dated 01.03.2022 was opened in the name of manufacturer "Tokyo Keiki Rail Tecno Inc Tokyo Japan" but same was irregularly modified in the name of principal "Ogawa Seiki Co. Ltd. Tokyo Japan". Moreover, original delivery period was 31.08.2022 but contractor failed to supply the material up to 31.10.2023. This resulted in irregular acceptance of defective bid of material valuing Rs 4.76 million in violation of tender conditions.

The matter was taken up with the management in December 2023 and discussed in DAC meeting dated 01.02.2024. DAC directed the CCP to submit revised reply along with supporting documents within three days. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular acceptance of defective bid and amendments made after opening of LC. Internal controls regarding procurement management be strengthened to avoid recurrence.

2.5.46 Excess payment to the contractor for unexecuted work – Rs 3.91 million

According to Composite Schedule of Rates (Sukkur Division) 2016 item 5.7.1 (a) (ii) regarding reinforced/pre-stressed concrete, the rates included rendering surface smooth and plastering done for making up all surfaces after removing centering. If plastering for smoothing surface was not done the rate be reduced by 10%.

During audit of Civil Engineering Department, Sukkur in August 2023, it was observed that work regarding reinforced/pre-stressed concrete for construction of four RCC Box Culvert Bridges on PAF Siding, Shahbaz Air Base Jacobabad, was executed without plastering for smoothing surface. However, payment was made to the contractor @ Rs 343 per Cft instead of 10% reduced rate of Rs 308.70 per Cft. This resulted in excess payment of Rs 3.91 million to the contractor due to weak internal controls and slackness of management.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 21.11.2023. DAC directed the Audit to reexamine the reply submitted by the CEN/Open Line. In compliance of DAC directives, Audit reexamined the matter and was of the view that plastering was not done; therefore, payment was required to be made at reduced rates mentioned in the CSR 2016.

Audit recommends that matter be inquired to fix responsibility for excess payment to the contractor and amount in question be recovered from the contractor. Internal controls regarding contract management be strengthened to avoid recurrence.

DP 12343

Note: The issue was also reported earlier in the Audit Report for Audit Year 2021-22 vide para No 2.5.21 having financial impact of Rs 38.37 million. Recurrence of same irregularity is a matter of serious concern.

Inventory and stores management

2.5.47 Non-Disposal of Scrap/released material - Rs 4,681.66 million

Para 2403 of Pakistan Railways Code for the Stores Department provides that the Store Department should arrange for the regular collection of all scrap from consuming departments and for its disposal to the best advantage of the Railways. If scrap is to be disposed-off by public auction, arrangements should be made for its collection at convenient points for the purpose of such sales.

During audit of eleven (11) different formations of Pakistan Railways from September to December 2023, twelve (12) cases of accumulation of scrap and released material were observed. This indicated that scrap/released material was not disposed of due to poor management which resulted in blockage of capital amounting to Rs 4,681.66 million (**Annexure-7**).

The matter was taken up with the management in August to November 2022 and discussed in DAC meetings held on 21.11.2023 17.10.2023 and 05.01.2024. DAC directed the POs to ensure effective material management at central and divisional level. DAC further directed the PO to submit revised reply supported with documentary evidence. Compliance of DAC directives was awaited.

Audit recommends that action for proper disposal of scrap be taken. Responsibility for unnecessary retention of scarp be fixed and remedial measures be adopted to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22 & 2022-23 vide paras No 2.4.39, 2.5.57, 2.5.29 & 2.5.18 having financial impact of Rs 3,536.86 million. Recurrence of same irregularity is a matter of serious concern.

2.5.48 Excessive procurement and non-consumption of material – Rs 224.72 million

According to Para 2217 of Pakistan Railways Code for the Stores Department, items of stores which have not been issued from stock for Railway

consumption for the period of two years will be declared as surplus stock. Further, Para 2233 stipulates that the Stores Department of Railway should be organized to deal effectively with the disposal of surplus stock, either by sale or issue, or transfer to other Railways.

During audit of the Mechanical Department, Workshops Division Mughalpura, Lahore in September 2023, it was observed that material valuing Rs 192.73 million was lying unutilized in Carriage & Wagons and Loco Depots for the period ranging from 24 to 414 months. Further, it was observed that material valuing Rs 31.99 million was available above maximum limit. This indicated that material was purchased in excess of requirements and subsequently not utilized due to poor inventory management which resulted in blockage of capital Rs 224.72 million.

(Rs in million)

SN	Description	Material lying from 24 to 414 months	Material above maximum limit	Total
1	Carriage and Wagons Depots	83.22	0.83	84.05
2	Loco Depots	109.51	31.16	140.67
Total		192.73	31.99	224.72

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 01.02.2024. DAC showed displeasure on the ignorance and time over run in handling this issue and ordered a fact finding inquiry

by DG/Vigilance, FA&CAO/PR and CCP and submit the report within one month. Compliance of DAC directives was awaited.

Audit recommends that action be taken for blockage of capital due to excessive and above maximum procurement of material. A policy should be framed for surplus material. Action be taken for beneficial consumption of material and inventory management be improved to avoid blockage of capital.

DP 12559

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22, 2022-23 vide paras No 2.4.43, 2.5.22, 2.5.28 & 2.5.19 having financial impact of Rs 1,870.74 million. Recurrence of same irregularity is a matter of serious concern.

2.5.49 Non-replacement of defective material – Rs 102.44 million

According to Para 761 of Pakistan Railways Code for the Stores Department, stores should be checked with the standard specifications or drawing on which the order is based. Further, Clause 12.5 of the Maintenance Contract No. PR/DEL Maintenance/2017 dated 15.07.2017 provides that warranty replacement will be arranged by the seller at the earliest but not later than 90 days.

During audit of the following four (04) formations from March to September 2023, it was observed that spare parts of rolling stock valuing Rs 102.44 million supplied by the contractors were found defective after fitment during 2018 to 2023. PR management failed to get replacement of defective material, till finalization of Audit Report, despite lapse of considerable period of time.

(Rs in million)					
SN	DP No.	Formation	Description of material	Period	Amount

1	12323	Chief Controller of Purchase	Spare parts of locomotives	March 2020 to May 2023	49.42
2	12537	Mechanical Department Workshops Mughalpura	Primary Vertical Oil Dampers	2018 to 2020	37.65
3	12538	Mechanical Department, Workshops Division, Mughalpura	Spare parts of locomotives	April 2019 to Dec 2022	12.07
4	12142	Project “Special Repair of 100 DE Locomotives (New)”	Spare parts of locomotives	2020-21	3.30
Total					102.44

The matter was taken up with the management in July to December 2023. Against Sr.No.1, 2 & 3 DAC in its meetings held on 21.11.2023 & 01.02.2024 directed the PO to submit revised reply along with documentary evidence within one week. Against Sr.No.4, DAC in its meeting held on 05.09.2023 directed the PO to ensure replacement of defective material within warranty period. The PO should ensure that corrective measures had been taken to resolve such issues in a timely manner and compliance report be submitted to Audit within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for delay in getting replacement of material. The defective material be got replaced without further delay and procurement management be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21, 2021-22, 2022-23 vide paras No 2.4.70, 2.5.16, 2.5.7,

2.5.30 & 2.5.20 having financial impact of Rs 2,353.31 million. Recurrence of same irregularity is a matter of serious concern.

2.5.50 Blockage of capital due to unnecessary production of track material – Rs 39.63 million

According to Para 807 of Pakistan Railways General Code, every public officer should exercise the same vigilance in respect of expenditure incurred from government revenues as a person of ordinary prudence would exercise in respect of the expenditure of his own money.

During audit of Railway Constructions Pakistan Limited (RAILCOP) in March 2023, it was observed that 11 items of track material valuing Rs 39.63 million manufactured in the Track Workshop Raiwind were not issued since September 2018. RAILCOP manufactured track material in Track Workshop Raiwind on the demand of Pakistan Railways. However, non-issuance of manufactured material despite lapse of more than five years indicated that these items were manufactured without any demand. This resulted in blockage of capital of Rs 39.63 million due to unnecessary production of material.

The matter was taken up with the management in September 2023 and discussed in the DAC meeting held on 12.01.2024. DAC directed the MD/Railcop & CEN/Open Line to examine the conditions that led to production which could not be utilized despite laps of four years which predicts that the order was made without rational analysis.

Audit recommends that matter be inquired to fix responsibility for unnecessary production of material. Action be taken against those held responsible and internal controls regarding inventory and contract management be strengthened.

DP 12262

Revenue Management

2.5.51 Irregular booking of goods without verification of weight

Para 15.2 of Pakistan Railway Commercial Manual stipulates that when the weight of a consignment had already been declared by senders on the Consignment Note such declaration should invariably be tested by weighing it. Para 15.5 further provides that at station provided with weighbridge the whole of the consignment or wagon load should be weighed.

During audit of following two formations in February 2023, it was observed that goods were booked from Karachi Bunder, Karachi City and Port Bin Qasim stations on the basis of weightment sheets of private weighbridges without verification by Railway officials. Freight charges were also calculated on the basis of unverified weightments due to which chances of under weightment could not be ruled out. Thus, irregular booking of goods without verification of weightment by Railway officials made the freight charges of Rs 13,875.37 million unauthentic.

(Rs in million)

SN	DP No.	Formation	Period of	Amount
1	12282	Station Superintendent Port Bin Qasim Station Karachi	July 22 to June 23	12,575.62
2	12169	Commercial & Transportation Department Karachi	July 22 to January 23	1,299.75
Total				13,875.37

The matter was taken up with management in August 2023. Against Sr.No.1, DAC directed the CCFM and CMM to take course corrective measures within one week and submit a comprehensive reply with supporting documents. Against Sr.No.2, DAC in its meeting held on 19.09.2023 directed the inquiry committee headed by Dy: COPS/Power, Dy: CEE and Dy: CEN/Track to conduct inquiry within two weeks. DAC further directed the Railway administration to take measures to avoid such practices in future. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for irregular booking of freight on the basis of unverified weightment sheets and suitable action be taken against the defaulters. Internal controls be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No. 2.5.96 having financial impact of Rs 2,070.67 million. Recurrence of same irregularity is a matter of serious concern.

2.5.52 Loss due to non-imposition of penalty to contractors – Rs 805.20 million

As per clause 3.1.1 and 3.1.2 of the agreement executed between Pakistan Railways and M/s Irfanullah and M/s Ocean Mark, the later will endeavor to transport six trains per month of containers from Karachi Port and Port Muhammad Bin Qasim to Azakhel Dry Port. In case of their failure to transport minimum 120 TEUs Containers per month, penalty charges per wagon should be recovered as short transportation charges on levied rates from FDA.

During audit of Karachi Bunder Dry Port in March 2023, it was observed that M/s Ocean Mark and M/s Irfanullah failed to provide 06 trains per month. The contractors failed to provide the committed freight business as per provision of the agreements but penalty clause regarding short transportation was not invoked. Thus, PR suffered loss on account of non-imposition of penalty amounting to Rs 805.20 million on account of short transportation by the contractors during July 2021 to January 2023.

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 30.01.2024. DAC directed the CMM to submit comprehensive reply in consultation with DS/Karachi within one week. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for not invoking penalty clause of the agreements despite failure by of the contractors to provide committed freight business. Action be taken against the defaulters and implementation of agreements be improved to avoid recurrence.

DP 12478

2.5.53 Loss of earnings due to non-auction of surplus sites – Rs 610.94 million

According to Para 807 of Pakistan Railway Code for the Engineering Department, all Railway land should be managed on commercial lines, and each Railway administration should endeavor to develop the resources of, and put to

profitable use, any areas in its occupation which, though not eligible for disposal are lying idle and can be put to profitable use. Such land is referred to hereinafter as 'available' land.

During audit of six (06) different formations from March to September 2023, it was observed in nine (09) instances of surplus sites which included vending stalls, parking stand, shops and godowns etc. remained un-auctioned from 2013 to 2023. This resulted in loss of potential earnings of Rs 610.94 million due to negligence of PR management (**Annexure-8**).

The matter was taken up with the management in July to December 2023 and discussed in DAC meetings held on 19.09.2023, 17.10.2023, 02.01.2024 and 25.01.2024. DAC took serious view of the delay in processing the auctions. DAC directed the POs to submit comprehensive reply supported with documentary evidence within one week. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility for non-auction of surplus sites despite lapse of up to ten years. Efforts be made for the auction of surplus sites without further delay and property & land management be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19 and 2019-20 vide paras No. 2.4.60 and 2.5.83 having financial impact of Rs 1,257.83 million. Recurrence of same irregularity is a matter of serious concern.

2.5.54 Loss due to non-levy of storage charges – Rs 358.69 million

Para-2321(m) of Pakistan Railway Code for the Stores Department stipulates that materials not removed within one month from date of sanction to the sale or such other time as may have been specified will be subject to storage charges at rates that will be fixed by the Railway. Further, clause-6(b) of Standard Directions to Tenderers for sale of scrap provides rates of storage charges @ Rs 5 per 1,000 per day of the cost of total balance scrap not lifted.

During audit of the District Controller of Stores (Main Depot) Mughalpura, Lahore in September 2023, it was observed that Railway management issued 10 sale orders of 10,194 M. Ton scrap valuing Rs 1,312.97 million to M/s Peoples Steel Mills (Pvt.) Ltd. in February 2023 with lifting period of 05 months up to

22.07.2023. Subsequently, lifting period was extended till 31.10.2023 without storage charges but contractor failed to lift 5,515 M. Ton scrap. The extension in the lifting period without storage charges was unjustified being not covered under any legal authority. This resulted in loss to PR due to non-levy of storage charges of Rs 358.69 million for the period from July to October 2023.

The matter was taken up with management in December 2023 and discussed in DAC meeting dated 01.02.2024. DAC directed the CCS to submit a comprehensive reply in the light of discussion held during the meeting within one week. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-levy of storage charges and action be taken for recovery of the amount involved. Internal controls be strengthened to avoid recurrence.

DP 12540

2.5.55 Non-imposition of penalty on M/s MLCFL due to failure in providing committed freight business - Rs 189.91 million

Clause 2.1(b) of the agreement dated 09.06.2014 executed between Pakistan Railway and M/s Maple Leaf Cement Factory Ltd (MLCFL) for transport and delivery of coal/ petcoke/ cement and return transport and delivery of cement/ clinker, 22,000 Tons every month from the factory to the dispatch points intimated by MLCFL. Clause 3.12 further provides that in case, the quantity of the cargo to be transported, as provided by MLCFL, is less than the quantity mentioned in the agreement (after taking into account the allowed variation of 10%), then PR shall be allowed to debit the freight deposit account with such amount as calculated by the Review Committee as penalty, such penalty shall be equal to 50 % of the per ton freight charge in lieu of the deficient quantity.

During audit of the Commercial & Transportation Department Karachi in February 2023, it was noticed that M/s MLCFL transported only 11,524 tons cement against the agreed quantity of 418,000 tons (22,000 x 19 months) from Daud Khel to Karachi Bunder during the period from July 2021 to January 2023. The Railway management had not invoked penalty clause on short transportation of cement/ clinker by M/s MLCFL. This indicated that undue favor was extended

to the contractor due to which PR suffered loss of Rs 189.91 million for the period from July 2021 to January 2023.

The matter was taken up with the management in July 2023 and discussed in DAC meeting held on 05.09.2023. The DAC directed the PO to submit a comprehensive reply along-with documentary evidence by today. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired for non-recovery of penalty charges provided in the agreement and amount involved be recovered from the contractor. Internal controls regarding contract management be strengthened to avoid recurrence.

DP 12156

2.5.56 Non-payment of round-trip charges and unilateral stoppage of booking of coaches – Rs 48.23 million

According to Clause 6.1 of the agreement dated 01.01.2023 for commercial management of Rahman Baba Express, PRACS was required to deposit 07 days' advance payment of Rs 43,972,313 with CCT Lahore along with payment on account of attachment of additional coaches if any.

During audit of Pakistan Railway Advisory and Consultancy Services (PRACS) in March 2023, it was observed that commercial management of Rahman Baba Express was handed over to PRACS w.e.f. 01.01.2023. On the request of PRACS, composition of the train was fixed as 19 coaches by adding four economy class coaches vide letter dated 20.12.2022 with round trip payment of Rs 52.86 million. PRACS unilaterally stopped booking of additional coaches w.e.f. 05.02.2023 and reduced the weekly round trip advance payment to Rs 4.40 million. These additional coaches were remained attached and running empty with the train, however, on the request of PRACS, these coaches were detached by PR w.e.f. 15.03.2023. This non-professional act of PRACS management put Railway into loss of Rs 48.23 million due to non-payment of round-trip charges of additional coaches from 05.02.2023 to 15.03.2023.

The matter was taken up with the management in August 2023 and discussed in DAC meeting held on 19.09.2023. DAC directed the PO to submit a

comprehensive reply in consultation with CCM within one week. Compliance of DAC directives was awaited.

Audit recommends that matter may be inquired to fix responsibility for non-recovery of payment from PRACS against four additional coaches attached with the Rahman Baba Express. The amount involved be recovered from PRACS and contract management be improved to avoid recurrence.

DP 12183

2.5.57 Loss of earnings due to non-provision of freight wagons - Rs 22.49 million

Para 1801 of Pakistan Railway General Code provides that means should be devised to ensure that every Railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part.

During audit of the Karachi Bunder Dry Port in March 2023, it was observed that four contractors placed demands for 151 freight wagons from June 2021 to January 2023 but wagons were not arranged in time due to which demands were cancelled. Thus, non-provision of freight wagons not only adversely affected the revenue of PR but also diverted the customers to the road transportation. This resulted in loss of earnings of PR amounting to Rs 22.49 million due to poor management.

The matter was taken up with the management in September 2023 and discussed in DAC meeting held on 02.01.2024. DAC directed the COPS to resubmit the reply in the light of discussion on the para within one week. Compliance of the DAC directives was awaited.

Audit recommends that the matter of non-provision of wagons be investigated to fix responsibility and action be taken against the persons found at fault. Rolling stock management be improved to avoid recurrence.

DP 12286

2.5.58 Unjustified recovery of land lease charges at lesser rate – Rs 2.50 million

According to policy of PR for leasing of land for stacking purposes dated 11.08.1987, the rent of railway land licensed for stacking purpose would be 7.5% of market value.

During audit of Property & Land Department Lahore in November 2023, it was observed that a piece of land measuring 02 acres was leased out to Chishtian Logistics for coal stacking purpose at Chichoki Mallian vide agreement dated August 2003. Railway management fixed and collected lease charges @ 1% against the approved rate of 7.5%. PR management recalculated the land lease charges in 2020 and pointed out differential of Rs 2.50 million till 31.12.2019 but this amount was not recovered from the lessee due to negligence.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 25.01.2024. DAC directed the DG/P&L and CMM to submit revised reply to Audit within one week. Compliance of the DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for less recovery of lease charges and against the policy in vogue and action be initiated against the person(s) held responsible. The amount involved be recovered from the lessee and land management be improved to avoid recurrence.

DP 12495

Governance and Administrative Management

2.5.59 Underutilization of Pakistan Locomotive Factory, Risalpur - Rs 408.89 million

In its meeting held on 17th and 18th December, 1979 ECNEC decided to set up a Locomotive Factory for progressive manufacture of Diesel Electric/Electric Locomotives. It was stated in the PC-I of this project dated May 1989 that management of proposed factory as well as other manufacturing concerns under PR would be entrusted to an autonomous organization to be created for running these units on commercial lines. This project was started to acquire self-sufficiency in meeting with the requirements of locomotives to cater for the transportation

needs of Pakistan Railways. PLF Risalpur was commissioned in January 1993 with production capacity of 25 locomotives per annum on single shift basis.

During audit of the Pakistan Locomotive Factory (PLF), Risalpur in September 2023, it was observed that 102 locomotives were manufactured in the factory during the period from 1993 to 2015 and afterwards no locomotive was manufactured. Subsequently, management fixed monthly targets for repair of locomotives/coaches & wagons and manufacturing of their spare parts. The revised production targets of PLF could not be achieved during the years 2021-22 and 2022-23. However, overtime allowance of Rs 36.25 million was paid. During the years 2021-22 and 2022-23, an expenditure of Rs 904.25 million was incurred on PLF but value of works done remained at Rs 495.37 million. The above state of affairs indicated that Pakistan Railways suffered loss of Rs 408.88 million during the year 2021-22 and 2022-23 due to under-utilization of PLF.

The matter was taken up with the management in December 2023 and discussed in the DAC meeting held on 12.01.2024. The DAC directed the MD/PLF to resubmit the reply after proper reconciliation of production targets viz a viz under-utilization of the capacity as pointed out by Audit within two weeks. Compliance of the DAC directives was awaited.

Audit recommends that production facility of PLF should be utilized for the purpose for which it was created and every effort be made to achieve periodic targets to avoid operational losses.

DP 12425

2.5.60 Irregular expenditure on engagement of TLA in excess of sanctioned strength – Rs 178.02 million

According to Para 111 of Pakistan Railway Establishment Code, the number of posts sanctioned for each grade in a department shall in no case be exceeded without the sanction of the competent authority to create a post, either permanent or temporary.

During audit of the Carriage Factory, Islamabad in August 2023, it was observed that class-iv employees were appointed on TLA basis against PSDP

project of 400 coaches. Despite completion of the project in 2016-17, employees were retained by the management and were working in Carriage Factory. They were paid salaries of Rs 178.02 million during the period from July 2021 to June 2023 from revenue budget irregularly as they were engaged in excess of sanctioned strength. This resulted in loss of Rs 178.02 million to the PR due to weak internal controls.

The matter was taken up with the management in November 2023 and discussed in the DAC meeting held on 12.01.2024. DAC directed the MD/CFI to resubmit the revised reply. Compliance of DAC directives was awaited.

Audit recommends that matter be probed for irregular retention of work charged employees after completion of project. Action be taken against those held responsible besides improving the Human Resource management controls.

DP 12365

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22 & 2022-23 vide paras No 2.4.32, 2.5.11, 2.5.65 & 2.5.36 having financial impact of Rs 207.72 million. Recurrence of same irregularity is a matter of serious concern.

2.5.61 Unauthorized payment of Fixed Daily Allowance - Rs 154.39 million

Para 12 (16) Schedule II of Rules of Business 1973 provides that Finance Division is responsible for framing of rules on pay and allowances, retirement benefits, leave benefits and other financial terms & conditions of Service. Further Para 12 (1) (h) provides that no Division shall, without previous consultation with the Finance Division, authorize the issue of any orders, other than orders in pursuance of any general or special delegation made by the Finance Division.

During audit of following three formations for the FY 2022-23, it was observed that Fixed Daily Allowance of 20 days per month amounting to Rs 154.39 million was paid to all employees of Railways Police Department by the Ministry of Railways without approval of the Finance Division during the period from January 2022 to August 2023. This resulted in unauthorized and irregular payment of Fixed Daily Allowance of Rs 154.39 million.

(Rs in million)

SN	DP No.	Formation	Period of Irregularity	Amount
1	12616	CA Peshawar Division	Jan-2022 to Aug-2023	63.75
2	12574	CA Multan Division	July 2022 to June 2023	51.15
3	12632	CA Workshops Division, Mughalpura	July 2022 to June 2023	39.49
Total				154.39

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 23.01.2024. DAC directed that the already constituted committee comprising of Member Finance & AGM/Traffic to expedite and submit the enquiry report in connection with Audit Para 2.6.4 (DP 12088) of AR 2022-23 within one month. Compliance of DAC directives was awaited.

Audit recommends that the matter be probed to fix responsibility for the unauthorized payment of the Fixed Daily Allowance without prior approval by the Finance Division. Amount involved either be recovered from the concerned employees or from those found at fault under intimation to Audit.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No 2.6.4 having financial impact of Rs 239.22 million. Recurrence of same irregularity is a matter of serious concern.

2.5.62 Unjustified payment of Overtime Allowance – Rs 128.21 million

Para 453 of Pakistan Railways Code for Mechanical Department provides that except in very exceptional cases, no overtime should be worked in shops without prior sanction of the Works Manager.

During audit of the Carriage Factory, Islamabad and Steel Shop, Mughalpura in August and November 2023, it was observed that overtime

allowance was paid to the employees during 2021-23 although the production targets were not achieved.

(Rs in million)

SN	DP No.	Formation	Production Targets	Targets Achieved	% Achieved	Period	Amount
1	12413	Carriage Factory, Islamabad	127 coaches	95 coaches	75%	2022-23	87.57
2	12532	Steel Shop, Mughalpura	30,682 metric ton steel	6,232 metric ton steel	20%	2021-23	40.64
Total							128.21

In Carriage Factory, Islamabad physical verification by the team of FA&CAO/M&S on 20.01.2023 and 21.01.2023 revealed that only 30% labour was available in shops. The FA&CAO/M&S recommended that factory labour deployed at the residences of officers and MOR be called back to meet shortfall and completion of production works without payment of overtime. Thus, due to negligence of management an amount of Rs 128.21 million was paid on account of overtime during July 2021 to June 2023 without achievement of targets.

The matter was taken up with the management in November and December 2023. Against Sr. No.1, DAC in its meeting held on 23.01.2024 directed the MD/CFI to provide revised reply indicating all facts explained in the meeting along with documentary evidence to Audit. Against Sr.No.2, DAC in its meeting held on 01.02.2024 directed the CME/C&W to submit revised reply along with supporting documents within three days. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for unjustified payment of overtime allowance and internal controls be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22 & 2022-23 vide paras No 2.4.61, 2.5.92, 2.5.9, 2.5.38, 2.5.27 having financial impact of Rs 555.31 million. Recurrence of same irregularity is a matter of serious concern.

2.5.63 Irregular appointment of Officers and Staff - Rs 90.58 million

According to policy for engagement of employees against TLA in Pakistan Railways circulated by the Chief Personnel Officer dated 15.07.2014, TLA employees should be engaged strictly in accordance with the eligibility criteria for direct recruitment i.e. qualification/age etc. Further, as per Finance Division (Regulation Wing) letter No. F.4(9)R-3/2008-499 dated 12.08.2008, the staff for development projects funded from PSDP was required to be recruited from open market on contract basis.

During audit of seven (07) different formations of Pakistan Railways from February to September 2023, in eleven (11) instances it was observed that employees were engaged without adopting prescribed procedure i.e. advertisement in the newspapers/website, age and qualification. This ostensibly was avoided to appoint the ineligible persons on favoritism. This resulted in irregular expenditure of Rs 90.58 million on pay and allowances of these employees (**Annexure-9**).

The matter was taken up with the management from February to September 2023 and discussed in DAC meetings in October 2023. DAC directed the POs to submit a comprehensive revised reply within one week. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for irregular appointment of staff and disciplinary action be taken against the person(s) held responsible. Staff appointed irregularly may immediately be discontinued and future recruitments be made as per laid down procedures.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2021-22 & 2022-23 vide paras No 2.4.25, 2.5.40 & 2.5.29 having financial impact of Rs 232.68 million. Recurrence of same irregularity is a matter of serious concern.

2.5.64 Unjustified payments against a disconnected electric connection – Rs 21.86 million

Para 1801 of Pakistan Railways General Code provides that every Railway servant will be held personally responsible for any loss sustained through fraud or negligence on his part.

During audit of the Workshops Division Mughalpura for the year 2023-24, it was observed that panel of Railway Power House connection No.2 became defective therefore LESCO team disconnected the electric supply on 26.05.2022. Estimated cost of the new panel was Rs 2.10 million which was not replaced and electric supply remained disconnected but PR management made monthly payment during July 2022 to December 2023 without consumption of a single unit. Thus, PR suffered loss of Rs 21.86 million on account of unjustified payments against a disconnected electric connection due to inefficient management.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 01.02.2024. DAC showed displeasure on the ignorance and time overrun in handling this issue and ordered a fact finding inquiry by DG/Vigilance and FA&CAO/PR to probe the matter, fix responsibility and submit report within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for making payments against a disconnected electric connection without consumption of a single unit. Action be taken to stop further payments against an ineffective electric connection and internal controls be strengthened to avoid recurrence.

DP 12633

2.5.65 Increase in cost of transfer of electricity network due to delay in payment - Rs 18.95 million

Para 1801 of Pakistan Railway General Code provides that means should be devised to ensure that every railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part.

During audit of the Workshops Division Mughalpura for the year 2022-23, it was observed that case for payment against demand notice of LESCO amounting to Rs 35.95 million for handing over of Railway Baja Line Colony to LESCO was initiated in September 2022 but payment was not made till June 2023. Subsequently, LESCO authorities increased the amount of demand notice to Rs 54.90 million in September 2023. Furthermore, handing over of Railway colony to LESCO was also delayed due to which PR suffered extra loss on account of purchase of electricity at higher rate and supply to consumers at lesser rates. Thus, delay in deposit of demand notice resulted in loss of Rs 18.95 million to PR besides, delay in handing over of Railway Baja Line Colony to LESCO.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 01.02.2024. DAC showed displeasure on the ignorance and time overrun in handling this issue and ordered a fact finding inquiry by DG/Vigilance and FA&CAO/PR to probe the matter, fix responsibility and submit report within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for delay in making payment of demand notice to LESCO for handing over electric supply of Railway Colony. Payment should be made without delay to avoid further loss and financial management controls be improved to avoid recurrence.

DP 12634

2.5.66 Wasteful expenditure on online tracking system – Rs 11.00 million

Para 1801 of Pakistan Railway General Code states that means should be devised to ensure that every railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud

or negligence on his part and also for any loss arising from fraud or negligence on the part.

During audit of Ministry of Railways, Islamabad in October 2023, it was observed that Ministry of Information Technology sponsored a turnkey project “online tracking system for cargo handling, freight wagons and locomotives” valuing Rs 54.66 million. However, most of the material was either lost or taken away by the vendor and the project failed due to the following reasons;

- i. The project was required to be completed on 24.10.2011 but project was closed in June 2015 without completion.
- ii. On 12.06.2015, Railway management pointed out numerous faults in the system and declared the project incomplete. The milestones i.e. supply/delivery, installation and operation of tracking hardware, RFID readers etc. were neither discussed nor achieved before signing the User Acceptance Certificate (UAC). However, the Project Review Committee signed the UAC on 16.06.2015.
- iii. There was shortage of hardware material provided to vendor i.e. out of 184 trackers supplied to vendor, 121 were shown as installed in locomotives and remaining 63 trackers were missing. The installed 121 trackers were also not traceable in any locomotive. Further, 201 RFID readers issued to vendor were not available in any locomotive.

This depicted that the project has been failed and tracking material either lost or taken away by the vendor due to inefficiency of Railway management resulting in wasteful expenditure of Rs 11 million on account of development, customization and implementation of software application, training & installation of devices. Further, the initiative taken by Ministry of IT for improvement in freight operations of PR was also shattered by PR management.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 30.01.2024. DAC directed the Director/IT to submit revised reply along with documentary evidence in consultation with COPS,

CME/Loco on the basis of observations raised by the Audit within two weeks. Compliance of DAC directives was awaited.

Audit recommends that the matter may be inquired for fixing responsibility for loss of the government money and non-achievement of envisaged benefits of the project. The amount of loss be recovered from the person held responsible under intimation to audit.

DP 12627

2.5.67 Loss due to damage of Railway quarter by CDA – Rs 9.15 million

Para 316 (a) of Pakistan Railways Code for Accounts Department stipulates that the amounts due to Railways for services rendered, supplies made or for any other reasons are correctly and promptly assessed and recovered as soon as they fall due.

During audit of Carriage Factory Islamabad in August 2023, it was observed that Capital Development Authority (CDA) damaged Railway Block No. 15 on 06.03.2023 while widening IJP road Islamabad. This indicated that PR management failed to safeguard interest of the organization. Thus, PR suffered loss of Rs 9.15 million due to damage of a Railway Quarter and non-recovery of cost of damages from the CDA.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 21.11.2023. DAC directed the MD/CFI to expedite the matter with the CDA and submit compliance report to the Audit. Compliance of the DAC directives was awaited.

Audit recommends that cost of damages to the Railway Quarter be recovered from the CDA and internal control be strengthened to avoid recurrence.

DP 12331

2.5.68 Irregular expenditure on pay & allowances of Railway employees from PSDP Funds – Rs 7.69 million

According to Austerity Measures regarding PSDP expenditure for the year 2022-23 circulated by the Ministry of Railways on 30.12.2022, salary of regular

PR officers and officials engaged in the project was required to be charged to revenue.

During audit of following two projects in March and April 2023 it was observed that pay & allowances of Project Directors, who were regular employees of PR, were paid from the PSDP funds instead of Revenue in contravention to instructions of MOR. Further, leave encashment and pay & allowances of ex-PDs were also charged to the project irregularly. This resulted in irregular booking of revenue expenditure of Rs 7.69 million to the project from June 2021 to April 2023.

(Rs in million)

SN	DP No.	Formation	Description	Period of irregularity	Amount
1	12252	Project of Re-commissioning of 05 Accidental	Pay & Allowance of PD were charged to the project instead of	July 2022 to April 2023	3.82
2	12141	Project Special Repair of 100 DE	Leave Encashment of Ex-PD	October 2022	2.55
3	12137	Project Special Repair of 100 DE	Pay & Allowance of Ex-PD	June to September	1.32
Total					7.69

The matter was taken up with the management in July and September 2023. Against Sr.No.1, DAC in its meeting held on 17.10.2023 directed the PO to submit a comprehensive revised reply within one week. Against Sr. No.2 & 3, the DAC in its meeting held on 05.09.2023 took serious view of such practices and directed the PO to regularize the payments within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for unjustified utilization of PSDP Funds for revenue expenditure. Project management controls be improved to avoid recurrence.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2021-22 vide paras No 2.4.21, 2.5.58 having financial impact of Rs 380.92 million. Recurrence of same irregularity is a matter of serious concern.

2.5.69 Unauthorized continuation of service beyond superannuation – Rs 4.87 million

S.No.1.1 (13) (ii) of Esta Code Chapter 9 provides that a Civil Servant shall retire from service on completion of sixty (60) years of his age.

During audit of the Carriage Factory, Islamabad (CFI) for the year 2022-23, it was observed that an amount of Rs 3.60 million was paid to Mr. Muhammad Wajid, Senior Auditor on account of pay & allowances and TA/DA for the period from February 2021 to March 2023 after the date of superannuation. As per CNIC his date of birth was 27.01.1961 and therefore, his date of retirement was 26.01.2021. However, the said employee had performed duty till 03.04.2023 and absconded afterwards. Further, an amount of Rs 1.27 million was outstanding against the employee on account of House Building and Motor Car Advance. Thus, irregular payments of Rs 4.87 million were made to the employee after the date of his superannuation due to poor Human Resource management.

The matter was taken up with the management in September 2023 and discussed in DAC meeting held on 02.01.2023. DAC directed the FA&CAO/M&S to expedite the process of reconciliation & verification of information provided by the fact-finding inquiry and to decide future course of action. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular continuation of service of employee beyond superannuation. Amount involved be recovered and internal controls be strengthened to avoid such recurrence.

DP 12300

2.5.70 Less recovery of electricity cost from employees - Rs 3.42 million

According to National Electric Power Regulatory Authority (NEPRA) SROs dated 31.05.2022, 20.10.2022, 07.02.2022 and 13.04.2023 Quarterly Tariff Adjustments notified were required to be recovered from the consumers with monthly electric bills. Further, as per NEPRA notification dated 06.03.2023 the rate of Financing Cost Surcharge of Rs 0.43 per units was increased to Rs 3.82 per unit. Furthermore, Electricity Duty @ 1.5% of the electric consumption was also applicable on the electric bills.

During audit of the Pakistan Locomotive Factory (PLF), Risalpur in September 2023, it was observed that management of PLF Risalpur purchased electricity in bulk from Peshawar Electricity Supply Company (PESCO) in 2022-23 for utilization in service buildings and supply to residents of PLF Colony. Audit observed that following components of the electricity cost were not being included in the monthly electricity bills of the residents of PLF Colony, Risalpur.

SN	Description	Amount (Rs)
1	Quarterly Tariff Adjustment	2,105,837
2	Financing Cost Surcharge	892,222
3	Electricity Duty	419,052
Total		3,417,111

Thus, due to non-recovery of quarterly tariff adjustment, Financing Cost Surcharge and Electricity Duty from residents of PLF Colony, PR suffered loss of Rs 3.42 million during the year 2022-23.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 19.01.2024. DAC showed displeasure over the intentional ignorance of MD/PLF despite very clear instructions in the policy. DAC further directed the MD/PLF to recover the electric charges immediately and submit compliance to Audit. Compliance of DAC directives was awaited.

Audit recommends that amount of electricity cost less charged be recovered from the Railway employees. Correct recovery of electricity cost from residents of Railway Colonies be ensured in future.

DP 12625

Railway Track & Rolling Stock

2.5.71 Loss due to excess consumption of fuel - Rs 4,904.32 million

In terms of Chief Operating Superintendent, PR letter No. 39-FA/0/2 dated 29.04.2019, a locomotive consumes 22 liters fuel in case of one-minute detention/stoppage out of scheduled running.

During audit of following four (4) formations of Commercial & Transportation Department in February 2023, it was observed that a large number of trains were detained on account of defects in rolling stock, signal and electric failures and infrastructure hurdles etc. Thus, PR suffered loss of Rs 4,904.32 million on account of extra consumption of fuel due to train detentions. In addition to financial loss, punctuality of trains was also affected.

(Rs in million)

SN	DP No.	Formation	Amount
1	12287	Commercial & Transportation Department, Sukkur	3,387.58
2	12150	Commercial & Transportation Department, Multan	1,411.14
3	12186	Commercial & Transportation Department, Rawalpindi	75.10
4	12240	Commercial & Transportation Department, Karachi	30.50
Total			4,904.32

The matter was taken up with the management from July to September 2023 and discussed in DAC meetings held on 12.09.2023 and 19.01.2024. DAC directed the POs (COPS, CSE, CME/Loco, CEE and CEN/OL) to submit comprehensive revised reply with proper justification and reasons for excessive consumption of HSD on their account to COPS office. The COPS was directed to develop an institutional mechanism of excess consumption of HSD on various factors on daily basis, which would help in addressing the highest contributing factor. Compliance of the DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for unnecessary detentions causing financial loss and mechanism be devised to avoid unnecessary detentions of trains.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No 2.5.58 having financial impact of Rs 18.65 million. Recurrence of same irregularity is a matter of serious concern.

2.5.72 Loss of damages to rolling stock due to operational failures – Rs 221.24 million

Para 372 of Pakistan Railways Code for the Accounts Department provides that the defalcation or loss should be reported to the Accounts Office and Statutory Audit and should be investigated by the Executive in association with Accounts representative with a view to fix responsibility.

During audit of following five (5) formations of Commercial & Transportation Department in February 2023 it was observed that five train accidents occurred due to wrong marshaling of trains, use of overdue maintenance wagons, poor maintenance of track, failure of automatic block system and weak administrative controls over staff. This indicated that the management failed to implement standard parameters and standard operating procedures regarding track & rolling stock maintenance due to which PR suffered loss of Rs 221.34 million.

(Rs in million)				
SN	DP No.	Formation	Description	Amount
1	12221	Commercial & Transportation Department, Sukkur	Collusion of Millat Express (17 Up) with Sir Syed Express (36 DN) on 25.06.2021	177.87
2	12159	Commercial & Transportation Department, Multan	Derailment of 07 wagons of ZBKH Goods train at Chichawatni on 01.10.2021	24.80

3	12134	Commercial & Transportation Department, Karachi	Derailment of 35 wagons during April 2020 to March 2022	16.07
4	12146	Commercial & Transportation Department, Rawalpindi	Accident of Mianwali Express (147-Up) on 25.02.2022	1.40
5	12199	Commercial & Transportation Department, Peshawar	Accident of Daudkhel Coal Special Goods Train on 01.05.2020	1.20
Total				221.34

The matter was taken up with the management in July to September 2023 and discussed in DAC meetings held on 12.09.2023 and 19.09.2023. DAC directed the PO to give a comprehensive response within one week. Further DAC directed the Railway administration to devise a mechanism for realistic costing of Railway accidents and account of such losses in the books. Railway administration should also take steps for effective disciplinary actions keeping in view gravity of the accidents. Furthermore, other interventions including capacity building, refresher courses and competency tests were recommended to avoid recurrence of accidents. A compliance report should be submitted to Audit within two weeks. Compliance of the DAC directives was awaited.

Audit recommends that each accident case be inquired to fix responsibility for loss on account of poor maintenance of infrastructure and non-observance of standard procedures. Internal controls be strengthened to avoid recurrence.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2018-19 vide para No 2.4.69 having financial impact of Rs 905.24 million. Recurrence of same irregularity is a matter of serious concern.

2.5.73 Loss due to non-imposition of late payment surcharge - Rs 199.44 million

According to Ministry of Railway's letter dated 26.11.20219, the late payment surcharge at the rate of 10% annually on operational & maintenance charges of level crossings & sidings owned/sponsored by federal / provincial governments, military authorities, semi government and private organizations as well as on land lease and rental charges calculated on monthly basis w.e.f 01.07.2019.

During audit of the following four (4) formations in August 2023, it was observed that sponsoring agencies of level crossings and sidings failed to make payments of operational and maintenance charges within due time but late payment surcharge was not imposed by PR management.

(Rs in million)

SN	DP No.	Formation	Period of irregularity	Amount
1	12591	Certification Audit , Multan	2022-23	115.83
2	12436	Civil Engineering Department, Lahore	2021-23	77.89
3	12122	Certification Audit , Multan	2021-22	7.33
4	12348	Civil Engineering Department Quetta	2022-23	5.72
Total				206.77

Sponsoring agencies failed to make payments in time due to which huge operational and maintenance charges were accumulated against them. PR management had not imposed late payment surcharge on the outstanding bills, in violation of rules, due to which PR suffered loss of Rs 199.44 million.

The matter was taken up with management in July to December 2023. DAC in its meetings dated 19.01.2024 and 30.01.2024 took serious view of the ignorance of concerned officials/officers and directed the CEN to issue explanation to all. In

case of unsatisfactory reply charge sheets be issued to them under intimation to the forum. All dedicate efforts should be directed towards recovery of late payment surcharge and recovery particulars be shared with this forum. All other Divisions should also be informed to be careful and cautious regarding this surcharge payment. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for non-imposition of late payment surcharge and amount involved be recovered from the sponsoring agencies. Agreements of all level crossings and sidings be revised with inclusion of clause of late payment surcharge and its implementation be ensured.

2.5.74 Infructuous expenditure on classified repair of locomotives – Rs 37.07 million

According to Maintenance Regulations, the periodicity for Class-1 repairs of all DE Locomotives except DPU-20/30 was 06 years or 1,200,000 KMs whichever was earlier. Further, Para 807 (i) of Pakistan Railway General Code provides that every public officer should exercise the same vigilance in respect of expenditure incurred from government revenues as a person of ordinary prudence would exercise in respect of the expenditure of his own money.

During audit of Central Diesel Locomotive (CDL) Workshop Rawalpindi in September 2023, it was noticed that an expenditure of Rs 37.07 million was incurred on classified repair of 03 GRU-20 locomotives (5042, 5043 & 5044) which were turned out from CDL Shop Rawalpindi during the period from September to November 2022. Later on, these locomotives were temporarily deleted in January 2023 and subsequently permanently deleted on 05.08.2023. These locomotives were gone through C-I schedule repair having periodicity of six years therefore, after incurring heavy expenditure reasonable service should have been obtained from these locomotives. This indicated that infructuous expenditure of Rs 37.07 million was incurred on classified repair of three locomotives which could not be made operational and deleted within 01 to 04 months after repair.

The matter was taken the management in December 2023 and discussed in DAC meeting held on 01.02.2024. DAC constituted a fact finding inquiry committee comprising DG/Vigilance and CMM to probe the matter and submit report within one month. Compliance of DAC directives was awaited.

Audit recommends that responsibility for infructuous expenditure be fixed and disciplinary action be taken against the defaulters. Internal controls be strengthened to avoid recurrence

DP 12471

2.5.75 Irregular award of contracts to a contractor participated in bids with two different names - Rs 6.42 million

According to Clause 2 (i) of Revised PPRA Rules 2004, corrupt and fraudulent practices in respect of procurement process, shall be either one or any combination of the practices including “collusive practices” which means any arrangement between two or more parties to the procurement process designed to stifle open competition for any wrongful gain, and to establish prices at artificial, non-competitive levels. Further, Rule 19 (i) provides that bidders shall be blacklisted and debarred for participation in any public procurement for the period of not more than ten years, if corrupt and fraudulent practice as defined in these rules is established against them.

During audit of the Peshawar Division for the year 2022-23, it was observed that two firms i.e. M/s Muhammad Asghar & Co. and M/s Islam-ud-Din & Co offered bids for up-gradation of level crossings No.135 & 143 on 01.02.2022. Both the works were awarded to M/s Muhammad Asghar & Co being the lowest bidder. Audit noticed that as per FBR record, Mr. Waseem Asghar was owner of both the businesses. This indicated that one contractor fraudulently participated in these tenders through two different names to create artificial competition. Thus, contracts valuing Rs 6.41 million were awarded to a contractor through fraudulent activities without fair competition.

The matter was taken up with the management in December 2023 and discussed in DAC meeting dated 01.02.2024. DAC constituted a fact finding inquiry committee comprising DG/Vigilance and FA&CAO/Revenue to probe the matter and bring the facts to this forum within one month. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular award of contracts to a contractor participated in the bids through two different

names. Punitive action be taken against the contractor according to blacklisting policy of PR and contract management be improved to avoid recurrence.

DP 12594

Note: The issue was also reported earlier in the Audit Report for Audit Year 2019-20 vide para No 2.5.21 having financial impact of Rs 276.55 million. Recurrence of same irregularity is a matter of serious concern.

2.5.76 Loss on account of damaged sleepers – Rs 5.56 million

M/s P-TEC clarified in their letter dated 01.02.2019 that maximum damage percentage of sleepers in factories equipped with their equipment is 1%. Moreover, Para 1801 of Pakistan Railway General Code provides that means should be devised to ensure that every Railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part.

During audit of the Managing Director, Concrete Sleeper Factories, Lahore in August 2023, it was observed that total 110,959 sleepers were manufactured and 3,120 sleepers (2.8%) were declared condemned in 2022-23. This indicated that 2,393 sleepers were damaged in excess of allowed limit of 1%. Thus, PR suffered loss of Rs 5.56 million due to poor management and lack of supervisory controls in the concrete sleeper factories.

The matter was taken up with the management in December 2023 and discussed in the DAC meeting held on 30.01.2024. DAC directed that a fact finding inquiry be conducted by the DG/Vigilance and FA&CAO/M&S within one month to fix responsibility for the loss. Compliance of DAC directives was awaited.

Audit recommends that matter may be inquired to fix responsibility against the person(s) found at fault for the negligence causing excessive defective production of sleepers. The amount of loss be recovered from the person(s) held responsible and supervisory controls be strengthened to avoid recurrence.

DP 12560

2.5.77 Loss due to theft of Permanent way material and assessment of loss at low rates – Rs 1.14 million

According to para 372 of Pakistan Railways Code for the Accounts Department, the defalcation or loss should be reported to the Accounts Officer and Statutory Audit and should be investigated by the Executive in association with Accounts representative with a view to fix responsibility.

During audit of Civil Engineering Department, Rawalpindi in August 2023, it was observed that rails were stolen from Malakwal yard in Rawalpindi Division during the period from March & April 2021. However, the assessment of loss was made at Rs 688,799 whereas scrap value of stolen rails was Rs 1,141,529. Thus the assessment of loss was made at low rates. The FIR was registered but amount of loss had not been recovered. Thus PR suffered loss of Rs 1.14 million on account of theft of material due to negligence and slackness of the management.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 12.01.2024. DAC directed the CEN/Open Line to pursue the matter with the police department for recovery of the theft material and resubmit the reply on the basis of outcome of legal proceedings. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for low assessment of theft material. Action be taken against those held responsible besides recovery of the amount involved. Security arrangement be improved to avoid recurrence.

DP 12439

Financial Management

2.5.78 Irregular utilization of pension grants for salary and contractor's payment – Rs 5.05 billion

According to Finance Division (CF Wing) Office Memorandum No. 4(2)-CF-II/2020-21/903 dated 16.11.2020, the Ministry of Railways, with the approval

of PAO, may incur an additional expenditure of Rs 1.00 billion per month solely for the payment of pension in addition to the regular monthly release from the sanctioned budget. This dispensation may continue till the payment of outstanding pension dues during the financial year 2020-21 up-to a maximum of Rs 6.00 billion. Further, as per Budget Order 2022-23 and MOR letter No. FD/B-II/Release-1/2022 dated 26.08.2022 funds of Rs 45.00 billion under Grant 85 were provided to PR to meet monthly pension expenditure.

During audit of the Ministry of Railways in October 2023 it was observed that Federal Government provided financial assistance of Rs 47.50 billion to Pakistan Railways clearly mentioning that amount should be credited to Account XVII-(Pension), however, PR management re-appropriated an amount of Rs 5.05 billion to Account XI-(Pay) and Account III (Scrap & other). The objective of the grant-in-aid to relieve PR pensioner by clearing pension liability was adversely affected due to irregular utilization of funds for other purposes. This resulted in irregular utilization of funds of Rs 5.05 billion from pension account to pay and others accounts.

(Rs in billion)

SN	DP No.	Period	No. of cases involved	Transferred From	Transferred To	Amount
1	12600	31.01.23 to 11.11.23	06	A/C XVII (Pension)	A/C XI (Pay)	4.35
2	12598	15.02.23 to 12.09.23	03	A/C XVII (Pension)	A/C III (Scrap & Others)	0.70
Total						5.05

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 16.01.2024. DAC directed Dir/Admin, MoR to resubmit comprehensive reply. Compliance of DAC directives was awaited.

Audit recommends that responsibility may be fixed for irregular utilization of funds provided for payment of pension and expenditure irregularly incurred be got regularized from Finance Division. Financial management should be improved to avoid recurrence.

DP 12598 & 12600

2.5.79 Irregular booking of goods without having FDA at respective stations – Rs 4,385.70 million

As per CCFM letter No. 2 M&R/147-R/X/CCM/F dated 09.01.2020 necessary instructions were issued to ensure utilization of Freight Deposit Account where it is opened. In case, party had no Freight Deposit Account (FDA) at a station the payment should be made in cash.

During audit of Port Bin Qasim and Karachi Bunder Dry Port Stations in February and March 2023, it was observed that imported coal was booked by Marshaling Yard Pipri (MYP) and Karachi Bunder (KBX) Dry Port Stations without having FDA at respective station. The FDA was maintained at Port Bin Qasim station while its adjustment was being made through MYP and KBX Dry Port Stations. This resulted in irregular booking of goods amounting to Rs 4,385.70 million from FDA in violation of rules *ibid*.

(Rs in million)

SN	DP No.	Formation	Period of irregularity	Amount
1	12229	Port Bin Qasim Station Karachi	Jul 21 to Jun 22	2,940.87
2	12232	Karachi Bunder Dry Port	Sep 22 to Jan 23	1,444.83
Total				4,385.70

The matter was taken up with the management in September 2023 and also discussed in DAC meeting held on 10.10.2023. DAC directed the PO to coordinate with DS Karachi and submit a comprehensive reply regarding violation of

threshold of FDA ceiling and FDA accounts on the stations pointed out by the Audit. Compliance of DAC directives was awaited.

Audit recommends that reasons be explained for irregular booking of goods from FDA of Port Bin Qasim. Internal controls be strengthened to avoid recurrence.

2.5.80 Irregular transfer from Freight Deposit Accounts – Rs 1,360.62 million

As per CCFM letter No. 2 M&R/147-R/X/CCM/F dated 09.01.2020 necessary instructions were issued to ensure utilization of Freight Deposit Account where it is opened. In case party had no FDA at a station the payment should be made in cash.

During audit of following two stations in February and March 2023, it was observed that FDA balances of different parties were irregularly transferred from one station to another station to give undue favor to the parties having no FDA at other stations. This resulted in irregular transfer of FDA balance amounting to Rs 1,360.62 million in violation of the rules *ibid*.

(Rs in million)

SN	DP No.	Formation	Contractor (M/s)	Period of transfer	Amount
1	12225	Port Bin Qasim Station Karachi	03 Firms	Jun 22 to Oct 22	1,330.54
2	12249	Karachi Bunder Dry Port	16 Firms	Dec 21 to Oct 22	30.08
Total					1,360.62

The matter was taken up with the management during September to November 2023. DAC in its meeting held on 10.10.2023 and directed the PO to coordinate with DS Karachi and submit a comprehensive reply regarding violation

of threshold of FDA ceiling and FDA accounts on the stations pointed out by the Audit. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for irregular transfer of FDA balances of different firms from one station to another just to facilitate them. Action be taken against the persons found at fault and SOPs regarding maintenance of FDA should be followed in true letter and spirit.

2.5.81 Non- recoupment of Freight Deposit Account – Rs 858.18 million

As per clauses of agreements executed between Pakistan Railways and different parties the minimum limit of maintaining Freight Deposit Account (FDA) was fixed. If, FDA balance falls below the minimum limit the same was required to be recouped at the earliest to the extent of limit described in the respective agreements.

During audit of following three formations in February and March 2023, it was observed that contractors failed to maintain agreed amount of minimum Freight Deposit Account during the period from July 2021 to January 2023. As on 30.06.2022 and 31.01.2023, the FDA balance of five contractors was Rs 321.82 million against the required balance of Rs 1,180.00 million. This resulted in non-recoupment of FDA as detailed below:

(Rs in million)

SN	DP No	Formation	Contractor (M/s)	Minimum FDA	Actual FDA		Deficient FDA
					Date	Amount	
1	12216	PRFTC	HSR	1,000.00	30.06.22	318.40	681.60
2	12179	Karachi Bunder, Dry Port	Irfanullah & Co	50.00	31.01.23	0.01	49.99
			Chistian Logistic	50.00	-	0.01	49.99

			Ocean Mark	50.00	-	0.00	50.00
3	12246	East Wharf Keamari, Station	Fatima Fertilizer	30.00	30.06.22	3.40	26.60
Total				1,180.00	-	321.82	858.18

The matter was taken up with the management in August and September 2023. Against Sr. No. 2, DAC in its meeting held on 19.09.2023 directed the PO to ensure that the agreements relating to FDA accounts are implemented in true letter and spirit. Against Sr. No. 1 and 3, DAC in its meeting held on 10.10.2023 directed the CCFM to submit a comprehensive reply regarding violation of threshold of FDA ceiling pointed out by Audit. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for non-observance of contractual clauses regarding maintenance of FDA. Maintenance of minimum balance in FDA should be ensured and financial management controls be strengthened to avoid reoccurrence.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No 2.5.46 having financial impact of Rs 851.80 million. Recurrence of same irregularity is a matter of serious concern.

2.5.82 Non-deduction of advance tax – Rs 731.74 million

Section 236-A of income tax ordinance 2001 states that any person making sale by public auction / tender of any property or goods shall collect tax including award of any lease to any person @ 10% and 15% from the filers and non-filers, respectively, for further remittance to Income Tax authorities on the day the tax is deducted.

During audit of fourteen (14) different formations of Pakistan Railways from February to September 2023, it was observed that in sixteen (16) instances an amount of Rs 731.74 million on account of sales tax and advance income tax was not deducted from contractors in complete disregard to above instructions (**Annexure-10**). Audit also observed the cases of procurement from unregistered suppliers and making payment without obtaining sales tax invoices. This resulted in loss to public exchequer due to weak internal controls.

The matter was taken up with the management from February to September 2022 and discussed in DAC meetings held on 05.09.2023, 19.09.2023, 02.01.2024, 16.01.2024 and 30.01.2024. DAC directed the POs to recover the tax from contractors and submit comprehensive reply supported with documentary evidence within one week. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for procurement of items from unregistered suppliers and making payment without obtaining GST invoices as well as non-deduction of taxes. Action be taken against those held responsible besides recovery of amount from the employee concerned.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2021-22 & 2022-23 vide paras No 2.4.57, 2.5.70, 2.5.34 & 2.5.36 having financial impact of Rs 1,767.41 million. Recurrence of same irregularity is a matter of serious concern.

2.5.83 Non-recovery of Railway dues from private parties – Rs 712.12 million

Para 316 (a) of Pakistan Railways Code for the Accounts Department stipulates that the amounts due to Railways for services rendered, supplies made or for any other reasons are correctly and promptly assessed and recovered as soon as they fall due.

During audit of twenty-one (21) different formations of Pakistan Railways from February to November 2023, it was observed that in thirty (30) cases an amount of Rs 712.12 million was recoverable from various private parties on account of rental charges, LD charges, ground rent, demurrage charges and electric charges etc. for the period from 2015 to December 2023 (**Annexure-11**). Railways

management failed to realize the Railway dues from private parties due to poor accounts receivables management.

The matter was taken with the management from July to December 2023 and discussed in DAC meetings held on 05.09.2023, 19.09.2023, 17.10.2023, 21.11.2023, 29.12.2023, 02.01.2024, 05.01.2024, 09.01.2024 and 16.01.2024. The DAC directed the POs to file recovery suits against the defaulting contractors and blacklist them. DAC further directed to recover the Railway due and submit a comprehensive reply supported with documentary evidence to Audit. Compliance of DAC directives was awaited.

Audit recommends that action be taken against those held responsible besides ensuring recovery of amount under intimation to Audit.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21 & 2021-22 vide paras No 2.4.53, 2.5.66, 2.5.18 & 2.5.69 having financial impact of Rs 9,176.49 million. Recurrence of same irregularity is a matter of serious concern.

2.5.84 Non-recovery of freight, demurrage and warfage charges – Rs 495.31 million

Para 316 (a) of Pakistan Railways Code for the Accounts Department stipulates that the amounts due to Railways for services rendered, supplies made or for any other reasons are correctly and promptly assessed and recovered as soon as they fall due.

During audit of Commercial & Transportation Department, Multan and Rawalpindi in February 2023, it was observed that an amount of Rs 495.31 million was outstanding against M/s PSO on account of Freight Charges, Demurrage & Wharfage and Dip Shortage etc. for the period ranging from 2008 to 2023. This indicated that PR management failed to reconcile and realize the long outstanding dues despite lapse of fifteen years. Thus, negligence of PR management resulted in non-recovery of Railway dues amounting to Rs 495.31 million.

(Rs in million)

SN	DP No.	Formation	Description	Amount
----	--------	-----------	-------------	--------

1	12131	Commercial & Transportation Department, Multan	Freight	302.30
2	12204	Commercial & Transportation Department, Rawalpindi	-do-	182.77
3	12289	Commercial & Transportation Department, Rawalpindi	Demurrage & Wharfage	6.05
4	12288	Commercial & Transportation Department, Rawalpindi	Dip Shortage and missing	4.19
Total				495.31

The matter was taken up with the management from July to September 2023. Against Sr. No. 1 and 2, DAC in its meeting held on 12.09.2023 directed the PO to immediately recover all the due freight charges in terms of provisions of agreement and arrange regular review of the recoveries to avoid recurrences. The PO should submit a compliance report to Audit within two weeks. Against Sr. No.3, DAC in its meeting held on 29.12.2023 directed the CCFM to take this matter with PSO authorities after proper investigation of demurrage and wharfage charges and recover the dues from regular transactions of PSO within two weeks. Against Sr.No.4, DAC in its meeting held on 12.01.2024 directed the CCFM to resolve the issue through Research & Development (R&D) at the forum of Triple Helix project. DAC further directed that the agreement should be reviewed with legal department for inclusion of dip shortage through formal meetings with PSO for stopping the unilateral deduction on account of dip shortage. Compliance of DAC directives was awaited.

Audit recommends that matter be investigated to fix responsibility for non-recovery of Railway dues from M/s PSO despite lapse up to fifteen years. Financial and contract management controls be strengthened to avoid recurrence of the issue.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2020-21, 2021-22 vide paras No 2.5.19 & 2.5.68 having financial impact of Rs 366.07 million. Recurrence of same irregularity is a matter of serious concern.

2.5.85 Non-recovery of Railway dues on account of assisted sidings/level crossings – Rs 479.36 million

Para 316 (a) of Pakistan Railways Code for the Accounts Department stipulates that the amounts due to Railways for services rendered, supplies made or for any other reasons are correctly and promptly assessed and recovered as soon as they fall due.

During audit of six (06) different formations of Pakistan Railways from August to September 2023, it was observed that in seven (07) instances an amount of Rs 479.36 million was recoverable from various government departments and private parties such as NHA, Defense, Provincial Highway Department, etc. on account of operational and maintenance charges of level crossings and sidings for the period from July 2004 to June 2023 (**Annexure-12**). Railway management failed to streamline accounts receivable management due to which these dues were accumulated.

The matter was taken up with the management in October 2023 to December 2023 and discussed in DAC meetings held on 21.11.2023, 05.01.2024 and 12.01.2024. DAC directed the POs to review the time frame of advance payments against operation and maintenance charges of level crossings and enhance advance payment from three years to ten years. DAC further directed the POs to submit revised reply showing status of recovery supported with documentary evidence. Compliance of DAC directives was awaited.

Audit recommends that action may be taken against those held responsible besides ensuring recovery of the amount involved under intimation to Audit. Internal Controls regarding Accounts Receivable Management be improved to ensure recovery of Railway dues in time.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2018-19 vide para No. 2.5.56 having financial impact of Rs 2,638.04 million. Recurrence of same irregularity is a matter of serious concern.

2.5.86 Non-recovery of Railway dues from government departments – Rs 381.56 million

Para 316 (a) of Pakistan Railways Code for the Accounts Department stipulates that the amounts due to Railways for services rendered, supplies made or for any other reasons are correctly and promptly assessed and recovered as soon as they fall due.

During audit of seven (07) different formations of Pakistan Railways, it was observed in nine (09) instances that an amount of Rs 381.56 million was recoverable from various government departments and Authorities including Food Department, WAPDA, Postal Department, Customs Department etc. for the period from July 2000 to June 2023 (**Annexure-13**). Railway management failed to realize Railway dues within prescribed time due to poor accounts receivables management.

The matter was taken up with the management from July to December 2023 and discussed in DAC meetings held on 05.09.2023, 17.10.2023, 29.12.2023, 05.01.2024, 16.01.2024 and 25.01.2024. DAC directed the POs to recover the Railway dues and submit a comprehensive reply supported with documentary evidence to Audit. Compliance of DAC directives was awaited.

Audit recommends that action may be taken against those held responsible besides ensuring recovery of the amount involved under intimation to Audit.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2019-20, 2020-21, 2021-22 & 2022-23 vide paras No. 2.5.67, 2.5.19, 2.5.68 & 2.5.60 having financial impact of Rs 5,395.89 million. Recurrence of same irregularity is a matter of serious concern.

2.5.87 Non-recovery of penalty for failure to collect and deposit railway receipt - Rs 359.63 million

According to Clause 10 of the agreement, executed between PR and National Bank of Pakistan (NBP) for collection of Railway receipts and remittance into Railway revenue account with State Bank of Pakistan (SBP) dated 18.03.2021, in the event of NBP's failure to collect and deposit Railway receipts within the specified period NBP shall pay markup @ KIBOR (Karachi Inter Bank Offered

Rate) rate notified by SBP for the delayed period.

During audit of the Ministry of Railways in October 2023, it was observed that NBP remitted revenue receipts of Pakistan Railways in the Railway Account with SBP through bank drafts/cheques with abnormal delay. As per Clause 10 of the agreement, penalty/interest amounting to Rs 359.63 million was calculated by the PR management for the period from July 2015 to June 2023. This indicated that Railway receipts were deposited in Railway account in SBP with delay and penalty/interest charges were not recovered from NBP due to poor contract management.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 23.01.2024. DAC directed the Director Administration to submit a revised reply within one week. Compliance of DAC directives was awaited.

Audit recommends that matter may be taken up with the NBP to streamline the revenue collection/deposit process and ensure periodic reconciliation for recovery of penalty/interest on delayed deposit if any. The agreement with NBP be implemented in its true letter & spirit.

DP 12585

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No 2.6.6 having financial impact of Rs 78.97 million. Recurrence of same irregularity is a matter of serious concern.

2.5.88 Loss due to deduction from PR bank account by FBR due to non-collection of tax from contractor – Rs 334.40 million

As per Section 160 of the Income Tax Ordinance 2001, the withholding agent would be personally liable to collect/deduct advance income tax u/s 236A of said ordinance. In case of failure to collect and deposit of the advance income tax, the Commissioner would serve notice u/s 140 read with section 69 & 138, for the purpose of recovering tax within time specified therein. The Commissioner may proceed to recover from the taxpayer the said amount by attachment and sale of

any movable or immovable property of the taxpayer if tax amount not paid within specified time.

During audit of FA&CAO/Revenue for the year 2022-23, it was noticed that Pakistan Railways failed to collect income tax from M/s Syed Jamil and Company for the tax year 2019 and 2020 despite tax demand. Consequently, FBR attached the bank account of Pakistan Railways and an amount of Rs 334.40 million was deducted from PR Bank account in March 2023 against tax demand and default surcharge. This resulted into loss amounting to Rs 334.40 million to Pakistan Railways due to weak financial controls and slackness of the management.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 12.01.2024. DAC directed the CCFM to expedite efforts for the recovery of Rs 334.40 million from the FBR through an expert tax lawyer. DAC further directed to hold meeting with CCM and CMM to sort out the issue of litigation with the existing contractor amicably ensuring no revenue loss should be occurred during the conflict resolution. Compliance of DAC directives was awaited.

Audit recommends that matter be investigated to fix responsibility and action be taken against those held responsible. A mechanism regarding collection of withholding tax, its timely remittance and reconciliation with FBR be devised under intimation to Audit.

DP 12564

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2019-20, 2021-22 & 2022-23 vide paras No 2.5.38, 2.5.75, 2.5.77, 2.5.69 having financial impact of Rs 1,467.01 million. Recurrence of same irregularity is a matter of serious concern.

2.5.89 Unauthorized retention of Railway earnings – Rs 197.81 million

Para 1402 of Pakistan Railways General Code provides that all money received by or tendered to government officers on account of revenues should be deposited in full

in the treasury or bank specified by the Ministry of Finance in consultation with the State Bank of Pakistan without any delay.

During audit of Property and Land Department, Workshop Division, Mughalpura in November 2023, it was observed that revenue generated from commercial lease of shops, wheel barrows, nurseries, marriage lawns, institutes amounting to Rs 197.81 million was irregularly deposited in four (04) private bank accounts during July 2021 to June 2023. Railway earnings were initially deposited in private bank accounts and transferred to Railway Fund Account with delay of 20 to 180 days. Thus, Railway earnings of Rs 197.81 million were irregularly deposited in private bank accounts and transferred to Railway Fund with delay up to six months instead of forthwith deposit to railway treasury.

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 16.01.2024. DAC directed the committee headed by Member Finance to expedite and finalize their recommendations for this important issue because there was dire need to streamline the public finance in the light of rules & polices of shops, marquees and markets etc.

Audit recommends that matter may be inquired to fix responsibility for unauthorized deposit and retention of Railway earnings in private bank accounts and action be taken against defaulters. Internal controls regarding financial management be strengthened to avoid recurrence.

DP 12480

2.5.90 Non-recovery of freight concession from contractor – Rs 47.44 million

According to Clause 5.6 of the agreement for transportation of coal and containerized traffic between PR and Chistian Logistic, contractor shall install a

pit/conveyer belt system for unloading of coal within five months from execution of this agreement at Faisalabad Dry Port. Further, Clause 5.7 provides that contractor failed to install pit/conveyer belt system for unloading of coal from hopper wagons within stipulated time at Faisalabad Dry Port, the benefits given through special rates shall be recovered from the FDA.

During audit of the East Wharf Keamari Station in February 2023, it was observed that an agreement was executed between PR and Chistian Logistic on 05.12.2018 for transportation of coal and containerized traffic from Bin Qasim/Keamari to Faisalabad Dry Port. As per agreement, Chistian logistic was required to install pit/conveyer belt at Faisalabad Dry port within five months i.e. 05.05.2019 but it was installed on 05.03.2020. Conveyer belt was installed with delay of ten months but benefit on account special reduced rates amounting to Rs 47.45 million was not recovered from FDA as per clause of the agreement due to weak internal controls and slackness of management.

The matter was taken up with the management in November 2023 and discussed in the DAC meeting held on 29.12.2023. DAC was informed by the CCFM that the said para was concerned with agreement clause which was dealt by CMM office. DAC directed the CCFM to ensure that the said para be communicated and discussed with CMM for a detailed reply. Compliance of DAC directives was awaited.

Audit recommends that amount in question be recovered from the FDA account without further delay. Internal controls be strengthened to avoid such recurrence.

DP 12366

2.5.91 Unauthorized deposit of Railway earnings into private bank accounts - Rs 42.95 million

Para 1402 of Pakistan Railways General Code provides that all monies received by or tendered to government officers on account of revenues should be deposited in full in the treasury or bank specified by the Ministry of Finance in consultation with the State Bank of Pakistan without any delay. Further, Para 822 of Pakistan Railway Code for the

Engineering department provides that the net receipts from the management of Railway land should be adjusted in accounts by credit to Abstract Z Sundry Other Earnings.

During audit of the Property & Land Department, Sukkur in September 2023, it was observed that revenue generated from commercial lease of marriage lawn in Railway Officer's Club Sukkur was unauthorizedly deposited in a private bank accounts maintained with MCB and UBL bank, Sukkur since April 2013. This resulted in unauthorized deposit of Railway earnings of Rs 42.95 million in a private bank accounts instead of government treasury from 01.04.2013 to 14.09.2023.

The matter was taken up with management in November 2023 and discussed in DAC meeting held on 12.01.2024. DAC directed the committee headed by Member Finance to expedite and finalize their recommendations for the issue because there was dire need to stream line the public finance in the light of rules & polices of similar clubs/Gymkhana etc.

Audit recommends that the deposit of Railways' earnings into private account should be stopped immediately and disciplinary action be initiated against responsible officers. The amount be transferred to government treasury forthwith under intimation to Audit.

DP 12410

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21 & 2021-22 vide paras No. 2.4.3, 2.5.3, 2.5.14 & 2.5.55 having financial impact of Rs 253.97 million. Recurrence of same irregularity is a matter of serious concern.

2.5.92 Loss due to payment of late payment surcharge on utility bills – Rs 31.85 million

Para-1801 of Pakistan Railway General Code provides that “means should be devised to ensure that every Railway Servant realizes fully and clearly that he will be held personally responsible for any loss sustained by government through fraud or negligence on his part”.

During audit of following three formations of Mechanical Department in September 2023 it was observed that management failed to make payment of Electricity and Sui-Gas bills in time due to which heavy penalties in the shape of late payment surcharge were paid. Thus, due to negligence and mismanagement an amount of Rs 31.85 million was paid as penalty of late payment of utility bills during the period from March 2022 to June 2023.

(Rs in million)

SN	DP No.	Formation	Utility Service	Period	Amount
1	12440	Mechanical Department Workshops Mughalpura	Sui-Gas	2022-23	16.81
2	12477	Pakistan Locomotive Factory, Risalpur	Electricity	03/2022 to 01/2023	11.80
3	12508	Steel Shop Mughalpura	Sui-Gas	2022-23	3.24
Total					31.85

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 19.01.2024. DAC directed the FA&CAO/PR and CEN/Open Line to submit comprehensive position from all divisions for loss due to late payment along with SOP, duly endorsed by Senior Management Committee within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for delayed payments of electricity bills and system of utility bills payment be streamlined to avoid loss on this account.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19, 2020-21, 2021-22 & 2022-23 vide paras No 2.4.66, 2.5.11, 2.5.53, 2.5.70

having financial impact of Rs 52.04 million. Recurrence of same irregularity is a matter of serious concern.

2.5.93 Unauthorized maintenance of private Bank Accounts for local purchase – Rs 17.62 million

According to Rule 12 of the Rules of Business-1973, no Division shall, without previous consultation with the Finance Division, authorize the issue of any orders, other than orders in pursuance of any general or special delegation made by the Finance Division, which will affect directly or indirectly the finances of the Federation.

During audit of the Civil Engineering Department, Karachi in August 2023, it was observed that 17 bank accounts were opened in the name of Officers of Karachi Division as per Divisional Accounts Officer's letter dated 28.03.2022. Railway funds amounting to Rs 17.62 million were transferred in these bank accounts for local purchases. This resulted in unauthorized maintenance of private bank accounts and transfer of Railway funds of Rs 17.62 million in violation of rules.

The matter was taken up with the management in November 2023 and discussed in the DAC meeting held on 21.11.2023. DAC directed that such practices of private account should immediately be discontinued and all such accounts be closed. Compliance of DAC directives was awaited.

Audit recommends that irregular practice of maintenance of private bank accounts for deposit of Railway funds should be stopped henceforth and accounts pointed out by Audit be closed. Financial management controls be strengthened to avoid such recurrence.

DP 12385

2.5.94 Irregular utilization of track maintenance material for deposit works without receipt of funds in Railway Fund Account – Rs 31.01 million

Para 2031 of Pakistan Railway Code for the Engineering Department states that all deposit works will be executed in the same manner as Railway works. The expenditure including the departmental charges incurred on the work undertaken

on behalf of the other government department should be as far as possible, be charged direct to the department concerned as and when incurred, the estimated cost of which has already been deposited with the Railway and credited to deposit miscellaneous.

During audit of the Civil Engineering Department Rawalpindi in August 2023, it was observed that Permanent-Way material valuing Rs 31.01 million purchased from Revenue Fund Account-III was utilized for deposit works of construction/up gradation of level crossings and military sidings during the period from 01.07.2018 to 21.12.2021. The Track Supply Officer requested the Divisional administration on 08.04.2022 for transfer of funds of Rs 31.01 million in Revenue Account. However actual funds were not transferred from Deposit Misc. Account to Revenue Fund Account-III except paper adjustment of material valuing Rs 14.54 million. This resulted in irregular utilization of track maintenance material for deposit works without actual transfer of funds of Rs 31.01 million in the Railway Fund Account-III due to poor financial management.

The matter was taken up with the management in August 2023 and discussed in DAC meeting held on 23.01.2024. DAC directed the CEN/Open Line to reconcile the documents showing duplicate MRs with Audit and remaining amount be transferred from Rawalpindi Division to TSO under intimation to Audit within one month. Compliance of DAC directives was awaited.

Audit recommends that Railway receipts may be transferred from Deposit Misc. Account to Earnings Account-III and financial management controls be improved to avoid recurrence.

DP 12615

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para No 2.5.64 having financial impact of Rs 86.83 million. Recurrence of same irregularity is a matter of serious concern.

2.5.95 Non-recovery of advance payment of unsupplied equipment – Rs 28.54 million (US\$ 101,213)

Item 5 & 6 of Appendix No. 1 of the contract No. DP/IDB/2009/ Signal-I & II dated December 2009 executed between Ministry of Railways and Consortium, comprising M/s Bombardier Transportation Sweden AB and China Railway Signal & Communication Corporation, China states that 10 & 20 Light Motor Trolleys would be procured against payment of US\$ 168,688 & US\$ 337,377 respectively.

During audit of the Project of Replacement of Old and Obsolete Signal Gear (LON-SDR) in May 2023, it was observed that 20% advance payment of 30 Light Motor Trolleys amounting to US\$ 101,213 was made to the Consortium. Meanwhile, sample Trolley received was not according to the specification therefore, it was decided 06.12.2021 that no Motor Trolley would be procured from the Consortium. However, despite lapse of sufficient time, 20% advance payment US\$ 101,213 was not received back due to weak internal controls. As per time value of money this amount would be increased to Rs 28.54 million (101,213 x Rs 282) till 2023.

The matter was taken up with the management in August 2023 and also discussed in DAC meeting held on 05.09.2023. DAC directed the PO to submit a comprehensive reply along with documentary evidence within one week and compliance report be submitted to Audit within two weeks specifically for signing revised contract and adjustments of the amounts in US dollars. Compliance of DAC directives was awaited.

Audit recommends that responsibility may be fixed for non-recovery of advance payment of equipment not supplied by the contractor despite lapse of more than 13 years. The amount in question may be recovered from the contractor and internal control be strengthened to avoid recurrence.

DP 12171

2.5.96 Irregular investment of government money without approval of the Finance Division - Rs 4.50 million

According to Section 23(2) of the Public Financial Management (PFM) Act 2019 no authority shall transfer Public moneys for investment or deposit from government account including the assignments accounts to other bank account without prior approval of the federal government.

During audit of the Property & Land Department Workshop, Mughalpura in November 2023, it was observed that revenue of Rs 4.50 million generated from leasing of Railway land during the period from 2018 to December 2023 was invested in private bank account (HBL) by Divisional Sports Officer. No record regarding justification and authorization of this bank account was provided to Audit. This resulted in irregular investment without approval of the Finance Division.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 16.01.2024. DAC directed the committee headed by Member Finance to expedite and finalize their recommendations for this important issue as there was dire need to stream line the public finance in the light of rules & polices of Shops, Marquees, and Markets etc.

Audit recommends that responsibility may be fixed for unauthorized investment of government money without approval of Finance Division. Financial management should be improved to avoid recurrence.

DP 12485

2.5.97 Unauthorized expenditure from public money - Rs 4.33 million

The clause viii of Finance Division (Expenditure Wing) office memorandum No.F.7(1)Exp.IV/2016-340 dated 7th July 2022 states that there shall be complete ban on official lunches/dinners/hi-tea except for foreign delegations. According to para 822 of Pakistan Railway Code for the Engineering Department the net receipts from the management of Railway land should be adjusted in accounts by credit to Abstract Z-Sundry Other Earnings.

During audit of Mechanical Engineering Department Workshops Division Mughalpura Lahore in 2023, it was observed that revenue of Rs 4.41 million was generated from five sports grounds situated in Workshop division during the year 2022-23. The earning from sports grounds was being managed by the WM/Loco working as Divisional Sports Officer and revenue generated from these grounds was being deposited in a private bank account up to June 2023. Out of this, an amount of Rs 4.33 million was expensed out on officers' dinners/lunches and Hi-teas in violation of instructions of Finance division during the financial year 2022-23. Further, stipend and other miscellaneous expenses were also incurred from this account which were not allowed to be paid from railway earnings. This resulted in unauthorized utilization of Rs 4.33 million from public money due to weak internal financial controls.

The matter was pointed out to the management in December 2023 and discussed in the DAC meeting held on 01.02.2024. DAC directed DS/Workshop to submit a comprehensive reply along with documentary evidence within three days. DAC clubbed this para with Audit Para No. 2.4.3/2018-19 (DP 8859 and 8940) with the direction to inquiry committee to finalize its report within two weeks. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed and action be taken against those at fault. Internal controls be strengthened to avoid recurrence.

DP 12551

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2018-19 and 2021-22 vide paras No 2.4.3 and 2.5.55 having financial impact of Rs 83.35 million. Recurrence of same irregularity is a matter of serious concern.

2.6 Significant issues related to Specialized Audit Reports

2.6.1 Non-finalization of Public Private Partnership of Railway Hospitals – Rs 37.72 billion

Public Procurement Regulatory Authority Rule- 38-B states that the procuring agency shall consider single bid in goods, works and services if it (a) meets the evaluation criteria, ensures compliance of specifications and other terms & conditions expressed in advertisement or bid solicitation documents; (b) is not in conflict with any provision of the Ordinance; (c) conforms to the technical specifications; (d) has financial conformance in terms of rate reasonability. Furthermore, Para 1801 of General Code for Pakistan Railway states that every public officer should exercise the same vigilance in respect of public expenditure and public funds generally as a person of ordinary prudence would exercise in respect of the expenditure and the custody of his own money.

During audit of Pakistan Railways medical facilities in May 2023, it was observed that M/s International Consultant submitted final feasibility report on 07.12.2020 regarding outsourcing/ rehabilitation of seven (07) hospitals on Build-Operate-Transfer model for 30 years. As per financial outlay submitted by the consultant, there was a collective/committed financial benefit of Rs 37.72 billion (Rs 28.64 billion fixed rent and Rs 9.17 billion revenue share) to Pakistan Railway. The same was approved by the Pakistan Railways Steering Committee on 07.07.2020. Accordingly, a tender was floated on 05.08.2021 and M/s ZBK submitted bid along with security of Rs 60 million for all seven hospitals. M/s ZBK was technically and financially qualified. But, after a period of 4 months the process was closed under the direction of SRGM on 06.01.2022. Senior General Manager also directed to submit case to the Tender Evaluation Committee for review and avoidance of any mis-procurement. But the case was closed by the GM/W&SI without submitting it to Tender Evaluation Committee which resulted into a loss of potential earning of Rs 37.72 billion due to non-finalization of PPP model.

The matter was taken up with the management in December 2023 and discussed in DAC meeting held on 12.01.2024. DAC directed the CM&HO to capitalize on the salient features highlighted in the feasibility study for

outsourcing/insourcing of Railway hospitals. The feasibility study as rightly pointed out by the audit team had become a tangible asset which should be fully utilized in outsourcing/insourcing of Railway hospitals. Compliance of DAC directives was awaited.

Audit recommends that matter be investigated to fix responsibility for non-implementation on recommendations of the feasibility study. Action be taken for beneficial utilization of Railway Hospitals on PPP mode to reduce burden on PR and provide better health facilities to the employees of PR.

DP 12515

2.6.2 Misappropriation of HSD oil – Rs 506.63 million

Clause 1, Chapter-III of Mechanical Manual of Pakistan Railways provides that fuel being the largest item of expenditure on the Railway, it is essential that accurate accounts of all fuel received and issued must be kept and the strictest economy observed in its use. Any tendency towards waste must be checked and constant attention paid to the prevention of coal thefts. All arrangements in connection with the supply of fuel for the whole line are made on behalf of the Chief Operating Superintendent. Divisional Mechanical Engineers or others responsible officers who have fuel in their charge, will be held responsible for all details connected with receipt, issue and custody of same.

During audit of HSD Oil Utilization for the FY 2021-22, it was observed that as per record (GM-31) a quantity of 5.03 million liters HSD oil was shown as available in fuel tanks of 203 locomotives at Karachi, Rohri, Samasatta and Rawalpindi Sheds. Whereas, fuel tanks capacity of these locos was 1.42 million liters only. Audit apprehended that if the fuel tanks of these locomotives were filled to full capacity even then the quantity of 3.61 million liters HSD oil valuing Rs 506.63 million was in excess to available capacity and hence stands suspicious. This indicated that fuel valuing Rs 506.63 million was misappropriated and misreported in record as available in fuel tanks of locomotives (**Annexure-14**).

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 31.10.2023. DAC took a serious view of the matter and constituted an inquiry committee headed by the AGM/Infra,

FA&CAO/Revenue, COPS and CME/Loco to submit the inquiry report within one month to Audit. Further course of action shall be decided after the outcome of the fact-finding inquiry. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for misappropriation of HSD oil. Internal controls be strengthened to avoid recurrence.

DP 12510

2.6.3 Loss due to unfavorable addition/alteration in agreement between PR & IIMCT – Rs 157.51 million

According to agreement signed between PR and IIMCT dated 17.08.1998 that the status and standard of Pakistan Railways Hospital Rawalpindi be improved to the level of an excellent Teaching Hospital and in the larger interest of Railway and welfare of serving/retired employees along with dependents entirely at its own cost and expense.

During audit of medical facilities in Pakistan Railways in May 2023, it was observed that PR entered into an agreement with IIMCT on 17.08.1998. The agreement was revised twice on 10.06.2004 and 01.07.2019. Audit observed that some of the clauses of agreements were amended against the interest of Pakistan Railways and to provide undue favour to IIMCT i.e. increase in reimbursement cases, IIMCT built new structure for MBBS students in violation of agreement. This resulted in an additional financial burden on Pakistan Railways of Rs 157.51 million (**Annexure-15**).

The matter was taken up with the management in 08.06.2023 and also discussed in DAC meeting held on 28.12.2023, 04.01.2024 and 30.01.2024. DAC directed the CM&HO to make clause wise discussion with Audit and submit comprehensive reply to Audit within one week. Compliance of DAC directives was awaited.

Audit recommends that responsibility be fixed for unfavorable addition/deletion/alteration in agreement. Action be taken against those held responsible besides recovery of amount involved.

DP 12654

2.6.4 Unjustified consumption of fuel on shunting services – Rs 68.88 million

The General instructions of fuel economy measures circulated by Chief Operating Superintendent dated 28.3.22 provides that the shunting engines be economically utilized and wastage be eliminated through actual analytical ways. Moreover, Para C-III provides that locomotives capable of re-starting without any trouble viz weak batteries/other starting problem, must not be remain idling after reasonable period of ½ hour.

During audit of HSD oil Utilization for the FY 2021-22, it was observed that as per time table for passenger trains dated 15.10.2021, maximum 30 minutes were allowed for shunting and placing of a train before its departure. Whereas, locomotives were persistently utilized on shunting services up to 24 hours in excess to allowed time. Resultantly, a quantity of 0.49 million liters HSD oil valuing Rs 68.88 million (**Annexure-16**) was consumed unjustifiably on unproductive purpose as detailed below:

(a) Karachi division utilized 4.29 million liters HSD oil on account of shunting services during the FY 2021-22. The fuel consumption for the month of June 2022 on shunting services was test checked and it was observed that the Karachi based locos were persistently utilized on shunting services up to 24 hours daily. Resultantly, a quantity of 228,766 liters HSD oil valuing Rs 32.13 million was utilized in excess of the actual workings.

(b) Four Passenger Trains (UP and DN) were shunted at Sialkot and Narowal Railway Stations. Time allowed for shunting and placing of above four passenger trains @ 30 minutes each comes to two hours. However, the shunting locos worked up to 18 hours daily during FY 2021-22. Resultantly, excess quantity of 20,529 liters HSD oil valuing Rs 2.88 million was consumed.

(c) Faisalabad Shed was allocated two shunting locomotives for ten (10) UP and DN trains (4 originating and 6 passing trains). Time allowed for shunting and placing of above 10 trains was 5 hours @ 30 minutes each, whereas, locomotives were utilized on shunting services from 8 to 18 hours daily in excess of allowed time. This resulted in excess consumption of 241,034 liters HSD oil valuing Rs 33.86 million.

The above state of affairs resulted in wasteful consumption of 0.49 million litres fuel valuing Rs 68.88 million on shunting services. Moreover, the log books of locos were not maintained and hours/mileage meters were also out of order. Therefore, absence of log books and non-functioning of hours/ mileage meter of shunting locos indicated that reported abnormal consumption of HSD oil was actually misappropriated.

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 31.10.2023. DAC directed the COPS that a SOP should be framed for efficient utilization of shunting locomotives. DAC constituted an inquiry committee comprising Dy: COPS/Power and Dy:CEN/North to conduct a fact finding inquiry regarding the extra ordinary consumption of HSD for shunting purpose at Narowal/Faisalabad and all other locations, where the locomotives were kept idle and running for long hours. The inquiry report should be submitted to Audit within two weeks along with SOPs of shunting locomotives. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for unjustified excess consumption of fuel on shunting services. Actual working of shunting locos be recorded through mileage and hours meters.

DP 12513

2.6.5 Loss due to irrational fixation of fuel quota for LOMS without devising SOP – Rs 58.05 million

Para-1801 of Pakistan Railway General Code Vol-I provides that every public officer should exercise the same vigilance in respect of public expenditure and public funds generally as a person of ordinary prudence would exercise in respect of the expenditure and the custody of his own money.

During audit of HSD oil utilization for the FY 2021-22, it was observed that Railway management fixed a quota of 746,000 litres for locomotives on miscellaneous services (LOMS) irrationally without assessing division wise availability of running locos and work load. The fuel quota for Lahore Division was fixed @ 620 litres per loco per year, whereas, the quota of other divisions was excessively fixed ranging from 2,200 liters to 2,941 liters (72% to 79%) per loco

per year. Resultantly, 413,261 liters of HSD oil valuing Rs 58.05 million was consumed excessively at other sheds as compared to Lahore. Moreover, no Standard Operating Procedure (SOP) was framed to rationalize and monitor the consumption of HSD oil on account of LOMS (**Annexure-17**).

The matter was taken up with management in December 2023 and also discussed in DAC meeting held on 31.10.2023. DAC directed the PO (COPS) to revisit their previous reply and a fresh comprehensive reply be submitted in the light rational fixation of fuel according to workload and allocation of locos to all sheds to the Audit within two weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for irrational and excess fixation of fuel quota for LOMS. SOPs may be framed to rationalize and monitor the consumption of fuel on account of LOMS to avoid financial leakages.

DP 12514

2.6.6 Wasteful consumption of HSD oil on idle locomotives before departure of trains - Rs 12.64 million

Para 204 Chapter-II of Operating Manual provides that the engine crew must be on duty at least 45 minutes before the booked departure of the engine from shed. Para-B of Fuel Economy measures circulated by Chief Operating Superintendent dated 29.03.2022 provides that unnecessary detention of trains/locomotives in the traffic yards and stabling of locos on way side stations be avoided.

During audit of HSD oil Utilization for the FY 2021-22, it was observed during review of yard detention time of Lahore based locos that locomotives remained in start condition at yard after leaving the shed till departure of trains for 4,736 hours after allowing for admissible margin of 45 minutes. Similarly, yard detention of goods trains over the entire system of Pakistan Railways for the month of March 2021 and March 2022 was examined and found that locomotives remained idle at yards for 1,694 hours till departure of goods trains. The position showed that locomotives on passenger and freight services remained idle in start condition at yard for 6,430 hours unjustifiably. The idle working of locomotives resulted into wasteful consumption of HSD oil valuing Rs 12.64 million irregularly

and caused loss to Pakistan Railways due to negligence of Railway management (**Annexure-18**).

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 31.10.2023. DAC took a serious view of the wasteful consumption of HSD oil on idle locomotives and directed COPS to come-up with proper SOP for the idle locomotives within two weeks. DAC directed that comprehensive reply may be submitted along with SOPs. DAC also directed that the fuel management system which is in tendering process must address and resolve the issues pointed out in the special study report of locomotives for audit year 2022-23. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for idling locomotives at yard before departure of trains. Remedial measures be adopted to avoid such recurrence.

DP 12512

2.6.7 Theft of HSD oil from under repair locomotives – Rs 7.03 million

Para-1801 of Pakistan Railways General Code provides that every public officer should exercise the same vigilance in respect of public expenditure and public funds generally as a person of ordinary prudence would exercise in respect of the expenditure and the custody of his own money.

During Special Study on “HSD Oil Utilization” for the FY 2021-22, it was observed that 723,436 liters fuel was available in fuel tanks of locomotives (Lahore and Karachi based) at time of arrival in shed for trip maintenance. During trip maintenance at sheds 7% fuel was consumed unjustifiably ranging from 28 to 3,778 liters from fuel tank of locomotives after allowing margin of one-hour consumption (as per record of OP-28). This indicated that 50,046 liters fuel valuing Rs 7.03 million was pilfered which caused loss to Pakistan Railways (**Annexure-19**).

The matter was taken up with management in December 2023 and discussed in DAC meeting held on 31.10.2023. DAC directed the PO (COPS) to review the previous reply and resubmit afresh reply along with documentary evidence to Audit within two weeks. DAC also directed that a fact finding inquiry

be conducted by the DG/Fuel and the report be submitted within one month. Compliance of DAC directives was awaited.

Audit recommends that matter be investigated to fix responsibility for theft of HSD oil. Action be taken against responsible besides enhancing the scope of investigation over entire system of Pakistan Railways.

DP 12511

(a) 2.6.8 Fraudulent consumption of HSD oil on account of deleted/non-functional locomotives - Rs 2.22 million

Para 1801 of Pakistan Railways General Code states that “means should be devised to ensure that every railway servant realizes fully and clearly that he will be held responsible for any loss sustained by government through fraud or negligence.

During audit of High Speed Diesel (HSD) oil utilization in locomotives for the FY 2021-22, it was observed that six ALU-95 locomotives working in Mughalpura Workshop were temporarily deleted on 03.01.2022. Despite temporary deletion of these locomotives the consumption of 15,825 liters HSD oil valuing Rs 2,222,938 was reported during the months of January 2022 and April 2022. This reflects that HSD oil was fraudulently issued and consumed on account of deleted locomotives and caused loss to Pakistan Railways due to connivance of Railway officials.

The matter was taken up with the management in June 2023 and also discussed in DAC meeting held on 31.10.2023. DAC took a serious view of the matter and directed that a fact-finding inquiry should be conducted by DG/Fuel and report should be submitted to Audit within two weeks. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for irregular issuance of HSD oil on account of deleted locomotives, the loss be recovered from the persons held responsible and internal controls be strengthened to avoid such recurrence.

DP 12655

CHAPTER 3

THEMATIC AUDIT

EFFECTIVE UTILIZATION OF PSDP PORTFOLIO BY PAKISTAN RAILWAYS

3. THEMATIC AUDIT OF EFFECTIVE UTILIZATION OF PSDP PORTFOLIO BY PAKISTAN RAILWAYS

3.1. Introduction

Pakistan Railways had been resuscitated through capital investments since 1972 by Federal Government under Public Sector Development Program (PSDP) primarily for up-gradation of rolling stock and allied infrastructure. Total funds allocated by Federal Government to Railway sector through PSDP was Rs 343.11 billion, out of which Rs 206.72 billion had been spent during last decade (**Annexure-20**).⁴⁵

Allocation and expenditure on infrastructure and rolling stock (2013-14 to 2022-23)

Source: Planning Commission of Pakistan & Financial Statements of PR for the last decade

During last ten years, PR initiated 43 projects for Infrastructure and 24 projects for Rolling Stock development/up-gradation out of which 26 and 19 were completed respectively. PSDP portfolio remained rolling stock dominated with consumption of 60.80% of total funds (**Annexure-21 & 22**).

⁴⁵ Financial Statements of PR 2013-14 to 2022-23

3.2 Background

The performance and financial health of Pakistan Railways had been deteriorated since 1972, with significant incline towards losses from Rs 32.52 billion to Rs 48.62 billion raising federal government's annual assistance from Rs 33.50 billion to Rs 47.50 billion layered over PSDP investment of Rs 206.72 billion during last decade. The shrinkage and deterioration of PR's rolling stock was due to the fact that majority of vehicles had outlived their useful life, thereby, necessitating hefty repair and maintenance costs and shortened gaps between major overhauls.⁴⁶ The allied infrastructure of track and bridge had been dilapidated partly due to piece meal rehabilitation endeavors and onslaught of natural calamities, resulting into retarding engineering restrictions, nullifying the impact of any improvement in rolling stock and resulting in excessive operational costs (**Annexure-23**).

Pakistan Vision 2025 stipulates delineates that Pakistan Railways will be transformed into a profitable organization by increasing optimum speed and freight share significantly. National Transport Policy-2018 aims at transforming Pakistan Railways into profitable organization and quality service provider for passengers and freight traffic. Railway infrastructure will be modernized and expanded to improve capacity, provide connectivity across the country, and development of a separate freight corridor on Railway tracks.

Pakistan committed to achieve Sustainable Development Goals (SDGs) through its national development agenda. The National Economic Council (chaired by the Prime Minister) approved the National SDGs Framework in 2018. The theme selected for audit is closely connected with the prioritized categories of SDG-11. Thematic Audit of "Effective Utilization of PSDP Portfolio by PR" assessed the effectiveness of Federal Government investment for revival and up-

⁴⁶ CAREC report on Railway Sector Assessment for Pakistan, March 2021

gradation of Pakistan Railways in accordance with Pakistan Vision-2025, National Transport Policy-2018 and SDGs.

3.3 Establishing the Audit Theme

The Planning Commission undertakes state policy development initiatives for the growth of the national economy and the expansion of the public infrastructure of the country. It emphasizes the utilization of economic resources of the country efficiently for socio-economic welfare of the people. This objective may be achieved only when development projects are planned and executed with effective management.⁴⁷ The selected theme is established with respect to optimum utilization of funds to achieve the planned objectives within the gestation period of projects for up gradation of Railway's rolling stock, allied infrastructure and achievement of relevant goals.

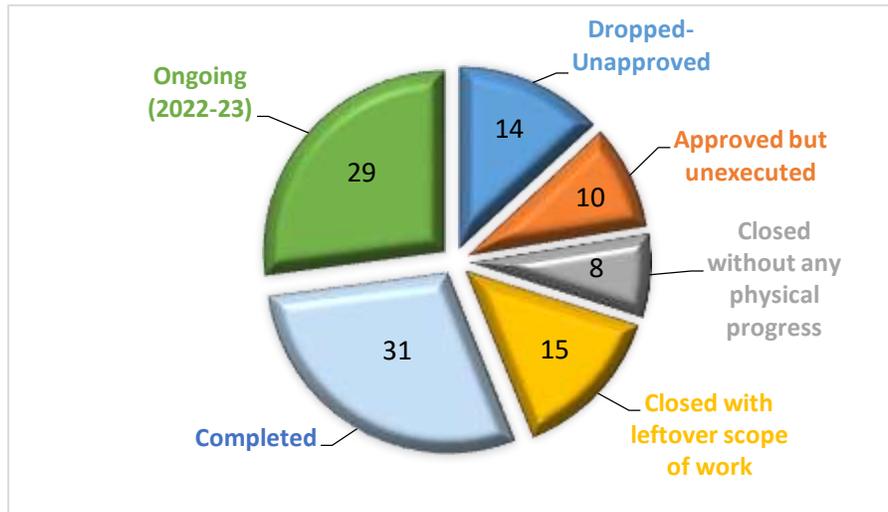

3.3.1 Reasons of selection

During last decade, PR initiated 83 PSDP projects⁴⁸ for up-gradation and rehabilitation in four sub-sectors i.e. Infrastructure, Rolling Stock, Governance and Business Development. Only 37% of the projects (31 projects) had been completed with full scope of works from 2013-14 to 2022-23. Out of 83 projects, 10% (08) were prematurely closed at their initial stages, 18% (15) were closed with unfinished scope of works, and 35% (29) were on-going as on 30.06.2023. Since the initiation of capital investment by Federal Government, 67 % of total investment had been utilized on above projects from 2013-14 to 2022-23 which is significantly material and is assessed in instant audit (**Annexure-24**).

⁴⁷ Planning Commission Guidelines for Project Management

⁴⁸ Detailed and short nomenclature of projects (Annexure-45 & 46)

Status of PSDP Projects (2013-14 to 2022-23)

Source: MoR & Planning Commission of Pakistan

Pakistan Vision 2025 and National Transport Policy-2018 clearly provide objective milestones for medium and long term development of Pakistan Railways transportation system under the overarching regime of national transportation development framework.⁴⁹ SDG-11, Target 11.2 obligates Pakistan to “Provide affordable and sustainable transport systems”, which was directly dependent upon and related to up-gradation and rehabilitation of Pakistan Railways through Federal Government development portfolio.

3.3.2 Purpose/Objectives

The objectives of thematic audit were following:

⁴⁹ Pakistan Vision-2025 Page No.71, 87, 88 & 103 and National Transport Policy Page No. 3, 7, 11, 15, 19 & 20.

- i. To identify the inefficiency and ineffectiveness regarding utilization of funds against allocation and identify causes thereof,
- ii. To find the gaps between planned objectives and their achievement within or beyond project planned gestation period,
- iii. To determine whether the PSDP Investment Plan is in place and sufficient for achievement of relevant targets under National SDGs framework of Pakistan,
- iv. To review whether project initiation and project management is in accordance with applicable rules and regulations

The objectives also include review of projects prioritization and throw-forward mechanism. Examine the causes of non-achievement of targets with respect to inadequate allocations and cash releases, or PR incapacity which led to ineffective utilization of PSDP portfolio. Audit intends to find out internal and external factors impeding optimal effective utilization of PSDP portfolio by Pakistan Railways.

3.3.3 Audit Scope

Audit examined the record related to 83 projects along with allocation of Rs 343.11 billion in respect of effective utilization of PSDP portfolio of Pakistan Railways for the period from 2013-14 to 2022-23 at Ministry of Railways, Islamabad and Railway headquarters, Lahore. Audit reviewed and examined the record and information covered under the TORs. Following TORs of thematic audit were developed:

- i. Analysis of PSDP portfolio with regard to annual demand, budgetary allocations, cash releases and their utilization,
- ii. Analysis of PSDP portfolio with regard to achievement of annual physical targets and projects objectives within their gestation period,
- iii. Assessment of adequacy of PSDP Investment Plans for achievement of relevant goals under National SDGs framework of Pakistan, and
- iv. Review the planning, execution and impact assessment in selected PSDP projects.

3.4 Legal framework governing the PSDP projects

Legal framework adopted for the current assignment included Manual for Development Projects, Public Financial Management Act-2019, Guidelines for Project Management, Guidelines for Appointment of Independent Project Director, Classification of Development Expenditure, Planning Commission Performa I to V, Pakistan Railways Engineering Code, Pakistan Railways Mechanical Code and other applicable internal controls.

3.5 Stakeholders and government organizations identified as directly/indirectly involved

It was very important that all stakeholders and government organizations be kept informed of the changing financial position of Pakistan Railways keeping in view the complexity and diversity of its operations. The following Government organizations were directly and indirectly involved as major stockholders:

- i. Ministry of Railways
- ii. Pakistan Railways
- iii. Ministry of Finance
- iv. Ministry of Planning, Development and Special Initiative
- v. Ministry of Defense
- vi. Ministry of Industries and Production

3.6 Role of important organizations

The Ministry of Railways (MoR) is responsible for administrative control, policy formulation and strategic planning including concerns like sustainability and long term development. *Project management activities are carried out at three different levels: (a) Sponsoring Ministry, which makes policy decision, (b) Project*

Director, who supervises day to day affairs of the project and (c) Projects wing of Planning Commission which acts as central agency to oversee execution of projects.⁵⁰

Project identification & formulation is the responsibility of MoR. Development projects are prepared on the approved formats (PC-I, II) and according to guidelines of Planning Commission.

A comprehensive project appraisal/assessment is carried out in the Planning Commission at approval stage. The projects having financial outlay up to Rs 2,000 million are approved by the DDWP, projects costing more than Rs 2,000 million but less than Rs 10,000 million are submitted to the CDWP for their consideration. ECNEC is the forum for projects having worth more than Rs 10,000 million. After sanction by Planning Commission, MoR issues administrative approval for the project. The final authority in the approval of funds is the National Economic Council (NEC). Funds are released by Ministry of Finance.

MoR is responsible for appointment of project directors for execution of projects in consultation with Planning Division, Finance Division and Establishment Division. The physical activities like civil work, procurement of machinery & equipment and train operations are undertaken in accordance with the approved Work Plan/Activity Chart under the supervision of Additional General Manager Infrastructure, Mechanical, and Traffic accordingly.

After the completion of a project, MoR draws completion report (PC-IV) and forwards it to projects wing of Planning Commission. MoR is responsible for submission annual performance report (PC-V) over a period of five years, to Planning Commission.

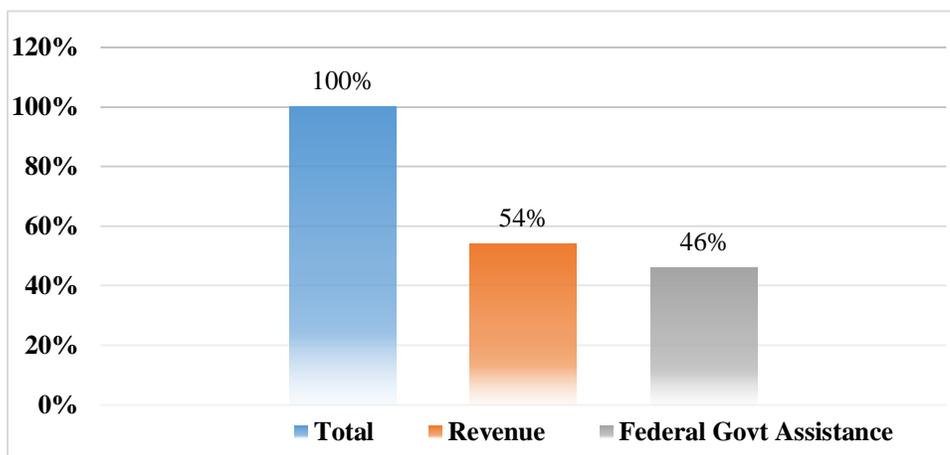

The evaluation of on-going and completed projects is one of the basic responsibilities of the Planning Commission. The analyst looks systematically at the elements of success or failure in the project experience to learn how to plan better for future. There are two layers to monitoring i.e. internal and external monitoring. Internal monitoring is the responsibility of MoR through concerned AGMs. External monitoring is undertaken by outside agencies like the projects wing of the Planning Commission and donor agencies.

⁵⁰ Planning Commission Guidelines for Project Management

3.7 Organization's Financials

Pakistan Railways covered only 54% of its total expenditure from revenue generation in last ten years (2013-14 to 2022-23), a gap of 46% of revenue expenditure was met by assistance from Federal Government. The accumulated losses for last ten years piled up to Rs 387.30 billion and Federal Government had to bridge the deficit by injecting Rs 406.96 billion through grant in aid. Whereas, an amount of Rs 206.72 billion was invested by Federal Government through PSDP as development fund, which did little good to ameliorate financial woes of the entity.

Sources of funds of Pakistan Railways (2013-14 to 2022-23)

Source: Commercial Accounts of Pakistan Railways

Analysis of last ten years' financial data of PR depicted that there was an upward trend of losses in spite of heavy funding by Federal Government and numerous development projects. The gap (loss) between revenue and expenditure was widened by fifty percent during the last decade, which raises serious concerns about the sustainability of the organization as a going concern in next decade, if the same trend continues unabated.

3.8 Field Audit Activity

The record related to PSDP projects was examined at PR Headquarters and Ministry of Railways Islamabad. Audit activity was kept limited to scrutiny of record; physical verifications of assets could not be conducted due to time constraints. The audit was conducted in accordance with the International Standards of Supreme Audit Institutions (ISSAIs) as envisaged in Financial Audit Manual (FAM) of DAGP.

3.8.1 Audit Methodology

Audit was based on analysis of qualitative and quantitative data i.e. Pakistan Vision, 2025, National Transport Policy-2018, Pakistan Railway Strategic Plan-2018, Pakistan Railways Investment Plan, Financial Statement of Pakistan Railways, PSDP expenditure statement, Project Concept Notes, PC-I to PC-V, project management, project execution and other related data. The manual methodologies/procedures used during audit were i.e. inquiry, observation, inspection, vouching, tracing, confirmation and analytical procedures. Moreover, data was analyzed through CAATs. The compliance of applicable rules and policies was also reviewed.

3.8.2 Audit Analysis

Audit analysis is comprised of review of internal controls and detailed assessment of cash inflow and effective utilization of PSDP portfolio, role and performance of PR and all other details along with impediments affecting the performance of PR.

3.8.2.1 Review of Internal Controls

Internal controls framework related to PSDP portfolio were studied and analyzed to get an overall understanding throughout the project life cycle i.e. Manual for Development Projects, Public Financial Management Act-2019, Guidelines for Project Management, Guidelines for Appointment of Independent Project Director, Classification of Development Expenditure, Planning Commission Performa I to V, Pakistan Railways Engineering Code, Pakistan Railways Mechanical Code and other applicable internal controls. The specific

instances of internal controls weaknesses and non-compliance of internal control were found through observations and evaluation of internal control system.

Internal controls placed to prevent and deter irregularities were advisory and recommendatory in nature and did not involve any punitive measures to mitigate the risks. The following repeated regulatory violations in project management were observed during thematic audit due to weak internal controls:

Stage-wise assessment of internal controls

SN	Internal Controls (IC)	Assessment of Internal Controls	Reference of ICs
1	Feasibility study shall be mandatory for projects costing Rs 500 million or above	PR initiated 45 projects without feasibility studies during last decade	Para 2.55 of Manual for Development Projects-2021
2	Project scope includes only project requirements necessary to achieve envisaged objective. Cost estimates must be prepared with due care and diligence so that these only require revision on an exceptional basis	35% of projects frequently revised PC-Is of 26 projects were revised 1 time to 3 times due to vague scope and unrealistic cost estimates	Para 2.48 of Manual for Development Projects-2021
3	No proposal for revision in cost or scope will be brought within two years of approval/execution of a project	15 projects revised within two years of approval/execution	Guidelines for Project Management-2005
4	For estimation of project implementation period, implementation of similar	Time overrun in 77% of portfolio	Para 2.57 of Manual for Development Projects-2021

SN	Internal Controls (IC)	Assessment of Internal Controls	Reference of ICs
	projects in the past be considered	58 projects experienced time overrun 1 to 15 years	
5	PD should not be transferred during currency of project	PD transferred up to 19 times 442 PDs were posted in 75 projects	Guidelines for Appointment of Independent Project Director in Development Projects
6	Independent PD mandatory for projects costing Rs 3,000 million and above	Independent PDs not appointed in 24 projects	
7	<i>For project closure, executing agency should state that whether project has been implemented as per approved cost, scope and time. In case of variation, reasons are provided</i>	15 projects were closed with left over scope of works but reasons of variation in scope, cost and time were not provided in PC-IVs	<i>Para 6.12 checklist for project closure (item No. 16) of Manual for Development Projects-2021</i>
8	Project objectives should be linked to the SDGs indicating the specific goals, being addressed by the project	30 projects were initiated but project objectives were not linked to the SDGs indicating the specific goals, being addressed by these projects	Para 2.42 of Manual for PSDP projects - 2021

SN	Internal Controls (IC)	Assessment of Internal Controls	Reference of ICs
9	The fund's utilization capacity of the executing agency must be kept in view while determining the financial phasing of the project	Funds amounting to Rs 112.74 million remained utilized	Para 2.55 of Manual for Development Projects
10	Economic analysis (NPV) is done by pricing of project inputs and output and calculating net present value is of the ways to establish that public money was worth spending on development projects	However, there was net loss on investment in 11 rolling stock projects	Para 3.22 of Manual for Development Projects-2021
11	At the project closure, submission of the PC-IV to the Planning Commission by the sponsoring agency is mandatory without any exception	PC-IVs of 23 completed projects were prepared with a delay of 1 to 6 years	Para 6.7 Manual of Development Project-2021
12	Sponsor shall be responsible to submit annual report on operation and maintenance, outcome, and impact of	132 PC-Vs of 46 completed projects were not prepared/submitted	Clause (c) of subsection 1 of Section 18 of PFM Act, 2019

SN	Internal Controls (IC)	Assessment of Internal Controls	Reference of ICs
	projects on PC-V format for five consecutive years		
13	The scope of the project must be clearly mentioned	Scope of 6 projects related to Special Repair and re-commissioning of rolling stock was vague	Para 2.45 of Manual for Development Projects-2021

The repeated regulatory violations in project management resulted into ineffective utilization of PSDP portfolio for development of Pakistan Railways.

3.8.2.2 Critical Review of PSDP Portfolio

A. Achievement of targets

Pakistan Vision-2025 states that Railway will be revived as a socially and financially viable organization by increasing share of rail in transportation sector from 4% to 20% by increasing speed from 95 km/h to 120/140 km/h, doubling of tracks on main line sections, enhancing line capacity with a modern signaling system and development of a separate freight corridor on Railway tracks.⁵¹

National Transport Policy-2018 states that Rail transport in Pakistan will connect urban centers, the ports and specific industrial zones. For passengers, PR will cater primarily to frequent and direct inter-urban passenger transport services, providing connectivity between urban centers and public transport hubs. The primary role of rail in the freight sector is to provide direct long-haul freight transport between industrial zones across the country and to the ports. Railway

⁵¹ Pakistan Vision-2025 Page No.71, 87, 88 & 103

infrastructure will be modernized and expanded to improve capacity, provide connectivity across the country and improve reliability of services.⁵²

Critical review of performance of Pakistan Railways against the targets set by Federal Government revealed that the share of Pakistan Railways in transportation sector had not been raised to desired level despite lapse of eight years (2015 to 2023) and funds allocation of Rs 343.11 billion. A fivefold increase in PR's share in transportation sector was dependent on two tangible factors (i) reasonably sized and operationally sound rolling stock (ii) resilient infrastructure, coupled with intangible factor of pragmatic business development programs for effective and efficient utilization of tangible factors.

The average availability of locomotives for operational use stood at 484 during 2010-15 which had been reduced to 461 in 2023, even though a hefty sum of Rs 122.50 billion had been doled out as PSDP funds for twenty-four projects related to rolling stock improvement during last decade. The negative tendency in terms of value for money was a logical consequence of rampant cost and time overruns in majority of projects. The fact was a testimony that the trend will continue in future. Internal controls placed to prevent and deter overruns were advisory and recommendatory in nature and do not support the high risk areas of project implementation. Ideally, the level of investment on rolling stock was directly proportional to term of useful life span earned by such investment but there were weak internal controls to bar earlier than expected and duplicate repairs before the expiry of such period.

A parallel system of rolling stock overhauling was being run from revenue budget and specifications of such works blur the boundaries between PSDP and revenue funded works. Since Pakistan had no modern mechanical industry, majority of the spare parts used in rolling stock projects were imported from OEM involving foreign exchange component (FEC) which was sensitive and vulnerable to exchange rate fluctuations, thus, time overrun almost always leads to exorbitant cost overruns. Delayed completion and unexpectedly higher costs erode the

⁵² National Transport Policy Page No. 3, 7, 11, 15, 19 & 20

intended benefits of projects along with creation of operational hurdles and widening investment efficiency gap.

Most of PR's track and bridge infrastructure needs refurbishment.⁵³ Pakistan Railways claimed maximum speed of 105 kilometers per hour (kph), whereas, due to limitations of rolling stock and infrastructure, actual average speed of mail/express trains was 44 kph. The average speed of freight trains was 18.9 kph in 2022-23. The track length under speed restriction had increased from 402 km (2018) to 730 km (2023).⁵⁴ In last decade, not a single project regarding development of separate freight corridor had been initiated. Railway system had not been significantly upgraded and modernized. Separate freight corridor had not been developed as envisaged.⁵⁵

B. PSDP share of PR in transport sector

PR role in the transport sector had not been supported by appropriate volume of investment and flow of funds had been heavily tilted towards NHA. In order to achieve the targets, set in Pakistan Vision-2025 and National Transport Policy-2018, adequate funds were not allocated for up gradation and modernization of Pakistan Railways. During the last 10 years, Rs 343.10 billion were allocated to Pakistan Railways as compared to NHA allocation under PSDP head amounting to Rs 1,470.76 billion (**Annexure-20**).⁵⁶

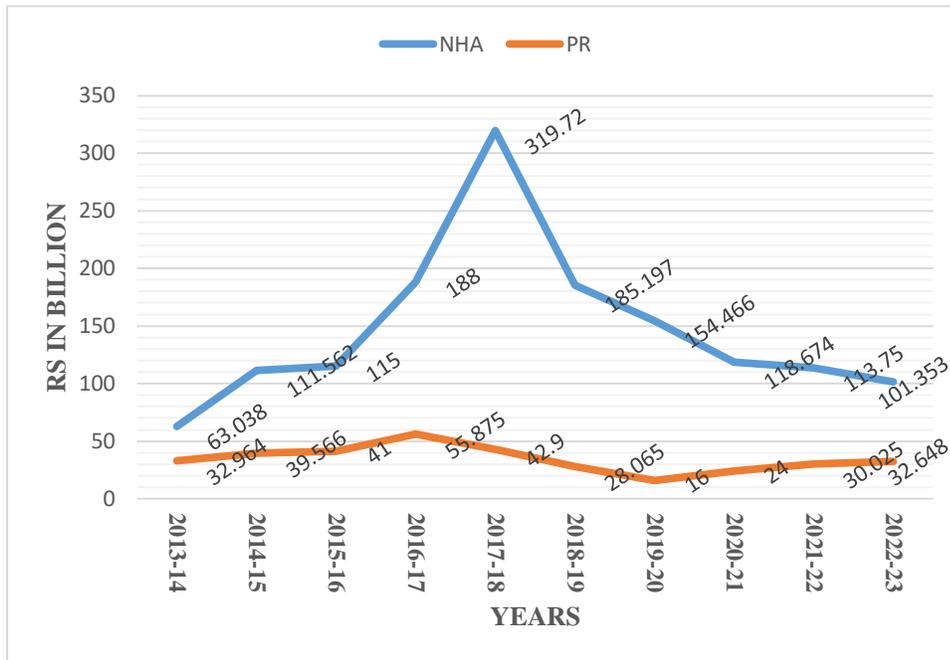

⁵³ CAREC report on Railway Sector Assessment for Pakistan, March 2021

⁵⁴ Pakistan Railways Year Book 2020-21

⁵⁵ Financial Statement of PR 2013-14 to 2022-23

⁵⁶ PSDP portfolio from 2013-14 to 2022-23 (NHA Network length 14,480 km, PR 11,492 track km)

PSDP allocation PR and NHA (2013-14 to 2022-23)

Objectives set in Vision-2025 and National Transport Policy had not been achieved due to low priority area and inefficient project management practices. Targets regarding increase in train speed and rail share, modernization of infrastructure, cross border connectivity, development of dedicated freight corridor were not achieved.

C. Linkage of PSDP with Sustainable Development Goals

Para 2.42, 3.15 and 3.18 of Manual for Development Projects provides that the project objectives should be linked to the SDGs indicating the specific goals being addressed by the project. Social and environmental analysis of projects should show, how the project is contributing to the attainment of relevant SDGs in national or sub-national contexts.

After adoption of SDGs by Pakistan in 2016, PR initiated 30 PSDP projects from 2016-17 to 2022-23 but objectives of these projects were not linked to the SDGs indicating the specific goals, being addressed by the projects. Social and environmental analysis of projects had not showed how these projects had contributed to the attainment of relevant SDGs targets in national or sub-national contexts. PC-I of these projects did not show, how these projects were able to provide affordable and sustainable transport systems (SDG-11) (**Annexure-25**).

Linkage of SDGs with project objectives

(Rs in million)

Details	Nos. of Projects	Estimated Cost	SDGs linked at planning stage
On-going projects	24	90,648.58	Nil
Completed projects	6	3,214.40	Nil
Total projects initiated after adoption of SDGs	30	93,862.98	Nil

Source: PC-Is and PC-IVs of projects

Critical review of PC-I of thirty projects initiated after adoption of SDGs revealed that project objectives were not linked with relevant SDG targets at the planning stage.

D. Management of PSDP portfolio by Pakistan Railways

Pakistan Railways had a development portfolio comprising 107 projects from 2013-14 to 2022-23.

(Rs in million)

SN	Particulars	Nos. of Projects	Estimated Cost	Expenditure
1	Not executed	24	125,367.70	-

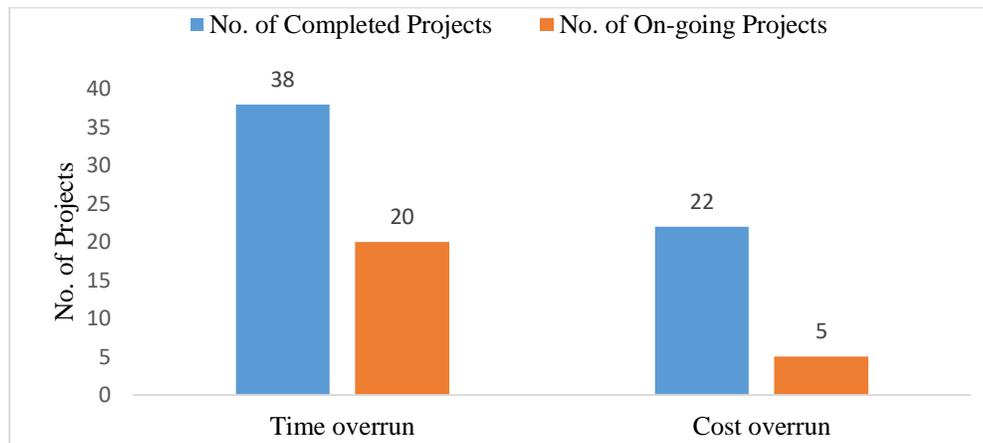

2	Premature closure	8	94,639.37	4,891.14
3	Closed with leftover scope of works	15	58,460.44	49,422.52
4	Completed	31	149,607.81	142,465.46
5	On-going (2022-23)	29	101,477.42	70,437.36
Total		107	529,552.74	267,216.48

Source: PSDP portfolio of PR 2013-14 to 2022-23 and PC-IVs of completed projects

Pakistan Railways had not formulated strategic investment plan for future development in the organization. Investment plan was not available with Railway management covering the requirements of number of locomotives, wagons, coaches, on the basis of passenger and freight traffic demands, size of obsolete rolling stock and infrastructure. PR commenced 08 infrastructure projects which were prematurely closed at very initial stages by incurring wasteful expenditure of Rs 4,891.14 million. Further, 24 approved projects, reflected in PSDP were not executed. Thirty percent (30%) projects of the portfolio were not initiated at all during last decade. Furthermore, 15 projects were closed with reduced scope of works. Only 31 projects were executed and completed during the last ten years. Non-execution of approved projects, premature closure during execution and closure of with leftover scope of works indicated that PR PSDP portfolio was inconsistent with the national priorities.

During last decade, 28 out of 46 completed projects were closed with time overrun from 1 year to 13 years, whereas, 22 projects were closed with cost overrun up to 212%. Similarly, 20 out of 29 ongoing projects were with time overrun from 1 year to 13 years, where, 5 ongoing projects had experienced cost overrun up to 727%.

Implementation timelines vs cost escalation (2013-14 to 2022-23)

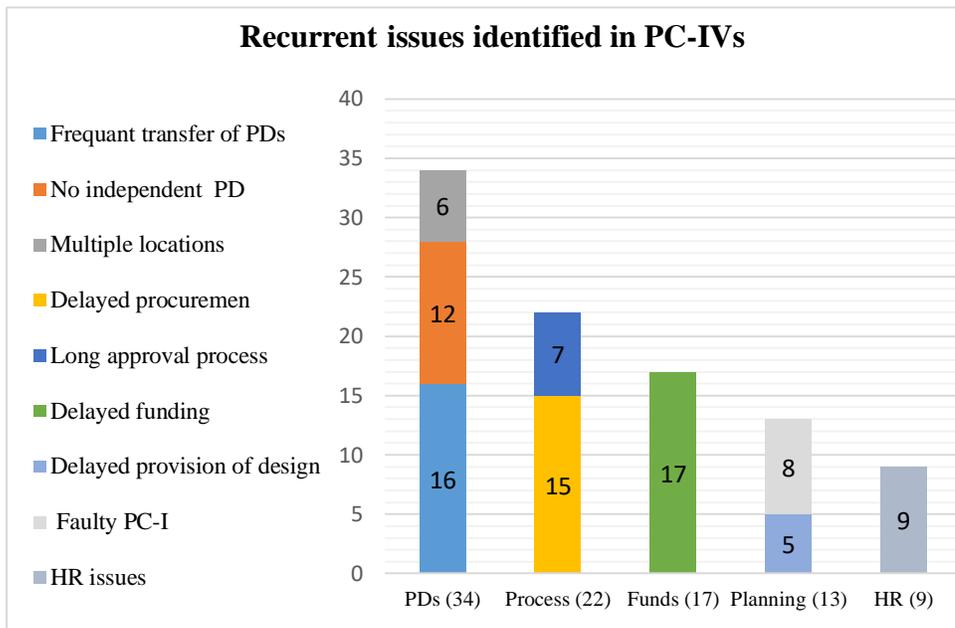

Source: Planning Commission of Pakistan & MoR

E. Recurrent issues in PSDP portfolio

PC-IVs of 46 projects were reviewed and it was found that management identified 05 recurrent issues related to project management during the execution of projects (**Annexure- 26 & 27**).

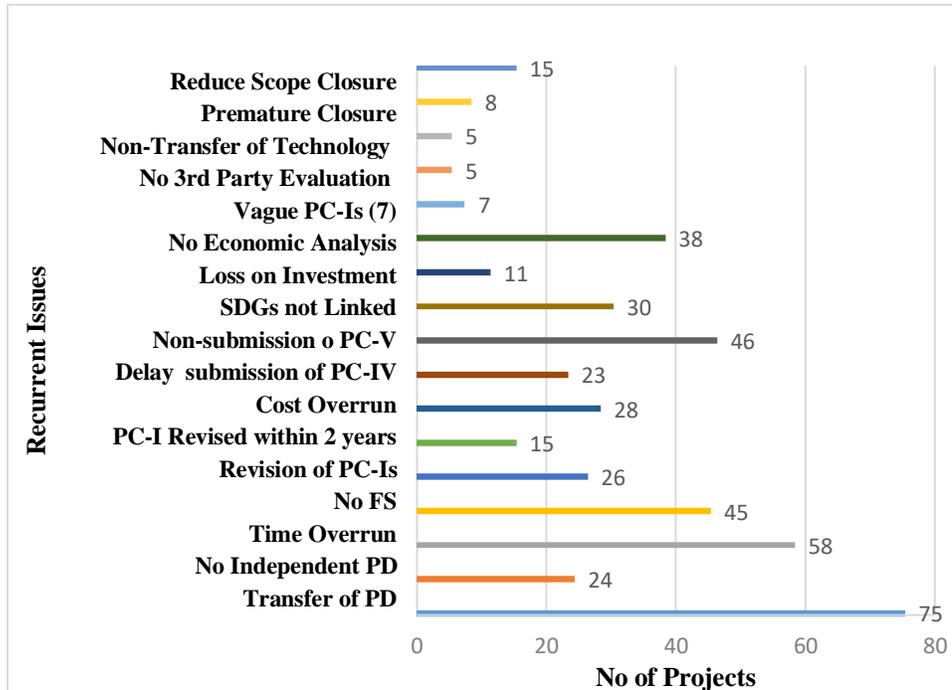

Issues related to Project Director were repeated 34 times i.e. frequent transfer of PDs during project execution, non-independence of PDs in decision making regarding project activities and insufficient control of PDs on project activities due execution at multiple locations. Issue of lengthy PR approval processes was identified by PDs in 22 projects. Delay in provision of funds was faced by PDs in 17 projects. Poor planning of project activities was highlighted by 12 PDs. Seven PDs faced problems regarding non-availability of skilled HR for execution of projects.

Audit observed that same issues were also existent in on-going projects as pointed out in observations. This indicated lack of coordination among the project activities as same issues were faced in various projects and management failed to learn the lesson in one project and implement in other projects.

Source: PC-IV of completed projects during last decade

Recurrent issues assessed by Audit

Source: PSDP portfolio of Pakistan Railways (2013-14 to 2022-23)

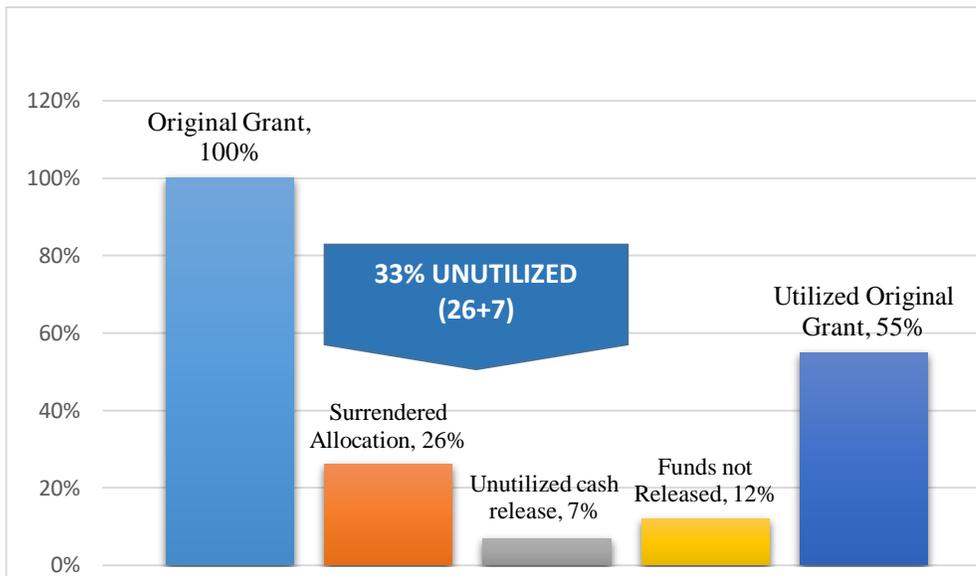

Planning remained the bottleneck in translating resources into achievements, planning documents were observed to be vague and non-specific leaving room for subsequent scope and cost revisions which germinated into consequent execution failures. Monitoring and evaluation could not fuel pragmatic and informed decision making by identifying shortcomings in projects and feedback was either delayed or altogether evaded.

F. Non-utilization of PSDP funds

During last 10 years, out of allocated PSDP grants, Pakistan Railways was able to utilize only 55 % funds on various projects. Out of allocated funds of Rs 343.11 billion, an amount of Rs 90.08 billion was surrendered by Pakistan Railways and Rs 22.66 billion remained un-utilized from cash releases. One third

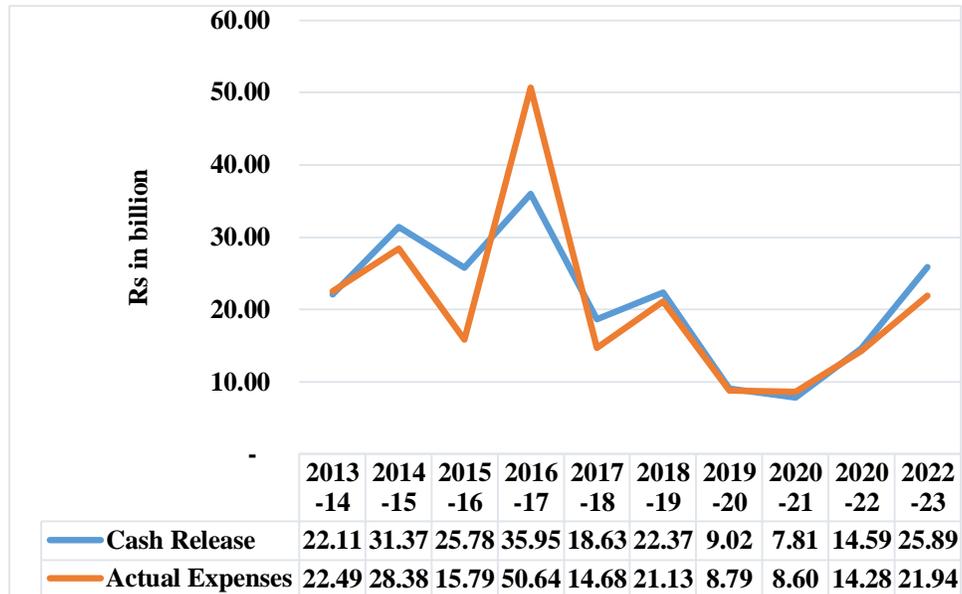

(33%) of allocation (Rs 112.74 billion) was not utilized by Pakistan Railways due to inefficiency and incapacity of Pakistan Railways.

Utilization of PSDP grant (2013-14 to 2022-23)

Source: Financial Statements of PR 2013-14 to 2022-23

PSDP cash release vs expenditure

Source: Financial Statements of PR 2013-14 to 2022-23

The figures depict the trend of cash releases vs. actual expenditure during the last ten years. Actual expenditure remained below the cash releases however, in 2016-17 and 2020-21 they were above the cash releases due to incurring of expenditure out of un-utilized cash releases of proceeding years. Thus, surrender of funds to tune of Rs 90.08 billion and non-utilization of released funds Rs 22.66 billion showed PR incapacity to effectively utilize PSDP portfolio.

G. Initiation of projects without feasibility studies

Pakistan Railways initiated 45 PSDP projects without feasibility studies and linkage between investment and benefits could not be quantified and evaluated. Execution without feasibility studies led to disconnect between set objectives and actual results.

Impact of projects without feasibility studies

Feasibility Studies Required	Not Conducted	Impact	
Feasibility studies required in 15 out of 29 on-going projects	14	3 Projects with cost overrun	Up to 53%
		9 Projects with time overrun	1-10 Years
		5 Projects with revisions in PC-1	2 Projects PC-1 revised twice and 3 projects PC-1 revised once
Feasibility studies required in 31 out of 46 Completed projects	31	18 Projects with cost overrun	Up to 212%
		27 Projects with time overrun	1-13 Years
		13 Projects closed with reduced scope	-
		17 Projects with Revisions in PC-1	11 projects revised once, 5 projects revised twice and 1 project revised thrice
Total	45	-	-

Eight (08) feasibility studies were conducted by Pakistan Railways through PSDP portfolio during 2013-14 to 2022-23 at the cost of Rs 1,058.16 million, wherein, the consultant declared seven proposals for projects as unfeasible and only one was declared feasible which could not be initiated by PR. The sample of feasibility studies conducted by consultants extrapolates that majority of the proposals for projects were not viable as per third party evaluation but the same was done away with in majority of the projects (**Annexure-28**).

H. Transformation of economical into uneconomical projects

Audit observed that 35% of project portfolio went into scope revision which establishes the fact that financial needs were understated to approving forums which led authorities towards favorable decisions at the time of inception and ground realities pushed the projects into financial unviability. Review of PC-IVs of rolling stock projects revealed that 11 projects were feasible with positive net present value (NPV) of Rs 21,794.43 million at the inception stage but out of these projects, seven (07) projects became un-economical due to negative NPV of Rs 14,072.45 million at completion stage.

Projects with negative NPV

(Rs in million)			
SN	Project Name	NPV as per PC-I (Planning Stage)	NPV as per PC-IV (Completion Stage)
1	Manufacture of 05 Locomotives	279.52	-194.25
2	Procurement of 585 Hopper Wagons and 20 Bogie Brake Vans	2,923.76	-1,084.96
3	Procurement of 58 Locomotives	11,980.46	-9,074.43
4	Procurement of 300 Traction Motors	377.66	-189.99
5	Procurement of 530 High Capacity Wagons	1,078.43	-
6	Procurement of 202 Carriages	1,751.96	-

7	Procurement of 780 Hopper Wagons and 20 Bogie Brake Vans	-	-
8	Rehabilitation of 27 Locomotives	956.27	-1,273.19
9	Special Repair to 100 DE Locomotives	112.21	-1,431.04
10	Special Repair to 800 Coaches and 2000 Wagons	363.53	-858.59
11	Rehabilitation, up-gradation and conversion of 400 Coaches	540.14	-
12	Special Repair of 150 Locomotives	1,430.49	33.10
Total		21,794.43	-14,072.45
Grand Total		Rs 35,866.88 million	

PR had not performed economic analysis of 83% completed projects at planning/ completion stages which reflected preparation of poor quality of PC-Is and PC-IVs. Transformation of economical into un-economical projects was caused by increase in capital outflow and less revenue inflow due to extension in implementation period, slow physical progress, delayed procurements, inefficient utilization of funds and PR's incapacity to execute PSDP projects. This state of affairs depicted ineffective utilization of PSDP portfolio by Pakistan Railways as completion of projects with negative NPV resulted into loss of Rs 35,866.88 million to public exchequer (**Annexure-29**).

I. Sectoral utilization of PSDP portfolio

Development portfolio of Pakistan Railways remained rolling stock dominant during the last 10 years. PR utilized 60.80% funds on rolling stock, 38.22% on infrastructure, 0.73% on governance and only 0.26% on business development. Sector wise allocation and expenditure indicated the fact that allocation on infrastructure was on top priority but on the other hand expenditure on infrastructure became second priority as the flow of utilization of funds was diverted to rolling stock. Further, 17 projects of infrastructure sector were not

commenced and 08 projects commenced but prematurely closed at their initial stage.

Sector-wise utilization of PSDP portfolio

(Rs in million)

Sector	No of Projects	Allocation	Expenditure	Allocation %	Expenditure %
Rolling Stock	24	164,194.77	122,464.29	48.79%	60.80%
Infrastructure	43	165,325.49	76,995.23	49.13%	38.22%
Governance	6	5,304.77	1,461.26	1.58%	0.73%
Business Development	2	1,708.62	514.58	0.51%	0.26%
Total	75	336,533.65	201,435.36	100%	100%

Due to imbalanced utilization of PSDP portfolio, track and allied infrastructure was neglected which resulted into non-achievement of targets set in Pakistan Vision-2025 and National Transport Policy-2018 i.e. increased train speed and line capacity, modernization of infrastructure, cross boarder connectivity and development of dedicated freight corridor.

J. Deferred revenue repairs shifted to PSDP portfolio

Analysis of PSDP portfolio of Pakistan Railways indicated that out of 75 completed and on-going projects, only 40 projects were related to development and 26 related to rehabilitation and maintenance while other 9 were related to feasibility studies. An amount of Rs 19.28 billion was incurred on deferred revenue repairs of rolling stock through five PSDP projects in last decade (**Annexure-30**).

Development and non-development projects

(Rs in million)

Nature of Project	No. of Projects	Estimated Cost	Expenditure
Development	40	203,912.44	183,333.58
Rehabilitation	21	81,154.56	58,624.15
Feasibility Study	9	1,976.90	1,083.37
Special Repair of Rolling Stock	5	22,501.78	19,284.24
Total	75	309,545.67	262,325.34

Long due and accumulated repair and maintenance works related to rolling stock were designed as development works under the PSDP portfolio and thus the concept of development was compromised ab initio.

K. Unclear scope and unrealistic cost estimates

Review of PC-Is of PSDP project indicated that PC-Is were not prepared with due care and diligence. Scope of various projects was not clear and final, which experienced repeated revisions. PC-I of 26 projects were revised due to change in scope and cost during last decade. PC-Is of 3 projects were revised thrice, 6 projects were revised twice and 17 projects were revised once during their implementation period. The estimated cost of these 26 projects showed a net increase of Rs 61,349.35 million. Further, out of 26 PC-Is, 15 PC-Is were revised within 2 years from the last revision/approval date in contravention to the guidelines of Planning Commission. This indicated that projects were initiated with unfirmed scope of work and unrealistic cost estimates, which resulted into cost overrun and non-achievement of envisaged benefits within planned gestation (**Annexure-31 & 32**).

L. Non-transfer of technology and absence of dedicated R&D wing

In last ten years (2013-14 to 2022-23), no R&D project was initiated by PR and solely dependent on OEMs for maintenance of rolling stock. Pakistan Railways initiated 5 PSDP projects for procurement / manufacture of rolling stock with transfer of technology (ToT), however, in agreements the ToT was without financial impact and delivery timelines. Consequently, PR failed to obtain drawings, instruction books and as-made tracings of rolling stock from contractors/manufacturers. Non-transfer of technology resulted into non-development of R&D wing for self-dependence in manufacturing and maintenance of rolling stock to discourage the monopoly of OEMs and lessen the burden on public exchequer. This indicated that PR focus remained on short term availability of rolling stock and dependent on OEM.

3.8.2.3 Significant Audit Observations

Observation-1

Absence of Strategic Investment Plan for development of Pakistan Railways

According to O.M No. 4(5) PIP/PC/2019-20 dated October 22, 2020, the Planning Commission of Pakistan directed the MoR to develop Strategic Investment plan to make Railways national leading profitable, competitive, sustainable service delivery public organization. The Planning Commission directed the Minister of Railways to take immediate measures to develop the Strategic Investment Plan and share it with stakeholders.

During audit, it was observed that Railway management had not formulated Strategic Investment Plan for development of Pakistan Railways. During last decade, Railway management was not fully aware about the demand of locomotives, wagons, coaches, and required infrastructure based on traffic demands. Analysis of sector-wise expenditure revealed that development portfolio of PR remained rolling stock centric and track and allied infrastructure remained neglected, 60.80 % of total funds were utilized on rolling stock, 38.22% on infrastructure 0.73% on governance whereas, only 0.26% on business development during last decade. Further, PR commenced 08 infrastructure projects which were prematurely closed at very initial stages by incurring wasteful expenditure of Rs 4,891.14 million and the stakeholders were deprived from envisaged benefits of projects. Twenty-four (24) approved projects, reflected in PSDP were not executed at all which comes to 30% of the PSDP portfolio. Absence of Strategic Investment Plan resulted in imbalanced sectoral development, premature closure of projects and non-execution of approved projects (**Annexure-33**).

Premature closure of projects

(Rs in million)

Status	Sector	No. of Projects	Estimated Cost	Allocation	Expenditure
Not Executed	Rolling Stock	7	91,608.00	3,805.00	Nil
	Infrastructure	17	33,759.70	184.20	Nil

Prematurely Closed	Infrastructure	8	94,639.36	5,571.01	4,891.13
Total		32	220,007.06	9,560.21	4,891.13

Source PSDP of Planning Commission of Pakistan 2013-14 to 2022-23 and PC-IVs

The matter was taken up with the management in November, 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC noted that the response to audit observation was unprofessional. The PO (DG/Planning) should provide comprehensive response covering national transport policy framework and other related documents specific to the investment planning to Pakistan Railways within one week. Compliance of DAC directives was awaited.

Audit recommends that Strategic Investment Plan be formulated considering future demand of rolling stock, infrastructure and passengers and freight traffic to make PR into profitable, competitive, sustainable service delivery public organization. The matter of closure of premature projects and non-execution of approved projects be probed to fix the responsibility for utilization of precious resources on futile works.

Observation-2

Non-transfer of unutilized released funds of PSDP projects- Rs 22,140.62 million

Para 7 of Form-17 (release of funds in assignment account) of Receipt and Payment Rules-2021 of Finance Division provides that the amount remaining unutilized at the close of the financial year would lapse. The amount remaining unutilized on the 30th June each year may be transferred and credited in the account of the Federal Government.

During audit it was observed that an amount of Rs 22,140.62 million out of released PSDP funds was not utilized in pertinent years and unutilized amount kept on accumulating during 2013-14 to 2022-23. Further, left over amount of Rs 15,625.09 million was utilized in succeeding years irregularly. During the FY 2016-17, PR management incurred PSDP expenditure of Rs 50,640.47 million against cash release of Rs 35,948.11 million and remaining expenditure of

Rs 14,617.61 million was met from savings of previous years. Balance of unutilized funds against the relevant years is given below:

Balance in PSDP Account No. XVIII

(Amount in Rs)			
Date	Balance	Unutilized funds	Expenditure
30.06.2013	216	216	-
30.06.2014	882,824,787	882,824,571	-
30.06.2015	4,550,567,046	3,667,742,259	-
30.06.2016	14,715,447,406	10,164,880,360	-
30.06.2017	97,838,468	-	14,617,608,938
30.06.2018	2,352,489,321	2,254,650,853	-
30.06.2019	4,958,017,176	2,605,527,855	-
30.06.2020	5,525,468,550	567,451,374	-
30.06.2021	4,517,986,766	-	1,007,481,784
30.06.2022	4,618,992,126	101,005,360	-
30.06.2023	6,515,530,052	1,896,537,926	-
Total	-	22,140,620,774	15,625,090,722

Source: Pakistan Railways Federal Government Account No. XVIII

Non-surrender of released funds at the end of financial years was due to ineffective public funds management, slow physical and financial progress of the projects. Further, these funds had been accumulated during last 10 years and Pakistan Railways Federal Government Account No. XVIII reflected a credit balance of Rs 6,515.53 million on 30.06.2023. Ineffective and underutilization of PSDP funds resulted in non-achievement of annual targets, envisaged benefits, delay in completion and increase in capital cost of projects.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the PO (Member Finance) to provide a comprehensive reply within one week. Compliance of DAC directives was awaited.

Audit recommends that the matter be probed to fix responsibility for non-transfer of unutilized funds to Finance Division and unutilized funds may immediately be intimated to Planning Commission and transferred to Finance Division. Financial management controls be improved to avoid recurrence.

Observation-3

Non-achievements of envisaged benefits/targets– Rs 112.74 billion

Para 2.55 of Manual of Development Projects-2021 states that the financial phasing of a project is to be given for each fiscal year, related to the physical work proposed to be undertaken, keeping in view the implementation of similar projects in the past. It should be as realistic as far as possible. The funds utilization capacity of the executing agency must be kept in view while determining the financial phasing of the project. Physical phasing/implementation plan of major items/deliverables may be provided, and financial phasing should be derived from it.

During audit, it was observed that PSDP funds amounting to Rs 112.74 million remained unutilized. During last decade, PSDP allocation was Rs 343.11 billion and out of total allocated funds Rs 90.08 billion was surrendered and Rs 22.66 billion remained unutilized out of cash releases. In this way, 33% of allocation was not utilized by the concerned project directors which resulted in cost overrun, delay in completion of projects and non-achievement of planned objectives. The comparison of allocated funds, cash releases and their utilization indicated that after surrender of unrequired funds only Rs 40.06 billion were not released by Finance Division and out of released funds Rs 22.66 billion had not been utilized by the management. The above state of affairs indicated that if unreleased funds of Rs 40.06 billion had been released, the same would have remained unutilized as available funds of Rs 22.66 billion were not utilized. Thus,

the management point of view regarding non-provision of adequate funds was not correct (**Annexure-34**).

Utilization of PSDP grant by PR

(Rs in billion)

Year	Allocation	Funds Released	Released Funds utilized	Released funds Un-utilized	Surrender	Funds not released
2013-14	32.96	22.11	22.11		4.95	5.91
2014-15	39.57	31.37	28.38	2.99	1.33	6.87
2015-16	41.00	25.78	15.79	9.99	14.72	0.50
2016-17	55.88	35.95	35.95	-	-	19.93
2017-18	42.90	18.63	14.68	3.94	20.88	3.39
2018-19	28.07	22.37	21.13	1.25	5.27	0.42
2019-20	16.00	9.02	8.79	0.23	6.98	-
2020-21	24.06	7.81	7.81	-	13.24	3.01
2020-22	30.03	14.59	14.28	0.31	15.40	0.03
2022-23	32.65	25.89	21.94	3.95	7.30	-
Total	343.11	213.51	190.86	22.66	90.08	40.06
Unutilized 22.66+90.08 = Rs 112.74 billion						

Source: Financial Statements of PR 2013-14 to 2022-23

Non-utilization of allocated and released funds was caused by poor planning and poor project management e.g. initiation of projects without feasibility studies, work design, finalized tender documents, indefinite and multiple revisions in scope of works, un-realistic financial and physical phasing of projects. Initiation of projects without considering the existing workload and capacity of Railway workshops, availability of material and dedicated Project Directors, lengthy

procurement process, poor monitoring and evaluation of projects, lack of PR Strategic Investment Plan and overall institutional incapacity to execute development projects led to erosion of planned benefits.

The matter was taken with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC noted that response to audit observation was unprofessional. The PO (DG/Planning & Member Finance) should provide a comprehensive response within one week. Compliance of DAC directives was awaited.

Audit recommends that the matter be probed to fix responsibility against concerned Project Directors for regular surrenders and non-utilization of released funds. Recurring issues which caused delay in project implementation be fixed by improved project management for effective utilization of PSDP portfolio.

Observation-4

Excess cost due to frequent revision of scope of projects –Rs 61,349.35 million

Para 2.45 of Manual for Development Projects-2021 provides that the project scope includes only the project requirements necessary to achieve the envisaged objective. The scope of the project must be clearly mentioned. Further, Para 2.48 provides that the cost estimates of a project must be prepared with due care and diligence so that these only require revision on an exceptional basis and project implementation is not delayed due to the non-availability of funds. Furthermore, Para 3.54 (iii) provides that to avoid frequent revisions, no proposal for revision in cost or scope will be brought within two years of approval/execution of a project. Further, Guidelines for Project Management-2005 provides that no revision of PC-I is required if the cost increase is due to depreciation of Pak rupee in foreign exchange cost.

During audit, it was observed that PC-Is of 26 projects (completed-15 and on-going-11) were revised due to need for deviation from planned scope and cost during last decade i.e. 2013-14 to 2022-23. PC-Is of 3 projects were revised thrice, 6 projects were revised twice and 17 projects were revised once during their

implementation period. The estimated cost of these 26 projects showed a net increase of Rs 61,349.35 million. Further, 15 PC-Is (6+9) were revised within two years from last revision/approval dates in violation of criteria referred above (**Annexure-31 & 32**).

Cost increases and revision of PC-Is

(Rs in million)

No of Projects	No of Revisions	Original Cost	Revised Cost	Cost escalation	Revision within year	Revision between 1-2 years	Revision after 2 years
3	3	6,023.10	16,384.10	10,360.90	1	2	6
6	2	45,075.90	84,789.36	39,713.41	4	3	5
17	1	39,443.07	50,718.11	11,275.04	1	4	12
26	38	90,542.07	151,891.57	61,349.35	6	9	23
Total number of projects =26 and total number of revisions =38							

Source PC-Is of relevant PSDP projects

During the period, 35% of projects under the portfolio were frequently revised within and beyond two years. Frequent revisions in PC-Is indicated initiation of projects without proper planning. Scope of projects was not firmed and finalized. Cost estimates were not prepared based on the current market survey, updated schedule of rates and pre-tender quotations which were revised repeatedly during execution. Furthermore, frequent revision of scope and cost of projects also delayed the implementation period of projects. Audit is of the view that had the projects been initiated based on clear, firmed and final scope determination and cost estimations, frequent revision of PC-Is could have been avoided.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC noted that response to audit observation was unprofessional. The PO (DG/Planning & CPPO) should provide a comprehensive response within one week. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibly for vague determination of scope and cost estimation of the projects. Scope of projects should be clear, firmed and final. Cost estimates should be prepared based on the current market surveys, updated schedule of rates and pre-tender quotations.

Observation-5

Loss due to delay in finalization of specifications of coaches and wagons - Rs 40,183.77 million

According to Para 10.1 (xv) of Guidelines for Project Management, a strong check should be exercised on time over-runs and cost over-runs. For this purpose, frequent revisions of scope and design of the projects should be avoided. Efficient and honest officers should be made responsible for supervision, implementation, and timely completion of the projects. Any instances of mal-administration, corruption, lapses and pilferage should be seriously investigated and those found responsible should be severely dealt with.

During audit of project “Procurement/Manufacture 820 High-Capacity Bogie Wagons and 230 Passenger Coaches” in August 2023, it was observed that PC-I of the Project was approved by ECNEC on 24.11.2017 with total cost of Rs 31,194 million. Target date of completion was 02.01.2022 but the project could not be completed up to August 2023, due to change in specifications of coaches & wagons. The cost of project had been revised to Rs 71,377.77 million due to incapability of PR management to finalize the specifications of coaches & wagons and complete the project within target time. This resulted in loss of Rs 40,183.77 million which depicted the negligence on the part of management.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 21.11.2023. DAC took a serious note on the extra ordinary delay caused by poor management of the whole procurement process. The DAC directed that the Director/Procurement should submit a revised detailed reply outlining all the valid reasons for the delay within one week with documentary evidence. Compliance of DAC directives was awaited.

Audit recommends that matter be inquired to fix responsibility for inordinate delay in finalization of design and completion of project causing loss to public exchequer. Project management controls be improved to avoid recurrence.

DP 12367

Observation-6

Deceitful inclusion of operational locomotive in a rehabilitation project – Rs 97.38 million

Project of Re-commissioning of 05 number of accidental Diesel Electric (D.E) Locomotive was approved by CDWP in its meeting held 3rd-9th June, 2020 with an implementation period of 24 months. Authorization was issued in August, 2020. Scope of the project was to re-commission 5 locomotives (Loco Nos. 9021 GEU-40, 6022, 8224 AGE-30, 8228 HGMU-30 and 8218 HGMU-30) at a cost of Rs 1,582.29 million including FEC component of Rs 874.07 million with completion period of 24 months.

During audit, it was observed that locomotive No. 8218 fit for operation was fraudulently included in PC-I of above mentioned project. The said locomotive met an accident on 28.02.2020 and after necessary repair of damages at the cost of Rs 6.81 million at loco shed Mughalpura. It was dispatched to Karachi for operation on 26.06.2020 but the same locomotive was also included in the scope of project for rehabilitation at cost of Rs 73.56 million in June 2020. Subsequently, after three months of service it was deleted from operation for re-commissioning on 19.10.2020 without any justification for one year and procurement process of spares was initiated. Later on, management excluded said loco from scope of project and included another loco No 8203 through revision of PC-I on 14.09.2022 by misleading Planning Commission that cost of damage of Loco No. 8203 was less than cost of No. 8218, however, it could be repaired from revenue.

In fact, Loco No. 8218 was already in fit condition at the time of deletion and was included in the scope of project just to give undue favour of about Rs 80.00 million to the supplier. Moreover, MoR misreported to Planning Commission on 29.08.2022 that no inquiry was pending on the subject project while the reality was otherwise. As per CPPO office letter dated 16.11.2021, the inquiry committee did not fix responsibility against any officer. Inquiry may be conducted through officers of MoR to ascertain the facts about all locomotive of project and to fix responsibility accordingly. This indicated that a locomotive was fraudulently included in the scope of project due to mala fide intention which resulted into loss

of revenue valuing Rs 97.38 million (Rs 266,793 per day earning of locomotive x 365 days).

The matter was taken with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed that the CME/Loco to submit a comprehensive reply covering detailed factual analysis of project management in the context of Pakistan Railways within two weeks. The response should also highlight course corrective measures. Compliance of DAC directives was awaited.

Audit recommends that matter be probed to fix responsibility for fraudulent inclusion of fit loco in project for re-commissioning. Loss of revenue on account of deletion of operational locomotives be recovered from responsible. Internal control be strengthened to avoid recurrence.

Observation-7

Preparation of vague PC-Is - Rs 12,661.77 million

Para 2.45 of Manual for Development Projects-2021 provides that the sponsoring agency should ensure that the project scope includes only the project requirements necessary to achieve the envisaged objective. The scope of the project must be clearly mentioned. Further, Para 2.51 states that the cost estimates must be prepared, which should be based on the current market survey, updated schedule of rates and pre-tender quotation.

During audit, it was observed that PC-I of PSDP projects were not prepared with due diligence and definite scope of work. Activities of planning stage were determined at execution stage. Details are given below:

- A. Review of PC-I of Special Repair of 100 DE locomotives (new) revealed that PC-I was prepared without mentioning identity of locomotive to be repaired along with detailed list of spare. Consequently, during execution, 94 locomotives already repaired under other projects were again included in the project. This included, 86 locomotives repaired under SR 150 project (2012-2016) and 08 locomotives repaired under SR 100 (old) project (2014-2020) and 32 locomotives were same both projects. Further, detail

of items to be procured for “line maintenance facilities” including material handling equipment and plant & machinery with a provision of Rs 252 million was missing in PC-I. Preparation of vague PC-I resulted in duplication of repair of locomotives, non-commencement of project as per plan, non-achievement of planned targets and loss of potential revenue.

- B. Similarly, PC-I of Special Repair of 600 Passenger Coaches and 1200 Bogie Wagons, approved on 19.12.2019, was prepared without detailed scope and nomenclature of coaches and wagons to be repaired was not given in PC-I. Preparation of PC-I without mentioning the nomenclature of coaches & wagons i.e. required spare parts, jigs & fixtures, tools, plant & machinery, testing equipment and line maintenance facilities which resulted in duplication of 158 coaches and 200 wagons already repaired under Special Repair of 800 Coaches & 2,000 Bogie Wagons project completed on 30.06.2020. Furthermore, two years completion period of the project was set without considering capacity of CFI and C&W Shop, Mughalpura which resulted in delay of project.
- C. Scope and cost of “Improvement of Terminal Facilities and Enhancing Security Arrangement in MYP” was drastically changed just after 06 months of approval dated 31.05.2021 at the cost of Rs 1,941.77 million. Cost of electrical works raised to Rs 1,968.00 million against the provision in PC-I Rs 257.61 million which was even above the total cost of PC-I. Location of installation of weighbridge at cost of Rs 5.44 million was not decided till 30.08.2023 and it was suggested by DS, Karachi to install the weighbridge at Karachi, Cantt. instead of MYP because there were already three weighbridges in vicinity of MYP. Last but not the least, procurement of T&P/Machinery Spares for C&W Shop, MYP at the cost Rs 32.00 million could not get mature thrice due to faulty specifications.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC took serious view of such practices. DAC directed that the management should ensure

that course corrective measures are put in place to avoid recurrence of such practices in future. The comprehensive response along with the course corrective measures should be submitted to audit within one month. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility of preparation of faulty PC-Is. Detail of spare parts, nomenclature of rolling stock, types of items to be procured be incorporated at time of preparation of PC-I along with achievable project timelines.

Observation-8

Fudge payments to contractors - Rs 99.46 million

Para 1801 of Pakistan Railway General Code provides that means should be devised to ensure that every Railway servant realizes fully and clearly that he will be held personally responsible for any loss sustained by Government through fraud or negligence on his part and also for any loss arising from fraud or negligence on the part of any other Railway servant to the extent it may be shown that he contributed to the loss by his own action or negligence.

During audit, it was observed that management of RFD flood damages-2010 made fraudulent payment to three contractors without execution of works (**Annexure-35**). Following irregularities were observed:

- A. Two works of special repair to track embankment on KHB-KDA & SRQ-KDA sections (RWP Division) were awarded to M/s Great Ali Builders on 14.03.2016 with face value of Rs 3,186,000 and completion period of four months each. DS/Rawalpindi intimated the PD/RFD on 10.03.2017 that contractor had delayed the commencement of works. Management of RFD project made payment of Rs 2,807,397 to contractor through running bills by mentioning the commencement dates as 11.03.2017 and 15.02.2017 fraudulently.
- B. Similarly, two works of recoupment of short embankment on KDA-ATCY section (PSC Division) were also awarded to M/s Great Ali Builders on

02.02.2016 with face value of Rs 2,068,074 and completion period of three months each. An excess payment of Rs 500,572 was made to contractor through running bills dated 24.02.2017 by recording excess/bogus quantities. Another excess payment of Rs 667,888 was made to contractor against 2nd work through running bill by recording the excess/bogus quantity.

C. Another fraudulent excess payment of Rs 19.51 million was made to M/s Manj Brothers without execution of special repair to side and catch water drain work in Peshawar Division. The excess payment was observed through variation between the work done and payment made by the then RFD officers/officials vide CC-VI dated 01.03.2017 and FCC-VII dated 24.04.2017 by recording bogus entries on MB and bills.

D. Further, another excess payment of Rs 75.98 million was also made by RFD management to a contractor without supply of 1,184,750 Cft ballast during 2016-17. The excess payment was made by recording bogus entries on MB and payment bills.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC took serious view of such practices. DAC directed that Railway administration (CEO, AGMs, POs and Project Management Team) should ensure that such practices are avoided in future. The internal controls need to strengthen in addition to putting in place in effective monitoring evaluation system. A compliance report to this effect should be submitted within one month to audit. Compliance of DAC directives was awaited.

Audit recommends that recovery of outstanding amount to contractors without execution works and supply of remaining quantity of ballast be expedited. Internal control be strengthened to avoid recurrence under intimation to Audit.

Observation-9

Initiation of project without feasibility studies

As per Planning Commission letter dated 14th January, 2011, it is mandatory that for projects of infrastructure sector and production sector cost Rs 300 million and above, proper feasibility studies should be undertaken and submitted to P&D Division along with PC-I". Further, as per enhanced limit for proper feasibility study/PC-II dated 19th November, 2015, all infrastructure projects cost Rs 500 million or above (including projects with infrastructure components) should be based on proper feasibility study/PC-II to include, at least, reference design and bill of quantity etc. In case of project costing less than Rs 500 million it should be based on in-house feasibility study. Furthermore, para 2.8 of Manual for Development Projects-2021 provides that the requirement of PC-II shall be mandatory for infrastructure projects, each costing Rs 500 million or above, and all other projects where the infrastructure component is equal to or more than 30 percent of the total project cost.

During audit, it was observed that PR initiated 45 PSDP projects without feasibility studies which caused serious issues during execution. For instance, PSDP project of "Reconstruction of Assets Damaged during the Floods 2010" was initiated without conducting proper technical and financial feasibility study. Consequently, frequent changes in scope had caused the time overrun up to 10 years. The original PC-I of the project was approved by ECNEC on 29.07.2011 at a cost of Rs 6,365.24 million including FEC Rs 1,785.26 million. The original gestation period of the project was 24 months. The project was commenced on 01.07.2012 with a delay of one year. Despite lapse of 10 years, the management of project could not complete the project. Furthermore, cost of the project had been increased to Rs 9,597.02 million and PC-I of project had also been revised twice due to changes in scope of work and cost. This indicated that the project was initiated without technical and financial feasibility and PC-I of the project was not carefully drafted which resulted in frequent revision of scope and had cost overrun of Rs 3,231.78 million with time overrun of 10 years. Thus, the management failed to effectively utilize the PSDP portfolio (**Annexure-36**).

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed that Railway administration should fully comply with Planning Commission

guidelines with regard to the feasibility studies which is a mandatory requirement for infrastructure projects costing Rs 500 million and above. A compliance report should be submitted to audit within one month. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility for not conducting proper feasibility studies, for inordinate delay in implementation and change in scope of the project.

Observation-10

Indefinite scope of project- Rs 1,970.00 million

Para 2.45 of Manual for Development Projects-2021 provides that the scope of the project must be clearly mentioned. While presenting it, the sponsors should indicate in quantitative terms, the proposed facilities and services, which would result from its implementation. In addition, the project sponsor should provide information on: (i) Demand for project output, with its basis. (ii) Existing position regarding capacity and actual supply of output. (iii) The gap that the project is going to fill between supply and demand.

During audit, it was observed that DDWP approved PC-II of “Umbrella PC-II for Feasibility Studies and Transaction Advisory Services” on 02.04.2020 at the cost of Rs 1,970.00 million with gestation period of 36 months i.e. 30.06.2023. The main objective of the project was to conduct, feasibility and transaction advisory studies, mainly to operationalize the Public Private Partnership Mode (PPP) projects. Audit observed following deficiencies during review of PC-II:

- A. Para 3.1 of PC-II provides that, “as and when the need of carrying out any study arises, a detailed PC-II will be prepared and same will be charged to this Project, instead of adding a specific project in PSDP portfolio”. This indicated that project was initiated with indefinite scope of work. Gestation period of the project was fixed 36 months as formality for approval of the project, practically scope of the project was not possible to achieve within the timeline of the project. All studies were required to be completed up to June 2023, whereas, only 1 out of 26 study was completed up to June 2023.

The above state of affairs indicated poor project management on the part of concerned Project Director (PD) and poor monitoring & evaluation on part of Directorate of Project Planning and Monitoring & Evaluation, Ministry of Railways.

- B. No cost bifurcation and detailed nomenclature of 15 consulting services for specialized assignments were available in PC-II. Therefore, inclusion of Rs 1,338.00 million without detailed cost estimation against these studies were subjective and without any justification.
- C. Six transaction advisory services and two feasibility studies were assigned to PRFTC by MOR and an expenditure of Rs 4.41 million was incurred on these studies. Afterward, on 07.10.2021, MOR directed to cancel these immature studies on 07.10.2021 and decided to include these studies in PC-II of umbrella project. Cancellation of immature studies resulted into loss of Rs 4.41 million to public exchequer.
- D. Feasibility study and transaction advisory services for the development, operation and maintenance of KCR as modern urban Railway under PPP Mode was completed at cost of Rs 190.00 million but no project under PPP mode for development, operation and maintenance of KCR was initiated.

The matter was taken up with the management in October 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the PO (CEN/S&C) should give a comprehensive reply with regard to effective implementation of the Umbrella PC-II relating to financing window for project feasibilities within one week. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility for preparation of defective PC-II. PC-II should be prepared with due diligence based on definite scope.

Observation-11

Over dependency on original equipment manufacturers

Pakistan Railways executed eight contract agreements under PSDP projects with different rolling stock manufacturers for procurement of rolling stock along with Transfer of Technology. The manufacturers were required to provide Drawings, Manuals, Instruction Books and As-made Tracings under the clauses 29, 33, 16, 7.7 and 22 of the contract agreements. Further, as per contracts agreements between Pakistan Railways and General Electric Company (M/s Webtec) for procurement of 75 locomotives, the manufacturer was required to provide structural diagrams of locomotives necessary for maintenance and repair of locomotives in case of accidents.

During audit, it was observed that Pakistan Railways executed 5 PSDP projects of procurement/manufacture of rolling stock on CBU and CKD basis along with ToT during last decade. However, PR failed to obtain drawings, instruction books and as-made Tracings of rolling stock from manufacturers.

PSDP projects involving ToT

(Rs in million)

SN	Name of project	Cost	Gestation
1	Procurement of 58 Locomotives	19,406.61	2012-2017
2	Procurement of 75 Locomotives	45,496.00	2020-2023
3	Procurement of 585 Hopper Wagons and 20 Bogie Brake Vans for Coal Transportation	5,861.00	2015-2018
4	Procurement of 780 High Capacity Bogie Wagons and 20 Bogie Brake Vans for Coal Transportation	8,863.00	2015-2018
5	Procurement of 820 High Capacity Bogie Freight Wagons and 230 Passenger Coaches	31,194.00	2017 to June 2023 (on-going)
Total		110,820.61	-

Source: Ministry of Railways

ToT was included in contract agreements but no financial value was conditioned with successful ToT. Manufactures delivered the rolling stock but refused to provide drawings, manuals, instruction books and as-made tracings. Subsequently, a loco No 9021 out of 75 D.E. Locomotives met an accident on 13.05.2017 at Bholari-Kotri (Karachi Division) and the same was held up for want of repairs. The said locomotive was included in PC-I of Re-commissioning of 5 Accidental Locomotives which was approved by CDWP in its meeting held on 3rd-9th June, 2020 with an implementation period of 24 months at a cost of Rs 1,582.29 million. Estimated cost to re-commissioning of loco No 9021 was Rs 627.16 million in original PC-I.

1st tender No.DP/9021/2020 for re-commissioning the said loco was floated on 05.01.2021. M/s Webtec (OEM) submitted the bid but tender could not be finalized due to faulty technical tender specifications because Railway did not have drawings and maintenance manuals of 75 DE locomotives. 2nd tender No.DP/9021/2022 was floated again on 30.07.2022 but M/s Webtec did not submit the bid and informed the Railway management that their engineering department was exploring different options to re-commission the loco No. 9021 and until then, they could not participate in tender. Railway did not have any other option for repair of said locomotive and other 74 locomotives. Railway management re-estimated the repair cost of above locomotive which comes to Rs 1,122 million.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the PO (CME/Loco and CME/C&W) should give a comprehensive reply specific for each project with regard to the definition/scope of TOT, TOT received, TOT balance, reasons for any non-receipt of TOT within one week. The Railway administration should also put in place mechanism where the entire TOT, as per the PC-I and contract provisions, be transferred in a timely manner. A compliance report should be submitted to audit within two weeks. Compliance of DAC directives was awaited.

Audit recommends that the matter be probe to fix the responsibility for non-transfer of technology and strenuous efforts be made to obtain Drawings, Manuals, Instruction Books and As-made Tracings of rolling stock. R&D wing may be developed for manufacturing, overhauling and maintenance of rolling stock.

Observation-12

Non-execution of track rehabilitation works and non-recovery of cost of released material and advance payment – Rs 811.46 million

Clause 70.1 of standard form of bidding documents (civil works) of Pakistan Engineering Council (PEC) provides that amounts payable to the contractor, pursuant to sub-clause 60.1, shall be adjusted in respect of the rise or fall in the cost of labour, materials, and other inputs to the works, by applying to such amount the formula prescribed in this sub-clause.

During audit, it was observed that three contracts were awarded to a contractor at cost of Rs 12,396.02 million on 19.03.2021 for track rehabilitation at 3 different locations i.e. between (i) Sama Satta-Bahawalnagar on Sama Satta-Amruka Section (183Kms), (ii) Baruli-Sohan Bridge on Kundian-Attock City Section and (iii) Rehmani Nagar-Bakrani Road on Dadu-Habib Kot Section. Contractor commenced work in Sama Satta-Amruka Section and dismantled the existing track of 126 km and did not commence work on other two sections. The contractor lifted the released material valuing Rs 775.38 million but stopped work w.e.f 21.02.2023. The contractor requested the Railway management to allow price escalation as it was not possible to execute the works unless contract price escalation was allowed. The request of contractor was not entertained. Consequently, after lapse of more than 30 months, Railway management failed to get the work done from contractor and affect recovery of released material and mobilization advance amounting to Rs 811.46 million. This resulted in non-execution of track rehabilitation work and non-recovery of cost of released material and mobilization advance Rs 811.46 million to the negligence of Railway management (**Annexure-37**).

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed

the PO (CEN/Open Line) to submit comprehensive reply within one week. DAC also directed that the Railway administration should make price adjustment provisions in all the new infrastructure projects to avoid recurrence of such practices. Compliance to this effect should be submitted to Audit within two months. Compliance of DAC directives was awaited.

Audit recommends that the matter may be resolved with the contractor to complete the track rehabilitation work without further delay. Internal controls regarding contract management be improved to avoid recurrence.

Observation-13

Time over-run in PSDP projects

Para 2.57 of Manual for Development Projects provides that time calculated for completion of the project must be realistic. Factors like total allocation made in the Five-Year Plan, expected allocations in the PSDP, keeping in view past experience, time to be taken in preparing the detailed design(s), the invitation of tenders, and award of contract(s), availability of land, human resource, material/supplies, topography, accessibility to transportation network and risk management plan should be ensured forthwith. Further, para 2.55 states that the financial phasing of a project is to be given for each fiscal year, related to the physical work proposed to be undertaken, keeping in view the implementation of similar projects in the past. It should be as realistic as far as possible. The fund's utilization capacity of the executing agency must be kept in view while determining the financial phasing of the project.

During audit, comparative analysis of PSDP Projects' implementation was carried out with respect of time of implementation specified in original PC-I and actual time of implementation for each project.

Implementation timeline of projects (2013-14 to 2022-23)

Time overrun in Years	No. of Completed Projects	No. of On-going Projects	Total Projects
1-5	26	17	38
6-10	9	2	11

11-15	3	1	04
Total	38	20	58
No time over run	8	9	17
Grand Total	46	29	75
77 % (58/75*100)			

The analysis revealed that 38 out of 46 completed projects and 20 out of 29 on-going projects were delayed from their original implementation periods as stipulated in PC-Is. 26 completed and 17 on-going projects were delayed up to 5 years. 9 completed and 2 on-going project were delayed from 6 to 10 years, and 3 completed and 1 on-going projects were delayed from 11 to 15 years. However, only 8 projects were completed within their original gestation period. Delay in completion period in almost all projects indicated that PC-Is were not prepared with due diligence, financial and physical phasing were not prepared keeping in view the funds availability and PR capacity to utilize the funds. Financial phasing of a project was prepared on the basis of physical work proposed to be undertaken, without keeping in view the implementation problems in similar projects executed in the past. Delay in completion period resulted in cost overrun in various projects and non-achievement of planned objectives within the projects gestation period (**Annexure-38 & 39**).

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the POs (DG/Planning & CPPO), to submit a comprehensive reply covering detailed factual analysis of project management in the context of Pakistan Railways within two weeks. The response should also highlight course corrective measures. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility against PDs and other concerned officers for delay in implementation period. PC-I should be prepared with due diligence and financial and physical phases may be prepared keeping in view the funds availability and PR capacity to execute new

projects. Independent PDs be appointed in projects costing Rs 3,000 million and above.

Observation-14

Non-appointment of dedicated and independent PDs

Guidelines for Appointment of Independent Project Director in Development Projects provide that Project Director is a focal person in project implementation, responsible for project execution in accordance with its objectives, work scope, cost, and implementation schedule. Further, appointment of an Independent Project Director is mandatory for projects costing Rs 3,000 million and above. Project Director should not be transferred during currency of the project.

During audit, it was observed that frequent posting and transfers of Project Directors (PDs) were made up to 19 times in a single project. 267 PDs were posted in 46 completed projects and 175 PDs were posted in 29 on-going projects during their execution in contravention to above guidelines. Analysis of posting/transfer of PDs versus cost and time over runs revealed that frequent transfer of PDs had positive correlation with project cost overrun and time overrun. Higher the number of PDs posted, higher the cost and time overruns. Out of 43 completed projects, 21 projects had experienced cost overrun ranging from 39% to 81% and 36 projects had experienced time overrun from 3 to 7 years. As far as ongoing projects were concerned, 5 projects had experienced average cost overrun from 7% to 262% and 11 projects had experienced average time overrun 2 to 4 years. Frequent transfer of PDs disrupted the continuity and progress of the project activities. Newly posted PDs had taken time to understand project's objectives, scope, and ongoing activities which resulted in delay in completion period and increase in project cost (**Annexure-40 & 41**).

Impact of transfers of project directors

Status of Projects	No of Projects	No of PDs Posted	Projects with Cost overrun	Average of Cost Overrun in %age	Projects with Time over run	Average of Time over run in years
Completed (46)	25	2-5	11	39%	20	3
	12	6-10	6	44%	11	6
	6	11-15	4	81%	5	7
Total	43	-	21	-	36	-
On-going (29)	10	2-5	1	7%	2	2
	13	6-10	4	262%	9	4
Total	23	-	5	-	11	-
267 PDs were posted in 46 completed projects and 175 PDs were posted in 29 on-going projects (average 6 PDs were posted in one project)						

Further, Railway management initiated 24 projects each costing Rs 3,000 million and above but independent PDs were not appointed which was mandatory as per guideline of Planning Commission. Frequent transfer posting of PDs induces diffusion of responsibility and lack of ownership in delivering stated objectives, simultaneously, absolving individual officers from the consequences of success and failure.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the POs (DG/Planning & CPPO), should submit a comprehensive reply within two weeks recommending course corrective measures. Compliance of DAC directives was awaited.

Audit recommends that the matter may be looked into and SOP be issued in line with the guidelines of Planning Commission, regarding non-transfer of PD

during currency of the project and appointment of an Independent Project Director for projects costing Rs 3,000 million and above.

Observation-15

Closing of projects with left over scope of work – Rs 12,285.81 million

Para 2.45 of Manual for Development Projects-2021 provides that the sponsoring agency should ensure that the project scope includes only the project requirements necessary to achieve the envisaged objective. Further, as per Para 6.12 checklists for project closure (item No. 16) state that whether project has been implemented as per approved cost, scope and time is indicated. In case of variation, reasons are provided.

During audit, it was observed that Railway management executed 15 PSDP projects with an estimated cost of Rs 44,056.40 million but these projects were closed with left over/reduced scope of works. Out of 15 projects, 9 were closed with cost overrun 3% to 196% and time overruns 1 to 10 years. While other 6 projects were closed with un-utilized funds ranging from 3% to 45% and time overrun ranging from 2 to 13 years (**Annexure-42**).

Closure of projects with leftover scope

(Rs in million)

SN	Project Name	Approved Cost	Expenditure	Cost Overrun in percentage	Time over run in Years	Left over scope of works
1	Rehabilitation of 159 bridges	412	471.38	14%	6	61 bridges were not rehabilitated valuing Rs 293.40 million (38% of 159)
2	Acquisition of land for Railway Container yard (412 Acres)	449.94	1,332.07	196%	10	49 acres land, 400 No. Erection of boundary stones, 1 Rest house and 700 Rft boundary wall not executed valuing Rs 201.60 million (45 % of original cost)

3	Up-gradation of Railway stations to attract Sikh Tourism	659.95	994.82	51%	4	Firefighting arrangements, development of public park, turntable, foot over bridge, construction of staff quarters, and installation of CCTV cameras not executed Valuing Rs 124.58 million (19% of original cost)
4	Mechanization of Track Maintenance (440)	4,055.40	4,157.53	3%	5	Procurement of 253 machines, improvement of 2 track workshop Staff capacity building not executed (58% of 440).
5	Up-gradation of major Railway Station	846.00	1,018.17	20%	5	Work of Business Center at Gujranwala, rehabilitation of Rohri, Hyderabad and Quetta Stations not executed valuing Rs 332.20 million (39% of original cost)

Reasons for left over scope and cost of works were not mentioned against any project in PC-IV in contravention to Manual of Development Projects. Closure of projects with left over scope of works even with cost overrun up to 196% and time overrun up to 13 years indicated inefficiency and incapacity of Railway management to execute projects and utilize PSDP portfolio effectively. Further, closure of projects with left over scope of works also indicated poor determination of scope of work at planning stage and lack of monitoring and evaluation at execution and completion stages.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the POs (DG/Planning & CPPO) to submit a comprehensive reply covering detailed factorial analysis of project management in the context of Pakistan Railways within two weeks. The response should also highlight course corrective measures. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility for closure of projects with left over scope of works and drawl of PC-IV without mentioning the reasons for left over scope of works. Internal controls be improved to avoid recurrence.

Observation-16

Inordinate delay in submission of PC-IV and non-preparation of PC-V

Manual of Development Project-2021 provides that the financial closure should be achieved within six months of the operational closure. At the project closure, submission of the PC-IV to the Planning Commission by the sponsoring agency is mandatory without any exception. Further, section 18 of PFM Act, 2019 provide that sponsor shall be responsible to submit annual report on operation and maintenance, outcome, and impact of projects on PC-V format for five consecutive years to Planning Commission for review of impact evaluation.

During audit, it was observed that 46 projects were completed by Pakistan Railways during the period from 2013-14 to 2022-23. PC-IVs of these projects were required to be submitted to Planning Commission at time of completion/closure. PC-IVs of 23 projects were submitted with extraordinarily delay. Further, quality of most of PC-IVs was poor as required information was missing e.g. NPV analysis, issues faced during implementation, lesson learnt, and date of operational and financial closure (**Annexure-43**).

Submission of PC-IVs (2013-14 to 2022-2023)

SN	No. of Projects	Delay in Years

1	4	1
2	6	2
3	3	3
4	4	4
5	3	5
6	3	6
Total Projects	23	-

Financial data of 43 projects was not vetted by Account Office. Three projects (detailed below) were not financially closed at the time of submission of PC-IV in contravention of the Guidelines of Planning Commission of Pakistan.

Financially not closed projects

SN	Project Title	Financial liability
1	Procurement of 58 DE locomotives (2012-2017)	Excess payment of \$ 181,129 (encashment of contractor's guarantee)
2	Replacement of Three Break Down/Rescue Cranes and Five Sets of Relief train Equipment (2011-2014)	Liability to the tune of Rs 6.90 million was pending at time of drawl of PC-IV
3	Rehabilitation, Up gradation & Conversion of 400 Coaches (2006-2016)	Conversion of 9 Coaches was pending due to non-clearance of liability Rs 21.60 million of the contractor.

Source: PC-IV of the projects

Upon completion, projects were required to be assessed in terms of its deliverables, performance, efficiency and effectiveness for which PC-Vs were required to be drawn, evaluated and submitted to the Planning Commission on an annual basis, by the 31st of July of each year, for five consecutive years. However, 132 PC-Vs against 46 competed projects were neither drawn nor submitted to

Planning Commission by Railway management. This state of affairs indicated slackness and negligence on the part of management which resulted in non-drawl/non-submission of PC-IV & PC-V, non-evaluation of targets versus achievements, timelines and lesson learnt and non-assessment of impact of projects.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed the POs (DG/Planning & CPPO) to submit a comprehensive reply for implementation of Planning Commission guidelines for preparation of PC-IV & PC-V. DAC further directed that PC-IVs proper appraisal must be carried out by Railway administration. PC-V of at least 05-projects must be prepared as per Planning Commission guidelines and must be submitted in C.F.Y 2023-24. Reply in this context will be submitted within two weeks. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility for delay in submission of PC-IVs and non-submission of PC-V. Quality of PC-IV be improved by complying the guidelines of Planning Commission. Monitoring and Evaluation wing be strengthened for effective Monitoring and Evaluation of PSDP portfolio.

Observation-17

Shifting of routine repair & maintenance of rolling stock towards PSDP -Rs 22,501.78 million

Para 2 (b) of Annexure-4 (sectoral classification of development expenditure) of Appendix-B of Manual for Development Projects-2021 provides that expenditure in respect of transport, communication, irrigation, power, banking, insurance, etc. all such expenditure will be included as is required for the replacement or expansion of existing capacity or for the creation of new physical capacity should be treated as developmental expenditure. Further, Planning Commission directed MOR in September, 2020 that since repair and maintenance is a permanent feature and run on sustainable basis, therefore such activities may be shifted on recurring side of the budget of the MoR.

During audit, it was observed that Railway management included 5 non-development projects of special repair of rolling stocks at the estimated cost of Rs 22,501.78 million in development portfolio. Out of 5 projects, 3 were related to repair of locomotives and 2 were related to repair of coaches and wagons.

PSDP projects related to special repair

(Rs in million)

SN	Name of Project	Date of Approval	Cost	Expenditure	Status
1	SR 150 D.E. Locomotives	16.08.2012	5,005.03	5,512.70	Completed 2015-16
2	SR 100 DE Locomotives	04.12.2014	4,966.75	5,402.26	Completed 2019-20
3	SR 100 DE Locomotives	09.12.2019	8,000.00	3,869.50	On-going June-2023
4	SR 800 Coaches and 2,000 Wagons	12.12.2014	1,810.00	2,660.73	Completed 2019-20
5	SR 600 Coaches and 1,200 Wagons	09.12.2019	2,720.00	2,439.06	On-going June-2023
Total			22,501.78	19,884.25	-

Source PC-Is, PC-IVs and progress reports

The objective of inclusion of these projects in PSDP portfolio was to carryout special repair of rolling stock which was long overdue. The incurring of expenditure on deferred routine maintenance of rolling stock through PSDP portfolio rather than replacement or expansion of existing capacity should not be treated as developmental expenditure. Audit is of the view that the expenditure on the ordinary maintenance and running of existing facilities cannot be treated as developmental expenditure and development budget should not be utilized for routine repair and maintenance of rolling stock.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed that the POs (DG/Planning & CPPO) to submit a comprehensive reply covering detailed sectoral analysis of project management in the context of Pakistan

Railways within two weeks. The response should also highlight course corrective measures. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility for inclusion of routine repair and maintenance works in PSDP portfolio. Internal controls regarding utilization of PSDP funds be improved.

Observation-18

Poor quality of repair and maintenance works due to non-conducting of 3rd Party evaluation –Rs 22,510.78 million

During Review of PSDP 2019-20, in September, 2020, to ensure quality standard, Planning Commission directed to the MOR that 3rd party evaluation be ensured in “Special Repair of 100 DE Locomotives (new)” and “Special Repair of 600 Passenger Coaches and 1,200 Bogie Wagons projects”.

During audit, it was observed that Pakistan Railways executed 5 PSDP projects for special repair of rolling stock without 3rd party evaluation. Consequently, poor quality of repair and maintenance works were executed in 3 PSDP projects due to absence of 3rd party evaluation. The 1st instance was evident in PSDP project of SR 100 D.E locomotives (approved by ECNEC on 04.12.2014 at the cost of Rs 4,967 million) completed in June 2020, whereby, 90 locomotives were turned out after special repair in CDL shops Rawalpindi and Diesel shops KC from September 2016 to April 2019 but 33 out of 90 locomotives were sent back to the shops again and again for different nominated repairs before completing expected life span. The 2nd instance of poor quality of repair works was observed in two projects of special repair of coaches and wagons. 158 coaches and 200 wagons were again repaired under the project of “Special Repair of 600 Passenger Coaches and 1,200 Bogie Wagons” approved on 09.12.2019, which were already repaired under another project of “Special Repair of 800 Coaches and 2,000 wagons” completed on 30.06.2020 at cost of Rs 2,060.73 million. No justification of duplication of 158 coaches and 200 wagons was available in PC-I of the two projects. Further, 33 coaches turned out during the period from January 2021 to April 2023 were again detached for want of repairs as per report of failure of coaches & wagons dated 05.09.2023 (**Annexure-44**).

PSDP projects with poor quality of works

(Rs in million)

SN	Project	Cost	Status	Remarks
1	Special Repair of 150 Nos D. E. Locomotives	5,005.03	Completed	-
2	Special Repair of 600 Passenger Coaches and 1,200 Bogie Wagons	2,720.00	In progress	540 Coaches & 689 Wagons were turned out without 3 rd party evaluation up to 30.06.2023
3	Special Repair to 100 DE Locomotives	4,966.75	Completed	-
4	Special Repair to 800 Coaches and 2,000 Wagons	1,810.00	Completed	-
5	Special repair of 100 Nos D.E locomotives for improving the reliability/availability of running locomotives	8,000.00	In progress	30 locos were turned out without 3 rd Party evaluation up to 30.06.2023
Total		22,501.78	-	-

The above state of affairs indicated that repair standards for rolling stocks were not followed and rolling stock was turned out without 3rd Party evaluation in contravention to directives of planning commission which resulted in incurrence of extra expenditure on repeated repairs of same rolling stock along with loss of potential earnings.

The matter was taken up with the management in November 2023 and discussed in DAC meeting held on 26th and 27th December, 2023. DAC directed that the POs (CME/Loco and CME/C&W), should give a comprehensive reply specifically for each project with regard to duplications of investments in each rolling stock and quality of workmanship in terms of loco/wagon/coach-KM/Per failure, identify gaps if any and course corrective measures within two weeks. A compliance report should be submitted to audit within two weeks. Compliance of DAC directives was awaited.

Audit recommends that the matter may be probed to fix responsibility of poor quality of repair and non-conducting of 3rd party evaluation. Independent quality review procedure for SR of rolling Stock may be devised and implemented as recommended by Planning Commission of Pakistan under intimation to Audit.

3.9 Departmental Responses

The observations were discussed with the Director General Planning, Ministry of Railways, Islamabad in exit meeting on 6.10.2023. The Report was issued to the Secretary/Chairman, Railways on 13.11.2023. The report was discussed in DAC meetings dated 12th, 20th, 26th and 27th December, 2023. The analysis of report was discussed in detail and DAC directives and management responses had been incorporated in relevant observations.

3.10. Recommendations

Based on the critical review and significant audit observations, audit recommendations are as under:

1. Strategic Investment Plan be formulated and executed considering future demand of rolling stock, required infrastructure, passengers and freight traffic to make the Railway financially viable organization.
2. Project management be improved in the area of financial management and result based monitoring & evaluation be ensured for effective and efficient utilization of PSDP funds. Regular surrenders of allocated funds and lapses of released funds be avoided.
3. Overarching issues over the PSDP landscape be fixed by improved project management practices for effective utilization of PSDP portfolio.
4. Close monitoring of mega projects from the planning to completion stage to avoid change in scope, inordinate delays, cost overruns and contract management.

5. PC-I of the project should be prepared with due diligence in area of scope, procurement planning & bidding document preparation, closure of project with complete scope and transfer of technology.
6. Financial and physical phasing of project should be prepared keeping in view the funds utilization and projects execution capacity.
7. R&D wing may be developed for manufacturing, overhauling and maintenance of rolling stock and to discourage the monopoly of OEMs.
8. Project execution should be within defined timelines and estimated cost to harness the envisaged benefits of projects. Timely submission of PC-V & IV to ensure effective impact assessment of project in respect of deliverables.
9. Utilization of PSDP funds for revenue works be avoided.
10. Appointment, posting and transfer of PDs should be in accordance to Project Management Guidelines.

3.11. Conclusion

Pakistan Railways was required to formulate and implement clearly designed Strategic Investment Plan to balance the PSDP sectoral investments. Public sector development program in Pakistan Railways remained concentrated on two sectors of rolling stock and infrastructure with significant intra sector variations whereby investments were skewed towards import oriented subsectors, thereby, failing to achieve sustainable tangible outcomes. Rolling stock projects relied heavily on imported parts while not focusing on revival of existing PR mechanical production industry. Planning, although being the launch pad for success or failure, received least attention in PSDP allocation and expenditure. Absence of independent feasibility studies, vague scope definitions based on unrealistic cost estimates and planning predominantly divorced of investment plans resulted into frequent scope revisions, time and cost over runs and project closures with leftover scopes. While internal controls for barring inefficient practices remained strictly advisory and recommendatory. Economical projects were transformed into un-

economical projects due to ineffective and inefficient management practices. Responsibility for outcomes was diffused by frequent transfer/postings of project heads during execution period of projects. Infrastructure development portfolio had a piecemeal rather than gestalt approach towards improving track length and conditions. In nutshell, investment of Rs 206.70 billion resulted into availability of lesser number of locomotives, decreased speed limits and shortened track length. PR had increased losses and consequent bailouts rose by 40 per cent in lieu of Federal Government subsidies over last decade. Conclusively, PSDP had largely remained ineffective in mitigating risks surrounding PR as going concern in long term.

4. Impact Audit of PSDP Project for up-gradation/renovation of Major Railway Stations

4.1 Introduction

Pakistan Railways witnessed increase in passenger traffic during 2014-15 as a result of focused business promotion policy of the Government. A considerable increase in passenger volume and corresponding revenue earnings was recorded as 5.70 million and 40% respectively in 2014-15 as compared to previous financial year 2013-14. The increasing demand of public for Railway as preferred mode of transportation necessitated substantial improvement in the existing infrastructure of railway stations which lacked basic passenger amenities and were built to cater very thin number of passengers as compared to present strength.⁵⁷

4.1.1 Background

It was decided in a meeting on Railway affairs chaired by the Prime Minister of Pakistan on 3rd April, 2014 that four major Railway stations at each provincial capital city including Quetta, Karachi, Lahore and Peshawar should be up-graded/renovated as model stations. Later on followed by CDWP meeting held on March 31, 2015, it was discussed to upgrade/renovate five major railway stations as pilot project and take up other major stations after successful completion of the said project. Subsequently, in another meeting of the CDWP dated April 16, 2015, PR proposed up-gradation/renovation of 23 Railway stations, however, the proposal was not acceded to by the Planning Commission of Pakistan and finally, PC-I for up-gradation/renovation of 11 major Railway stations, was approved by the CDWP. As per original PC-I, the project was planned to be commenced in July 2015 and completed by September 2016. However, after revision of PC-I, it was actually commenced in June 2016 and completed in June 2021 with cost and scope of work quite different than what was envisioned in original PC-I. The project completion report (PC-IV) was drawn on 31.05.2021.

4.1.2 Role of the project

The basic role of this project was up-gradation/renovation of major railway stations infrastructure for improved passenger amenities and development of these stations as commercial hubs of the cities to generate revenue and shorten the span of payback period of the project. The Project had two components of infrastructure development; up-gradation and renovation, which differed in scope in a way that up-gradation involved complete demolition and re-building of structure while renovation involved provision of missing facilities in already existing station buildings and beautification. Project scope was defined on the basis of condition survey conducted by professional consultant firms and included details of missing facilities like lack of availability of clean drinking water, inadequate shelter for passengers, absence of waiting lounges, shorter than needed platform lengths, absence and poor condition of toilets, absence of

⁵⁷ PC-I, Up-gradation/renovation of major railway stations

ramps for disable and elderly passengers, improper lightening arrangements, mal-functional sewerage systems, non-existent/ dysfunctional public address system, absence of dedicated electric transformers and power back-up arrangements, poor security arrangements without CCTV cameras, non-installation of firefighting and alarm systems and shabby condition of circulating areas leading to railway stations. The project role was limited to provide these missing amenities and develop railway stations included therein as commercial hubs while preserving the heritage and architecture of the area.

4.2 Overview

The major objectives of the project were as under:

1. Substantial increase in station traffic and ridership
2. Revenue generation through commercial development of station buildings to achieve operational sustainability
3. Provision of improved and modern day facilities/amenities to passengers, general public and employees
4. Construction of resilient structures with a service period of over 50 years

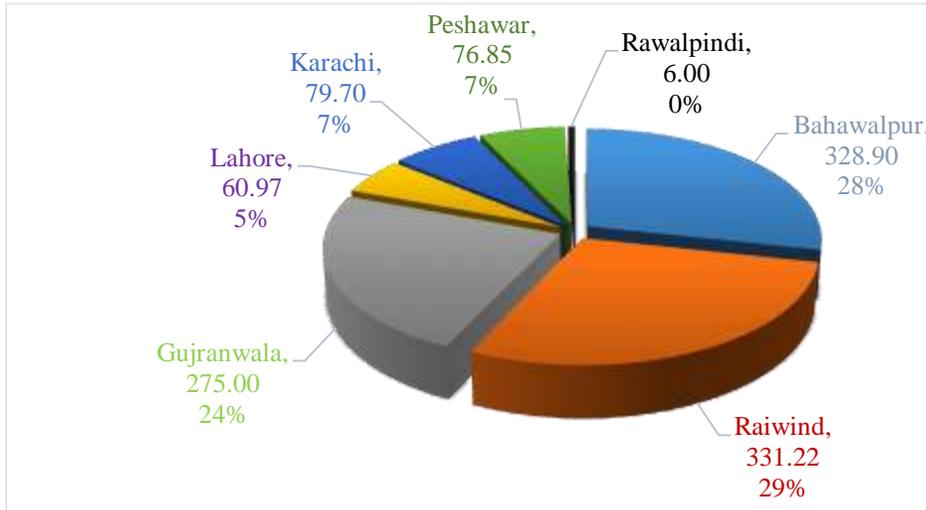

The project involved up-gradation/renovation of eleven railway stations with a total cost of Rs 1,158.74 million. It was intended to provide state of the art passenger amenities including fully furnished ladies & gents waiting lounges with attached toilets and washrooms, high level new passenger platforms with extended length, new platform shelters, lavatories and toilets for workers and employees, provision of clean drinking water for passengers & employees, construction of ramps for easy and unhindered access of the station and platform for the disabled and physically challenged people. The project also included structural developments like installation of new transformers for efficient electric supply and provision of back-up in case of power failure, provision for public address system and installation of CCTV cameras for security surveillance, provision of fire alarm and firefighting system to ensure safety of people and property, construction of new and additional passenger foot-over bridges, new equipment rooms, electric control rooms, generator rooms and Train Dispatch (TD) offices, laying of new water supply and sewerage system including storm water drainage and disposal pumping stations, where required. The intervention also included development and improvement of circulating area, road/pavements, car/vehicles/motorcycles taxi parking lots and proper lighting arrangements for station buildings, platforms, and immediate surrounding areas etc. Following stations were planned to be undertaken in the project:

1. Bahawalpur	2. Raiwind	3. Gujranwala City	4. Gujranwala Main
5. Karachi Cantt.	6. Peshawar	7. Hyderabad	8. Sukkur (Rohri)
9. Lahore	10. Rawalpindi	11. Quetta	

--	--	--

Budget allocations were made only for seven railway stations instead of eleven; following pie chart depicts allocation of budget to various railway stations as well as percentage share in project.

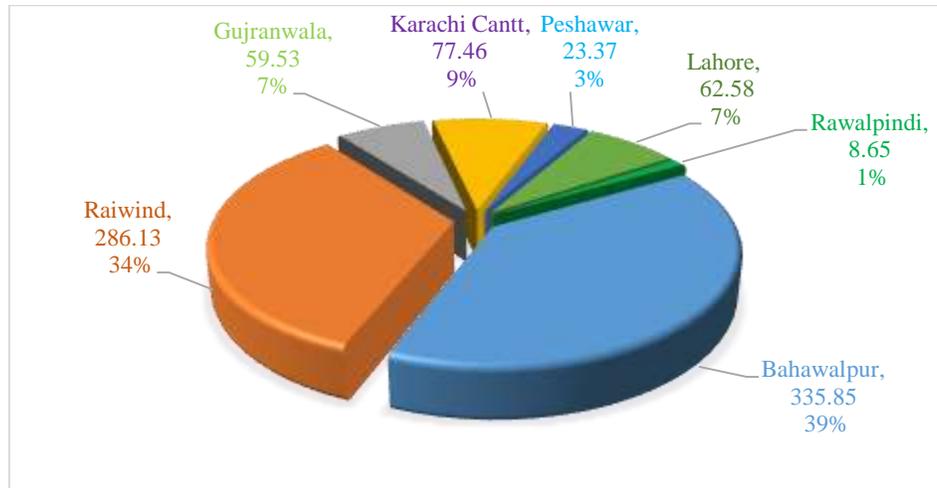

Budget allocation of seven stations (Rs 1,159 million)

Source: PC-I, Up-Gradation/Renovation of major railway stations

As per revised scope, the project envisaged development of three upgraded and modern station buildings at Bahawalpur, Raiwind and Gujranwala with an effective service period of over 50 years which took major share (80%) in budget allocation. The nature of amenities to be provided to the passengers remained unchanged in upgraded station as compared to renovated ones, however, huge difference of expenditure relates to reconstruction of entire station buildings and development of commercial centers containing Shops, Banks, Cinemas, restaurants, and Joy lands etc. Rationale behind manifold budget allocation was the expectation that these stations would generate parallel stream of revenue through commercial activities which will make these station buildings operationally self-sustaining and economically viable. While endeavoring for sustainability, it was also decided that railway land surrounding station building will also be commercially exploited to generate additional revenues and will be a beautifying addition to the city structures. The commercial activities thus initiated will be a source of employment generation for local inhabitants of the city and will add to general well-being of the populace. Thus, it was a multi-stranded model of passenger facilitation, revenue generation, employment creation, beautification, and economic sustainability.

Actual expenditure incurred on seven stations (Rs 853 million)

Source: PC-IV, Up-Gradation/Renovation of major railway stations

4.3 Scope & Methodology

a. Scope

After going through various changes, finally upgradation/ renovation of seven stations were allocated with budget. Of these seven, two stations; Bahawalpur and Raiwind were reconstructed with seventy-three per cent (73%) of the actual project cost, scope of Gujranwala main station was reduced to twenty-one (21%) of the original budget allocation, remaining four stations were allocated with meager budgets even though passenger volume at these four stations was far more than Bahawalpur and Raiwind stations. It is pertinent to mention here that both Bahawalpur and Raiwind were not included in original proposal presented to and approved by Prime Minister of Pakistan.

b. Methodology

The Impact Audit was conducted as per Audit Guidelines of Supreme Audit Institution (SAI) Pakistan. Materiality was given due consideration in audit planning and execution, as Bahawalpur and Raiwind stations consumed more than two thirds of the total budget, focus of audit assignment remained concentrated on these two stations while allocating due share of time and resources to remaining stations included in the project. Another aspect was the scope of intervention, the two stations had undergone complete treatment and while others received partial one, which made the two stations better subjects for excluding related variables affecting the causation. Audit used difference-in-differences approach for gauging the impact of intervention, treatment group (up-graded stations) were compared with control group (stations receiving no intervention) based on vital variables of geographical proximity and passenger volume. Time-series approach was used to draw intra-station comparisons based on passenger volumes in periods of time prior and post to treatment while providing for a reasonable grace period (two years) for intervention to have tangible effects. The impact of intervention was also gauged comprehensively by obtaining input from end users (passengers), surveys were conducted to collect

information about status of amenities at treatment group stations and comparisons were made with registered passenger complaints to assess credibility of survey results.

4.4 Findings

4.4.1 Impact on revenue earnings with up-gradation/renovation

Prominent increase in station traffic and ridership was an envisaged objective of the project associated with the construction of upgraded station buildings and provision of modern day amenities to passengers and general public. Railway stations Bahawalpur and Raiwind were upgraded with substantial cost of Rs 621.98 million which was 73% of the total project cost while other five stations were renovated to add passenger amenities to their existing structures. Audit has categorized stations into three categories; those with complete up-gradation, ones with renovation and last are those which have neither been up-graded nor renovated. The comparative analysis was made on the basis of increasing/decreasing passenger numbers as a measure of station performance. Following hypothesis was developed from available data.

Yo: passenger volumes at railway stations without any treatment

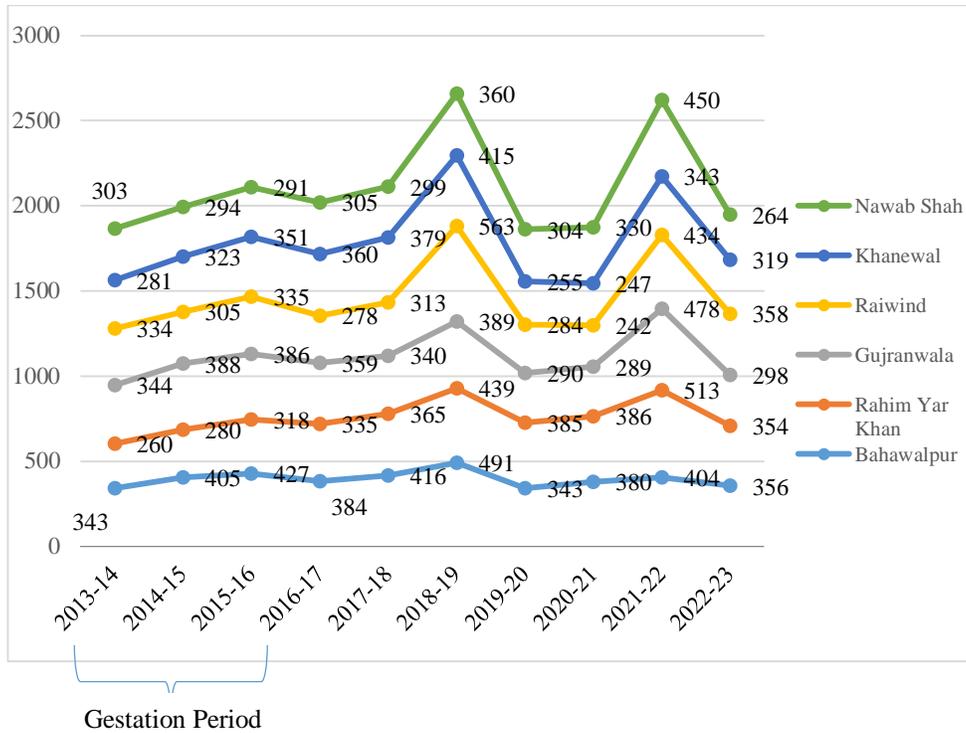

Y1: passenger volumes at railway stations under the project

Six stations were compared on the basis of following parameters:

- Geographical proximity i.e. mainline stations existing on similar geographical regions
- Passenger volume matching
- Number of trains passing through the stations

Bahawalpur and Raiwind having been upgraded, Gujranwala (main) was renovated (Treatment group) and, Rahim Yar Khan, Khanewal and Nawabshah were neither up-graded nor renovated (control group). Passenger data for last ten years was obtained to draw difference-in-differences analysis and develop time series of individual station passenger traffic (**Annexure-47**).

Trend of passengers' volume at stations (2013-14 to 2022-23)

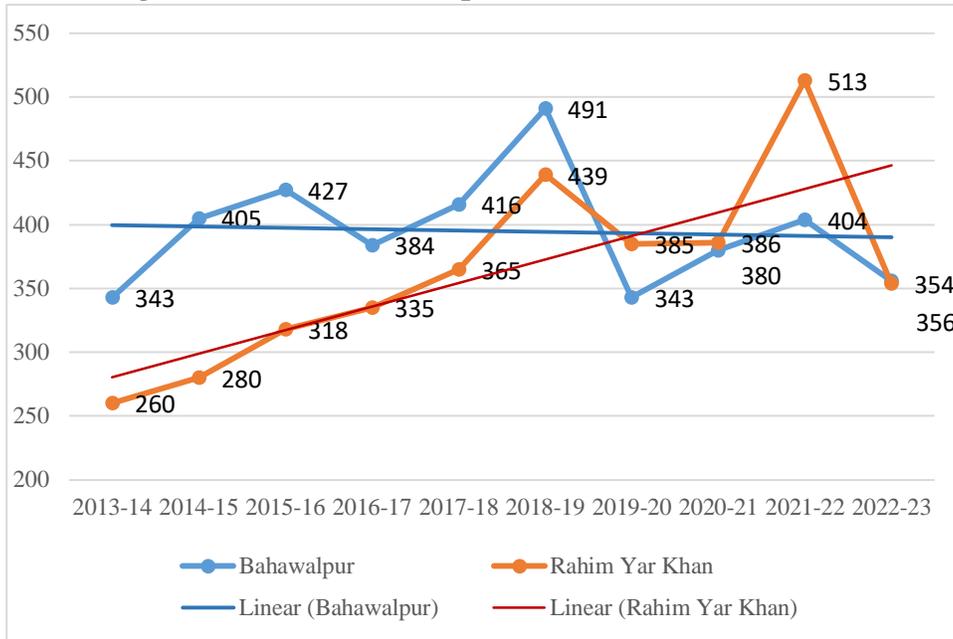

The comparative analysis clearly depicts that trend of rise and fall in passenger volumes has no distinctive anomalies when it comes to up-graded and renovated stations vis-a-viz stations receiving no treatment. The project commenced in June, 2016 and was completed in June, 2021, interestingly, gestation period (without existence of station buildings) depicts better passenger traffic than post completion period which is a clear indication that up-gradation and renovation has little or no impact on passenger revenues.

Comparison between treatment group and control group

The cumulative comparative analysis was further subdivided mutual analysis of stations paired on the basis of similar geographic conditions and passenger traffic which enabled audit to use more sophisticated statistical tools and add clarity to already shown prima facie similar trends.

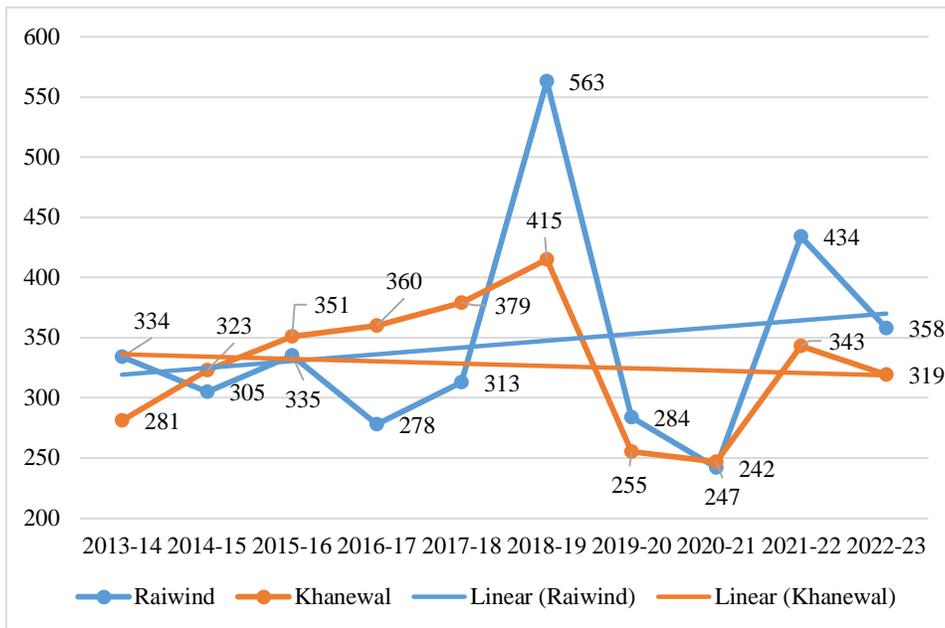

Passengers volume at Bahawalpur and Rahim Yar Khan stations

Source: Reports on station wise passenger traffic from PR (2013-14 to 2022-23)

The decline in slope of blue line (Bahawalpur) and incline of brown line (RY Khan) are measures of variance and standard deviation from mean passenger traffic over last ten years. The graph clearly establishes that R.Y.Khan although receiving no treatment, attracted more passengers both in pre and post periods of project gestation, while number of trains stopping at both stations remained approximately constant during the period. The comeback after Covid also seems to be way more robust in case of Rahim Yar Khan than Bahawalpur which lingered around averages throughout the period despite capital investment of Rs 335 million for up-gradation.

Passengers volume at Raiwind and Khanewal stations

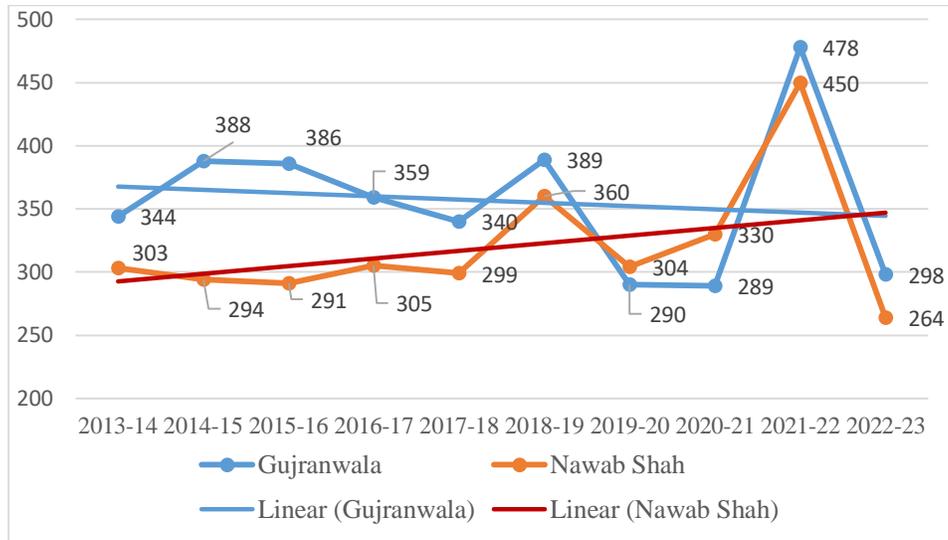

Source: Reports on station wise passenger traffic from PR (2013-14 to 2022-23)

Similarly, Khanewal and Raiwind were compared with each other and intra-station time series analysis was also conducted for Raiwind station as it received full scale treatment of up-gradation. Highest boom in passenger volumes at Raiwind station was observed from 2017-18 to 2018-19 which coincides with gestation period of the project as well. The subsequent decline in slope from 2019-20 to 2020-21 was illustration of COVID period. It is pertinent to mention here that old station building of Raiwind station was not demolished and remained operational during gestation period of the project.

The time series analysis leads one to question the utility of expenditure on construction of new station building. Interestingly, the old station building was still in use for all purpose while newly constructed one was not fully operational even after four years of completion. In comparison to Khanewal station, Raiwind fared better in post COVID period but the point of initiation for this change was year 2016-17 where an anomalous upward surge changed the averages for whole period. The utilization of old station building and upward surge during gestation period culminate into conclusion that up-gradation has little to do with increases in revenues/ number of passengers.

Passengers volume at Gujranwala and Nawab Shah stations

Source: Reports on station wise passenger traffic from PR (2013-14 to 2022-23)

Nawab Shah and Gujranwala (main) were compared for a period of ten years for passenger traffic because both had similar volume of passengers and one is located in central Punjab and other in central Sindh. The trend shows a continuous incline in Nawab Shah and decline in Gujranwala (main) with later performing better during pre-project phase and sliding down more during COVID period than former. There is an over-all decline in slope of Gujranwala station while a competing incline in Nawab Shah’s passenger volumes which clearly depicts that the intervention had no to negative impact on passenger volumes.

The stations were selected for renovation and up-gradation on the basis of condition survey conducted by M/s NESPAK. Audit is of the view that condition survey could not fairly provide justification for discrimination in selecting stations either for renovation or up-gradation. Resultantly, the railway stations having greater passenger volumes were ignored and those having comparatively low ridership were selected for rehabilitation/renovation. Therefore, the intervention had little or no impact in generating additional revenues and making stations operationally self-sustaining as per objectives defined in PC-1 of the project.

4.4.2 Impact on operational self-sustainability through commercial exploitation

Another important objective of the project was to develop railway stations as commercial hubs to generate a second stream of revenue enabling these stations to bear their own operation cost and become operationally self-sustaining. To realize this objective, shops, restaurants and other commercial centers were to constructed and opened at up-graded railway stations for passengers and general public of the area. Seventeen (17) shops and one (01) restaurant were constructed at Bahawalpur Railway station and put to auction after completion of the project but majority of shops could not be leased out unfortunately. The reason behind lack of response from potential lessees was a design failure as shop doors were opened towards platforms. People interested in renting these shops submitted application to the divisional management to allow them to open doors towards the city as no train stopped at Bahawalpur Railway station for more than two minutes and therefore possibility of doing business was very rare. Although, a

sum of Rs 54.00 million was paid to the consultant but designs presented to and accepted by the management had very low practical consideration for making railway stations as commercial centers, hence operationally self-sustaining. The applications of potential lessees are still pending for decision with the management. The management could only lease out five shops in 2023 on meager rental charges. The project not only failed to achieve its stated targets in making stations operationally self-sustaining but also incurred a sunk cost of Rs 72.00 million along with loss of potential earning of Rs 2.35 million in lieu of rents. Only one restaurant has been leased out so far with the condition that the lessee has privilege to place pedestrian vendors on the platform while the restaurant, located in station basement, is itself practically out of operation.

4.4.3 Impact of passenger amenities at Railway stations under the project

One of the prime objectives of the project was to provide missing amenities for passengers and employees at up-graded and renovated railway stations. The details of amenities to be provided have been mentioned in overview of this report. Audit observed that the project was closed with reduced scope of work and reduction involved losing on main objectives of the project.

i) Performance of amenities

a) Clean drinking water is the basic necessity and has been stated as first and foremost objective of the project but the same has not been provided at railway station Raiwind. The management incurred an expenditure of Rs 0.78 million against allocation of Rs 3.50 million for two filtration plants at Raiwind railway station. There was no arrangement for clean drinking water in waiting lounge of Gujranwala station and sitting arrangements comprise of very shabby cemented benches which are quite uncomfortable for passengers.

b) Second important component of passenger amenities as stated in PC-1 was provision of fully furnished waiting rooms with attached lavatories/washrooms. It is pertinent to mention here that Raiwind railway station has no waiting lounge at all. A room designated as waiting hall has been occupied by a restaurant with poor sitting arrangements and kept in untidy condition. Bahawalpur station has waiting lounge without any attached washrooms and furniture capacity for a few passengers only, while the objective in PC-1 was provision of fully furnished waiting lounges for ladies and gents.

ii) Missing amenities

a) The project aimed at provision of ramps for easy and unhindered access to elderly and disabled passengers, no such facility was provided between the two platforms at Bahawalpur railway station. The disabled and elderly cannot ascend the stairs and thus have to be carried to other platform. The pedestrian foot over bridge to cross railway lines to other platform was lying in pieces at Raiwind railway station and passengers had to jump over railway lines to reach the second platform which was not only a physical struggle but also a risk to life and limb of crossing passengers.

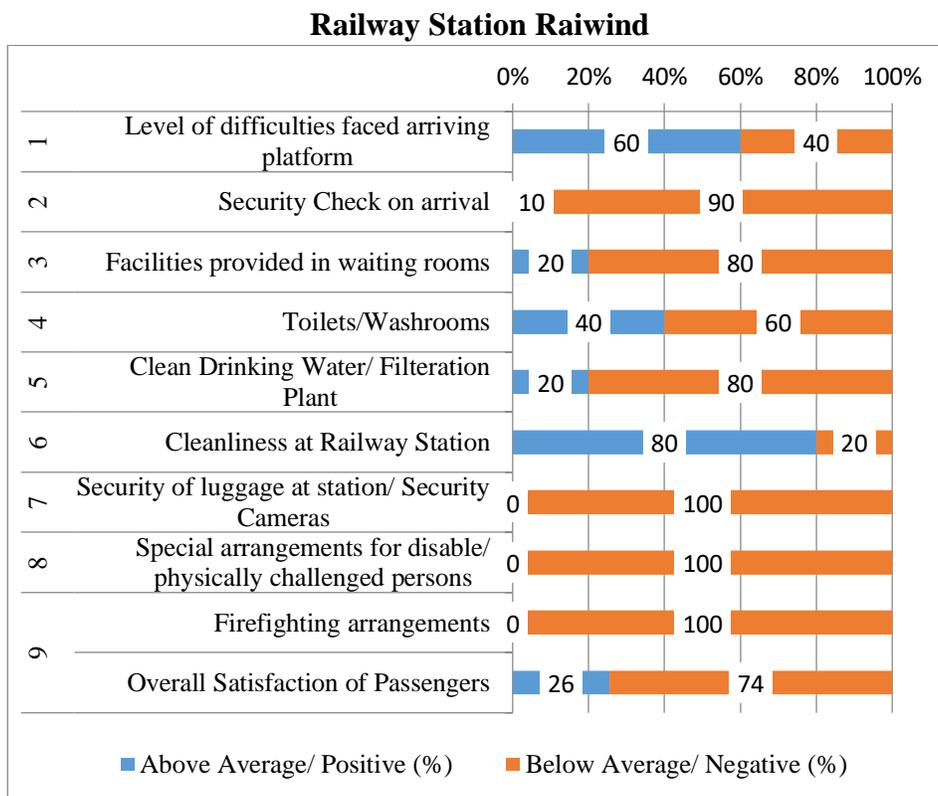

b) Another aspect of unfinished scope was non-provision of security cameras; a sum of Rs 5.50 million was allocated to provision of CCTV cameras for upgraded railway station but the same have not been installed so far which renders the station premises vulnerable to crimes against person and property.

c) A component of scope reduction was non-installation of firefighting equipment. The absence of fire alarms and firefighting equipment increases the vulnerability of passengers and properties in the event of breaking out of fire. Audit is of the opinion that security related arrangements have received least consideration in the project although they received much importance at planning stage.

d) Another component of scope reduction of the project was development and improvement of circulating areas which has been left untouched without incurring any expenditure.

4.4.3.1 Beneficiary survey

Pakistan Railways’ passengers, employees and general public were beneficiaries of this project. Audit conducted surveys to ascertain end user opinions on availability and accessibility of passenger amenities in renovated and upgraded railway stations. The survey results were then compared with complaints launched by passengers and general public on Pakistan citizen portal to rule out any leading conclusions emanating from possibly loaded questions. Audit framed a survey form containing nine questions mainly concerning with availability and accessibility of passenger amenities and security arrangements at three stations namely Bahawalpur, Raiwind and Gujranwala (main). A random sample of 100 passengers was selected and responses against quality of amenities ranged from unsatisfactory to fully satisfactory and in case of availability of amenities, a simple response of yes and ‘no’ was recorded. Pakistan railways employees were not included in this survey as Audit apprehended biased opinions by virtue of their official positions. Following charts and tabular data represent the results of beneficiary surveys at each of three railway stations (**Annexure-48**).

Source: Passengers response through questionnaires

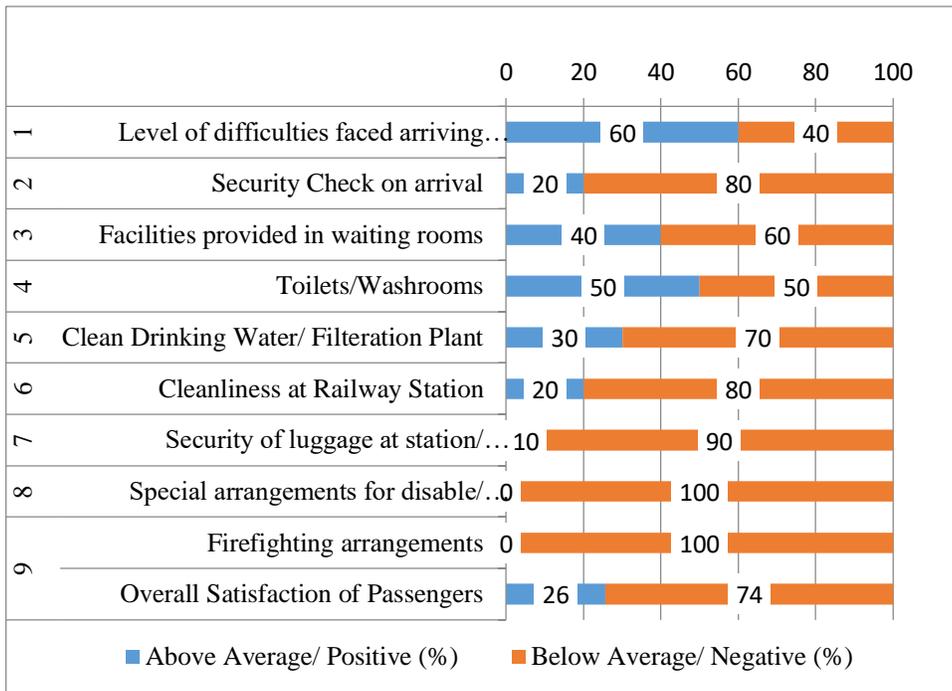

It is obvious from that the results of beneficiary survey that passengers were unsatisfied with security arrangements for property and person in the absence of firefighting arrangements and CCTV cameras. A hundred per cent negative response was also given on availability of special arrangements for elderly and disabled persons. All these facilities were part of the original scope of work which was later on left unfinished even at up-graded railway stations. Three other amenities which received sixty to ninety per cent below average rating were condition of toilets, facilities provided in waiting lounge and clean drinking water.

Railway Station Bahawalpur					
SN	Variables	Above Average/ Positive (%)	Below Average/ Negative (%)		
1	Level of difficulties faced arriving platform	80	20		
2	Security Check on arrival	20	80		
3	Facilities provided in waiting rooms	60	40		
4	Toilets/Washrooms	70	30		
5	Clean Drinking Water/ Filtration Plant	80	20		
6	Cleanliness at Railway Station	90	10		
7	Security of luggage at station/ Security Cameras	40	60		
8	Special arrangements for disable/ physically challenged persons	40	60		
9	Firefighting arrangements	10	90		
	Overall Satisfaction of Passengers	54	46		

Source: Passengers response through questionnaires

All three arrangements related to security of person and property received below average responses from 60% to 90% of the respondents as was the case with Raiwind Railway Station. Response against special arrangements for disabled, elderly and physically challenged passengers was also negative from 60% of the passengers. Comparatively, amenities like clean drinking water, washrooms, facilities provided in waiting rooms and cleanliness were responded to with positivity in case of Bahawalpur Railway station.

Gujranwala Railway Station

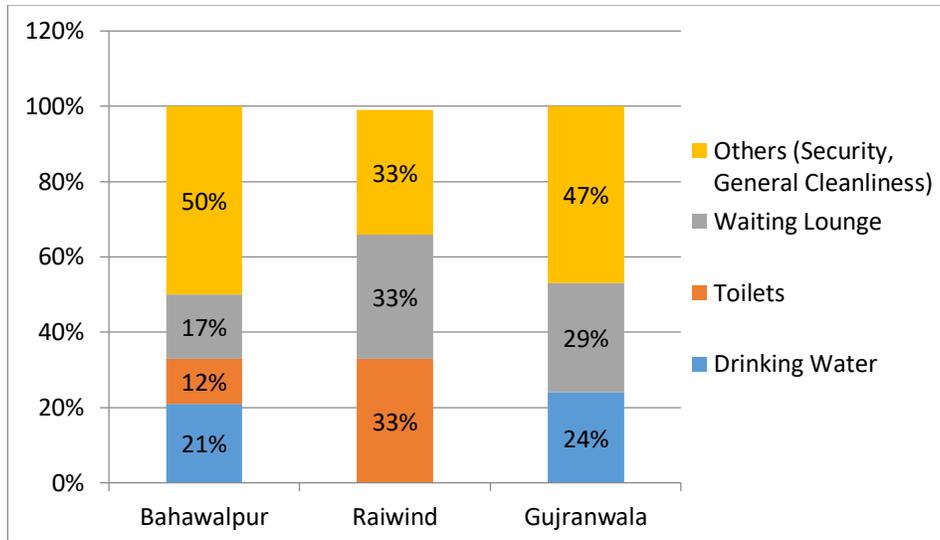

Source: Passengers response through questionnaires

In Gujranwala Railway Station amenities like toilets and washrooms and difficulties faced in arriving at the station received neutral responses from the passengers. All other arrangements regarding security, cleanliness and clean drinking water received negative responses ranging from 60% to 90% below average. Particularly, special arrangements for disabled/elderly/physically challenged passengers and firefighting arrangements received 100% negative responses from passengers for Gujranwala Railway Station.

Beneficiary survey results were further authenticated by categorizing passenger complaints into similar categories as was the scope of survey questions. The results of segregated complaints data have been depicted in the following chart.

Passenger complaints category wise (Treatment Group)

Source: Complaints on Pakistan Citizen's Portal

Complaints data contains same issues highlighted by passengers, through an entirely different portal, as have been ascertained by Audit through beneficiary surveys and portray a picture of unsatisfactory passenger amenities, provision of which was one of the main objectives of the project.

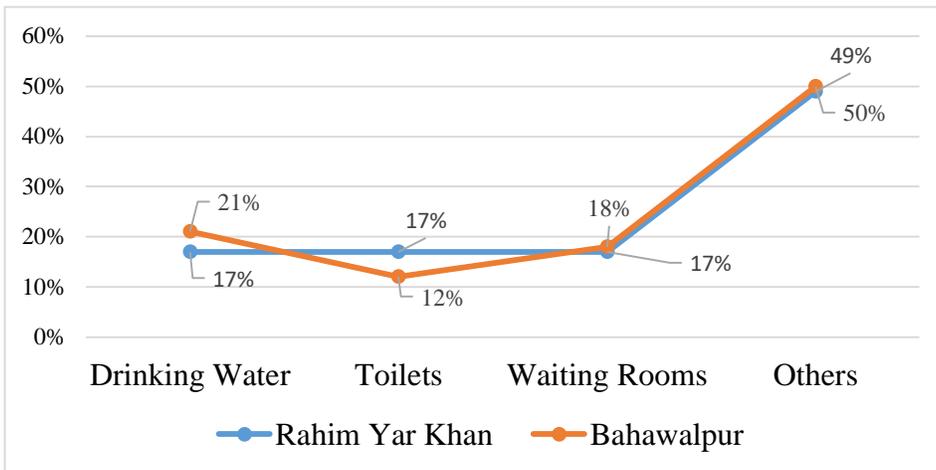

The complaints data relating to three stations of control group (without intervention) was also assessed from the citizens' portal which depicted following results:

Passenger complaints category wise (Control Group)

Station	Drinking Water	Toilets	Waiting Rooms	Others
Rahim Yar Khan	17%	17%	17%	49%
Khanewal	21%	21%	25%	33%
Nawab Shah	No registered complaint found on the portal			

Category wise percentage of complaints pertaining to Rahim Yar Khan and Khanewal (control group) lodged at citizens' portal clearly shows convergence of percentages in identical areas of treatment group. However, the control group had a limitation with regard to Nawab Shah Railway Station where no complaint was lodged on the portal. It doesn't mean that there was no complaint but it could be low literacy rate in that region which may have restricted the beneficiaries from using citizens' portal.

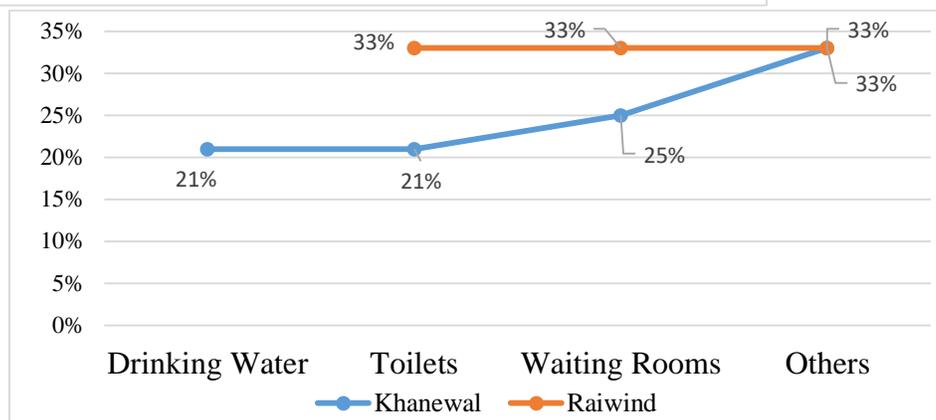

Passenger complaints convergence Rahim Yar Khan (without intervention) vs Bahawalpur (with intervention)

Source: Complaints on Pakistan Citizen's Portal

A comparison of complaints at Khanewal and Gujranwala is also made below:

Passenger complaints convergence Khanewal (without intervention) vs Raiwind (with intervention)

Source: Complaints on Pakistan Citizen's Portal

The convergence of percentages for identical areas of public complaints at Control Group and Treatment Group revealed minimum to no positive impact of the intervention with regard to provision of passenger amenities especially at Bahawalpur.

4.4.4 Structural sustainability of upgraded buildings:

The project was aimed at passenger facilitation, revenue generation, operational self-sustenance and structural longevity covering at least 50 years of active service period. Audit examined structural designs of upgraded stations to assess whether the achievement of project objectives had been supported by station architecture in providing ease of access for utilization of available amenities to all types of passengers including women, elderly and disabled ones. Audit inspected newly constructed buildings to observe any weaknesses in structures.

4.4.4.1 Railway Station, Bahawalpur

Railway Station Bahawalpur was up-graded in 2019 by dismantling of old station building with total cost of Rs 335.85 million. The architectural design of new station building (43,560 Sft) was in the

image of Noor Mahal Palace, Bahawalpur. Audit observed that the station design had following discrepancies with respect to ease of access to amenities by passengers and general public:

- a) All offices of responsible staff including Station Master, Assistant Station Master, and security staff were accommodated at 1st floor instead of ground floor as per conventional design of all other railway station; hence it was made difficult for passengers to access them.
- b) Waiting rooms were also built at 1st floor of station building with no attached toilets and air-conditioning facility, therefore, most of the passengers were not utilizing those waiting rooms.
- c) Restaurant was designed in the basement which was found out of operation due to lack direct access from the platform and waiting rooms.
- d) Lavatories and toilets for public and employees were built at basement and 1st floor. Employees and workers especially female booking staff had to face difficulty using toilets during rush hours.
- e) Parcel & Luggage office was not designed at Bahawalpur Station. It was observed that booking of parcels & luggage was being managed at ground floor in a room allocated for a shop having no direct access to the Platform.
- f) Only one Retiring Room was built in such an oversized Railway station building which was also found vacant and in untidy condition. There was no ventilation or air conditioning facility. Resultantly, retiring room was not in a condition to be offered to visiting passengers for staying inside station building.
- g) The doors of the shops were opened towards platforms instead of city area, although, no train stopped for more than two minutes at the station.

In view of the above-mentioned findings, Audit ascertained that Bahawalpur Station building was not designed in the best public interest. Accessibility and facilitation to passengers had not been largely considered at the design stage. Therefore, most of the rooms in the station building were found out of use indicating wastage of valuable resources and planning failure.

4.4.2 Railway Station, Raiwind

A new building of Railway Station, Raiwind measuring 29,869 Sft was constructed in 2019 under the project, at a cost of Rs 286.13 million on an empty piece of Railway land in front of old station building. However, the old station building was found operative till the date of audit i.e. September 2023. Audit observed that the new Railway Station building had given way to visible horizontal and vertical cracks in walls at both superior and inferior sides of many rooms. Pictorial evidence of cracks is shown in (**Annexure-49**). Audit ascertained that the new building of Railway station, Raiwind, was constructed with substandard civil works with inadequate soil compaction.

Resultantly, the building started sinking at many places. It hampered achievement of the project objective of 50 years structure sustainability and the buildings may be in need of special repairs sooner than avowedly claimed.

Management Response

The Impact Audit Report was discussed in detail in the DAC meeting held on 09.01.2024. The Chair expressed that this study/report on this important perspective of spending public finance could be useful for management. The analysis approach adopted by the new concept of Impact Audit is viable and doable.

5. Conclusion

Comparative analysis between control group stations and treatment group stations led audit team to conclude that the trend of rate of change in annual passenger traffic at treatment group stations was no different than control groups. Standard deviation from mean passenger traffic over ten years was, in fact, statistically tilted in favor of control group in 66 per cent of the tested sample. Raiwind, however, performed slightly better than Khanewal in comparative analysis of difference-in-differences but the upward slope (incline) in passenger traffic was set in same trend prior to the commencement of project and no significant steepness was witnessed in post project phase. While using time series approach, Audit witnessed an exceptional anomaly of considerably higher than average passenger traffic at all stations during gestation period of the project which implies that passengers and revenues earnings actually increased when there was no station building in operation at all. The steepest rising trend in ridership without presence of any operational station building and associated amenities clearly indicate that the project objectives have no significant relationship with increased revenues and ridership. Time series analysis was also conducted to draw intra stations comparisons between pre and post project periods of upgraded and renovated stations which revealed that there was a decreasing trend starting from 2013 and culminating to 2023 except for Raiwind station where old building is still in use. The beneficiary survey and physical inspection revealed that provision of important amenities, particularly with respect to security of person and property, were not made by reducing the scope of project or parking funds elsewhere. The quality of amenities provided was not up to the mark as envisioned in PC-1. Basic amenities like clean drinking water, attached washrooms and foot-over bridges were not provided at one or other stations under the project. Beneficiary survey also revealed that ease of access to passenger amenities was denied by virtue of architectural design which did not take into consideration the practical necessities of the station. To realize the objective of making up-graded stations operationally self-sustaining by developing stations as commercial hubs, shops and restaurant were constructed at Bahawalpur station but commercial activities could not be started because of design failure. The endeavor towards self-sustenance culminated into sunk costs and erosion of potential revenues. Audit therefore concludes that the project had little or no significant impact on increasing volume of ridership, making stations operationally self-sustaining and provision and access of passenger amenities, development of circulating area and generation of employment for general population. Up-graded stations are aesthetically comforting in view, the only objective which has been fully achieved by the project.

Audit recommends pragmatic planning in allocation of resources while keeping in view the concept of value for money as Pakistan railways is already suffering from losses. Need assessment may include input from end beneficiaries to make it more comprehensive and realistic. Audit observed that reduction in scope of project and faulty design obliterated intended benefits from available passenger facilities. This audit recommends strengthening of internal controls to bar scope changes after approval of PC-I and segregation of scope components which may be fundamentally connected to project's main

objectives and declaring such components beyond reduction. Quality of civil works may be ensured to achieve forecasted life spans of buildings. Responsibility may be fixed for delayed decision making in putting resources to profitable usage as is the case with Bahawalpur shops. Comparative analysis of various projects having realistic payback periods, Internal rates of return and financial predictions may be made under the governing principle of greatest good of greatest numbers rather than presenting individual project proposals without any competitors to the approving authorities.

**AUDIT REPORT
ON
THE ACCOUNTS OF
MINISTRY OF WATER RESOURCES
AND ITS ENTITIES
AUDIT YEAR 2023-24**

AUDITOR-GENERAL OF PAKISTAN

DIRECTORATE GENERAL AUDIT (WATER RESOURCES)

CHAPTER-1

1. Ministry of Water Resources

1.1 Introduction

MoWR is mandated for development of country's water and hydropower resources to meet current and future challenges of water shortage, provision of affordable, environmental friendly renewable energy and act as a catalyst in the implementation of the National Water Policy (NWP), 2018 by taking all the stakeholders on board, through creativity, initiative, innovation and technology. WAPDA, IRSA, FFC, PCIW and PCRWR are working under the umbrella of MoWR to manage and holistically address the water sector issues of Pakistan at federal level.

WAPDA was established through an Act of Parliament in 1958 as an autonomous and statutory body under the administrative control of the Federal Government. The charter of duties of WAPDA is to investigate, plan and execute projects for hydropower generation, irrigation, water supply and drainage, prevention of water logging, reclamation of waterlogged saline lands and flood management. To discharge its duties, WAPDA is administratively structured in three wings namely; Water Wing, Power Wing and Co-ordination Wing.

IRSA was established vide Act No. XXII of 1992 passed by the Parliament and approved by the President of Pakistan on December 6, 1992. IRSA was established for regulating and monitoring the distribution of water resources of Indus River System in accordance with the Water Apportionment Accord, 1991 amongst the Provinces and to provide matters related therewith and ancillary thereto.

FFC was established in January, 1977 for the purpose of integrated flood management at national level. FFC is mainly responsible for the preparation of National Flood Protection Plans and their implementation through concerned Provincial and Federal Departments in the country.

PCIW is part of the Permanent Indus Commission which is a bilateral commission consisting of officials from India and Pakistan, created to implement and manage the goals and objectives of the Indus Waters Treaty (IWT), 1960. The commission maintains and exchanges data and co-operates between the two countries under the provisions of the treaty.

PCRWR is an apex organization of the MoWR established through Act No.I of 2007. It is mandated to conduct, organize, coordinate and promote research on all aspects of water resources. It has a network of seven research and demonstration centers in different agro-climatic zones of the country.

Table-1 Audit Profile of MoWR

Description	Total	Audited	Expenditure Audited	Revenue/ Receipts Audited

1.2 Sectoral Analysis

Pakistan is highly vulnerable to the impacts of climate change, including water scarcity, extreme weather events and declining crop yields due to growing population and careless use of water. Pakistan is now one of the top ten nations impacted by global warming and may soon become one of the most water-stressed countries in the world as the shortages increase. Water scarcity has become a serious threat to the sustainable and economic growth of Pakistan. Pakistan's groundwater resources, the last resort of water supply, are severely overdrawn, mainly due to supply of water for irrigation. If the situation remains unchanged, the whole country may face severe water scarcity by the year 2025. Over the last few decades, Pakistan has drastically changed from being a water abundant country to a water-stressed country. In overall context, Pakistan's water crisis is mainly due to rapid population growth followed by climate change (floods and droughts), poor water management in agriculture sector, inefficient infrastructure leading towards wastage and water pollution. Pakistan has witnessed intermittent spells of floods and droughts in the previous years. Climate change may further decline aggregate water flows in the future. There is a need to fill the gaps between policies, reforms and their implementation by devising a detailed implementation plan. According to experts⁵⁸, we do not have a water crisis; we have a failure of governance regarding water issues. It is essentially important to get leverage from technology for efficient water utilization; however, it is also crucial to choose the right innovation, which can deliver the required solutions. The situation calls for rapid development and management of the country's water resources on a war footing. Only by devising and implementing appropriate adaptation measures, it will be possible to ensure water, food and energy security for the country as well as minimize the impact of natural disasters. There is a dire need to take timely cognizance of the emerging water crisis and issuance of guidelines for a comprehensive plan of action to address the same. Farmers can take advantage of precision watering through adoption of drip irrigation system rather than flooding their fields. Pakistan needs to put serious thought into how it will provide adequate water for agriculture, industry and human consumptions in the

⁵⁸ *Pakistan's water security issue (Institute of Strategic Studies, Islamabad)*

face of rapidly dwindling water reserves. Pakistan’s approach to water management relies on large scale reservoirs, link canals and inter-basin transfers to support the agriculture sector which consumes 94% of total available surface and ground water resources.

The Council of Common Interests (CCI) formally approved the NWP on April 24, 2018. The policy, inter alia, aimed at developing a National Planning Database to support an integrated information system in order to enable planning and development of water and other related resources on a sustainable basis besides revitalizing and restructuring WAPDA. In addition, NWP required submission of periodical reviews to CCI on the implementation of NWP and achievement of its objectives. NWP was framed to achieve its objectives within a given timeframe but it was found that no structural mechanism is in place in MoWR to monitor the implementation of NWP. The implementation framework has not yet been finalized despite lapse of five years. Moreover, no periodical reviews were submitted to CCI which showed that no documented mechanism is available to gauge the achievement of policy objectives. MoWR was responsible to propose and implement the restructuring plan to upgrade WAPDA within a year after approval of the policy but no steps have been initiated since approval of the policy.

Large scale water reservoirs are also important for availability, accessibility and affordability of electricity for the people across the country as well as for the economic progress and social uplift of the citizens. Of all the sources of electric power generation in a power system, hydel power is the cheapest source in a generation mix. As such, ensuring availability and development of hydel power generation carries immense importance from the perspective of the energy security, sustainability and affordability of electricity.

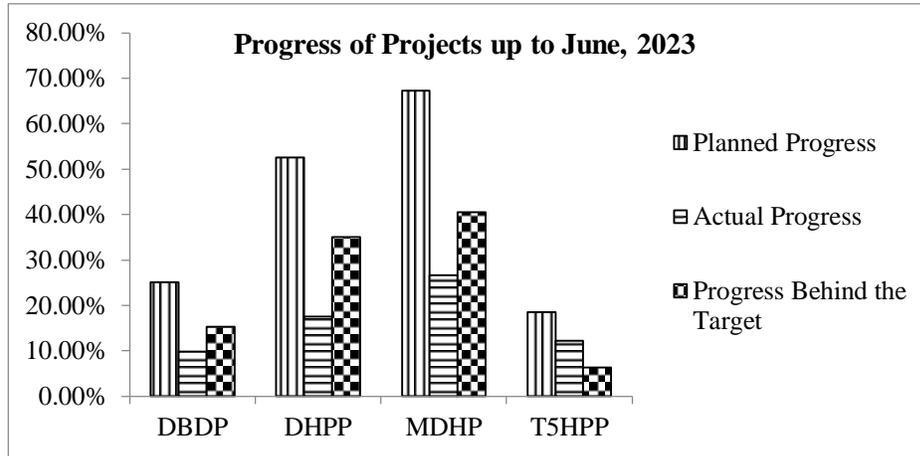

Presently, WAPDA is executing three large scale projects on Indus River and one on Swat River. Diamer Basha Dam Project (DBDP) having storage capacity of 8.1 Million Acre Feet (MAF) and power generation capacity of 4,800 MW is being constructed at 315 Kilometer (KM) upstream of Tarbela Dam. Dasu Hydropower Project (DHPP) with power generation capacity of 4,320 MW is being constructed at 74 KM downstream of DBDP and Tarbela 5th Extension Hydropower Project (T5HPP) having power generation capacity of 1,530 MW is being constructed at existing Tarbela Dam. Whereas, Mohmand Dam Hydropower Project (MDHP) having storage capacity of 0.676 MAF and power generation capacity of 800 MW is being constructed on Swat River at 5 KM upstream of Mohmand Tribal District.

Even though, keeping in view the importance of these water sector projects for the socio-economic uplift of the country, performance/progress of the projects remained very slow and far behind the targets set up to 30th June, 2023 as tabulated below:

Progress of Projects up to June, 2023

Sr. No.	Name of Project	Planned Progress	Actual Progress	Progress Behind the Target
1	DBDP	25.11%	09.80%	15.31%
2	DHPP	52.60%	17.60%	35.00%

3	MDHP	67.22%	26.68%	40.54%
4	T5HPP	18.52%	12.23%	06.29%

(Source: Monthly progress reports of the projects-June, 2023)

Similarly, in order to overcome the shortage of water in Karachi city, the Greater Karachi Bulk Water Supply Scheme (K-IV) was planned for supply water to Karachi city from Keenjhar Lake by

the Government of Sindh (GoS). Later on, the Federal Government under arrangement with GoS has taken up implementation of the project as part of Prime Minister's Package for Karachi and directed WAPDA to take over the responsibilities for execution of the project since January, 2021. The construction under Phase-I is aimed at supply of 260 Million Gallons water per day (MGD) which has been divided into eight packages. The contracts for these packages were awarded during May, 2022 to September, 2022 with completion dates of upto February, 2024. However, the management failed to achieve physical progress of this project of vital importance according to plan as detailed below:

Progress of K-IV Project up to June, 2023

Sr. No.	Contract Package No.	Planned Progress	Actual Progress	Progress Behind the Target
1	KIV-IW (for Intake Works)	80.09 %	20.20%	59.89%
2	KIV-AW (for Allied Works)	73.05%	23.46%	49.59%
3	KIV-PL1 (for Pipeline Works)	53.55%	37.20%	16.35%
4	KIV-PL2 (for Pipeline Works)	62.20%	09.06%	53.14%
5	KIV-FP1 (for Filtration Plant 1)	27.75%	05.31%	22.44%
6	KIV-FP2 (for Filtration Plant 2)	22.94%	05.17%	17.77%

7	KIV-FP3 (for Filtration Plant 3)	28.10%	05.36%	22.74%
8	KIV-PS (EPC Contract for Pumping Station)	56.52%	08.68%	47.84%

(Source: Monthly progress report of K-IV project-June, 2023)

Due to delay in completion of K-IV Project, dense population of Karachi will have to face acute shortage of water during 2024-25 as existing approved quota of water for entire city of Karachi is highly insufficient.

In WAPDA, significant issues were observed in project execution and contract management. Projects have been initiated without proper planning, detailed designing, financial close and proper feasibility studies. Most of the projects are stalled during the initial phase of land acquisition. The impact of defective designing becomes evident in the wake of excessive increase in Bill of Quantities (BOQ) and Variation Orders (VOs), surpassing even the original contract price on occasions. As such, a major portion of expenditure remains excluded from the competitive process. This also highlights questionable performance of the consultants right from the preparation of feasibility studies to designing and project monitoring.

Eventually, mismanagement of the projects results in giving rise to disputes, termination of contracts and litigations causing time and cost overruns. Significant risk areas related to procurement management, contract management, financial management, assets management and HR related issues, etc. which were planned to be looked into in the Audit Plan 2023-24. Accordingly, these areas have been examined during audit execution and reported to the PAO. In order to ensure that public funds are used efficiently, the PAO is required to take corrective measures, accordingly.

1.3 Classified Summary of Audit Observations

Audit observations amounting to Rs.356,505.326 million were raised in this report during the current audit of MoWR and its entities. This amount also includes recoveries of Rs.12,858.102 million pointed out by the Audit. Summary of the audit observations classified by nature is as under:

Table-2 Overview of Audit Observations

(Rs.in million)

Sr.	Classification of Audit Observations	Amount
A	Procurement Management	34,571.207
B	Contract Management	57,390.800
C	Financial Management	212,451.322
D	Assets Management	6,715.686
E	Management of Accounts with Commercial Banks	13,681.643
F	HR & Employees Related Issues	982.905
G	Value for Money and Service Delivery	1,091.830
H	Others	29,619.933

Note: The increase of total amount taken in audit observations over expenditure/receipt audited is due to the reason that in some cases, amount of progressive expenditure and receipts have been objected depending upon the nature of observations/issue.

1.4 Comments on the status of compliance with PAC directives

Sr. No.	Audit Year	No. of Directives	Compliance received	Compliance Outstanding	%age of compliance
1.	1985-86	4	0	4	0
2.	1986-87	1	0	1	0
3.	1987-88	7	0	7	0
4.	1988-89	6	0	6	0
5.	1989-90	7	0	7	0
6.	1990-91	5	0	5	0
7.	1991-92	6	0	6	0
8.	1992-93	2	0	2	0
9.	1993-94	4	0	4	0
10.	1994-95	3	0	3	0
11.	1995-96	3	0	3	0
12.	1996-97	1	0	1	0
13.	1997-98	1	0	1	0
14.	1998-99	2	0	2	0
15.	1999-2000	2	0	2	0
16.	2000-01	4	0	4	0

17.	2001-02	3	0	3	0
18.	2002-03	2	0	2	0
19.	2003-04	5	0	5	0
20.	2005-06	2	0	2	0
21.	2006-07	6	0	6	0
22.	2007-08	8	1	7	13
23.	2008-09	3	1	2	33
24.	2009-10	10	0	10	0
25.	2010-11	5	0	5	0
26.	2011-12	14	6	8	43
27.	2012-13	6	1	5	17
28.	2013-14	20	6	14	30
29.	2014-15	2	0	2	0
30.	2015-16	13	3	10	23
31.	2016-17	17	0	17	0
32.	2017-18	5	0	5	0
33.	2018-19	9	0	9	0
34.	2019-20	15	0	15	0

Note: Position of compliance with PAC directives is not satisfactory.

1.5 Audit Paras

A. Procurement Management

1.5.1 Unjustified increase in contract cost by changing scope of work through variation order in violation of PPRA rules and ignoring PC-I provisions - Rs.29,413.545 million

According to Rule-20 of PPRA Rules, 2004, “save as otherwise provided hereinafter, the procuring agencies shall use open competitive bidding as the principal method of procurement for the procurement of goods, services and works”. As per Rule-4 of the same, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical”. As per Para-6.11 of the Manual for Development Projects, “the physical and financial scope of a project, as determined and defined in the project document (PC-I), is appraised and scrutinized by the agencies concerned before submitting it for approval of the Central Development Working Party or Executive Committee of the National Economic Council (ECNEC). Once approved, the executing agency is required to implement the project in accordance with the PC-I provisions. It has no authority to change and modify any approved parameter of the project on its own...”.

During audit of accounts of the Project Director (PD), DHPP for the period from July, 2022 to June, 2023, it was observed that PC-I of the project was approved by the ECNEC on March 28, 2014 at a cost of Rs.486,093 million. Later on, a contract for relocation of Karakoram Highway (KKH)-01 was awarded to M/s China Civil Engineering Construction Corporation on March 16, 2015 at a contract price of Rs.14,538.852 million against PC-I provision of Rs.13,496.900 million with completion period of 564 days i.e. up to February 20, 2017. However, the construction of KKH-01, which was to be used as a bypass for diverted traffic of original KKH to avoid interference in the construction activities of the main works, couldn't be completed till date. Meanwhile, the contract for civil works was awarded to M/s China Gezhouba Group Co. Ltd. (CGGC) at a contract price of Rs.115,003.461 million on March 08, 2017 with planned completion date of January 22, 2023. In order to avoid interference of open excavation work of KKH-01 with construction activities of the main work, avoid damages of main contractor's camp and divert public traffic of the old KKH, a VO was issued for re-alignment of the relocated KKH-01 by including seven tunnels and three bridges costing Rs.29,413.545 million (equal to 202% of contract price). It is pertinent to mention that no tunnel was included in the scope of original contract for construction of road, therefore, 77% work (tunnels) of the VO was not based on original BOQ, hence, their rates were non-competitive. Audit held that as the amount of VO was more than the original contract price and scope of work was also changed from open-cut to tunnels & bridges, therefore, issuance of VO of huge amount without obtaining competitive rates as required under PPRA rules and ignoring provisions of PC-I was not justified.

Non-adherence to the PPRA Rules and instructions of Planning Commission resulted in unjustified increase in contract cost by changing scope of work through VO amounting to Rs.29,413.545 million up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in December, 2023. The management replied that the VO was issued as per site requirements with the approval of the Authority and after obtaining No Objection Letter (NOL) from World Bank.

The reply was not acceptable because the scope of work was changed through a VO in its entirety as compared to scope of original contract due to poor planning and the rates of VO remained outside the ambit of competitive process on which the original contract was awarded.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter at a higher level for fixing of responsibility for award of an entirely redesigned work through a VO and that too at uncompetitive rates.

(Draft Para No.422/2023-24)

1.5.2 Loss due to delay in finalization of bid proposal for award of contract - Rs.3,176 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of accounts of the PD, Mangla Refurbishment Project (MRP) for the period from July, 2022 to June, 2023, it was observed that a contract for manufacturing, supply, installation and commissioning of units No.9 & 10 was awarded to M/s GE Hydro France on January 10, 2023 at a contract price of Rs.11,922.908 million through direct contracting mode with the aim of timely utilization of USAID grant. Further probe into the matter revealed that initially, the contractor submitted the bid/financial proposal of US\$ 49.690 million (equivalent to Rs.8,746 million) on February 03, 2022 with validity of 90 days. The bid was forwarded to the consultants who submitted draft evaluation report to General Manager (GM) Hydel (Operation) on April 26, 2022. However, WAPDA could not finalize the proposal well in time and requested the contractor on April 28, 2022 to extend the bid validity. The contractor, through a letter dated April 29, 2022 extended the validity of offer till May 15, 2022 but on May 13, 2022 submitted a revised proposal with an increased cost of US\$ 57.160 million which was reduced to US\$ 51.890 million (equivalent to Rs.11,922 million) by the contractor with extended bid validity of up to October 01, 2022. Audit held that bid for award of contract through direct contracting was required to be finalized within initial bid validity period which was not done. Due to delay in bid evaluation process, the contract was awarded at a higher cost of Rs.3,176 million which was loss to the Authority for which responsibility needed to be fixed.

Non-adherence to aforementioned guidelines resulted in a loss of Rs.3,176 million due to delay in finalization of bid proposal for award of contract during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that a detailed analysis was required to ensure the financial reasonability as well as technical conformity related to the requisite specifications. Moreover, such evaluation required involvement of multiple stakeholders to carry out this job at various levels and the

contract was awarded at the head office level with the approval of WAPDA Authority.

The reply was not acceptable because the contract was awarded at enhanced price due to delay in finalization of bid, which caused loss to the Authority.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify need for direct contracting and delay in finalization of proposal/bid besides inquiring the matter for fixing responsibility upon the person(s) causing this loss.

(Draft Para No.368/2023-24)

1.5.3 Excess expenditure on restoration of Tailrace Tunnel due to increase in quoted rates of BOQ items after negotiations with the contractor - Rs.1,176.082 million

According to Rule-42 d (iii) of PPRA Rules, 2004, “a procuring agency may engage in negotiated tendering with one or more suppliers or contractors with or without prior publication of a procurement notification. This procedure shall only be used when, for reasons of extreme urgency brought about by events unforeseeable by the procuring agency, the time limits laid down for open and limited bidding methods cannot be met. The circumstances invoked to justify extreme urgency must not be attributable to the procuring agency. Provided that any procuring agency desirous of using negotiated tendering as a method of procurement shall record its reasons and justifications in writing for resorting to negotiated tendering and shall place the same on record”. As per Rule-4, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical”.

During audit of accounts of the Chief Executive Officer (CEO), Neelum Jhelum Hydropower Company (NJHPC) for the period from July, 2021 to June, 2023, it was observed that a portion of Tailrace Tunnel (TRT) of the project was collapsed in July, 2022. The work for restoration of TRT was awarded to M/s CGGC (previous contractor) through negotiations. Scrutiny of the record revealed that the contractor submitted 1st quotation for remedial works on July 27, 2022 and after negotiations, rates of 47 items as compared to 1st quotation were increased before finalization of the contract. Due to subsequent increase in the rates of BOQ items, the company had to bear extra expenditure of Rs.1,176.082 million up to Interim Payment Certificate (IPC) No.10.

Non-adherence to the PPRA Rules resulted in excess expenditure of Rs.1,176.082 million on restoration of TRT due to increase in quoted rates of different BOQ items up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 &

19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify incurrence of excess expenditure due to increase in BOQ rates after negotiations besides fixing responsibility.

(Draft Para No.105/2023-24)

1.5.4 Undue favour to the contractor by amending the clauses of PEC's Standard Form of Bidding Documents - Rs.274.729 million

Clause-10.1 of Particular Conditions of Contract (PCC) of PEC's Standard Form of Bidding Documents (Civil Works) requires the contractor to provide performance security equal to 10% of the contract price stated in the Letter of Acceptance (LOA). Further, Clause-60.2 of Special Stipulations (Appendix-A to bid) states that the limit of retention money should be 5% of the contract price stated in LOA. The retention money shall be deducted @ 10% of amount of each IPC. Furthermore, this document states that "Mandatory provisions not to be amended/substituted except as instructed by PEC".

During audit of accounts of the CEO, NJHPC for the period from July, 2021 to June, 2023, it was observed that a contract for restoration works of TRT was awarded to M/s CGGC at a contract price of Rs.1,624.966 million and US\$ 4.172 million. As per PEC's Standard Form of Bidding Documents, the performance security @ 10% of contract price amounting to Rs.162.500 million & US\$ 0.417 million was required to be obtained from the contractor but performance security amounting to Rs.48.750 million and US\$ 0.125 million was obtained by reducing its rate from 10% to 3% in violation of PEC's instructions. Due to reduction of rate, performance security amounting to Rs.179.961 million (Rs.113.748 million + US\$ 0.292 million) was less obtained. Similarly, the limit of retention money was required to be 5% of the contract price excluding provisional sum i.e. Rs.120.156 million & US\$ 306,029. However, the management reduced the limit of retention money from 5% to 2.5% in violation of instructions of PEC. Further, the rate of deduction of retention money was also reduced from 10% to 2.5% of amount of each IPC. Due to amendment in standard clauses, an amount of Rs.94.768 million on account of retention money was less deducted. Audit held that the conditions contained in PEC's Standard Form of Bidding Documents were mandatory in nature and could not be amended. Due to reduction in rates of performance security and retention money by amending the standard clauses, an amount of Rs.275.050 million (Rs.180.282 million + 94.768 million) was less obtained/deducted which was not only an undue favour to the contractor but also increased the risk of the Employer.

Non-adherence to the PEC's instructions resulted in undue favour of Rs.274.729 million to the contractor by amending the clauses of PEC's Standard Form of Bidding Documents up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and

January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify reduction in rates of performance security and retention money in violation of instructions of PEC besides fixing responsibility.

(Draft Para No.114 & 115/2023-24)

1.5.5 Irregular expenditure on purchase of vehicles as BOQ items through construction contractors - Rs.234.403 million

According to austerity measures circulated by the Finance Division (Expenditure Wing) vide office memorandums No.F.7(1)Exp.IV/2016-440 and even No.2016-340 dated July 15, 2021 and July 07, 2022 respectively, there shall be complete ban on purchase of all types of vehicles from current and development budget except utility vehicles such as ambulances, buses for educational institutions and solid waste vehicles etc.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that 24 vehicles of different makes worth Rs.234.403 million were purchased through different contractors as BOQ items. Audit held that provisions for purchase of vehicles through the construction contractors were made in the contracts just to avoid the austerity measures of the Government which was unjustified. The detail is as under:

(Rs. in million)				
Sr. No.	Name of Formation	DP No.	No. of Vehicles	Amount
1	PD, DHPP	333/2023-24	06	32.471
2	PD, DBDP	356/2023-24	18	201.932
TOTAL			24	234.403

Non-adherence to instructions of Finance Division resulted in irregular expenditure of Rs.234.403 million on purchase of vehicles during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that transportation for the Employer and consultants was included in the contracts and procurement of vehicles was carried out by the contractors accordingly.

The reply was not acceptable because vehicles were purchased by the Employer through the contractors as BOQ items in violation of instructions of Finance Division regarding austerity measures.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify the procurement of vehicles through construction contractors in violation of instructions regarding austerity measures as it was not a specialized job besides fixing responsibility.

1.5.6 Compromise on the quality of dam due to procurement of refurbished Shear and Beam Testing Equipment for specialized tests – Rs.208.368 million

According to Clause-7.7 of the Manual for Development Projects, “the PD, who is supposed to have studied and grasped the provisions of PC-I and the contract agreements, keeps a vigilant eye on availability of standardized machinery, material and qualified staff as well as progress of work on the part of contractor. He may have to review and revise the Critical Path Method when necessary”. As per Clause-7.8, “it is vitally important to watch that the progress is not pushed at the cost of the quality and it is equally important that the works are not delayed/suspended or slowed down due to impediments in timely supply of materials, acquisition of site, and/or want of requisite funds at appropriate stages. All these strategic points must be sorted out in advance by the foresight of the PD in coordination with the concerned quarters so as to avoid time and cost over-run to the extent possible. Timely signals must go out to concerned quarters if the project is in trouble”. As per Clause-7.9, “a system has also to be evolved to ensure that quality material is made available in requisite quantity and utilized well in time on execution of the project. This will also include protection of materials, installation of field laboratories adequately equipped with standardized machinery and qualified staff for day to day testing of materials and samples. In case of major projects, this should also form a part of the duty of the supervisory consultants”. As per Clause-30.3.4 of the Special Provisions of Contract, “payment will be made for the specialized tests to be carried out in specialized laboratories as per requirement of the works”.

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, it was observed that equipment for Reinforced Cement Concrete (RCC) Specialized Test was to be procured by the contractor. It was further observed that in December, 2022, the Engineer approved the cost estimate of US\$ 630,397 (equivalent to Rs.189 million) for procurement of said equipment for RCC Specialized Tests and expiry date of validity of the quotation was April 30, 2023. Meanwhile, the contractor claimed that due to non-payment of foreign exchange portion by the Employer, it would not be possible to place an order to the vendor of the machine. The consultants vide letter No.MWI-PFJV-003-1227 dated April 20, 2023 directed the contractor to place an order immediately before expiry of the validity of quotation as the Employer had released foreign exchange of US\$ 20 million to the contractor, however, the contractor failed to place the order within price validity and bid of the supplier expired. Due to failure of the contractor to place an order for the subject equipment, a revised quotation was obtained by the contractor from the supplier with increased price of US\$ 713,288 (Rs.213 million). The Engineer granted consent for the revised quotation and directed the contractor to expedite the procurement process without any further delay and any losses incurred in terms of time & cost due to contractor’s delay would be borne by the contractor. Due to delay in placing purchase order for the subject equipment, the supplier informed that estimated delivery of the machine would be made by October, 2024. As the RCC placement was planned in January, 2025, therefore, specialized testing equipment was required to reach at site six months before the RCC placement i.e. June, 2024 and delayed delivery of October, 2024 would cause delay of four months in placement of RCC. Later on, the supplier gave an alternate proposal to procure refurbished equipment costing Rs.208.368 million (US\$ 694,560) at 2.62% discount (with saving of US\$ 18,728) for specialized tests instead of new one with expected delivery up to March 31, 2024. In response, the consultants after accepting the proposal of the contractor wrote a letter No.MWI-DBDC-003-1330

dated July 06, 2023 to the CEO and GM DBDP for seeking their approval of proposal, but approval was accorded by the GM on July 07, 2023 without submitting the matter for decision of the CEO. The CEO, however, wrote a letter No.DBDC/W-136/3473-77 dated July 20, 2023 to the consultants regarding exploring the market to obtain offers from other vendors along with their rate of discount. In response, the consultants vide letter No.MW1-DBDC-003-1368 dated July 25, 2023 informed that approval regarding procurement of subject equipment had already been granted by the GM on July 07, 2023. Audit held that procurement of old refurbished equipment cannot be a substitute for new equipment as it was being procured for conducting specialized tests of sensitive nature. Further, quality of RCC work is critically dependent on tests performed as outcome of the results is of utmost importance for the integrity and quality of the project. Furthermore, employing a refurbished testing equipment may lead to inaccurate results, hence, procurement of refurbished equipment for specialized tests was not justified.

Non-adherence to the provisions of Manual for Development Projects may compromise on the *quality of dam due to procurement of refurbished Shear and Beam Testing Equipment required for specialized tests costing Rs.208.368 million.*

The matter was taken up with the management in September, 2023. The management stated that detailed reply would be submitted after scrutiny of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter regarding purchase of refurbished testing equipment with reference to the provisions of contract and its impact on quality of the project besides justifying grant of approval for purchase of refurbished equipment with a nominal discount by the GM at his own level.

(Draft Para No.437/2023-24)

1.5.7 Undue favor to the contractor due to unjustified provision of mobilization/demobilization cost despite payment of mobilization advance - Rs.88.080 million

According to Clause-60.12 (Financial Assistance to Contractor) of PEC's Standard Form of Bidding Documents, "Financial assistance shall be made available to the contractor by the Employer by adopting any one of the following three Alternatives:

- Alternative One: *An interest-free Mobilization Advance up to 15 % of the Contract Price*
- Alternative Two: Mobilization/ Demobilization Cost
- Alternative Three: Materials Supplied by Employer".

As per instructions to users of these documents, "the General Conditions of Contract (GCC) and PCC prepared by the PEC should be retained as such. Any further amendment in the PCC can be made by the users only as indicated by the PEC in Para-E hereinafter or within the PCC". As per Para-E (7), "the Employer should indicate as to which of the three alternatives is adopted, by deleting the other two

alternatives”.

During audit of accounts of the CEO, NJHPC for the period from July, 2021 to June, 2023, it was observed that a contract for restoration works of TRT of Neelum Jhelum Hydropower Project (NJHPP) was awarded to M/s CGGC at a contract price of Rs.2,499.994 million and an amount of Rs.600 million was paid to the contractor as mobilization advance. Further probe into the matter revealed that a provision of Rs.88.080 million on account of “mobilization and demobilization of equipment & demobilization of personnel” for project construction was also kept. Out of which, an amount of Rs.6.316 million had been paid to the contractor up to IPC No.10. Audit held that as per instructions contained in PEC’s Standard Form Bidding Documents, only one option could be provided to the contractor, therefore, undue favour was extended to the contractor by allowing both the mobilization advance and mobilization/demobilization cost, which was unjustified.

Non-adherence to the instructions of PEC resulted in undue favour to the contractor due to unjustified provision of mobilization/demobilization cost amounting to Rs.88.080 million despite payment of mobilization advance up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify provision of mobilization/ demobilization cost despite payment of mobilization advance in violation of PEC’s Standard Form of Bidding Documents besides fixing responsibility.

(Draft Para No.109/2023-24)

B. Contract Management

1.5.8 Improper planning leading to increase in contract cost due to issuance of variation orders - Rs.23,799.602 million

According to Para-4.5 of Manual for Development Projects, “within six months of project approval, detailed design and costing should be finalized and submitted to the competent authority. Implementation of such project components, which require detailed designing should be started only when these have been finalized”. As per Rule-4 of PPRA Rules, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical”. As per Clause-3.1.1 of GCC of Consultancy Services Agreement (CSA), “the consultants shall perform the services and carry out their obligations hereunder with all due diligence, efficiency and economy, in accordance with generally accepted professional standards and practices, and shall observe sound management practices, and employ appropriate technology and safe and effective equipment, machinery, materials and methods”.

During audit of accounts of the PD, DHPP for the period from July, 2022 to June, 2023, it was observed that a contract No.MW-01 for construction of main hydraulic structure, spillway, low level outlets, river diversions and hydraulic steel structure was awarded to M/s CGGC at a contract price of Rs.115,003.461 million. The contract was awarded on March 08, 2017 and notice to commence the work was issued on June 20, 2017. It was further observed that soon after award of contract, the consultants revised design of tunnels and out of total executed work of Rs.27,839.833 million, an amount of Rs.23,799.602 million was paid against nine VOs mainly relating to diversion works and provision of power supply whereas remaining amount of Rs.4,040.231 million was paid under different items of original contract. It was further observed that VOs had to be issued mainly due to slow physical progress at KKH-01 and the consultants were well aware of the same before award of contract for MW-01. As per guidelines issued by the planning commission stated above, the detailed design and costing should have been finalized within six months after approval of project, which was not done and major changes in design after award of contract not only affected construction schedules but also resulted in huge cost increase. Audit held that execution of most of the works through VOs showed poor performance of the consultants in preparation of original design & bidding documents and was also against the spirit of PPRA Rules regarding economical procurements as major chunk of works remained out of healthy competition.

Non-adherence to aforementioned rules and guidelines resulted in improper planning leading to increase in contract cost amounting to Rs.23,799.602 million due to issuance of nine VOs up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in December, 2023. The management replied that the scope of work of MW-01 was changed due to delay in completion of KKH-01 owing to different reasons. Further, the said VOs were approved by WAPDA Authority after seeking NOL from the World Bank.

The reply was not acceptable because the reasons stated in the management reply i.e. issue of land acquisition and disruption of work at KKH-01 was in the knowledge of both the consultants and the

Employer at the time of award of contract for MW-01.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter for fixing responsibility regarding award of contract on existing design of MW-01 without taking into account physical progress of KKH-01 which resulted in issuance of VOs contrary to the guidelines of the planning commission and PPRA Rules.

(Draft Para No.423/2023-24)

1.5.9 Unjustified reduction of amount of performance securities in violation of contract - Rs.10,953.945 million

According to Clause-10.1 of Conditions of Particular Application (Part-IIA) of the contract, the performance security shall be of an amount not less than 10% of contract price stated in LOA. As per Clause-10.2, “the performance security shall be valid until the contractor has executed and completed the works and remedied any defects therein in accordance with the contract”.

During audit of accounts of the CEO, NJHPC for the period from July, 2021 to June, 2023, Audit observed that a contract for construction of NJHPP was awarded to the consortium of M/s CGGC-China Machinery Engineering Corporation (CMEC). The contractors provided performance securities equal to 10% of the contract price in local & foreign currencies as per their respective amounts. Later on, Board of Directors of NJHPC, in its meeting held on December 19, 2022, accorded approval for amendment in standard clause of performance security by reducing its amount from 10% to 5% and accordingly both the contractors provided amended performance securities for Rs.10,953.945 million (Rs.2,220 million and US\$ 38.524 million). As per contract, the performance securities should not have been less than 10% of contract price and were required to be valid until the completion of works and remedial of all defects therein by the contractors. It is pertinent to mention here that Defects Liability Certificate (DLC) had not yet been issued to the contractors and performance securities were required to safeguard the Employer’s risk against contractors’ default in discharging pending contractual obligations. Audit held that reduction of amount of performance securities in violation of provisions of contract showed that undue favour was extended to the contractors, which was not justified.

Non-adherence to the provisions of contract resulted in undue benefit to the contractors by reducing the amount of performance securities of Rs.10,953.945 million up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed reply would be submitted after reviewing the case.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify reduction in amount of performance securities in violation of provisions of contract besides fixing responsibility.

(Draft Para No.108/2023-24)

1.5.10 Undue benefit to the contractor on account of additional financial assistance in violation of contract - Rs.6,265.919 million

According to Clause-60.11 of the PCC of contract No.MW-01, “an interest free advance payment up to an amount equivalent to ten percent (10%) of the contract price stated in LOA excluding provisional sums, in proportions of foreign and local currencies of the contract price, shall be paid by the Employer to the contractor in two equal parts”. Further, there was no separate provision in the contract for any additional financial assistance to the contractor.

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, Audit observed that an amount of Rs.6,265.919 million was paid to the contractor M/s Power China-Frontier Works Organization (FWO) Joint Venture (JV) on account of additional financial assistance. This amount was paid in addition to already paid mobilization advance of Rs.36,185.354 million. Audit held that as the additional financial assistance to the contractor was not covered under the contract, therefore, undue benefit was granted to the contractor which was not justified.

Non-adherence to the provisions of contract resulted in undue benefit of Rs.6,265.919 million to the contractor on account of additional financial assistance during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify grant of additional financial assistance to the contractor without any provision in contract besides fixing responsibility for such decision.

(Draft Para No.293/2023-24)

1.5.11 Irregular payment to the contractor for installation of new trash racks damaged during defects notification period - Rs.2,734.106 million

According to Clause-4.1 of the GCC, “the contractor shall design, execute and complete the works in accordance with the contract and with the Engineer's instructions, and shall remedy any defects in the works. If the contract specifies that the contractor shall design any part of the permanent works, then unless otherwise stated in the PCC, the contractor shall be responsible for this part and it shall, when the works are completed, be fit for such purposes for which the part is intended as arc specified in the contract”. As per Clause-11.1 of the GCC, “in order that the works and contractor's documents, and each section, shall be in the condition required by the contract by the expiry date of the relevant Defects Notification Period (DNP) or as soon as practicable thereafter, the contractor shall (a) complete any work

which is outstanding on the date stated in a Taking-Over Certificate (TOC), within such reasonable time as is instructed by the Engineer, and (b) execute all work required to remedy defects or damage, as may be notified by (or on behalf of) the Employer on or before the expiry date of the DNP for the works or section (as the case may be). If a defect appears or damage occurs, the contractor shall be notified accordingly, by or on behalf of the Employer”. As per Clause-3.4 of CSA, “except in case of gross negligence or willful misconduct on the part of the consultants or on the part of any person or firm acting on behalf of the consultants in carrying out the services, the consultants, with respect to damage caused by the consultants to the client’s property, shall not be liable to the client: (i) for any indirect or consequential loss or damage; and (ii) for any direct loss or damage that exceeds two times the total value of the contract”.

During audit of accounts of the PD, Tarbela 4th Extension Hydropower Project (T4HPP) for the period from July, 2022 to June, 2023, it was observed that a contract for modification of the Tunnel No.3&4 of intakes, design, supply, installation and testing of penstock and construction of power house was awarded to M/s Sinohydro Group Ltd, China on September 09, 2013 at a contract price of Rs.15,756 million plus US\$ 104.623 million. As per Technical Specifications, the contractor was required to install intake screen (trash racks) designed to stop debris entering into the new intakes. The contractor substantially completed the work on June 12, 2021 and an amount of Rs.799.801 million (approx.) was paid to him against this item. As per consultants’ assessment report, the trash racks were designed by the contractor to operate at flow rate of 1,700m³/sec instead of 2,100m³/sec and during a joint inspection carried out on February 24, 2022, some damages/cracks were observed at two bottom sets of trash racks on both raised intakes tunnels showing damage of 40 Nos. segments. Initially, the cracks were repaired by the contractor at the cost of the Employer but the repair was not sustainable and resultantly, a new VO No.51 amounting to Rs.2,734.106 million (Rs.287.363 million & US\$ 8.637 million) was issued to the contractor for procurement, manufacturing and installation of new trash racks. It is pertinent to mention here that entire amount of VO No.51 was paid by the management to the contractor in advance without any provision in contract. Audit held that as the previously installed trash racks costing Rs.799.801 million were damaged during DNP due to design failure, therefore, the contractor was responsible for their repair/replacement at its own cost. Further, the consultants were also responsible for approving the defective design but no responsibility was fixed upon the contractor/consultants. Hence, payment of Rs.2,734.106 million on re-installation/ replacement of trash racks was irregular and undue favour to the contractor.

Non-adherence to the provisions of contract resulted in irregular payment of Rs.2,734.106 million to the contractor for installation of new trash racks damaged under DNP during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that notice of Employer’s claim from the contractor had been issued and the same had also been notified by the consultants. As regards, fixing of responsibility upon the consultants, the matter is being investigated.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify installation of new trash racks, damaged during DNP, through a VO by making .100% advance payment besides ensuring recovery of its cost from the contractor and taking action against the consultants for approving the defective design of trash racks.

(Draft Para No.344/2023-24)

1.5.12 Unjustified expenditure on remedial works despite non-issuance of defects liability certificate - Rs.2,499.994 million

According to Clause-61.1 of the GCC, “only the DLC, referred to in Clause-62, shall be deemed to constitute approval of the works”. As per Clause-62.1 of the Conditions of Particular Application, “the contract shall not be considered as completed and contractor’s obligation to complete the works and remedy defects shall not be considered as discharged until a DLC shall have been signed by the Engineer and delivered to the Employer with a copy to the contractor, stating the date on which the contractor shall have completed his obligations to execute and complete the works and remedy any defects therein to the Engineer’s satisfaction”.

During audit of accounts of the CEO, NJHPC for the period from July, 2021 to June, 2023, it was observed that a contract for construction of civil engineering works along with design, supply and installation of hydraulic steel, mechanical and electrical works was awarded to M/s CGGC-CMEC on December 19, 2007. The powerhouse was commissioned on July 04, 2018 and was under operation when TRT experienced damages and blockage that forced shut down of the power house on July 6, 2022. It is worth mentioning here that DLC was not issued to the contractor till date. Despite the fact that the original contract was not closed, a new contract for restoration works of TRT was awarded to the same contractor on August 25, 2022 at a contract price of Rs.2,499.994 million. It was further observed that the Independent Panel of Experts (IPoEs) in their report pointed out that the collapse of the TRT and other damages were generated by a combination of root causes including ‘absence of concrete lining having high probability’ which caused the occurrence of collapse event. Furthermore, IPoEs in their report also noted some defaults of grouting of the dowels and rock bolts used for the support work. Audit held that as the DLC was not issued to the contractor till the occurrence of event, therefore, instead of awarding new contract for restoration of TRT, the remedial works should have been got executed through M/s CGGC as they were responsible to remedy defects until issuance of DLC. Hence, award of a new contract for restoration works of TRT was not justified.

Non-adherence to the provisions of contract resulted in unjustified expenditure of Rs.2,499.994 million on remedial works up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 &

19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends that the management needs to inquire the matter to ascertain the causes of damages & fixing responsibility besides justifying award of new contract for restoration of TRT despite the fact that DLC was not issued to the contractor.

(Draft Para No.113/2023-24)

1.5.13 Non-indemnification of loss sustained due to collapse of portion of diversion tunnel during flood - Rs.1,767.439 million

According to MDHP Construction and Erection All Risks and Third Party Insurance Policy, “the cover provided by this policy will indemnify the insured against constructions and erection all risks of loss and/or damage to property of all kinds and description and third party liability within the territorial limits during the policy period”. As per Clause-28(e) of Special Provisions (Section-I), in case where the loss and/or damage is not repaired, the actual value of the lost and/or damaged item of property insured immediately before the occurrence of the loss and/or damage will be the basis of settlement.

During audit of accounts of the PD, MDHP for the period from July, 2022 to June, 2023, it was observed that a heavy flood in the Swat River hit the project site on August 25/26, 2022 and caused damages to different under-construction works. Due to flood and inflow of water into Diversion Tunnel (DT), inlet portal slope of DT-1 collapsed which blocked the tunnel. Later on, it was decided to construct a new tunnel (DT-3) having length of 368m (approx.) to be linked with the existing DT-1 bypassing the collapsed portion instead of repairing the collapsed portion of DT-1 by the contractor. It is pertinent to mention here that the entire work was insured and the contractor being loss payee, had also lodged an insurance claim with the insurance company for the said loss. As per information provided by the consultants, an amount of Rs.1,767.439 million (approx.) was incurred on construction of collapsed portion of DT-1 before flood. Audit held that as the collapsed portion of the tunnel was not got repaired from the contractor due to subsequent change in design and execution of work through VO, therefore, cost incurred on its construction had gone waste and was direct loss to the project, which was required to be recovered from the contractor but needful was not done.

Non-adherence to the provisions of insurance policy resulted in non-indemnification of loss amounting to Rs.1,767.439 million sustained due to collapse of portion of DT during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that the claim for insurance cover had already been taken up by the contractor with the insurance company and progress achieved in the matter would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to pursue the matter with the contractor for early

indemnification of loss and recover the proportionate amount pertaining to expenditure incurred on DT-1 without further loss of time.

(Draft Para No.136/2023-24)

1.5.14 Non-obtaining of insurance policies of works - Rs.1,626.684 million

According to Clause-24.1 of Special Conditions of Contract (SCC), “the supplier should insure the supplies as per BOQ for 110% expected contract amount up to the destination and during the period of installation, testing and commissioning”. As per Clause-25.5 of PCC, “the contractor shall be obliged to place all insurances to the contract with National Insurance Corporation of Pakistan or any insurance company having at least “A” rating from PACRA/JCR and also approved by the Employer”.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that a work for construction of Sheratalla Tunnel Canal (STC) at Kurram Tangi Dam Project (KTDP) was awarded to M/s FWO-DESCON JV through VO amounting to Rs.1,385.800 million which was being executed through a sub-contractor (M/s MHCE-SEWAG - JV). Audit held that as the cost of said work was in addition to the original contract price, therefore, insurance coverage of said work for Rs.1,593.691 million was required to mitigate the risk of loss. Similarly, a contract for supply, installation and Operation & Maintenance (O&M) of solar power system was awarded at Warsak 2nd Rehabilitation Project to M/s Akhunzada Associates on January 5, 2023 at a contract price of Rs.29.994 million. As per SCC, the contractor was required to obtain and provide insurance policy with coverage of 110% of contract price i.e. equal to Rs.32.993 million. However, despite lapse of considerable period of time, insurance policies with coverage of Rs.1,626.684 million had not been provided by the contractors, thus, putting the works at risk. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	PD, Warsak 2 nd Rehabilitation Project	163/2023-24	32.993
2	PD, KTDP	180/2023-24	1,593.691
TOTAL			1,626.684

Non-adherence to the provisions of contracts resulted in non-obtaining of insurance policies of works with coverage of Rs.1,626.684 million up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the matter had already been taken up with the contractors and progress would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and

January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure obtaining of insurance coverage of works from the concerned contractors without further loss of time.

1.5.15 Undue benefit to the contractor by less deduction of mobilization advance in violation of contract - Rs.1,483.489 million

According to Clause-60.11(b) of PCC of the contract No.MW-01, “the mobilization advance shall be recovered in equal installments; first installment at the expiry of third month after the date of payment of first part of advance and the last installment two months before the date of completion of the works”.

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, it was observed that a contract No.MW-01 for construction of Dam Part (Civil Works) and Tangir Hydropower Works was awarded to M/s Power China-FWO JV on May 13, 2020. An amount of Rs.36,185.353 million was paid to the contractor as mobilization advance. As per contract, mobilization advance was required to be recovered in equal monthly installments which was determined as Rs.397.641 million (after relaxation by the management to start the recovery from 3rd IPC instead of from 3rd month after the date of payment of first advance). Later on, WAPDA Authority in its meeting held on February 16, 2023 further relaxed the criteria for recovery of mobilization advance by substituting equal installments with variable installment plan. Due to amendment in recovery schedule /mechanism, an amount of Rs.504.717 million instead of Rs.1,988.206 million was recovered from the contractor through IPC No.17 to 21, causing less recovery of Rs.1,483.489 million. Audit held that change in recovery schedule of mobilization advance was undue favour to the contractor and was not justified.

Non-adherence to the conditions of the contract resulted in undue benefit to the contractor by less deduction of mobilization advance amounting to Rs.1,483.489 million during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify change in recovery mechanism of mobilization advance in violation of contract besides ensuring recovery of less deducted amount of advance from IPCs of the contractor and fixing responsibility for such decision.

(Draft Para No.294/2023-24)

1.5.16 Unjustified obtaining of insurance coverage for works - Rs.1,335.990 million

According to Clause-18.1 of PCC, “the contractor is allowed to arrange all insurance policies relating to the contract from private sector insurance market of Pakistan as well as National Insurance

Company Limited till such time as the completed projects are handed over to WAPDA/Government. However, the selection of insurance companies will be based on credibility of minimum rating 'A' and financial health comparable with the size of the project backed by proper re-insurance of international insurance companies as applicable. The relevant insurance policies shall be provided within 42 days of commencement of work by the contractor”.

During audit of accounts of the PD, MDHP for the period from July, 2022 to June, 2023, it was observed that the contractor provided construction & erection all risks and third party liability insurance policy from M/s International General Insurance for a period of 68 months at a premium of Rs.1,335.990 million (Rs.698.350 million and US\$ 3.960 million). As per provisions of contract, the contractor was allowed to arrange insurance policies from private sector insurance market of Pakistan, however, the contractor first selected re-insurer companies M/s PINGAN & PICC JV from international market on their own and then obtained quotations from local insurance market only to comply with contractual requirement. It is pertinent to mention here that the contractor was required to submit the requisite insurance policy till November 01, 2019 but the same was submitted in March, 2021, thus, putting the project at risk during intermediary period. Further, only an amount of Rs.500 million was provided in the contract as 'Provisional Sum' for arrangement of insurance policies for contractor's personnel, works, equipment, against injury to persons and damage to property. It was further observed that an amount of Rs.1,147.125 million had been paid to the contractor so far as insurance premium (in three installments) against overall provision of Rs.500 million kept for different types of insurance policies. Audit held that the procedure adopted by the contractor for obtaining of insurance policy was not in line with the provisions of contract and cost of insurance policy was also more than provisional sum of Rs.500 million, therefore, obtaining of insurance policy was not justified.

Non-adherence to the provisions of contract resulted in unjustified obtaining of insurance policy for Rs.1,335.990 million up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that the payment had been made as per actual, however, detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify reason for keeping insurance component under provisional sum, delay in obtaining of insurance policy, non-compliance of contractual procedure for arranging insurance policy and accepting higher cost than amount provided in the contract.

(Draft Para No.166/2023-24)

1.5.17 Excess payment to the contractor due to non-deduction of discount on varied works despite decision of Dispute Board - Rs.1,063.754 million

According to letter of discount dated July 10, 2016, the contractor offered a 17% discount on

tender price which shall not be applicable to the day-work and specific provisional sum items in the priced BOQ. As per decision of Dispute Board, the 17% discount applies evenly on all BOQ rates (excluding day-work and specified provisional sums item). Unless otherwise agreed by the parties, the 17% discount applies on any item of work to be executed pursuant to a variation to the extent that a rate of price for such item of work is specified in the original BOQ or a new rate is derived from an existing rate in the BOQ with reasonable adjustments.

During audit of accounts of the PD, DHPP for the period from July, 2022 to June, 2023, it was observed that two VOs No.3A & 4A for changes in original scope of river DTs and partial work of flushing tunnel for construction of traffic diversion were issued to the contractor on November 23, 2021 and January 16, 2022 at a contract price of Rs.19,804.974 million and Rs.1,010.201 million respectively. The rates of items of the VOs were either directly derived from BOQ of the original contract or from prices of the similar BOQ items. As per provisions of contract, 17% discount was to be deducted on all BOQ items except day work and provisional sum. Moreover, as per decision of Dispute Board, 17% discount was also applicable on varied works, thus, an amount of Rs.676.947 million was required to be deducted as discount which was not done. Further, an amount of Rs.386.807 million was also paid as escalation on this excess paid amount. Due to non-deduction of discount as per provisions of contract and decision of Dispute Board, an amount of Rs.1,063.754 million was excess paid to the contractor.

Non-adherence to conditions of the contract and decision of the Dispute Board resulted in excess payment of Rs.1,063.754 million to the contractor due to non-deduction of discount on varied works up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in December, 2023. The management replied that the Engineer was thoroughly acquainted with the decision of Dispute Board and confirmed that the decision had been applied and would continue to be applied in its entirety.

The reply was not acceptable because no documentary evidence to determine the rates of VOs and deduction of discount thereon were provided.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify determination of rates of VOs, implementation of decision of Dispute Board regarding deduction of discount on varied works and effect recovery from the contractor.

(Draft Para No.393/2023-24)

1.5.18 Non-recovery of secured advance given to the contractor against material - Rs.844.974 million

According to Clause-14.5 of the GCC of contracts No.MW-01 & MW-02, "if this sub-clause applies, IPC shall include, under sub-paragraph (e) of sub clause-14.3, (i) an amount for plant and materials which have been sent to the site for incorporation in the permanent works and (ii) a reduction

when the contract value of such plant and materials is included as part of the permanent works under sub para-(a) of sub clause 14.3”.

During audit of accounts of the PD, DHPP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.1,876.983 million was paid to the contractor M/s CGGC as advance payment against supply of material (reinforcing steel and cement) for contract No.MW-01 & MW-02 up to IPC No.38. Out of total advance payment, an amount of Rs.1,032.010 million was adjusted against material used in different permanent works leaving outstanding balance of Rs.844.974 million. However, due to difference in physical stock balance of material and book balance of advance, further advance payment was suspended until establishment of appropriate recovery mechanism. Audit held that the balance amount of advance payment was required to be recovered to bring the book balance at par with the physical balance of material which was not done.

Non-adherence to the contract clauses resulted in non-recovery of Rs.844.974 million on account of secured advance paid to the contractor against material up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in December, 2023. The management replied that the material was lying at site on various locations. However, the contractor had not been able to provide record of stock delivery, its usage and subsequent material reconciliation. The Engineer had issued a final notice to the contractor in October, 2023 and in case of failure of the contractor to establish and maintain a reasonable stock reconciliation system, the Engineer would proceed to recover the amount from upcoming IPCs.

No further progress towards recovery of advance payment was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of advance paid to the contractor against material without further loss of time.

(Draft Para No.396/2023-24)

1.5.19 Recoverable amount of cost incurred on inspection and repair of trash racks during defects notification period from the contractor - Rs.692.451 million

According to Clause-4.1 of the GCC, “the contractor shall design, execute and complete the works in accordance with the contract and with the Engineer’s instructions, and shall remedy any defects in the works”. As per Clause-11.1, “in order that the works and contractor’s documents, and each section, shall be in the condition required by the contract by the expiry date of the relevant DNP or as soon as practicable thereafter, the contractor shall (a) complete any work which is outstanding on the date stated in a TOC, within such reasonable time as is instructed by the Engineer, and (b) execute all work required to remedy defects or damage, as may be notified by (or on behalf of) the Employer on or before the expiry date of the DNP for the works or section (as the case may be). If a defect appears or damage occurs, the contractor shall be notified accordingly, by (or on behalf of) the Employer”. *As per Point No.24 of the*

LOA of the contract for T4HPP dated August 17, 2013, "M/s Sinohydro considered that the bid rates were sufficient to provide high quality diving inspection as required".

During audit of accounts of the PD, T4HPP for the period from July, 2022 to June, 2023, it was observed that operation of Tunnel No.3&4 raised intakes for power generation was started on June 10, 2021 and June 12, 2021 respectively with rock barrier at Elevation Level (EL).432m. The remaining rock barrier was removed from EL.432m to EL.426m against required EL.415m during dry season of 2021-22. During a joint inspection of Tunnel No.3&4 raised intakes along with trash racks carried out on February 24, 2022, some damages/cracks were observed at bottom two sets of trash racks on both raised intakes showing damage of 40 Nos. segments. Since, the trash racks were under DNP up to June 12, 2022, therefore, the contractor was asked to repair the damages and the same were repaired by the contractor. Later, in order to check the effectiveness of repair work, the DNP was extended up to June 12, 2023 and operation of Tunnel No.3&4 raised intakes for power generation was started on July 03, 2022. Upon advice of the Employer, the contractor performed under water inspection of trash racks to check their condition after repair and an amount of Rs.95.364 million was paid to the contractor through VO No.49 despite the fact that the work was carried out under DNP and a separate item for diving inspection was also available in the original contract. During underwater inspection in December, 2022, new cracks were also observed in trash racks. Therefore, the contractor was asked to repair these trash racks but the contractor insisted to issue a VO prior to start of repair work. Furthermore, the contractor pleaded that damage to the trash racks occurred due to change in operating conditions and not due to his design fault. A meeting chaired by Chairman WAPDA was held on February 10, 2023 at Islamabad wherein the Engineer was advised to issue a VO which would be subject to resolution of any dispute by Dispute Board. Thus, VO No.50 was issued for lifting & lowering of all 100 trash racks for repair works and an amount of Rs.597.087 million was paid to the contractor accordingly. Audit held that as the damages to trash racks occurred during DNP, therefore, it was the responsibility of the contractor to inspect and rectify these damages at his own cost, hence, payment of Rs.692.451 million to the contractor was not justified.

Non-adherence to provisions of contract resulted in recoverable amount of Rs.692.451 million from the contractor on account of cost incurred on inspection and repair of trash racks within DNP during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that notice of Employer's claim from the contractor had been issued and the same had also been notified by the consultants.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter regarding damages to trash racks during DNP besides ensuring recovery of inspection and repair charges from the contractor.

(Draft Para No.268 & 426/2023-24)

1.5.20 Overpayment to contractor due to excess certification of amount by the consultants than actual work done - Rs.679.465 million

According to Clause-12.2 of GCC, “measurement shall be made of the net actual quantity of each item of the permanent works and the method of measurement shall be in accordance with the BOQ or other applicable schedules”.

During audit of accounts of the PD, DHPP for the period from July, 2022 to June, 2023, it was observed that executed quantities of various items of VO No.03 and their respective rates did not reconcile with the amount certified/paid to the contractor up to IPC No.38. As such, an amount of Rs.433.304 million was excess paid to the contractor against actual work done. Further scrutiny of record revealed that an amount of Rs.246.160 million (approx.) was also paid to the contractor on account of escalation on overpaid amount of Rs.433.304 million. It was evident that total amount of Rs.679.465 million (Rs.433.304 million + Rs.246.160 million) was overpaid to the contractor. The overpaid amount was required to be recovered from the contractor but needful was not done.

Non-adherence to the provisions of contract resulted in over payment of Rs.679.465 million to the contractor due to excess certification of amount by the consultants than actual amount of work done during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in December, 2023. The management replied that the Engineer had reviewed the para and identified an arithmetic error due to which excess payment was made. However, the amount would be recovered/adjusted from the upcoming IPCs.

No further progress towards recovery of excess paid amount was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of excess paid amount from the contractor without further delay besides fixing responsibility for over payment.

(Draft Para No.421/2023-24)

1.5.21 Undue favour to the contractors due to non-obtaining of additional performance securities on variation orders - Rs.312.292 million

According to Clause-10.1 of PCC of KTDP, the contractor shall provide performance security to the Employer with a copy to the Engineer in the prescribed form. The performance security shall be of an amount equal to 10% of the contract price stated in the LOA. As per minutes of meeting held on June 08, 2023 regarding issues of E & M works contract of T5HPP, the consultants responded the contractor to provide additional performance guarantee for Change Order (CO) No.2.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that a VO for construction of civil works of STC at KTDP for Rs.1,385.800 million

was issued to the contractor but 10% performance security amounting to Rs.138.580 million, as directed by the consultants vide letter dated May 05, 2023, was not obtained from the contractor. Similarly, at T5HPP, CO No.02 for interconnection of switchyard at a cost of Rs.1,737.120 million was signed on June 27, 2023 but additional performance security equivalent to Rs.173.712 million (Rs.13.04 million + US\$ 0.535 million), as clarified by the consultants to the contractor on June 08, 2023, was also not obtained so far. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	PD, KTDP	173/2023-24	138.580
2	PD, T5HPP	234/2023-24	173.712
TOTAL			312.292

Non-adherence to the provisions of contracts/clarifications resulted in non-obtaining of additional performance securities amounting to Rs.312.292 million on VOs from the contractors during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management of KTDP replied that the matter had already been taken up with the contractor and progress achieved would be intimated to Audit accordingly. The management of T5HPP stated that the reply would be submitted in due course of time.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure obtaining of additional performance securities on VOs from the contractors without further loss of time besides provision of justification for this undue benefit to the contractors.

1.5.22 Undue favour to the contractors on account of insurance premium due to non-renewal of insurance policies - Rs.277.279 million

According to Clause-25.3 (Remedy on Contractor's Failure to Insure) of the GCC of contract No.MW-01 of DBDP, "if the contractor fails to effect and keep in force any of the insurances required under the contract, or fails to provide the policies to the Employer within the period required by sub-clause-25.1, then and in any such case, the Employer may effect and keep in force any such insurances and pay any premium as may be necessary for that purpose and from time to time deduct the amount so

paid from any monies due or to become due to the contractor, or recover the same as a debt due from the contractor”. As per Clause-18.2 of the contract for T4HPP, the insuring party shall maintain this insurance to provide cover until the date of issue of the Performance Certificate, for loss or damage for which the contractor is liable arising from a cause occurring prior to the issue of the TOC.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that a contract No.MW-01 of DBDP was awarded to M/s Power China-FWO JV on May 13, 2020. The contractor obtained Contractor’s All Risks insurance policy and paid the first installment of the premium amounting to Rs.48.562 million on June 28, 2021. However, the contractor had not paid due amount of Rs.259.002 million relating to 2nd, 3rd and 4th installments of insurance premium up to June 30, 2023. Further, insurance coverage for Tangir powerhouse at DBDP and T4HPP were expired on March 06, 2023 and June 30, 2021 respectively but the contractors had not extended the insurance policies by paying premium of Rs.18.277 million. It showed that undue favour was extended to the contractors by putting the works at risk. The detail is as under:

(Rs. in million)

Sr. No.	Name of Formation	DP No.	Amount
1	PD, T4HPP	288/2023-24	15.544
2	PD, DBDP	296 & 297/2023-24	261.735
TOTAL			277.279

Non-adherence to the conditions of contracts resulted in undue favour to the contractors on account of insurance premium amounting to Rs.277.279 million up to the FY 2022-23.

The matter was taken up with the management in September & October, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify non-payment of insurance premium and non-renewal of insurance policies besides taking action as per provisions of the contracts and recover the due amount of premium from the concerned contractors.

1.5.23 Undue favour to the contractor by payment of incentive for early completion of punch list item - Rs.230 million

According to Clause-11.1 of the GCC, “in order that the works and contractor’s documents, and each section, shall be in the condition required by the contract (fair wear and tear excepted) by the expiry

date of the relevant DNP or as soon as practicable thereafter, the contractor shall complete any work which is outstanding on the date stated in a TOC within such reasonable time as is instructed by the Engineer”.

During audit of accounts of the PD, T4HPP for the period from July, 2022 to June, 2023, it was observed that TOC No.05 was issued on July 09, 2021 whereby the Engineer certified completion of overall works of Tunnel No.3&4 intakes including permanent concrete plugging of Tunnel No.3&4 lower intakes and rock excavation up to EL.426m. Further, punch list No.T4HP-PCCCL-PL-06-01 was issued to the contractor to complete outstanding works as soon as practicable but before expiry of DNP of 365 days. As per issued punch list, an item for excavation of remaining rock barrier down to the EL.426m was to be completed before June 30, 2022 which was actually completed on April 17, 2022 but the management accorded approval for payment of incentive amounting to Rs.230 million to the contractor for early completion of this punch list item. Audit held that as per contract, the contractor was required to complete all the punch list items without any additional cost to the Employer, therefore, payment of incentive for early completion of punch list item was not justified and an undue favour to the contractor.

Non-adherence to provisions of contract resulted in undue favour to the contractor by payment of incentive amounting to Rs.230 million for early completion of punch list item during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consulting the record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify payment of incentive to the contractor for early completion of punch list items in violation of provisions of contract.

(Draft Para No.269/2023-24)

1.5.24 Non-encashment of performance guarantees of the defaulted contractors - Rs.147.850 million

According to Clause-7.10 of WAPDA Procurement and Contract Manual, “remedies are the means by which a contractual right is enforced or by which breach of contractual right is prevented or compensated when the contract is not being performed properly, or contractor’s performance is otherwise unacceptable. The Employer after certification/recommendation by the Engineer may apply such remedies as delay damages, encashment of performance security and termination of contract etc.” As per Clause-49.4 of the GCC, “in case of default on the part of the contractor in carrying out such instruction within a reasonable time, the Employer shall be entitled to employ and pay other persons to carry out the same and if such work is work which, in the opinion of the Engineer, the contractor was liable to do at his own cost under the contract, then all costs consequent thereon or incidental thereto shall, after due consultation with the Employer and the contractor, be determined by the Engineer and

shall be recoverable from the contractor by the Employer, and may be deducted by the Employer from any monies due or to become due to the contractor and the Engineer shall notify the contractor accordingly, with a copy to the Employer”.

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, it was observed that a contract No.CMV-II-02 for construction of water supply and sewerage system in Composite Model Village, Harpan Das was awarded to M/s Shoukat Khan & Co. on December 31, 2014. The work was substantially completed in March, 2017 but its TOC was not issued to the contractor so far. It was further observed that *at the time of testing on August 26, 2020, the structure of water tank could not withstand the water load. The contractor was repeatedly asked to repair the tank to sustain the intact water storage as per design capacity, but no efforts were made by the contractor to rectify the defects.* Similarly, another contract No.CMV-II-01 for construction of roads and road structures in Composite Model Village-II, Harpan Das was awarded to M/s Haroon & Sons on October 04, 2011. The work was substantially completed on March 15, 2017 but its TOC was also not issued to the contractor so far because the quality of work of construction of roads & road structures was not satisfactory. The matter was probed through an inquiry committee in October, 2021 which concluded that if the project office was not satisfied regarding the quality of works, then action should have been taken as per provisions of contract. Despite lapse of a considerable period of time, the contractors failed to complete their contractual obligations but the management had not taken any action against the contractors. Audit held that performance guarantees of the defaulted contractors amounting to Rs.147.850 million should have been forfeited due to their unsatisfactory performance but needful was not done.

Non-adherence to *mentioned clauses* resulted in non-encashment of performance guarantees of the defaulted contractors amounting to Rs.147.850 million up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the matter would be pursued as per provisions of contracts.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to forfeit the performance guarantees and complete the remaining works at the risk & cost of the defaulted contractors without any further delay besides providing justification for not taking any action so far.

(Draft Para No.309 & 352/2023-24)

1.5.25 Unjustified release of retention money to the contractor - Rs.143.331 million

According to Clause-14.9 of the contract, when the TOC has been issued for the works and the first half of the retention money has been certified for payment by the Engineer, the contractor shall be entitled to substitute a guarantee, in the form annexed to the PCC or in another form approved by the Employer and issued by a reputable bank or financial institution selected by the contractor, for the second half of the retention money. The contractor shall ensure that the guarantee is in the amounts and currencies

of the second half of the retention money and is valid and enforceable until the contractor has executed and completed the works and remedied any defects, as specified for the performance security in sub-clause-4.2. The Employer shall return the guarantee to the contractor within 21 days after receiving a copy of the performance certificate.

During audit of accounts of the PD, T4HPP for the period from July, 2022 to June, 2023, it was observed that both the first and second halves of the retention money amounting to Rs.143.331 million (Rs.77.277 million and US\$ 0.230 million) were released to the contractor for the work of Low Level Outlets (LLO) against TOC-06. Further probe into the matter revealed that test of LLO was not completed as no TOC was issued to the contractor and a notice of the Employer's claim on account of damages to transmission line during partial wet testing was also issued to the contractor by the management on July 12, 2023. Audit held that release of the retention money to the contractor before completion of requisite test of LLO and issuance of TOC was contradictory to the terms of the contract.

Non-adherence to provisions of contract resulted in unjustified release of retention money amounting to Rs.143.331 million to the contractor during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in December, 2023. The management replied that retention money was released due to closure of loan on June 30, 2023 with the approval of WAPDA Authority after wet testing of LLO on June 25, 2023.

The reply was not acceptable because retention money was released without completion of requisite tests and issuance of TOC.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter for fixing responsibility regarding release of retention money to the contractor before successful completion of test of LLO and without issuance of TOC in violation of contract provisions.

(Draft Para No.400/2023-24)

1.5.26 Non-recovery from the contractor due to non-handing over of equipment and material to the Employer - Rs.138.298 million

According to Clause-7.7 of GCC, "except as otherwise provided in the contract, each item of plant and materials shall, to the extent consistent with the laws of the country, become the property of the Employer at whichever is the earlier of the following times, free from liens and other encumbrances: (a) when it is incorporated in the works: (b) when the contractor is paid the corresponding value of the plant and materials". As per Clause-13(e) of VO No.43, "equipment, tools and unconsumed/non-perishable/nonexpendable materials particularly procured/purchased, under this VO, being property of the Employer, shall be handed over by the contractor to the Employer after completion of the works at the status as it is under this VO and shifted to the Employer's designated areas. However, major equipment including diving, gantry cranes, electric hoist crane system & mobile lifting/carriage system shall be handed over by the contractor to the employer in good working condition".

During audit of accounts of the PD, T4HPP for the period from July, 2022 to June, 2023, it was observed that as per contract, remaining equipment & material was the property of the Employer but the contractor did not handover the remaining items pertaining to VO-43 and VO-11 to the Employer. The consultants evaluated an amount of Rs.138.298 million (Rs.129.699 million & Rs.8.599 million) to be recovered from the contractor on account of non-handing over of these items to the Employer. This amount was required to be recovered from the contractor but needful was not done.

Non-adherence to provisions of contract resulted in non-recovery of Rs.138.298 million from the contractor due to non-handing over of equipment and material to the Employer during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management replied that amount of equipment and material related to VO No.43 would be recovered from the contractor, whereas, the contractor has offered WAPDA to take over equipment and material related to VO No.11.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure receipt of equipment and material or recover the amount thereof from the contractor without further loss of time.

(Draft Para No.286/2023-24)

1.5.27 Non-recovery of cost of unsupplied spare parts from the contractors - Rs.77.856 million

According to Clause-49.4 of the contract No.CMV-II-06, “in case of default on the part of the contractor in carrying out such instruction within a reasonable time, the Employer shall be entitled to employ and pay other persons to carry out the same and if such work is work which, in the opinion of the Engineer, the contractor was liable to do at his own cost under the contract, then all costs consequent thereon or incidental thereto shall, after due consultation with the Employer and the contractor, be determined by the Engineer and shall be recoverable from the contractor by the Employer, and may be deducted by the Employer from any monies due or to become due to the contractor and the Engineer shall notify the contractor accordingly, with a copy to the Employer”. As per Clause-11 of Special Provision of E&M Contract Agreement, the contractor shall provide the special spare parts as specified by the Employer in the Schedule of Prices. In addition to the special spare parts, the specified general spare parts shall also be supplied by the contractor.

During audit of accounts of two formations of WAPDA for the period from July, 2018 to June, 2023, it was observed that a contract No.CMV-II-06 for construction of 03 MW hydropower project on Thak Nullah was completed in November, 2021 but the contractor had not yet supplied the remaining spare parts worth Rs.66.490 million (US\$ 234,192). Similarly, E&M contractor of Golen Gol Hydel Power Station (GGHPS) had also not provided remaining spare parts worth Rs.11.366 million despite commissioning of the project in January, 2018. Audit held that due to failure in supply of requisite spare parts by the contractors, amount of unsupplied spare parts was required to be recovered from them, which

was not done. The detail is as under:

			(Rs. in million)
Sr. No.	Name of Formation	DP No.	Amount
1	PD, DBDP	308/2023-24	66.490
2	Resident Engineer (RE), GGHPS	362/2023-24	11.366
TOTAL			77.856

Non-adherence to the provisions of contracts resulted in non-recovery of cost of unsupplied spare parts amounting to Rs.77.856 million from the contractors up to the FY 2022-23.

The matter was taken up with the management in September & October, 2023 and reported to the Ministry in November, 2023. The management of DBDP replied that the amount would be kept withheld till provision of missing spare parts. The management of GGHPS stated that detailed reply would be submitted after checking the record.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to pursue the matter with the contractors and ensure either receipt of remaining spare parts or recovery of cost of the same from concerned contractors at the earliest.

1.5.28 Unjustified payment on account of barge to the contractor for installation of screens (trash racks) at upper intakes of T4HPP - Rs.67.751 million

According to Clause-14.2.2 of Technical Specifications (Part-B), the stoplogs and screens will be moved using a mobile crane and installed/removed using a barge equipped with a hoist, and a team of divers, all of which shall be provided by the contractor. However, a mobile crane shall also be provided for moving the stop logs and screens on land. As per BOQ Item Nos. H14.6 & 14.7, there was a provision of barge for installation of screens and stoplogs and mobile crane for moving intake screens and stoplogs.

During audit of accounts of the PD, T4HPP for the period from July, 2022 to June, 2023, it was observed that a contract for modification of the Tunnel No.3&4 of intakes, design, supply, installation and testing of penstock and construction of power house was awarded to M/s Sinohydro Group Ltd, China on September 09, 2013 at a contract price of Rs.15,756 million and US\$ 104.623 million. Later on, a VO No.49 for underwater inspection of trash racks of raised intakes at Tunnel No.3&4 amounting to Rs.77.075 million and US\$ 140,391 was issued to the contractor which included cost of removal of anchors from site of T5HPP & shifting of barge to site of T4HPP, fixing the anchors & positioning the barge at T4HPP and removal of anchors from site of T4HPP and shifting of barge to site of T5HPP. It was further observed

that an amount of Rs.67.751 million was also paid under BOQ item Nos.H14.6 & 14.7 despite the fact that payment for similar work was also made under VO No.49 in the IPC of same period. Audit held that simultaneous payment for same nature of work under VO No.49 and BOQ items of original contract was not justified.

Non-adherence to the provisions of contract resulted in unjustified payment of Rs.67.751 million to the contractor on account of shifting / de-shifting of barge for installation of screens (trash racks) at upper intakes of T4HPP during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consulting the record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to provide justification for payment on account of shifting/de-shifting of barge for installation of trash racks under BOQ items despite its payment under VO No.49 and ensure its recovery from the contractor.

(Draft Para No.287/2023-24)

1.5.29 Unjustified expenditure on renovation of Engineer's houses through variation order - Rs.48.912 million

According to Clause-3.7 of Appendix-A to the Consultant's Services Contract (CSC), "unfurnished bachelor accommodation will be provided as per required standards in Tarbela Dam Colonies for local and foreign consultants at standard rates applicable to WAPDA staff". Moreover, there was no provision in CSC for providing family accommodations to the staff of the consultants.

During audit of accounts of the PD, T5HPP for the period from July, 2022 to June, 2023, it was noted that an amount of Rs.48.912 million was spent on renovating family residential accommodations for the consultants through VO No.1 without preparation/approval of an estimate and without any provision in CSC. Out of total amount, an amount of Rs.46.288 million was incurred on renovation of two houses occupied by the Project Manager (House # S-24) and Chief Resident Engineer-Civil (House # S-33). It is pertinent to mention here that as per VO No.1, 13 air-conditioners were provided at house No.S-24 and 08 air-conditioners were provided at house No.S-33. It was further observed that an amount of Rs.1.724 million (excluding profit & overhead) pertaining to expenditure incurred on House No.S-02, S-54 and F-418 was claimed by three employees of the consultants themselves from the main contractor in their personal bank accounts which was subsequently certified against contractors' claim of Rs.2.299 million under the VO. It revealed that the renovation works of these houses were not performed by the contractor. Audit held that renovation of houses for consultants' family accommodations without any provision in the CSC and incurring & claiming of expenditure by the employees of consultants from the main contractor was unjustified.

Non-adherence to the provisions of CSC resulted in unjustified expenditure of Rs.48.912 million on renovation of Engineer's houses through VO No.1 up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management stated that reply would be submitted in due course of time.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify incurring of expenditure on renovation of family accommodations of consultants without any provision in the CSC. Further, the matter regarding incurring & claiming of expenditure by the consultants' staff in their personal bank accounts from the contractor needs to be .inquired for fixing responsibility.

(Draft Para No.232/2023-24)

1.5.30 Excess payment to the contractor due to less deduction of retention money - Rs.38.854 million

According to Special Stipulations (Appendix-A to Bid) of contract agreement, percentage of retention is 10% of the amount of IPC. As per Clause-5.2 of PCC regarding priority of contract documents, Special Stipulations (Appendix A to Bid) are at Sr. No.4 and GCC (Part-1) are at Sr. No.6.

During audit of accounts of the PD, Nai Gaj Dam Project (NGDP) for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.1,348.132 million was paid to the contractor on account of work done under various IPCs. As per special stipulation, retention money amounting to Rs.134.813 million @ 10% of amount of IPCs was required to be deducted but only an amount of Rs.95.959 million was deducted after excluding amount of escalation in violation of provisions of contract. Due to exclusion of amount of escalation from total amount of IPCs, retention money amounting to Rs.38.854 million was less deducted which resulted in excess payment to the contractor.

Non-adherence to provisions of contract resulted in excess payment of Rs.38.854 million to the contractor due to less deduction of retention money during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that retention money was being deducted as per provisions of contract, however, comprehensive reply would be furnished after consulting the record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify less deduction of retention money in violation of provisions of contract besides ensuring its recovery from the contractor.

Note: The issue was also reported earlier in the Audit Report for the Audit Year 2022-23 vide Para No.1.5.12 having financial impact of Rs.326.196 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.201/2023-24)

1.5.31 Unjustified excess use of granular material in canal bed under remedial works - Rs.33.793 million

According to Clause-3.1.1 of the CSA, “the consultants shall perform the services and carry out their obligations with all due diligence, efficiency and economy in accordance with generally accepted professional techniques and practices, and shall observe sound management practices, and employ appropriate advanced technology and safe methods. The consultants shall always act, in respect of any matter relating to this contract or to the services, as faithful advisers to the client and shall at all times support and safeguard the client's legitimate interests in any dealings with sub-consultants or third parties”.

During audit of accounts of the PD, Kachhi Canal Project (KCP) for the period from July, 2022 to June, 2023, it was observed that a contract No. KC-04(R) for execution of outstanding and remedial works of main canal & distribution system (from RD 1193+000 to RD 1252+000) was awarded to M/s Ramzan & Sons on April 13, 2021 at a contract price of Rs.2,534.440 million. As per estimate and BOQ of remedial works, there was a provision of 3,531 (%cft) quantity for providing and laying 1.5ft thick free drainage granular material in canal bed for restoration of damaged works (canal and structures) of already constructed canal lining. However, 6,758.58 (%cft) quantity amounting to Rs.33.793 million was paid in excess of BOQ quantity in IPC No.8 & 9. Further probe into the matter revealed that 2ft granular material was already placed and paid at almost all the RDs under a previous contract. Audit held that as the present work was being executed as remedial work on already constructed canal and estimate was prepared by the sitting consultants who were directly involved in designing and supervision of the previous contract, therefore, payment of excess quantity of granular material was not justified.

Non-adherence to the provisions of contract resulted in unjustified excess use of granular material amounting to Rs.33.793 million in canal bed under remedial works up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that a new contract No.KC-04 (R) had been executed at the risk & cost of the previous contractor. During execution, it was revealed that a lot of remedial works in canal bed were required which had been executed by the newly employed contractor at different locations and all the cost incurred in this regard would be charged to the previous contractor.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter regarding abnormal increase in

quantities of granular material on remedial works besides ensuring its recovery from the previous contractor.

Note: The issue was also reported earlier in the Audit Report for the Audit Year 2022-23 vide Para No.1.5.21 having financial impact of Rs.57.540 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.253/2023-24)

1.5.32 Non-installation of new material against stolen material by the contractor at Composite Model Village, Harpan Das - Rs.24.165 million

According to Clause-20.1 of GCC, “the contractor shall take full responsibility for the care of the works and materials and plant for incorporation therein from the commencement date until the date of issue of the TOC for whole of the works, when the responsibility for the said care shall pass to the Employer”. In accordance with GCC-20.2, “if any loss or damage happens to the works, or any part thereof, or materials or plant for incorporation therein, during the period for which the contractor is responsible for the care thereof, from any cause whatsoever, other than the risks defined in sub-clause-20.4, the contractor shall, at his own cost, rectify such loss or damage so that the permanent works conform in every respect with the provisions of the contract to the satisfaction of the Engineer”.

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, it was observed that a contract No.CMV-II-02 for construction of water supply and sewerage system in Composite Model Village-II, Harpan Das was awarded to M/s Shoukat Khan & Co. on December 31, 2014. The work was substantially completed in March, 2017 but TOC of the same was not issued so far and services of watchman were also terminated by the contractor. *It was further observed from the correspondence that an incident of theft was reported wherein 90% gate valves (small and large), steel and RCC manhole covers worth Rs.24.165 million (approx.) were stolen, however, complete detail of loss due to theft and damages was not worked out by the department. Neither FIR was lodged with the concerned Police Station nor departmental inquiry was conducted to probe the causes of theft and making good the loss. Audit held that as TOC of the subject work had not yet been issued, therefore, the matter was also required to be taken up with the contractor to make good the loss as per provisions of contract but needful was not done.*

Non-adherence to provisions of contract resulted in non-installation of new material against stolen material worth Rs.24.165 million by the contractor at Composite Model Village, Harpan Das up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends that the management needs to inquire the matter at appropriate level besides ensuring execution of remedial works through the concerned contractor as the TOC of said work was not issued so far.

(Draft Para No.307/2023-24)

1.5.33 Non-recovery of cost incurred on re-construction of damaged work and removal of dumped material from the concerned contractors - Rs.18.843 million

According to Clause-1.6.3 (Technical Specifications) of contract for construction of Right Bank Periphery Road-01, if the excavated material is unsuitable, it shall be disposed-off at the designated location in the manner as directed by the Engineer. As per Clause-22.1 of GCC, the contractor shall indemnify the Employer against all losses and claims in respect of loss of damage to any property which may arise out of or in consequence of the works and remedying of any defects therein, and against all claims, proceeding, damages, costs, charges and expenses whatsoever in respect thereof or in relation thereto. As per Clause-31.3 of PEC's Standard Form of Bidding Documents (Civil Works), 2007, "during execution of the works, the contractor shall co-operate fully with other contractors working for the Employer at and in the vicinity of the site and also shall provide adequate precautionary facilities not to make himself a nuisance to local residents and other contractors".

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, it was observed that 94 slope monitoring survey monuments adjacent to the main dam structure were installed during Tender Design Stage for monitoring of potential slope movements. It was further observed that due to dumping of excavated material of KKH on the slope adjacent to the road, these monuments were damaged and reconstructed through VO No.02 amounting to Rs.10.333 million issued to M/s Power China-FWO JV (contractor of MW-01) instead at the cost of concerned contractor of KKH. Similarly, M/s Sadaat Enterprises and M/s Hakas working on other contracts dumped their excavated material at Right Bank Permanent Road and site approved for construction of Concrete Batching Plant of contract No.MW-01 respectively. The illegally dumped material was required to be removed by the concerned contractors but on the contrary the same was removed by M/s Power China-FWO JV and an amount of Rs.8.510 million was paid to them. Audit held that the cost incurred on reconstruction of monuments and removal of dumped material was required to be recovered from the concerned contractors but needful was not done.

Non-adherence to the provisions of the contracts resulted in non-recovery of cost of Rs.18.843 million incurred on re-construction of damaged work and removal of dumped material from the concerned contractors during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and

January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to take up the matter with the concerned contractors for recovery of cost incurred on re-construction of slope monitoring survey monuments and removal of dumped material due to their faults.

(Draft Para No.301, 302 & 303/2023-24)

1.5.34 Unjustified payment of remuneration to the consultants' site staff - Rs.18.809 million

According to Clause-6.2 (b) of GCC of CSA, remuneration for the personnel shall be determined on the basis of time actually spent by such personnel in the performance of the services. As per Clause-4.4 of SCC, "the consultants' staff at site will follow the same working days in a week as observed by the client/contractor unless otherwise authorized by the client".

During audit of accounts of the PD, NGDP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.18.809 million was paid to the consultants on account of remunerations of site staff for the months of August to December, 2022. Further probe into matter revealed that the work at site was stopped by the contractor due to flood during said period. As per CSA, remuneration was to be determined on the basis of time actually spent at site and the consultants' site staff was required to follow the same working days in a week as observed by the contractor but needful was not done. Audit held that as there was no physical work at the site and no services were performed by consultant's site staff, therefore, remuneration paid to the site staff was not justified.

Non-adherence to the provisions of CSA resulted in unjustified payment of Rs.18.809 million on account of remuneration to the consultants' site staff during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the work was temporarily suspended due to heavy flood in Gaj River and submerging of link road to site. However, the staff of consultants remained deployed at site for monitoring flood flows and supervising temporary arrangements/works carried out by the contractor for safeguarding the permanent structures.

The reply was not acceptable because the work remained suspended and no activities were performed by the consultants at sites during that period, therefore, payment of remuneration of site staff was not justified.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify payment of remunerations to the site staff of consultants without performing any services at site in violation of CSA besides ensuring its recovery from the consultants.

(Draft Para No.205/2023-24)

1.5.35 Unjustified payment to the contractor on account of separate item for dewatering of remedial work - Rs.18.802 million

According to Clause-2.2 (d), the work to be done under care and handling of water including

dewatering includes removal and care of surface water and dewatering the sub-soil water for foundations such as to maintain all foundations, excavations and surfaces dry and free of water as required for proper construction of the works. As per Clause-2.6, prior to begin any work pertaining to care and handling of water including dewatering covered under BOQ, the contractor shall submit a payment schedule in such form as to allocate the total lump sum amount tendered in BOQ to the major divisions of work to be performed under that item. For each major division of work to be performed, the payment schedule shall show the proportionate part of the total lump sum amount allocated thereto. No quantity measurement will be made of the work for care and handing of water including dewatering, and the payment, therefore, will be based on the payment schedule.

During audit of accounts of the PD, KCP for the period from July, 2022 to June, 2023, it was observed that a contract No.KC-04(R) for execution of outstanding and remedial works of main canal and distribution system (from RD 1193+000 to RD 1252+000) was awarded to M/s Ramzan & Sons on April 13, 2021 at a contract price of Rs.2,534.440 million. An amount of Rs.109.63 million was paid to the contractor against lump sum provision of Rs.150 million for care and handling of water including dewatering in respect of outstanding works. Further probe into the matter revealed that an amount of Rs.18.802 million was also paid to the contractor against lump sum provision of Rs.20 million kept for pumping arrangements/dewatering and safe disposal of water during the construction of lining and installation under drainage pipe lines for remedial works. Audit held that as a lump sum provision of Rs.150 million was already provided in the contract for care and handling of water including dewatering, therefore, separate payment of Rs.18.802 million for pumping arrangements/ dewatering and safe disposal of water was not justified.

Non-adherence to provisions of contract resulted in unjustified payment of Rs.18.802 million to the contractor on account of separate item for dewatering up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the contract was being executed at the risk & cost of previous contractor and outstanding work of underground water crossings as well as temporary/vertical post water crossings were required to be extended and buried in the canal bed. Further, a number of defective/damaged underground pipe crossings were also required to be repaired. For these specific underground water course works, a separate item of pumping/dewatering was provided to work in canal bed at different locations.

The reply was not acceptable because a lump sum provision was already provided in the contract for care and handling of water including dewatering, therefore, separate payment for pumping arrangements/dewatering and safe disposal of water was not justified.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify the payment for pumping arrangements/dewatering as separate item besides ensuring its recovery from the contractor.

(Draft Para No.254/2023-24)

1.5.36 Excess payment to the contractor due to non-deduction of rebate from gross amount of contractor's bills - Rs.17.345 million

According to Note (abstract of costs for Package-I) of contract No. LOT-4, "during the currency of the contract and release of payments to M/s NETRACON-NEIE/Holley Consortium, 2.5% discount reflected in the abstract of cost shall also apply to individual payments except provisional sum".

During audit of accounts of the PD, Golen Gol Hydropower Project (GGHP) for the period from July, 2022 to June, 2023, it was observed that a contract for construction of 132KV transmission line was awarded to M/s NETRACON-NEIE/Holley Consortium on February 11, 2017. The bidder offered 2.5% discount on his overall bid cost except provisional sum. As per provisions of contract, discount was required to be deducted on gross amount of contractor's claims but the management deducted discount on net amount after excluding the amount of retention money, recovery of mobilization advance & taxes. Due to non-deduction of discount on gross amount of contractor's bill, an amount of Rs.17.345 million was less deducted which resulted in excess payment to the contractor.

Non-adherence to provisions of the contract resulted in excess payment of Rs.17.345 million to the contractor due to non-deduction of rebate from gross amount of contractor's bills up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that pending IPCs of the contractor would be processed after issuance of DLC and recovery would be effected at the time of making payment to the contractor.

No further progress towards recovery was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of less deducted amount of rebate from the contractor without further loss of time besides fixation of responsibility for the same.

(Draft Para No.322/2023-24)

1.5.37 Excess payment to the contractor due to non-deduction of rebate on BOQ items for varied works - Rs.15.499 million

According to Clause-52.1 of GCC, "all variations referred to in Clause-51 and any additions to the contract price which are required to be determined in accordance with Clause-52 (for purposes of this clauses referred to as 'varied work'), shall be valued at the rates and prices set out in the contract if, in the opinion of the Engineer, the same shall be applicable. If the contract does not contain any rates or prices applicable to the varied work, the rates and prices in the contract shall be used as the basis for valuation so far as may be reasonable, failing which, after due consultation by the Engineer with the Employer and the contractor, suitable rates or prices shall be agreed upon between the Engineer and the contractor".

During audit of accounts of the PD, NGDP for the period from July, 2022 to June, 2023, it was observed that a VO for construction of auxiliary spillway for Rs.3,232.174 million was approved by the Authority in its meeting held on January 05, 2018. All the BOQ items of VO were taken from the BOQ of main spillway for calculation of amount of VO but at the time of preparation of VO, rebate @ 20.4635% on BOQ items was not applied. Thus, an amount of Rs.11.032 million was not deducted from IPC No.72 & 73. Moreover, an amount of Rs.4.467 million was also paid to the contractor on account of escalation on this amount due to increase in rates of specified material. Audit held that as the rates of all BOQ items of VO were taken from the BOQ of the original contract, therefore, same rate of rebate should have been applied for preparation of VO but needful was not done, which led to excess payment of Rs.15.499 million to the contractor.

Non-adherence to provisions of contract resulted in excess payment of Rs.15.499 million to the contractor due to non-deduction of rebate on BOQ items for varied works during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that in compliance of earlier DAC directives on the issue, the matter had been taken up with the PEC through MoWR and response of PEC is still awaited.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify non-deduction of rebate on BOQ items of varied works in violation of provisions of contract besides ensuring its recovery from the contractor.

Note: The issue was also reported earlier in the Audit Report for the Audit Year 2022-23 vide Para No.1.5.13 having financial impact of Rs.248.767 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.200/2023-24)

1.5.38 Wasteful expenditure on construction and subsequent dismantling of work - Rs.13.309 million

According to Clause-9 (d) of Appendix-A to the CSA, the consultants shall review/update the detail/tender design (if required) and prepare and issue construction drawings to the contractor. As per Clause-3.1.1, “the consultants shall perform the services and carry out their obligations with all due diligence, efficiency, and economy in accordance with generally accepted professional techniques and practices, and shall observe sound management practices, and employ appropriate advanced technology and safe methods”. As per Clause-3.4, “the consultants are liable for the consequence of errors and omissions on their part or on the part of their employees insofar as the design of the project is concerned to the extent and with the limitations. If the client suffers any losses or damages as a result of proven faults, errors or omissions in the design of a project, the consultants shall make good such losses or damages”.

During audit of accounts of the PD, MDHP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.11.663 million was paid to the contractor M/s CGGC-DESCON for placement of blinding concrete at spillway right training wall. It was further observed that initially the said work was executed by the contractor at EL.507:00 and EL.508:000 under supervision of the consultants' site staff in accordance with the approved construction drawings issued by the consultants. After execution of work, the consultants issued afresh site instruction to dismantle the said executed work on day work basis and an amount of Rs.1.646 million was also paid to the contractor for dismantling the said work. As per CSA, the consultants were required to carry out their duties with due diligence and were also responsible for consequences of errors and omissions on their part. Audit held that as the original work was executed by the contractor after approval of construction drawings by the consultants, therefore, the consultants were responsible for wasteful expenditure of Rs.13.309 million incurred on construction and subsequent dismantling of said work due to revision of drawings.

Non-adherence to the CSA resulted in wasteful expenditure of Rs.13.309 million on construction and subsequent dismantling of work during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management stated that the matter would be taken up with the consultants and detailed reply would be submitted accordingly.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of cost incurred on execution and subsequent dismantling of work from the consultants.

(Draft Para No.140/2023-24)

C. Financial Management

1.5.39 Non-recovery of invoiced amount of sale of energy from Central Power Purchasing Agency - Rs.106,133.366 million

According to Power Purchase Agreement (PPA), “the invoice shall state the due date for payment of invoice by the National Transmission & Despatch Company (NTDC) to be on or before 25th following the delivery of invoice. In case, the 25th day is not business day, the following business day shall be deemed to be the due date”.

During audit of accounts of the GM (Finance) Power for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.106,133.366 million was recoverable from Central Power Purchasing Agency-Guarantee (CPPA-G) against verified invoices of the sale of energy. As per PPA, the amount of invoices was required to be recovered on or before 25th day following the delivery of invoices but no amount pertaining to these invoices was received by WAPDA during the year.

Non-adherence to PPA resulted in non-recovery of Rs.106,133.366 million from CPPA-G against sale of energy during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that the matter of recovery had already been taken-up with CPPA-G and progress achieved in this regard would be intimated to Audit.

No further progress towards recovery was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends that the management needs to pursue the recovery of outstanding dues amounting to Rs.106,133.366 million from CPPA-G at appropriate level.

(Draft Para No.73/2023-24)

1.5.40 Loss due to placement of funds of Green Euro Bonds in Pak Rupees account instead of foreign currency account - Rs.64,800 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), “all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of accounts of the GM (Finance) Power for the period from July, 2022 to June, 2023, it was observed that Green Euro Bonds amounting to US\$ 500 million were issued to arrange funds for making payments of foreign currency components of DBDP and MDHP. However, the funds raised through issuance of the said bonds were deposited in local currency account (PKR) instead of US\$ account @ Rs.158.30/US\$ as on June 30, 2021. Later on, due to currency exchange rates fluctuations, the exchange rate of US\$ to PKR had been increased to Rs.287.90/US\$ from Rs.158.30/US\$ as on June 30, 2023. Audit held that as these funds were raised specifically for making payments of foreign currency

component, therefore, the amounts should have been kept in foreign currency account but needful was not done which caused foreign exchange loss of Rs.64,800 million.

Poor financial management resulted in loss of Rs.64,800 million due to placement of funds of Green Euro Bonds in Pak Rupees account instead of foreign currency account up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that utmost efforts were made for opening and maintaining of foreign currency account. However, State Bank of Pakistan (SBP) was reluctant and had not allowed WAPDA to retain funds in foreign currency account.

The reply was not acceptable because funds raised from Credit Suisse loan for DHPP were kept in foreign currency account, whereas, funds raised through issuance of Green Euro Bonds were kept in PKR account which caused huge foreign exchange loss.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify placement of funds in local currency account instead of foreign currency account besides fixing responsibility.

(Draft Para No.65/2023-24)

1.5.41 Non-charging/non-recovery of interest on delayed payments from Central Power Purchasing Agency - Rs.15,526.026 million

According to PPA, “any payment other than fixed charge payment and variable charge payment due to WAPDA from NTDC shall be treated as supplementary payment which shall be invoiced by WAPDA on a monthly basis. Late payments shall bear interest at a rate per annum equal to the Base Rate plus two percent (2%) per annum compounded semi-annually and shall be computed for the actual number of days on the basis of a three hundred sixty-five (365) day year”. As per Interim Tripartite PPA between CPPA-G, NJHPC and WAPDA, “Delayed payment rate is Karachi Interbank Offered Rate (KIBOR) plus two percent (2%) per annum on any amounts payable in rupees and calculated for the actual number of days which the relevant amount remains unpaid on the basis of a three hundred sixty-five (365) day year”.

During audit of accounts of two formations of WAPDA for the period from July, 2021 to June, 2023, it was observed that General Sales Tax and Hydel Levies invoices amounting to Rs.33,622.990 million were billed by WAPDA to CPPA-G for the FY 2022-23. The amount was required to be recovered from CPPA-G but no amount was recovered during the year, therefore, interest amounting to Rs.4,911.554 million was required to be charged to CPPA-G which was not done. Similarly, an amount of Rs.10,614.472 million on account of interest on delayed payments pertaining to the invoices of NJHPC from July, 2019 to April, 2021 was recoverable from CPPA-G but no recovery was made so far. The detail is as under:

(Rs. in million)

Sr. No.	Name of Formation	DP No.	Amount
1	GM (Finance) Power	64/2023-24	4,911.554
2	CEO NJHPC	111/2023-24	10,614.472
TOTAL			15,526.026

Non-adherence to the PPA resulted in non-charging/non-recovery of interest on delayed payments amounting to Rs.15,526.026 million from CPPA-G up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that late payment invoices in respect of WAPDA were under process of issuance whereas recovery of amount of NJHPC was pending due to pendency of original invoices.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to pursue the matter at appropriate level and ensure charging and recovery of interest on delayed payments from CPPA-G without further loss of time.

1.5.42 Non-finalization of disallowed invoices on account of sale of energy - Rs.10,312.230 million

According to Clause-15.1 of PPA, “in the event of any dispute arising out of the terms of this agreement, the parties shall make every effort through coordination committee, if required, to reach an amicable settlement within 45 days. If the dispute cannot be settled within such 45 days period, it shall be referred for determination to an expert agreed by both the parties”.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.10,312.230 million, out of invoices raised for sale of energy, was disallowed by CPPA-G. As per PPA, the disallowed invoices were required to be finalized through coordination committee within 45 days but neither the fate of disallowed amount was decided nor the matter was referred to an expert for determination. The detail is as under:

Sr. No.	Name of Formation	DP No.	(Rs. in million) Amount
1	GM (Finance) Power	72/2023-24	9,488.350

2	GM (Hydel) Operation	271/2023-24	823.880
TOTAL			10,312.230

Non-adherence to the PPA resulted in non-finalization of disallowed invoices of Rs.10,312.230 million during the FY 2022-23.

The matter was taken up with the management in August & October, 2023 and reported to the Ministry in October & November, 2023. The management replied that major portion of disallowed invoices pertained to hydel levies which were not approved due to pending decision of CCI on the matter. Further, the matter had already been taken up with the CPPA-G and progress achieved would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to pursue the matter with CPPA-G for early finalization and recovery of amount of disallowed invoices.

1.5.43 Non-opening of dedicated bank accounts for depositing of retention money - Rs.6,690.404 million

According to Assan Assignment Account Procedure (Local Currency), 2020, “security deposit/retention money may be deposited in a designated bank account in case of perpetual organizations like the National Highway Authority but in case of projects/programmes or operational units or corporations, in a dedicated bank account opened with the approval of Finance Division or in Public Account. The account shall be used for deposit of retention money only and no utilization shall be made out of the account, except payment of retention money/security deposit. Such account shall immediately be closed on expiry of the contract or completion of project under intimation to Finance Division. In case retention money is forfeited or not claimed within a stipulated period, the same may be deposited along with interest, if any, in the Federal/provincial government Account as the case may be”.

During audit of accounts of six formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.6,690.404 million on account of retention money was deducted from various IPCs of the contractors. As per aforementioned instructions, the said amount of retention money should have been withdrawn and kept in separate dedicated bank accounts to be opened with the approval of the Finance Division but needful was not done. The detail is as under:

Sr. No.	Name of Formation	DP No.	(Rs. in million)
			Amount

1	PD, K-IV Project	86/2023-24	2,191.155
2	PD, MDHP	134/2023-24	1,741.108
3	PD, KTDP	168/2023-24	807.966
4	PD, NGDP	203/2023-24	95.959
5	PD, KCP	252/2023-24	111.043
6	PD, DBDP	295/2023-24	1,743.173
TOTAL			6,690.404

Non-adherence to the Procedure for Operation of Assignment Account resulted in non-opening of dedicated bank accounts for depositing of retention money amounting to Rs.6,690.404 million up to the FY 2022-23.

The matter was taken up with the management in August & September, 2023 and reported to the Ministry in October & November, 2023. The management replied that the case for opening of designated bank accounts for depositing of retention money was under process for approval. The concerned project offices were pursuing the matter vigorously and progress would be intimated to Audit accordingly.

No further progress towards opening of dedicated bank accounts for keeping retention money was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify non-opening of dedicated bank accounts for depositing retention money besides ensuring compliance of the instructions of Finance Division without further delay.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2020-21, 2021-22 & 2022-23 vide Paras No.1.5.51, 1.5.56 & 1.5.45 having financial impact of Rs.4,219.355 million. Recurrence of same irregularity is a matter of serious concern.

1.5.44 Unjustified expenditure on account of security cost in violation of PC-I provisions - Rs.4,849.682 million

According to Para-7.4.10 of the PC-I of MDHP, “in previous submission of PC-I, security cost was taken as 1% of the cost of preparatory and main works and estimated as Rs.1,768.840 million,

presently security cost is removed on advice of Planning Commission from final cost of PC-I". As per directions of PAC conveyed by the Cabinet Division vide memorandum dated March 26, 2011, "there should be no deviation from the approved PC-I of the projects in any respect being implemented by the Federal Ministries/Divisions and its attached departments/autonomous bodies".

During audit of accounts of the PD, MDHP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.4,849.682 million was spent on account of security cost. As per approved PC-I, amount of security cost was not included on the direction of the Planning Commission of Pakistan. Moreover, as per instructions of PAC, there should be no deviation from the approved PC-I of the project. Audit held that incurring of expenditure without any provision in PC-I in violation of instructions of Planning Commission and directions of PAC was irregular.

Non-adherence to the provisions of PC-I and directions of PAC resulted in unjustified expenditure of Rs.4,849.682 million on account of security component up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that security cost was incurred with the approval of Authority for providing security to expatriate staff and this amount was used out of provision kept for 'Physical Contingencies' in PC-I. Moreover, the revised PC-I is under preparation and this expenditure would be regularized upon its approval.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify incurring of expenditure on security in violation of provisions of PC-I as this component was categorically disallowed by the Planning Commission.

(Draft Para No.132/2023-24)

1.5.45 Non-realization of WEPS contribution premium from different formations & power sector companies - Rs.1,262.790 million

According to Para-8(3) of Procedure of WAPDA Equipment Protection Scheme (WEPS), the funds will be receivable from the projects/formations through Manager Finance in the month of July every year.

During audit of accounts of the Deputy GM (Insurance) WAPDA for the period from July, 2018 to June, 2022, it was observed that a huge amount of Rs.1,262.790 million on account of WEPS contribution premium was receivable from different WAPDA formations and power sector companies. The aging of the receivable showed that the amount was outstanding for the period from 2006-07 to 2021-22. Audit held that the WEPS contribution premium should have been regularly collected in July each year but the same was not done, which caused accumulation of a substantial outstanding amount.

Non-adherence to the provisions of WEPS resulted in non-realization of premium of Rs.1,262.790 million from different formations and power sector companies up to the FY 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in October, 2023. The management replied that out of total amount of Rs.1,262.790 million, an amount of Rs.187.387 million had been recovered whereas strenuous efforts were being made to recover the remaining amount and progress achieved in the matter would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to pursue the recovery of remaining amount of premium from the concerned formations/companies and the MoWR to devise a mechanism for monitoring and compliance of such matters.

(Draft Para No.51/2023-24)

1.5.46 Undue favour to the contractor due to non-deduction of income tax - Rs.1,096.898 million

According to Clause-13.8 (x) of the Accounting and Financial Reporting Manual of WAPDA, “withholding tax shall be deducted from the gross amount of the contractor’s bills at the prevailing tax rates, unless contractor provides tax exemption certificate issued by the relevant tax authority for the related period”. As per Section-153(1) of the Income Tax Ordinance 2001, “every prescribed person making a payment in full or part including a payment by way of advance to a resident person or permanent establishment in Pakistan of a non-resident person on the execution of a contract shall, at the time of making the payment, deduct tax from the gross amount payable at the specified rates”. As per Clause-14.1b (iii) of PCC, the contractor is required to be fiscally registered and resident of project site area, and meet other conditions to remain eligible for tax concessions.

During audit of accounts of the PD, MDHP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.15,669.971 million was paid to the contractor through IPC No.24 to 31. As per Income Tax Ordinance, income tax was required to be deducted and deposited into government treasury because no tax exemption was granted by the tax authorities to the contractor. However, at the time of making payments to the contractor, income tax amounting to Rs.1,096.898 million was not deducted by the management. Audit held that undue favour was extended to the contractor by non-deducting income tax which caused loss to the national exchequer.

Non-adherence to the aforementioned rules & contract clause resulted in undue favour to the contractor due to non-deduction of income tax amounting to Rs.1,096.898 million during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management replied that the subject matter was sub-judice in the court of law, however, detailed reply would be furnished after consultation of record.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify non-deduction of income tax from payments made to the contractor besides pursuing the court case vigorously.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2021-22 & 2022-23 vide Paras No.1.5.39 & 1.5.44 having financial impact of Rs.2,356.158 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.135/2023-24)

1.5.47 Less recovery of capacity charges due to non-conducting of capacity rating tests required under the Power Purchase Agreement - Rs.830.031 million

According to Clause-10.1 of PPA, “NTDC (now CPPA-G) shall have the right to demand capacity tests of any WAPDA Power Station not more than once in every five years one by one of any of its individual units during such time when the required head, discharge and system conditions are available in order to determine their rated capacities. However, any shortfall in installed capacities of individual units shall not entail any reduction in fixed charge payment by NTDC as long as the total installed capacity of WAPDA Power Stations does not fall below 6,444 MW on the agreement date or the revised installed capacity in case new WAPDA Power Stations are commissioned subsequent to the agreement date. Such tests shall be carried out to determine the rated capacity of the units and a notice of 15 days shall be given by NTDC to WAPDA to make managements for such tests”.

During audit of accounts of the RE, GGHPs for the period from July, 2018 to June, 2023, it was observed that CPPA-G had allowed capacity charges for 36 MW instead of installed capacity of 108 MW w.e.f August, 2022 because capacity rating tests of the plant were not carried out. These tests could not be conducted due to non-installation of water measurement meters/telemetry system at the intake & discharge level and delay in clearance of debris & boulders from the intake area. Audit held that the management was required to take necessary measures for conducting these tests in order to receive full amount of capacity charges but needful was not done which resulted in less recovery of capacity charges amounting to Rs.830.031 million.

Non-adherence to the conditions of the PPA resulted in less recovery of Rs.830.031 million on account of capacity charges due to non-conducting of capacity rating tests up to the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consulting the record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify delay in conducting capacity rated tests besides conducting these tests to ensure full recovery of capacity payment charges from the CPPA-G.

(Draft Para No.347/2023-24)

1.5.48 Undue favour to the contractor due to non-deduction of provincial sales tax on construction services - Rs.313.399 million

According to Clause-13.8 (x) of the Accounting and Financial Reporting Manual of WAPDA, “withholding tax shall be deducted from the gross amount of the contractor’s bills at the prevailing tax rates, unless contractor provides Tax Exemption Certificate issued by the relevant tax authority for the related period”. As per Clause-14.1 b(iii) of PCC, the contractor is required to be fiscally registered and resident of project site area, and meet other conditions to remain eligible for tax concessions. According to Provincial Finance Act-2021, Khyber Pakhtunkhwa Sales Tax (KPST) on construction of hydropower project was applicable @ 2% w.e.f. July, 2021.

During audit of accounts of the PD, MDHP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.15,669.971 million was paid to the contractor M/s CGGC-DESCON JV through IPC No.24 to 31. At the time of making payments to the contractor, KPST amounting to Rs.313.399 million was not deducted by the management. As per rules, KPST was required to be deducted and deposited into government treasury as no tax exemption was granted by the Khyber Pakhtunkhwa Revenue Authority to the contractor but needful was not done. Audit held that undue favour was extended to the contractor by non-deducting KPST which caused loss to the Provincial exchequer.

Non-adherence to the aforementioned rules & contract clause resulted in undue favour to the contractor due to non-deduction of KPST on construction services amounting to Rs.313.399 million up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management stated that para would be replied after consultation of record. The subject matter of taxation is also sub-judice in the court of law.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to recover entire amount of KPST from the contractor as there is no direction from the court against such action

Note: The issue was also reported earlier in the Audit Report for the Audit Year 2021-22 vide Para No.1.5.43 having financial impact of Rs.206.090 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.138/2023-24)

1.5.49 Non-transfer of profit earned on PSDP funds to the Federal Government - Rs.308.519 million

According to Para-2(V) of Ministry of Water & Power’s (MoW&P) letter No.DW-1(13)/2013 dated September 26, 2016, “profit earned by WAPDA so far by parking the Public Sector Development Programme (PSDP) funds in scheduled banks may be deposited into Government Treasury”.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.308.519 million was earned as profit by the Land Acquisition Collectors/ Deputy Commissioners (Mohmand & Kohistan) on amount transferred by WAPDA for payment of land and other compensations. Audit held that as the said amount was transferred out of Federal PSDP funds, therefore, amount of profit earned thereon should have been transferred to the Federal Government which was not done. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	PD, MDHP	137/2023-24	98.238
2	PD, DHPP	336/2023-24	210.281
TOTAL			308.519

Non-adherence to the aforementioned instructions resulted in non-transfer of profit of Rs.308.519 million earned on PSDP funds to the Federal Government up to the FY 2022-23.

The matter was taken up with the management in August & September, 2023 and reported to the Ministry in November, 2023. The management replied that the matter regarding reimbursement of profit had already been taken with the concerned Deputy Commissioners and progress achieved would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to take up the matter with the concerned Deputy Commissioners for transfer of profit earned on PSDP funds to the Federal Government at the earliest.

1.5.50 Unjustified charging of expenditures of other formations to the projects - Rs.187.511 million

According to approved PC-Is of K-IV and NGDP, there were no provisions for charging of expenditure of other formations of WAPDA to the projects. As per Para-11.4 (b) (Chapter XI) of the Hand Book for Drawing & Disbursing Officer (DDO), "funds allotted to a Ministry/Division, it's attached or subordinate offices are spent for the purpose for which they are allocated".

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.187.511 million on account of expenditure of other formations of WAPDA was charged to the projects. This amount was charged/paid in addition to payment of Authority Overhead charges. Audit held that as there was no provision in PC-Is for charging of expenditure of other formations of WAPDA, therefore, charging of Rs.187.511 million to the projects

was not justified. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	PD, K-IV Project	103/2023-24	34.891
2	PD, NGDP	204, 208 & 210/2023-24	152.620
TOTAL			187.511

Non-adherence to the provisions of PC-I and DDO Hand Book resulted in unjustified charging of expenditures of other formations amounting to Rs.187.511 million to the projects up to the FY 2022-23.

The matter was taken up with the management in August & September, 2023 and reported to the Ministry in October & November, 2023. The management replied that these payments were made on the directions of head office.

The reply was not acceptable because these expenses were charged in violation of provisions of PC-Is.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify charging of expenditure of other formations to the projects and ensure recovery/adjustment of said amount from the concerned quarter without further loss of time.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2021-22 & 2022-23 vide Paras No.1.5.48 & 1.5.56 having financial impact of Rs.149.594 million. Recurrence of same irregularity is a matter of serious concern.

1.5.51 Unjustified payment to the consultants on account of construction supervision charges under Phase-II without any physical activities on site - Rs.87.233 million

According to Clause-1.3 of the CSA, “the employment of the consultant has the objective to prepare the detailed (tender) design for the Keyal Khwar Hydropower Project (KKHP), to prepare the tender documents and to assist WAPDA during the tender procedure, the evaluation of bids, contract negotiations and assignment of the contracts in a first phase, this will include as well as the preparation of Pre-qualification (PQ) documents for the various lots and the assistance to WAPDA during the PQ procedure and the respective PQ evaluation (Phase-I). Further, to assist WAPDA in the management of the project during the subsequent construction and implementation process, and as an option, to prepare the construction drawings for the civil works of project (Phase-II)”.

During audit of accounts of the PD, KKHP for the period from July, 2022 to June, 2023, it was observed that a CSA was signed with Keyal Hydropower Consultants JV on May 12, 2010. The CSA consisted of two parts i.e. Phase-I & Phase-II and cost provision for Phase-I was Euro 1.575 million & Rs.110.812 million whereas for Phase-II, Euro 5.036 million & Rs.414.395 million. The contract for main civil works was awarded in September 2014 and upon award of contract, supervisory activities of the consultants started under Phase-II. However, the said contract was terminated on December 08, 2017 with only 1.5% progress and an amount of Euro 1.138 million & Rs.88.729 million on account of supervision charges was paid to the consultants. Upon termination of the civil works contract, supervisory activities of the consultants were supposed to be stopped automatically. It was further observed from consultants' invoices that a payment of Euro 0.334 million (Equivalent to Rs.61.482 million) and Rs.25.751 was also made after termination of the contract (from December, 2017 to June, 2023). Audit held that payment of Rs.87.233 million on account of supervisory charges under Phase-II after termination of the main contract was not justified.

Non-adherence to the provisions of CSA resulted in unjustified payment of Rs.87.233 million to consultants on account of construction supervision charges under Phase-II without any physical activities on site up to the FY 2022-23.

The matter was taken-up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that some amount for the period from December, 2017 to June, 2018 was paid to the consultants during formal closure of the contract after termination, whereas, justification for payment of remaining amount would be given after consultation with the consultants.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify payment of consultancy charges related to construction supervision after termination of main contract.

(Draft Para No.383/2023-24)

1.5.52 Non-recovery of amount of pending Group Life Insurance claims from Postal Life Insurance - Rs.29.827 million

According to Clause-4(iv) of the contract between WAPDA and Postal Life Insurance (PLI), "payments of the claims submitted to Postal Life complete in all respect should be made within fifteen (15) working days".

During audit of accounts of the Deputy GM (Insurance) WAPDA for the period from July, 2018 to June, 2022, it was observed that an amount of Rs.29.827 million on account of 54 Group Life Insurance (GLI) claims was recoverable from PLI. As per record, the agreement between WAPDA and PLI had also been expired on June 30, 2021. These claims were pertained to the FY 2011-12 to 2020-21 and as per contract, these claims should have been finalized within 15 working days but no strenuous efforts

were made to recover the said amount.

Non-adherence to aforementioned agreement resulted in non-recovery of pending GLI claims amounting to Rs.29.827 million from PLI up to the FY 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in October, 2023. The management replied that the matter would be taken up at higher level of PLI and outcome would be communicated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of pending GLI claims from the PLI without further loss of time.

(Draft Para No.55/2023-24)

1.5.53 Irregular payment of pensionary charges out of PSDP funds - Rs.23.406 million

According to Para-xii of MoW&P (now MoWR) letter No.DW-1(13)/ 2013 dated September 26, 2016, “centralized share/expenses (training, medical, pensionary) should not be charged by WAPDA to different PSDP funded projects”. As per approved PC-II, there was no provision for payment of pensionary charges to WAPDA except 2.25% for Authority Overheads.

During audit of accounts of the DG, International Waterlogging and Salinity Research Institute (IWASRI) for the period from July, 2020 to June, 2022, it was observed that an amount of Rs.23.406 million on account of pensionary charges was paid to the Pension Directorate WAPDA out of PSDP funds allocated for the project. As per instructions of Ministry, payment of pensionary charges out of PSDP funds was not allowed, therefore, its payment was irregular.

Non-adherence to the aforementioned instructions resulted in irregular payment of pensionary charges amounting to Rs.23.406 million out of PSDP funds up to the FY 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in October, 2023. The management replied that there was only a single source of funds i.e. PSDP and pensionary charges were part and parcel of pay & allowances to be paid to the employees upon superannuation.

The reply was not acceptable because the pensionary charges were paid in violation of instructions of the Ministry.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify payment of pensionary charges out of PSDP funds in violation of instructions of Ministry besides recovery of amount in question from the concerned quarter.

D. Assets Management

1.5.54 Non-mutation of acquired land in the name of WAPDA - Rs.4,849.063 million

According to Section-42 of West Pakistan Land Revenue Act, 1967, “a person acquiring by inheritance, purchase, mortgage, gift, or otherwise, any right in an estate as a land-owner, or a tenant for a fixed term exceeding one year, shall, within three months from the date of such acquisition, report his acquisition of right to the Patwari of the estate for recording such report in the record”. As per Section-36 of the Khyber Pakhtunkhwa Land Acquisition Rules, 2020, “the District Collector shall ensure attestation of mutation or registered deed, as the case may be, in favour of Acquiring Department within one month after issuance of award. The acquired land shall be mutated in the name of provincial government or Federal Government, as the case may be, and the name of the Acquiring Department or company, as the case may be, shall be entered in the column of cultivation”.

During audit of accounts of six formations of WAPDA for the period from July, 2020 to June, 2023, it was observed that land measuring 27,179.68 acres was acquired for different projects during 1987 to 2021. As per rules, the acquired land was required to be got mutated in the name of WAPDA but needful was not done despite lapse of a considerable period of time. Moreover, Additional DG (Property Management Cell) WAPDA vide letter No.ADG (PMC)/F-203/3066-69 dated May 29, 2019 also directed that all land, which had not been mutated so far, be identified and got mutated in the name of WAPDA in the revenue record. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	DG, IWASRI	30/2023-24	26.893
2	PD, MDHP	133/2023-24	3,186.402
3	PD, KTDP	170/2023-24	84.000
4	SE, Small Hydel Power Stations (SHPS)	187/2023-24	271.033
5	RE, Chashma Hydel Power Station (CHPS)	213/2023-24	1.345
6	PD, KCP	345/2023-24	1,279.390
TOTAL			4,849.063

Non-adherence to the aforementioned rules resulted in non-mutation of land worth Rs.4,849.063 million in the name of WAPDA up to the FY 2022-23.

The matter was taken up with the management during March to September, 2023 and reported to
3458

the Ministry during August to November, 2023. The management of IWASRI replied that the matter was in court of law and after finalization of court case, the land would be mutated in name of WAPDA. The management of MDHP, KTDP, SHPS and CHPS replied that the matter for mutation of land was under process with the concerned Revenue Authorities. The management of KCP replied that the land was acquired by WAPDA and out of total land of 17,934 acres, mutation of 8,819 acres land was done in the name of Govt. of Balochistan. However, detailed reply would be submitted accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to pursue the matter with concerned Revenue Authorities for early mutation of land in the name of WAPDA without further loss of time. MoWR may also devise a mechanism to ensure mutation of land as per law.

1.5.55 Non-allotment of alternate land to WAPDA (IWASRI) by Lahore Development Authority - Rs.675.846 million

According to Prime Minister's Secretariat letter No.11(24)E&F.2II/93 dated May 20, 1993, alternate site for Lower Indus Water Management and Reclamation Research Project and IWASRI may be provided immediately as earlier directed by the Prime Minister.

During audit of accounts of the DG, IWASRI for the period from July, 2020 to June, 2022, it was observed that a piece of land measuring 22 Kanals and 10 Marlas was purchased from Irrigation Department (Government of Punjab) in 1987 for construction of IWASRI Headquarter. Later on, Lahore Development Authority (LDA) occupied the subject land on the orders of the then Prime Minister in 1993 and an alternate piece of land was agreed to be provided to WAPDA by LDA. However, despite lapse of a period of more than 30 years, the matter was not taken up by the management at appropriate level for acquisition of alternate land worth Rs.675.846 million from LDA.

Non-compliance to the instructions of Prime Minister's Secretariat led to the non-allotment of alternate land worth Rs.675.846 million to WAPDA by LDA up to the FY 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in July, 2023. The management replied that despite a lot of meetings and correspondence by the project authorities, the issue had not been resolved yet.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to take up the matter at appropriate level for ensuring allotment of alternate land from LDA.

(Draft Para No.20/2023-24)

1.5.56 Non-disposal of off-road vehicles, unserviceable material and scrap - Rs.508.404 million

According to Para-1, Chapter-XI of revised WAPDA Transport Rules, “early disposal of unserviceable vehicles in accordance with the procedure laid down in WAPDA Disposal Procedure is essential to avoid depreciation due to deterioration, devaluation, due to loss/pilferage of spare parts, extra expenses on storage accommodation and pay of Chowkidars/guards etc.” As per Clause-1.4.2(a) of WAPDA Disposal Procedure, “Once declared unserviceable, beyond economical repairs or dead by the competent authority, the material should be disposed-off with minimum delay”.

During audit of accounts of various formations of WAPDA for the period from July, 2018 to June, 2023, it was observed that off-road vehicles, unserviceable material, wooden scrap etc. worth Rs.508.404 million (approx.) were not auctioned up to June, 2023. The aforementioned items were kept in the open space and exposed to the adverse environmental effect causing further deterioration and decrease in their value. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	RE, Warsak HPS	01/2023-24	15.779
2	PD, Surface Water Hydrology Project	09/2023-24	1.012
3	GM, (Hydro) Planning	14/2023-24	5.062
4	PD, Chashma Barrage & Chashma Jhelum Link Canal	78/2023-24	1.216
5	RE, Tarbela HPS	96/2023-24	290.680

15	GM (Civil), Tarbela Dam Project	282/2023-24	15.136
16	PD, DHPP	341/2023-24	1.700
17	PD, Building Circle WAPDA	432/2023-24	0.600
TOTAL			508.404

Non-adherence to WAPDA Disposal Procedure resulted in non-disposal of off-road vehicles, unserviceable material and scrap amounting to Rs.508.404 million up to the FY 2022-23.

The matter was taken up with the management during February to October, 2023 and reported to the Ministry during May to December, 2023. The management replied that some material had been auctioned, whereas, cases for disposal of remaining off-road vehicles & scrap material were under process and progress achieved in the matter would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to expedite the disposal process of off-road vehicles, unserviceable material and scrap without further delay.

1.5.57 Non-recovery of rent - Rs.463.715 million

According to clarification issued by the Director Finance (Regulations), WAPDA on January 10, 2007, where the accommodation is allotted by one organization to the employees of other organization, the standard rent is to be charged by the formation concerned from the formation whose employees have been allotted accommodation. *As per Section-23 of WAPDA Book of Financial Power, "any sum due to the Authority shall be recoverable as arrears of land revenues"*. As per Clause-9.1.3 of WAPDA Accounting and Financial Reporting Manual, the reconciliation of individual account balances to the control balance shall be performed periodically. A diligent effort shall be made to collect all outstanding

accounts in general, invoices shall be collected as expeditiously as possible, but the cost of collection shall not be allowed to exceed the expected revenue. Regular recovery notices shall be sent to all account receivables.

During audit of accounts of seven formations of WAPDA for the period from July, 2018 to June, 2023, it was observed that an amount of Rs.463.715 million on account of rent was recoverable from different formations, organizations and consultants for the period from 1980-81 to 2022-23. The outstanding rent was required to be recovered by taking up the matter at appropriate level but needful was not done. The detail is as under:

(Rs. in million)

Sr. No.	Name of Formation	DP No.	Nature of Recovery	Amount
1	RE, Warsak HPS	03/2023-24	Rent of land from Pak Army	338.170
2	PD, Building Circle	10 & 430/2023-24	Standard/Market rent from employees living illegally	21.041
3	RE, Tarbela HPS	100/2023-24	Standard/Market rent from serving/retired WAPDA & PESCO employees	16.584
4	SE, SHPS	184 & 263/2023-24	Lease amount & Rent from Nandipur Power Project	65.056
5	PD T5HPP	237/2023-24	Standard rent from consultants	6.900
6	RE (Civil), Mangla	248/2023-24	Rent from shopkeepers & banks	1.872

7	GM (Civil), Tarbela Dam Project	279 & 283/2023-24	Standard rent from employees and private occupant	14.092
TOTAL				463.715

Non-adherence to the aforementioned rules & instructions resulted in non-recovery of rent amounting to Rs.463.715 million from different formations and individuals up to the FY 2022-23.

The matter was taken up with the management during February to October, 2023 and reported to the Ministry during June to December, 2023. The management replied that the matter had already been taken up with the concerned formations/occupants and progress achieved in the matter would be intimated to Audit accordingly.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of rent of WAPDA's land and accommodations from the concerned formations and individuals.

1.5.58 Misuse of 58 vehicles due to attachment with unauthorized officers and irregular charging of O&M expenditure to the projects - Rs.153.233 million

According to Para-4 of Finance Division's Office Memorandum regarding System of Financial Control and Budgeting, the Principal Accounting Officer is responsible not only for the efficient and economical conduct of the Ministries/Divisions/Departments but also continues to be personally answerable before the PAC. The two main principles to be observed are economy (getting full value for money) and regularity (spending money for the purposes and in the manner prescribed by law & rules). As per Para-3 of Section-I (Chapter-III) of WAPDA Transport Rules, "the responsibility for the proper utilization, management and maintenance of road transport is that of PDs and Heads of Division/Organizations in respect of vehicles allotted to them". As per PC-Is of the projects, there were no provisions for use of vehicles other than projects' purposes.

During audit of accounts of various formations of WAPDA for the period from July, 2021 to June, 2023, it was observed that 58 vehicles of different makes and models purchased for different projects/formations were attached with WAPDA officers, consultants and MoWR. Some of these vehicles were procured through contractors and their fixed monthly O&M cost was also paid to the contractors. Audit held that as these vehicles were purchased for the projects' purposes, therefore, these should have been used for the projects at the sites. Hence, attachment of vehicles with unauthorized officers/offices was irregular and expenditure of Rs.153.233 million incurred on purchase and O&M of these vehicles was not justified. The detail is as under:

(Rs. in million)

Sr. No.	Name of Formation	DP No.	No. of Vehicles	Cost of Vehicles	O&M Expenditure	Total Amount
1	PD, Dargai Rehabilitation Project	57/2023-24	1	6.817	0	6.817
2	PD, K-IV Project	91/2023-24	5	24.000	0	24.000
3	CE (O&M), Hydel Besham	123/2023-24	3	4.470	0	4.470
4	PD, MDHP	139 & 153/2023-24	13	0	26.851	26.851
5	Chairman, PCRWR	148/2023-24	1	0	1.000	1.000
6	PD, KTDP	175/2023-24	1	0	1.713	1.713
7	PD, NGDP	206/2023-24	3	0	3.595	3.595
8	CE, Ghazi Barotha Power Complex	226/2023-24	1	4.424	0	4.424
9	PD, T5HPP	238/2023-24	1	0	6.876	6.876
10	PD, KCP	255/2023-24	9	22.447	0	22.447
11	GM (Hydel) Operation & Development	272/2023-24	2	6.203	0	6.203
12	PD, MRP	292/2023-24	1	3.409	0	3.409
13	PD, DHPP	330/2023-24	8	24.290	0	24.290
14	PD, DBDP	358/2023-24	9	0	17.138	17.138
TOTAL			58	96.06	57.173	153.233

Non-adherence to the aforementioned rules resulted in misuse of 58 vehicles due to attachment with unauthorized officers with financial implication of Rs.153.233 million up to the FY 2022-23.

The matter was taken up with the management during August to October, 2023 and reported to the Ministry during October & November, 2023. The management replied that these vehicles were attached with the approval of WAPDA Authority. The management of MDHP also replied that the vehicle was not dedicated to the CEO of consultants rather it was being used by other staff of the consultant from time to time. However, detailed reply would be furnished in due course time.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify attachment of project vehicles with other officers/offices/consultants and ensuring their return to respective projects and recovery of O&M cost from the concerned users without further delay besides fixing of responsibility on persons allowing this misuse.

1.5.59 Loss on account of missing distribution transformers from the Composite Model Village, Harpan Das - Rs.65.425 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of accounts of the PD, DBDP for the period from July, 2022 to June, 2023, it was observed that a contract for external electrification of Composite Model Village-II, Harpan Das was awarded to M/s Ali & Co. on November 10, 2016 at a contract price of Rs.408.244 million. As per contract, an amount of Rs.65.425 million was paid to the contractor for installation of 62 distribution transformers of different capacities. However, during physical site visit, it was found that all the transformers of the model village were missing but neither FIR was lodged by the management nor departmental inquiry was conducted to probe into the matter and to fix responsibility for loss.

Non-adherence to the aforementioned guidelines resulted in loss of Rs.65.425 million on account of missing distribution transformers up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends that the management needs to inquire the matter at appropriate level for fixing of responsibility and making good the loss.

(Draft Para No.306/2023-24)

E. Management of Accounts with Commercial Banks

1.5.60 Undue favour to the bank due to investment of funds without fulfilling the evaluation criteria - Rs.10,000 million

According to special term of Request for Proposal (RFP) for placement of funds dated December 02, 2022, the banks were requested to quote the best possible profit rate with special term of ‘premature encashment after six months without penalty’. As per evaluation criteria for bid, WAPDA will place funds for one-year tenure with the condition of pre-mature encashment after six months without penalty with bank who has quoted highest profit rate in its bid proposal.

During audit of accounts of the GM (Finance) Power for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.10,000 million was invested with Bank Alfalah at a profit rate of 17.11% per annum on December 19, 2022. Further scrutiny of record revealed that the said bank quoted profit rate without allowing premature encashment after six months without penalty. As per RFP & evaluation criteria of bid, the banks were required to quote profit rate with a special term of ‘pre-mature encashment after six months without penalty’ but bid of the said bank was accepted without this condition. Audit held that investment of funds with Bank Alfalah without fulfilling the evaluation criteria was irregular and undue favour to the bank.

Non-adherence to the special term of RFP & evaluation criteria resulted in undue favour to the bank due to investment of funds amounting to Rs.10,000 million without fulfilling the criteria during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management replied that rates were quoted by the banks as per their policy and Investment Board of WAPDA, after due deliberation, decided to accept the offer of the highest bidder.

The reply was not tenable because accepting of bid without fulfilling all the conditions was irregular.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify investment of funds with the bank without meeting the conditions of RFP and evaluation criteria besides fixing responsibility for such decision.

(Draft Para No.417/2023-24)

1.5.61 Unjustified payment of mark-up/rental payments - Rs.3,631.088 million

According to Para-5 (vi) of Essentials and Model Agreements for Islamic Modes of Financing (Musharakah) issued by SBP, “It is not allowed to fix a lump sum amount for any of the partners, or any rate of profit tied up with his capital”.

During audit of accounts of the GM (Finance) Power for the period from July, 2022 to June, 2023, it was observed that a financing agreement of Rs.144 billion was signed between WAPDA and a syndicate of different banks for DHPP. It was further observed that a part of this financing facility was through

issuance of Sukuk bonds for Rs.52,800 million and an amount of Rs.3,631.088 million was paid on account of mark-up/rental payments on Sukuk bonds @ KIBOR plus 1.45%. As per guidelines issued by the SBP, tying up any rate of profit with the capital contributed by any of the partners was not allowed in a Musharakah agreement. Moreover, mechanism adopted for raising funds and their further distribution into Islamic as well as conventional modes was not available in the record. Audit held that payment of profit/mark-up at fixed rate was against the guidelines issued by the SBP and not justified.

Non-adherence to the guidelines issued by the SBP resulted in unjustified payment of mark-up/rental payments amounting to Rs.3,631.088 million during the FY 2022-23.

The matter was taken up with the management in August, 2023. The management replied that the purpose of Musharakah was to jointly own the Musharakah Assets for co-ownership under the diminishing Musharakah agreement dated March 29, 2017 (Clauses-1.1.1 & 1.1.2). However, earning model was based on rental income as per rental model issued by the SBP and rent had to be fixed which was connected with floating KIBOR rate. So, the rental payment was fixed as per payment agreement at the benchmark rate of KIBOR plus margin.

The reply was not acceptable as tying up any rate of interest (KIBOR in this case) was in violation of guidelines issued by SBP and basic essence of Islamic modes of financing. Moreover, use of rental income model was also unjustified as rental income model was used in Ijarah agreement, whereas, basic principle of a Musharakah agreement was sharing of profit or loss.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify mechanism adopted for raising funds and their further distribution into Islamic as well as conventional modes besides fixing responsibility for payment of profit/rental @ KIBOR plus 1.45%.

(Draft Para No.438/2023-24)

1.5.62 Loss of profit due to delay in transfer of funds and commencement of bidding process for opening of a new bank account - Rs.30.895 million

According to GM (Finance) Power's office letter No.GMF(P)/M(HQ)P/ BnK/2070 dated May 6, 2021 regarding RFP for opening of Special Saving Accounts, there was no condition regarding withdrawal of offered rate by the banks with three months prior notice. As per Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of accounts of the GM (Finance) Power for the period from July, 2022 to June, 2023, it was observed that a RFP for opening of Special Savings Account for depositing of Rs.70 billion (approx.) was issued to different banks on May 06, 2021. In response to RFP, United Bank Limited (UBL) offered profit rate of one month KIBOR – 0.15% on May 21, 2021. The management, after bid evaluation,

conveyed approval for opening of bank account to UBL on May 27, 2021. On September 29, 2021, the bank offered a revised interest rate of one month KIBOR-0.85% w.e.f. October 01, 2021 and informed that if the new rate was not acceptable to WAPDA, then the same be considered notice for withdrawal on agreed terms starting from September 29, 2021 to December 27, 2021. The management initiated the process for opening of a new bank account and RFP was issued to different banks on November 05, 2021. The bids were opened on November 19, 2021 and the bid evaluation committee recommended opening of a new bank account with National Bank of Pakistan (NBP) at offered rate of one month KIBOR+0.01%. The approval for opening of bank account was conveyed to NBP on November 22, 2021 i.e. 17 days after issuance of RFP. It was observed that initially the conditional offer of UBL was accepted by the management and subsequently process for opening of a new bank account was initiated in November, 2021 instead of October, 2021. Moreover, funds amounting to Rs.67 billion were transferred from UBL to NBP on December 23, 2021 with a delay of 31 days. Further, amount of profit of Rs.2.148 million for the month of March, 2022 was also kept in same bank up to March 15, 2023. Audit held that if the process for opening of a new bank account had been initiated on October 01, 2021, then new bank account would have been opened on October 18, 2021 (17 days after issuance of requests for proposal) and profit of Rs.11.395 million could have been earned due to differential interest rates of UBL & NBP. Moreover, due to delay in transfer of funds and profit thereon from UBL to NBP, profit of Rs.19.500 million was also less earned. No responsibility for the loss of Rs.30.895 million due to delay in opening of a new bank account and transfer of funds was fixed.

Non-adherence to the Authority's instructions resulted in loss of Rs.30.895 million due to less earning of profit owing to delay in opening of a new bank account and transfer of funds up to FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that it was not a case of opportunity profit because offered rate of NBP was not available on November 01, 2021. Further, upon opening of bank account with NBP, major chunk of the Green Euro Bond was immediately transferred from UBL. However, due to pending foreign currency payments (tagged with UBL) for want of SBP's approval, the equivalent amount in PKR was kept with UBL for smooth execution of FEC payments.

The reply was not acceptable because there was a delay of more than one month in initiating new bidding process and even after opening of a new bank account, there was also a substantial delay in transfer of funds.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter for fixing responsibility of loss due to delay in opening of a new bank account and transfer of funds upon the person (s) at fault.

(Draft Para No.161 & 434/2023-24)

1.5.63 Potential loss on account of interest income due to non-availing of special term for premature encashment after six months - Rs.19.660 million

According to RFP for placement of funds for one-year, there was a special term of 'premature encashment after six months without penalty'. As per Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of accounts of the GM (Finance) Power for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.10,000 million was invested with Bank Alfalah at a rate of 16.41% per annum on June 29, 2022 with one-year maturity period and with condition of no penalty on premature encashment after six months. Further probe into the matter revealed that SBP revised its policy rate on January 24, 2023 from 16 % to 17 % per annum. The management did not avail the special term regarding premature encashment after six months without penalty and reinvesting the same on higher prevailing interest rate. Audit held that after revision of interest rate by the SBP, these funds should have been en-cashed and reinvested at a higher rate but needful was not done which resulted in a loss of Rs.19.660 million (approx.) for which no responsibility was fixed.

Non-adherence to the Authority's instructions resulted in potential loss of Rs.19.660 million on account of interest income due to non-availing of special term for premature encashment after six months during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in December, 2023. The management replied that due to increase in policy rate by SBP, the rate was increased by bank from 16.41% to 21.40% on April 14, 2023 till maturity and handsome amount of profit was earned.

The reply was not acceptable because the management failed to take prudent investment decision timely.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify non-encashment of funds despite availability of special term of 'no penalty for premature encashment after six months' and reinvestment of funds at higher rates of profit.

(Draft Para No.418/2023-24)

F. HR/Employee related Issues

1.5.64 Unjustified expenditure due to irregular replacement of Project Manager and Deputy Project Manager of consultants - Rs.307.488 million

According to Clause-30.1 of CSC, “except as the client may otherwise agree in writing, no changes shall be made in the Key Expert”. As per Clause-30.2, “notwithstanding the above, the substitution of Key Experts during contract execution may be considered based on the consultants’ written request and due to circumstances outside the reasonable control of the consultants, including but not limited to death or medical incapacity. In such case, the consultants shall forthwith provide as a replacement, a person of equivalent or better qualifications and experience, and at the same rate of remuneration”. As per Clause-3(c)(iii) of the RFP, “a consultant (including its Experts and Sub-consultants) that has a close business or family relationship with a professional staff of the borrower (or of the client, or of implementing agency, or of a recipient of a part of the bank’s financing) who are directly or indirectly involved in any part of (i) the preparation of the terms of reference for the assignment, (ii) the selection process for the contract, or (iii) the supervision of the contract, may not be awarded a contract, unless the conflict stemming from this relationship has been resolved in a manner acceptable to the Bank throughout the selection process and the execution of the contract”.

During audit of accounts of the PD, T5HPP for the period from July, 2022 to June, 2023, it was observed that a CSC was awarded to M/s Mott MacDonald Limited on April 13, 2019. As per CSC, the consultants proposed Mr. Fidencio Mendez (existing Project Manager of T4HPP) as Project Manager. After award of contract, the consultants failed to place the nominated Project Manager and on April 19, 2021, the consultants requested replacement of Mr. Fidencio Mendez with Mr. Mark Gill on temporary basis for a period of 6-12 months. As per evaluation of curriculum vitae (CV) of Mr. Mark Gill, he did not meet the criteria required for the said post. However, contrary to the CSC, the management granted approval to appoint Mr. Mark Gill on temporary basis for a period of six months w.e.f. May 21, 2021 which was extended time to time on six months basis up to May 29, 2023 and the last extension was given without any time frame till the appointment of a permanent Project Manager. Similarly, Mr. Anser Warraich (Ex- GM-Tarbela Dam Project) was appointed as Deputy Project Manager of the consultants with the approval of project authorities. The said officer was granted relaxation of rules regarding joining of consultancy firm before completion of two years’ after retirement by the Member (Water) WAPDA. As per his CV, he neither possessed overall 15 years’ construction management experience nor at least five years’ experience as Project Manager/ Construction Manager on mega hydropower projects. Moreover, the said officer was also a Member of Evaluation Committee involved in hiring of the same consultants M/s Mott MacDonald for the project, therefore, conflict of interest could not be ruled out. Moreover, appointment of less experienced Project Manager and Deputy Project Manager may have serious implications for the project. Audit held that replacement/appointment of Project Manager and Deputy Project Manager in violation of provisions of CSC was irregular, hence, expenditure of Rs.307.488 million incurred on their remuneration was not justified.

Non-adherence to the provisions of CSC resulted in unjustified expenditure of Rs.307.488 million due to irregular replacement of Project Manager and Deputy Project Manager of the consultants up to the

FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that approval for replacement of Project Manager and Deputy Project Manager was granted on the basis of proposals of the consultants in the best interest of project.

The reply was not acceptable because proposals for replacement of these key personnel were accepted by the management contrary to the provisions of CSC.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify appointment of Project Manager and Deputy Project Manager in violation of provisions of CSC besides fixing responsibility.

(Draft Paras No.379 & 381/2023-24)

1.5.65 Irregular expenditure on engagement of staff on daily wages basis - Rs.288.667 million

According to Para-(a) of Officer Order regarding instructions on Recruitment/Appointment/Posting dated May 06, 2023, cases to initiate all modes of recruitment/appointment (including regular/contract/temporary/daily wages/ contingent/adhoc/locum etc.) for all posts in BPS-1 to 20 be concurred by concerned Member before submitting for final approval of Chairman WAPDA through HR Division. After Chairman's approval, concerned formations shall complete the recruitment process by preparing the draft advertisement containing job specification/quota position and vacancy statement as per relevant service rules of the posts against direct induction and refer to Recruitment Cell for further processing. As per Revised Daily Wages/Contingent Based Appointment Policy of WAPDA circulated on December 15, 2017, the daily wages staff will not be engaged when the channel for regular recruitment is open. Moreover, concerned CEs/GMs will recommend cases for engagement of staff on daily wages basis with the detailed need analysis vis-à-vis available work force keeping in view the objectivity and fairness. Government of Pakistan (GoP) Guidelines for observing of regional/provincial quota will be generally applied for engagement of staff against regular sanctioned posts.

During audit of accounts of various formations of WAPDA for the period from July, 2020 to June, 2023, it was observed that officials of different categories were hired on daily wages/contingent basis against sanctioned and non-sanctioned posts for a period of 89 days which was continuously extended. These appointments were made on pick and choose basis without adopting any selection criteria/procedure despite the fact that there was no permanent ban on regular recruitments. Hence, an expenditure of Rs.288.667 million incurred on account of pay of daily wages staff was held irregular. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount

1	PD, Surface Water Hydrology Project	32/2023-24	144.951
2	RE, Gomal Zam HPS	35/2023-24	6.197

12	PD, Building Circle	431/2023-24	8.082
TOTAL			288.667

Non-adherence to the aforementioned recruitment policies of WAPDA resulted in an irregular expenditure amounting to Rs.288.667 million incurred on pay of daily wages staff up to the FY 2022-23.

The matter was taken up with the management during February to October, 2023 and reported to the Ministry during October to December, 2023. The management replied that daily wages/contingent based employees against sanctioned and non-sanctioned posts were appointed after obtaining approval from concerned Member on need basis.

The reply was not acceptable because daily wages staff was hired on pick & choose basis without following any recruitment method/mechanism to ensure fairness and opportunity for all.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and

January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify engagement of daily wages staff without advertisement and continuous extensions in their services in violation of recruitment policies besides formulation of a merit based transparent recruitment/appointment policies and rules thereon to ensure that equal employment opportunity is offered to all.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2017-18, 2018-19 & 2020-21 vide Paras No.1.3.19 & 2.4.51/2017-18, 2.4.61/2018-19 and 1.5.53 & 1.5.57/2020-21 having financial impact of Rs.201.140 million. Recurrence of same irregularity is a matter of serious concern.

1.5.66 Unjustified employment of WAPDA security personnel for DHPP having huge financial implications - Rs.232.680 million

According to Clause-17.1 (3) of WAPDA Budget Manual, “budget estimates are prepared on the basis of nominal roll, sanctioned strength and last three years’ actual expenditure. The expenditure budget includes pay & allowances of officer & staff, travelling allowance, honoraria/reward, employer charges (pension fund & GLI), medical charges (hospitalization, consultant’s fee, medicine drugs & dressing etc.)”.

During audit of accounts of the PD, DHPP for the period from July, 2022 to June, 2023, it was observed that sanctioned strength of WAPDA security staff was 160, including security inspector, security sergeants and security guards. In January, 2023, 106 newly recruited sergeant and security guards were posted against vacant sanctioned posts. It was further observed that 462 security personnel, newly recruited on lump sum basis, were also placed at the disposal of DHPP in the months of May, June and August, 2023. It is worth mentioning here that WAPDA security officials were deputed on gates of office buildings, hostels, etc. for which 135 personnel were already available. Moreover, for the purpose of security of project sites, security of contractors and consultants’ staff during travel, 946 personnel of Dir Scouts, Frontier Constabulary (FC) and Police had also been engaged. Audit held that hiring of additional 462 WAPDA security personnel, without any requisition/demand by the project and beyond sanctioned strength, having significant financial implication of Rs.232.680 million was not justified.

Non-adherence to the provisions of WAPDA Budget Manual resulted in unjustified employment of security personnel with annual financial impact of Rs.232.680 million during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in December, 2023. The management replied that Director Security WAPDA vide letter dated November 23, 2022 intimated that Chairman WAPDA had given principle approval for raising a Battalion size force of 655 persons to replace FC Platoons. The project office only initiated the case as per instructions received from Director Security and was not involved in recruitment and posting of security personnel.

The reply was not acceptable because security staff was hired and posted in excess of sanctioned strength.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify employment of additional security staff at the project without sanctioned posts and need analysis.

(Draft Para No.397/2023-24)

1.5.67 Unjustified grant of different allowances to the employees contrary to the directions of Finance Division - Rs.89.260 million

According to Finance Division’s (Regulations Wing) office memorandum No.F.1(1)Imp/94 dated June 26, 1999 regarding revision of salaries, allowances and perquisites of the supervisory and executive staff of public sector corporations, autonomous/semi-autonomous bodies, “it has been decided that such revisions may be carried out by the respective Boards of Directors/ Governors of these organizations. Such revision should invariably be tagged with the financial position of the respective organizations. Clearance from Finance Division would, however, be necessary to ensure a rational basis and a degree of uniformity in such revisions”. As per Finance Division’s (Regulation Wing) office memo No.F.4(3)R-4/2011-Revision dated August 04, 2017, “it is binding upon all the administrative Ministries/Divisions of semi-autonomous, autonomous bodies/corporations to ensure that any changes in pay, allowances and privileges of executive/supervisory staff of the semi-autonomous, autonomous bodies/corporations working under their administrative control are processed in accordance with the Finance Division’s O.M No.F.1(1)Imp/94 dated June 26, 1999”.

During audit of accounts of various formations of WAPDA for the period from July, 2020 to June, 2023, it was observed that an amount of Rs.89.260 million was paid to the officers/officials on account of different allowances approved by WAPDA Authority. Audit held that grant of these allowances was not justified as the same were allowed by WAPDA Authority contrary to the directions of the Finance Division. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	GM, (Hydro) Planning	15/2023-24	20.269
2	GM, (Finance) Coordination	27/2023-24	1.754
3	Director (Services & Estate)	44/2023-24	4.721
4	GM, (Finance) Power	63/2023-24	0.530
5	PD, K-IV Project	102/2023-24	2.980
6	CE, (O&M), Hydel Besham	125/2023-24	7.217

7	CE (Civil), Ghazi Barotha Hydropower Project	199/2023-24	2.050
8	PD, NGDP	209/2023-24	22.927
9	CE, Ghazi Barotha Power Complex	230/2023-24	26.229
10	RE (Civil), Mangla	249/2023-24	0.583
TOTAL			89.260

Non-adherence to the instructions of Finance Division resulted in unjustified expenditure of Rs.89.260 million on grant of different allowances to the employees up to the FY 2022-23.

The matter was taken up with the management during March to September, 2023 and reported to the Ministry during July to November, 2023. The management replied that these allowances were granted to the employees after approval of WAPDA Authority.

The reply was not acceptable because as per instructions of Finance Division dated June 26, 1999, clearance from Finance Division (GoP) was necessary. Moreover, DAC in its earlier meetings held on December 08, 17-19 & 28-29, 2020, December 08, 09, 20 & 21, 2022, January 16-17 and February 9-10, 2023 directed the management to refer all such paras pertaining to pay & allowances to Finance Division through MoWR for obtaining clarification which was not done.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify grant of these allowances without clearance besides seeking approval/clarification from the Finance Division as decided in earlier DAC meetings.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2020-21 & 2022-23 vide Paras No.1.5.52 & 1.5.73 having financial impact of Rs.627.300 million. Recurrence of same irregularity is a matter of serious concern.

1.5.68 Irregular/excess payment of overtime claims to the employees at double rate - Rs.37.357 million

According to Superintending Engineer (SE) office order No.4609-13/SE/SH/ G-8(N) dated November 18, 2014, the admissibility of the overtime may be recommended/sanctioned in condition that maintenance section crew should have worked more than 48 hours in a week. Certificate for performing duty more than 48 hours in a week by the concerned officer may also be given on every claim. As per Clause-47 of Pakistan Factories Act, 1934, where a worker in a non-seasonal factory works for more than

nine hours in a day or for more than 48 hours in a week, he shall be entitled in respect of overtime worked to pay at the rate of twice his ordinary rate of pay.

During audit of accounts of the SE, SHPS, Mangla along with attached power stations for the period from July, 2018 to June, 2023, it was observed that an amount of Rs.37.357 million was paid to the employees of different power stations as overtime at double rate . As per Pakistan Factories Act, 1934, overtime at double rate would be admissible where a worker in a non-seasonal factory works for more than nine hours in a day or for more than 48 hours in a week whereas the duty of WAPDA employees was eight hours per day and 40 hours per week. Moreover, certificate for performing duty for more than 48 hours in a week by the concerned officer was also not attached with the claims. Hence, payment of overtime claims to the employees at double rate without fulfilling the conditions and in violation of rules was irregular.

Non-adherence to the aforementioned instructions resulted in irregular/ excess payment of Rs.37.357 million on account of overtime claims at double rate up to the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that the matter would be resolved after taking up with the concerned authority.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify the payment of overime claims at double rate in violation of rules besides ensuring its recovery from the concerend employees.

(Draft Para No.244/2023-24)

1.5.69 Non-recovery of penalty imposed upon WAPDA's ex-employee on account of breach of service contract - Rs.16.784 million

According to letter No.GM(C&M)/W/DAW/Inqr-235-B/2022/E-1/ 12493-98 dated October 27, 2022, Member (Water) WAPDA has decided to enhance the major penalty i.e. 'Removal from Service' to 'Dismissal from Service' under Pakistan WAPDA Employees Efficiency and Disciplinary (E&D) Rules, 1978 upon Mr. Wassay Gulraiz, the then Deputy Director, w.e.f. January 01, 2018 along with recovery of Rs.16.784 million as liquidated damages.

During audit of accounts of the GM (Finance) Coordination for the period from July, 2021 to June, 2022, it was observed that a major penalty of dismissal from service along with recovery of Rs.16.784 million for breach of service contract was imposed upon Mr. Wassay Gulraiz with the approval of Member (Water) WAPDA. The amount was required to be recovered either from the employee or from his sureties, which was not done.

Non-adherence to the Authority's instructions resulted in non-recovery of Rs.16.784 million on account of penalty imposed upon WAPDA's ex-employee due to breach of service contract during the FY 2021-22.

The matter was taken up with the management in March, 2023 and reported to the Ministry in August, 2023. The management replied that the deduction would be made from forthcoming invoice of the consultants

No further progress was communicated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to obtain comments from concerned department and ensure recovery of amount of penalty from the ex-officer without further loss of time.

(Draft Para No.29/2023-24)

1.5.70 Non-recovery from the consultants due to unjustified replacement of Project Manager/Team Leader - Rs.10.669 million

According to Clause-4.5 (a) of CSA, “except as the client may otherwise agree, no changes shall be made in the key personnel. If for any reason beyond the reasonable control of the consultants, it becomes necessary to replace any of the key personnel, the consultants shall provide as a replacement a person of equivalent or better qualifications”.

During audit of accounts of the PD, Harpo Hydropower Project, Skardu for the period from July, 2022 to June, 2023, it was observed that a contract for procurement of consulting services for detailed engineering design, preparation of tender documents and support of the owner for the construction supervision was awarded to M/s Harpo Consultants JV at a contract price of Rs.936.47 million. Further scrutiny of record revealed that one key personnel (Mr. Rainer Gotz) was replaced with Mr. Predrag Djajic as Project Manager/Team Leader. Due to less experience of new Project Manager, the consultants had also agreed for reduction in his monthly remuneration rate. However, an amount of Rs.10.669 million (Euro 31,548) on account of difference in remuneration rates was not recovered from the consultants. Moreover, appointment of less experienced Project Manager may have serious implications for the project.

Non-adherence to the provision of CSA resulted in non-recovery of Rs.10.669 million from the consultants due to unjustified replacement of Project Manager/Team Leader during the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed reply would be submitted after scrutiny of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to ensure recovery of amount in question from the consultants without further loss of time.

(Draft Para No.127/2023-24)

G. Value for Money and Services Delivery Issues

1.5.71 Wasteful expenditure on permanent plugging of the lower intake of the powerhouse - Rs.1,091.830 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), “all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”. Moreover, the International Panels of Experts (IPoEs) during their meeting dated January, 2014 proposed that simultaneous use of two intakes was fraught with danger and should be re-evaluated.

During audit of accounts of the PD, T4HPP for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.1,091.830 million was paid to the contractor for permanent concrete plugging of Tunnel No.3&4 of lower intake through VO No.43. As per original design of the project, there was no provision for operation of lower intake but project authorities proceeded for operation of lower intake contrary to the recommendations of IPoEs which were also reaffirmed by Review Mission of World Bank (May 03, 2017 to May 26, 2017). Later on, the decision was changed and an amount of Rs.1,091.830 million was incurred on permanent plugging of the lower intake. Audit held that as there was no provision for operation of lower intake in the original contract, therefore, expenditure incurred on plugging of the same was wasteful for which no responsibility was fixed.

Contract mismanagement resulted in wasteful expenditure of Rs.1,091.830 million on permanent plugging of lower intake of the powerhouse up to the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consulting the record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends that the management needs to hold a high level inquiry in the matter to determine responsibility for this wasteful expenditure.

(Draft Para No.267/2023-24)

H. Others

1.5.72 Generation loss due to delay in completion of restoration works of Tailrace Tunnel - Rs.26,843 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), “all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved”.

During audit of accounts of the CEO, NJHPC for the period from July, 2021 to June, 2023, it was observed that TRT of the project experienced damages and blockage that forced complete shutdown of the powerhouse on July 6, 2022. The contract for restoration works was awarded to M/s CGGC on August 25, 2022 with commencement date of August 27, 2022. As per contract, the stipulated completion period was 180 days (up to February 23, 2023) but the restoration work was much delayed. The delay in restoration of work was evident from all the linked correspondence, where both the management and consultants repeatedly expressed concerns about slow progress of work by the contractor. However, due to negligence/slow progress by the contractor, the restoration work could not be completed up till July 31, 2023 and the company sustained a generation loss of 2,944 million units (approx.) amounting to Rs.26,843 million for which no responsibility was fixed.

Non-adherence to the aforementioned guidelines resulted in a generation loss of Rs.26,843 million due to delay in completion of restoration works of TRT during the FY 2022-23

The matter was taken up with the management in August, 2023 and reported to the Ministry in October, 2023. The management stated that detailed response would be submitted after consultation of record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter at a higher level for fixing responsibility for delay in completion of work and generation loss.

(Draft Para No.106/2023-24)

1.5.73 Generation loss due to non-removal of operational constraints of Golen Gol Hydel Power Station on permanent basis - Rs.1,447.690 million

According to Clause-1.1 (b) of the PPA, “WAPDA Power Stations can withstand a full load rejection and remain in a safe operating condition and WAPDA Power Stations’ auxiliaries will be kept in operating conditions continuously. Further, WAPDA Power Stations can be re-synchronized within thirty (30) minutes provided that the reason for the load rejection has been removed and no differential protection or any other protections warranting thorough checking/investigation of the equipment have operated”.

During audit of accounts of the RE, GGHPs for the period from July, 2018 to June, 2023, it was

observed that as per installed capacity of 108 MW, the power station was supposed to generate 3,624.515 million energy units but the actual generation during last five years was only 569.234 million units. Out of total 112,224 available hours during last five years, the generating units remained under operation only for 44,993 hours and were kept in standby position for 58,080 hours. As such 3,055.281 million energy units were less generated which resulted in a revenue loss of Rs.1,447.690 million. The main reasons for less generation were running of the power plant on partial load/isolation mode due to repeated faults in the 132KV transmission lines and accumulation of debris and boulders in weir & intake area of the power house. Further, after completion of work, 132KV transmission line was required to be handed over to Peshawar Electric Supply Company (PESCO) for further O&M but needful was not done.

Non-adherence to the conditions of the PPA resulted in generation loss of Rs.1,447.690 million due to non-removal of operational constraints on permanent basis during the FY 2022-23.

The matter was taken up with the management in October, 2023 and reported to the Ministry in November, 2023. The management stated that detailed reply would be submitted after consulting the record.

No further reply was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify non-removal of operational constraints of powerhouse on permanent basis besides fixing responsibility for generation loss.

(Draft Para No.346/2023-24)

1.5.74 Loss due to late award of contract for rectification works - Rs.639.075 million

According to PD, Gomal Zam Dam Project (GZDP) office letter No.DK/CE&PD/GZDP/811-13 dated March 04, 2016, the formal TOC of works was issued effective from June 15, 2013 with punch list. As per Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of accounts of the PD, GZDP for the period from July, 2021 to June, 2023, it was observed that TOC of the project was issued to the contractor M/s FWO on March 04, 2016 effective from June 15, 2013. As per punch list, critical items of works/tests were required to be executed and performed within one month except station/local transformers which were to be replaced within six months after issuance of TOC, within extended DNP up to June 15, 2016 or till every item of the punch list was executed and performed by the contractor. Later, major faults occurred in the generating units of powerhouse in October, 2016 and the matter was brought to the notice of sub-contractor M/s Sinohydro Corporation who instead of giving attention to the removal of faults requested for a high level meeting for contract closure. Due to non-responsive behavior of the sub-contractor, main contractor M/s FWO

notified on November 08, 2016 to execute/rectify the works on the risk & cost of sub-contractor with the condition that prior to execution, cost of work would be shared with them. WAPDA Authority accorded approval for repair of Unit No.1 (TG-1) on October 20, 2020 at estimated cost of Rs.481 million. The bid for repair of TG-1 was opened on April 16, 2021 and the work was awarded to M/s AFI-ZOEC JV on March 29, 2022 but rectification work could not be started until June 30, 2023. It was further observed that after handing over of the irrigation component of the project to the provincial government during 2020, the project office could not be closed due to delay in rectification works of TG-1 and an expenditure of Rs.639.075 million was incurred on account of project management expenses during last three years. Audit held that the said expenditure could have been avoided in case faults occurred in 2016 had been rectified till 2020.

Poor contract management resulted in a loss of Rs.639.075 million on account of expense of project office due to late award of contract for rectification works of generating unit up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that after award of contract, delay occurred due to restrictions on Letter of Credit (LC) in foreign currency.

The reply was not acceptable because the contract was awarded after delay of six years whereas restrictions on opening of LC were imposed in the year 2022. It was evident that no strenuous efforts were made for timely rectification of defective unit of powerhouse.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter for fixing responsibility of delay in rectification of faults of powerhouse resulting in such a huge loss.

(Draft Para No.316/2023-24)

1.5.75 Generation loss due to inordinate delay in rectification of faults of Unit No-2 of CHPS - Rs.308.868 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved".

During audit of accounts of the RE, CHPS for the period from July, 2022 to June, 2023, it was observed that some faults were observed in Unit No.2 of power house in November, 2016. The contract for repair work was awarded to M/s Voith Hydro, Germany on February 19, 2020 with a delay of more than three years. The contractor mobilized at site in March, 2021 but the generating unit could not be rectified so far. It was evident that work order for procurement of equipment and rectification of faults was not awarded timely due to inefficient role on the part of management which caused generation loss

of 201.480 million energy units amounting to Rs.308.868 million (approx.), for which no responsibility was fixed.

Operational mismanagement resulted in generation loss of Rs.308.868 million due to inordinate delay in rectification of fault of Unit No.2 of powerhouse up to the FY 2022-23.

The matter was taken up with the management in August, 2023 and reported to the Ministry in November, 2023. The management replied that the importance of the issue was informed to the head office. Further, the matter would be taken up with WAPDA Authority.

No further progress was furnished till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter regarding delay in award of contract for rectification of generating unit besides fixing the responsibility for the generation loss.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2021-22 & 2022-23 vide Paras No.1.5.65 & 1.5.79 having financial impact of Rs.1,811.304 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.280/2023-24)

1.5.76 Generation loss due to delay in repair/rectification of generating unit of GZHPS - Rs.265.267 million

According to Section-III (1) of WAPDA Guidelines for Enforcing Responsibility for Losses due to fraud, theft or negligence of Individuals, 1982 (amended to date), "all losses, whether of public money or of stores, shall be subjected to preliminary investigation by the officer in whose charge they were, to fix the cause of the loss and the amount involved. Besides initiating disciplinary action against the employees held responsible for the loss, they should also be allowed to make good the loss".

During audit of accounts of the RE and PD, GZDP for the period from July, 2021 to June, 2023, it was observed that generating Unit-1 of power house remained under forced shutdown due to major faults since October, 2016. The faults occurred during defects liability period and the contractor vide letter dated November 08, 2016 offered WAPDA to carry out its repair/rectification work at his risk & cost. The rectification work of generating unit could not be completed by WAPDA till June 30, 2023. Due to delay in repair/rectification of generation unit, a revenue of Rs.265.267 million (approx.) on account of power generation could not be earned during last two years, which was loss to the Authority, however, no responsibility was fixed for the loss.

Non-adherence to aforementioned guidelines resulted in generation loss of Rs.265.267 million due to delay in repair/rectification of generating unit up to the FY 2022-23.

The matter was taken up with the management in March & August, 2023 and reported to the Ministry in July & December, 2023. The management replied that contract for rectification work had been awarded at the risk & cost of

M/s FWO and process for inland LC is under way. After opening of LC, the work would be started on war footing basis and would be completed within stipulated time.

No further progress was intimated till finalization of Audit Report.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify delay in rectification of faults of power house besides fixing responsibility of generation loss.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2020-21 & 2021-22 vide Paras No.1.5.9 & 1.5.70 having financial impact of Rs.1,320.570 million. Recurrence of same irregularity is a matter of serious concern.

(Draft Para No.16 & 419/2023-24)

1.5.77 Unjustified payment of incentive to the employees of provincial government - Rs.94.323 million

According to PC-Is of MDHP and DHPP, there are no provision for payment of monthly incentive package to the employees of District Government (KPK Government). As per directions of PAC conveyed by the Cabinet Division (GoP) vide office memorandum No.1/1/2011-A/Cs-III dated March 26, 2011, “there should be no deviation from the approved PC-I of the projects in any respect being implemented by the Federal Ministries/Divisions and its attached departments/autonomous bodies”.

During audit of accounts of two formations of WAPDA for the period from July, 2022 to June, 2023, it was observed that an amount of Rs.94.323 million was paid to different officers/officials of offices of the Commissioner Hazara Division, District Administration, District Police Office, Executive Engineer (Communication & Works), Agricultural Department, Forest Division, Law Department and District Accounts Office etc. on account of incentive package equal to one basic pay per month (12 basic pay per annum). As per approved PC-Is of MDHP and DHPP, there were neither any provisions nor any rule for making such payment of incentive package to the employees of provincial government by WAPDA. Audit held that payment of monthly incentive package to the employees of provincial government without provisions in PC-Is and contrary to the instructions of PAC was not justified. The detail is as under:

(Rs. in million)			
Sr. No.	Name of Formation	DP No.	Amount
1	PD, MDHP	143/2023-24	4.878
2	PD, DHPP	338/2023-24	89.445
TOTAL			94.323

Non-adherence to the provisions of PC-Is and directions of PAC resulted in an unjustified payment of Rs.94.323 million on account of incentive to the employees of provincial government during the FY 2022-23.

The matter was taken up with the management in August & September, 2023 and reported to the Ministry in November, 2023. The management replied that incentive was paid to the concerned employees of provincial government in acknowledgement of their efforts in acquisition of land with the approval of WAPDA Authority and its provision would be included in revised PC-Is.

The reply was not acceptable because monthly incentive was paid to the employees of provincial government in violation of PC-Is and the directives of the PAC.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to justify payment of incentive package to the employees of provincial government in the absence of any provisions in PC-Is and in violation of the directives of PAC besides ensuring its recovery from the concerned quarters.

Note: The issue was also reported earlier in the Audit Report for the Audit Year 2022-23 vide Para No.1.5.84 and MFDAC Report for the Audit Year 2021-22 vide Paras No.1.32 & 1.150 having financial impact of Rs.284.428 million. Recurrence of same irregularity is a matter of serious concern.

1.5.78 Wasteful expenditure due to unlawful purchase of Camouflage Combat Dress for WAPDA security staff - Rs.21.710 million

According to Rule-6(1)(a) of the Official Secrets Act, 1923, if any person for the purpose of gaining admission or of assisting any other to gain admission to a prohibited place or for other purpose prejudicial to the safety of the state uses or wears, without lawful authority, any naval, military, air force, police or other official uniform, or any uniform so nearly resembling the same as to be calculated to deceive, or falsely represents himself to be a person who is or has been entitled to use or wear any such uniform, he shall be guilty of an offence under this section. As per Rule-6(3), a person guilty of an offence under this section shall be punishable with imprisonment for a term which may extend to two years, or with fine, or with both.

During audit of accounts of the PD, DHPP for the period from July, 2022 to June, 2023, it was observed that a purchase order for procurement of Camouflage Combat Dress (CCD) for WAPDA Security Force was issued by the GM (Security) WAPDA on June 01, 2023 at a contract price of Rs.21.710 million. It was further observed that an amount of Rs.20 million out of funds of DHPP was paid to the GM (Finance) Coordination WAPDA for the said procurement. However, while placing the purchase order, aforementioned provisions of the Official Secrets Act, 1923 were not kept in view and No Objection Certificate was also not obtained from Ministry of Interior (GoP). Later on, all the formations were directed by the Security Directorate WAPDA vide office letter dated August 23, 2023 to discontinue wearing of CCD uniforms forthwith. Audit held that purchase of CCD uniforms, in violation of Official Secrets Act was unlawful and restriction on subsequent wearing of this uniform

caused wastage of resources for which no responsibility was fixed.

Non-adherence to provisions of the Official Secrets Act, 1923 resulted in wasteful expenditure of Rs.21.710 million due to unlawful purchase of CCD uniforms for WAPDA security staff during the FY 2022-23.

The matter was taken up with the management in September, 2023 and reported to the Ministry in November, 2023. The management replied that WAPDA Authority accorded approval for purchase of CCD uniforms and an amount of Rs.20 million was transferred on the request of GM (Finance) Coordination. Moreover, GM Security WAPDA had been approached regarding the audit observation.

The reply was not acceptable because CCD uniforms were purchased in violation of Official Secrets Act which was unlawful. Moreover, its payment from DHPP was unjustified and wasteful.

The PAO was requested to schedule a DAC meeting vide this office letters dated December 15 & 19, 2023. Subsequently, as per procedure, two reminders were also issued on December 27, 2023 and January 09, 2024, however, DAC meeting could not be scheduled.

Audit recommends the management to inquire the matter at the level of MoWR for fixing of responsibility for recovery of wasteful expenditure incurred on unlawful purchase of uniforms from the funds of DHPP.

(Draft Para No.328/2023-24)

CHAPTER-2

Impact Audit of Neelum Jhelum Hydropower Project, Muzaffarabad

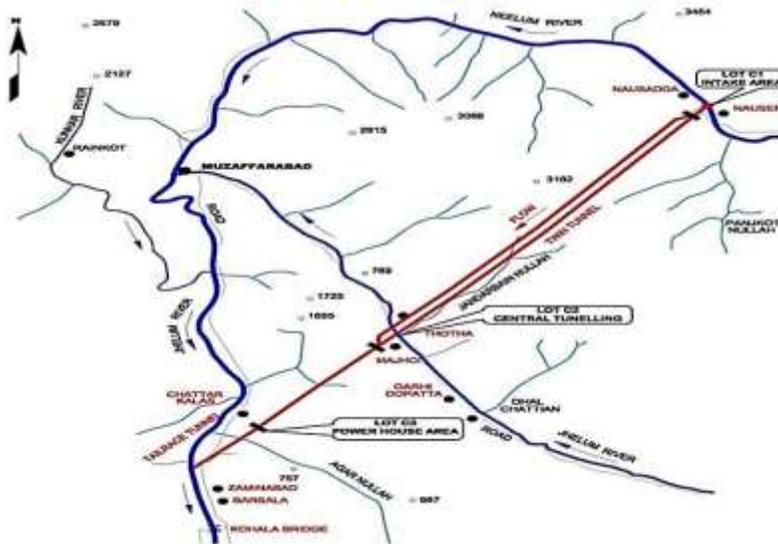

2. Impact Audit of Neelum Jhelum Hydropower Project, Muzaffarabad

2.1 Introduction

Impact audit is evidence based unique auditing approach employed to evaluate attributed outcomes of an initiative. Accordingly, impact audit of NJHPP was selected to determine impact of the project on power system of the country with respect to its share in total installed capacity, share in total electricity generation, change in electricity generation mix of the country and its impact on environment.

2.1.1 Background of the Project

NJHPP is located in District Muzaffarabad, the State of Azad Jammu and Kashmir (AJK). NJHPP is a run of river power project having an installed generation capacity of 969 MW. The project envisaged diversion of Neelum River's water through tunnels at Nauseri about 41 KM upstream of Muzaffarabad and out-falling in Jhelum River at Chatter Kalas in Muzaffarabad.

2.2 Role of the Project

The installed electricity generation capacity of the country was becoming insufficient to

support the overall national growth of the country with the increase in demand of electricity. More reliance on short term measures i.e. thermal power projects resulted in expensive electricity as compared to cheaper and cleaner hydel energy. Expensive thermal power generation also adversely contributed in the environmental issues due to release of excessive Carbon Dioxide (CO₂) in the atmosphere. Therefore, an initiative was taken by the GoP to install a hydropower project with an annual average generation of 5,150 Gigawatt hours (GWh) of cheaper and cleaner environmental friendly energy. Another major reason of this initiative was to establish Pakistan's rights on the Neelum River under the IWT-1960. More importantly, being an environment friendly project, it was aimed to reap additional revenue

amounting to US\$ 12.533 million annually through sale of carbon credits under Clean Development Mechanism (CDM).

2.2 Overview

The original PC-I of the project was approved by ECNEC on December 31, 1989 at a total cost of Rs.15,253 million. Later on, subsequent to three intermediary revisions of PC-I, fourth revised PC-I of NJHPP was approved by ECNEC on May 22, 2018 at a total cost of Rs.506,808 million.

The project was executed by WAPDA under the supervisory control of MoWR. In order to run the affairs of the project, a separate Company i.e. NJHPC headed by an independent CEO/Managing Director was established on November 18, 2004. The construction activities of the project started in January, 2008 with planned completion period of eight years. However, the project could only be substantially completed in 2018 and started its commercial operation w.e.f July 04, 2018 in July, 2018.

2.3 Scope and Methodology

a. Scope

The NJHPP was commissioned in 2018, therefore, data was analyzed for a period of five years i.e. from FY 2017-18 to FY 2021-22 for ascertaining the level of performance achieved with respect to ‘condition with’ and ‘condition without’ the initiative.

The main objectives of the NJHPP were to:

- Achieve power generation capacity of 969 MW.
- Generate annual average energy of 5,150 GWh units.
- Establish water rights on Neelum River for Pakistan.
- Reap benefits of CDM.

b. Methodology

Information was collected and analyzed to determine the impact of the NJHPP through comparison of targets and achievements, percentage calculations, trend analysis and scrutiny of monitoring reports.

- i. Annual installed capacity data was obtained to compare it with the installed capacity of WAPDA and the country, before and after commissioning of the project to calculate its impact in terms of percentage share of the project in enhancing the installed capacity of WAPDA and country respectively.
- ii. Impact audit focused on calculating the impact of the project on overall energy generation of WAPDA and country before and after commissioning of the project up to the FY 2021-22.
- iii. The impact of energy generation of the project on revenues of WAPDA was also

analyzed.

- iv. Data relating to generation mix of installed capacity with regards to hydel and thermal power was also obtained to ascertain impact of the project on generation mix of the country.
- v. Impact of project on the environment was analyzed by calculating the reduction in release of CO₂ as compared to generation of same amount of energy through thermal power. Further, impact of the project on environment of local area was also analyzed.
- vi. Impact on water rights with regards to Kishenganga case on the annual generation of the project was also determined.

2.4 Findings

2.4.1 Impact of NJHPP on installed capacity of WAPDA

During impact audit of NJHPP, it was observed that installed capacity of WAPDA increased by 969 MW after commissioning of powerhouse of NJHPP on July 04, 2018 as tabulated below:

Description	As on June 30, 2018 (without NJHPP)	As on July 04, 2018 (with NJHPP)	Increase in installed capacity of WAPDA after commissioning of NJHPP	
	(MW)	(MW)	(MW)	%age
Installed Capacity of Hydel Power Plants of WAPDA	7,372	8,341	969	13.14%

Impact: The impact of NJHPP on installed capacity of WAPDA was 13.14%.

2.4.2 Impact of NJHPP on installed capacity of the country

During impact audit of NJHPP, it was observed that powerhouse having installed capacity of 969 MW was commissioned on July 04, 2018. The installed capacity of country before its commissioning i.e. up to June, 2018 was 35,007 MW. After commissioning of powerhouse of NJHPP, total installed capacity of the county during 2018-19 increased up to 38,440 MW which included installed capacity of NJHPP i.e. 969 MW. The impact of the NJHPP on National installed capacity was 2.52 % during the FY 2018-19.

Financial Year	Total installed capacity of the country	Share of NJHPP in total installed capacity of the country	
		MW	% age
2017-18	35,007	-	-
2018-19	38,440	969	2.52%
2019-20	38,703	969	2.50%
2020-21	37,466	969	2.59%
2021-22	40,783	969	2.38%
Average (2018-19 to 2021-22)		969	2.50%

Impact: Average impact of NJHPP on the total installed capacity of the country was 2.50%.

2.4.3 Impact of NJHPP on energy generation of WAPDA

During impact audit of NJHPP, it was observed that 27,431 GWh energy units were generated by WAPDA during the FY 2017-18. After commissioning of powerhouse of NJHPP, the project generated 3,960 GWh units during FY 2018-19, resultantly, total energy generation of WAPDA increased to 31,146 GWh units wherein share of NJHPP was 12.71%. The data showing the impact of NJHPP on total energy generation of WAPDA for five financial years is tabulated below:

Financial Year	Total energy generation of WAPDA including NJHPP	Share of NJHPP in total energy generation of WAPDA	
		GWh	% age
2017-18	27,431	269	1.00%
2018-19	31,146	3,960	12.71%
2019-20	37,431	4,842	12.94%
2020-21	37,144	4,789	12.89%
2021-22	33,449	4,307	12.88%
Average (2018-19 to 2021-22)			12.85%

Impact: An overall impact of the project on total energy generation of WAPDA was 12.85%.

2.4.4 Impact of NJHPP on total energy generation of the country

During impact audit of NJHPP, it was observed that total energy generation of the country during the FY 2017-18 was 133,833 GWh units. After commissioning of powerhouse of NJHPP, total energy generation of the country increased to 136,059 GWh units during FY 2018-19 including generation of 3,960 GWh units by NJHPP. The relevant data is tabulated below:

Financial Year	Total energy generation of the country	Share of NJHPP in total energy generation of the country	
		GWh	%age
2017-18	133,833	*269	0.20%
2018-19	136,059	3,960	2.91%
2019-20	134,753	4,842	3.59%
2020-21	144,099	4,789	3.32%
2021-22	153,822	4,307	2.80%
Average (2018-19 to 2021-22)			3.16%

* Test run generation

Impact: The overall impact of the project on total energy generation of the country was 3.16% with an average annual energy generation of 4,500 GWh units.

2.4.5 Increase in revenue of WAPDA

During impact audit of NJHPP, it was observed that annual revenue of WAPDA for the FY 2017-18 was Rs.59,317 million. After commissioning of the project, revenue of WAPDA was increased to Rs.93,941 million in the FY 2018-19 including revenue of Rs.27,797 million earned from NJHPP. The data showing impact of NJHPP on total revenue of WAPDA for five financial years is tabulated below:

Entity	(Rs. in million)									
	2017-18		2018-19		2019-20		2020-21		2021-22	
	Amount	%age	Amount	%age	Amount	%age	Amount	%age	Amount	%age
WAPDA Excluding NJHPP	59,317	100	66,144	70	62,764	58	66,770	60	98,711	69
NJHPP	-	0	27,797	30	45,262	42	44,826	40	43,619	31
TOTAL	59,317	100	93,941	100	108,026	100	111,595	100	142,330	100

Impact: An overall impact of NJHPP on the revenue of WAPDA during 2018-19 to 2021-22 was 35.75%.

2.4.6 Impact of NJHPP on the energy generation mix

During impact audit of NJHPP, it was observed that before commissioning of the Project, Hydel to Thermal energy generation mix ratio of the country was 24.43:75.56 (Hydel:Thermal) during the FY 2017-18. Upon commissioning of the project in July, 2018, Hydel to Thermal generation mix ratio improved to 27.50:72.50 (Hydel:Thermal). During the FY 2018-19, energy generation mix ratio improved by 3.07% wherein impact due to commissioning of NJHPP was 1.45%.

Rival Factors:

During the FY 2018-19, two units of T4HPP with installed generation capacity of 940 MW with a share of 1.40% and GGHPS with installed generation Capacity of 108 MW with a share of 0.16% were also commissioned. Similarly, other Hydel Independent Power Producers (IPPs) of 40 MW were commissioned during the same year having a share of 0.06%.

Name of powerhouse	Increase in installed capacity of the country during 2018-19		Proportionate increase in energy mix of the country
	MW	%age	%age
NJHPP	969	47.15%	1.45%
T4HPP	940	45.74%	1.40%
GGHPS	106	5.16%	0.16%
Hydel IPPs	40	1.95%	0.06%
Total Increase	2,055	100.00%	3.07%

2.4.7 Generation of clean energy by the project avoiding release of 9.61 million tons of Carbon Dioxide in the atmosphere

During impact audit of NJHPP, it was observed from 4th revised PC-I of the project that after completion, the project was supposed to avoid annual release of 2.5 million tons of CO₂ in the atmosphere on energy generation of 5,150 GWh units. Since commissioning, the project could not achieve its intended annual energy generation of 5,150 GWh units. However, it contributed to a sizable positive impact on the environment by avoiding release of 9.61 million tons of CO₂ in the environment due to generation of clean energy during 2018-22.

Calendar Year	Actual Generation	Targeted Generation as per PC-I	Avoided Emission of CO ₂	Loss of Revenue @ US\$ 5/Ton
Jan.-Dec.	GWh	GWh	million Tons	US\$ in million
2018	1,531	2,405	1.60	8.00
2019	4,526	5,150	2.20	11.00
2020	4,941	5,150	2.40	12.00
2021	4,521	5,150	2.20	11.00
2022	2,476	5,150	1.21	6.05
TOTAL	17,995	23,005	9.61	48.05

Carbon credits @ US\$ 5 per ton of CO₂ emissions were to be claimed by the management from United Nations Framework Convention on Climate Change. As per PC-I, the project would earn CDM revenues of US\$ 12.53 million per annum but no efforts were made by the management to avail CDM benefits and the project could not earn the envisaged revenue of US\$ 48.05 million against generation of this clean energy under CDM income during 2018-22.

As an impact of non-claiming of the carbon credits, Pakistan’s rating on Environment Performance Index (EPI) could not improve internationally and Pakistan stood at 176/180 position in EPI, 2022.

2.4.8 Reduction in annual generation and serious environmental issues due to improper environmental studies at planning stage

During impact audit of NJHPP, it was observed that due to diversion of water of Neelum River through NJHPP, the river flow fell below the intake area up to Muzaffarabad city. This situation created adverse effects on environment in terms of deterioration of river water quality because of less flow and reduction in water supply for Muzaffarabad city. The situation unleashed serious environmental and social issues downstream. It’s worth mentioning here that Environmental Impact Assessment report prepared by WAPDA and later on conditionally approved by the Environmental Protection Agency of AJK on January 22, 2011 was deficient as it had not taken into account the social & environmental impact regarding aquatic ecology and dilution of routine urban contaminations, etc. Due to such deficiencies, the minimum environmental flow (water flow) of 9 cumec was found to be deficient when executed on trial basis by NJHPP. Thus, environmental studies at planning stage caused serious environmental issues in Muzaffarabad.

Later on, to address the environmental challenges, minimum flow was increased from 9 cumecs to 20 cumecs which resulted in reduction of water supply to NJHPP causing annual reduction in generation of 335 million kWh units (approximately). This situation had arisen due to lack of due diligence at the time of project planning stage leading to serious environmental issues for Muzaffarabad.

2.4.9 Impact on generation of NJHPP on account of water rights of Neelum River

During impact audit of NJHPP, it came to notice that Pakistan’s Cabinet Committee on Wuller Barrage and Storage Project took a decision on February 08, 1988 in the light of provisions of IWT-1960 that Pakistan should seriously consider construction of all feasible projects on tributaries of River Jhelum for agricultural use and/or hydro electrical use in order to take lead in the region. Accordingly, PC-I of NJHPP was approved in 1989, however, owing to several reasons, work on the project could not start till 2002. Due to this inordinate delay in execution of the project, Pakistan’s water rights on Neelum River were reduced to E-flow of 09 cumecs (Kishenganga case). Detail of its impact on generation is tabulated below:

Particulars	Energy in GWh
Annual generation as per PC-I of NJHPP	5,150
Annual generation after Kishenganga case	4,663

Impact of Kishenganga case	487
----------------------------	-----

Impact: The financial impact of water rights after Kishenganga case was Rs.4,440.660 million @ Rs.9.1184 per KWh

2.5 Conclusion

The project achieved installed capacity of 969 MW on its commissioning which led to an increase of 13.14% in installed capacity of WAPDA i.e. from 7,372 MW to 8,341 MW, whereas, average impact of this initiative on installed capacity of the country was 2.50%. Further, overall impact of NJHPP on generation of WAPDA was 12.85%. However, the project could not achieve total annual estimated generation of 5,150 GWh units due to deficient environmental studies carried out at planning stage and revised water rights after Kishenganga case. The impact of project on energy generation of Pakistan was an increase of 3.16% with an annual average generation of 4,500 GWh units, whereas, revenue of WAPDA increased by 35%. At the same time, the impact of project in improving the generation mix was 1.45%. The project avoided release of 9.61 million tons of CO₂ in the environment on generation of clean energy since its commissioning in 2018. Unfortunately, the project could not earn the envisaged revenue of US\$ 48.05 million against generation of this clean energy under CDM and due to non-claiming of the carbon credits, EPI rating of Pakistan could not improve till 2022.

AUDIT REPORT
ON
THE ACCOUNTS OF
FEDERAL BOARD OF REVENUE
(INLAND REVENUE & CUSTOMS)

AUDIT YEAR 2023-24

AUDITOR-GENERAL OF PAKISTAN

DIRECTORATE OF AUDIT (INLAND REVENUE & CUSTOMS)

CHAPTER-1

PUBLIC SECTOR FINANCIAL MANAGEMENT ISSUES

This chapter highlights significant issues related to financial management, accounting, and reporting by the Federal Board of Revenue.

The accounting of receipt vouchers is performed primarily by FBR itself through departmental treasuries. FBR provided the collection record of its receipts (source documents – reconciliations between FBR & AGPR). The audit analysed Civil Accounts received from AGPR Islamabad and figures of tax receipts from the main office of the State Bank of Pakistan, Karachi and the Head office of the National Bank of Pakistan, Karachi. The observations of Directorates General Audit Inland Revenue and Customs, Lahore & Karachi are clubbed into the following paras;

1.1 Variation in figures of tax receipts (Net) between FBR and SBP - Rs 1,188 million

According to Para 3.4.2.12 of the Manual of Accounting Principles each entity is required to reconcile its books of accounts with the bank record at the close of each month. This reconciliation is to be performed in accordance with policies and procedures set out in para 5.5.9 and 6.5.2 of the Accounting Policies and Procedures Manual.

Scrutiny of figures of tax receipts of SBP and the figures reported by FBR showed that there was a variation of Rs 1,188 million for the FY 2022-23 in respect of net tax receipts as summarized below: -

(Rs in million)

S #	Head of Account	Collection figures of FBR **	Collection figures of SBP (NET) *	Variation
1	Income Tax	3,220,474.34	3,187,145.85	33,328.49
2	Customs	917,875.00	950,187.03	(32,312.03)
3	Sales Tax	2,591,432.70	2,582,657.06	8,775.64
4	Federal Excise Duty	361,212.60	369,816.95	(8,604.35)
	Total Taxes	7,090,994.64	7,089,806.89	1,187.75

* Source: As per record of SBP provided to Audit for FY 2022-2023

** Source: Reconciliation Statement submitted by FBR in AGPR up to June (Final) 2023.

This may impair true and fair presentation of financial statements because the receipts figure of FBR was on the higher side as compared to the actual cash collected and reported by the State Bank of Pakistan.

The management replied that the collection on account of “Book Adjustment” pertaining to Income Tax & Sales Tax had not been incorporated in the figures of SBP. Further, the automated “Refunds/Duty Drawbacks and Customs Refunds/Rebates adjustment” needed to be incorporated in the figures of SBP. After the inclusion/exclusion of the above amounts, the overall “NET” variation was only Rs 16.30 million. The amount of Refunds/Duty drawbacks of Rs 34,162.10 million paid through the automated system had been communicated by the SBP, however, the proof of payment/mechanism was not provided. The collection on account of Export Development Surcharge (EDS) amounting to Rs 13,852 million which was included in the figures of Customs Duty pertained to the Ministry of Commerce and was also not a part of the revenue collection reported by the FBR. However, there was still a variation of Rs 3,541 million (WWF/WPPF Rs 3,525 million and Rs 16.30 million) after accepting the stance of the department.

The Audit holds that the Directorate of Research and Statistics (DR&S) was entrusted with the responsibility of reconciliation with external sources i.e. AGPR and SBP. DR&S informed that the matter regarding the reconciliation of June final 2022-23 had been taken up with the Finance Division. The department was requested to pursue the matter of developing an integrated interface for real-time monitoring of receipts with SBP and AGPR.

The DAC, in its meeting held in November 2023, directed the DR&S to pursue the matter with the Finance Division, Islamabad for clarification to proceed further in the matter and continue the reconciliation process from March 2023 and report progress to Audit & FBR. No further progress was reported till the finalisation of this report.

The Audit recommends monthly reconciliation of receipts between FBR and SBP to accurately report on Federal Government accounts.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22, and 2022-23 vide para numbers 1.1 (of each Audit Report) having a financial impact of Rs 62,159 million. The recurrence of the same irregularity is a matter of serious concern.

1.2 Variation in figures of refund of tax receipts between FBR & SBP - Rs 28,799 million

According to Para 3.4.2.12 of the Manual of Accounting Principles, each entity is required to reconcile its books of accounts with the bank records at the close of each month. This reconciliation is to be performed in accordance with policies and procedures set out in para 5.5.9 and 6.5.2 of the Accounting Policies and Procedures Manual.

Scrutiny of refund record (figures up to June Final 2023), revealed variations in figures of refunds on account of Income Tax, Customs, Sales Tax and Federal Excise Duty amounting to Rs 28,799.15 million. The SBP's total was lower than FBR's as tabulated below: -

(Rs in million)

Refund	Figures of refund/rebate of FBR*	Figures of refund of tax receipts of SBP **	Variation
Income Tax	17,298.19	17,956.01	(657.82)
Customs	38,150.73	6,678.00	31,472.73
Sales Tax	280,100.20	282,104.50	(2,004.30)
Federal Excise Duty	0	11.46	(11.46)
Total	335,549.12	306,749.97	28,799.15

* Source: Figures provided by FBR

** Source: Figures provided by SBP

This may impair the true and fair presentation of financial statements because the refund figures from external source i.e. SBP were on the lower side.

The management replied that there was no proper mechanism for reconciliation of "Revenue Receipts & Payments" between FBR and SBP at the macro level. The FBR undertook reconciliation with the office of AGPR, Islamabad at the national level on a net basis and generally, there were no substantial variations in the figures of refunds between FBR and AGPR. The huge variation pointed out by the Audit had been examined and it was due to the exclusion of book adjustment which caused variations. Refund adjustments pertaining to income tax had not been incorporated in the figures of SBP. Duty drawbacks pertaining to Customs paid through an automated system had not been incorporated in the figures of SBP. Refunds recalled pertaining to Sales Tax had to be included in the head of FED Refunds Adjustment reported by SBP. After passing all these Adjusting/Transfer entries a variation of Rs 110.3 million was left between FBR /AGPR/SBP.

Audit holds that after passing all the Adjusting/Transfer entries, there is still a variation of Rs 110.3 million between the FBR /AGPR/SBP figures.

The DAC, in its meeting held in November 2023, recommended re-examining the issue to the extent of Rs 110.3 million and reporting to Audit/FBR within four weeks. No further progress was reported till the finalization of this report.

Audit recommends monthly reconciliation of refund/rebate figures between FBR and SBP to accurately report on the Federal Government accounts.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22, and 2022-23 vide para numbers 1.2 (of each Audit Report) having a financial impact of Rs 78,755 million. The recurrence of the same irregularity is a matter of serious concern.

1.3 Variation in figures of Tax Receipts (Net) between FBR and AGPR - Rs 58 million

According to Para 3.4.2.12 of the Manual of Accounting Principles, each entity is required to reconcile its books of accounts with the bank records at the close of each month. This reconciliation is to be performed in accordance with policies and procedures set out in para 5.5.9 and 6.5.2 of the Accounting Policies and Procedures Manual.

Scrutiny of the data provided by AGPR and data statements provided by FBR up to the month of June (Final) 2023, showed that there was a variation of Rs 58 million in respect of net tax receipts as summarized below: -

(Rs in million)

S #	Head of Account	Collection figures of FBR **	Collection figures of AGPR *	Variation
1	Income Tax	3,220,474.34	3,220,499.46	(25.12)
2	Customs	917,875.00	917,893.77	(18.77)
3	Sales Tax	2,591,432.70	2,591,447.72	(15.02)
4	FED	361,212.60	361,211.70	0.90
	Total Taxes	7,090,994.64	7,091,052.65	(58.01)

* Source: Scrutiny of data for the year 2022-23 prepared by AGPR, Islamabad

** Source: Statement prepared by FBR up to June (Final) 2023

This may impair the true and fair presentation of financial statements of the Federal Government.

The department submitted that the variation of Rs 58 million between the figures of FBR and AGPR as pointed out by the Audit was likely to be settled/ removed after national level final reconciliation for the FY 2022-23 between FBR and AGPR. The reconciliation of revenue receipts between FBR and AGPR at the national level was pending due to non-reconciliation of the collection of Exports Development Surcharge (EDS) by the latter and the matter was being actively pursued

by FBR with the Finance Division. The figures of June 2023 (Supplementary) were also required to be finalized and hopefully, there would be no variation between the collection figures of FBR and AGPR (NET) for the FY 2022-23 as and when national level reconciliation between FBR and AGPR would be undertaken/ finalized with the AGPR.

The DAC, in its meeting held in November 2023, discussed the issue in detail and directed the DR&S to take up the matter with the Finance Division regarding reconciliation and report progress to Audit/FBR within six weeks. No further progress was reported until the finalisation of this report.

Audit recommends monthly reconciliation of receipts between FBR and AGPR to accurately report on the Federal Government accounts.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19 and 2019-20 vide para numbers 1.3 and 1.4 having a financial impact of Rs 20,173 million. The recurrence of the same irregularity is a matter of serious concern.

1.4 Non-reconciliation of revenue collection between FBR and AGPR

According to Para 5(d) of the System of Financial Control and Budgeting, each Principal Accounting Officer is required to make sure that the accounts of receipts (shares therefrom assigned to provinces) are maintained properly and reconciled every month. Further, according to GFR-26, "it is the duty of the departmental controlling officers to see that all sums due to the government are regularly and promptly assessed, realized and duly credited in the Public Account". Moreover, according to para 5.5.9.3 of Accounting Policies and Procedures Manual, the Accountant General and the Tax Collecting Agencies will be jointly responsible for reconciliation of tax revenues, in the manner prescribed by the Auditor-General.

During the audit of receipts collected by the FBR, it was observed that FBR was required to reconcile accounts of receipts with AGPR every month, but the accounts had not been reconciled after February 2023. Moreover, the reconciliation of revenue receipts between FBR and AGPR at the national level was pending for the whole FY 2022-23.

The DAC, in its meeting held in November 2023, discussed the issue in detail and DAC directed the department to expedite the matter of reconciliation and report progress to Audit/FBR within six weeks. No further progress was reported until the finalisation of this report.

Audit recommends monthly reconciliation and compilation of revenue receipts between FBR and AGPR to accurately report on the Federal Government accounts.

CHAPTER-2 FEDERAL BOARD OF REVENUE

2.1 Introduction

A. The Federal Board of Revenue Act 2007 governs the Federal Board of Revenue (FBR). The Board comprises of at least seven members, headed by a Chairman appointed by the Federal Government. The powers of FBR to collect taxes are currently embodied in the Income Tax Ordinance 2001, Sales Tax Act 1990, Federal Excise Duty Act 2005, Customs Act 1969 and Islamabad Capital Territory (Tax on Services) Ordinance 2001. These statutory laws are amended through the Finance Act/Ordinance to implement budget proposals of the Federal Government. FBR operates as an attached department of the Revenue Division as per Rules of Business 1973.

The FBR is responsible for collecting income tax, sales tax, federal excise duty, customs duty and tax on services rendered under the territorial jurisdiction of Islamabad Capital Territory (ICT). Moreover, FBR is also responsible for collecting the Workers' Welfare Fund under the Workers' Welfare Fund Ordinance 1971 and the Workers' Profit Participation Fund, established under the Workers' Participation Fund Ordinance 1968.

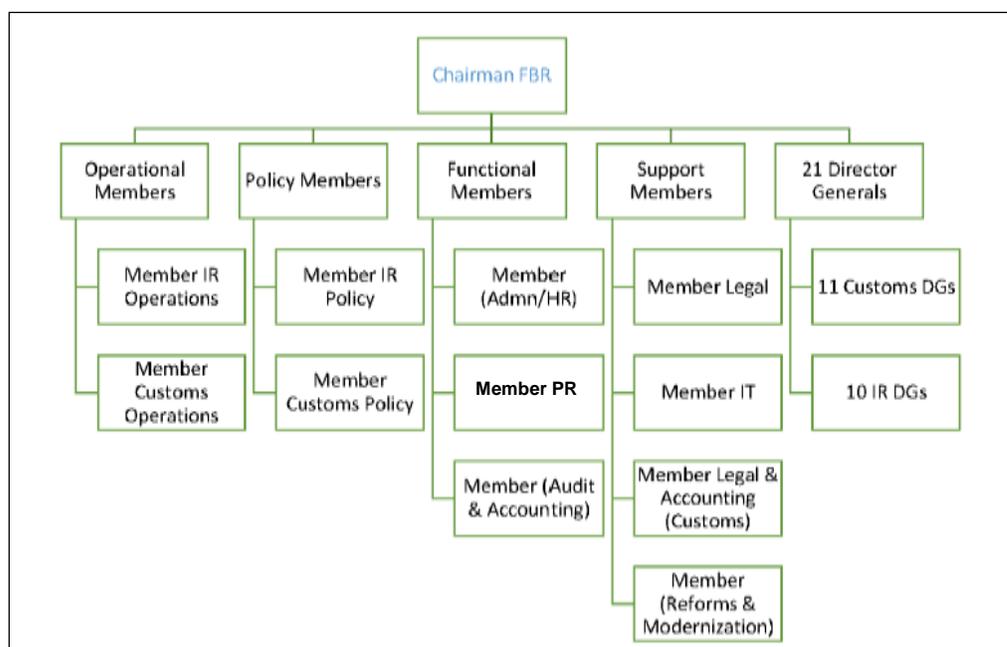

Significant powers and functions of FBR are as follows:

- i. Implementing the provisions of all fiscal laws for the time being in force and taking any action, making policy, issuing rules or guidelines for the purpose;
- ii. Honouring international obligations under a treaty, resolution or any global commitment;
- iii. Promoting a culture of voluntary tax compliance, making the Board a service-oriented organisation, and transforming the Board into a modern and efficient organisation;
- iv. Enabling electronic communication optimally effective in respect of all taxation matters such as e-filing, e-payments, e-notice, e-notification, digital imaging, protocols or agreements as may be prescribed from time to time;
- v. Setting up mechanisms and processes that facilitate the removal of grievances and complaints from the taxpayers;
- vi. Directing or advising investigations and inquiries into suspected duty tax evasion, tax and commercial fraud, money laundering, and financial crimes and coordinating with the relevant law enforcement agencies;

- vii. Taking appropriate measures, including devising internal controls to combat corruption within the organisations under the Board and providing checks to ensure the integrity of employees that are verified periodically through an applicable procedure and which should be made one of the criteria for promotions and incentives;
- viii. Granting additional allowances or any other incentives and rewards to the employees and members of the Board; and
- ix. Preparing an annual report of its activities and present it to the Prime Minister, the National Assembly and the Senate.

Currently, the Board has 15 members and 21 Directors General (11 for Customs and 10 for Inland Revenue), as detailed in Figure 1 below.

Figure 1: Organogram of Federal Board of Revenue

B. Comments on Budget and Accounts (Variance Analysis)

The original budget grant for the FY 2022-23 was Rs 34,398 million, later on, an amount of Rs 11,041 million was re-appropriated. The budget was again re-appropriated out of which an amount of Rs 347 million was surrendered. Further, an amount of Rs 93 million was not spent till the close of the FY.

The Audit observed that employee-related expenses were reduced by Rs 3,882 million (from Rs 23,713 million to Rs 19,831 million), whereas operating expenses were enhanced by Rs 4,007 million (from Rs 6,495 million to Rs 10,502 million) out of which an amount of Rs 180.78 million was surrendered and Rs 59.86 million remained unspent.

This depicts weak controls in the planning, allocation, and execution of the budget. Therefore, the Audit recommends that the budget planning should be rationalized to avoid misappropriation and ensure effective utilization of public funds.

C. Sectoral Analysis of the Federal Board of Revenue (FBR)

FBR was assigned certain revenue targets through the Finance Act 2022. The purpose of this analysis was to review FBR's overall collection of taxes during the FY 2022-23 against these targets and to highlight certain areas of concern.

(i) FBR's Performance for FY 2022-23

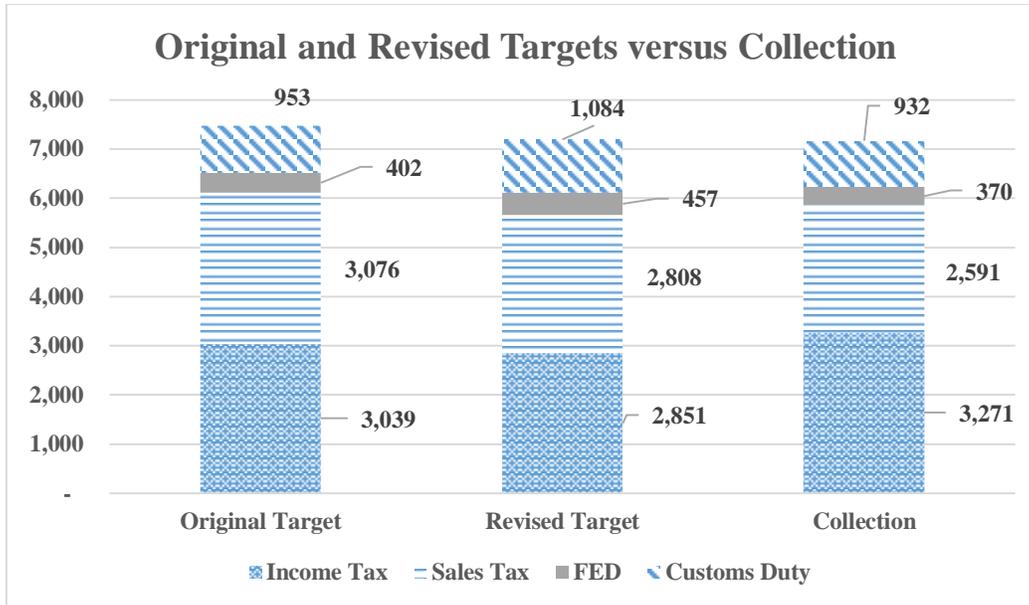

The original target of FBR collection under all heads was Rs 7,470 Billion, revised downwards to Rs 7,200 Billion for the FY 2022-23. However, FBR succeeded in collecting revenue of Rs 7,164 Billion as summarized below:

(Rs in Billion)

Head of account	Target		Collection	Achievement (Revised Target)	
	Original	Revised		Absolute	Percentage
Direct Tax	3,039	2,851	3,271	420	114.7
Indirect Taxes					
Sales Tax	3,076	2,808	2,591	-217	92.3
FED	402	457	370	-87	81.0
Customs Duty	953	1,084	932	-152	86.0
Total (IDT)	4,431	4,349	3,893	-456	89.5
All Taxes	7,470	7,200	7,164	-36	99.5

Source: FBR Year Book 2022-23

(Rs in Billion)

The Audit observed that FBR was not able to meet the budgeted as well as the reduced revenue targets. The collection of direct taxes amounting to Rs 3,271 Billion was more than the original target of Rs 3,039 Billion as well as the revised target of Rs 2,851 Billion. However, the collection of sales tax, federal excise duty and customs duty could not meet the original or the revised target. Resultantly, FBR marginally missed its overall revised target despite increased collection from direct taxes.

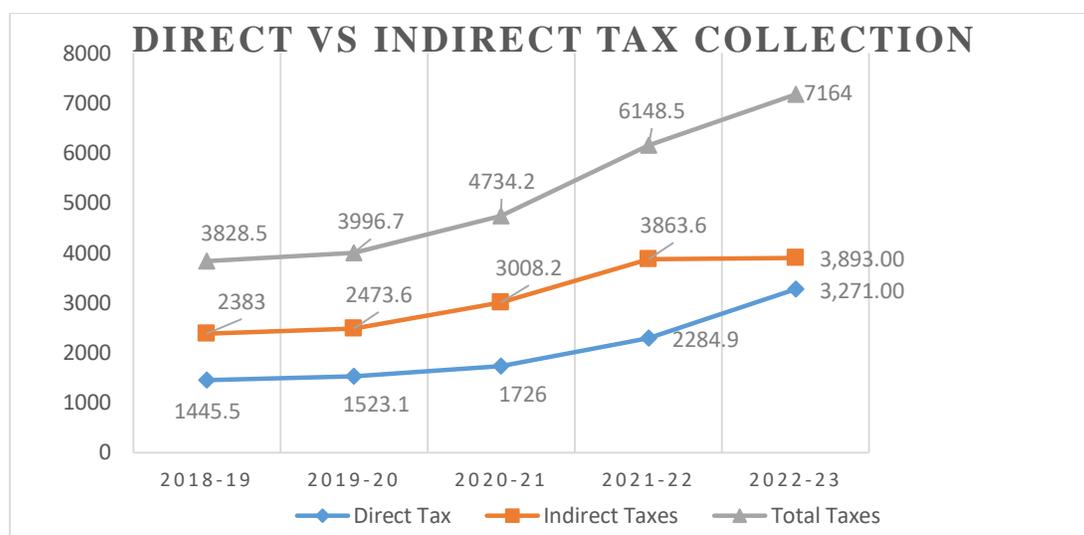

(ii) Direct and Indirect Taxes

Historically indirect taxes have contributed more towards the total collection, however, in the FY 2022-23 direct taxes contributed 45.6% of the total collection as compared to 37% in the previous FY. This increase can be attributed to the collection of advance tax, high interest rates on bank deposits, rise in salaries, increased dollar rate and withholding of tax, which constituted 57% of the total collection in the FY 2022-23. A comparison for the last five years in respect of direct and indirect tax collection is tabulated below:

(Rs in Billion)

	2018-19	2019-20	2020-21	2021-22	2022-23
Direct Tax	1,445	1,523	1,726	2,285	3,271
Indirect Taxes	2,383	2,473	3,008	3,863	3,893
Total Collection	3,828	3,996	4,734	6,148	7,164

Sources: FBR's Year Books

The increase in direct tax collection was 43% which surpassed the increase of 16.5% in total tax collection.

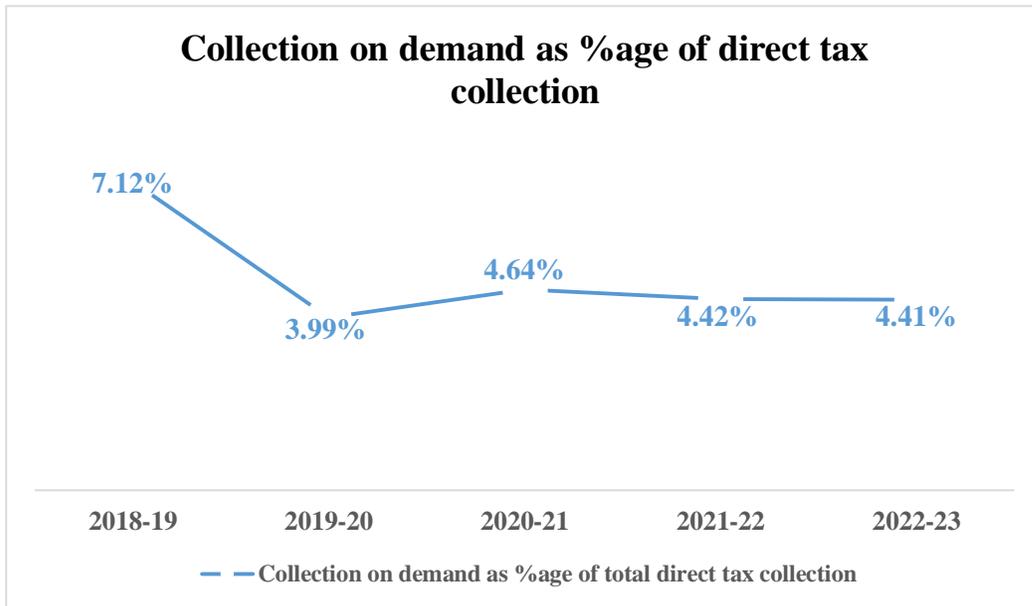

(iii) Tax on Demand - Performance indicator of FBR (Direct Tax)

Tax collection in respect of direct taxes consists of advance payment of income tax, which includes tax deducted and collected under Income Tax Ordinance 2001. Under the self-assessment system introduced in tax year 2003, every return filed by a taxpayer is deemed an assessment order. The department is also responsible for preventing tax avoidance and evasion by amending these deemed assessments and creating tax demand. The indicator of collection on demand depicts the department's actual performance which justifies its budgetary allocation and expenditure. An analysis of collection on demand is as follows:

(Rs in Billion)

	2018-19	2019-20	2020-21	2021-22	2022-23
Total Direct Tax	1,445.50	1,523.10	1,726.00	2,284.90	3,271.00
Collection on demand	102.93	60.81	80.14	101.09	144.30
Collection on Demand as %age of direct tax collection	7.12%	3.99%	4.64%	4.42%	4.41%

Sources: FBR's Year Books

The Audit observed that total direct taxes including withholding taxes collected by FBR amounted to Rs 3,271 Billion for the FY 2022-23. However, collection on demand was Rs 144.30 Billion for FY 2022-23, which constituted only 4.41% of the direct tax collection. Furthermore, the contribution of collection through tax demand in total direct tax collection was stagnant since FY 2018-19.

(iv) Withholding Taxes (Income Tax)

Tax collection under the withholding tax regime relies on the person making the payment by treating him as a withholding agent. Tax collection under this head is easier due to at-source deduction, therefore, withholding taxes form a major part of the total tax collection.

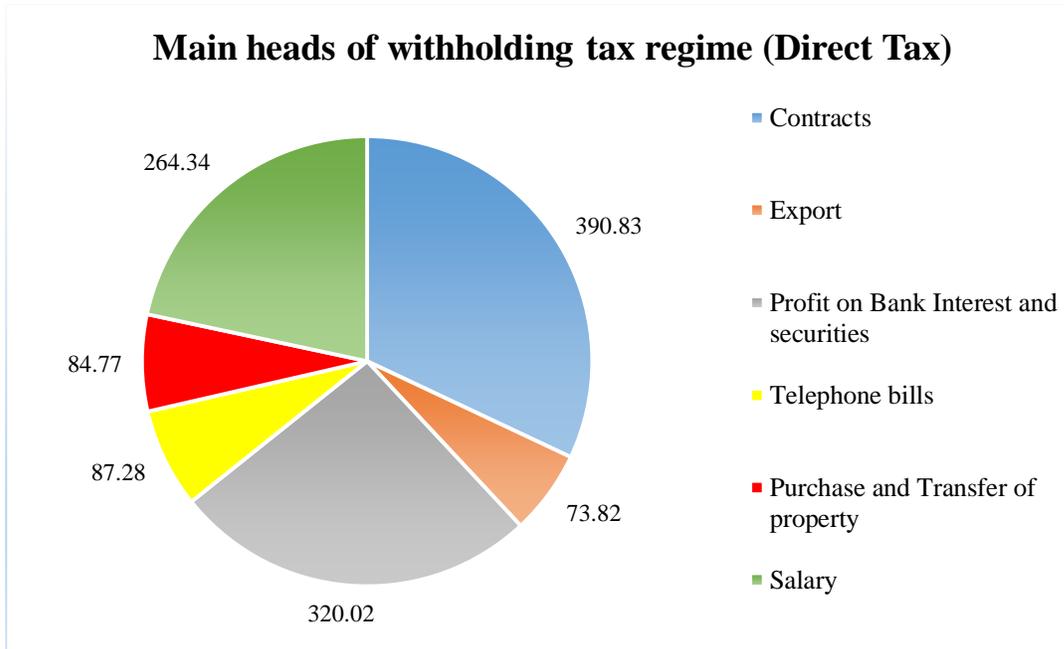

Tax collection on account of withholding taxes was Rs 1,874 Billion against the total direct tax collection of Rs 3,271 Billion for the FY 2022-23. In terms of proportion withholding taxes constituted 57% of the total direct taxes.

Among the ten major components of withholding, withholding taxes on contractual receipts, exports, bank interest and various other items fall under minimum tax or final tax regime. The Audit observed that collections under these heads were indirect in nature, but the same were being collected/reported as direct taxes by FBR. Moreover, the collections under the heads of telephone bills and purchases of properties were adjustable, however, these adjustments were not claimed by non-filers. FBR collected Rs 1,221.06 Billion withholding tax in these heads for the FY 2022-23, which was Rs 366.07 Billion more than the preceding FY. The increase in withholding tax regimes mainly attributed to increase salary rates. The detail is tabulated under:

(Rs in Billion)

Heads	FY 2022-23	FY 2021-22	Difference
Contracts	390.83	316.37	74.46
Export	73.82	62.90	10.92
Profit on Bank Interest and securities	320.02	154.80	165.22
Telephone bills	87.28	68.19	19.09
Purchase and Transfer of property	84.77	63.99	20.78
Salary	264.34	188.74	75.60
Total	1,221.06	854.99	366.07

(Rs in Billion)

2.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 737,868 million are raised in this report as a result of the current audit of the Federal Board of Revenue. Summary of the audit observations classified by their nature is as under:

Overview of Audit Observations

(Rs in million)

S. No.	Classification	Amount
1	Non-production of record	-
2	Receipt-related Irregularities	-
	i. Direct Taxes (Income Tax)	616,181
	ii. Indirect Taxes (Sales Tax and FED)	90,334
	iii. Customs Duty	28,186
	iv. Expenditure	3,167

3	Thematic Audits	-
4	Impact Audit	-
5	Stuck up in tribunals/courts	*124,122
Total		737,868

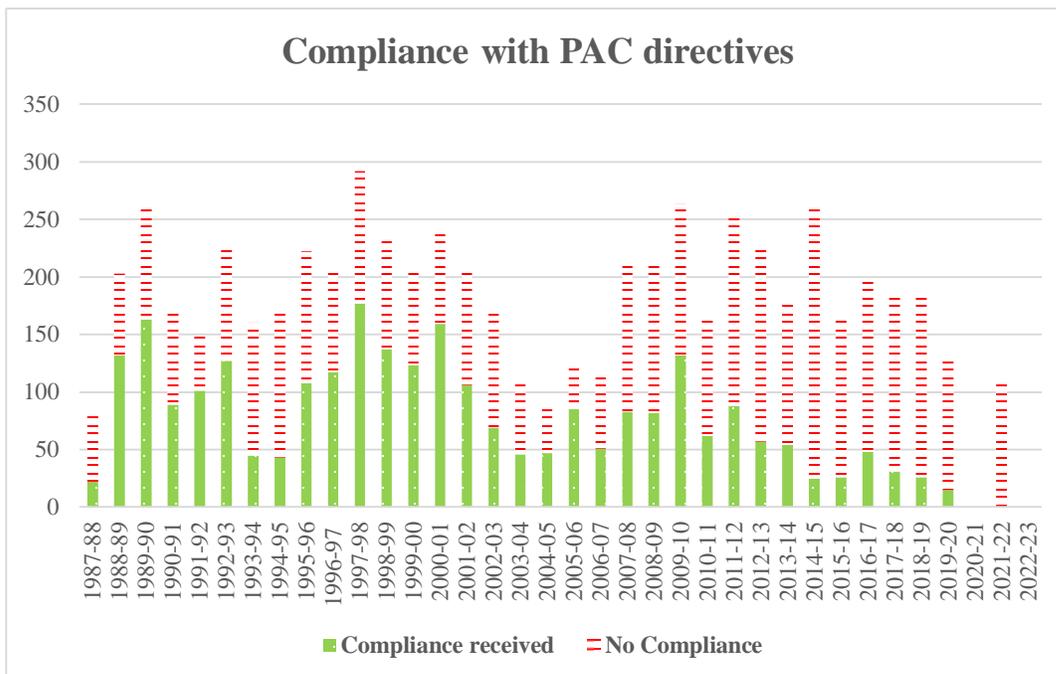

* This amount is not included in the total given above

2.3 Comments on the status of compliance with the PAC directives

The Public Accounts Committee is the primary accountability structure in the governance framework of Pakistan. Audit reports are laid before the esteemed forum for discussion every year for directions. A summary of the total paras discussed in PAC and their compliance is presented in the table and graph below:

Year	Total Paras discussed	Compliance received	No Compliance	%age Compliance
1987-88	83	22	61	27%
1988-89	203	132	71	65%
1989-90	259	163	96	63%
1990-91	171	89	82	52%
1991-92	148	101	47	68%
1992-93	229	127	102	55%
1993-94	160	45	115	28%
1994-95	168	43	125	26%
1995-96	222	108	114	49%
1996-97	207	117	90	57%
1997-98	292	177	115	61%
1998-99	232	137	95	59%
1999-00	204	123	81	60%
2000-01	239	159	80	67%
2001-02	206	106	100	51%
2002-03	169	69	100	41%
2003-04	107	46	61	43%
2004-05	88	47	41	53%
2005-06	121	85	36	70%
2006-07	114	51	63	45%
2007-08	210	83	127	40%

2008-09	210	82	128	39%
2009-10	263	132	131	50%
2010-11	163	62	101	38%
2011-12	253	88	165	35%
2012-13	224	57	167	25%
2013-14	176	54	122	31%
2014-15	259	25	234	10%
2015-16	166	26	140	16%
2016-17	199	48	151	24%
2017-18	187	31	156	17%
2018-19	183	26	157	14%
2019-20	131	15	116	11%
2020-21	42	Not discussed in PAC yet		
2021-22	108	0	107	0%
2022-23	93	Not discussed in PAC yet		

The aggregate mean from the table above shows that only 43% compliance with the PAC directives was made by FBR. Compliance with PAC directives as a percentage of total directives was 30% for direct taxes, 53% for indirect taxes and 44% for customs duties. Moreover, compliance with PAC directives was only 4.7% in the last five years (2015-16 to 2019-20). This reflects a lack of seriousness on the part of the FBR towards PAC directives. Resultantly, audit observations involving substantial revenue have been piling up year after year. This is alarming as chances of recovery of revenue diminish over time.

Compliance with PAC directives is a key performance indicator of FBR, but reporting on this Key Performance Indicator (KPI-10) is limited to timely communication of PAC directives by the Board to field formations and lacks active follow-up. The Audit recommends implementation of this KPI in letter and spirit through active follow-up of PAC directives and linking it with performance-based incentives.

CHAPTER-3 NON-PRODUCTION OF RECORD

3.1 Non-Production of record of Common Pool Fund (CPF)

Article 78 of the Constitution of Pakistan 1973, provides that all revenues received by the federal government or other monies received by or on behalf of Federal Government are either part of Federal Consolidated Fund or Public Account. Further, as per Article 169 *ibid*, Auditor-General is required to perform such functions as may be determined by the Parliament or the President in relation to accounts of the federation and provinces or any authority or body established by the federation or province. Moreover, section 14(3) of the AGP's Ordinance provides that any person or authority hindering the functions of the Auditor-General regarding inspections of accounts shall be subject to disciplinary action under relevant Efficiency and Discipline rules.

The Audit requisitioned record from seven (07) field offices of FBR (Customs) in respect of Common Pool Fund (CPF) constituted under Unified CPF Rules, 2014 for the FY 2022-23. However, record production was refused to Audit despite reminders as well as meetings with the concerned officers. Since the amount held in the common pool fund constituted of fees and charges levied under the federal law like GD processing fee, sealing and de-sealing fee and reward money sanctioned by the Federal Government etc., therefore, was auditable under the AGP's Ordinance. It is worth mentioning that amounts realized in the fund were kept in private bank accounts. Sanctity of utilization of Public Money according to relevant financial and reward rules could not be verified due to non-provision of auditable record. Moreover, non-production of record of CPF is tantamount to hindering

the performance of the constitutional duty of the Auditor-General of Pakistan.

The matter was taken up with the Chairman FBR by the Director General Audit Inland Revenue & Customs, Lahore as well as by the office of Auditor-General of Pakistan as per standard operating procedures. However, the matter of non-production could not be resolved. The matter was also taken up with the Finance Division by the AGP office. Finance Division directed the FBR to provide details of the subject account along with NOC/Approval of the Finance Division.

The DAC in its meeting held in December 2023 directed the department to submit a comprehensive reply. No further progress was reported by the department till finalization of this report.

The Audit recommends that the production of CPF records be ensured and disciplinary proceedings be initiated against the concerned.

[Annexure-2]

CHAPTER-4 INCOME TAX

4.1 Non-recovery of tax demands – Rs 85,349 million

Section 138 of the Income Tax Ordinance 2001, provides the procedure for the recovery of the due tax from taxpayers through attachment and sale of any movable or immovable property, arrest and detention of the taxpayer.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in fourteen (14) field offices of FBR, three thousand and forty-three (3,043) cases, tax was charged against the taxpayers, but recoveries thereof were not made despite a lapse of considerable time. This resulted in non-recovery of tax amounting to Rs 85,629.74 million due to negligence of the tax authorities.

These irregularities were pointed out from February to November 2023. The department replied that Rs 280.30 million had been recovered, Rs 5,025.96 million were subjudice and an amount of Rs 80,323.48 had been charged but recovery was awaited.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends proactive follow up and monitoring of recovery of due tax and strengthening monitoring controls by a dedicated supervisory team independent from the assessment function.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.4.12, 4.4.6, 4.17 and 5.1 respectively having a financial impact of Rs 123,763 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-3]

4.2 Short-realization of income tax due to inadmissible expenses – Rs 104,667 million

Section 21 of the Income Tax Ordinance 2001, provides that certain expenses such as lease financial charges, provisional expenses and expenses which were not subjected to withholding tax shall not be allowed in computing taxable income under the head “Income from Business”.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in seventeen (17) field offices of FBR, one thousand one hundred and seventy-three (1173) taxpayers claimed inadmissible expenses such as lease finance charges, provisional expenses and expenses where withholding tax was not deducted while computing taxable income. The department did not take corrective action to disallow such expenses which resulted in a short realization of tax amounting to Rs 104,667 million.

These irregularities were pointed out from February to November 2023. The management replied that proceedings for an amount of Rs 44,108.72 million had been initiated but not finalized, Rs 174.86 million had been charged but recovery was awaited and no reply for Rs 60,383.76 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and submit comprehensive replies besides strengthening internal controls through risk based desk audit.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.4.6, 4.4.13, 4.11 and 5.2 having a financial impact of Rs 104,063 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-4]

4.3 Short-realization of tax due to non-treatment of withholding tax as a minimum tax liability – Rs 10,072 million

Sections 148 and 153(3) of the Income Tax Ordinance 2001, provide that tax deducted at source while making payments and tax collected at import stage shall be treated as a minimum tax liability of the taxpayer for the tax year.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in ten (10) field offices of FBR, sixty (60) taxpayers adjusted tax deducted or collected against normal tax liability contrary to the said provisions of law. The department did not take remedial action under the law to recover the due tax from the taxpayers. This resulted in a short realization of tax amounting to Rs 10,087.33 million.

These lapses were pointed out from February to November 2023. The department replied that Rs 15.31 million had been recovered, Rs 5.58 million had been charged but recovery was awaited, and proceedings for Rs 7,296.83 million were initiated under the law but not finalized. No reply for Rs 2,754.28 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings and furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, submit comprehensive replies besides strengthening risk based desk audit.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.22, 4.4.21, 4.1(vi), 4.5 and 5.3 having

financial impact of Rs 21,597 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-5]

4.4 Inadmissible claims of tax credit – Rs 515 million

Section 65 of the Income Tax Ordinance 2001, provides for tax credits to corporate industrial undertakings at prescribed rates for investment in existing plant and machinery through equity.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in five (05) field offices of FBR, eleven (11) taxpayers claimed tax credits despite the fact that the taxpayers were not industrial undertakings. These inadmissible tax credits were required to be disallowed to recover the due tax from the taxpayers. However, the department did not initiate the proceedings which resulted in claim of inadmissible tax credit amounting to Rs 514.50 million.

These instances were reported to the department from February to November 2023. The department replied that proceedings for Rs 514.50 million were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings and implementing monitoring controls besides strengthening desk audits. Periodic review of Risk Management System (RMS) should be undertaken in the light of repeated audit observations.

Note: The issue was also reported earlier in the Audit Reports for the Audit Year 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.9, 4.1(ii), 4.2 and 5.4 having financial impact of Rs 39,200 million. Recurrence of same irregularity is a matter of serious concern.

[Annexure-6]

4.5 Non-recovery of withholding tax – Rs 41,802 million

Section 153, read with Section 161 of the Income Tax Ordinance 2001, provides that where a withholding agent fails to deduct tax or does not deposit the deducted tax, he is personally liable to pay the amount of tax through legal proceedings initiated by the Commissioner.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in eighteen (18) field offices of FBR, five hundred and nineteen (519) withholding agents did not deduct tax while making payments to suppliers, service providers and contractors. It was a statutory obligation of the department to recover the tax from the withholding agents. However, no action was initiated by the department which resulted in non-recovery of tax amounting to Rs 41,819.52 million.

These irregularities were pointed out from February to November 2023. The department replied that Rs 17.34 million had been recovered, Rs 21.99 million had been charged but recovery was awaited, proceedings for Rs 9,802.19 million were initiated under the law but not finalized, no reply was furnished for Rs 31,934.60 and Rs 43.42 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings and furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue subjudice cases at appropriate fora, and submit comprehensive replies for under scrutiny cases. Compliance of withholding regime needs to be ensured through Commissioner, IR (Withholding). Moreover, Synchronized Withholding Administration and Payment System (SWAPS) be implemented on priority basis and periodically updated in the light of audit observations.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.7.10, 4.7.2, 4.2, 4.20 and 5.5 having financial impact of Rs 59,220 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-7]

4.6 Non/short-realization of minimum tax – Rs 18,978 million

Section 113 of the Income Tax Ordinance 2001, provides for the realization of minimum tax based on the turnover of a taxpayer. The tax is to be paid if, otherwise, no tax is payable on taxable income due to any reason, or tax payable under the normal tax regime is less than the minimum tax liability in respect of specified categories of taxpayers.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in twenty (20) field offices of FBR, nine hundred and eighteen (918) taxpayers, evaded the minimum tax because either no tax was payable under the normal tax regime or their normal tax liability was less than their minimum tax liability. However, the department did not initiate legal proceedings to recover the tax which resulted in non/short-realization of tax amounting to Rs 20,843.56 million.

These irregularities were pointed out from February to November 2023. The department replied that Rs 1,865.54 million had been recovered, Rs 2,366.74 million had been charged, however, recovery was awaited, proceedings for Rs 10,943.26 million were initiated under the law but not finalized, no reply was furnished for Rs 5,658.32 and amount of Rs 9.70 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February

2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue subjudice cases at appropriate fora and finalize legal proceedings. Further, the Audit recommends strengthening of desk audit and simplification of the tax code regarding withholding tax.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.1, 4.4.7, 4.1(vii), 4.6 and 5.7 having financial impact of Rs 28,928 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-8]

4.7 Excess adjustments of withholding tax deductions – Rs 11,791 million

Section 168 of the Income Tax Ordinance 2001, provides that where an amount of tax has been collected or deducted from a payment made to a person by a withholding agent, the person shall be allowed the effect of tax deduction in computing his tax liability under normal tax regime.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in fifteen (15) field offices of FBR, two hundred and sixty-nine (269) taxpayers, claimed tax deductions or tax collection in excess of admissible amount of tax collected or deducted. However, the department neither verified these tax deductions nor recovered due tax from the taxpayers. This resulted in short-realization of tax amounting to Rs 11,790.81 million due to excess adjustments of withheld tax.

These irregularities were pointed out from February to November 2023. The management replied that Rs 15.12 million had been charged but recovery was awaited, proceedings for Rs 3,899.36 million were initiated under the law but not finalized, no reply for Rs 6,687.05 was furnished and an amount of Rs 1,189.28 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue subjudice cases at appropriate fora and finalize legal proceedings. Moreover, strengthening the monitoring of withholding tax regime along-with introduction of validation checks in IT system for verification of such tax credit.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.13, 4.4.5, 4.1(iv), 4.3 and 5.8 having financial impact of Rs 28,993 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-9]

4.8 Non/short-realization of super tax from other than Banking Companies – Rs 92,984 million

Section 4C of the Income Tax Ordinance 2001 provides that super tax shall be imposed for tax year 2022 and onwards at the prescribed rates specified on the income of high earning persons except banking company. Super tax is applicable on the persons whose income is above Rs 150 million.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in sixteen (16) field offices of FBR, super tax was not paid by one thousand and forty-five (1045) taxpayers, belonging to other than banking sector, within the stipulated time. The tax authorities did not initiate legal proceedings to recover the same. This resulted in the non/short-realization of super tax amounting to Rs 105,491.93 million.

This irregularity was pointed out from February to November 2023. The management replied that Rs 12,507.77 million had been recovered, Rs 1,823.03 million had been charged but recovery was awaited, proceedings for Rs 13,974.53 million were initiated under the law but not finalized, no reply was furnished for Rs 38,161.99 and Rs 39,024.61 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue subjudice cases at appropriate fora, and submit comprehensive replies besides strengthening desk audit for enforcement of super tax.

[Annexure-10]

4.9 Non-taxation of income earned from head of other sources – Rs 26,227 million

According to Section 39 of the Income Tax Ordinance 2001, income of any kind earned by a person in a tax year shall be chargeable to tax in that year under the head “Income from Other Sources”, if the income is not included in any other head of income under the law.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in twelve (12) field offices of FBR, three hundred and eighty-five (385) taxpayers derived taxable income under the head “Income from Other Sources” but did not pay tax on that income. The assessing authorities did not initiate legal action to recover the tax. This resulted in short realization of tax amounting to Rs 26,227.45 million.

The lapse was pointed out from February to November 2023. The management replied that proceedings were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings besides strengthening the desk audit function. Moreover, the performance of the assessing officers should be gauged on the metric of new tax demand created and recoveries thereof.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.4.7, 4.4.15, 4.14 and 5.10 having a financial impact of Rs 5,229 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-11]

4.10 Inadmissible adjustment/claim of refund – Rs 3,437 million

Section 170 of the Income Tax Ordinance 2001, read with Circular No. 05 of 2003 of FBR, provides that a taxpayer who has paid tax in excess of tax liability is eligible for a refund subject to fulfilment of the prescribed conditions.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in twelve (12) field offices of FBR, forty-nine (49) taxpayers claimed excess refunds against tax liability for the tax years. The tax refund adjustments included credits of tax payments without verification of tax payment challans, adjustments of prior year's refunds in the absence of refund orders, or non-accountal of outstanding liabilities. The department did not take corrective action to recover the government dues. This resulted inadmissible issuance and adjustments of refunds amounting to Rs 3,437.09 million.

These irregularities were pointed out from February to November 2023. The management replied that Rs 1.00 million had been recovered, Rs 1,032.80 million had been charged but recovery was awaited, proceedings for Rs 1,135.83 million were initiated under the law but not finalized, no reply was furnished for Rs 201.11 million and amount of Rs 1,066.71 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and finalize legal proceedings besides strengthening post refund audits.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.5.1, 4.5.1, 4.4.1, 4.29 and 5.11 having a financial impact of Rs 13,654 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-12]

4.11 Non-realization of default surcharge on late payment of tax – Rs 11,108 million

According to Section 205 of the Income Tax Ordinance 2001, where a person fails to pay any tax on or before the due date of payment, the person shall be liable to pay default surcharge at the prescribed rate on the unpaid amount of tax.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in fourteen (14) field offices of FBR, two thousand six hundred and four (2604) taxpayers did not pay due tax within the prescribed time under the law. However, tax authorities did not levy and recover default surcharges from the taxpayers. This resulted in the non-realization of default surcharge amounting to Rs 11,114.62 million.

These irregularities were pointed out from February to November 2023. The management replied that Rs 6.74 million had been recovered, Rs 0.85 million had been charged but recovery was awaited, proceedings for Rs 4,465.96 million were initiated under the law but not finalized and no reply for Rs 6,641.07 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and finalize legal proceedings besides fixing of responsibility against the concerned for not enforcing default surcharge. Moreover, consistent enforcement of default surcharge needs to be ensured to prevent misuse of self-assessment regime.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.4.5, 4.4.10, 4.15 and 5.12 having a financial impact of Rs 7,177 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-13]

4.12 Non-recovery of income tax on sales to retailers, wholesalers and distributors - Rs 8,980 million

Sections 236 G & H of the Income Tax Ordinance 2001, provides for the collection of advance tax by manufacturers or commercial importers, distributors, dealers, wholesalers and

retailers at prescribed rates while making sales to specified persons. Further, Section 161 of the law *ibid* provides that in case of non-compliance the person responsible for collection will pay the tax.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in fifteen (15) field offices of FBR, one thousand two hundred and fifty-five (1,255) taxpayers did not collect advance tax from retailers, wholesalers and distributors at the time of sale. The department did not initiate legal proceedings which resulted in the non-recovery of tax amounting to Rs 8,991.57 million.

These irregularities were pointed out from February to November 2023. The management replied that Rs 11.50 million had been recovered, proceedings for Rs 1,164.44 million were initiated under the law but not finalized and no reply for Rs 7,815.52 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings and furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and finalize legal proceedings. Enforcement of tax on retailers, distributors and wholesalers should be ensured through risk based desk audit.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.4.7, 4.4.11, 4.23 and 5.14 having a financial impact of Rs 6,195 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-14]

4.13 Non-deduction of tax on income from property – Rs 814 million

Section 155, read with Section 161 of the Income Tax Ordinance 2001, provides that every prescribed person, while making a payment to any person in respect of rent of immovable property is required to deduct tax at the specified rates. In case of non-deduction, the Commissioner enforces the payment of tax by invoking provisions of Section 161 *ibid*.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in eleven (11) field offices of FBR, three hundred and twelve (312) taxpayers did not deduct the tax while making payments of rent to property owners. This resulted in non-recovery of withholding tax amounting to Rs 814.45 million.

The irregularity was pointed out from February to November 2023. The management replied that Rs 2.21 million had been charged but recovery was awaited, proceedings for Rs 812.24 million were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts besides monitoring of withholding agents for accurate deduction and timely deposit of tax in government's exchequer. Compliance of withholding regime needs to be ensured through Commissioner, IR (Withholding).

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.7.6, 4.7.10, 4.24 and 5.15 having a financial impact of Rs 1,881 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-15]

4.14 Non-deduction of tax on dividend – Rs 5,728 million

Section 150, read with Section 161 of the Income Tax Ordinance 2001, provides that every person paying a dividend shall deduct tax from the gross amount of the dividend at specified rates. In case of non-compliance, the person responsible for the tax deduction is required to pay the tax.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in five (05) field offices of FBR, twenty-nine (29) taxpayers did not deduct tax while making payments of dividend. However, the department did not recover the tax under the law. This resulted in the non-recovery of tax amounting to Rs 5,728.18 million.

These irregularities were pointed out from February to November 2023. The management replied that proceedings were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings and enforcement of monitoring controls over withholding agents. Compliance of withholding regime needs to be ensured through Commissioner, IR (Withholding).

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.7.4, 4.7.4, 4.22 and 5.16 having a financial impact of Rs 3,455 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-16]

4.15 Short-realization of income tax due to inadmissible claims of tax depreciation allowance – Rs 2,044 million

Sections 22 and 23 of the Income Tax Ordinance 2001, provide that a taxpayer is allowed normal and initial depreciation allowance at specified rate in a tax year on the written down value or purchase value of plant and machinery used for the first time in the business.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in six (06) field offices of FBR, thirty-two (32) taxpayers claimed normal and initial depreciation allowance on non-eligible assets (other than Property, Plant and Equipment). The department did not take corrective

action of disallowing the depreciation allowance and recover the due tax from the taxpayers. This resulted in a short-realization of income tax amounting to Rs 2,043.97 million.

These lapses were pointed out from February to November 2023. The management replied that Rs 9.63 million had been charged but recovery was awaited, proceedings for Rs 2,034.34 million were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts besides strengthening risk-based desk audit.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21 and 2022-23 vide para numbers 4.4.9, 4.4.17, 4.1(x) and 5.18 having a financial impact of Rs 2,102 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-17]

4.16 Short-realization of tax due to non-apportionment of expenses - Rs 920 million

Section 67 of the Income Tax Ordinance 2001, read with Circular No. 12 of 1991, provides for apportionment of expenses between income chargeable to tax under normal and final tax regimes in proportion to sales in the respective regime.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in four (04) field offices of FBR, eighteen (18) taxpayers earned income under normal and final tax regimes. However, the apportionment of expenses in proportion to sales was done incorrectly and higher expenses were allowed under the normal income tax regime. This resulted in less assessments of taxable income under the normal tax regime. The department did not amend assessment orders which resulted in short-realization of tax amounting to Rs 920 million.

The irregularity was pointed out from February to November 2023. The management replied that legal proceedings were initiated but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting legal proceedings and strengthening validation checks in return filing system for apportionment of expenses between final and normal tax regimes. Moreover, risk based desk audit needs to be strengthened besides periodic review and update of the RMS.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.4, 4.4.16, 4.1(xi), 4.10 and 5.20 having financial impact of Rs 1,684 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-18]

4.17 Non-recovery of tax on brokerage and commission – Rs 396 million

Section 233 read with Section 161 of the Income Tax Ordinance 2001, provides for tax to be deducted at prescribed rates while making payment to brokerage or commission. Section 161 provides that in case of non-compliance, the person responsible for the tax deduction will pay the tax.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in nine (09) field offices of FBR, one hundred and fourteen (114) taxpayers did not deduct the due amount of tax while making payments of brokerage and commission. However, the department did not take corrective action to recover the due amount of tax. This resulted in non-recovery of tax amounting to Rs 396.24 million.

These lapses were pointed out from February to November 2023. The management replied that Rs 0.99 million had been charged but recovery was awaited, proceedings for Rs 395.25 million were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and finalize the legal proceedings besides strengthening monitoring controls over withholding agents through risk based desk audit and effective utilization of IT based systems

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.7.5, 4.7.9, 4.25 and 5.21 having a financial impact of Rs 516 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-19]

4.18 Non-realization of income tax due to concealment of income – Rs 46,753 million

Section 111 of the Income Tax Ordinance 2001, provides a detailed procedure for taxation of concealed income. According to the provision where a person is the owner of any money or valuable article or has made any investment or credited any amount in his books of accounts, the amount is chargeable to tax if not adequately explained by the taxpayer.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in twelve (12) field offices of FBR, seven hundred and forty-one (741) taxpayers had either shown excess sales and purchases of different items in sales tax returns compared to income tax returns/financial statements or did not explain accretion in assets pertaining to the tax years 2017 to 2022. This implies that the taxpayers concealed their sales, purchases or assets to evade the due tax. The irregularity resulted in the non-realization of income tax of Rs 46,755.19 million.

These irregularities were pointed out from February to November 2023. The management replied that Rs 2 million had been recovered, Rs 16.93 million had been charged but recovery was awaited, proceedings for Rs 6,721.75 million were initiated under the law but not finalized, no reply for Rs 39,980.25 million was furnished and amount of Rs 33.56 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and finalize legal proceedings besides strengthening the integration of Federal and Provincial databases of land records, provincial revenue authorities, excise and taxation etc. Furthermore, cases of mis-statement uncovered due to discrepancies found in Federal and Provincial interfaces may be reported separately in the annual performance report.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21 and 2021-22 vide para numbers 4.4.2, 4.4.1, 4.1(iii) and 4.18 having a financial impact of Rs 55,460 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-20]

4.19 Short-realization of income tax on capital gains – Rs 26 million

According to Section 37(1) read with Section 111 of the Income Tax Ordinance 2001, a gain arising from the disposal of a capital asset by a person in a tax year, other than a gain that is exempt from tax under this Ordinance, shall be chargeable to tax in that year under the head "Capital Gains".

It was observed during the audit of the FYs 2021-22 and 2022-23, that in three (03) field offices of FBR, nine (09) taxpayers derived capital gains from the sale of immovable property during the tax year 2021 and 2022, but failed to pay the tax at prescribed rates. The department did not take any action to retrieve. This resulted in short realization of tax amounting to Rs 25.82 million.

The irregularity was pointed out from February to November 2023. The management replied that proceedings were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings and strengthening desk audit besides strengthening integration with SBP/NBP/SECP.

[Annexure-21]

4.20 Incorrect assessment under respective heads of income – Rs 77,404 million

Section 11 read with the First Schedule to the Income Tax Ordinance, 2001 provides respective head of income for taxation. These heads include income from Salary/Property/Business/Capital Gain and Other Sources. The First Schedule specifies rates for determination of tax liability of taxpayers.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in sixteen (16) field offices of FBR, for two hundred and two (202) cases tax liability was not computed under respective heads of income. The department did not take corrective action to ensure proper assessment of income and levy of tax under each head of income resulting in short levy of tax amounting to Rs 77,403.83 million.

The lapse was pointed out from February to November 2023. The management replied that proceedings for Rs 18,273.14 million were initiated under the law but not finalized, no reply for Rs 5,956.59 million was furnished and amount of Rs 53,174.10 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings, pursue subjudice cases, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends to pursue subjudice cases at appropriate fora, submit comprehensive replies besides strengthening risk-based desk audits.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21 and 2021-22 vide para numbers 4.4.8, 4.4.4, 4.1(i) and 4.1 having a financial impact of Rs 53,745 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-22]

4.21 Incorrect adjustment of brought forward losses – Rs 41,424 million

Section 57 of the Income Tax Ordinance, 2001 provides that if a taxpayer sustains a loss under the head income from the business for a tax year, the loss would be carried forward to the following six tax years and would be adjusted only against profit and gains of such business in the following tax years.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in six (06) field offices of FBR, income of fifteen (15) taxpayers was incorrectly assessed at losses. These losses were either assessed incorrectly or carried forward and set off against business income beyond the prescribed limit of six years. This resulted in short realization of Rs 41,424.19 million for Tax Years 2021 and 2022.

These irregularities were pointed out from February to November 2023. The management replied that proceedings for Rs 18,273.14 million were initiated under the law but not finalized and no reply for Rs 23,158.05 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings and introducing systematic checks in return filing systems to flag cases of abnormal brought forward losses besides strengthening risk-based desk audits.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.23, 4.4.2, 4.1(viii), 4.7 and 5.23 having a financial impact of Rs 34,455 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-22]

4.22 Irregular claim of tax credit – Rs 5,556 million

According to Section 100C of the Income Tax Ordinance, 2001 income of non-profit organizations, trusts or welfare institutions are allowed a tax credit equal to one hundred per cent of the tax payable on fulfilling certain conditions, which include that the administrative and management expenditure should not exceed fifteen percent of the total receipts.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in ten (10) field offices of FBR, four hundred and twenty-three (423) taxpayers were not entitled for the tax credits because the taxpayers claimed administrative and management expenditure in excess of the prescribed limit of fifteen percent (15%) of revenue. Therefore, their income was required to be assessed under the law without allowing the tax credit. This resulted in

non-levy of tax amounting to Rs 5,556.10 million.

These irregularities were pointed out from February to November 2023. The management replied that proceedings for Rs 856.82 million were initiated under the law but not finalized and no reply for Rs 4,699.28 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings and strengthening of risk-based monitoring of tax credits besides periodically reviewing and updating Risk Management System (RMS) in the light of repeated audit observations.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 vide para numbers 4.4.14, 4.4.14, 4.12 having a financial impact of Rs 1,937 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-24]

4.23 Irregular amendment of assessment orders – Rs 5,408 million

According to section 122(5) read with 177 of the Income Tax Ordinance, 2001 an assessment order in respect of tax year is only amended on the basis of definite information. The detail scrutiny of assessment orders may include; income chargeable to tax has escaped assessment and total income has been under-assessed or assessed at too low a rate.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in four (04) field offices of FBR, for seventy-seven (77) cases the taxation officers charged tax on the lower side than chargeable under normal tax regime in the amended assessment orders. The taxation officers allowed inadmissible expenses while finalizing the assessment orders. Further, the tax authorities while making the assessments adopted lower turnover declared by the taxpayer. This resulted in short levy of tax amounting to Rs 5,407.52 million. Some examples of major taxpayers are given as under:

1. M/s SM Traders (NTN# 5245511), registered with RTO-I, Karachi declared sales of Rs 399 million in sales tax return, while the sales declared in income tax return was Rs 9.9 million in Tax Year 2022. Thus, sales amounting to Rs 389

million were suppressed involving income tax of Rs 135 million. (DP No.2916-IT/K).

2. M/s Fortune Enterprises (NTN# 8289952), registered with RTO-I, Karachi declared sales of Rs 348 million in sales tax return, while the sales declared in income tax return was Rs 3 million in Tax Year 2022. Thus, sales amounting to Rs 345.136 million were suppressed involving income tax amounting to Rs 112 million (DP No.2916-IT/K).
3. M/s Regal Automobile Limited (NTN# 7256902), registered with MTO, Karachi declared sales of Rs 12,610 million in sales tax return, while the sales declared in the income tax return was Rs 12,294 million in Tax Year 2022. Thus, sales amounting to Rs 315 million were suppressed involving income tax of Rs 91 million (DP No.2859-IT/K).

These irregularities were pointed out from August to November 2023. The management replied that proceedings were initiated under the law but not finalized.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings besides fixing of responsibility against the concerned.

[Annexure-25]

4.24 Short-realization of tax due to excessive claim of tax credit on donations – Rs 479 million

According to Section 61 of the Income Tax Ordinance, 2001 a person shall be entitled to a tax credit in respect of any sum paid, or any property given by the person in the tax year as a donation, voluntary contribution or subscription. Further, the donation is restricted upto 30% of taxable income in respect of individuals or association of persons and 20% for corporate sector.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in five (05) field offices of FBR, fifty-nine (59) taxpayers while filing their income tax returns claimed tax credits on donations in excess of the prescribed limit. The assessing officers were required to disallow the excess claims of donations and charge the due tax, but the department did not charge the due amount of tax. This resulted in the short realization of tax amounting to Rs 479.17 million.

These irregularities were pointed out from February to November 2023. The management replied that proceedings for Rs 430.67 million were initiated under the law but not finalized and no reply for Rs 48.50 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings besides strengthening internal controls in return filing system for ensuring allowance of tax credit on donations within prescribed limit.

[Annexure-26]

4.25 Non-deduction of tax on salary income – Rs 238 million

According to Section 149 read with Section 161 of the Income Tax Ordinance, 2001 every employer paying salary to an employee is required to deduct tax from the amount of salary at the time of payment. The deduction is to be made at the average rate of tax computed at the rates specified in Division-I Part-I to the First Schedule.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in eight (08) field offices of FBR, tax on salary income of one hundred and six (106) taxpayers was not correctly deducted at the time of making payments. The department did not monitor and prevent non-deduction of tax on salary which resulted in the non-realization of tax amounting to Rs 238.46 million.

These irregularities were pointed out from February to November 2023. The management replied that proceedings for Rs 36.46 million were initiated under the law but not finalized and no reply for Rs 202 million was furnished.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings besides strengthening monitoring controls over withholding agents for accurate deduction and timely deposit of tax in government's exchequer.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.7.3, 4.7.8, 4.21 and 5.17 having a financial impact of Rs 1,823 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-27]

4.26 Short-realization of super tax – Rs 12,147 million

According to the provisions of Section 4B of the Income Tax Ordinance 2001, super tax shall be imposed for rehabilitation of temporarily displaced persons on the income of specified taxpayers. The tax shall be imposed at the rate of four percent (4%) in case of banking company.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in two (02) field offices of FBR, twenty-six (26) taxpayers did not pay super tax which resulted in short realization of super tax. The department did not initiate any legal proceedings to levy the super tax due to weak monitoring. This resulted in short-realization of super tax amounting to Rs 17,933.72 million.

These irregularities were reported to the department from February to November 2023. The department replied that Rs 5,786.92 million had been recovered, Rs 1,795.88 million had been charged but recovery was awaited and proceedings for Rs 4,018.60 million had been initiated but not finalized, no reply for Rs 6,022.14 million was furnished and Rs 310.18 million was subjudice.

The DAC, in its meetings held in July, August, December, 2023 and January 2024, directed the department to recover the amounts, finalize legal proceedings, furnish replies by 12th February 2024 and report compliance to Audit/FBR. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery, finalizing legal proceedings, and strengthening of risk based desk audit and periodic review/update of RMS based on audit observations.

Note: The issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.4.3, 4.4.3, 4.1(v), 4.4 and 5.9 having financial impact of Rs 37,336 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-28]

4.27 Non-realization of Capital Value Tax – Rs 490 million

Section 8 of the Finance Act 2022 provides that Capital Value Tax shall be levied, charged, collected and paid on the value of assets at the rates specified in the First Schedule. The tax shall be charged on the assets like motor vehicles and electric vehicles which are held in Pakistan. Foreign assets of a resident individual where the value of such assets in aggregate exceeds Rupees one hundred million (Rs 100,000,000) shall also be charged CVT at the rate of one percent (1%) of the value of asset.

It was observed during the audit of the FYs 2021-22 and 2022-23, that in three (03) field offices of FBR, fifty-eight (58) taxpayers neither paid Capital Value Tax (CVT) nor did the taxation officers initiate any legal proceedings to recover the due tax. This resulted in non-realization of Capital Value Tax amounting to Rs 490 million.

These irregularities were reported to the department from February to November 2023. The department replied that Rs 36.64 million had been recovered, Rs 190.94 million had been charged but recovery was awaited and proceedings for Rs 299.76 million had been initiated but not finalized.

The DAC in its meeting held on July and December, 2023 directed the field formations to finalize the legal proceedings as per law and report compliance to Audit/FBR within one month. No further progress was reported till finalization of this report.

The Audit recommends expediting recovery and finalizing legal proceedings besides ensuring the compliance of CVT through the office of Commissioner (Automatic Exchange of Information, AEOD).

[Annexure-29]

4.28 Non-realization of tax on deemed income – Rs 16 million

Section 7-E of the Income Tax Ordinance 2001 provides that a resident person shall be treated to have derived income chargeable to tax under this section as “deemed income”. This tax is to be charged at an amount equal to five percent (5%) of the fair market value of capital assets situated in Pakistan as per rates specified in the First Schedule. This tax is a final tax and is not to be reduced by any tax credits.

It was observed during the audit of FY 2022-23, that in four (04) field offices of FBR, that eleven (11) taxpayers neither paid tax on deemed income nor did the taxation officers initiate any legal proceedings to recover the due tax. This resulted in non-realization of tax on deemed income amounting to Rs 16 million.

These irregularities were reported to the department from February to November 2023. The department replied that cases were under examination/ scrutiny.

The DAC in its meeting held in July and December 2023, directed the field formations to finalize under process cases as per law and report compliance to Audit/FBR within one month. No further progress was reported till finalization of this report.

The Audit recommends finalize under process cases besides strengthening risk-based desk audits and monitoring of deemed income.

[Annexure-30]

4.29 Non-verification of agricultural income – Rs 428 million

According to Section 111 read with 41 of the Income Tax Ordinance 2001, provides that the taxpayer is eligible for exemption of agricultural income to the extent of such income which calculated on the basis of work back of agriculture income tax paid under the relevant provincial laws.

It was observed during the audit of the FYs 2021-22 and 2022-23, in two (02) field offices of FBR, one hundred and forty-five (145) taxpayers claimed exemption of agricultural income, but the evidence of work back of agricultural income tax and land tax as per provincial law was not ascertained/verified by the department. This resulted in non-verification of exempt agriculture income amounting to Rs 427.64 million.

These irregularities were reported to the department from February to November 2023. The department replied that cases were under examination/ scrutiny.

The DAC in its meetings held in July and December 2023, directed the field formations to finalize under process cases and report compliance to Audit/FBR within one month. No further progress was reported till finalization of the report.

The Audit recommends finalization of under process cases besides enforcement and monitoring of agricultural income through measures including interlinkage with database of Board of Revenue of the respective province. The omission may be justified and evidence for the payment of provincial taxes may be furnished to the Audit.

[Annexure-31]

CHAPTER-5 SALES TAX

5.1 Non-realization of sales tax due to concealment of sales – Rs 26,831 million

According to Section 3(1) read with Section 26 of the Sales Tax Act, 1990 there shall be charged, levied and paid sales tax at the prescribed rates on the value of taxable supplies made by a registered person. Further, every registered person shall furnish a true, complete and correct return in the prescribed form.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in fifteen (15) field offices of FBR, six hundred and ten (610) registered persons declared less sales in sales tax returns as compared with income tax returns. Further, the registered persons either declared less production (compared to electricity bills) or less value addition. The department did not initiate legal proceedings to recover the due tax. This resulted in non-realization of sales tax amounting to Rs 26,831.26 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 1,062.17 million were under recovery, legal proceedings for Rs 11,174.93 million had been initiated, Rs 14,562.80 million were under adjudication, and in cases amounting to Rs 31.36 million no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January 2024, directed the department to expedite the recovery, complete the legal/adjudication proceedings and submit comprehensive replies. No further progress was reported till the finalization of this report.

The Audit recommends to ensure expeditious recovery of government revenue and ensure comprehensive integration of sales tax and income tax return filing systems besides strengthening risk-based desk audit.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20 and 2022-23 vide para numbers [4.1.3, 4.1.13, 4.1.18], [4.1.2, 4.1.13] and [5.12, 6.2.3.11] respectively having a financial impact of Rs 26,540.14 million. The recurrence of the same irregularity is a matter of serious concern.

5.2 Inadmissible adjustment of input tax credit on invoices of suspended/blacklisted taxpayers – Rs 17,723 million

According to Section 21 of the Sales Tax Act 1990, during the period of suspension of registration, the invoices issued by such person shall not be entertained for the purposes of sales tax refund or input tax credit, and once such person is blacklisted, the refund or input tax credit claimed against the invoices issued by him, whether prior or after such blacklisting, shall be rejected through a self-speaking appealable order and after affording an opportunity of being heard to such person.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in seven (07) field offices of FBR, one hundred and thirty-two (132) registered persons adjusted input tax credit against invoices issued by blacklisted/suspended registered persons. The tax authorities did not monitor or initiate legal proceedings to recover the due tax. This resulted in inadmissible adjustment of input tax amounting to Rs 17,722.54 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 318.58 million were under recovery, legal proceedings for Rs 1,5051.16 million had been initiated, Rs 1,991.71 million were under adjudication, Rs 132.72 million were pending in courts and in cases amounting to Rs 228.37 million, no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, pursue the subjudice cases and submit comprehensive reply. No further progress was reported till the finalization of this report.

The Audit recommends expediting the legal proceedings. Furthermore, IT-system based controls should be introduced to disallow/defer input adjustments claimed on invoices issued by black-listed/suspected registered persons.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide paras number 5.5.4, 4.1.7, 5.2 & 6.2.3.10 respectively having a financial impact of Rs 11,023.19 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-33]

5.3 Evasion of sales tax due to issuance of fake/flying invoices - Rs 9,978 million

According to Section 8A and 8(1)(d) of the Act *ibid*, where a registered person receiving a taxable supply of the goods suspects that the goods were supplied without payment of due tax, such person as well as the person making the taxable supply shall be jointly and severally liable for payment of such unpaid amount of tax. Moreover, a registered person shall not be entitled to reclaim or deduct input tax paid on fake invoices.

It was observed during the audit of the FY 2022-23 that in two (02) field offices of FBR, three (03) registered persons declared huge purchases of taxable goods and adjusted input tax against output tax in their sales tax returns. Further probe of these abnormal transactions revealed that the suppliers of the taxpayers in supply chain were not paying any sales tax due to the reason that they

had adjusted fake credit notes against output tax. Resultantly, their liability of sales tax was in the negative. The lapse resulted in evasion of sales tax amounting to Rs 9,977.52 million.

These irregularities were reported to the department from August to November, 2023. RTO Peshawar replied that investigation and audit proceedings had already been initiated. Accordingly, taxpayers were blacklisted and show-cause notices were also issued. Further, FIRs were also lodged before Customs Judge, Peshawar. In case of RTO Lahore, it was informed that as per taxpayer's profile, the declared address of the registered person was Skardu. Therefore, a letter had been issued to the Second Secretary (Jurisdiction), FBR for the transfer of the case to the concerned office i.e. RTO Abbottabad on the point of jurisdiction.

The DAC, in its meeting held in January, 2024 directed the department to share the outcomes of proceedings and submit progress to Audit and FBR. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery of the revenue besides strengthening controls to verify the registered person's input data and vetting of actual particulars like business address etc. at the time of registration by concerned tax office.

[DP Nos.22409-ST & 22410-ST]

5.4 Short-realization of sales tax due to non-apportionment of input tax – Rs 7,735 million

According to Section 8(2) of the Sales Tax Act 1990, a registered person can reclaim only such proportion of input tax which is attributable to taxable supplies. Adjustment of input tax on raw-materials relating to exempt supplies is not admissible. Further, Section 8(1)(m) read with Section 73(4) of the Act provides that a registered person shall not be entitled to deduct input tax which is attributable to taxable supplies to unregistered persons in excess of the prescribed limit given in the law.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in fourteen (14) field offices of FBR, one hundred and fifty-three (153) registered persons either adjusted input tax on exempt supplies or made sales to unregistered persons in excess of the prescribed threshold. The registered persons were required to apportion the input tax between taxable and exempt supplies and against sales made to unregistered persons to arrive at their liability. However, entire amounts of input tax were adjusted without subject apportionment. The tax authorities did not initiate proceedings to recover the due tax. This resulted in short-realization of sales tax due to non-apportionments of input tax amounting to Rs 7,735.10 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 524.45 million were under recovery, legal

proceedings for Rs 1,748.58 million had been initiated, Rs 4,970.83 million were under adjudication, and in cases amounting to Rs 491.24 million, no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery and legal proceedings and strengthen risk-based desk audits besides introducing systematic checks in the sales tax return filing system to link and cross-verify the claimed input for apportionment between taxable and exempt supplies.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide paras number 4.1.7, 4.1.8, 5.2(i), 5.1 & 6.6 respectively having a financial impact of Rs 13,164.78 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-34]

5.5 Non-recovery of adjudged dues – Rs 5,474 million

According to Section 48 of the Sales Tax Act 1990 read with Sales Tax Rules 2006, sales tax due from any person shall be recovered by sales tax officers in accordance with the prescribed procedure.

It was observed during the audit of the FYs 2021-22 and 2022-23 that ten (10) field offices of FBR, in two hundred and twenty-seven (227) cases, did not take prescribed measures for recovery of adjudged dues, like freezing of bank accounts, attachment and sale of moveable/immovable property even after the lapse of considerable time period. This resulted in non-recovery of Rs 5,473.53 million.

These lapses were reported to the department from February to November 2023. The management replied that cases amounting to Rs 2,097.94 million were under recovery, Rs 2,883.00 million were under re-adjudication, and cases amounting to Rs 492.59 million, were pending in courts.

The DAC, in its meetings held in July, August, December 2023 and January, 2024, directed the department to expedite the recovery and pursue the subjudice cases. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery and legal proceedings, regular follow up by higher authorities in cases of adjudged dues, and devising performance indicators for average timelines during assessment proceedings.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide paras number 4.1.5, 4.1.3, 5.13 & 6.1 respectively having a financial

impact of Rs 68,727.68 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-35]

5.6 Inadmissible adjustments of input tax credits against sales tax deducted by withholding agents – Rs 3,754 million

According to Section 8A of the Sales Tax Act, 1990, where a registered person receiving a taxable supply of the goods suspects that the goods were supplied without payment of due tax, such person as well as the person making the taxable supply shall be jointly and severally liable for payment of such unpaid amount of tax.

It was observed during the audit of the FY 2021-22 that in three (03) field offices of FBR, six hundred and eighty-seven (687) registered persons reduced their sales tax liability by the amount of withholding tax credit deducted by their buyers. The buyers either filed nil or did not file sales tax returns at all. This resulted inadmissible adjustments of input tax credits amounting to Rs 3,754.14 million.

These irregularities were reported to the department from February to November 2023. The department replied that cases of Rs 2.72 million were under recovery, Rs 7.91 million were under adjudication, and legal proceedings for Rs 3,743.51 million had been initiated.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery and adjudication/ legal proceedings. No further progress was reported till the finalization of this report.

The Audit recommends expediting legal/adjudication proceedings besides enforcement of monitoring controls provided in the law. Compliance of withholding regime needs to be ensured through Commissioner, IR (Withholding).

[Annexure-36]

5.7 In-admissible exemption of sales tax – Rs 3,458 million

According to Section 3(1)(a) of the Sales Tax Act 1990, sales tax is chargeable at prescribed rates of the value of taxable supplies. Further, as per Section-13 ibid, goods specified in Sixth Schedule of the Act ibid, shall be exempt from sales tax.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in fifteen (15) field offices of FBR, three hundred and seven (307) registered persons made supplies of taxable goods (i.e. waste, scrap, fixed assets, free electricity, rice husk and oil by cotton ginner etc.), however, the sales tax was not levied or paid against such supplies. The registered persons claimed inadmissible exemption on supply of taxable goods which resulted in non-realization of sales tax amounting to Rs 3,458.16 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 232.42 million were under recovery, legal proceedings of Rs 1,795.33 million had been initiated, Rs 668.81 million were under adjudication, and in cases amounting to Rs 761.60 million, no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends prompt action in cases not finalized and fixing of responsibility for inordinate delay/lapse against the person(s) at fault besides ensuring 100% desk audit of claimed exemptions.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers [4.1.11, 4.1.14, 4.1.15, 4.1.29], [4.1.5, 4.1.15, 4.1.16, 4.1.21], 5.1(i), 5.5, and [6.7, 6.11] respectively having a financial impact of Rs 14,162.97 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-37]

5.8 Short-realization of sales tax due to inadmissible adjustments of input tax credits – Rs 3,149 million

According to Section 8(1) of the Sales Tax Act 1990, input tax adjustment is not admissible on goods or services where sales tax has not been deposited in the government treasury by the respective supplier and where goods have not been used in taxable supplies.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in fourteen (14) field offices of FBR, two hundred and thirty-two (232) registered persons adjusted input tax against purchase invoices of goods where either input tax was not deposited by the suppliers or the goods were not used in manufacturing/taxable supplies. The department failed to monitor and initiate legal proceedings to recover the due tax in these cases. These inadmissible input tax adjustments resulted in short-realization of sales tax amounting to Rs 3,148.85 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 19.86 million were under recovery, legal proceedings for Rs 2,783.02 million had been initiated, Rs 298.98 million were under adjudication, and in cases amounting to Rs 46.99 million, no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery and finalization of legal proceedings besides fixing of responsibility against the person(s) at fault. Further, systematic checks in the sales tax return filing system be introduced to link and cross-verify claimed credit.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide paras number 4.1.2, 4.1.4, 5.2(ii), 5.3 and 6.2 respectively having a financial impact of Rs 32,431.27 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-38]

5.9 Unlawful retention of public money in private bank account - Rs 1,155 million

Article 78 of the Constitution of Islamic Republic of Pakistan 1973, provides that all moneys received by the federal government or other moneys received by or on behalf of Federal Government are either part of Federal Consolidated Fund or Public Account. Further, according to Cash Management & Treasury Single Account Policy 2019-2029, all amounts of Public money shall be reverted to the TSA, within the frame work of different authorized accounts of Government in the State Bank of Pakistan. Moreover, if any account is opened in a scheduled bank without a specific authorization by the Federal Government, disciplinary proceedings shall be initiated against the head of the organization and Principal Accounting Officer concerned under the relevant laws/rules.

It was observed during the audit of the FY 2022-23 of FBR (HQ), Islamabad, that service charges at the rate of Rs 1 per invoice had been collected and deposited by retailers integrated with the Board's Point of Sales (POS) system. The proceeds were deposited in a private bank account of Allied Bank Limited, Blue Area, Islamabad. The Commissioner retained the money in a private bank account without the authorization of Finance Division and in violation of provisions of Public Finance Management Act 2019 and Treasury Single Account Policy. This resulted in unlawful retention of public money in private bank amounting to Rs 1,155.13 million.

The lapse was pointed out to the department during September, 2023 with the request that the reason for non-deposit of public money into federal treasury may be explained and transfer the money into government exchequer under intimation to Audit. FBR (HQ) replied that money collected is a non-tax revenue and deposited in the Common Pool Fund Account maintained after the approval of the competent authority.

The Audit holds that Point of Sale (POS) fee has been levied through SRO No.1279(I)/2021 dated 30.09.2021 issued under Sales Tax Act 1990, therefore, is part of Consolidated Fund. Thus, the amount was required to be deposited in Treasury Single Account (TSA) instead of a private bank account.

The DAC, in its meeting held in January, 2024 directed the department to deposit the money into national exchequer. No further progress was reported till the finalization of this report.

The Audit recommends to deposit the money along with interest in the public exchequer.

5.10 Non-imposition of penalties and default surcharge – Rs 870 million

According to Section 33, read with Section 34 of the Sales Tax Act 1990, if a person fails to furnish a return within the due date, such person shall pay a penalty of ten thousand rupees (Rs 10,000). Further, if any person who knowingly or fraudulently makes a false statement, such person shall pay a penalty of twenty-five thousand rupees (Rs 25,000) or one hundred per cent (100%) of the amount of tax involved, whichever is higher. Moreover, a registered person who does not pay the due tax or any part thereof in time is liable to pay a default surcharge in addition to the due tax.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eighteen (18) field offices of FBR, in cases of two thousand one hundred and sixty-three (2163) taxpayers, did not impose penalty and default surcharge. The registered persons either did not submit sales tax returns or submitted the returns late or deposited the sales tax after due dates. The department did not initiate legal proceedings against these registered persons. This resulted in non-imposition of penalties and default surcharge amounting to Rs 869.95 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 19.24 million were under recovery, legal proceedings for Rs 645.26 million had been initiated, Rs 43.46 million were under adjudication, and in cases amounting to Rs 161.99 million, no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery/adjudication/legal proceedings and submitting updated replies besides enforcement of leviable penalties and default surcharge.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide paras number 4.1.46, 4.1.18, 5.14 & 6.10 respectively having a financial impact of Rs 2,274.47 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-39]

5.11 Short payment of sales tax due to mis-declaration in tax return/record - Rs 708 million

According to Section 11A of the Sales Tax Act 1990, where a registered person pays the amount of tax less than the tax due as indicated in his return, the less paid amount of tax along with default surcharge shall be recovered from such person by stopping/removal of any goods from his business premises and through attachment of his business bank accounts, without giving him a show cause notice.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in four (04) field offices of FBR, twenty-six (26) registered persons paid less sales tax than the liability depicted in their annual financial statements. The tax authorities did not take action to recover the amount from the taxpayers despite the fact that both set of data i.e. sales tax returns and financial statements were available with the department. The lapse resulted in short payment of sales tax amounting to Rs 708.10 million.

These irregularities were reported to the department during February to November 2023. The management replied that legal proceedings for Rs 673.31 million had been initiated and cases amounting to Rs 34.79 million were under adjudication.

The DAC, in its meetings held in July, August, December 2023 and January 2024, directed the department to expedite legal/adjudication proceedings.

The Audit recommends to finalize adjudication proceedings, besides implementing risk-based desk audit and monitoring of financial statements.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2021-22 and 2022-23 vide paras number 5.10 and 6.14 respectively having a financial impact of Rs 280.26 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-40]

5.12 Inadmissible payment of sales tax refunds – Rs 513 million

Section 10 of the Sales Tax Act 1990 read with Rule-33 of the Sales Tax Refund Rules 2006, provides that refund shall be paid to the extent of the input tax paid on purchases/imports that are actually consumed in the production. Moreover, according to Section 73 of the Act *ibid*, transactions exceeding the value of fifty thousand rupees shall be made through banking channels. Furthermore, as per Rule 39B of Chapter V-A of the Rules *ibid*, FASTER Module for sales tax refund apply to refund claims for the tax period July, 2019, and onwards, as filed by the exporters of five export-oriented sectors namely textile, carpets, leather, sports goods and surgical instruments on account of export of goods.

It was observed during the audit of the FYs 2021-22 and 2022-23 that six (06) field offices of FBR, in sixty-nine (69) cases, sanctioned and paid refunds in excess of the input tax consumed in zero-rated/exported goods or without verifying the proof of payments through banking channels or variation of stocks. Moreover, in sixty-two (62) cases sales tax refund was sanctioned to the claimants who did not fall in the category of five export oriented sectors. This resulted in inadmissible payment of sales tax refunds of Rs 513.13 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 9.64 million were under recovery, legal proceedings for Rs 499.29 million had been initiated and Rs 4.20 million were under adjudication.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery and complete the legal/adjudication proceedings. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery and to finalize the legal proceedings besides initiating disciplinary proceedings against the person(s) at fault.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2019-20, 2020-21, 2021-22 and 2022-23 vide paras number [4.2.1, 4.2.2], [4.2.1, 4.2.2], 5.6, [5.19, 5.20] and 6.4 respectively having a financial impact of Rs 7,119.22 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-41]

5.13 Non-withholding of sales tax – Rs 501 million

According to Section 3(7) read with S.No.4 & 5 of the Eleventh Schedule of the Sales Tax Act 1990, a tax is to be withheld at prescribed rates by any person or class of persons being (purchaser of goods or services) as withholding agent for depositing the same. Corporate sector is responsible for withholding sales tax @5% on purchases from persons other than active taxpayers. In case of advertisement services, the registered persons shall withhold the whole of the applicable sales tax.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in ten (10) field offices of FBR, one hundred and four (104) registered persons did not withhold sales tax on payment of goods purchased from unregistered persons or on account of advertisement services. The tax authorities did not initiate legal proceedings to recover the due tax. This resulted in non-withholding of sales tax amounting to Rs 500.97 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 56.46 million were under recovery, legal proceedings for Rs 267.87 million had been initiated, Rs 149.63 million were under adjudication, and in cases amounting to Rs 27.01 million no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery and to finalize adjudication and initiating legal proceedings where action is awaited besides fixing of responsibility against the person(s) at fault. Moreover, effective monitoring of withholding taxes through automated system be ensured.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide paras number 4.7.1, 4.7.1, 5.17 and 6.3 respectively having a financial impact of Rs 13,270.31 million. The recurrence of the same irregularity is a matter of serious concern.

5.14 Excess adjustments of input tax – Rs 229 million

According to Section 8B of the Sales Tax Act 1990, a registered person shall not be allowed to adjust input tax in excess of ninety per cent (90%) of the output tax for the tax period for which the return was filed.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in three (03) field offices of FBR, thirty-one (31) registered persons adjusted the whole amount of input tax against output tax instead of the permissible limit of ninety percent (90%) of output tax. The department did not initiate legal action to recover the revenue. This resulted in excess adjustment of input tax amounting to Rs 228.74 million.

These irregularities were reported to the department from February to November 2023. The department replied that cases amounting to Rs 15.42 million were under adjudication and legal proceedings for Rs 213.32 million had been initiated.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to complete the legal/adjudication proceedings. No further progress was reported till the finalization of this report.

The Audit recommends to finalize adjudication/legal proceedings besides instituting risk based desk audits and implementing validation checks in the return filing system to automatically disallow adjustments beyond the prescribed limit.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide paras number 4.1.33, 4.1.14, 5.6 & 6.12 respectively having a financial impact of Rs 1,671.97 million. The recurrence of the same irregularity is a matter of serious concern.

5.15 Non-realization of sales tax due to in-admissible claim of zero rating of tax – Rs 208 million

According to Section 4 read with the Fifth Schedule of the Sales Tax Act 1990, goods specified therein shall be charged to tax at the rate of zero per cent. Further, as per Section 3(1)(a) of the Act *ibid*, sales tax is chargeable at prescribed rate of the value of taxable supplies.

It was observed during the audit of the FY 2022-23 that in three (03) field offices of FBR, seven (07) registered persons, claiming zero rated supplies, made supplies of taxable goods (i.e. molasses, cotton and pharmaceutical goods etc.). Resultantly, the sales tax was not paid against such supplies. The registered persons claimed inadmissible zero rating on supply of taxable goods and the department did not monitor these cases which resulted in non-realization of sales tax amounting to Rs 208.01 million.

These irregularities were reported to the department from September to November 2023. The management replied that cases amounting to Rs 51.12 million were under adjudication and no reply was furnished for Rs 156.89 million.

The DAC, in its meeting held in January, 2024 directed the department to complete the adjudication proceedings and submit comprehensive replies. No further progress was reported till the finalization of this report.

The Audit recommends prompt action in finalization of the cases and fixing of responsibility against the person(s) at fault besides strengthening risk based desk audits and periodic review/update of RMS based on audit observations.

[Annexure-44]

5.16 Non-realization of further tax – Rs 163 million

According to Section 3(1A) of the Sales Tax Act 1990, in case of a supply of taxable goods to unregistered persons, further tax at the rate of three per cent (3%) shall be charged on the value in addition to the rate specified in Section 3 and 4 of the Act.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in ten (10) field offices of FBR, forty-two (42) registered persons made taxable supplies to unregistered persons, however, the applicable further tax was not realized under the law. The tax authorities did not initiate legal proceedings to recover the due tax. This resulted in the non-realization of further tax amounting to Rs 163.29 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 1.78 million were under recovery, legal proceedings for Rs 103.53 million had been initiated, Rs 42.86 million were under adjudication, and in cases amounting to Rs 15.12 million, no response was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery and to finalize adjudication/ legal proceedings besides strengthening IT based controls to apply further tax in cases where sales are made to unregistered buyers.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.1.17, 4.1.11, 5.3, 5.7 & 6.8 respectively having a financial impact of Rs 3,974.47 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-45]

5.17 Short-realization of sales tax due to application of incorrect tax rates – Rs 100 million

According to section 3 of the Sales Tax Act, 1990, there shall be charged levied and paid sales tax at the rate of eighteen percent (18%) of the value of taxable supplies made by a registered person in the course or furtherance of any taxable activity carried on by him. Furthermore, according to SRO 297(I)/2023 dated 8th March, 2023, the rate of sales tax has been prescribed at twenty-five per cent (25%) on supply of certain goods.

It was observed during the audit of the FY 2022-23 that in three (03) field offices of FBR, twenty (20) registered persons made supplies of taxable goods and charged sales tax at lower than the applicable rate against such supplies. The department did not initiate legal proceedings to recover the government dues. This resulted in short-realization of sales tax amounting to Rs 99.91 million.

These irregularities were reported to the department from September to November, 2023. The management replied that cases amounting to Rs 1.41 million were under recovery and Rs 98.50 million were under adjudication.

The DAC, in its meetings held in January, 2024 directed the department to expedite the recovery and complete the adjudication proceedings. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery/legal proceedings and prompt re-assessment of correct sales tax liability besides strengthening risk based desk audits.

[Annexure-46]

5.18 Non-realization of minimum sales tax liability – Rs 31 million

According to Rule 157 of Sales Tax Rules 2006, if a registered person fails to file a return by the due date, his minimum liability would be determined in the prescribed manner. Moreover, Rule 158 (1) of the law ibid provides that the minimum tax liability of the registered person for a tax period shall not be less than the highest amount of tax paid by the registered person in any of the tax periods during the previous twelve months.

It was observed during the audit of the FYs 2021-22 and 2022-23 that in three (03) field offices of FBR, fifteen (15) registered persons did not file sales tax returns for certain tax periods. The tax authorities were required to recover minimum tax liability, however, no efforts were made to recover the government revenue. This resulted in non-realization of minimum tax liabilities of Rs 31.13 million.

These irregularities were reported to the department in February to November 2023. The department replied that cases of Rs 2.56 million were under recovery, legal proceedings for Rs 8.40 million had been initiated, Rs 4.70 million were under adjudication, and in cases of Rs 15.47 million, no response was furnished by the department.

The DAC, in its meetings held in August, 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends to expedite the legal/adjudication proceedings, incentivize early submission of sales tax returns and consistent enforcement of minimum tax and penalties where returns are not submitted timely.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2020-21, 2021-22 and 2022-23 vide paras number 4.1.28, 5.1(ii), 5.11 and 6.15 respectively having a financial impact of Rs 575.76 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-47]

5.19 Non-registration of potential taxpayers liable for registration - Rs 4,632 million

According to Section 2(5AB), 2(25) & 14 of the Sales Tax Act, 1990, every person engaged in making taxable supplies in Pakistan, including zero-rated supplies, any manufacturer having turnover of taxable supplies of more than eight million rupees (Rs 8,000,000) or having an industrial gas or electricity connection, if not already registered, is required to be registered under this Act. Further, Section 3, read with Section 26 of the Act, provides that any person making taxable supplies shall pay sales tax at the prescribed rate and furnish true and correct information while filing his sales tax return.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eight (08) field offices of FBR did not register two thousand thirty-eight (2038) persons even though they are manufacturer, retailer, distributor, wholesaler, dealer, and having large volume of business as evident from income tax record and met the prescribed conditions for compulsory sales tax registration. Non-registration of taxpayers resulted in potential tax effect amounting to Rs 4,632.24 million.

These irregularities were reported to the department from February to November 2023. The department replied that legal proceedings for Rs 4,073.61 million had been initiated, Rs 219.02 million were under adjudication, and in cases amounting to Rs 339.61 million, no reply was furnished by the department.

The DAC, in its meetings held in July, August, December 2023 and January 2024, directed the department to expedite the recovery, complete the legal/adjudication proceedings, and submit comprehensive reply where no response was furnished. No further progress was reported till the finalization of this report.

The Audit recommends to finalize adjudication/legal proceedings besides introduction of systematic checks in the return filing systems to flag such cases. In addition to above, monitoring mechanisms for high value transactions may be evolved and reviewed periodically.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.1.16, 4.1.23, 5.5, 6.2.3.3 & 6.2.3.12 respectively having a financial impact of Rs 2,814.26 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-48]

5.20 Non-conduct of post-refund audit

According to Rule 36(1) of the Sales Tax Refund Rules 2006, after disposing of the refund claims, the officer-in-charge shall forward the relevant file to the Post Refund Audit Division for post-refund audit, which shall include verification of input tax payment by respective suppliers along with compliance of Section 73 of the Sales Tax Act 1990.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eleven (11) field offices of FBR, in two thousand four hundred and ninety-nine (2499) cases, paid sales tax refund amounting to Rs 61,217.06 million. However, post refund audit (PRA) was not conducted to verify input tax consumption in zero-rated/exported goods. The authenticity of refund could not be established without conducting post refund audit.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 22.79 million were under recovery, legal proceedings for Rs 20,752.43 million had been initiated, Rs 172.38 million were under adjudication, and in cases amounting to Rs 40,269.46 million, no response was furnished by the department. The Audit requires the department to disclose number of post refund audits conducted and share the findings with the Audit.

The DAC, in its meetings held in July, August, December 2023 and January, 2024 directed the department to expedite the recovery, complete the legal/adjudication proceedings and submit updated reply in non-responded cases. No further progress was reported till the finalization of this report.

The Audit recommends expediting the recovery and finalization of post-refund audit and legal proceedings in the cases pointed out by the audit, improving the post-refund audit system, and sharing the post refund audit reports with the external Audit for effective feedback.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2020-21, 2021-22 and 2022-23 vide paras number 5.5.1, 5.17, 5.21 & 6.17 respectively having a financial impact of Rs 27,614.78 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-49]

CHAPTER-6 FEDERAL EXCISE DUTY

6.1 Non/short-realization of Federal Excise Duty – Rs 2,773 million

According to section 3 of the Federal Excise Act, 2005, there shall be levied and collected federal excise duty on excisable goods at prescribed rates.

It was observed during the audit of the FYs 2020-21 and 2021-22 that two (02) field offices of FBR, in eight (08) cases did not levy and collect federal excise duty amounting to Rs 2,772.78 million on dutiable goods (franchise fee, cement, natural gas & motor vehicles). This resulted in non/short realization of federal excise duty amounting to Rs 2,772.78 million.

These irregularities were reported to the department from February to November 2023. The management replied that cases amounting to Rs 37.72 million were under adjudication, Rs 2,712.19 million were under process and in cases amounting to Rs 22.87 million, no response was furnished by the department.

The DAC in its meetings held in July, August, December 2023 and January, 2024 directed the department to finalize the under process cases, adjudication proceedings and showed its serious concern in non-responded cases. No further progress was reported till the finalization of this report.

The Audit recommends to finalize the under process cases/adjudication proceedings and reinforcing integration of return filing systems besides strengthening risk based desk audits.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2019-20, 2021-22 and 2022-23 vide para number 4.3.1, 6.3 & 6.4 and 7.1 respectively having a financial impact of Rs 3,076.06 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-50]

6.2 Non-realization of default surcharge – Rs 194 million

According to Section 8 of the Federal Excise Act, 2005, if a person does not pay the duty due or any part thereof within the prescribed time or receives a refund of duty or drawback or makes an adjustment which is not admissible to him, he shall, in addition to the duty due, pay default surcharge at the rate of twelve per cent (12%) per annum of the duty due, refund of duty or drawback.

It was observed during the audit of the FY 2021-22 that in Large Taxpayer Office Karachi, five (05) registered persons deposited amount of federal excise duty after the due dates which attracted levy of default surcharge. The same was not imposed by the department which resulted in non-realization of default surcharge amounting to Rs 193.62 million.

These irregularities were reported to the department from March to June 2023. The management replied that Rs 193.62 million were under process.

The DAC in its meetings held in July and December 2023 directed the department to finalize the under process cases. No further progress was reported till the finalization of this report.

The Audit recommends to expedite under process cases, incentivize early submission of returns, and consistent enforcement of penalties.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2019-20, 2021-22 and 2022-23 vide para number 4.3.2, 6.6 and 7.2 respectively having a financial impact of Rs 1,441.10 million. The recurrence of the same irregularity is a matter of serious concern.

[DP No.7126-FED]

6.3 Non/short deposit of federal excise duty on air tickets – Rs 155 million

According to Rule 41A (14) of the Federal Excise Rules, 2005, the airlines shall deposit in the treasury of Government of Pakistan, the entire amount of excise duty collected on international air travel without making any input tax adjustments.

It was observed during the audit of the FY 2020-21 that in Medium Taxpayers Office (MTO), Karachi, M/s Air Arabia (NTN 7190459) did not deposit due amount of federal excise duty during the tax period February and March 2021. Moreover, the department did not initiate any proceedings/action to recover the duty. The omission resulted in non/short payment of FED amounting to Rs 154.80 million.

The irregularity was reported to the department in March 2023. The management replied that Rs 154.80 million were under process.

The DAC in its meeting held in July and December 2023 directed the department to finalize the under process cases. No further progress was reported till the finalization of this report.

The Audit recommends to finalize under process cases besides strengthening risk-based desk audits.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19 and 2021-22 vide para number 4.3.1 and 6.1 respectively having a financial impact of Rs 7,114.51 million. The recurrence of the same irregularity is a matter of serious concern.

[DP No. 7129-FED]

CHAPTER-7 CUSTOMS DUTY

(2) 7.1 *Blockage of revenue due to non-disposal of confiscated goods/vehicles - Rs 13,556 million*

According to section 182 of the Customs Act 1969, read with sections 82, 89, 169 and 201 *ibid*, Customs General Order 12 dated 15.06.2002, and Rule 58(1) of the Customs Rules 2001, confiscated goods are required to be disposed of after observing codal formalities within the shortest possible time.

It was observed during the audit of the FYs 2021-22 and 2022-23 that twenty-four (24) field offices of FBR, in four thousand seven hundred and eleven (4,711) cases did not dispose-of confiscated goods, including vehicles and valuables, i.e. gold, silver and foreign currency, as per law. Goods/vehicles were lying in warehouses since 2017 which may result in declining value/quality/fitness for human consumption. This resulted in a blockage of revenue of Rs 13,556.30 million.

These instances were pointed out from February to November 2023. The management replied that cases amounting to Rs 128.32 million were under recovery, Rs 13,095.69 million under process, Rs 151.02 million were pending in adjudication, and Rs 123.48 million were pending in court. The management contested an amount of Rs 57.79 million on the plea that the goods were auctioned under auction rules by accepting highest bids. Audit holds that fetching of bids below reserved price is due to delayed auction of goods.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts and submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursuance of cases under adjudication, and submission of comprehensive replies besides fixing of responsibility on the person(s) at fault.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.5, 4.8.1, 7.3, 7.16 and 8.2 respectively having financial impact of Rs 24,498.51 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-51]

7.2 **Loss of revenue due to inadmissible exemptions/concessions in duties and taxes – Rs 6,454 million**

According to section 19 of the Customs Act 1969, various imported goods have been granted exemptions/concessions in duties and taxes subject to the fulfilment of conditions specified in the law.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eleven (11) field offices of FBR, in three thousand one hundred and twenty-seven (3127) cases granted inadmissible exemptions and concessions in duties and taxes on goods (like television parts, plant and machinery, auto parts, vehicles, chemicals etc.) to importers/exporters who did not qualify for such exemptions. This resulted in loss of revenue amounting to Rs 6,454.11 million due to inadmissible exemptions.

These lapses were pointed out from February to November 2023. The management replied that cases amounting to Rs 96.67 million were under recovery, Rs 52.22 million were under scrutiny, Rs 0.63 million were pending in adjudication, and Rs 6,126.49 million were pending in court of law. The management contested an amount of Rs 178.10 million on the plea that benefit of concerned Schedule/SROs was granted as per law. However, the Audit holds that exemption amounting to Rs 66.31 million under Part-V(A) of the Fifth Schedule to the Customs Act 1969 was not admissible to old and used electric vehicles imported under the baggage scheme. Further, concessionary rates of customs duty were availed amounting to Rs 33.37 million under benefit of SRO 655(I)/2006 in absence of consumption certificates issued by Engineering Development Board (EDB). Moreover, the benefit is available to modems, whereas the goods were not modems and thus incorrectly granted benefit of customs duty amounting to Rs 26.31 million.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts, submit comprehensive replies in cases under scrutiny and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue cases under adjudication/court of law, submit comprehensive replies in under scrutiny cases, and fixing of responsibility against the concerned besides streamlining/simplifying tariffs.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.3,14,16, 4.8.3,11,12, 7.1(ii), 7.3 and 8.4 respectively having a financial impact of Rs 20,906.50 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure- 52]

7.3 Non-reconciliation of import and export of precious metals, jewellery & gemstones

According to SRO 760(I)/2013 dated 02.09.2013, the quantity of gold shall be capped at 25 Kg on revolving basis under entrustment scheme. Further, Precious metals imported under entrustment/self-consignment scheme shall neither be sold in the domestic market nor used for any other purpose except to make and export jewellery within 120 days from the date of import. Failure to export jewellery within stipulated time period shall be penalized under the relevant laws.

It was observed during the audit of the FY 2021-22 that the Collectorate of Customs, JIAP, Karachi cleared precious metals, jewellery & gem stones worth Rs 3,421 million, however, the Audit observed the following irregularities:

- (a) In some cases, excess quantity of gold was imported by the importers than the capped quantity of 25 kg.
- (b) 1% cash margin/bank guarantees were released without making any reconciliation process.
- (c) Records pertaining to import and export of gold were maintained manually and no automation has been adopted by the Collectorate for its reconciliation.
- (d) The Collectorate allowed the importers to file Goods Declarations (GDs) through One-Customs instead of WeBOC system.

These irregularities were pointed out in May 2023. The management replied that the gold was cleared by the customs authorities on production of Jewellery Passbook issued to them by the Trade Development Authority Pakistan (TDAP), which is the concerned regulatory authority. The role of customs authorities was limited only to the extent of facilitation to the importers/exporters of gold/gold jewellery and to verify the description and quantity etc. of the gold on the basis of advance information submitted by the importers and to make relevant entries in the Passbook issued by the TDAP. Furthermore, Change Request Form for development of module in WeBOC system had already been sent to the Directorate of Reforms and Automation, Custom House, Karachi. The Audit holds that due to non-reconciliation re-export of the imported goods and realization of the due amount of foreign exchange is not verifiable. Furthermore, the Collectorate could not provide evidence of observing prescribed ceiling of 25 kg in all the cases. Moreover, no justification was provided by the department on non-utilization of WeBOC in the instant cases.

The DAC, in its meetings held in September 2023 and January 2024, directed the department to take up the matter with the concerned regulatory authorities for reconciliation of quantity of imported and exported gold. The DAC further directed to develop module in the WeBOC system and in present audit para Collectorate may submit reconciliation and take action in cases of excess imported quantity of gold.

The Audit recommends proper justification of non-reconciliation of import export of gold, non-automation of the scheme, besides fixing of responsibility on the person(s) at fault.

[PDPs No. 2669 & 2670-CD/K]

7.4 Illegal removal of imported goods from bonded warehouse evading duties / taxes – Rs 1,387 million

According to section 86 and 117(2) of the Customs Act, 1969, every private warehouse shall be under lock and key of both the licensee and appropriate officer of customs. The owner of the goods to which it relates shall furnish an indemnity bond and post-dated cheque equivalent to the duty assessed under Section 80 or section 81 or assessed under section 109 on such goods.

It was observed during the audit of the FY 2022-23, that in the Collectorate of Customs, Hyderabad, a licensee M/s HSJ Metal (Pvt) Limited, illegally removed imported goods i.e. iron and steel scrap and silico-manganese without payment of duty/taxes amounting to Rs 1,387.10 million.

The department did not implement above provisions of law regarding annual audit and stock-taking etc.

These irregularities were reported to the department in November 2023. The management reported that the Collectorate had time and again directed the importer to ex-bond overstayed goods and get stocks verified. The Collectorate had also requested Collectors Appraisement (East), (West) and Port Qasim to encash securities submitted at the time of import besides auctioning imported goods lying at the ports. The Collectorate informed that post-dated cheques had expired and the Collectorates of Appraisement i.e. (East), (West), (PMBQ), Karachi did not revalidate post-dated cheques submitted at the time of import and were expired/time-barred. The Collectorate further informed that the FIR was also lodged against the bonder and matter is also pending in Sindh High Court.

The DAC, in its meeting held in January 2024 expressed serious concerns on unsatisfactory performance and directed that action may also be taken against the clearing Collectorates since they did not initiate timely action for either encashing the securities which ultimately expired. The DAC further directed to pursue the cases at appropriate legal fora besides fixing of responsibility on the person(s) at fault. No further progress was reported till the finalization of this report.

The Audit recommends implementation of DAC directives besides effective monitoring of bonded warehouses and recovery of duty/taxes involved and fixing of responsibility on the person(s) at fault.

[DP No. 3140-CD/K]

7.5 Incorrect assessment of duties and taxes – Rs 1,002 million

According to Section 18 of the Customs Act 1969, duty and taxes are assessed as per the Pakistan Customs Tariff and duties levied vide various SROs issued by the Board from time to time.

It was observed during the audit of the FYs 2021-22 and 2022-23 that ten (10) field offices of FBR, in three hundred seventy-six (376) cases had cleared imported goods (namely motor spirit, bags, wallets, boxes, semi-automatic pistols, etc.) upon payment of duty and taxes at less than leviable rates thereon due to incorrect assessments by the customs authorities. This indicated weak monitoring of assessments by the customs authorities. This resulted in short realization of duties and taxes amounting to Rs 1,002.12 million.

These irregularities were pointed out from February to November 2023. The management replied that cases amounting to Rs 18.00 million were under recovery, Rs 306.78 million were under scrutiny, Rs 7.85 million were pending in adjudication, and Rs 669.49 million were pending in court of law.

The DAC, in its meetings held in September and December 2023, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts and submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue cases under adjudication/court of law, and submit comprehensive replies in under scrutiny cases. Moreover, the department should strengthen faceless assessments besides instituting risk-based desk audits.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21 and 2021-22 vide para numbers 4.8.6,22, 4.8.4, 7.1 (v) and 7.9 respectively having a financial impact of Rs 2,772.15 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-53]

7.6 Short-realization of duties and taxes due to under-valuation of imported goods – Rs 870 million

Section 25 of the Customs Act 1969, provides a detailed procedure for determining the value of imported goods. Furthermore, Section 25-A of the Act ibid empowers the Directorate General of Customs Valuation Karachi to fix the value of imported goods or any class of goods.

It was observed during the audit of the FYs 2021-22 and 2022-23 that seventeen (17) field offices of FBR, in two thousand seven hundred and fifty (2750) cases, either assessed the imported goods (namely porcelain tiles, semi-automatic pistols, CCTV cameras, stainless steel flexible hosepipe, mobile phones, used auto parts, and chandeliers etc.) at lower values as compared to identical/similar goods or did not comply with the valuation rulings issued by the Directorate General of Valuation, Karachi. This resulted in short realization of duties and taxes amounting to Rs 869.84 million.

These instances were pointed out from February to November 2023. The management replied that cases amounting to Rs 108.46 million were under recovery, Rs 237.57 million were under scrutiny, Rs 29.00 million were pending in adjudication and Rs 2.35 million were pending in courts. The management contested an amount of Rs 492.46 million on the plea that goods had been assessed keeping in view the available data and valuation rulings where applicable. Audit holds that the goods were required to be assessed according to specific valuation rulings and dominant data of the same goods.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts, submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursuance of cases under adjudication, and submission of comprehensive replies in under scrutiny cases. Audit further recommends fixing of responsibility in cases where specific valuation rulings were available but not applied.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.10, 4.8.8, 7.1(iii), 7.1 and 8.13

respectively having a financial impact of Rs 4,543.77 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-54]

7.7 Short-realization of duties and taxes due to misclassification of imported goods – Rs 855 million

Goods imported into Pakistan are classified according to PCT headings given in the First Schedule to the Customs Act 1969, for the realization of customs duties and allied taxes.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eight (08) field offices of FBR, in four thousand seven hundred and ninety-eight (4798) cases, cleared various imported goods (like mobile pouches, wooden beads, LED modules, adhesive glue, hacksaw blades etc.) by misclassifying them under incorrect PCT headings, attracting lower rates of duties and taxes instead of correct headings with higher rates. This resulted in short realization of duties and taxes amounting to Rs 855.15 million.

These instances were pointed out from February to November 2023. The management replied that cases amounting to Rs 252.43 million were under recovery, Rs 415.15 million were under scrutiny and Rs 0.24 million were pending in adjudication. The management contested an amount of Rs 187.34 million on the plea that the goods were correctly classified. Audit holds that the goods were misclassified and need to be assessed as per the First Schedule to the Customs Act 1969.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication, submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursuance of cases under adjudication, and submission of comprehensive replies in under scrutiny cases. Audit further recommends to institute faceless assessments besides strengthening risk-based desk audits.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.8.8, 4.8.5, 7.4 and 8.9 respectively having a financial impact of Rs 2,212.99 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure- 55]

7.8 Non/short-realization of sales tax and value addition tax – Rs 776 million

According to Section 3, 7 and 13 read with Third, Sixth and Eighth Schedules of the Sales Tax Act 1990, there shall be charged, levied, exempted and paid sales tax at prescribed rates on goods imported into Pakistan, irrespective of their final destination inside territories of Pakistan.

Further, according to the Twelfth Schedule of Sales Tax Act 1990, value addition tax shall be levied and collected at the rate of three percent (3%) on all imported goods subject to exclusions provided in law.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eighteen (18) field offices of FBR, in six thousand three hundred and sixty-two (6362) cases either did not realize the sales/value addition tax or realized the same at lower than applicable rates on goods (school bags, shoes, cosmetics, mobile phone accessories, auto parts etc.). Non-adherence to relevant laws and weak monitoring controls caused non/short realization of sales tax and value addition tax amounting to Rs 776.28 million.

These irregularities were pointed out from February to November 2023. The management replied that cases amounting to Rs 238.52 million were under recovery, Rs 124.46 million were under scrutiny, Rs 1.28 million were pending in adjudication and Rs 147.18 million were pending in court of law. The management contested an amount of Rs 264.84 million on the plea that the goods were meant for in-house consumption of the importers-cum-manufacturers/ service providers. Audit holds that the goods were finished in nature and not used in manufacturing or furtherance of taxable activity.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts, submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursuance of cases under adjudication, and submission of comprehensive replies in under scrutiny cases.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.13,15,27, 4.8.2,15,22, 7.1(i), 7.2 and 8.8 respectively having a financial impact of Rs 7,388.73 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-56]

7.9 Non-finalization of cases under adjudication – Rs 601 million

According to Section 179(3) of the Customs Act 1969, the cases shall be decided within ninety (90) days of the issuance of show cause notice or within such period extended by the Collector for which reasons shall be recorded in writing, but such extended period shall in no case exceed sixty days.

It was observed during the audit of the FYs 2021-22 and 2022-23 that seven (07) field offices of FBR, in seven hundred and six (706) cases did not finalize adjudication proceedings within stipulated or extended period. This resulted in non-finalization of cases involving revenue amounting to Rs 600.83 million.

These irregularities were pointed out from March to November 2023. The management replied that cases amounting to Rs 513.40 million were finalized/adjudicated, Rs 10.54 million were under recovery, Rs 46.93 million were under adjudication and cases involving Rs 29.96 million were subjudice in the High Court.

The DAC, in its meetings held in September 2023 and January 2024, directed the department to refer the finalized cases to the respective Collectorates for further necessary action as per law, expedite recovery and pursue subjudice cases.

The Audit recommends implementation of DAC directives.

[Annexure-57]

7.10 Non/short-collection of income tax – Rs 594 million

Section 148 of the Income Tax Ordinance 2001, provides income tax collection at the import stage as per rates specified in Part-II of the First Schedule in respect of goods classified in Part I to III of the Twelfth Schedule to the Ordinance.

It was observed during the audit of the FYs 2021-22 and 2022-23 that twelve (12) field offices of FBR, in four thousand two hundred and fifty-one (4251) cases either did not collect tax at the time of clearance of imported goods or collected at lower than specified rates. This resulted in non/short realization of income tax amounting to Rs 593.79 million.

These instances were pointed out from February to November 2023. The management replied that cases amounting to Rs 399.75 million were under recovery, Rs 12.24 million were under scrutiny, and Rs 181.80 million were pending in court of law.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases pending in courts, submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts besides fixing of responsibility against the concerned.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.8.12, 4.8.28,31, 7.8 and 8.11 respectively having a financial impact of Rs 985.84 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-58]

(3) 7.11 Blockage of revenue due to non-clearance of overstayed bonded goods – Rs 392 million

According to Rule 350(2) of the Customs Rules 2001, the goods imported by diplomatic bonded warehouses and duty-free shops for sale to entitled persons can be kept in the bonded

warehouse for a period of two years from the date of in-bonding thereof without payment of penal surcharge. Further, Rule 350(4) provides that input goods imported or procured locally by a manufacturing bond licensee shall be consumed within a period which shall run from the date on which the imported goods are placed under the manufacturing bond procedure.

It was observed during the audit of the FYs 2021-22 and 2022-23 that six (06) field offices of FBR, in fifty-five (55) cases did not initiate action for clearance of warehoused goods along with levy of surcharge from the importers who either failed to clear/utilize the warehoused goods within the stipulated or extended period. This resulted in a blockage of revenue amounting to Rs 391.54 million.

These instances were pointed out from February to November 2023. The management replied that cases amounting to Rs 250.44 million were under recovery and Rs 146.20 million were under scrutiny.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, submit comprehensive replies in cases under scrutiny and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and submission of comprehensive replies in under scrutiny cases besides fixing of responsibility against the concerned.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.8.23, 4.8.19, 7.10 and 8.7 respectively having a financial impact of Rs 384.61 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-59]

7.12 Loss of revenue due to fraudulent clearance of non-existent mobile phones at nominal values – Rs 360 million

Section 80 of the Customs Act 1969 provides that on the receipt of Goods Declaration (GD), an officer of Customs shall satisfy himself regarding the correctness of the particulars of the imports, including declaration, assessment, payment of duty, taxes and other charges thereon. Further, section 80 (3) of the Act *ibid* provides that if during the checking of GD, it is found that any statement in such declaration or document or any information so furnished is not correct, the goods shall be re-assessed and duty, taxes and other charges levied thereon.

It was observed during the audit of the FY 2022-23 that the Collectorate of Customs Islamabad, in six (6) cases cleared 5,576 mobile phones which were not found during the examination and assessed at nominal value of USD 01. An intimation was also sent to Pakistan Telecommunication Authority (PTA) that duty and taxes for all of the declared mobiles along with International Mobile Equipment Identity (IMEI) Nos had been collected. All of these mobiles got

registered with PTA and were activated in Pakistan. Later on, the Collector Adjudication (Customs) adjudicated to recover the short-paid amount of duty/taxes after re-assessment of the mobiles as per data of 'used mobiles' rather than 'Device Identification, Registration and Blocking Systems' (DIRBS) value. The concerned customs staff was requested to provide information about the re-assessment of cases during the audit but nothing was provided despite several requests. The Audit observed that the lapse led to fraudulent clearance by examination and appraisal officers/officials. It is worth mentioning that the importers/clearing agents involved in this incident were still active and the department did not take legal action to black-list them. This resulted in a loss of government revenue amounting to Rs 360.31 million.

These instances were pointed out from August to November 2023. The management replied that cases amounting to Rs 360.31 million were pending in Islamabad High Court and in trial court in respect of criminal proceedings.

The DAC, in its meeting held in December 2023, directed the department to pursue the cases pending in courts. No further progress was reported till the finalization of this report.

The Audit recommends to pursue the cases pending in Islamabad High Court, blacklist the involved importers/clearing agents, and initiate criminal proceedings against the concerned officers/officials.

[DP No.8675-Cus]

7.13 Non-follow up of cases initiated by the Directorate of Post Clearance Audit – Rs 338 million

Post Clearance Audit (PCA) is governed under SROs 500 & 501(I)/2009 dated 13.06.2009 and CGO No.13/2008 dated 18.10.2008 read with Pakistan Customs Post Clearance Audit Manual. Functions of the Post-Clearance Audit include developing a comprehensive monitoring mechanism to verify the correctness of trade related declarations and to detect, investigate and propose measures to prevent commercial and trade related frauds.

It was observed during the audit of the FY 2022-23 that Directorate of Post Clearance Audit, Karachi, raised observations in eighty-eight (88) cases regarding misclassification, mis-declarations, inadmissible exemptions, non-application of valuation rulings, non-realization of anti-dumping duty etc. amounting to Rs 337.69 million. However, no compliance status was provided to the Audit which depicted lack of follow-up of the cases by the Directorate of PCA.

These irregularities were pointed out in November, 2023. The management did not submit a reply, therefore, the para was not discussed in the DAC meeting.

The Audit requires that the pointed out irregularities be actively followed up for timely recovery of government revenue. Furthermore, number of PCAs conducted and recoveries actuated thereof may be made part of KPIs and separately reported in the MPRs.

(4) [DPs No. 3281, 3282, 3283, 3284 & 3285-CD/K]

(5) 7.14 Non-recovery of adjudged revenue – Rs 286 million

Section 202 of the Customs Act 1969, read with the Chapter-XI, of Customs Rules, 2001, provides detailed procedure for recovery of government dues by requiring any other officer of Customs to deduct federal excise and sales tax from any money owing to such person by attachment and sale of any movable or immovable property of the defaulter and arrest/detention of defaulter.

It was observed during the audit of the FY 2021-22 that eight (08) field offices of FBR, in one hundred and thirty-six (136) cases did not initiate further legal proceedings for recovery of adjudged revenue despite the lapse of considerable time (12 months). The adjudged dues amounting to Rs 285.68 million remained unrecovered due to inaction of the department.

These irregularities were reported to the department from February to November, 2023. The management replied that cases amounting to Rs 17.62 million were under recovery, Rs 173.14 million were under scrutiny, Rs 3.63 million were pending in adjudication and Rs 91.29 million were pending in court of law.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts and submit comprehensive replies in cases under scrutiny for verification to the Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts, pursue cases under adjudication/court of law and submit comprehensive replies in cases under scrutiny.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.8.7, 4.8.6, 7.15 and 8.1 respectively having a financial impact of Rs 5,671.26 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-60]

7.15 Illegal retention of goods declaration processing fee – Rs 138 million

According to Rules 4 to 8 of General Financial Rules, all money recovered as due to the Government, is required to be deposited/credited into public account without any delay. Further, according to clause 21 of the Public Finance Management Act, 2019, all Ministries and Divisions, attached departments and subordinate offices and all public entities are required to remit all revenues to the Federal Consolidated Fund.

It was observed during the audit of the FYs 2021-22 and 2022-23, that six (06) field offices of FBR collected good declaration processing fees for the period from 1st July 2021 to 30th June 2023 amounting to Rs 137.55 million but the same was neither reported to the Treasury Offices concerned nor remitted to the State Bank of Pakistan. The money was retained in the Collector's account

maintained in a commercial bank, in violation of PFM Act as the same was required to be deposited immediately in government treasury. The audit required disclosure of the reasons behind the non-deposit of fees into the government treasury and date-wise credit/debit history from the account maintained by Collector for deposit of GD processing fee for the period referred above. However, no such record was produced to the Audit.

The irregularity was pointed out from February to November 2023. The management replied that cases amounting to Rs 137.55 million were under scrutiny.

The DAC, in its meetings held in September and December 2023, directed the department to submit comprehensive replies in cases under scrutiny. No further progress was reported till the finalization of this report.

The Audit recommends that amount collected on account of goods declaration fee be deposited in the government treasury besides initiating disciplinary action against the concerned for the non-deposit of public money in government treasuries and retaining it in their private accounts.

[Annexure-61]

7.16 Irregularities in auction of vehicles/goods – Rs 109 million

According to Rule 58 (2) of Customs Rules 2001, the Collector shall cause the reserved price of the auction-able goods to be determined in accordance with the provisions of Section 25 of the Customs Act 1969. Moreover, any duties or taxes which would have been payable under clause (c) of sub-Section (2), on the date of fixation of the reserve price of such goods, shall be added to this value. Furthermore, Rule 73 of Customs Rules 2001, states that the highest bid given at an auction may be accepted after satisfying that the reserve price and the quantity/condition of goods are appropriate.

It was observed during the audit for the FY 2022-23, that in five (05) field offices of FBR, forty-two (42) cases committed the following irregularities during auction process amounting to Rs 108.74 million;

- (i) Incorrect/lesser determination of reserve price;
- (ii) Earnest money not forfeited despite the fact that remaining bid amount was not paid within seven days after final approval from the competent authority;
- (iii) Unjustified rejection of highest bid & acceptance of lower bid;
- (iv) Unjustified auction of goods at lower than the reserve price;
- (v) Non-auction of perishable goods turned unfit for human consumption and destroyed later on;
- (vi) Incomplete/non-maintenance of auction record; and
- (vii) Non-reconciliation of auction proceeds and non-verifications of vouchers with bank.

These irregularities were pointed out during July to November 2023. The management replied that cases amounting to Rs 1.00 million were under recovery, Rs 71.86 million were under

examination and Rs 35.89 million were contested on the plea that goods were assessed according to the conditions of the products. Audit holds that reserve price was required to be determined as per notified/ market price.

The DAC in its meeting held in January 2024, directed the department to expedite recovery, submit comprehensive replies in cases under examination/contested to the Audit and to enquire the matter and fixing of responsibility on persons at fault. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery of admitted amounts and expedite examination/scrutiny in remaining cases, besides fixing of responsibility on the person(s) at fault.

[Annexure-62]

7.17 Inadmissible benefit of DTRE regime – Rs 92 million

According to Rule 297 (b) of Customs Rules, 2001, the DTRE facility shall be available to persons who make value-addition in the manufacture and export of goods in accordance with the prevalent value-addition of the relevant industry. This value addition shall not be less than 15% fifteen percent. Further, Section 2(16) (c) of the Sales Tax Act, 1990 provides that manufacture or produce includes process and operations of assembling, mixing, cutting, diluting, bottling, packaging, repacking or preparation of goods in any other manner;

It was observed during the audit of the FYs 2021-22 and 2022-23 that the Collectorate of Customs (Appraisalment), Lahore, in two (2) cases did not initiate any action against DTRE users who exported the goods without observing the 15% threshold of minimum value addition. Less value addition indicates misuse of DTRE which is against the spirit of the scheme. In addition to this, monitoring and post exportation audit by the management were also unsatisfactory. This resulted in undue benefit of DTRE regime amounting to Rs 92.15 million.

These irregularities were reported to the department from February to May, 2023. The management replied that cases amounting to Rs 70.91 million were under scrutiny. The management contested an amount of Rs 21.25 million on the plea that importer was commercial importer which requires 5% value addition. However, the Audit holds that goods were repacked, therefore, fall in manufacturing category. Thus, departmental contention is not tenable.

The DAC, in its meetings held in September and December 2023, directed the department to submit comprehensive replies in cases under scrutiny, and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery and to provide comprehensive reply where action is awaited, besides fixing of responsibility against the concerned.

[DP No. 8409 & 8413-Cus]

7.18 Non-payment of duty and taxes on wastage – Rs 78 million

According to Section 95(2)(a) of the Customs Act, 1969, the owner of any warehoused goods may carry on any manufacturing process or other operations in the warehouse in relation to such goods. Where in the course of any such operation or process there is any waste or refuse, duty shall be paid on such waste or refuse.

It was observed during the audit of the FYs 2021-22 and 2022-23 that three (03) field offices of FBR, in seven (7) cases, importers-cum-exporters imported raw materials for manufacturing of textile articles. However, the importers did not pay duty and taxes on the amount of wastage as leviable under aforesaid rules. This is an indication of weak monitoring of licensee of manufacturing bonds. The lapses resulted in the non-realization of revenue amounting to Rs 78.25 million.

These irregularities were pointed out from February to November 2023. The management replied that cases amounting to Rs 21.66 million were under recovery, Rs 48.41 million were pending in adjudication and Rs 8.18 million were pending in court of law.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery and pursue the cases under adjudication or pending in courts. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts and to pursue cases pending in courts. Moreover, enforcement of taxation on wastage needs to be ensured through monitoring of manufacturing bond scheme besides fixing of responsibility on the relevant Inspectors.

[DP No. 8389, 8393 & 8453-Cus& 3145-CD/K]

7.19 Inordinate delay in auction of confiscated goods – Rs 60 million

According to Rule 58 (2) of Customs Rules 2001, the Collector shall cause the reserved price of the auction-able goods, to be determined in accordance with the provisions of Section 25 of the Customs Act 1969, and any duties or taxes which would have been payable under clause (c) of sub-Section (2) on the date of fixation of the reserve price of such goods shall be added to this value. Furthermore, Rule 73 of Customs Rules 2001, states that the highest bid given at an auction may be accepted after satisfying that the reserve price and the quantity/condition of goods are appropriate.

It was observed during audit for the FY 2022-23 that two (02) field offices of FBR, in seven (07) cases scheduled goods for auction after the lapse of 04 to 05 years. Such unjustified delay in scheduling of the goods for auction caused deterioration of goods and blockage of revenue amounting to Rs 59.52 million.

These irregularities were pointed out during July to November 2023. The management reported that in four (04) cases goods of Rs 30.23 million were under auction and in three (03) cases goods of Rs 29.29 million were awaiting action.

The DAC in its meeting held in January 2024, directed the department to expedite auction and recovery and submit comprehensive replies in cases under examination/contested for

verification by the Audit. The DAC further directed to enquire the matter and fixing of responsibility on the persons at fault. No further progress was reported till the finalization of this report.

The Audit recommends expeditious auction of goods/vehicles and examination/scrutiny in remaining cases.

7.20 Non-realization of revenue on unconsumed quantity – Rs 38 million

According to Rule 307 A (1) of the Customs Rules 2001, if a DTRE user fails to consume the duty and tax-free input goods, he shall be liable to pay duties and taxes including additional duties or additional tax and penalties leviable on such goods as per prescribed law.

It was observed during the audit of the FYs 2021-22 and 2022-23 that two (02) field offices of FBR, in twelve (12) cases did not recover duty and taxes from the DTRE users who failed to export the goods manufactured from duty-free input imported under the DTRE scheme. This resulted in the non-realization of revenue amounting to Rs 38.08 million.

These irregularities were pointed out from August to November 2023. The management replied that cases amounting to Rs 38.08 million were under recovery.

The DAC, in its meeting held in December 2023, directed the department to expedite recovery. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery of admitted amounts besides strengthening post-exportation audits.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.20, 4.8.14, 7.4, 7.12 and 8.6 respectively having a financial impact of Rs 801.76 million. The recurrence of the same irregularity is a matter of serious concern.

7.21 Non-realization of anti-dumping duty – Rs 35 million

According to the Notification of National Tariff Commission (NTC) issued under section 50 of Anti-Dumping Duty Act 2015, NTC imposed definitive anti-dumping duty on import of certain items at the rates specified therein.

It was observed during the audit of the FY 2022-23 that four (04) field offices of FBR, in fifty-eight (58) cases cleared imported goods without realization of anti-dumping duty, whereas the goods (like PVC resin, hydrogen peroxide, CR coils etc.) were liable to anti-dumping duty under the NTC Notifications. It indicates weak internal controls in assessment and monitoring. The omission resulted in non-realization of revenue amounting to Rs 34.71 million.

These lapses were pointed out from August to November 2023. The management replied that cases amounting to Rs 6.73 million were under recovery and Rs 11.14 million were under scrutiny. The management contested an amount of Rs 16.84 million on the plea that goods were meant for export scheme hence anti-dumping duty was not recoverable. Audit holds that no documentary evidence has been provided by the Collectorate that goods were imported for re-export after value addition.

The DAC, in its meeting held in December 2023 and January 2024, directed the department to expedite recovery and submit comprehensive replies in cases under scrutiny and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends early recovery and submission of comprehensive replies in under scrutiny cases, besides enforcement of anti-dumping duty and monitoring by the DC concerned.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.8.34, 4.8.17, 7.6 and 8.14 respectively having a financial impact of Rs 473.91 million. The recurrence of the same irregularity is a matter of serious concern.

(6) [Annexure-65]

7.22 Non/short-realization of federal excise duty – Rs 30 million

Federal excise duty on goods is leviable under Section 3 of the Federal Excise Act 2005, on imported goods at rates specified in the First Schedule of the Act.

It was observed during the audit of the FYs 2021-22 and 2022-23 that three (03) field offices of FBR, in three hundred and thirty-four (334) cases either did not realize federal excise duty on imported goods (E-liquids, cement, clinker etc.) or realized the same at lesser rates as compared to the rates specified in the First Schedule of the Act. This resulted in non/short realization of federal excise duty amounting to Rs 30.13 million.

These instances were pointed out from February to November 2023. The management replied that cases amounting to Rs 25.71 million were under recovery and Rs 4.42 million were contested.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery and get their stated position verified from Audit. No further progress was reported till the finalization of this report.

The Audit recommends expediting recovery of admitted amount besides levy of FED on weight basis.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.18, 4.8.20, 7.1(vi), 7.7 and 8.10 respectively having a financial impact of Rs 714.36 million. The recurrence of the same irregularity is a matter of serious concern.

(7) [Annexure-66]

7.23 Loss of revenue due to misuse of DTRE regime – Rs 30 million

According to Rule 307A of Customs Rules, 2001 if a DTRE user fails to account for the duty and tax-free input goods, finished goods manufactured therefrom, un-exported same-state-goods, or consumes the duty and tax-free acquired input goods in exports in full, then he shall be liable to pay duties and taxes including additional duties or additional tax and penalties leviable on such goods.

It was observed during the audit of the FY 2022-23 that the Collectorate of Customs, Islamabad allowed one DTRE user to import 750 MT pine-nuts without payment of duty and taxes on the pretext of subsequent export to China. The DTRE user did not export the processed goods or the raw material, as evident from the stock-taking report available on record. Further, due to weak monitoring and financial controls, the DTRE user evaded duty and taxes by misusing the DTRE facility. This resulted in the loss of government revenue amounting to Rs 30 million due to misuse of the DTRE facility.

The lapse was pointed out from August to November 2023. The management replied that case amounting to Rs 30 million were under recovery.

The DAC, in its meeting held in December 2023, directed the department to expedite recovery. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery of admitted amounts.

(8) [DP No. 8783-Cus]

(9) 7.24 Loss of revenue due to non-recovery of surcharge – Rs 23 million

Ministry of Commerce vide SRO No.598 dated 19.05.2022 disallowed import of fruits and dry fruits falling under Chapter 08 except classified 0802.1910. Later on, vide OM dated 19th August 2022, allowed import of these goods which landed after 30th June 2022 and on or before 31st July 2022, subject to payment of 25% surcharge. Those consignments, which arrived after 31st July 2022 to 18th August 2022, are subject to payment of surcharge @35% of assessed value.

It was observed during the audit of the FY 2022-23 that two (02) field offices of FBR, in one hundred and sixty-one (161) cases cleared dry fruits after due dates without imposing surcharge in violation of SRO ibid. This resulted in non-recovery of surcharge amounting to Rs 22.67 million.

These lapses were pointed out from August to November 2023. The management replied that cases amounting to Rs 16.99 million were under recovery and Rs 5.68 million were under scrutiny.

The DAC, in its meeting held in December 2023, directed the department to expedite recovery and submit comprehensive replies in cases under scrutiny for verification from the Audit. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery and submission of comprehensive replies in cases under scrutiny, besides fixing of responsibility on person(s) at fault.

(10)

[DP No. 8683, 8695 &
8724-Cus]

7.25 Non-realization of capital value tax – Rs 21 million

Section 8 of the Finance Act 2022 provides that capital value tax shall be charged on the motor vehicle held in Pakistan where (i) the engine capacity exceeds 1300 cc; or (ii) in case of electric vehicles, the battery power capacity exceeds 50kwh.

It was observed during the audit of FY 2022-23 that three (03) field offices of FBR, in one hundred and thirty-six (136) cases cleared vehicles i.e. BMW, Toyota land cruiser, Mercedes etc. without charging Capital Value Tax (CVT). It is a clear indication of weak monitoring of assessment process by the customs authorities. This resulted in loss of revenue amounting to Rs 20.71 million.

These instances were pointed out from July to November 2023. The management replied that cases amounting to Rs 20.71 million were under recovery.

The DAC, in its meeting held in January 2024, directed the department to expedite recovery of pointed out amount. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery of admitted amounts, besides fixing of responsibility on person(s) at fault.

(11)

[Annexure-67]

7.26 Non-realization of late payment surcharge – Rs 11 million

According to section 83 (2) of the Customs Act, 1969, where the owner fails to pay import duty and other charges within ten days from the date on which the same has been assessed, he shall be liable to pay surcharge at the rate of Karachi Interbank Offer Rate (KIBOR) plus three per cent (3%) on import duty and other charges payable on such goods.

It was observed during the audit of the FY 2021-22 that Collectorate of Customs Appraisalment (East) Lahore, in thirty (30) cases cleared imported goods without realization of late

payment surcharge where the importer failed to deposit the assessed dues within ten (10) days of assessment. This happened due to lack of supervisory review at higher level at the office of Assistant Collector Customs (BWH). This resulted in short-realization of revenue amounting to Rs 10.60 million.

These lapses were reported to the department from February to May, 2023. The management replied that entire amount of Rs 10.60 million were under recovery.

The DAC, in its meetings held in September and December 2023, directed the department to expedite recovery of the admitted amount. No further progress was reported till the finalization of this report.

The Audit recommends early recovery of the late payment surcharge.

[DP No. 8368-Cus]

(12) 7.27 Non/short-realization of redemption fine and penalty – Rs 8 million

According to SRO 499(I)/2009 dated 13.06.2009, the Federal Board of Revenue imposed a redemption fine in place of confiscation of goods imported which contravened the Customs Act 1969 keeping in view the severity of the violation.

It was observed during the audit of the FY 2022-23 that four (04) field offices of FBR, in thirty-two (32) cases cleared the imported/smuggled goods contravening Customs Act 1969 either upon short assessment or without assessing redemption fine leviable. This resulted in a non/short realization of redemption fine amounting to Rs 8.36 million.

These irregularities were pointed out from August to November 2023. The management replied that cases amounting to Rs 1.29 million were under recovery, Rs 3.27 million were pending in adjudication and Rs 3.80 million were pending in court of law.

The DAC, in its meetings held in December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication or pending in courts and to get their stated position verified by Audit. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery and submission of comprehensive replies in contested/non-responded cases.

(13)

[Annexure-68]

(14) 7.28 Short-realization of duties and taxes due to incorrect application of exchange rate – Rs 8 million

Section 30 and 31(a) of the Customs Act, 1969 provides that in case of exercising the option for the redemption fine instead of confiscation of the goods seized during anti-smuggling operations, the rate of duty shall be the rate prevalent either on the date of seizure or date of payment of duty and taxes, whichever is higher. Moreover, the rate of exchange at which any foreign currency is to

be converted into local currency shall be the rate of exchange in force on the date immediately preceding the relevant date.

It was observed during the audit of the FY 2022-23 that four (04) field offices of FBR, in twenty-one (21) cases released smuggled goods on payment of duty and taxes without imposition of redemption fine and applied lower rate of exchange. The goods were required to be released by applying the rate of exchange one day before the date of payment under the law. This resulted in short realization of government revenue amounting to Rs 7.75 million.

These lapses were pointed out from August to November 2023. The management replied that cases amounting to Rs 2.14 million were under scrutiny, Rs 5.61 million were contested on the plea that provisions of Section 30 and 31A were applicable on imported/exported and not on confiscated goods. Audit holds that goods were required to be assessed under the proviso of Section 30 i.e. the rate of duty and rate of exchange are applicable on the date of seizure or date of payment of duty and taxes whichever is higher.

The DAC, in its meeting held in December 2023, after detailed deliberations referred the matter to Federal Board of Revenue for clarification. No further progress was reported till the finalization of this report.

The Audit recommends pursuance of clarification from the Board and recover the amount accordingly.

(15) [Annexure-69]

(16) 7.29 Blockage of revenue due to non-encashment of financial instruments

According to Section 81 of the Customs Act 1969, imported goods may be assessed provisionally. Furthermore, imported goods are cleared without payment of duty and taxes on submission of bank guarantees or post-dated cheques. These instruments were required to be encashed to recover government dues upon non-fulfilment of prescribed conditions.

It was observed during the audit of the FYs 2021-22 and 2022-23 that eleven (11) field offices of FBR, in two thousand one hundred and three (2103) cases did not encash financial instruments where the importers/exporters failed in fulfilling the requisite conditions of law within the stipulated time period. Moreover, the expired financial instruments were not re-validated by the customs authorities due to weak monitoring and financial controls. This resulted in blockage of revenue amounting to Rs 2,513.87 million.

These irregularities were pointed out from February to November 2023. The management replied that cases amounting to Rs 71.27 million were under recovery, Rs 2,329.63 million were under scrutiny and Rs 112.97 million were pending in courts.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases pending in courts and submit comprehensive

replies in cases under scrutiny for verification to the Audit. No further progress was reported till the finalization of this report.

The Audit recommends encashment of financial instruments for realization of government revenue without further delay besides fixing of responsibility against the person (s) at fault in cases where financial instruments have expired.

Note: This issue was also reported earlier in the Audit Reports for the Audit Years 2018-19, 2019-20, 2020-21, 2021-22 and 2022-23 vide para numbers 4.8.4, 4.8.9, 7.1(iv), 7.5,17 and 8.3 respectively having a financial impact of Rs 13,662.14 million. The recurrence of the same irregularity is a matter of serious concern.

(17)

[Annexure-70]

7.30 Non-conduct of post-exportation audit of DTRE users

According to Rule 307-E (1) of Sub-Chapter-7 of the Customs Rules, 2001 post-exportation audit is to be carried out and completed satisfactorily within a period of three months. Further, Rule 14 of the Export Oriented Unit Rules issued vide SRO 327(1)/2008 dated 29.03.2008, the liability of a licensee to pay duty and taxes under a security instrument furnished by him is not discharged unless post-exportation audit is carried out and completed to the satisfaction of the Collector at the end of every financial year.

It was observed during the audit of the FYs 2021-22 and 2022-23 that six (06) field offices of FBR, in one hundred and fifty-six (156) cases did not conduct post-exportation audits of licensees of Export Oriented Units and DTRE users. This resulted in irregular remission of duty and taxes amounting to Rs 2,119.26 million.

These irregularities were pointed out from February to November 2023. The management replied that cases amounting to Rs 9.34 million were under recovery, Rs 2,030.26 million were under process and Rs 79.66 million were pending in adjudication.

The DAC, in its meetings held in September, December 2023 and January 2024, directed the department to expedite recovery, pursue the cases under adjudication and expedite the process of post exportation audit. No further progress was reported till the finalization of this report.

The Audit recommends to finalize the post exportation audits and recover the amounts.

[Annexure -71]

7.31 Inconsistent valuation of imported goods

The imported goods are assessed under section 25 of the Customs Act 1969. Furthermore, the Directorate General Valuation issues valuation rulings for items which are commercially traded, whose import values show wide variations, and where under-invoicing is suspected. These include fabrics, footwear, tiles, and articles of iron/steel/plastics etc.

It was observed during the audit of the FY 2021-22 that the Collectorate of Customs Appraisal, East, Lahore assessed imported goods at lower value. Statistical impact on revenue of undervalued finished plastic goods and coconut was to the tune of Rs 1,564 million and Rs 19.97 million respectively. Furthermore, Directorate of Valuation is required to consider both ends of measurement i.e. weight and units of the imported goods like sweaters, while undertaking determination of valuation rulings to foil any attempt at concealment of value or weight. In cases of sweaters, value was determined per piece, but weight had not been mentioned. In addition to loss of revenue this discourages the local manufacturing market through lower valuation of imported finished goods. Moreover, these valuation surveys were carried out at discretion without a specific time frame. Flawed surveys, assessments, and valuation rulings by Directorate of Valuation are causing recurring losses to the national exchequer.

These irregularities were reported to the department from February to May, 2023. The management contested the para on the plea that the goods were assessed in line with Section 25 of the Customs Act 1969.

The DAC, in its meetings held in September and December 2023, directed the department to submit comprehensive reply in support of its contention. No further progress was reported till the finalization of this report.

The Audit recommends to develop a transparent mechanism for determination of valuation of imported goods according to size, nature, weight, origin etc. Moreover, the valuation may be reviewed quarterly to reflect actual market conditions besides consistent enforcement of these valuations.

[DP No. 8360-Cus]

7.32 Non-compliance of prescribed procedures for State Warehouses

CGO 12 of 2002 dated 15th June, 2002, prescribes procedures for State Warehouses i.e. the seized goods should be dispatched under proper escort to the State Warehouse and detailed inventory of the seized goods should be prepared. The Custodian of warehouse will maintain stock register. The stock in the state-warehouse will be physically checked twice a year.

It was observed during the audit of the FY 2022-23, that nine (09) field offices of FBR, in two hundred and thirty-eight (238) cases have committed the following irregularities in operations/maintenance of State Warehouses;

- (i) Release of goods/vehicles valuing Rs 917.07 million without entry into state warehouse;
- (ii) 6,117 Metric Tons of sugar valuing Rs 775.94 million was kept in open space instead of state warehouse out of which 117 MT of seized sugar valuing Rs 11.28 million were damaged/expired due to rain and improper handling;
- (iii) Non deposit of betel nuts and cigarettes in “A Class” State Warehouse;

- (iv) Incomplete/non-maintenance of seizure / warehouse registers/ record;
- (v) Non-compliance of opening & closing procedure for State-Warehouses;
- (vi) Non tracing of whereabouts of the owner of the smuggled goods/vehicles;
- (vii) Non-conducting of stock taking of warehoused goods.

These instances were pointed out during July to November 2023. The management reported that there was shortage of space in the warehouses and non- provision of sufficient funds. The matter had been taken up with the Board to provide sufficient funds for warehouse. The management also stated that state warehouse record was being properly maintained and stock taking process had been initiated.

The DAC, in its meeting held in January 2024, directed the department to ensure strict observance of law, enquire the matter, expedite stock taking exercise, take corrective measures and report progress within 60 days. No further progress was reported till the finalization of this report.

The Audit recommends that non-compliance of the prescribed procedures be ensured / justified.

[Annexure-72]

7.33 Burden on public exchequer due to ineffective Internal Audit functions – Rs 34 million

Rule 10 (i) and (iv) of General Financial Rules, Volume-I, states that every public officer is expected to exercise the same vigilance in respect of expenditure incurred from public money as a person of ordinary prudence would exercise in respect of expenditure of his own money. Public moneys should not be utilized for the benefit of a particular person or section of the community.

It was observed during the audit of the FY 2022-23 that the Directorate of Internal Audit Customs, Karachi conducted 13 audits out of planned 27 audits. Moreover, neither any meeting with auditee was conducted nor any recovery was made. The Directorate failed in fulfilling its primary responsibility, while incurring an expenditure amounting to Rs 33.85 million which is not justified.

This instance of poor performance was pointed out during August 2023. The management sought time for submission of reply to Audit.

The DAC, in its meeting held in January 2024 expressed concerns on unsatisfactory performance and directed the formation to re-examine the issue and submit a comprehensive report indicating overall performance of the Directorate along with documentary evidence. No further progress was reported till the finalization of this report.

The Audit recommends that justification for utilization of budget including payment of special performance/fixed FBR incentive allowance may be provided besides conducting effective audit.

(18) [DP No. 3276-CD-PE/K]

CHAPTER-8 EXPENDITURE

8.1 Inadmissible payment on account of cash reward – Rs 1,539 million

According to Customs Reward Rules 2012 and Inland Revenue Reward Rules 2021, the calculation of reward in cases involving evasion of duty and taxes and confiscation of goods shall be sanctioned after the realization of the duty and other taxes involved. Furthermore, cash reward to the employees would be allowed on the basis of meritorious/extra-ordinary services performed. “Meritorious services” includes exceptional performance like exceeding budgetary targets through extra-ordinary planning and efforts, displaying exceptional results in the recovery of arrears, enlarging the base of tax-payers, exceptional performance in defending cases before the ATIR, and displaying extraordinary devotion to duty and acumen towards making some original contribution.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its thirty-seven (37) field offices, in three thousand, eight hundred & nine (3809) cases paid cash reward to officers/officials in violation of reward rules. Cash reward was paid without determination of merit in accordance with aforesaid rules. This rendered payment of cash reward of Rs 1,539 million as inadmissible.

These irregularities were pointed out during February to November 2023. The department informed that reward was granted to employees based on meritorious services rendered by the officers/officials duly approved by the Board.

The DAC in its meetings held in August, September, December 2023 and January 2024 directed the department to provide detailed justification in line with criteria / circular issued by the Board for processing and sanction of reward. No further progress was reported till finalization of this report.

The Audit recommends strict compliance of criteria laid down for disbursement of cash reward for meritorious services besides expediting recovery from the concerned officer/officials.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.4, 4.9.1, 8.4 and 9.2 respectively having a financial impact of Rs 349.96 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-73]

8.2 Irregular expenditure due to non-observance of Public Procurement Rules – Rs 827 million

According to the Rule 8 read with Rule 9 and 16-A of Public Procurement Rules 2004 all procuring agencies shall devise a mechanism, for planning of proposed procurements with the object of realistically determining the requirements of the procuring agency. Further, procuring agency

shall announce in an appropriate manner all proposed procurements for each financial year and shall proceed accordingly without any splitting or regrouping of the procurements so planned. Furthermore, as per Rule 12(1), procurements over five hundred thousand Pakistani Rupees and up to the limit of three million Pakistani Rupees shall be advertised on the Authority's website in the manner and format specified by the Authority from time to time.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its fifty-eight (58) field offices, in four hundred and twenty-two (422) cases expenditure was incurred on purchase of office stationery, payment of service rendered, uniform and liveries, cost of other stores and repair & maintenance in violation of provision of the rules. These violations pertained to lack of planning, splitting, repeated purchases without any specific justification, demand requisition, satisfactory work completion certificate, acknowledgement receipts etc. Poor internal controls lead to mis-procurement which resulted in irregular expenditure on procurement amounting to Rs 826.70 million.

These irregularities were pointed out during February to November 2023. The management contested the para on the grounds that the expenditure was made after fulfilling all codal formalities. Furthermore, the procurement of different items was made from time to time based on requirements. Audit holds that the record provided by the department to Audit did not support their stance.

The DAC in its meetings held in August, September, December 2023 and January 2024 showed serious concern over no reply and improper working papers and directed the head of the department to look into the matter and take action against the responsible officers/officials besides taking corrective action. Furthermore, the department was directed to either provide relevant documentary evidence or get the matter regularized. No further progress was reported till the finalization of this report.

The Audit recommends fixing responsibility against the persons at fault and regularization of subject mis-procurement besides preparing and uploading annual procurement plans on PPRA website.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.2, 4.9.7, 8.7 and 9.1 having financial impact amounting to Rs 24.35 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-74]

8.3 Inadmissible expenditure on account of pay and allowances – Rs 249 million

According to the Revised Leave Rules, 1980 and Rule 7-A of Supplementary Rules, any employee proceeding on leave is not entitled to draw conveyance allowance. In case of extraordinary leave, no pay and allowance are admissible to government servants. Further, FBR's Circular No.01 of 2015 dated 6th March, 2015, provides that the Performance Allowance shall not be admissible in case of leave beyond 48 days.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its forty-seven (47) field offices, in one thousand and seventy-two (1072) cases paid inadmissible pay and allowances during leave period. This depicts ineffectiveness of HR and DDO functions. This resulted in inadmissible payment of pay and allowances amounting to Rs 248.76 million.

These irregularities were pointed out during February to November 2023. The management replied that the recovery of amount pointed out was underway.

The DAC in its meetings held in August, September, December 2023 and January 2024 directed the department to recover the amount pointed out and submit comprehensive reply. No further progress was reported till the finalization of the report.

The Audit recommends expeditious recovery from the officers/officials involved. Moreover, sanctioning and authorizing function needs to be segregated and pre-audit role should be performed by a designated treasury officer at FBR HQs.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.11, 4.9.5, 8.1 and 9.5 respectively having a financial impact of Rs 258.56 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-75]

8.4 Irregular expenditure on POL and unauthorized use of official vehicles – Rs 212 million

According to Cabinet Division's notification No.6/7/2011-CPC, Islamabad, dated 12.12.2011, departments needing operational vehicles were required to get authorization for such vehicles from the vehicle committee constituted for the purpose. Furthermore, Rules 9, 15 & 18 of Staff Car Rules 1980, provide that proper records in the shape of log books, movement registers, and requisition slips shall be maintained in respect of all government vehicles to effectively control the expenditures of POL and repair/maintenance.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its fifty-four (54) field offices, in two hundred fifty-eight cases (258), incurred expenditure on POL, repair/maintenance without maintaining log-books, movement registers and requisition slips. Further, the vehicles were used without authorization of the concerned quarter. Thus, expenditure on account of POL aggregating to Rs 212.45 million was irregular and unauthorised.

These irregularities were pointed out during February to November 2023. The management replied authorization of vehicles were obtained from the committee of the Cabinet Division and the requisite record duly signed by the concerned quarter was available.

The DAC in its meetings held in August, September, December 2023 and January 2024, showed serious concern over poor progress and submission of improper working papers. The DAC

further directed the department to look into the matter besides fixing responsibility on person (s) at fault. No further progress was reported till the finalization of this report

Audit recommends to enforce Staff Car Rules, 1980 in letter and spirit besides implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.1, 4.9.3, 8.15 and 9.3 respectively having a financial impact of Rs 370.72 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-76]

8.5 Excess/inadmissible expenditure – Rs 80 million

According to Rule 10 of General Financial Rules, every public officer authorized to incur expenditure from the public funds shall observe the high standards of financial propriety and is expected to exercise the same vigilance in respect of expenditure from public money, as a person of ordinary prudence will exercise in respect of expenditure of his own money. Similarly, Rule-11 of General Financial Rules Vol-I provides that the head of the department and subordinate disbursing officers are responsible for enforcing financial order and strict economy at every step.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its fifteen (15) field offices, in twenty-seven (27) cases incurred expenditure on purchase and repairs of various items in violation of above stated rules. This depicted poor internal controls on the part of the department. This resulted in excess and inadmissible expenditure amounting to Rs 80.09 million due to lack of vigilance and internal control lapses.

These irregularities were pointed out during February to November 2023. The management replied that the expenditure was incurred after fulfilling all codal formalities.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to provide relevant documentary evidence besides fixing responsibility on the person (s) at fault for sanctioning expenditure without necessary documents. No further progress was reported till the finalization of this report.

The Audit recommends recovery of excess and inadmissible expenditure fixing of responsibility against the persons at fault.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19 and 2019-20 vide para numbers 4.9.8 and 4.9.10 respectively having a financial impact of Rs 17.34 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-77]

xiv) 8.6 Unauthorized disbursement of funds in cash – Rs 77 million

According to Para 2.3.2.8 of the Accounting Policies and Procedures Manual, the accounting system shall include controls to minimize the risk of fraud and corruption. To achieve this objective, the payments are to be made through direct bank transfer or through cheques to the vendors/payees.

It was observed during audit for the FYs 2021-22 and 2022-23 that FBR (HQ) and its four (04) field offices, in six hundred seventy eight (678) cases made payments in non-transparent manner by drawing funds through cash in the name of DDOs instead of payments through cheques to the vendors/payee. Non-observance of codal formalities showed weak monitoring by the department in financial matters. The lapse resulted in unauthorized withdrawal of funds amounting to Rs 77.49 million.

The irregularity was pointed out during February to November 2023. The management informed that budget was received at the end of June; therefore, cheques were drawn in the name of DDO and cash paid to concerned vendors / officers & officials in urgency.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to justify the unauthorized expenditure with documentary evidence. No further progress was reported till the finalization of this report.

The Audit recommends strict compliance of codal formalities in letter and spirit to avoid unauthorized withdrawal of government money besides conducting inquiry and fixing of responsibility on the concerned person(s).

Note: The issue was reported earlier also in the Audit Reports for the Audit Years 2019-20 and 2022-23 vide para numbers 4.9.23 and 9.6 having financial impact of Rs 44.63 million. Recurrence of same irregularity is matter of serious concern.

[Annexure-78]

8.7 Non-deduction of tax on payment of goods and services – Rs 56 million

According to section 149 & 153 of the Income Tax Ordinance, 2001 provides that every person responsible for paying salary to an employee shall, at the time of payment, deduct tax from the amount paid at the employee's average rate of tax computed at the rates specified on the estimated income of the employee chargeable under the head "Salary" for the tax year. Every prescribed person making a payment in full or part including a payment by way of advance to a resident person for the sale of goods, rendering or providing of services and on the execution of a contract is liable to deduct tax from the recipients.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its ten (10) field offices, in ninety-nine (99) cases made payments for goods & services, salaries and cash reward but income tax was not withheld/deducted at the time of making payments. This resulted in non-deduction of tax amounting to Rs 56.14 million.

These irregularities were pointed out during February to November 2023. The management replied that necessary changes had been sent to AGPR/DAO for recovery from concerned vendors. Further LTO Lahore reported that work related to installation of electrical/networking falls under manufacturing category. However, the Audit holds that the vendor was a manufacturer of furniture instead of electrical networking.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to expedite recovery of amount pointed out by audit from the concerned and get the departmental contention verified in contested cases. No further progress was reported till the finalization of this report.

The Audit recommends expeditious recovery at the earliest besides fixing of responsibility against the concerned.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20 and 2021-22 vide para numbers 4.9.16, 4.9.18 and 8.11 respectively having financial impact of Rs 9.45 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-79]

8.8 Un-authorized payment to contingent paid/daily wages staff – Rs 44 million

Federal Government enforced complete ban on appointment of contingent paid / daily wagers staff as per Finance Division's O.M No. F-7(1)Exp-VI/2016-340 dated 07.07.2022, in pursuance of the decision taken by the Federal Cabinet in case No.147/15/2022, dated 07.06.2022.

It was observed during audit of the FYs 2021-22 and 2022-23 that in FBR (HQ) and its seven (07) field offices, one hundred thirty-nine (139) workers were appointed/hired as contingent/daily wages staff during different spells. Audit is of the view that appointment of daily contingent/wagers staff is contrary to the decision taken by the Federal Cabinet. This resulted in unauthorized expenditure amounting to Rs 44.09 million.

The irregularity was pointed out during February to November 2023. Management replied that Contingent Paid Staff had been working in the department since 01.12.2020. Their contracts of appointment were renewed from time to time. However, the Audit holds that above mentioned rules were also applicable to all contingent paid staff.

The DAC in its meeting held in January, 2024 directed the department to enforce the recovery. No further progress was reported till finalization of this report.

The Audit recommends adherence to the directives of Federal Cabinet and recovery of the amount pointed out.

[Annexure-80]

8.9 Inadmissible payment of hired residential accommodations – Rs 17 million

According to Ministry of Housing and Works letter No.F.2(3)/2003-Policy dated 31.07.2004, scale-wise rental ceiling and covered area has been specified for assessment of rent. Further, as per paras 8(10) of Accommodation Allocation Rules 2002, a hired or requisitioned house is to be allotted at the station of posting at specified stations.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its fourteen (14) field offices, in seventy-five (75) cases incurred expenditure on account of rent of residential accommodations which did not comprise prescribed covered area. Further, payments were also made on account of rent of accommodation at specified station whereas posting was at non-specified station. This resulted in inadmissible payment of hired residential accommodation amounting to Rs 16.63 million due to weak monitoring by the department on financial matters.

These irregularities were pointed out during February to November 2023. The management informed that the recovery of over-payment was under process.

The DAC in its meetings held in August, September, December 2023 and January 2024 directed the department to enforce recovery and get the contention verified from Audit. No further progress was reported till finalization of this report.

The Audit recommends expeditious recovery of excess payment of rent from the concerned quarter besides strict compliance of relevant rules and observance of all necessary codal formalities in hiring cases.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.7, 4.9.9, 8.3 and 9.8 respectively having a financial impact of Rs 88.68 million. The recurrence of the same irregularity is a matter serious of concern.

[Annexure- 81]

8.10 Unjustified expenditure on account of rent of office building – Rs 15 million

According to FBR Letter No.1(42) SO-CH/FBR/2009 dated 15.10.2009, the Federal Board of Revenue handed over the residential cum office building owned by Customs in Gilgit to the GB Government for establishing a permanent Governor house. However, it was decided in the meeting held in Aiwan-e-Saddar dated 08.10.2009 that Gilgit Baltistan (GB) Government will provide a suitable building for the office cum residence of the then Additional Collector so that the existing premises can be vacated besides providing land to develop a custom house later.

During audit of Collectorate of Customs, Gilgat Baltistan for the FY 2022-23, the Audit observed that an agreement dated 08.10.2009 was made between FBR and Government of GB that Custom House (Tufail Shaheed House) at Gilgit was handed over to the Government of GB on 15.02.2010. As per agreement, Government of GB was required to pay rent of Office-Cum-Residential building of the Collectorate of Customs till construction of its own building. However, Audit further observed that payment of rent was made by the Collectorate of Customs out of annual budget grant. Therefore, rent paid amounting to Rs 15.36 million by FBR on this account since May, 2013 was unnecessary/unjustified.

The irregularity was pointed out in October 2023. The management informed that reply would be furnished after scrutiny of the observation and relevant record. No further progress was reported till finalization of the report.

The DAC in its meeting held January 2024 directed the Collectorate of Customs, Gilgit Baltistan to take up the matter with the office of the Governor Gilgit Baltistan for acquiring land and recovery of rent paid as per agreement. FBR to assist and facilitate the Collectorate to get this matter resolved.

The Audit recommends to comply with the DAC directives.

[DP No.8737-Exp]

8.11 Non-recovery of loans/advances and interest – Rs 13 million

According to Rules 243 to 258 of GFR Vol-I, recovery of loans and advances is to be made in specified instalments and the first instalment is to commence after the advance is drawn and the recovery of interest will commence from the month following the month in which the principal amount has been repaid.

It was observed during the audit for the FYs 2021-22 and 2022-23 that FBR (HQ) and its twelve (12) field offices, in ninety-six (96) cases paid different kinds of loans and advances to their employees, however, recovery of principal/interest amount was not initiated. The omission resulted in non-recovery of loans/advances and interest amounting to Rs 13.47 million.

These irregularities were pointed out from February to November 2023. The management informed that recovery from the concerned employees was underway through AGPR and concerned district accounts offices.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to expedite the recovery from concerned employees. Further, progress was not reported till finalization of the report.

The Audit recommends expeditious recovery of advances along with interest.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2021-22 and 2022-23 vide para numbers 4.9.5, 8.2 and 9.10 respectively having a financial impact of Rs 90.50 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-82]

8.12 Irregular expenditure due to mis-classification of head of account – Rs 14 million

According to Para 5(d) of the System of Financial Control and Budgeting 2006, Accounting Officer is responsible for ensuring that the expenditure is not incurred in excess of the budget allocation. He shall ensure that payments are correctly classified under the appropriate heads of accounts and that departmental accounts are regularly reconciled every month with the figures communicated by the Controller General of Accounts (CGA)/Accountant General of Pakistan Revenues (AGPR). He shall, in addition, keep himself well informed not only of the actual expenditure but also of the liabilities, which have been incurred and must ultimately be met.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its fifteen (15) field offices, in eighteen (18) cases incurred expenditure in violation of stated rule. Furthermore, due to misclassification certain heads were disbursed more than the actual grant. This resulted in irregular expenditure of Rs 14.18 million.

These irregularities were pointed out during February to November 2023. The management contested the para in eight cases that the expenditures were incurred under the correct head of account. The departmental contention is not tenable as expenditure on repair/maintenance of buildings and purchase of furniture was incurred from the head 'Cost of Other Stores'. In remaining cases, no reply was furnished by the department, therefore, the matter may be regularized and contention of the department be verified.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to provide detailed justification of mis-classification of expenditure to Audit for verification and furnish the reply with relevant evidences and get the position verified from Audit within 15 days. No further progress was reported till the finalization of this report.

The Audit recommends compliance of DAC's directives at the earliest.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2019-20, vide para numbers 4.9.21 having financial impact of Rs 1.23 million. Recurrence of same irregularity is matter of serious of concern.

[Annexure-83]

8.13 Non-disposal of condemned vehicles and un-serviceable store items – Rs 4 million

According to Rules 167 and 168 of the General Financial Rules Vol-I, stores which are reported to be obsolete, surplus or unserviceable may be disposed of by sale or auction or otherwise under orders of the competent authority. Furthermore, according to Rule 26 of Staff Car Rules 1980, all vehicles except accidental cars shall be disposed of through public auction.

It was observed during audit of the FYs 2021-22 and 2022-23 that seven (07) field offices of FBR, in forty-eight (48) cases did not dispose of condemned vehicles and unserviceable store items. The delay in disposal caused blockage of potential revenue amounting to Rs 4.25 million.

The irregularity was pointed out during February to November 2023. The management replied that disposal of condemned vehicles and unserviceable store items was under process.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to expedite disposal of condemned vehicles and unserviceable store items under the prescribed rules. No further progress was reported till the finalization of this report.

The Audit recommends expeditious disposal of condemned vehicles and unserviceable store items.

Note: The issue was reported earlier also in the Audit Report(s) for Audit Year(s) 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.14, 4.9.11, 8.16 and 9.14 having financial impact of Rs 127.19 million. Recurrence of same irregularity is matter of serious concern.

[Annexure-84]

8.14 Irregular reimbursement of medical charges – Rs 5 million

Finance Division (Regulation Wing), Islamabad vide O.M No. F.6 (1)R-10/2010-171-2011 dated 24.03.2011 has allowed reimbursement of amount spent on account of purchase of medicines for medical treatment at OPD by civil employees of the Federal Government or member of his/her family, suffering from chronic diseases as detail given in the O.M ibid. Re-imburement of medical charges for treatment taken from private hospital/clinic without an emergency or without referring by an authorized medical attendant is not allowed under the rules.

It was observed during audit of the FYs 2021-22 and 2022-23 that nine (09) field offices of FBR, in forty-two (42) cases made re-imburement of medical charges without fulfilling the codal formalities and basic requirements for re-imburement of medical claims. The claims were sanctioned without proper prescriptions for the treatment from private hospital/clinic or without an emergency or without referral by the authorized medical attendant for medical treatment of non-chronic disease. This resulted in irregular payment of medical re-imburement charges amounting to Rs 4.99 million due to internal control lapses.

These irregularities were pointed out during February to November 2023. The management replied that the re-imburement of Medical Charges was duly verified and sanctioned by the competent authority after compliance of codal requirements. However, the Audit holds that basic requirements i.e. emergency certificates and distance certificates were not attached with the bills.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department either to provide relevant documentary evidence or recover the amount pointed out by Audit. No further progress was reported till the finalization of this report.

Audit recommends recovery of inadmissible expenses on medical charges besides strengthening of internal controls to avoid recurrence of such lapses in future.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20 and 2021-22 vide para numbers 4.9.19, 4.9.12 and 8.5 respectively having a financial impact of Rs 14.83 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-85]

8.15 Irregular expenditure on account of publication and printing – Rs 4 million

According to Serial No. 9(13) of System of Financial Control and Budgeting 2006, the printing of certain items was required to be carried out from Government Printing Press. However, printing at a press other than press of Printing Corporation of Pakistan, should be undertaken if the Principal Accounting Officer is satisfied that it is in public interest to do so and record a certificate to this effect. Moreover, NOC from Printing Corporation of Pakistan is also required to get the printing done from a private printer.

It was observed during audit for the FYs 2021-22 and 2022-23 that seven (07) offices of FBR, in ten (10) cases made payment under the head “Printing and Publication - A03902” without observing the government instructions. This resulted in irregular expenditure of Rs 4.33 million.

The irregularity was pointed out during February to November 2023. The department replied that printing of files was made from authorized vendor and was sanctioned by the Controlling Authority. The Audit holds that it is a clear violation of government instructions, therefore, departmental reply is not tenable.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to justify their stance with documentary evidence and get it verified from Audit.

(1) *The Audit recommends implementation of DAC’s directives at the earliest besides regularization of the expenditure from competent authority.*

Note: The issue was also reported earlier in the Audit Reports for Audit years 2019-20 and 2021-22 vide para numbers 4.9.20 and 8.13 respectively having a financial impact of Rs 2.45 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-86]

8.16 Non-deduction of sales tax on goods – Rs 4 million

According to Section 3(7) read with the Eleventh Schedule of the Sales Tax Act 1990 and Sales Tax on Services (Withholding) Rules 2015, a withholding agent shall deduct sales tax at prescribed rates of sales tax shown in the sales tax invoice issued by a registered person/service provider.

It was observed during audit for the FYs 2021-22 and 2022-23 that five (05) field offices of FBR, in twenty-nine (29) cases made payments on purchase of goods but the department, being a withholding agent did not collect sales tax while making payments to the vendors. This resulted in non-deduction/payment of sales tax amounting to Rs 4.07 million.

These irregularities were pointed out during February to November 2023. The management informed that the matter was under scrutiny and progress would be submitted in due course of time.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to expedite the recovery from the concerned. No further progress was reported till the finalization of this report.

The Audit recommends to expedite recovery from the concerned vendors besides fixing of responsibility against the person(s) at fault.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.15, 4.9.13, 8.10 and 9.11 respectively having a financial impact of Rs 23.86 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-87]

8.17 Non-deduction of house rent allowance/charges – Rs 3 million

According to Rule 26 of the Accommodation Allocation Rules, 2002, unless entitled to rent free accommodation, the allottee of an accommodation is to be charged normal rent at the rate of 5% of the emoluments as defined in Rule 2(d) of the Rules *ibid*.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its five (05) field offices, in forty-four (44) cases neither deducted 5% house rent charges nor discontinued the house rent allowance of the officers/officials who were allotted Government accommodation or availed hired accommodation. The omission resulted in non-deduction of house rent allowance/charges amounting Rs 3.16 million due to internal controls lapses.

These irregularities were pointed out during February to November 2023. The management replied that the action regarding recovery had been initiated from the employees.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to recover the excess payment and get the stance verified from Audit. No further progress was reported till finalization of this report.

The Audit recommends expediting the recovery from the concerned officers/officials.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19 and 2019-20 vide para numbers 4.9.13 and 4.9.15 respectively having a financial impact of Rs 11.56 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-88]

8.18 Non-collection of sales tax on services – Rs 2 million

According to Section 8 of the Sales Tax on Services Acts (Punjab/Sindh), a withholding agent, other than a recipient of advertisement services, shall withhold the whole amount of sales tax shown in the tax invoice issued by a registered person as service provider and make payment of the balance amount of the invoice to the registered person.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR (HQ) and its fourteen (14) field offices, made payments in twenty-eight (28) cases on acquiring taxable services without collection of sales tax. This resulted in non-withholding of sales tax amounting to Rs 2.02 million.

These irregularities were pointed out during February to November 2023. The management replied that the amount pointed out was under-recovery.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to expedite recovery. No further progress was reported till finalization of this report.

The Audit recommends to expedite recovery of amount pointed out.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.9, 4.9.13, 8.10 and 9.9 respectively having a financial impact of Rs 57.84 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-89]

8.19 Non/short-deduction of group insurance and benevolent fund – Rs 1 million

Rule 6A of Federal Employees Benevolent Fund & Group Insurance Fund Rules 1972, provides that contribution/subscription to group insurance and benevolent fund is mandatory at the specified rates.

It was observed during audit of the FYs 2021-22 and 2022-23 that FBR HQ and its six (06) field offices, in two hundred ten (210) did not deduct amounts in respect of group insurance and benevolent fund at prescribed rates. The lapse resulted in non/short-deduction of group insurance and benevolent fund amounting to Rs 1.22 million.

These irregularities were pointed out during February to November 2023. The management replied that recovery from the concerned employees was underway through the AGPR and concerned district accounts offices.

The DAC in its meetings held in August, September, December 2023 and January 2024, directed the department to get the stance verified from audit. No further progress was reported till finalization of this report.

The Audit recommends to expeditious recovery of the government dues and ensuring compliance of deductions through concerned DDOs.

Note: The issue was also reported earlier in the Audit Reports for Audit years 2018-19, 2019-20 and 2021-22 vide para numbers 4.9.19, 4.9.12 and 8.5 respectively having a financial impact of Rs 5.27 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-90]

8.20 Irregular expenditure on account of courier service – Rs 1 million

According to the Government of Pakistan Cabinet Division's U.O. No.7-1/2018 dated 20.03.2018, all government offices shall use services of Pakistan Post for mailing their domestic and international correspondence.

It was observed during audit for the FY 2022-23 that six (06) field offices of FBR made payment to private courier service providers under the head (A03205-Courier & Pilot Services) without observing the government instructions. This resulted in irregular expenditure of Rs 1.12 million.

The irregularity was pointed out during February to November 2023. The management replied that private courier service providers were engaged due to wide territorial jurisdiction in which they have to carry out judicial exercises for levy/recovery of taxes including urgent requirement of courier & pilot services. Audit holds that it is clear violation of government instructions which needs a proper justification with documentary evidence.

The DAC in its meetings held in December 2023 and January 2024, directed the department to justify their stance with documentary evidence and get it verified from Audit.

(2) *The Audit recommends implementation of DAC's directives at the earliest besides regularization of the expenditure from competent authority.*

Note: The issue was also reported earlier in the Audit Reports for Audit years 2019-20, 2021-22 and 2022-23 vide para numbers 4.9.14, 8.12 and 9.13 respectively having a financial impact of Rs 14.9 million. The recurrence of the same irregularity is a matter of serious concern.

[Annexure-91]

CHAPTER-9 IMPACT AUDIT OF FULLY AUTOMATED SALES TAX E-REFUND (FASTER) SYSTEM

1. Introduction

a. Background

Impact audit is aimed at determining impact of an initiative or program with a special focus on determining the outcome/results attributable to an initiative/new program while eliminating other contributing factors or variables. It is a conceptual evolution of performance audit and reports solely on the effectiveness aspect of an initiative. The decision making in public sector is increasingly becoming data-driven. Impact audit reports would help the stakeholders and decision-makers in the public sector to formulate, review and adjust these initiatives/programs besides serving as a template for future planning.

Taxpayers can claim input tax refunds under the Value Additional Tax (VAT) regime as per Section-10 and 66 of the Sales Tax Act, 1990. These refunds are claimed against taxes already paid on raw materials and purchases which are consumed during the manufacturing process. Therefore, proper functioning of VAT regime relies heavily on efficient and justified disbursement of refunds.

b. Role of technological intervention in refund payment of sales tax (FASTER)

The advent of information technology in the public as well as private sectors has fundamentally altered the outlook as well as operations of these organizations. Similarly, FBR adopted various technological interventions for facilitation of taxpayers over the years. These palpable and impalpable interventions were aimed at creating a stakeholder friendly environment and strengthening FBR in collection of revenue and disbursement of refunds.

FBR's automation of Sales Tax refund started in 2002 through the introduction of STARR (Sales Tax Automated Refunds Repository) which is a semi-automated system that allows taxpayers to file refund claims online through Refund Claims Preparatory System (RCPS). The latest intervention for payment of refunds is Fully Automated Sales Tax e-Refund (FASTER) system. It was introduced for the disbursement of sales tax refunds to five specific export oriented sectors in 2019.

Previously, inputs of five export-oriented sectors were zero-rated (textiles, leather, carpets, sports and surgical goods). The subject zero-rating was abolished vide SRO 694(I)/2019 dated 29.06.2019. In order to address liquidity issues of exporters of these sectors, a new IT module known as Fully Automated Sales Tax e-Refund (FASTER) was developed and operationalized in 2019. The stated objectives of FASTER were to fully automate the refund process, decrease processing time, alleviate the credit crunch of exporters, decrease interaction of taxpayers with tax officials, and increase taxpayers' confidence in tax administration.

Both systems have been working in parallel for processing refund payment. The main difference between the two systems is that cases through FASTER are processed centrally for all stages i.e. from verification of claims up to authorization of payment at FBR HQ. On the other hand, processing and sanctioning of refund through STARR is dealt by the respective field formation. An overall view of workload of refund processing through FASTER vs STARR is given in the following table:

(Rs in million)

Financial Year	System	No. of claims	Amount
2019-20	FASTER	10,350	89,126
	STARR	10,660	49,248
2020-21	FASTER	3,413	35,663
	STARR	8,697	35,797
2021-22	FASTER	3,539	59,210
	STARR	4,003	31,063
2022-23	FASTER	32,397	50,277
	STARR	515	9,360

It can be seen from the above table that refunds through FASTER have increased in comparison to refunds through STARR, both in terms of number of claims as well as total claimed amount.

2. Overview

High-income countries pay VAT refunds equivalent to 30% of gross VAT collection as compared to an average ratio of only 11% for low income and lower middle-income countries. Delayed refund issuance distorts the production and manufacturing sectors by decreasing their liquidity and increasing the indebtedness of governments. Poorly functioning VAT refund mechanisms may have profound fiscal policy implications—from adverse effects on VAT design to broader macro fiscal challenges. These may include misrepresenting the fiscal deficit’s size, less prudent spending, impairing treasury operations, accumulating expenditure arrears, and, at times,

creating financing shocks⁵⁹. This impact audit has been conducted to measure the impact of FASTER against the intended objectives of FBR beneath governance objectives of transparency, fairness and accountability.

Transparency

Transparency of an intervention is ensured through clear and measurable objectives, openness of decision-making, and continuous reform. To measure the impact on transparency; reduction in processing times, easing of credit crunch, increase in exports, trust of taxpayers and decreased interaction with tax officials were analysed.

Fairness

Fairness of an intervention is ensured through equitable allocation of resources and removal of systematic barriers to access. Impact of FASTER in terms of fairness is analysed in terms of proportion of refunds paid to large vs small taxpayers.

Accountability

Public sector interventions have to strike a balance between accountability and efficiency. Increasing efficiency through automation of processes also poses a challenge to compliance and regulatory regimes in the absence of strong monitoring mechanisms. The impact on accountability has been examined through overall health of internal controls.

3. Scope and methodology

3.1. Scope

The stakeholders of this impact audit are the Federal Board of Revenue, taxpayers, and public at large. Cases processed through FASTER were treated as the “treatment group” and cases processed through STARR as the “control group”. Both of these systems have been working in parallel since 2019. STARR processes all export-oriented sectors including some exports refund cases of five sectors assigned exclusively to FASTER. Since the audit was planned retrospectively and that too without any control assessment designed into the intervention by the management, therefore, discretion was used in selection of control and treatment groups.

3.2. Methodology

Prospective impact audit and evaluations thereafter, are likely to produce credible results. However, FASTER started functioning in 2019; therefore, the impact Audit was planned retrospectively. The audit relied on primary data (all refund cases paid through FASTER and STARR) provided by FBR. The audit selected STARR as a control group due to identical functions

⁵⁹ IMF Note 21/04 *How to Manage Value-Added Tax Refunds, 2021*

and technological nature of operations. Resultantly, the validity of impact assessment is limited by following factors:

- i) The threshold data provided by project management of FASTER is used. This includes data of refund payments before and after the intervention of FASTER.
- ii) Measures of success and deliverables identified by FBR were used. These included processing time, time taken for credit in taxpayers' bank accounts, and effect on volume of exports.

A Sample was selected based on materiality of refund claims for the analysis of exports. A survey was conducted with Chambers of Commerce and Industries (CCI) Lahore and Karachi as well as individual taxpayers to gauge trust level. Data of exports reported by State Bank of Pakistan was used as a secondary source. Formal and informal discussions with the management were also conducted.

4. Findings

4.1. Impact on Transparency

4.1.1. Decreased processing time

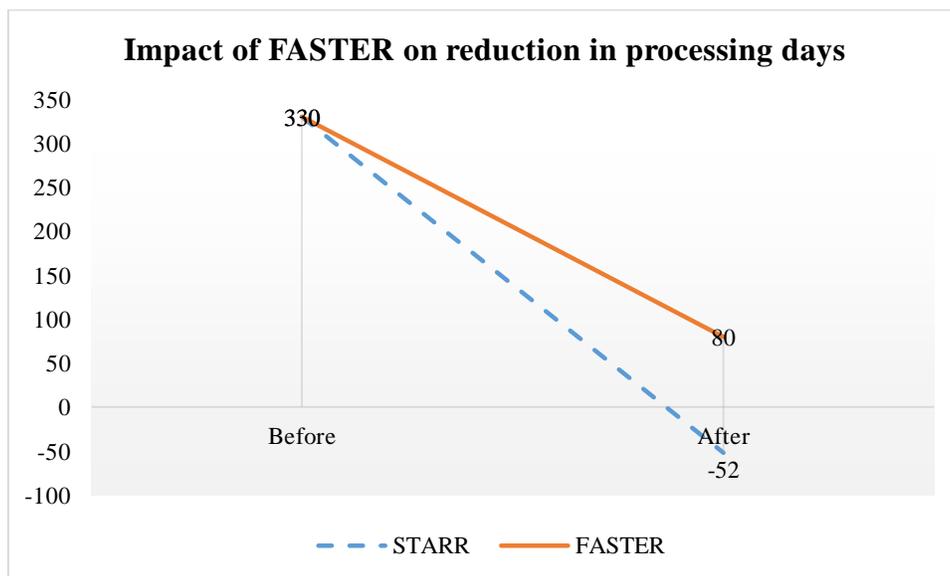

One of the deliverables of FASTER was reducing processing time of refund claims. The average processing days of FASTER versus STARR are tabulated as follows:

Year	Average payment days per case		%age improvement	
	FASTER	STARR	FASTER	STARR
2019-20	19	286	-	-
2020-21	16	753	16%	-163%

2021-22	8	724	50%	4%
2022-23	10	539	-25%	26%

As evident from the above table, FASTER took 8 to 19 days on average for processing while processing through STARR varied between 286 to 753 days for the period under consideration. Moreover, percentage improvement through FASTER was better as compared to STARR for all time periods except 2022-23. In 2019-20, the baseline average for STARR was 286 days which increased to 753 days in the successive year. Shift of focus of management to FASTER from STARR compounded with scarcity of financial resources due to Disbursement Linked Indicator (DLI) of revenue collection targets agreed with IMF may explain this increase.

Impact of FASTER in terms of reduction in number of processing days (using Difference in Differences Approach) is presented in the following graph:

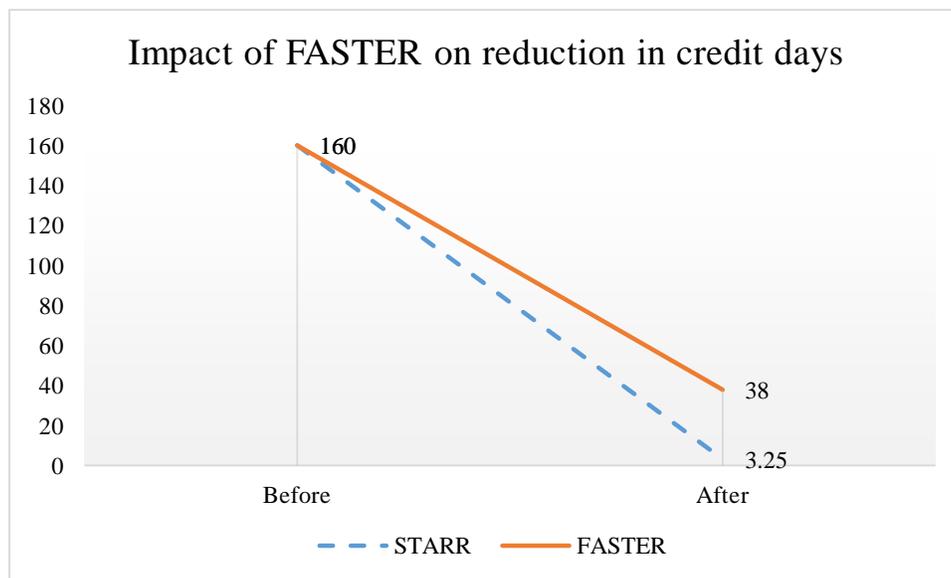

It is evident from above that there was a significant impact of 132 days on reduction in processing days in the treatment group (FASTER) as compared to the the control group (STARR).

4.1.2. Decreased credit days through FASTER

Post-processing delays are another hurdle faced by taxpayers while claiming input tax refunds. An analysis of time consumed by the system to credit refunds is as follows:

Year	Average credit days per case		%age improvement	
	FASTER	STARR	FASTER	STARR
2019-20	19	153	-	-
2020-21	14	169	26%	-10%
2021-22	9	164	36%	3%
2022-23	29	173	-222%	-5%

Average credit days ranged from 153 to 173 days in STARR, while cases processed through FASTER took 9-29 days. This shows a comparative improvement in time taken for credit through FASTER. Impact of FASTER on reduction in credit days (using Difference in Differences Approach) is presented below:

It is evident from above that there was a significant impact of 35 days in the treatment group (FASTER) as compared to the control group (STARR).

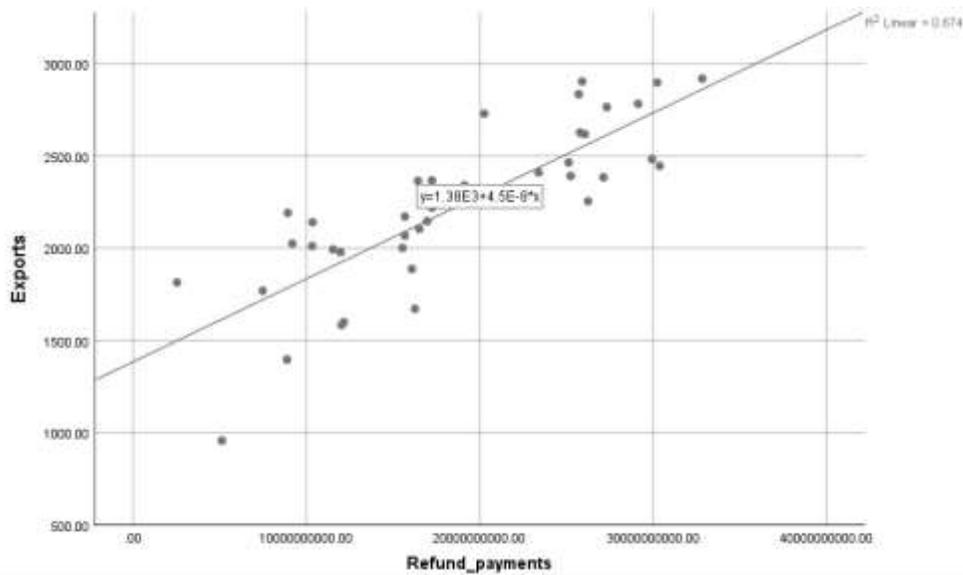

The management vide its letter dated 17th January 2024, replied that the credit days had been reduced to 48 hours and the same could be verified from SBP.

The Audit holds that calculation of average credit days is based on the difference in sanction date and cheque date as per data provided by the management. Afterwards, reliance has been made on statistical technique of Difference in Differences which calculates outcomes (reduction in

processing days) instead of outputs (processing days). The method takes into account the effect of improvement in outcomes over a period of time due to the intervention as compared to the counterfactual which postulates absence of the intervention.

4.1.3. Regression analysis of refunds versus exports

One of the stated objectives of FASTER was to alleviate the credit crunch of exporters thereby increasing exports. Monthly data of refund payments processed through FASTER and monthly exports (reported by SBP) were used to construct the following scatterplot through Statistical Package for Social Sciences (SPSS) software:

Since there appeared to be a linearity as depicted in the above scatterplot a linear regression model was constructed to analyse the significance of correlation of refund payments with exports. The results of regression analysis are as follows:

Model Summary				
Model	R	R Square	Adjusted R Square	Std. Error of the Estimate
1	0.821a	0.674	0.666	246.60993
a. Predictors: (Constant), Refund payments				

ANOVA ^a						
Model		Sum of Squares	df	Mean Square	F	Sig.
1	Regression	5024557.441	1	5024557.441	82.618	0.000b
	Residual	2432658.393	40	60816.460		
	Total	7457215.833	41			
a. Dependent Variable: Exports						
b. Predictors: (Constant), Refund payments						

Coefficients						
Model		Unstandardized Coefficients		Standardized Coefficients	T	Sig.
		B	Std. Error	Beta		
1	(Constant)	1384.227	100.140		13.823	.000
	Refund payments	4.497	0.000	0.821	9.089	.000
a. Dependent Variable: Exports						

The above calculation shows that, with a confidence interval of 95%, there is a statistically significant correlation between refund payments and overall exports. Moreover, 67.4% of the variation in exports can be explained through the variation in refund payments. The constant has a t-value of 13.823, and the associated p-value is very low (0.000). This implies that the intercept term is statistically significant, therefore, the estimated value of the dependent variable when all predictor variables are zero (the intercept) is significantly different from zero.

In spite of the above, other variables which might have had a significant bearing on the increase in exports (which have been excluded from the model) are overall economic growth, inflation, currency devaluation, award of GSP plus status to Pakistan by European Union, and diversion of trade routes during COVID-19 pandemic. Moreover, lag effect of refund has not been accounted for in correlating the exports over the entire data set, however, since the analysis covered 04 years therefore impact of the lag was reasonably captured.

To further investigate the effect of improved liquidity on exports sample based analysis of 10 companies (highest materiality) paid through FASTER is as follows:

Limited Companies	% increase in refunds (refund in last year/refund in first year)	% increase in exports (Last year exports/First year exports)
Nishat	570%	195%
Gul Ahmed	125%	213%
Feroze 1888	366%	169%
Liberty Textiles	338%	207%
Getz Pharma	1540%	189%
Artistic Milliners	195%	n/a
US Apparel	426%	n/a
Interloop	707%	329%
Yunus Textiles	216%	187%
Sadaqat Textiles	260%	184%

It is evident from the above table that although there was an increase in exports, however, percentage increase in refund payments didn't commensurate with percentage increase in exports for any of the companies with only one exception.

The management vide its letter dated 17th January 2024, replied that there was 31% increase in exports of ex-zero rated sectors in 2022 compared to the previous FY. The increase in refunds for the same period stood at 27%. However, the management questioned the reliability of sample data on the grounds that the data pertained mainly to textile sector.

The Audit is of the view that subject export data includes textile sector because of high materiality of refund amounts. Moreover, the management is only considering the increase in exports in two (02) consecutive years whereas the instant study covers a span of four (04) years. The management may share month-wise data of exports of ex-zero rated sectors from 2019 onwards for further analysis.

4.1.4. Decreased visits to the tax office

FASTER also intended to decrease the number of visits of taxpayers to tax offices. This objective was indirectly linked with increasing taxpayer's confidence and trust.

According to the survey conducted by these offices with Chambers of Commerce and Industries Lahore and Karachi, responses are summarized as follows:

Number of visits to tax office	
Before	8
After	3

As depicted in the table above the number of visits to tax office reduced by 5 visits per taxpayer on an average.

4.1.5. Increased trustworthiness of FBR

Another objective of this intervention was to decrease the interaction of taxpayers with the tax officials and increase trustworthiness of FBR. The results of the survey are summarized as follows:

Trust Rating after introduction of FASTER	
Highly trustworthy	4%
Trustworthy	48%
Somewhat distrustful	35%
Highly distrustful	0%
No Comments	13%

The results tabulated above show that majority of the taxpayers (48%) showed trust in FBR after introduction of FASTER for processing of refunds. However, 35% respondents viewed FBR authorities with distrust and 13% respondents reserved their comments.

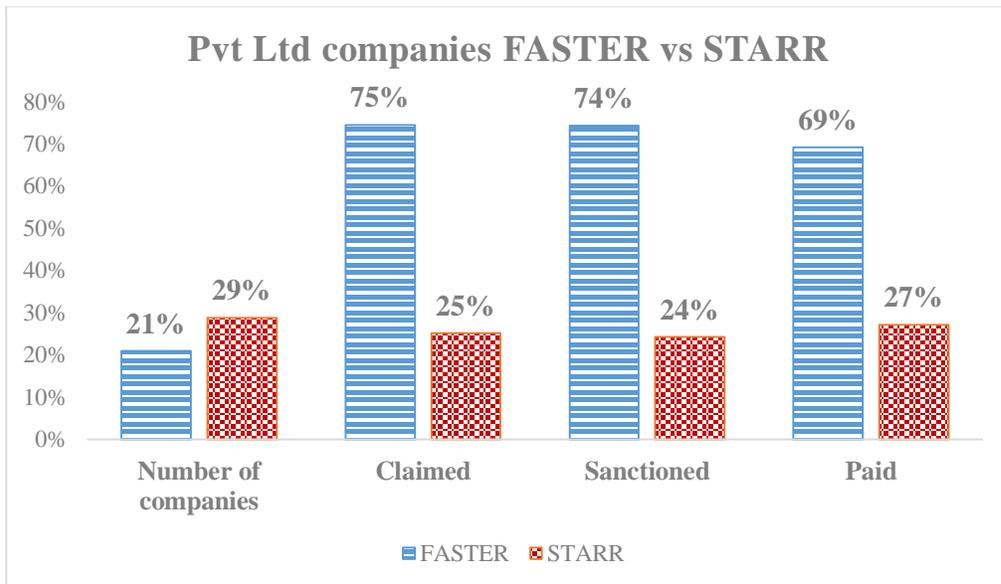

4.2. Impact on Fairness

4.2.1. Payments to private limited companies

Fairness of an intervention in public sector lies in equal treatment of all citizens. An analysis of payments to the listed companies in proportion to total claims revealed the following:

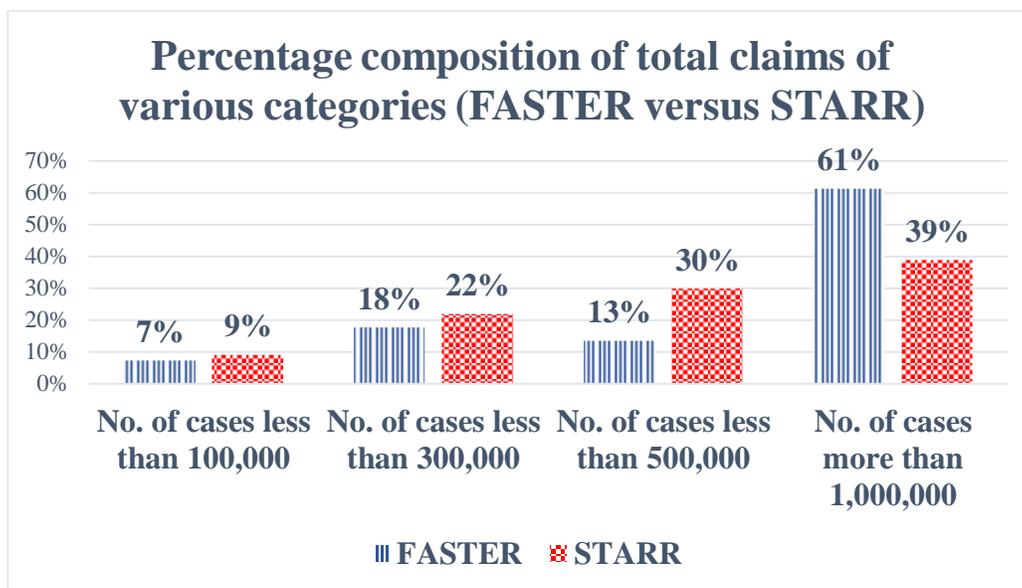

(Rs in Billion)

Description	STARR		FASTER	
	(Pvt) Ltd Companies	(Pvt) Ltd as %age of total cases	(Pvt) Ltd Companies	(Pvt) Ltd as %age of total cases
Number of companies	790	29%	1,117	21%
Claimed amount	32	25%	1,099	75%
Sanctioned amount	28	24%	1,056	74%
Paid amount	13	27%	568	69%

The above table and graph show that although the number of private limited companies was 8% lower in FASTER but these companies were paid 42% more refunds as compared to STARR. It is also pertinent to mention here that larger claims which constituted only 10% of the total claims were paid 76% of the total refund amount through FASTER. The Audit also observed that FASTER allowed relaxation to refund claimants of filing Annex-H (stock position) 120 days after submission of sales tax return. The unfair quantum of payments to corporate sector and relaxation of legal requirements raises question on the fairness of FASTER towards small taxpayers.

Moreover, further analysis of percentage composition of claims processed by the systems according to ceilings of refund amount is as follows:

As depicted in the above graph claims of Rs 1.00 million or more constituted 61% of the total cases processed through FASTER which was proportionately greater as compared to STARR. On all other accounts, STARR had a better distribution of cases according to various ceilings.

The management vide its letter dated 17th January 2024, replied that the intervention does not differentiate between registered persons whether a company or an individual and that refund claimants can file Annex-H with or 120 days after the submission of sales tax returns.

The Audit is of the opinion that subject analysis found that FASTER was discriminatory because the quantum of payments is unduly tilted towards corporate sector. Refund is a government liability, therefore, an intervention to ease taxpayer's refund woes should ideally be available to other taxpayers as well.

4.3. Impact on Accountability

4.3.1. Analysis of objected claims

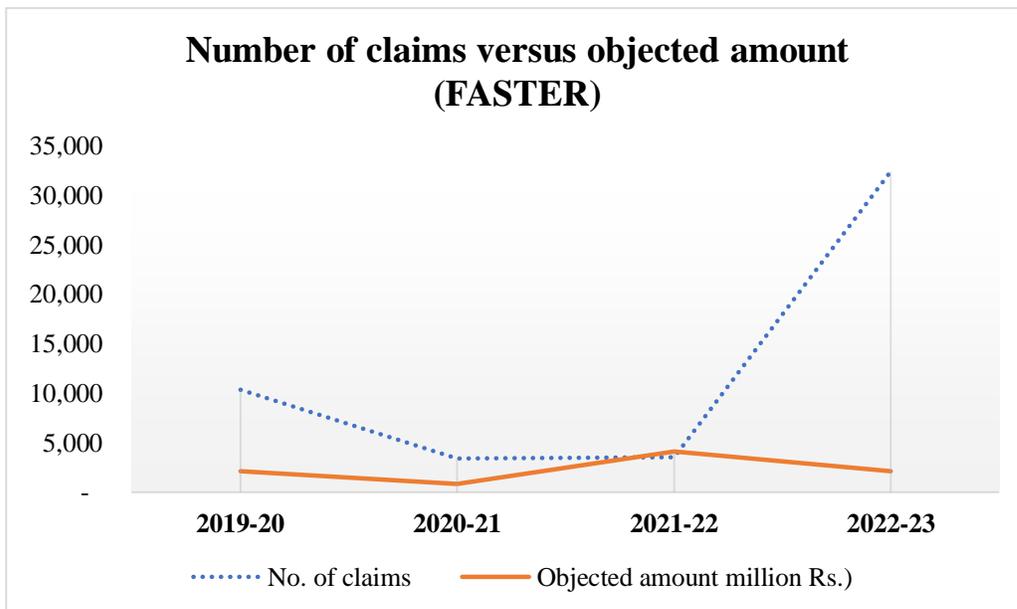

After processing the risk based system either sanctions, rejects, defers or carry forwards the claimed amount. A comparison of FASTER and STARR systems on above classifications is as follows:

	Rejected ratio		Deferred ratio		Carry forward ratio	
	FASTER	STARR	FASTER	STARR	FASTER	STARR

2019-20	2%	8%	2%	4%	195%	45%
2020-21	1%	11%	2%	13%	222%	50%
2021-22	1%	5%	7%	6%	238%	35%
2022-23	3%	2%	5%	4%	251%	16%

The above table shows that although FASTER had comparatively lower rejected ratios but the scale of carried forward amounts was much larger as compared to STARR. Moreover, deferred ratios for FASTER were initially lower but increased in recent years as compared to STARR. The huge quantum of deferred amount is problematic because governments are forced to devise alternative financing sources to pay outstanding refund claims (like issuance of bonds and securities). This ultimately increases a government's liabilities.

An analysis of number of claims processed through FASTER and amount objected by the system is presented below:

As shown in the above graph the amount objected by the system remained static as compared to the number of claims except for FY 2021-22. The amount objected by FASTER was highest in 2021-22 after which controls appear to have been scaled down thereby decreasing the objected amount.

The management vide its letter dated 17th January 2024, replied that FASTER was a fully integrated system with an inherent mechanism to reject claims which were not related to list of approved HS codes of five export oriented sectors. Moreover, only non-export claims with refund amount greater than zero were being rejected.

The Audit is of the view that a number of observations have been raised in various Audit Reports where inadmissibility of inputs for refund payments were established. In addition to this, the management also admitted to processing refunds of other sectors in the cited letter, therefore, the risk management system needs to be reviewed in the light of audit observations. The management may share the risk parameters and validation checks of the RMS with the Audit for further analysis. Moreover, the management did not reply on the issue of high carry forward and low rejection ratios of refund.

4.3.2 Refund payments through FASTER to other than ex-zero rated sectors

Subsequent to the abolition of zero rating and application of VAT mode to ex-zero rated sectors, FASTER was introduced for processing of refunds to export-oriented sectors specifically textiles, leather, carpets, sports, and surgical goods. However, the Audit observed that refund claims of taxpayers belonging to other than these five sectors were also processed through FASTER. A summary of these payments is tabulated below:

(Rs in million)

Industry	Number of claims	Amount of claim	Amount paid
Pharmaceutical	375	8,004	4,352
Rice Mills	876	1,678	1,313
Food	1,702	11,320	8,147
Soap	25	56	41
Stainless steel	167	2,149	1,338
Kitchen and Cookware	42	49	38
Total	3,187	23,256	15,231

The above refund payments are indicative of the fact that arbitrary barriers to entry incentivize collusion and malpractice.

The management vide its letter dated 17th January 2024, replied that it was decided by FBR that in order to facilitate the exporters and to overcome the limitations of the system during teething period that refund to all exporters shall be processed through FASTER. However, since the system has matured now, therefore, the temporary arrangement has been done away with and FASTER has been restricted to five export oriented sectors from September 2023 as provided in the rules.

The Audit requires the management to share the approval of the quoted decision.

4.3.3. Non-compliance of legal framework for refund payment

Section 8(1)(h) and (i) of Sales Tax Act, 1990 forbids adjustment of input tax on purchases of certain items including building and construction materials, vehicles and parts of vehicles. Section 7(2)(i) of the Act ibid read with Rule 33 of Sales Tax Rules, 2006 disallows input tax on utility bills not used in taxable supplies. Section 8(2) requires apportionment of input tax between taxable and non-taxable supplies. Rule 33 of Sales Tax Rules, 2006 limits the refund to the extent of input tax paid on purchases/imports actually consumed in the manufacturing of goods which have been exported or supplied at the rate of zero percent. Section 33 (11) (c) requires levy of penalty on any person who knowingly/fraudulently makes false statement/false declaration. Section 21 read with Rule 12 of Sales Tax Rules, 2006, requires that no refund can be paid to suspended/blacklisted registered persons.

The Audit has repeatedly pointed out absence of validation checks in refund processing against incorrect claims of domestic purchases, non-verification of use of utility bills as input invoice, unlawful adjustment of prior year's refunds, non-apportionment of input tax between taxable/non-taxable supplies, non-consideration of outstanding liabilities in sales tax refunds, and non-levy of penalties. One of the control failures observed during the conduct of this study pertained to payment of refund claims on the basis of invoices issued by suspended/blacklisted registered persons (**list attached as Annex-92**) as depicted in the following table:

FY	No. of claims	Amount Paid (Rs in million)
2019-20	8	70
2020-21	51	201
2021-22	54	310
2022-23	41	323

An increasing trend of payment to taxpayers claiming input on invoices issued by blacklisted/suspended taxpayers is visible in the above table. Furthermore, an inquiry report vide Order C.No.ST/I&I-IR/FR/04/2020-21/937 dated 28.08.2020 by FBR highlighted the fact that certain System Based Risk Minimizing Checks/Parameters were disabled (made non-functional) in order to facilitate expeditious processing despite clear legal provisions. Similarly, the cross-checking of refund claims by an authorized treasury office has also been eliminated. The role of treasury officer as principal signatory is being performed by Chief CSTRO while the DDO is performing the role of co-signatory. Moreover, Rule 39-G of Sales Tax Rules, 2006 which requires post refund audit of sales tax refunds is also not implemented consistently. To simplify the process of refunds, conventional documentation isn't required to be submitted and the rules require the claimant to produce the necessary documentation only when asked by the tax authorities. Despite clear instructions by the Board to institute post-refund audit cells in each formation, post-refund audit is not being conducted by the formations. This has led to an increase in the risk of refund fraud. The

Audit is of the view that taxpayer facilitation and any intervention by the management thereof, should not compromise on the legal framework.

Accountability is established through robust internal controls and monitoring mechanisms. Progressive automation of governmental processes can lead to a sense of diffused responsibility due to the presence of a 'system' which can have negative consequences in terms of reduced accountability and non-compliance. Therefore, the drive of automation through FASTER needs to be coupled with a continuous review of internal controls so that facilitation of taxpayers goes hand in hand with prevention of undue refunds.

The management vide its letter dated 17th January 2024, replied that no payment to black listed/suspended registered persons had been made through the CSTRO module. Moreover, post audit refund cells were operational in field formations despite of human resource constraints and a designated cell was also working at FBR HQ level to conduct post refund audit.

The Audit is of the view that refund claims have been processed by FASTER, based on invoices issued by black-listed/suspended registered persons (as provided in the Annex-92). The management may like to conduct a fact-finding inquiry to ascertain these cases. The Audit holds that post refund audit cells are non-functional as communicated by various formations. Moreover, the record of registered persons is available with the respective formation where the taxpayer is registered, therefore, post refund audit should be carried out at the formation level.

5. Key Audit Findings

- i) The number of processing days on average before FASTER were 632 which were reduced to 13 days. Similarly, average credit days were 160 which were reduced to 18 days.
- ii) There was a positive correlation between refund payments and exports. A sample of major exporters, however, shows that the increase in exports did not commensurate with the increase in refund payment.
- iii) The number of visits to tax office were reduced to 5 visits per taxpayer on an average. Majority of the taxpayers availing facility of FASTER (52%) reposed their trust in FBR.
- iv) Corporate sector was paid 42% more refund through FASTER as compared to STARR. Moreover, 10% largest claims processed through FASTER were paid 76% of the total claimed amount.
- v) There was a huge incidence of deferred amounts on both systems. However, the quantum of carried forward amounts was very high in FASTER as compared to STARR.
- vi) Payment function had been centralized in the office of CSTRO. The rules required a treasury officer to pre-audit the claims, however, the role of treasury officer had been eliminated in violation of these rules.

- vii) FASTER was discriminatory to other than ex-zero rated sectors as it relaxed legal requirements like filing Annexure-H (stock position) at the time of filing of refund claims. The relaxation of regulatory framework selectively for refund processing had increased the risk of refund fraud specifically in the absence of effective post-refund audit.

6. Conclusion

FASTER achieved transparency by reducing processing/credit times, increasing taxpayer trust and decreasing interaction with tax officials. There is some evidence which links efficient refunds to an increase in exports due to increased liquidity. However, fairness of FASTER is questionable on the touchstone of equitable treatment. The intervention needs improvement in terms of inclusivity as 76% of the payments were made to large taxpayers who constituted only 10% of the population of claims. The huge quantum of deferred amounts of refunds is still problematic. In the context of accountability, health of internal controls is weak as evidenced by reported violations of regulatory framework and non-conduct of post-refund audit. Thereby, risk of refund fraud has multiplied. Moreover, exclusive treatment created incentive for misuse/collusion as evident by payments to taxpayers from other sectors through FASTER. A multitude of refund processing systems and multiple barriers to access pose challenges to good governance. Above in view, sustainability of FASTER as a tool for refund payments should be reviewed to address its shortcomings in fairness and accountability.

7. Recommendations

- i) There should be one platform for processing of refund cases. Other sectors not falling within its ambit as of now may also be allowed to file refund claims through FASTER.
- ii) The Tax Gap Framework of FBR needs to be reviewed to incorporate refund liabilities and potential refunds. The department needs to address the systemic issue of non-payment of refunds. Risk categorization of pending refund claims be carried out and payments be prioritized according to risk.
- iii) Annexure-H enclosed with sales tax returns be made machine-readable.
- iv) Consistent enforcement with increased rates of penalties may act as a deterrent and decrease risk of refund fraud.
- v) The centralized processing of payments by CSTRO be pre-audited by a treasury officer.

- vi) The computerized risk management system be reviewed and updated regularly. The risk parameters of the system be reviewed by the management for regulatory compliance.
- vii) Post refund audit (PRA) be ensured according to Rule 36(1) of the Sales Tax Refund Rules 2006 at field level. Separate reports by the field formations on conduct of PRA of claims processed through FASTER may be made a part of Monthly Performance Reports (MPR).

CHAPTER-10 THEMATIC AUDIT OF AFGHANISTAN PAKISTAN TRANSIT TRADE

1.1 Introduction

Afghanistan is a landlocked country which is dependent on Pakistan for trade with the world. Afghanistan-Pakistan Transit Trade Agreement, 2010 (APTTA) is a bilateral trade agreement between the two neighbouring countries. Afghanistan uses the ports of Pakistan for its imports and exports under this agreement. As quid pro quo, Pakistan is allowed access to Central Asia through Afghanistan. The objective of transit trade facility is to ensure effective administration of transit transport, avoid unnecessary delays, enhance transparency in transit documentation & procedures, promote freight transport and prevent smuggling.

Directorate General of Audit Inland Revenue (South), Karachi conducted a thematic audit of Afghanistan-Pakistan Transit Trade. The Thematic Audit highlights the misuse of Afghanistan-Pakistan Transit Trade facility and the level of management's compliance with the applicable laws, rules, and regulations. It is alleged that most of the goods imported by Afghanistan through transit trade facility are pilfered or smuggled back into Pakistan.

1.2 Background

Pakistan, since 1947, has allowed Afghanistan to use Karachi Sea Port for imports. The transit trade agreement was signed in 1965. This agreement did not envisage reciprocal trade access to Pakistan with regard to defunct USSR and Central Asian Republics. The present Afghanistan-Pakistan Transit Trade Agreement allows Pakistan to have trade access with Central Asia through Afghanistan. It also permits both the countries to use each other's designated transit corridors. Afghanistan, while taking advantage of this facility, imports goods worth Billions of dollars.

It is known that large quantities of these imported items are smuggled back to Pakistan reducing production of local manufacturing industry. The high tariff smuggled goods to Pakistan include fabric, tea, electronic items, cosmetics, machinery etc.

1.3 Establishing the audit theme

1.3.1 Reasons for selection

The Government of Pakistan imposed restrictions on imports of non-essential and luxury goods during the FY 2022-23 due to pressures on foreign exchange reserves. Further, regulatory duty and sales tax were enhanced from 20% to 49% and 17% to 25% respectively on imports of certain items. In this connection, SROs 598(I)/2022 dated 19.05.2022,

1571(I)/2022 dated 22.08.2022 and 297(I)/2023 dated 08.03.2023 were issued by the Government of Pakistan which decreased Pakistan's imports volume by 32% in the FY 2022-23 as compared to the FY 2021-22 as per detail given below:

Pakistan's total imports from all over the world (US\$ in millions)			
Description	2021-22	2022-23	Diff %
Cosmetics/Chemicals	10,451.02	7,093.46	-32.13
Plastics	3,824.83	2,788.77	-27.09
Textile related items	4,544.81	3,607.09	-20.63
Footwear products	43.98	28.75	-34.63
Ceramics	70.02	48.75	-30.38
Iron / Steel products	5,457.75	3,378.66	-38.09
Machinery	11,353.09	5,931.51	-47.75
Vehicle and others	4,340.85	1,739.52	-59.93
Toys/furniture/arms/watches	400.89	251.16	-37.35
Prepared Food / Others	706.30	494.40	-30.00
Other items	38,000.05	28,295.54	-25.54
Total Import Value	79,193.58	53,657.60	-32.25

Source: Customs import data FY 2021-22 & 2022-23

Afghanistan's overall imports for the last five years show a decreasing trend as per data given below:

Afghanistan's total imports from all over the world (US\$ in millions)

Imports value in 2018-19	Imports value in 2019-20	Imports value in 2020-21	Imports value in 2021-22	Imports value in 2022-23
11,021.11	8,831.79	8,729.55	7,367.57	7,561.73

Despite decreasing trend in Afghanistan's overall imports, the increase of transit trade volume during 2022-23, especially increase in those items which were discouraged by the Government of Pakistan, is problematic. Afghanistan's Transit Trade imports via Pakistan, during the FY 2022-23, increased to US \$ 6.75 Billion from US \$ 4.00 Billion during the FY 2021-22 which was 69% higher than the previous year. The increase in transit trade volume in 2022-23 is unjustified because neither a significant increase in population was witnessed nor any significant economic development was reported in Afghanistan. The annual population growth rate of Afghanistan was 2.67% and the annual **rate of urbanization was only** 3.34% (Source: www.worldometers.info). After the Taliban's takeover of the country in August 2021, the United States froze \$9.5 Billion in assets belonging to the Afghan Central Bank¹.

Due to high demand coupled with import restrictions in Pakistan, the increase in transit trade of these items depicts that the facility of transit trade was misused. Further, smuggling of dollars from Pakistan to Afghanistan was also reported in media, ostensibly smuggled dollars were used for payments of transit trade imports.

1.3.2 Purpose/Objectives

The main objective of the study was to analyse the misuse of transit trade facility and to determine management's compliance with the applicable laws, rules, and regulations in pursuance of the purpose and objectives of the Afghanistan-Pakistan Transit Trade Agreement (APTTA) 2010.

1.3.3 Scope

The thematic audit covers the office of the Directorate General of Transit Trade, Karachi, Directorates of Transit Trade Karachi, Gwadar and Quetta. The thematic audit analysed transit trade data for the last three financial years from 2020-21 to 2022-23. Further, field audit team also reported significant instances of misuse of transit trade facility including ineffective monitoring and en-route pilferage of transit goods.

2. Legal framework governing the theme

Customs Act, 1969, Custom Rules, 2001, Customs General Order (CGO), SROs 121(I)/2014 dated 24.02.2014, 609(I)/2020 dated 07.07.2020, 1013(I)/2021 dated 05.08.2021,

1466(I)/2021 dated 11.11.2021, 659(I)/2023 dated 05.06.2023, 598(I)/2022 dated 19.05.2022, 1571(I)/2022 dated 22.08.2022 and 297(I)/2023 dated 08.03.2023.

¹Bloomberg dated 18.08.2021

3. Stakeholders and governmental organizations identified as directly/indirectly involved

The Directorate General of Transit Trade, the Government and traders of Afghanistan are the key stakeholders in the thematic audit.

4. Role of important organizations

The Directorate General of Transit Trade and its field offices are responsible for safe and sound transit of goods to Afghanistan via Pakistan without any en-route pilferage. The Directorate has to review and recommend suitable internal controls, automated processes and fool proof security system for cross border of transit cargo to Afghanistan.

5. Organization's Financials

The Directorate General of Transit Trade and its field offices meet its expenditure and cost incurred on transit trade facility from the consolidated fund of the Government of Pakistan through Federal Board of Revenue.

6. Field audit activity

This office allocated three hundred twenty-six (326) man-days for the thematic audit activities. Thirty-eight (38) man-days were allocated for planning and desk audits. Two hundred eighty-eight (288) man-days were allocated for the execution of the thematic audit. The thematic audit was executed from 29.08.2023 after detailed planning at the start of August 2023.

6.1 Methodology

The methodology of the thematic audit includes the following;

- i. Understanding the audited entity
- ii. Conducting a risk assessment
- iii. Defining detailed audit objectives
- iv. Developing audit program
- v. Performing analytical procedures
- vi. Testing the internal controls
- vii. Determining sample size for substantive testing of details
- viii. Conducting substantive tests
- ix. Evaluating results
- x. Reporting

xi. Follow up

6.2 Audit Analysis

6.2.1 Review of Internal Controls

The implementation of statutory obligations by the department was found to be lacking. It was observed that in various cases the Directorate General of Transit Trade failed to curb en-route pilferages of goods in transit trade facility.

Audit observed that:

- In sixty-eight (68) cases cross border certificate of cargo transited to Afghanistan were not issued (details in para 6.2.3.1 (A) below).
- Eighty-one thousand three hundred and fifty-two (81352) transit consignments were not acknowledged by the Afghan Customs Authorities (details in para 6.2.3.1 (B) below).
- One-hundred thirty-one thousand and seven hundred sixty-eight (131,768) pending insurance guarantees were not revalidated/encashed (details in para 6.2.3.1 (C) below).
- Afghan Transit Trade volume via Pakistan was increased to US \$ 6.75 Billion during the FY 2022-23 from US \$ 4.00 Billion during the FY 2021-22 (details in para 6.2.3.2 below).
- Since 2012, tracking and monitoring system has been run by only a single tracking company i.e. M/s TPL Trakker Limited (details in para 6.2.3.3 (A) below).
- M/s TPL Trakker Limited had failed to install tracking and monitoring devices on a truck and loaded two containers (details in para 6.2.3.3 (B) below).
- The tracker company was facing a shortage in tracking devices and Container Security Devices (CSDs) (details in para 6.2.3.3 (C) below).
- M/s TPL Trakker Limited generated erroneous intimations/alerts (details in para 6.2.3.3 (D) below).
- Alerts pertaining to unusual stoppage of vehicles, door opening alerts, deviation from the route and Out-of-Sync Prime Mover Devices (PMD) and Containers Security Devices were either not generated or communicated late (details in para 6.2.3.3 (D) below).

- The transit trade containers are examined, de-sealed at the Afghan Transit Yard, located at Chaman Railway Station situated 2-3 kilometres away from the border (details in para 6.2.3.4 below).
- Despite having a tracking and monitoring system and licensed bonded-carriers/transport operators, frequent incidents were unearthed by the customs authorities, which shows that en-route pilferages are routine occurrences in the Afghanistan-Pakistan Transit Trade (details in para 6.2.3.5 below).
- In six (06) cases the transport operators/bonded carriers did not perform their legal responsibilities during en-route transit of goods to Afghanistan (details in para 6.2.3.6 below).
- In four (04) adjudicated cases the department was failed to recover government dues of Rs 120 million (details in para 6.2.3.7 below).
- In import documents/data complete description of the transit goods was not recorded (details in para 6.2.3.8 below).

6.2.2 Critical Review

Based on scrutiny of transit trade data provided by the Directorate General of Transit Trade, Karachi, incidents report and performance of tracking & monitoring company, the Audit is of the view that the Directorate General of Transit Trade and its field formations were not making significant efforts to curb en-route pilferages of transit goods and to avoid misuse of transit trade facility. More specifically following inferences can be drawn:

- The Directorate General of Transit Trade is not effectively monitoring the timely cross border and acknowledgement of transit consignments from Afghan's Customs Authorities;
- The Directorate is not analysing sudden influx in transit trade business keeping in view that certain tariff & non-tariff restrictions on non-essential & luxury items were imposed by the Government of Pakistan for its own imports;
- The Directorate is unable to engage multiple tracking & monitoring companies in transit trade business through competitive bidding process; and
- There is lack of effective monitoring & accountability on lapses committed by clearing agents, transport operators/bonded carriers and tracking company in discharging their legal responsibilities.

6.2.3 Significant Audit Findings

6.2.3.1 Non-reconciliation/confirmation of import under Afghanistan-Pakistan transit trade

According to Customs Rules, 2001, at the time of cross-border of the transit goods, the office en-route shall take a print-out of the GD, which will be handed over to Afghan Customs for endorsement in token of receipt of transit goods, the Afghan Customs will also provide a copy of T-1 bearing cross reference of GD filed in Pakistan and a certificate to the effect that the transit goods have crossed the border. Further, under Electronic Data Interchange (EDI) between Afghanistan and Pakistan Customs, the confirmation regarding cross border and arrival of the goods at the Afghan Customs shall be received electronically. Further, the Deputy/Assistant Director of Securities of the Office of Departure shall be responsible for taking appropriate steps on a fortnightly basis for timely reconciliation, encashment, revalidation or physical release of financial guarantee. In case of non-receipt of cross border certificate along with T-1 or non-fulfilment of any conditions against which the security was furnished by the Afghan importer or exporter, the security shall be encashed for recovery of government revenue.

During scrutiny of the soft data of Director General Transit Trade, for the period from July 2020 to June 2023, Audit observed the following irregularities:

A) Non issuance of cross border certificate of cargo transited to Afghanistan

Sixty-eight (68) containers/trucks of transit commercial cargo forwarded to Afghanistan from Karachi and Gwadar ports had not crossed the Afghanistan-Pakistan Border despite the lapse of considerable time. This irregularity indicates that the goods are pilfered en-route in Pakistan's territory. A year-wise summary is given below:

S#	Financial Years	Containers which did not cross the border
01	2020-21	22
02	2021-22	12
03	2022-23	34
Total		68

The irregularity was reported to the department in November 2023. The management informed that cross border certificates of 08 containers had been obtained. In the remaining 60 cases, letters had been written to the Directorate of Transit Quetta and Peshawar to take necessary action to complete the process of obtaining cross border certificates.

The Audit is of the view that non-receiving cross border certificates even after lapse of almost three years is a serious issue which must be investigated at senior management level.

The DAC in a meeting held in January 2024, directed the Directorate General of Transit Trade to ascertain the reasons for the non-confirmation of cross-border of the remaining 60 containers even after a lapse of three years.

Audit recommends for early investigation of non-cross border of consignment, besides fixation of responsibility on the person(s) at fault.

B) Non-acknowledgement of 81,352 transit consignments by Afghan Customs Authorities

Eighty-one thousand three hundred and fifty-two (81352) containers/trucks of transit commercial cargo forwarded to Afghanistan from Karachi and Gwadar ports and crossed the Afghanistan-Pakistan Border (as per soft data), however, their receipt in Afghanistan by the Afghan Customs Authorities was not acknowledged (T-1) despite lapse of considerable time. A year-wise summary is given below:

S#	Financial Years	Containers not acknowledged by Afghanistan
01	2020-21	3,755
02	2021-22	37,280
03	2022-23	40,317
	Total	81,352

The irregularity was reported to the department in November 2023. The management informed that six thousand one hundred and twenty-two (6,122) containers had been acknowledged by Afghan customs authorities. For the remaining cases, the T-1 document had not been uploaded in the WeBOC system by Afghan Customs. The Directorate General of Transit Trade, Karachi had requested the Consulate General of the Islamic Republic of Afghanistan to expedite the uploading of T-1 document.

The Audit is of the view that non acknowledgment of remaining 75,230 transit trade containers by Afghan Customs authority is very serious issue which should be taken up by the Directorate General of Transit Trade with the relevant authorities for future clearance of transit consignments.

The DAC in a meeting held in January 2024, directed the Directorate General of Transit Trade, Karachi to effectively pursue the matter with the relevant quarters and ascertain the reasons for clearance of further cargo despite the non-acknowledgement of the containers by Afghan Customs even after a lapse of three years. Moreover, specifying the time period for acknowledgement and after lapse of the prescribed time securities/guarantees should be en-cashed.

Audit recommends for effective pursuance with the relevant authorities for early resolution of the matter.

C) Non-encashment/release of 131,768 insurance guarantees

One-hundred thirty-one thousand and seven hundred sixty-eight (131,768) insurance guarantees involving an amount of Rs 1,469.65 Billion in respect of transit commercial cargo forwarded to Afghanistan from Karachi and Gwadar ports were outstanding/pending despite the fact that their validity period had expired. The Directorate neither obtained fresh insurance guarantees nor revalidated the expired guarantees. A year-wise summary is given below:

S#	Financial Years	Insurance guarantees pending/expired
01	2020-21	40,104
02	2021-22	34,512

03	2022-23	57,152
	Total	131,768

The irregularity was reported to the department in November 2023. The management informed that insurance guarantees in eight hundred and seventy-six (876) cases had been released. For the remaining cases, the T-1 document had not been uploaded in the WeBOC system by Afghan Customs, therefore, securities were not released.

Audit is of the view that the Directorate General of Transit Trade was required to take prompt action for revalidation and encashment of financial securities.

The DAC in a meeting held in January 2024, directed the Directorate General Transit Trade to look into the matter and justify non-revalidation of expired securities, besides taking remedial actions/measures.

Audit recommends for revalidation of expired securities, besides fixation of responsibility on the person(s) at fault.

6.2.3.2 Abnormal increase in import of smuggling-prone items by Afghanistan in transit through Pakistan

The government of Pakistan vide SROs 598(I)/2022 dated 19.05.2022, 1571(I)/2022 dated 22.08.2022 and 297(I)/2023 dated 08.03.2023 imposed certain restrictions and increased rate of duty & taxes on the imports of non-essential/luxury items.

During the Thematic Audit of Afghan Pakistan Transit Trade, it was observed that the volume of Afghan Transit Trade (forward) via Pakistan increased to US \$ 6.75 Billion during the FY 2022-23 from US \$ 4.00 Billion during the FY 2021-22 which is almost 69% as compared to the previous year.

Total import under Transit Trade in relation to population				
Period	Population Million	Increase in population	Import value US\$ Million	Increase/decrease in import value US\$ (Million)

2020-21	40.10	-	4,622.31	-
2021-22	41.13	1.03 M (2.57%)	4,003.16	-619.15 (-13.39%)
2022-23	42.24	1.11 M (2.67%)	6,756.16	2,753 (68.77%)

Source: Transit Trade Data

Keeping in view the decreasing trend in overall imports of Afghanistan, limited exports and scarce funding sources, especially after the imposition of multiple sanctions on the interim Afghan Government, the huge increase in the volume of transit trade through Pakistan is not justifiable. Comparative analysis of the major items restricted by the Government of Pakistan and the increase in imports of identical/similar goods through transit trade in 2022-23 shows that this facility was misused and the goods intended for Afghanistan were pilfered or smuggled back into Pakistan.

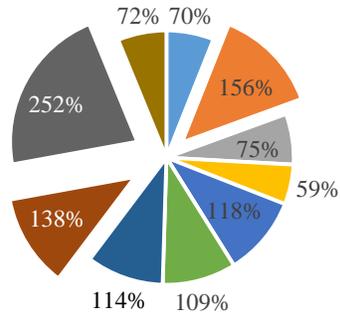

The following tables show a comparison and co-relation in a decrease of imports in Pakistan and an increase of these goods in transit trade:

Increase in transit trade volume:

Items	Quantity (MT)	Quantity (MT)	Import value US\$	Import value US\$	Increase in import value US\$	Increase %
	2021-22	2022-23	2021-22	2022-23		
Textile and articles thereof	195,882	340,538	1,465.83	2,488.82	1,022.99	70%
Shoes	5,967	14,644	19.23	49.24	30.02	156%
Tyres	2,529	5,661	223.60	392.97	169.36	75%
Tea	48,557	71,521	113.88	180.59	66.71	59%
Cooking Oil & Ghee	350,988	532,082	383.51	835.72	452.20	118%
Medicines	15,073	27,727	101.12	211.20	110.08	109%
Perfumes/Personal care products	7,842	15,827	23.64	50.66	27.02	114%
Soap	6,265	18,879	9.10	21.70	12.60	138%
Plant & Machinery	4,451	9,906	53.68	189.29	135.61	252%
Electrical appliances	51,665	96,252	368.83	633.27	264.44	72%
Total	689,219	1,133,037	2,762.42	5,053.45	2,291.03	83%

Total Import Value	79,193.58	53,657.60	-32.25

Source: PRAL's Import Data

There was an increase in Afghanistan's transit trade volume from US\$ 4.00 Billion to US\$ 6.75 Billion even though there was no change in demand since there was no change in population/urbanization nor in the economic prosperity of the country. On the contrary, the demand for the above items increased in Pakistani markets due to import restrictions & high tariffs. However, government of Pakistan in September/October 2023 has taken certain measures including replacement of insurance guaranties with bank guaranties equivalent to duties & taxes and levying processing fee on certain items. Since adoption of these measures, the volume of transit trade decreased by more than 32% in the first six months of the current financial year, which shows that the transit trade facility was grossly misused in 2022-23 and goods imported by Afghanistan were reportedly smuggled back into Pakistan.

The irregularity was reported to the department in November 2023. The management accepted the above facts and figures and informed that prevailing laws do not bar or limit the quantum of imports under transit trade, therefore, the goods were imported and cleared for transit to Afghanistan. Reportedly, the transit goods were smuggled back into the country which comes under the ambit of law enforcement agencies.

The Audit is of the view that the volume of the transit trade should be rationalized in proportion to the population growth rate and consumption patterns of the country.

In the DAC meeting held in January 2024, the matter was discussed at length wherein the Directorate of the Transit Trade is of the view that Customs Authorities implement the policies of the government which were previously very liberal and there is no link between the imports under transit trade *vis-a-vis* Afghanistan's socio-economic parameters. Except for auto parts and cigarettes, all commodities were allowed under the transit trade. However, the DAC was further informed that after the stringent anti-smuggling

policies adopted by the government of Pakistan during September/October 2023 whereby all imports under transit trade are now subject to submission of bank guarantees equivalent to the duty taxes involved in the goods instead of insurance guarantees and 10% processing fee charges of the value of the goods on certain items. Due to the above measures, there is a sharp decline of more than 50% in transit trade cargo. The above position strengthens the Audit point of view that the facility of transit trade was misused.

Audit recommends that any abnormal increase in the transit trade must be investigated further so that misuse of transit trade facility may be checked at the early stage.

6.2.3.3 Compromised tracking and monitoring system

According to the Customs Rules, 2001, the tracking & monitoring company shall be required to provide the following services, namely:

- (a) Monitoring and tracking of vehicles and containers carrying the cargo mentioned in these rules from the Customs port of entry to the Customs port of exit on a real-time basis.
- (b) Maintaining en-route integrity of cargo by preventing pilferage, theft, and losses.
- (c) Mounting, securing and ensuring the integrity of the device during the journey by using machine-readable serialized seals.
- (d) Alerts for unusual stoppages, device / tampering or infringement or intrusion or removal or door opening; and unusual deviation from geo-fencing device mounting or un-mounting.

Transit trade heavily relies upon effective tracking and monitoring systems. M/s TPL Trakker Limited was granted a license for tracking and monitoring of transit cargo in February 2012 under the administrative control of erstwhile CoC Preventive, Karachi. Later on, in July 2020 the licensing of tracking & monitoring function was shifted to the Directorate of Transit Trade, Headquarter, Karachi vide SRO 609(I)/2020 dated 07.07.2020. During the thematic audit of the record of the Directorate of Transit Trade, the Audit observed the following irregularities:

A) Monopoly of M/s TPL Trakker Limited on the entire Pak-Afghan Transit business

Since 2012, tracking and monitoring system has been run by only a single tracking company i.e. M/s TPL Trakker Limited despite the fact that the company was involved in the following serious irregularities and lapses, which put the whole system at risk.

B) Non-installation of trackers on Afghan transit containers

M/s TPL Trakker Limited had failed to install tracking and monitoring devices on a truck and loaded two containers gated out from M/s SAPT Karachi on 04.06.2020 for Afghanistan via

Chaman which were detained by staff of Customs Check Post, Baleli on 08.06.2020². This was a clear breach of legal responsibility entrusted upon the tracking company, gate out staff, clearing agent, transport operator etc.

C) Shortage of tracking devices to cater for the business

The company was facing a shortage in tracking devices and Container Security Devices (CSDs) not only for Afghan forward transit but for transshipment consignments as well. This resulted in huge financial losses as demurrage/detention charges on traders due to failure of the tracking company.

D) Erroneous data intimation and alerts

M/s TPL Trakker Limited generated erroneous intimations/alerts³. As per Customs Rules, 2001, the licensee was responsible for providing access of their Web portal to Customs which was not done.

²(Ref: MCC Enforcement & Compliance (E&C) Quetta letter C.No. 01-Cus/Misc/transit/ MEUs/2020/17812 dated 24.06.2020)

³(Ref: Directorate of Transit Trade, Peshawar letter C.No. 05-05/DTP/2013/Pt-V/203 dated 05.11.2020 and Directorate of Transit Trade, Quetta letter C.No. 03-Transit/Misc-Corr/Yaroo/2022/714-717 dated 21.01.2022).

E) Late/non-communication/issuance of alerts

Alerts pertaining to unusual stoppage of vehicles, door opening alerts, deviation from the route and Out-of-Sync Prime Mover Devices (PMD) and Containers Security Devices were either not generated or communicated late from the Central Control Room (CCR) and Regional Control Room (RCR) of the tracking company⁴.

On the above observations of Audit, the management informed as under:

- Due to litigation and stay order of the Honourable Sindh High Court the tracking & monitoring system was being run by M/s TPL Trakker Limited.
- Non-availability of tracking devices was due to blockage of consignments, increase in Afghan Transit Trade volume, and induction of Transshipment in monitoring regime. However, the issue was addressed by induction of new devices in inventory.
- Door opening alerts were dependent on other factors such as poor road conditions and abrupt breaking of the vehicle which may lead to the generation of door alerts.
- SOPs had been issued for effective and rapid response to the alerts. Staff had also been deputed for effective control, moreover Mobile Enforcement Units were also

available 24x7 in all formations for rapid response in coordination with the Central Control Room.

The Audit is of the view that allowing single tracking & monitoring company since 2012 is a big question mark on the performance of the Directorate General of Transit Trade. Failures of the management to engage tracking & monitoring companies through the competitive bidding process must be enquired and investigated at senior management level.

The DAC in a meeting held in January 2024, showed dissatisfaction with the performance of the tracking & monitoring company in the transit trade business and directed the Directorate General, Transit Trade, to ascertain the reasons for non-pursuance of legal cases for early vacation of stay order. Moreover, services of other tracking & monitoring company may be acquired with better performance and report to Audit & FBR in 60 days.

⁴(Ref: Directorate of Transit Trade, Quetta letters C.No. 124-Transit/DG/Misc/QTA/ 2019-20/4164 dated 11.12.2020 & C.No. 03-Transit/Misc-Corr/Yaroo/2022/714-717 dated 21.01.2022, & Incident Reports C.No. 01 -Transit/Misc-Corr/Yaroo/2021 dated 03.12.2021 and C.No. 01-Transit/Misc-Corr/Yaroo/2022 dated 02.01.2022).

Audit recommends for early investigation of non-acquiring the services of multiple tracking companies, besides fixation of responsibility on the person(s) at fault.

6.2.3.4 Defective procedure at border customs station susceptible to en-route pilferage of transit trade goods

The transit trade containers, selected for examination, are de-sealed at the Afghan Transit Yard, located at Chaman Railway Station situated 2-3 kilometres away from the border. The containers after examination are sent to the border without monitoring and tracking system which creates room for pilferage of transit goods. Reportedly, a container loaded with textile linen fabric was de-sealed and examined at Transit Trade Yard, Chaman on 07.08.2021. It was found as per declaration after which tracker was removed and the gate pass was signed and handed over to the clearing agent for crossing the cargo from Pak-Afghan Border Gate 2-3 kilometres away from Transit Yard. Later on, the fabric was unloaded from the container at a private godown situated on the way from Transit Trade Yard Chaman to the Pak-Afghan Border. The stakeholders attempted to en-route pilferage of transit goods⁵.

The Directorate informed that the arrival of consignments at Chaman border station are examined on a risk profiling basis and are processed to proceed for cross-border delivery under escort. There is a 2 to 2.5 km distance between Chaman yard and cross border point.

However, suitable measures and internal checks had been installed to ensure the integrity of cargo, after which no such incident was reported.

The Audit is of the view, that the cargo was required to be dispatched either under the escort or the examination of the goods and de-sealing should be carried out at the border in order to avoid such lapses in future.

The DAC in a meeting held in January 2024, directed the Directorate General, Transit Trade to strengthen internal controls, besides acquiring of examination yard at the Chaman border in order to minimize or avoid such lapses in future.

Audit recommends for early probe into the matter for non-acquiring of examination yard at border, besides fixation of responsibility on the person(s) for sending of cargo from railway yard to border without customs squad.

⁵(Ref: FIR No. 01-Cus/FIR/ATT/Chaman/2021/112 dated 12.08.2021 in Case No. 01-Cus/Seize/ATT/Chaman/ 2021).

6.2.3.5 En-route pilferage of transit goods causing loss of government revenue

Despite having a tracking and monitoring system and licensed bonded carriers/transport operators, the following incidents were unearthed by the customs authorities, which shows that en-route pilferages are routine occurrences in the Afghanistan-Pakistan Transit Trade:

- A) A vehicle bearing a fake number plate TLE-794 loaded with Container No. OOCU7804850 carrying textile products having a value of Rs 20.01 million, vide GD No. ITTK-AT-12799 dated 10.11.2020 for transit to Afghanistan via Torkham. The technician of M/s TPL Trakker Limited installed tracking device on the container but did not activate/start the trip intentionally. The vehicle with a fake number plate and the loaded container left the port around 04:00 AM on 25th November 2020 and moved towards the parked vehicle waiting at some remote place around 16 km away from the port. At around 5:56 AM the device was installed and paired with the replaced/subject vehicle and then the trip was started around 6:00 AM. On 29.11.2020 the container was examined on Risk Management Basis at Transit Station Torkham. During the examination, it was revealed that entire goods consisting of textile fabric were replaced with used/worn clothing during transit⁶.

B) A consignment of textile fabric 26,880 Kg, valuing Rs 38.50 million, was transported from Karachi on 05.08.2021 through a bonded carrier M/s. E-Movers/e-Movers (Pvt) Ltd. Instead of presenting the consignment to transit staff at Chaman, the transit consignment was taken by the bonded carrier and driver to a private godown on 08.08.2021. On 20.08.2021 information was received by Superintendent, Transit Trade Chaman that the transited goods i.e. textile fabrics were replaced in the container with Pakistani origin Fauji Fertilizer and Customs Authorities seized the fabric, fertilizer, vehicle and container⁷.

⁶(Ref: O-N-O No. 239 of 2021 dated 30.06.2021)

⁷(Ref: O-N-O No. 12 of 2022 dated 20.01.2022)

C) A container, containing Polyester Gents Suiting Fabrics, bearing number BMOU4093282 loaded on vehicle JT 4447 cleared from Karachi vide GD No. AT 17591 dated 27.10.2019 imported by M/s Sahil Asad Afghan Ltd. through clearing agent M/s Track Triangle Aviation Services Ltd. and a bonded carrier M/s e-Movers (Pvt) Ltd. Upon examination the container was found to be stuffed with old and used clothing. However, no alert was generated for a door opening or breaking seal⁸.

D) On 02.01.2022 at 02:39 PM, M/s TPL Trakker Limited generated a route deviation alert with respect to vehicle bearing registration number TKS-607 carrying 8,432 kgs of "green resin best" valuing Rs 4.56 million. As per the driver's statement, the vehicle was snatched at 11:00 AM on 02.01.2022 when they reached Gulistan Cross en-route from Chaman to Wagha⁹.

The management informed that the stakeholders i.e. clearing agents, bonded carriers/transport operators, tracking & monitoring company had failed to fulfil its obligations and did not perform its responsibilities. Accordingly, legal proceedings have been initiated against them for suspension/cancellation of their license in the light of relevant provisions of law and the Audit authorities shall be informed about further progress in due course.

The Audit is of the view that the bonded carriers/transport operators were legally bound for safe and secure transportation of transit cargo but failed to do so. M/s. TPL Trakker Company was responsible for effective tracking & monitoring of transit consignments, however, it could not generate alert in respect of opening of door, unusual stoppage and diversion of routes even after lapse of considerable time and created doubt on the credibility of tracking and monitoring system.

The DAC in a meeting held in January 2024, directed the Directorate General, Transit Trade to expedite adjudication proceedings and pursue the cases before legal fora and initiate legal proceedings against the other culprits involved in such irregularities and report progress within 60 days.

⁸(Ref: Show-cause Notice issued vide No. APPG/LA/5-154/2011 M/s. e-Movers (Pvt) Ltd./SCN 3/DTT (Part-III) dated 04.06.2022)

⁹(Ref: Incident Report issued vide letter C.No. 01-Transit/Misc-Corr/Yaroo/2022 dated 02.01.2022)

Audit recommends for implementation of DAC's directives, besides fixation of responsibility on the person(s) at fault.

6.2.3.6 Inefficiencies in discharging of legal responsibilities by the bonded carriers/transport operators

As per Rule 480 of SRO 121(I)/2014 dated 24.02.2014, the transport operator shall be responsible and bound to deliver the bonded transit goods to its destination within the prescribed time limit and by using the notified transport route. In case of any accident on the way between the office of departure and the office en-route which may cause a delay in the delivery of goods beyond the specified time, the transport operator shall communicate the nature of the accident, exact time and place of the accident along with complete details thereof to the office of departure and office en-route telephonically or electronically.

During scrutiny of the record/data of the Directorate of Transit Trade, Quetta for the period from July 2020 to June 2023, it was observed that in six (06) cases the following transport operators/bonded carriers did not perform their legal responsibilities during en-route transit of goods to Afghanistan.

S. No.	Name of the transport operator	Incident	Remarks

01	M/s D to D Logistics	As per the incident report vide letter C.No. 01-Transit/Misc-Corr/Yaroo/2021 dated 03.12.2021, A vehicle TLL-171 carrying 02 containers loaded with cooking oil, reached Yaroo Check Post at 12:00 Hours on 25.11.2021. It was found that due to a malfunction of the engine the vehicle was replaced with a new vehicle TLL-433 without prior intimation and approval from the concerned Directorate of Transit Trade.	A show-cause notice was issued by the Directorate on 25.02.2022 which was also not finalized to date.
02	M/s. Abid Logistics	As per letter C.No. 02-Transit/misc-Corr/Yaroo/2022/691 dated 19.01.2022, a vehicle GLTA-847 carrying a container loaded with new tyres, met an accident and the vehicle was replaced with new vehicle TMC-846 without prior intimation and approval from the concerned Directorate of Transit Trade. Accordingly, a show-cause notice was issued on 25.02.2022 which was also not finalized to date.	O-N-O No. 01/2022 dated 24.11.2022 was issued by the Directorate and imposed a penalty of Rs. 25,000 on the bonded carrier as no pilferage occurred.
03	M/s. Bolan Logistics	As per the incident report issued vide letter C.No. 01-Transit/Misc-Corr/Yaroo/2022 dated 02.01.2022, on 02.01.2022 at 02:39 PM M/s. TPL Co. generated a route deviation alert in respect of vehicle TKS-607 carrying 8,432 kgs of "green resin best" valuing Rs. 4.56 million. As per the driver's	The transport operator did not timely inform the Custom's authority about the incident. Further, the outcome of the case is still awaited.

		statement, the vehicle was snatched at 11:00 AM on 02.01.2022 when they reached Gulistan Cross en-route from Chaman to Wagha.	
04	M/s. e-Movers (Pvt) Ltd	As per the incident report issued vide letter C.No. 01-Transit/Misc-Corr/Yaroo/2021 dated 29.12.2021, a vehicle No. TLF-994 was replaced with new vehicle No. TLH-827 without prior intimation and approval from the concerned Directorate of Transit Trade	The outcome of the legal action against the bonded carrier is awaited.
05	M/s. e-Movers (Pvt) Ltd	As per the Show-cause Notice issued vide File No. APPG/LA/5-154/2011 M/s. e-Movers (Pvt) Ltd./SCN 2/DTT (Part-II) dated 25.02.2022, a bonded carrier M/s. e-Movers (Pvt) Ltd started the journey from Karachi to Chaman on 31.12.2021 when the vehicle reached Surab, Baluchistan it broke down and the vehicle was repaired/replaced without getting prior permission from the competent authority of the concerned Directorate of Transit trade.	The outcome of the legal action against the bonded carrier is awaited.
06	M/s. e-Movers (Pvt) Ltd	As per Directorate of Transit Trade, Quetta letter C.No. 03-Transit/Misc-Corr/Yaroo/ 2022/714-717 dated 21.01.2022, a bonded carrier M/s. e-Movers (Pvt) Ltd, carrying DAP started the journey from Gwadar to Chaman on 13.12.2021. On 27.12.2021 an alert of	The Bonded Carrier was responsible for an inordinate delay of twenty days in communicating and sharing information with respect to the

		the door opening was generated after that on 18.01.2022 after the lapse of 20 days a screenshot was shared by M/s. TPL that PMD was replaced with a new PMD.	whereabouts of the vehicle.
--	--	--	-----------------------------

The management informed that show-cause notices/explanation memos had been issued. The cases were pending before the competent licensing authority (Directorate General of Transit Trade, Karachi). The Audit will be apprised accordingly about outcome and subsequent progress.

The Audit is of the view that due to lack of effective internal controls & monitoring by the Directorate General of Transit Trade these incidents were occurred which ultimately caused pilferages in transit trade.

The DAC in a meeting held in January 2024, directed the Directorate General, Transit Trade to finalize adjudication proceedings and report progress within 60 days.

Audit recommends for implementation of DAC's directives, besides fixation of responsibility on the person(s) at fault.

6.2.3.7 Failure of the department to recover the adjudged government dues – Rs 120 million

Section 202 of the Customs Act 1969, read with Chapter-XI, recovery of arrears of the Customs Rules 2001, provides a detailed procedure for recovery of government dues from the defaulters.

During scrutiny of the record/data of the Directorate of Transit Trade, Quetta for the period from July 2020 to June 2023, it was observed that the adjudicating authority imposed a penalty vide following Order-In-Original which was later upheld by the higher legal forum, however, recovery of the same is still outstanding. Detail is given below:

S#	O-N-O No. & Date	Name of the accused person	Penalty Rs	Remarks
01	12/2022, 20.01.2022	e-Movers (Pvt) Ltd	10.00	The O-N-O was set aside by the Appellate Tribunal. Later on, the Honourable Baluchistan High Court vide order dated 06.04.2023 set aside the decision of the Appellate Tribunal and upheld the O-N-O
		Azizullah Khan Afridi	5.00	
		Mansoor Ahmed Shaikh	5.00	
		M. Isa Afridi	5.00	
		Mushtaq Ahmed Shaikh	5.00	
		Zahir, Driver	0.50	
02	11/2022, 20.01.2022	M/s. Akbar Khan & Brothers, Border Agent	1.00	The pitch of penalty was reduced from 2.5 million to 1.0 million by the Appellate Tribunal vide Appeal Nos. Q-77, 78 & 126/2022 dated 21.06.2022
03	80/2022, 30.05.2022	M/s. Rawandi & Brothers	1.00	-
		Najeebullah S/o Mirwaise	0.50	-
04	239/2021, 30.06.2021	Clearing Agent at Karachi i.e. M/s. Integrated Services (Pvt) Ltd	20.01	-
		Clearing Agent at Torkham i.e. M/s. Shahid Ali	2.00	-

	Tracking & Monitoring Company i.e. M/s. TPL Trakker (Pvt) Ltd	1.90	-
	Bonded Carrier i.e. M/s. D to D Logistic (Pvt) Ltd	Duty & Taxes + 20.01	-
	Drivers of the vehicle	2.00	-
	Mr. M. Rizvi, representative of M/s. D to D Logistics	1.00	-
	Hassnain Sarwar representative of Afghan Importer	40.02	-
	Total	119.94	

This resulted in the non-recovery of the adjudged penalty of Rs 119.94 million.

The management informed that only one million rupees had been recovered and the remaining amount of Rs 118.94 million was under recovery process.

The Audit is of the view that non recovery of the government revenue despite lapse of considerable time shows inefficiency on the part of the management.

The DAC in a meeting held in January 2024, directed the Directorate General, Transit Trade to provide justification for the delay in realization of government dues, besides prompt recovery of the remaining amount and report progress within 30 days.

Audit recommends for prompt recovery of adjudged government dues without further delay, besides fixation of responsibility on the person(s) responsible for such inordinate delay.

6.2.3.8 Incomplete description of transit goods

As per Rule 472 of SRO 121(I)/2014 dated 24.02.2014, the trader or his authorized Customs agent shall file the Afghan Transit Goods Declaration (hereinafter called AT GD) online in the Customs Computerized System at the office of departure through a User ID.

During scrutiny of soft data of the Directorate General of Transit Trade, Karachi for the period from July 2020 to June 2023, it was observed that incomplete descriptions of the goods were declared by the importers as well as assessed by the customs authorities. For example, for all kinds of fabric mostly a term textile fabric was used, similarly for all brands of perfumes the term of perfumes was written. In the goods declarations brand names, make, model etc. of all commercial goods were concealed which make the soft data incomplete and doubtful regarding actual goods imported under transit trade.

The management replied that it had enhanced the incidence of examination of high tariff smuggling-prone items at Karachi port to enable Transit Trade Stations to cross-verify the description and HS code of the goods on Customs computerized system. Further, it had requested the consignees of the transit trade to mention unambiguous, specific and accurate description and PCT code of high-tariff smuggling-prone goods in the Goods Declarations (GDs).

The DAC in a meeting held in January 2024, showed dissatisfaction with the present state of affairs in the transit trade and directed the Directorate General, Transit Trade, to look into the matter and justify the non-recording of the complete description of the goods in the import record, besides taking remedial measures to record complete description of imported goods in transit GDs.

Audit recommends for implementation of DAC's directives.

7. Recommendations

A) Policy Recommendations

i) Demand-Supply Strategy

Audit recommends that imports under transit trade may be in accordance with the actual demand of the Afghanistan. It is expedient to limit the quantity of goods in proportion to Afghanistan's population and their verified consumption preferences and patterns. For example, the population of Afghanistan is 42 million and per capita consumption of tea is 0.6 kg, it may be allowed to import 25,200 tons of tea whereas it imported 71,520 tons and at the other hand if tea

drinking habit is green tea then don't allow or restrict black tea. The same principle should be applied to electronic gadgets and domestic appliances. Denying access to those industrial inputs for which no industrial capacity exists in Afghanistan. The comprehensive exercise should be conducted considering the imports to Afghanistan from other countries, especially from Iran.

ii) Finance Driven Approach

In order to restrain the influx of goods under transit trade which ultimately re-enter into Pakistan, Audit proposes the adoption of one of the following methodologies:

a) Revenue-Centric Methodology

The parity duty and taxes may be collected or equivalent bank guaranties may be required on all transit cargo by Pakistan. Subsequently the duty and taxes so collected may be refunded to the Afghanistan government for subsequent refund/return to their genuine traders.

b) Cost-Centric Methodology

Government of Pakistan incurs huge expenditure on transit trade facility which includes infrastructure, security, administration, and other indirect costs without charging any amount from Afghan Government. Therefore, the Audit recommends that all costs need to be charged on transit trade consignments.

c) Stringent Penalty Mechanism

It is observed that mechanism for penalizing the non-compliant/evaders/violators is weak, therefore, it is expedient to strengthen the system of financial penalties to avoid misuse of the facility.

iii) Stakeholders' Participation

Stakeholders of both sides including local manufactures in Pakistan should be involved in policy and decision making relating to transit trade so that insights and feedback be taken during policy formulation and trade facilitation measures.

iv) Strengthening the Legal Framework

The legal framework should be strengthened to ensure stringent timely actions against violations to discourage pilferages in transit trade cargo.

B) Operational recommendations to counter transit trade pilferages

- Advanced scanning technologies at ports and border crossing stations may be adopted for comprehensive checks on consignments to detect any anomaly or illicit materials.
- Effective real-time surveillance of transit cargo may be ensured on routes to monitor the movement of goods and identify any suspicious activities along the path.

- Biometric verification may be made compulsory for individuals engaged in transit trade to ascertain their identities and maintain a secure and verified database of traders, bonded carriers, clearing agents.
- Combined checkpoints of all law enforcing agencies at strategically vital positions along the transit route, especially at spots prone to smuggling activities, must be established.
- Implement a real-time block chain secure and transparent data exchange mechanism between Pakistan and Afghanistan to facilitate immediate information sharing on consignments, traders, and trade patterns.
- Conduct regular training sessions for Customs and border agencies on modern surveillance technologies, risk analysis, and operational best practices.
- A well-structured bilateral dispute resolution mechanism may be established on both sides of the border for speedy disposal of the trade dispute between the two countries.

8. Conclusion

The increase of transit trade volume by 69% in the FY 2022-23 doesn't match the socio-economic conditions of Afghanistan. Due to weak tracking, monitoring and surveillance by Directorate General of Transit Trade, and ineffective border control by Customs; the transit trade facility was exploited on both sides of the border in collusion with concerned authorities since these items are either pilfered or smuggled back into Pakistan. This resulted in evasion of duty & taxes worth Billions of rupees besides damaging the formal sector and local industries. There is a need to re-negotiate trade agreements with Afghanistan on the pattern of demand & supply driven strategy along with improving the tracking, monitoring and surveillance mechanism to curb its misuse so that Pakistan's tax revenue and local industries can be safeguarded.

CHAPTER-11 THEMATIC AUDIT OF TAX EXPENDITURE

1. Introduction

Tax expenditure is revenue forgone because of selective provisions in the tax code.¹ This includes rebates, credits, subsidies and exemptions, designed by the government for promoting specific economic objectives. The Organization for Economic Cooperation and Development (OECD) defines tax expenditure as “the estimated costs to the tax revenue of preferential treatment for specific activities.”² Measurement of cost-effectiveness of tax expenditures is a key step in evaluating economic efficiency because it provides a perspective on the ability of the tax expenditure measures to improve overall real income.

Tax expenditure is an alternative policy by which the government delivers financial support not only to individual taxpayers but also to the corporate sector in Pakistan. Similarly, tax exemptions to educational and medical institutions (NPOs/NGOs) are granted to promote education and health facilities for the general masses. Tax expenditure can appear on either the revenue or expenditure side of the budget, e.g. exemption/ reduced rate of tax on the import of inputs by the fertilizer sector and reduced rate of sales tax on all types of fertilizer.

Directorate General of Audit Inland Revenue (North), Lahore conducted a thematic audit of tax expenditure during the FY 2022-23 to gauge the effectiveness of the tax expenditure regime. The audit selected six major tax expenditures i.e. NPOs, IPPs, distributors of cigarettes, real estate investment trusts, fertilizer sector and exemptions in erstwhile FATA/PATA. The audit found that the tax expenditure policy of the federal government lacked consistency and devoid of defined outcomes both in formulation and reporting. An amount of Rs 2,239.63 Billion has been allowed as tax expenditure during the period under audit i.e., FY 2021-2022.

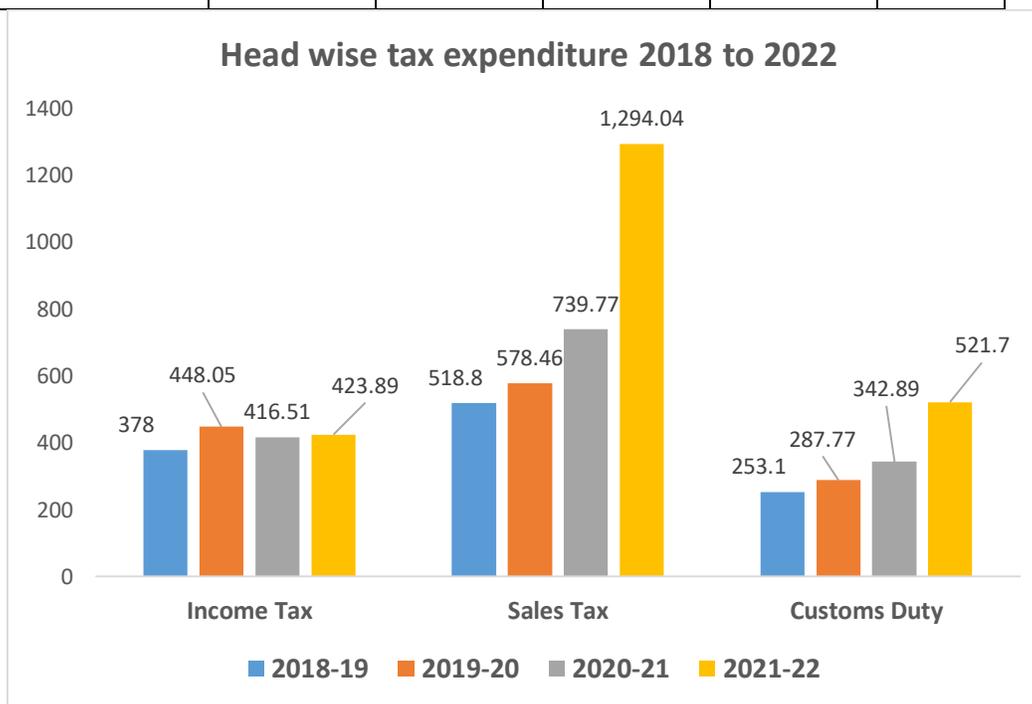

The total federal tax expenditure based on the data published by FBR relating to FY 2021-22 is estimated at Rs 2,240 Billion. The amount pertaining to Income Tax stood at Rs 424.00 Billion (18.92%), Sales Tax Rs 1,294.00 Billion (57.77%) and Customs Duty Rs 522 Billion (23.30%) of the total FBR collection under all head.

¹Tax expenditure Report, FBR 2023

Summary of tax expenditure for the last four years is presented below:

(Rs in Billion)

Tax Heads	2018-19	2019-20	2020-21	2021-22	Total
Income Tax	378	448	416	424	1,666
Sales Tax	519	578	740	1,294	3,131
Customs Duty	253	288	343	522	1,405
Total	1,150	1,314	1,499	2,240	6,203

The above table and graph depict a consistent increase in tax expenditure under all heads. However, Sales tax which is an indirect tax, exhibited a sudden increase in FY 2021-22 due to a reduction in the sales tax rate on POL products which resulted in an extra burden of Rs 633 Billion on the national kitty.

2. Background

Throughout the world, governments provide tax exemptions, concessions and tax relief to protect or uplift certain segments of society/areas/products. Due to varying policy designs and ideologies, there is a large variation in tax expenditure across countries. According to the "Global Tax Expenditure" data for 2019 and 2020, Russian Federation provides the largest tax exemptions of 14.8% of their GDP. In the U.S., income tax expenditure constitutes 6.6% of GDP. The tax expenditure in European countries is relatively close to the world average of tax expenditure (around 4% of GDP). Pakistan and India appear at the lower tail of this distribution. Pakistan has a tax expenditure equal to 2.8% of GDP and India has an expenditure of 0.4% of their GDP³.

3. Establishing of audit theme

3.1 Reasons for Selection

Tax expenditure constitutes around 35% of the total collection of tax revenue. In the environment of self-assessment system, there is a high risk that the condition of exemptions is not being monitored. No prior studies have so far been conducted on this topic by the DAGP, therefore, this study explores the theme of tax expenditure and its implications on the current control environment as well as economic policies.

3.2 Objectives

The Directorate General planned to conduct a thematic audit of tax expenditure to undertake a detailed analysis of the tax expenditure of the federal government to ensure that the tax expenditure is backed by legal frame work approved by the parliament. The broad objectives of the thematic audit are summarized as follow;

- Overview of tax expenditure under different provisions of Income Tax Ordinance 2001, The Sales Tax Act 1990 and Customs Act 1969.
- Analysis of tax expenditure methodology and policy for evaluation of effectiveness of tax expenditure.

3.3 Scope

The study analysed the tax expenditure reports published by the FBR for the last five years. Further, field audit teams also reported significant instances of misuse of tax exemptions/concessions in respect of direct and indirect taxes in various field formations of FBR.

³Tax Expenditure Report 2023 (FBR)

4. Legal frame work governing the theme

All tax laws provide provisions regarding exemptions, concessions, tax credits, tax rebate and preferential tax regime which constitute a tax expenditure. Legal frame work governing the theme is given as under:

- The Income Tax Ordinance, 2001
- The Sales Tax Act, 1990
- The Customs Act, 1969

5. Stakeholders and governmental organizations identified as directly/indirectly involved

FBR, Parliament, Ministries of Finance and Commerce, taxpayers, and general public

6. Role of important organizations

Tax policy wing of FBR is responsible for the consolidation and preparation of Tax expenditure report. Tax operations wing of FBR is responsible for the implementation and monitoring in this regard.

7. Field audit activity

All the field audit teams were assigned to report significant findings on the topic of tax expenditure separately. In addition to this, a designated team was also deputed at FBR, HQ to conduct the Thematic Audit.

8. Categorization of Tax Expenditure

8.1 Income Tax

Section 53 of the Income Tax Ordinance, 2001 provides legal authority in respect of the tax expenditure. Whereas, Part-I, Part-II, Part-III and Part-IV of the Second Schedule ibid provides conditions to the extent of which exemption from total income, reduction in tax rates, reduction in tax liability respectively is allowed. Further, the law also provides hundred percent tax credit towards tax liability subject to the conditions and limitations specified in the law. Tax expenditure on account of income tax is tabulated as under:

(Rs in million)

Description	Tax Expenditure		%age + (-)
	FY2020-21	FY2021-22	
Exemption and Tax Concessions	26,164	26,834	2.56
Deductible allowances	10,625	14,506	36.53
Tax Credits	65,465	52,133	-20.37
Income Exempt from Tax	232,852	232,398	-0.19
Reduction in Tax Rates	17,047	24,444	43.39
Reduction in Tax Liability	3,285	4,738	44.23
Exemption from Specific Provisions	61,076	68,881	12.71
Others / Miscellaneous	32,621	26,164	-19.8
Total Income Tax Expenditure	416,514	423,984	1.79

Reductions in tax liability, tax rates and deductible allowances witnessed a significant increase whereas tax credits experienced a significant reduction in the FY 2021-22 as compared to the previous year.

8.2 Sales Tax

Section 13 of the Sales Tax Act, 1990 read with Sixth Schedule of the Sales Tax Act provides exemptions of Sale Tax on local supply of goods and at import stage. Further Section 4 read with Fifth Schedule of Sales Tax Act 1990 provides zero rating of Tax at local supplies and at import stage as well. Moreover, the Eighth schedule of the Act provides reduced rate of tax on local supplies and at import stage. Furthermore, Section 7 and 8 of the Act and SROs issued under these provisions also allowed tax credits/ concessions subject to certain conditions given therein. Tax expenditure on account of Sales Tax is tabulated as below:

(Rs in million)

Types of Exemption	Tax Expenditure		%age + (-)
	FY2020-21	FY2021-22	
Zero Rating under Fifth Schedule of the Sales Tax Act 1990	33,422	139,448	317.23

Exemptions given on POL Products Through Various SROs	0	632,950	n/a
Exemption under Sixth Schedule on Imports	327,656	257,537	-21.40
Exemption under Sixth Schedule on Local supplies	139,046	133,178	-4.22
Reduced Rates Under Eighth Schedule	193,722	129,906	-32.94
Sales Tax on cellular Mobile Phones under Ninth Schedule	45,919	1,021	-97.78
Total Sales Tax Expenditure	739,765	1,294,041	74.93

It is evident from the above table that exemption on POL was introduced for the first time. Zero-rating on exports under the Fifth Schedule showed a significant increase of 317% whereas sales tax on cellular phones exhibited 98% decrease as compared to the previous year.

8.3 Customs Duty

As per provisions of Section 19 of the Customs Act 1969, the Federal Government exempts any goods imported into or exported from Pakistan from the whole or any part of the customs-duties chargeable thereon. Exemptions are also allowed through Free Trade Agreements and Preferential Trade Agreements. Further, exemptions are admissible to export oriented sectors as well. Tax expenditure on account of Customs Duty is tabulated below:

(Rs in million)

Type of Exemption	Tax Expenditure		%age + (-)
	FY2020-21	FY2021-22	
Chapter-99 Exemptions	15,963	22,240	39.32
FTA & PTA Exemptions	46,105	102,658	122.66
Fifth Schedule Exemptions & Concessions	168,754	172,978	2.50
General Concessions: Automobile sector, E&Ps, CPEC, etc.	60,987	192,950	216.38
Export Related Exemptions	51,081	30,878	-39.55
Total Custom Expenditure	342,890	521,703	52.15

General concessions on automobile, E&P and CPEC witnessed a significant increase of 216% while export related exemptions decreased by 39% in FY 2021-22 as compared to the previous year.

9. Methodology

Tax expenditure is commonly estimated by using one of three approaches i.e. revenue forgone, revenue gain, and outlay equivalent. These estimates can be calculated either on cash or accrual basis.

FBR uses a revenue-forgone methodology for preparing tax expenditure reports. This method is simple and easy to estimate however; it needs to be coupled with a strong monitoring mechanism to ensure achievement of intended objectives.

Audit relied on tax expenditure reports published by FBR. Moreover, repeated instances of control failures reported by the Audit previously have been analysed. A sample-based evaluation of non-compliance with the tax expenditure framework was also performed for major beneficiaries of the scheme. Initially, analysis of four financial years was planned but due to non-availability of reliable data the report is limited to the analysis of two years only.

10. Key audit findings

10.1 Critical appraisal of tax expenditure mechanism

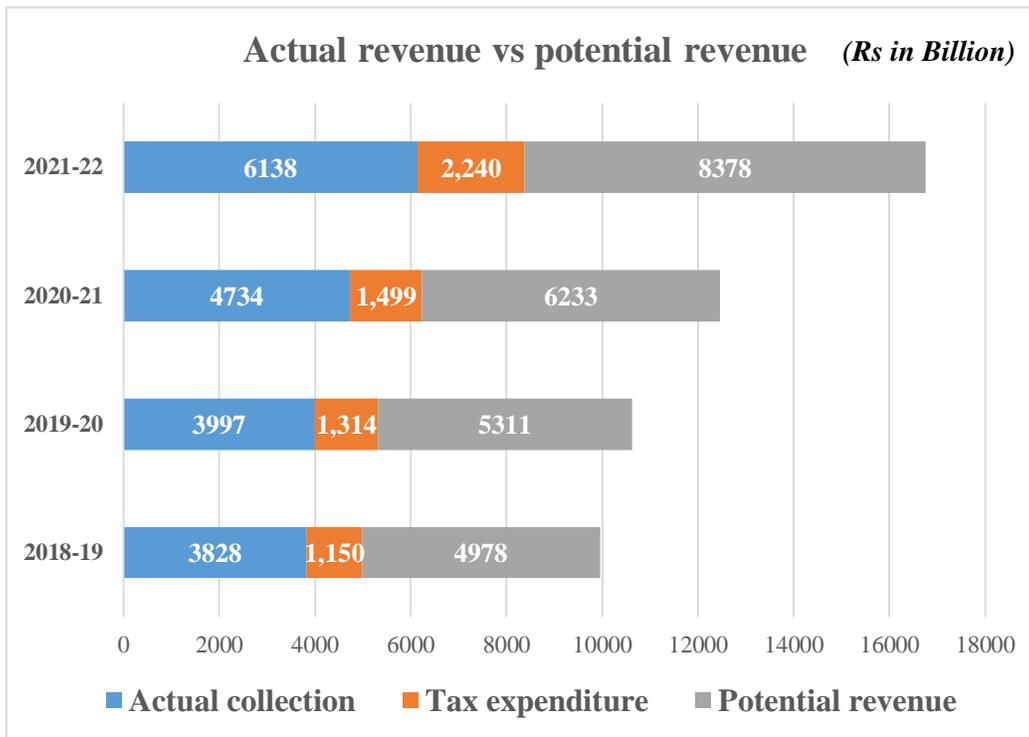

FBR started publishing tax expenditure reports in 2019 based on revenue foregone method on the recommendations of the World Bank. However, the audit observed that these reports lacked clearly defined outcomes and objectives. The effectiveness of tax expenditure is difficult to ascertain due to the lack of aforementioned reason. The role of these reports is undefined because these are not legally required to be debated in the parliament. Therefore, the contribution of these reports in planning and subsequent budget planning is non-transparent and lacks conformity.

According to IMF, Pakistan is currently capturing only 24% of its total tax potential. Additional constraints through tax expenditure on a government already struggling financially should be investigated. Such a review should link the intended expenditure with measurable outcomes thereby making informed decision during budget planning and monitoring phases. Tax expenditure and revenue collection for the last four years are as follows:

(Rs in Billion)

FY	Actual collection (A)	Tax expenditure (B)	Potential revenue (A+B)	Percentage of tax expenditure (B/A)
2018-19	3,828	1,150	4,978	30%
2019-20	3,997	1,314	5,311	33%

2020-21	4,734	1,499	6,233	32%
2021-22	6,138	2,240	8,378	36%

Source: FBR Tax Expenditure Report 2023

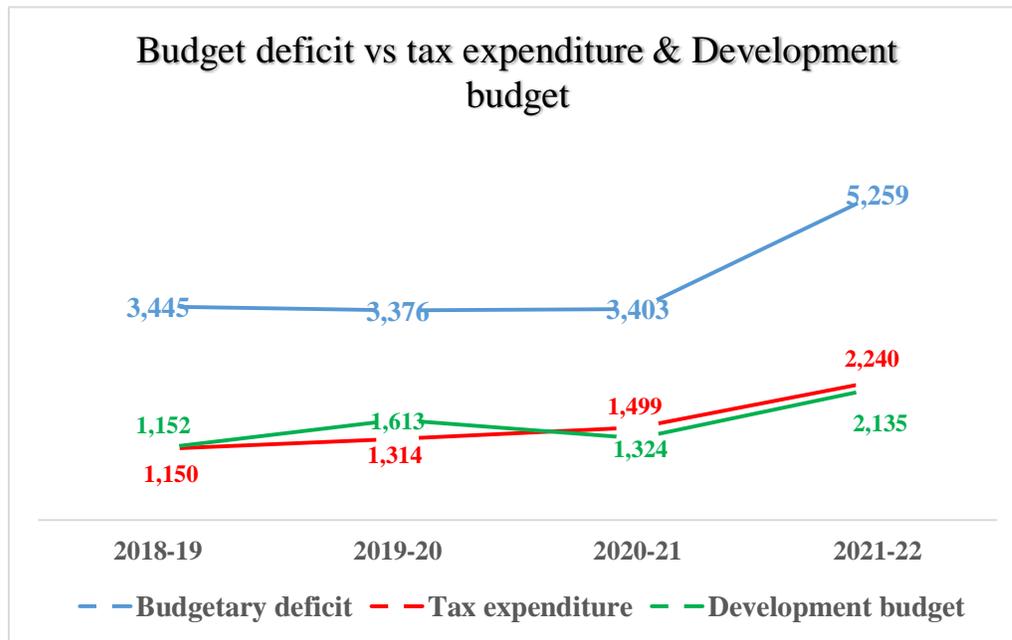

The above table and graph show that tax expenditure has consistently risen over the past four years along-with actual revenue collection. However, in FY 2021-2022, while the revenue collection increased by 130%, tax expenditure increased by 150% as compared to the previous year.

The following table and graph depict tax expenditure against the budgetary deficits and development budgets of the federal government over the last four years:

(Rs in Billion)

FY	Budgetary deficit (A)	Tax expenditure (B)	Development budget (C)	Percentage (B/A*100)
2018-19	3,445	1,150	1,152	33.38%
2019-20	3,376	1,314	1,613	38.00%
2020-21	3,403	1,499	1,324	44.00%
2021-22	5,259	2,240	2,135	42.00%

Source: Fiscal Policy statements

The above table and graph depict that the tax expenditure has consistently increased over the last four years. The budget deficit was reduced in FY 2019-20, which created some fiscal space for increasing the development budget. In FY 2020-21, tax expenditure exhibited an increase but the development budget decreased. Afterwards, the budgetary deficit increased exponentially in FY 2021-22, apparently because of the increasing effect of both tax expenditure and development budgets. Fiscal Responsibility and Debt Limitation Act, 2005 requires the federal government to limit the budgetary deficit to 6% of its GDP. Pakistan has struggled to plug its budgetary deficits over the years. The budget deficit for the FY 2021-22 was 6.5% of its GDP. Moreover, fiscal space for development outlays has

been shrinking over the years in the presence of ever-rising demands for development expenditure.

10.2 Non-monitoring of Non-Profit Organizations established unlawfully

Section 100C of Income Tax Ordinance, 2001 provides that non-profit organization shall be allowed a tax credit equal to one hundred percent of tax payable under any of the provisions of this Ordinance including minimum and final taxes in respect of incomes subject to the prescribed conditions. Further, Section 2(36) of Income Tax Ordinance, 2001 defines non-profit organization (NPO) as “any person other than an individual, which is established for religious, educational, charitable, welfare purposes for general public and registered by or under any law as a non-profit organization”. Moreover, all the provinces have promulgated laws for the registration of the non-profit organization (Trust) viz Punjab Trust Act 2020, Sindh Trust Act 2020, Khyber Pakhtunkhwa Trust Act 2020, Baluchistan Trust Act 2020 and Islamabad Capital Territory Trust Act 2020. Previously, all the NPOs were registered under the Trust Act 1882 which was repealed after 18th amendment in the Constitution of Islamic Republic of Pakistan 1973. Now, each province requires every trust registered to register afresh under the new law within six months. Further, ministry of law and justice has also clarified vide U.O No 142/2022-Law-I dated 17.03.2022 regarding newly enacted provincial trust acts.

During audit of field offices of FBR, it was observed that the Trusts and Non-profit organizations were required to be registered under the respective law of the province with effect from the date as mentioned in the respective laws. No such registration of the non-profit organization has been done, which means that the tax credits u/s 100C of the Ordinance were not admissible to the non-profit organizations. Audit further observed that the department allowed tax credit amounting to Rs 15,432 Billion during the FY 2021-22 without ensuring the registration of the NPOs in the respective province.

10.3 Non-monitoring of exemptions granted to electric power generation projects

Section 53 (a) read with clause (132) of the Second Schedule to the Income Tax Ordinance, 2001 provides an exemption from payment of income tax to the profits and gains derived by a taxpayer from an Electric Power Generation project set up in Pakistan on or after the 1st day of July 1988 with the following conditions: -

- I. The project must be owned and managed by a company registered under the Companies Act, 2017 or having its registered office in Pakistan.
- II. The project is not formed by the splitting up, or the reconstruction or reconstitution, of a business already in existence
- III. The 50% shares and control is not with the Federal Government, Provincial Government or Local Government.
- IV. The exemption does not apply to oil-fired power plants set up between 22nd October

2002 and 30th June 2006 but shall apply to Dual Fuel (Oil/Gas) power projects set up on or after the first September 2005.

The audit observed that the Government allowed tax expenditure on the taxable profit earned by the electric generation projects amounting to Rs 167,896 million during the FY-2018 to 2022 to the two hundred and twenty (220) taxpayers being assessed as Independent Power Producers given the fulfilment of above-stated pre-conditions.

Audit, however, further observed that after the emergence of the self-assessment system through the promulgation of the Income Tax Ordinance, 2001 all the completed returns of income are deemed to be assessment orders, which can only be re-opened after obtaining definite information regarding concealment of taxable income as per the law. The completed return can also be re-opened, if the deemed assessment is prejudicial to the interest of revenue, or if the case of a particular taxpayer is selected for audit as per prescribed conditions under the law. Audit observed that the detail scrutiny of the NPOs in respect of above referred condition was not conducted by the department. Therefore, the cases remained unattended and the taxpayers may have gained the benefit of exemptions against the provisions of law. Further, profit earned on bank deposits, capacity charges received by the power producers and dividend income needs to be scrutinized for taxation under the law.

Audit has repeatedly pointed out in previous years that above mentioned conditions are not being fulfilled by the power producers. The audit further observed that the power producers availed tax exemption for an amount of Rs 168 Billion. Despite such a huge expenditure on account of exemptions to IPPs the issue of power sector persists.

Audit suggests that the above tax expenditure may be monitored under the relevant law. Moreover, tax expenditure policy in respect of IPPs needs to be reviewed and interlinked with the power policy.

10.4 Reduced rates on distributors of Cigarettes

Section 153 of the Income Tax Ordinance, 2001 provides that every prescribed person making a payment in full or part including a payment by way of advance to a resident person for the sale of goods shall, at the time of making the payment, deduct tax from the gross amount payable at the rate of five percent. However, clause 24-A part-II of the Second Schedule to the Income Tax Ordinance, 2001 allowed tax expenditure at a reduced rate of 1% from distributors of cigarette and pharmaceutical products.

Audit observed that tax exemption on the supply of cigarettes is irrational in view of the health policy of the federal government. Moreover, the subject exemption to cigarettes has been granted along with pharmaceutical products which is antithetical. Exemptions on account of supply of cigarette and pharmaceutical products amounting to Rs 14,694 million were allowed during FY 2021-22. The audit further observed that, on one hand, the government has increased indirect taxes in the shape of FED and Sales Tax on the business of cigarettes, but on the other hand allowed

exemption to cigarettes from payment of direct taxes. The increased burden in the form of indirect taxes falls on consumers while distributors are reaping the benefit of this tax exemption.

Audit suggests that the above tax expenditure may be discontinued for the cigarette sector.

10.5 Non-monitoring of Collective Investment Schemes and Real Estate Investment Trust Schemes

Clause 99 of Part 1 of Second Schedule to the Income Tax Ordinance, 2001 provides that any income derived by a Collective Investment Scheme or a Real Estate Investment Trust shall be exempt from payment of income tax if not less than ninety per cent of its accounting income of that year is distributed amongst the unit or certificate holders or shareholders as the case may be.

Audit observed that tax expenditure on income tax on above mentioned schemes for the FY 2021-22 has been allowed to the tune of Rs 26,284 million without ensuring that taxpayers had distributed ninety per cent of their accounting income for that year.

Audit suggests that all the cases that have availed exemption under Clause 99 of Part-1 of the Second Schedule to the Income Tax Ordinance, 20021 may be selected for audit to ensure that the main condition i.e. distribution of ninety percent of accounting income to respective shareholders is fulfilled or not.

10.6 Malpractices by the Fertilizer Sector

According to Sr. No 144 of the sixth schedule to the Sale Tax Act, 1990 sales tax on import of LNG by fertilizer sector is exempt. Further, the eighth schedule of the Sales Tax Act 1990 provides that sales tax on supplies of natural gas to the fertilizer sector and local supplies of fertilizers (all types) is 5% and 2% respectively. Moreover, sales tax on the import of Phosphoric Acid and Rock Phosphate by the fertilizer sector is also reduced to 5% and 10% respectively.

The Audit observed that as per tax expenditure report for the year 2023, total amount of expenditure involving Rs 58,187 million was granted on the supply of natural gas to fertilizer manufacturing units, import of Phosphoric Acid and Rock Phosphate and local supply of fertilizers of all types. The purpose of this expenditure was to provide fertilizer to growers at affordable prices with the ultimate goal of providing relief to the general masses. Despite availing exemptions and reduced rates of tax on inputs, fertilizers were not available to growers at notified prices. Thus, the growers were forced to buy fertilizers at higher than notified prices. Tax expenditure incurred in the shape of exemption and reduced rates failed to achieve the desired objectives of the government.

There is a need to evolve a mechanism to ensure monitoring of tax expenditure with the collaboration of concerned ministry to ensure trickle down of benefits to the end user.

10.7 Misuse of tax exemption in erstwhile tribal area

According to the Sixth Schedule to the Sales Tax Act 1990, supplies and imports of plant and machinery for installation in erstwhile tribal areas and of industrial inputs by the industries

located in the tribal areas as defined in the constitution of the Islamic Republic of Pakistan are exempt from Sales Tax.

The Audit observed that goods manufactured in industrial units established in erstwhile tribal areas were regularly brought to tariff areas without payment of leviable duty and taxes. The same malpractice was observed in the ghee, oil and cosmetics sectors. The basic purpose of the exemptions was to generate economic activity thereby uplifting the livelihood of the residents of tribal areas. Audit holds that exemptions granted on this account are being misused as sales tax law is extended to the whole of Pakistan after the 25th amendment. An amount of Rs 15,307 million was foregone as per the tax expenditure report for FY 2021-22.

The Audit recommends that the impact of revenue foregone and distortion of the market due to exemption extended every year to erstwhile tribal areas needs to be reviewed.

10.8 Duty and tax exemptions extended to vehicles plying in erstwhile FATA/PATA

On the commencement of the 25th Amendment to the Constitution of Pakistan, 1973, Federally and Provincially administered areas of Khyber Pakhtunkhwa stood merged in the province of Khyber Pakhtunkhwa. After the merger, exemption from customs duty / taxes was extended through Finance Act, 2018 up to 30th June, 2022, it was further extended up to June, 2024.

The Audit analysed the data provided by the Excise and Taxation Department, Khyber Pakhtunkhwa, that 53,668 non-duty paid vehicles were profiled in Malakand region alone comprising 08 districts. In addition, non-duty paid vehicles were also plying in districts of erstwhile FATA. As these vehicles were already plying in these areas before the said amendment, therefore, the Government of Pakistan allowed exemptions. Audit further observed that revenue amounting to Rs. 107,336 million (53668 x Rs 2,000,000 Approx.) was forgone by the government.

Audit recommends that exemptions of duty and taxes granted to non-duty paid vehicles in FATA/PATA areas needs to be rationalized.

10.9 Repeated control failures of non-monitoring of tax expenditure

The Audit has been pointing out weaknesses of internal controls/ irregularities leading to loss of revenue over the years in its annual audit reports. These irregularities relate to incorrect claims of tax credits, inadmissible allowances of tax depreciation, inadmissible exemptions of sales tax, and inadmissible exemption/ concession claimed at the import stage. These reported irregularities amounted to Rs 53,489 million for the FYs 2020 to 2024.

The recurrence of the same irregularities is a matter of serious concern and points towards inaction by the management in addressing these control failures. The irregularities pointed out by Audit over the years are summarized below: -

Nature of misuse/Tax Expenditure	Legal provisions	(Rs in million)	Reference
Income Tax			
Inadmissible claim of tax credits	Section 65B, 65D, 65E(1), 65F of the Income Tax Ordinance 2001	11,672	Para 4.2 of Audit Report 2021-22
Incorrect claim of Tax depreciation allowance	Section 22 read with section 23 of the Income Tax Ordinance	1,545	Para no 4.9 of Audit Report 21-22
Inadmissible claims of Tax Credits	Section 65 and section 100C of the Income-tax Ordinance	13,094	Para 5.4 of Audit Report 2022-23
Incorrect claim of tax credits	Section 100C of the Income Tax Ordinance 2001	6,071	Para 4.4 & 4.22 Audit Report 2023-24
		32,382	
Sales Tax			
Inadmissible exemption of Sales Tax	Sixth Schedule of the Sales Tax Act	186	Para 5.16 of Audit Report 2021-22
Inadmissible exemption of Sales Tax	Section 13 read with Sixth Schedule of the Sales Tax Act 1990	1,728	Pars 6.9 of Audit Report 2022-23
Inadmissible exemption of Sales Tax	Section 13 read with Sixth Schedule of the Sales Tax Act 1990	3,458	Pars 5.7 of Audit Report 2023-24
		5,372	
Customs Duties			
Inadmissible concession/exemptions in duties and taxes	Section 19 of the Customs Act 1969 and various statutory enactments	800	Para 7.3 of Audit Report 2021-22.
Non-adherence to DTRE Rules	Export-related DTRE Rules.	839	Para 7.18 of Audit Report 2021-22

Inadmissible concession/ exemptions in duties and taxes	Section 19 of the Customs Act 1969 and various statutory enactments	5,405	Para 8.4 of Audit Report 2022-23
Export-related exemptions/ concessions	Various SROs related to export-oriented schemes	2,077	Para 8.6 of Audit Report 2022-23
Inadmissible concession/ exemptions in duties and taxes	Section 19 of the Customs Act 1969 and various statutory enactments.	6,454	Para 7.2 of Audit Report 2023-24.
Non-adherence to DTRE Rules	Export-related DTRE Rules.	160	Para 7.17, 7.20 & 7.23 of Audit Report 2023-24.
		15,735	16 paras

FBR is one of the highly automated public sector organizations, therefore, such automation should help FBR to curb non-compliance with self-declared scheme. Non-monitoring of these exemptions/concessions as reported by the Audit are evidence of the slackness of FBR in this regard.

11. Recommendations

- The tax expenditure in respect of IPPs be monitored under the relevant law. Moreover, tax expenditure policy in respect of IPPs be reviewed and interlinked with the power policy.
- Reduction in tax liability of cigarette distributors be reviewed.
- There is a need to rationalize exemptions granted to non-profit organizations working in Pakistan. Many of these organizations are carrying out commercial activities which are required to be audited in coordination with other regulatory bodies. FBR may design a policy in the medium to long term for bringing their commercial activities into the tax net.
- Tax exemption and reduction in sales tax allowed to fertilizer industry be reviewed as the benefit of affordable prices is not trickling down to the farmers.
- The impact of revenue foregone and distortion of the market due to exemption extended every year to erstwhile tribal areas be reviewed.
- A mechanism to ensure the monitoring of tax expenditure on IPPs be evolved. Such a mechanism may include a certificate on 100% production capacity utilization by the concerned IPP and subsequent audit by the FBR.

12. Conclusion

Tax expenditure planning and reporting lacks defined objectives and outcomes. Consecutive budget deficits and ever-increasing demands for development expenditure require a review of tax expenditure policies. Therefore, the management needs to devise effective coordination mechanisms with the concerned ministries in order to report outcomes for informed decision making. Monitoring of exemptions to sectors like IPPs, fertilizer, real estate, and NPOs should be ensured for compliance with legal requirements. The benefits envisioned in the tax expenditure have not been quantified against any outcome, therefore, the same cannot be ascertained to arrive at a conclusive assessment. Moreover, the internal controls of FBR to monitor tax expenditure are weak and need further improvement. Repeated misuse of these benefits as pointed out by the Audit reflects inefficacy of existing mechanisms and a lack of interest of FBR in addressing the same.

13. References

Tax expenditure reports 2019, 2020, 2021, 2022

CHAPTER-12 OTHER SIGNIFICANT ISSUES

Para 20 of General Financial Rules, Vol-I requires that any loss of public money, departmental revenue receipts, stores, etc., held by or on behalf of government, whether caused by defalcation or otherwise, must be reported to Audit immediately even if such loss has been made good by the party responsible for it. During the year under report, some important/major cases of losses/ defalcation of public revenue of Rs 323,839 million came to the notice of Audit through formal and informal information. None of these cases was, however, reported to Audit by the concerned authorities as required under the Rules.

12.1 Non realization of sales tax – Rs 312 Billion

According to internal audit report M/s KH & Sons having NTN # 7637554 and STRN # 3277876300770, registered with RTO–I Karachi, committed a huge tax fraud of Rs 314 Billion. The matter was also reported by print & electronic media. The Audit requisitioned the auditable record of the above taxpayer but the Commissioner concerned did not provide requisite auditable record pertaining to sales tax and income tax for the FYs 2021-22 & 2022- 23 to the Audit, despite repeated requisitions.

The matter was taken up with the department during August to November 2023. The department replied that FIR was lodged against the taxpayer for tax fraud of Rs 312 Billion instead of Rs 314 Billion and case was subjudice and all record in respect of taxpayer was under the custody of the court.

The DAC, in its meeting held in December 2023 directed the department to pursue the case expeditiously.

The Audit recommends that prompt action should be taken against the taxpayer, intimate the outcome of criminal proceedings already initiated, and fixing of responsibility for inordinate delay/lapse against the person(s) at fault besides recovery of due tax.

[PDP No.7227-ST/K]

12.2 Inadmissible sales tax refund on benami transactions – Rs 12 Billion

The Chief Commissioner, Large Taxpayers Office, Lahore was asked in November, 2023 to furnish a detailed report regarding M/s Millat Tractors Limited. The registered person allegedly committed tax fraud through benami transactions amounting to Rs 12.00 Billion as reported in the daily “Business Recorder” dated 17.11.2023. In response the department reported that “post refund scrutiny had been initiated but proceedings had been stayed by the Honourable Lahore High Court till 10.11.2023. On the said date, the Lahore High Court referred the matter back to the department to decide the legal issues raised by the registered person before proceeding further in the matter. The

proceedings have been reinitiated in the light of the orders of the Honourable Lahore High Court and shall be concluded as directed by the Honourable Court”.

Audit requested the LTO Lahore to provide the details of the case and outcome of the post refund scrutiny of the tax periods which have been completed so far. But, no reply was furnished by the department till finalization of this report.

The Audit recommends that outcome of the departmental audit proceedings as directed by the Honourable Lahore High Court and findings/recommendations of the Federal Tax Ombudsman, Islamabad in complaint No.3367/ISB/ST/2022 dated 21.11.2022 be finalized at the earliest and remedial action be taken as per law.

12.3 Mis-declaration and over invoicing of imported solar panels resulted in trade base money laundering – Rs 74 Billion

It was observed during the audit of the FY 2022-23 that a major scam of over-invoicing and Trade Base Money Laundering (TBML) in imports of solar panels was unearthed by the PCA and also reported in newspapers “The Tribune, Business Recorder and daily Jang (Urdu)” dated 06-09-2023. As per audit reports of Directorate of Post Clearance Audit (PCA) (South), the implicated persons imported solar panels at inflated rates of USD 0.23 per watt and above during 2019 to 2022. However, the Directorate calculated that the import values of Chinese origin solar panels should have ranged below 0.22 USD per watt. The importers transferred a staggering amount of Rs 73.83 Billion out of Pakistan. Total over-invoiced amount in 2,178 import GDs stood at Rs 37.76 Billion. Moreover, the clearance Collectorates did not assess value of goods under Section 25 of the Customs Act. The goods were imported from China whereas third-party remittances were made to Dubai/Hong Kong but the Collectorates did not take up the matter with the concerned banking authorities. ‘Used’ solar panels were purchased in China and imported as ‘new’ and import certificates were managed to prove the same. This issue was not probed by the clearing Collectorate. The Directorate neither framed contraventions against the importers nor assessed the importers under Section 111 of Income Tax Ordinance, 2001 and Section 11(2) of the Sales Tax Act, 1990. Further, the Directorate did not provide record/data of “Solar Panels” for the period from July 2018 to June 2023 to the Audit.

The matter was taken up with the department in November 2023. The management did not submit a reply.

The DAC, in its meeting held in January 2024, expressed serious concern on non-submission of reply and directed the department to submit comprehensive reply to the Audit and FBR. No further progress was reported till the finalization of this report.

Audit recommends that the matter may be referred to FIA (Anti-Money Laundering) to probe the matter and intimate its outcome to the Audit.

[Annexure-93]

AUDIT REPORT
ON
THE ACCOUNTS OF
PETROLEUM DIVISION
AND
OIL AND GAS REGULATORY
AUTHORITY
AUDIT YEAR 2023-24

DIRECTORATE GENERAL AUDIT (PETROLEUM AND NATURAL RESOURCES)

Chapter-1

Public Financial Management

1.1 Issues related to M/o Energy (Petroleum Division)

From Financial Attest Audit of Ministry of Energy (Petroleum Division) and GSP for FY 2022-23 following significant issues are as under:

1.1.1 Shortfall in collection against Revised Budget Estimates - Rs 7,146.000 million

According to Para 7(1)(k) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, “Principal Accounting Officer shall be responsible, for budget executions as per plans, policy priorities of the Government, rules and performance agreement. This includes the realization of economic forecasts and projections as well as achievement of goals and targets committed with reference to objective based budgeting.”

During financial attest audit of receipts of DGs (PC and Gas) for the FY 2022-23, it was observed that there was a shortfall between budget estimates and actual collection as detailed below:

(Rs in million)

Head of Account	Description	Revised Budget estimates 2022-23	Actual collection As per AGPR data	Variation between revised target & Actual collection	%age shortfall
C03905	Royalty on Crude Oil	54,000	50,182	3,818	07%
C03902	GDS	14,000	10,672	3,328	24%
Total		68,000	60,854	7,146	

Audit was of the view that due to weak monitoring mechanism, Petroleum Division failed to achieve revenue targets.

The matter was reported to the management in September, 2023. The management in its reply dated October 13, 2023 stated that due to prevailing cash flow, receivable issues and circular debt, E&P companies were unable to clear Government obligation in a timely manner.

The DAC in its meeting held on October 17, 2023 directed the DG (PC) to improve the internal control system on receipts and make efforts to recover the outstanding amount from E&P companies. DAC directed the DG (Gas) to justify the shortfall in revenue collection especially with reference to the original targets.

Audit recommends to improve the internal controls for collection of receipts and to justify the shortfall in collection of Government receipts, as these were contractual obligations and could not be linked with circular debt.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2019-20 and 2018-19 vide para numbers 1.1.1, 1.2.3 and 1.1.3 having financial impact of Rs 26,473 million, Rs 6,225 million and Rs 66.269 million respectively. Recurrence of same irregularity is a matter of serious concern.

[ML No. 3]

1.1.2 Misclassification of receipts - Rs 3,440.899 million

According to Chart of Accounts issued by CGA, receipts on account of Royalty on Crude Oil are classified under C03905 and receipts on account of Royalty on Natural Gas are classified under C03906. Further, receipts under head Pakistan Telecommunication Authority are classified under C01008. C03808 is meant for receipts under the Mines and Oil fields and Mineral Development Act.

During financial attest audit of receipts of DG (PC) for the FY 2022-23, it was observed that receipts under three heads of accounts were misclassified. This resulted in misclassification of Rs 3,440.899 million as detailed below:

(Rs in million)

Sr. No.	Name of formation	Description of Receipts	Correct head of Accounts	Booked by FTO in incorrect head of Accounts	Amount
1.	DG (PC)	PTA	C01008	C03808	3,429.278
2.	DG (PC)	Royalty on Gas	C03906	C03905	9.816

3.	DG (PC)	Royalty on Crude Oil	C03905	C03808	1.805
Total					3,440.899

Audit was of the view that weak internal controls resulted in misclassification of receipts of Rs 3,440.899 million which impaired the financial statements and submission of incorrect figures of receipts to Finance Division.

The matter was reported to the management in September, 2023. The management in its reply dated October 13, 2023 stated that correction slips in respect of misclassified amount of Rs 3,429.278 million and Rs 1.805 million were issued to AGPR. FTO, Karachi had been requested to book the misclassified amount of Rs 9.816 million in the correct head of account C03906. However, FTO posted the amount in C03905 instead of C03906.

The DAC in its meeting held on October 17, 2023 directed the DG (PC) to pursue the matter with AGPR and share the output with Audit within 15 days. No further progress was reported till finalization of the report.

Audit recommends to pursue the matter for corrective measures.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2021-22, 2020-21 and 2019-20 vide para numbers 1.1.2, 1.1.3, 1.2.3, 1.2.4 and 1.1.4 having financial impact of Rs 2,186.648 million, Rs 753.768 million, Rs 3,962.621 million and Rs 5.908 million respectively. Recurrence of same irregularity is a matter of serious concern.

[ML No. 2]

1.1.3 Non-surrender of savings - Rs 11.190 million

According to Para 14(d) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, “all Ministries, Divisions, attached departments, sub-ordinate offices and autonomous organizations shall surrender to the Finance Division by 31st day of May each year, all anticipated savings in the grants or Assignments Accounts or grant-in-aid controlled by them.”

During financial attest audit of GSP for the FY 2022-23, it was observed that savings of Rs 11.190 million under Grant Nos. 35-Current and 124-Development were not surrendered as detailed below:

(Rs in million)

Grant No.	Type of grant	Final grant	Actual expenditure (Progressive)	Savings
035	Current	1,114.379	1,104.264	10.115
124	Development	124.630	123.555	1.075
Total		1,239.009	1,227.819	11.190

Audit was of the view that non-surrendering of savings not only resulted in non-utilization of the amounts where needed but was also violation of Financial Management and Powers of PAO Regulations, 2021.

The matter was reported to the management in September, 2023. The management in its reply dated October 13, 2023, stated that the savings pertained to 08 spending DDOs of GSP was 0.9% of the final grant which was nominal and negligible amount. Audit contended that as per procedure of Assan Assignment Account, the unspent budget at the close of financial year should had been surrendered by respective offices as per standing instructions but the department failed to comply with the procedure of Financial Management and Powers of PAO Regulations.

The DAC in its meeting held on October 17, 2023 directed the management to furnish the revised reply with detailed justification. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC besides fixing responsibility for non-compliance with rules.

[MR GSP No. 1.7]

1.1.4 Violation of procedure of Assan Assignment Account

According to Para (iv) of general instructions of Assan Assignment Account Procedure (Local Currency), 2020, “the officers of BS-17 or above on payroll of user organization concerned shall be nominated by the PAO as signatories. A signatory on current / acting charge of BS-17 or equivalent may operate the account till he / she holds current charge of BS-17 and shall no more operate the account on the completion of period of current charge.”

During financial attest audit of GSP for the FY 2022-23, it was observed that four Senior Auditors (BS-16) who were allowed to work as AAO in their own pay scale i.e. BS-16 were performing the function of signatories. Whereas the officer holding regular or

current charge in BS-17 was required to be nominated as signatory. This resulted in violation of procedure of Assan Assignment Account.

Audit was of the view that due to weak internal controls, Senior Auditors in BS-16 were working as signatories in violation of procedures of AAA.

The matter was reported to the management in September, 2023. The management in its reply dated October 13, 2023, stated that there was an acute shortage of AOs / AAOs. The requisition had been sent to CGA office on May 04, 2023 for posting of AOs / AAOs in CAO (sub-offices) Karachi, Lahore, Islamabad and Peshawar. However, response from CGA office was awaited.

The DAC in its meeting held on October 17, 2023 directed the management to submit detailed justification for nomination of BPS-16 officers as signatory of Assignment Account in violation of instruction of Finance Division and stop this practice forthwith. No further progress was reported till finalization of the report.

Audit recommends to ensure compliance of procedure of AAA.

[MR GSP No. 1.6]

Chapter-2

Ministry of Energy

2.1 Petroleum Division

2.1.1(A) Introduction

The Ministry of Energy was created in August, 2017 after merging of Ministry of Petroleum and Natural Resources with the Power Division of the Ministry of Water and Power. The Ministry has two Divisions - Petroleum and Power, each being administered by a Federal Secretary. The Petroleum Division is responsible for coordinating the development of natural resources of energy and minerals in Pakistan. It aims to ensure, secure and make available sustainable energy supply for economic development as well as facilitate and promote exploration and production of oil, gas and mineral resources in the country.

The Petroleum Division also collects a number of receipts of Government of Pakistan through DG (PC), DG (Oil), DG (Gas) and DG (LGs). The DG (PC) deals with receipts of Royalty on Crude Oil and Natural Gas, Rent of lease / license areas, Marine Research Fee and Production Bonus etc. The DG (Oil) deals with Petroleum Levy, Discount retained on local Crude Oil price and Windfall Levy on Crude Oil. The DG (Gas) deals with Gas Development Surcharge and Gas Infrastructure Development Cess. The DG (LGs) deals with the matters relating to liquefied gases and administered collection of Petroleum Levy on Liquefied Petroleum Gas (LPG), whereas DG (Special Projects) coordinates between different directorates of Petroleum Division for implementation of the decisions of Cabinet and its committees.

Geological Survey of Pakistan (GSP) and Department of Explosive (DoE) are the attached departments of the Ministry of Energy (Petroleum Division). GSP is primarily responsible for collection and dissemination of geological information about the country so that the earth's resources could be best exploited and utilized. Department of Explosives implements the enactments and policies of the Government. It is technical-cum-administrative department and its main objective is to enhance the public safety within the licensed premises. The Hydrocarbon Development Institute of Pakistan (HDIP) is an autonomous Research & Development organization under Ministry of Energy (Petroleum Division).

Audit profile of Ministry of Energy (Petroleum Division) is under:

(Rs in million)

Sr. No.	Name of Entity	Auditable Entities	Audited	Expenditure involved FY 2022-23	Revenue involved FY 2022-23
1	MoE (PD) / Bodies / Department				
(i)	Ministry of Energy (PD)	1	1	486.333	781,187.862
(ii)	GSP	1	1	1,227.819	-
(iii)	Department of Explosives	1	1	108.492	512.000
	Sub-total	3	3	1,822.644	781,699.862
(i)	HDIP (expenditure & receipts)	1	-	113.000	-
	Profile of MoE (PD)/Bodies/Dep.	4	3	1,935.644	781,699.862
2	Profile of PSEs under the PAO	16	9	6,545,000.275	7,306,195.380

(Detail is at Annexure-2)

(B) Comments on Budget and Accounts

A comparison of revised estimates and actual non-tax receipts of the Ministry for the FY 2022-23 is tabulated as follows:

(Rs in million)

Nature of Receipt	Original Target* 2022-23	Revised Target* 2022-23	Collection** 2022-23	Difference from Revised Target	
				Absolute	Percentage
1	2	3	4	5 (4-3)	6
Petroleum Levy (C0-3901)	855,000	542,000	579,910	37,910	6.54

Gas Development Surcharge (C0-3902)	40,000	14,000	10,672	(3,328)	(31.18)
Royalty on Oil (C0-3905)	46,000	54,000	50,182	(3,818)	(7.61)
Royalty on Gas (C0-3906)	70,000	65,000	70,131	5,131	7.32
Discount Retained on Local Crude Oil (C0-3910)	20,000	20,000	23,081	3,081	13.35
Windfall Levy (C0-3915)	10,000	30,000	27,731	(2,269)	(8.18)
Gas Infrastructure Development Cess (C0-3916)	30,000	10,000	10,940	940	8.59
Petroleum Levy on LPG (C0-3917)	8000	3450	3419	(31)	(0.91)
Others	2,804	1,674	5,120	3,446	67.30
Total	1,081,804	740,124	781,188	41,062	

**Explanatory Memorandum of Federal Receipts 2023-2024*

*** Collection according to AGPR Data*

The Ministry collected Rs 781,188 million against revised estimates of Rs 740,124 million for the FY 2022-23. It showed overall excess collection of Rs 41,062 million (5.55% as compared with the revised estimates of receipts).

A comparison of actual receipts between the FYs 2021-22 and 2022-23 is tabulated as follows:

(Rs in million)

Nature of Receipt	Collection		Difference	
	FY: 2022-23	FY: 2021-22	Absolute	%age
1	2	3	4 (2-3)	5
Petroleum Levy (C0-3901)	579,910	127,530	452,380	355
Gas Development Surcharge (C0-3902)	10,672	20,372	(9,700)	(48)
Royalty on Oil (C0-3905)	50,182	43,486	6,696	15
Royalty on Gas (C0-3906)	70,131	50,924	19,207	38
Discount Retained on Local Crude Oil (C0-3910)	23,081	16,504	6,577	40
Windfall Levy (C0-3915)	27,731	14,397	13,334	93
Gas Infrastructure Development Cess (C0-3916)	10,940	18,618	(7,678)	(41)
Petroleum Levy on LPG (C0-3917)	3,419	3,659	(240)	(7)
Others (C0-3506, 3808 and 3870)	5,120	1,385	3,735	270
Total	781,188	296,878	484,310	163

(Source: Financial Statements of the Federal Government for the FY 2022-23 and AGPR Data)

The above table reveals significant improvement in collection of Petroleum Levy of Rs 579,910 million in 2022-23 as compared to Rs 127,530 million in FY 2021-22. However, there was declining trend in collection of Gas Development Surcharge, Gas Infrastructure Development Cess and Petroleum Levy on LPG.

2.1.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 851,536.951 million pertaining to Ministry of Energy (Petroleum Division) are reported during the current audit. This also includes recoverable amount of Rs 102,605.560 million. Summary of the audit observations classified by nature is as follows:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	
A	Assessment and Realization of GIDC and GDS	407,519.559
B	Assessment and Realization of Royalties on Crude Oil and Gas	27,966.282
C	Assessment and Realization of Petroleum Levy and Windfall Levy	14,945.290
D	Training Fund, Social Welfare Obligation, Production Bonus and License & Lease rent	6,018.920
E	Exploration & Development Related Issues	358,755.577
2	Others	36,331.323

2.1.3 Compliance of PAC Directives

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	%age of Compliance

2000-01	6	0	6	0
2001-02	1	0	1	0
2002-03	1	0	1	0
2003-04	1	1	0	100
2004-05	3	0	3	0
2005-06	2	1	1	50
2007-08	4	0	4	0
2008-09	16	10	6	63
2009-10	11	0	11	0
2010-11	27	20	7	74
2011-12	28	12	16	43
2012-13	22	10	12	45
2013-14	31	17	14	55
2014-15	25	9	16	36

2015-16	47	13	34	28
2016-17	49	1	48	2
2017-18	54	14	40	26
2018-19	10	2	8	20
2019-20	9	1	8	89
2020-21	1	0	1	0
2021-22	8	0	8	0
Total	356	112	244	31%

The table shows lacklustre compliance of PAC's directives. Therefore, serious follow up is required to ensure compliance of PAC's directives.

2.1.4 Audit Paras

Assessment and Realization of GIDC and GDS

2.1.4.1 *Slow progress of gas infrastructure development projects resulting in non-utilization of GIDC - Rs 350,703.057 million*

According to Section 4(1) of the Gas Infrastructure Development Cess Act, 2015, “the Cess shall be utilized by the Federal Government for or in connection with infrastructure development of Iran-Pakistan Pipeline Project (IP), Turkmenistan-Afghanistan-Pakistan-India (TAPI) Pipeline Project, LNG or other ancillary projects”.

During audit of DG (Gas) for the FY 2022-23, it was observed that DG (Gas) collected GIDC amounting to Rs 354,046.784 million up to June 30, 2023. However, Federal Government could only utilize Rs 3,343.727 million on operational cost of ISGSL and re-payment of its loan to GHPL. These funds were to be utilized on Turkmenistan-Afghanistan-Pakistan-India pipelines (TAPI), Iran-Pakistan pipeline (IP) and Pakistan Stream Gas Pipeline Project (PSGP). However, progress on these mega gas infrastructure development projects was very slow and no significant headway could be made resulting in non-utilization of GIDC funds of Rs 350,703.057 million.

Audit was of the view that Petroleum Division failed to utilize GIDC for the stated purpose, resulting in stoppage of further collection of GIDC.

The matter was reported to the management in September, 2023. The management in its reply dated December 14, 2023 stated that GIDC funds for gas infrastructure development projects were being requested based on the requirements. An amount of Rs 3,790.000 million had been utilized up to September 30, 2023. Petroleum Division demanded Rs 100 billion in 2017 for these projects which was denied by Finance Division. The expenditure on capital intensive project to be funded from GIDC could not be taken further unless geo-political land scape changed and the sanction regime was done away with.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to enhance efforts for early resolution of the matter and expedite utilization of GIDC funds and share outcome with Audit. No further progress was reported till finalization of the report.

Audit recommends Petroleum Division to come up with workable action plan to execute above mentioned projects to overcome prevalent energy crisis in the country.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2021-22 vide para number 2.1.4.1 having financial impact of Rs 322,308.775 million. Recurrence of same irregularity is a matter of serious concern.

2.1.4.2 Non-realization of GDS - Rs 33,915.000 million

According to Section 3 of the Natural Gas Development Surcharge Ordinance, 1967, “every company shall collect and pay to the Federal Government a development surcharge equal to differential margin, in respect of gas sold by it.” Further, according to Rule 3(a) of Natural Gas Development Surcharge (GDS) Rules, 1967 amended up to December 24, 2014, “GDS was payable by the company within one month of the receipts from the consumer.”

During audit of DG (Gas) for the FY 2022-23, it was observed that DG (Gas) did not realize GDS amounting to Rs 33,915.000 million from various companies in respect of gas sold to fertilizer companies. Further, no time limit had been prescribed for companies to pay the GDS collected from consumer. This had given leeway to companies to withheld GDS.

Audit was of the view that weak monitoring by DG (Gas) resulted in non-realization of GDS amounting to Rs 33,915.000 million in time.

The matter was reported to the management in September, 2023. The management in its reply dated December 14, 2023 stated that the amendments in the GDS Ordinance, 1967 were under process. After approval of amendments from the competent forum, the GDS Rules would be amended accordingly.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to expedite the amendment in the GDS Ordinance and recover the outstanding amount. No further progress was reported till finalization of the report.

Audit recommends expeditious recovery of outstanding amount on priority basis besides finalization of amendments in the GDS Ordinance to fix the legal gap.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 & 2018-19 vide para numbers 2.1.4.1, 2.1.4.2, 2.1.7.2, 2.1.7.3 & 2.1.5.1 having financial impact of Rs 24,519 million, Rs 42,959.380 million, Rs 25,026.442 million, Rs 20,582.840 million & Rs 30,088.610 million respectively. Recurrence of same irregularity is a matter of serious concern.

2.1.4.3 Inadmissible adjustment of GDS - Rs 14,745.904 million

According to Section 3(1) of the Natural Gas (Development Surcharge) Ordinance, 1967, “every company shall collect and pay to the Federal Government a development surcharge equal to the differential margin in respect of natural gas sold by it.”

During audit of DG (Gas) for the FY 2022-23, it was observed that DG (Gas) did not recover GDS of Rs 14,745.904 million from MPCL. The shortfall in payment of GDS occurred due to inadmissible adjustments of negative GDS by MPCL on feed stock against GDS payable on fuel stock. As per Natural Gas (Development Surcharge) Ordinance, 1967 and rules, there was no provision for adjustment of negative differential margin against the Gas Development Surcharge. This resulted in reduction of GDS payable to Government by Rs 14,745.904 million as detailed below:

Name of Customer	GDS on feed stock / inadmissible adjustment	GDS on fuel stock	GDS liability booked by MPCL
Engro Fertilizer Ltd.	(920.605)	2,450.644	1,530.038
Fauji Fertilizer-3	(9,184.319)	6,266.720	(2,917.599)
Fatima Fertilizer Ltd.	(3,932.878)	1,986.189	(1,946.689)
Pak- Arab Fertilizer	(708.102)	603.450	(104.652)
Central Power General Co.	-	1,361.234	1,361.234
Foundation Power Co. Ltd.	-	4,656.785	4,656.785
Total	(14,745.904)	17,325.022	2,579.117

Audit was of the view that weak monitoring by DG (Gas) resulted in inadmissible adjustment of GDS amounting to Rs 14,745.904 million.

The matter was reported to the management in September, 2023. The management in its reply dated December 14, 2023 stated that MPCL supplied gas to Fertilizer Sector in accordance with prices notified by OGRA on the advice of Federal Government. MPCL adjusted the negative differential margin in feed stock against fuel stock. Further, to address the issues of negative GDS, amendments in GDS Ordinance, 1967 were in process.

Audit contended that no tangible efforts to resolve the issue were visible despite repeatedly highlighting the issue in previous audit reports.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to expedite the finalization of amendments in GDS Ordinance. No further progress was reported till finalization of the report.

Audit recommends to recover the amount of outstanding amount of GDS from MPCL, ensure discontinuation of the adjustment of negative GDS besides expediting amendments in GDS Ordinance.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2020-21, 2019-20 & 2018-19 vide para numbers 2.1.4.3, 2.1.7.3, 2.1.7.2 and 2.1.5.2 having financial impact of Rs 1,125 million, Rs 3,884.600 million, Rs 34,168.003 million & Rs 2,253.644 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2509]

2.1.4.4 Short realization of GDS and GST - Rs 7,182.173 million

According to Section 3(1) of Natural Gas (Development Surcharge) Ordinance 1967, “every company shall collect and pay to the Central Government a development surcharge equal to the differential margin in respect of natural gas sold by it.” Further, DG (Gas) while considering the request of MPCL for additional gas allocation from existing reservoir of Habib Rahi Limestone to GENCO-II / Guddu and Engro Fertilizer Ltd. decided vide letter dated March 24, 2016, that gas sales price for the above allocated volumes will be as per Petroleum Policy, 2012 gas price or notified sales price for that category of consumers whichever is higher.

During audit of DG (Gas) for the FY 2022-23, it was observed that DG (Gas) could not ensure implementation of its policy letter dated March 24, 2016 whereby MPCL was obliged to deposit notified GDS as per applicable gas sales prices. This happened due to short payment on fuel stock at less rate by two fertilizer plants. This resulted in short realization of GDS of Rs 6,138.610 million. Further, GST on differential price amounting to Rs 1,043.563 million was also not recovered and paid to FBR by MPCL.

Audit was of the view that weak monitoring by DG (Gas), resulted in short payment of GDS and GST of Rs 7,182.173 million.

The matter was reported to the management in September, 2023. The management in its reply dated December 14, 2023 stated that MPCL was issuing gas sales invoices to Engro Fertilizer Ltd. (EFL) and Pak-Arab Fertilizer Ltd. (PFL) as per letter dated March 24, 2016. However, EFL and PFL were not in agreement with the above stated invoicing /

billing mechanism which resulted in differential margin (GDS) on fuel stock along with related GST amounts.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to ensure the early recovery. No further progress was reported till finalization of the report.

Audit recommends to recover outstanding GDS and GST from concerned companies.

[DP Nos. 2511 & 2574]

2.1.4.5 Non-realization of accrued LPS on GIDC - Rs 973.425 million

According to Section 3(3) of GIDC Act, 2015, “a mark-up at the rate of four percent above three months KIBOR prescribed by the Federal Government shall be payable by gas consumer or the company on any amount due, if the said amount is not paid by the said gas consumer or by the said company.” The Supreme Court of Pakistan in the case of Civil Appeal No 1113/2017 decided that all arrears of Cess that had become due up to July 31, 2020 and had not been recovered so far shall be recovered by the companies responsible under the GIDC Act, 2015 to recover from their consumers. However, as a concession, the same be recovered in twenty-four equal monthly instalments starting from August 01, 2020 without the component of late payment Surcharge. The late payment surcharge shall only become payable for the delays that may occur in the payments of any of the twenty-four instalments.

During audit of DG (Gas) for the FY 2022-23, it was observed that three companies M/s SNGPL, SSGC and PPL did not completely deposit the outstanding GIDC within allowable limit of two years as per Supreme court decision. They were liable to pay LPS on all payment of GIDC up to June, 2023. However, payment of Rs 7,875.041 million was paid by these companies which should had been made with LPS since it was done after allowable limit. Therefore, accrued LPS amounting to Rs 973.425 million was outstanding on part of the companies.

Audit was of the view that weak monitoring by DG (Gas) and violation of judgment of Supreme Court of Pakistan resulted in non-realization of LPS of Rs 973.425 million.

The matter was reported the management in September, 2023. The management in its reply dated December 14, 2023 stated that in pursuance to the judgment of Supreme Court of Pakistan dated November 02, 2020, the Law & Justice Division (Additional Attorney General) clarified the recovery of GIDC arrears in 48 instalments. The management further stated that appeal against the case had been filed before Supreme Court of Pakistan. The reply was not tenable as the Court in review petition judgment had already rejected the

prayer regarding increase of number of instalments from 24 to 48. Hence, the clarification of Additional Attorney General was not in line with the judgment of Supreme Court of Pakistan.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to pursue the case vigorously. No further progress was reported till finalization of the report.

Audit recommends to recover the LPS amounting Rs 973.425 million besides pursuing court case vigorously.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide para number 2.1.4.4 having financial impact of Rs 408.330 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2512]

Assessment and Realization of Royalties on Crude Oil and Gas

2.1.4.6 Non-realization of Royalty on Natural Gas / Crude Oil - Rs 27,966.282 million

According to the Rules 36, 35 and 38 of the Pakistan Exploration and Production Rules, 1986, 2001 and 2009 respectively, “the licensee or holder of a lease shall pay a Royalty at the rate of 12.5% of the well head value of the Petroleum produced and saved. Royalty is payable monthly within 10 days of the expiry of the calendar month in question under E&P Rules, 1986 and within 45 days under E&P Rules, 2001 & 2009. Further, if delayed beyond this stipulated period, would attract fine at the rate of the London Inter-Bank Offer Rate (LIBOR) plus two per cent as may be determined by the Authority.”

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) did not realize Royalty on Natural Gas and Crude Oil from nine E&P companies on accounts of 68 blocks / fields on sale of natural gas and crude oil. This resulted in non-realization of Royalty and fine amounting to Rs 33,649.565 million.

Audit was of the view that weak monitoring and non-compliance of rules resulted in non-realization of Royalty.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that an amount of Rs 5,524.415 million had been recovered from OGDCL and an amount of Rs 158.868 million was not due, the same had been verified by Audit. Recovery of remaining amount of Rs 27,966.282 million would be pursued.

The DAC in its meeting dated December 19, 2023 directed the DG (PC) to expedite the recovery of balance amount and provide the updated details of LPS on outstanding amount. Para reduced to the extent of recovered / not due and verified amount of Rs 5,683.283 million. No further progress was reported till finalization of the report.

Audit recommends to recover the Royalty along with fine besides improving monitoring mechanism on receipts.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 and 2018-19 vide para numbers 2.1.4.7, 2.1.4.7, 2.1.7.6, 2.1.7.11 and 2.1.5.17 having financial impact of Rs 17,348.223 million, Rs 10,720.230 million, Rs 9,657.272 million, Rs 344.944 million and Rs 186.690 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2516]

Assessment and Realization of Petroleum Levy

2.1.4.7 Non-payment of Petroleum Levy and LPS on sale of POL products - Rs 14,631.741 million

According to Section 3 of Petroleum Products (Petroleum Levy) Ordinance, 1961 amended up to June, 2023, “every company, refinery and licensee shall pay to the Federal Government a Petroleum Levy on petroleum products at such rates as may be notified by the Federal Government in the official Gazette, from time to time.” Further, as per Section 40B (1) & 40D (1) of Public Finance Management Act, 2019, non-tax revenue shall be levied and charged in accordance with the provisions of relevant laws and such other applicable instruments and in case if Petroleum Levy is not paid within the time period, an amount equal to monthly weighted financing cost of Government’s domestic borrowings shall be payable during the period of default.

During audit of DG (Oil) for the FY 2022-23, it was observed that M/s Cnergyico PK Ltd. and M/s Hascol did not deposit Petroleum Levy of Rs 14,520.051 million and Rs 289.797 million respectively, on account of sale of POL products. Further, Petroleum Levy amounting to Rs 1,845.176 million was late deposited by M/s Cnergyico PK Ltd. without LPS of Rs 14.676 million. This resulted in non-payment of Petroleum Levy and LPS amounting to Rs 14,824.524 million.

Audit was of the view that weak financial controls resulted in non-realization of Petroleum Levy and LPS on sale of POL products.

The matter was reported to the management in August, 2023. The management in its reply dated December 14, 2023 stated that an amount of Rs 192.783 million had been recovered and verified by Audit. Further, the management stated that M/s Hascol had erroneously deposited Petroleum Levy of Rs 289.797 million under head of Federal Excise Duty and company had requested FBR for correction of head of account.

The DAC in its meeting held on December 20, 2023 directed the DG (Oil) to pursue the recovery of remaining amount and LPS. DAC further reduced the para to the extent of recovered and verified amount of Rs 192.783 million. No further progress was reported till finalization of the report.

Audit recommends to pursue the recovery of outstanding amount.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide para numbers 2.1.4.5 and 2.1.4.6 having financial impact of Rs 4,002.501 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2609, 2610, 2611 & ML No. 02]

2.1.4.8 *Non-deposit of Petroleum Levy on LPG collected from end consumers - Rs 191.479 million*

According to Rule 9 (1&3) of Petroleum Product (Development Surcharge), Rules 1967, “every licensee shall deposit Petroleum Levy payable by it in respect of sale of LPG produced in Pakistan from its production facilities during the calendar month within seven days of the close of that month. A mark up at the rate of four per cent above the three months KIBOR shall be payable on any amount due under sub-rule (1), if the said amount is not paid within seven days of the close of that month.”

During audit of DG (LGs) for the FY 2022-23, it was observed that M/s POL and OGDCL did not deposit Petroleum Levy collected on sale of LPG. The companies sold a quantity of 4,604.13 M. Tons and collected the petroleum levy of Rs 191.479 million from LPG distributing and marketing companies but did not deposit the collected amount in Government treasury. Further, a markup would also be recoverable after recovery of principal amount.

This resulted in non-deposit of Petroleum Levy on LPG amounting to Rs 191.479 million and markup on it.

Audit was of the view that weak monitoring by DG (LGs) resulted in non-deposit of Petroleum Levy on LPG collected from end consumers.

The matter was reported to the management in September, 2023. The management in its reply dated December 13, 2023 stated that DG (LGs) agreed with the Audit. POL and OGDCL were advised to pay off the amount of Petroleum Levy / mark up pointed out by Audit.

The DAC in its meeting dated December 20, 2023, directed the management to step up efforts for deposit of Petroleum Levy within three months. No further progress was reported till finalization of the report.

Audit recommends to recover the amount of Petroleum Levy along with markup vigorously.

[DP Nos. 2546, 2549, 2550, 2553 & 2554]

2.1.4.9 Short payment of Government dues on sale of LPG by suppression of production quantity - Rs 122.070 million

According to Rule 9 (1&3) of Petroleum Product (Development Surcharge), Rules 1967, “every licensee shall deposit Petroleum Levy payable by it in respect of sale of LPG produced in Pakistan from its production facilities during the calendar month within seven days of the close of that month. A mark up at the rate of four per cent above the three months KIBOR shall be payable on any amount due under sub-rule (1), if the said amount is not paid within seven days of the close of that month.”

During audit of DG (LGs) for the FY 2022-23, it was observed that LPG producing companies did not pay Petroleum Levy on 2,584 M. Tons of LPG by short reporting of LPG produced. The companies reported a quantity of 309,673 M. Tons to MoE-PD instead of actual production of 312,257 M. Tons as communicated to OGRA by these companies. This resulted in short payment of Government dues including Petroleum Levy amounting to Rs 122.070 million.

Audit was of the view that due to absence of monitoring mechanism, less sale / production was reported which resulted in short payment of Government dues of Rs 122.070 million.

The matter was reported to management in September, 2023. The management in its reply dated December 13, 2023 stated that variation in production data occurred due to wrong calculation of M/s UEPL’s figure for January, 2023. Remaining difference between DG (PC) and OGRA was 180 M. Tons. Audit contended that DG(LGs) was required to reconcile the production and recover Government dues accordingly.

The DAC in its meeting dated December 20, 2023, directed the management to get the stated stance verified from Audit and to present the data in tabulated form to Audit for verification. DAC further directed the management to take up the matter with concerned company / DG (PC) / FBR for reconciliation of production & sale and calculation of Government dues (Petroleum Levy, Royalty and Sales Tax) and directed the relevant company to deposit the short fall with a copy to FBR and DG (PC). No further progress was reported till finalization of the report.

Audit recommends to recover the amount pointed out besides DG (PC) may devise a monitoring mechanism to ensure accuracy of production data provided by E&P companies.

[DP No. 2551]

Training Fund, Social Welfare Obligation and License & Lease Rent

2.1.4.10 Non-utilization of Training Fund – Rs 3,019.364 million

According to Para 2 of Guidelines for Management and Utilization of Training Fund 2020, “any unspent training amount generated under PCAs and maintained by DG (PC) shall be utilized for capacity building, strengthening of the Policy Wing of Ministry of Energy (Petroleum Division), Provincial Governments, relevant Government agencies, remunerations of outside professionals engaged on contract, part time legal advisors / technical consultants, and Policy promotional activities, workshops, seminars, conferences & symposia etc.” Further, as per Annexure-I of the Guidelines *ibid*, long term, medium term and short-term training programme both for technical and management fields should be devised.”

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) had a balance of Rs 2,051.442 million in training fund account at the start of FY 2022-23 which swelled to Rs 3,019.364 million. During the year an amount of Rs 37.189 million could only be utilized for the payment of salaries of consultants, visits abroad to attend conferences but no expenditure was incurred on core activity of training for capacity building and strengthening of the Policy Wing of Ministry of Energy (Petroleum Division). This has resulted in non-utilization total amount of Rs 3,019.364 million for intended purposes of training.

Audit was of the view that non-implementation of Policy Guidelines resulted in non-utilization of Training fund amounting to Rs 3,019.364 million at the close of FY 2022-23.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that Revised Training Fund Guidelines were

drafted in early 2023, which included all the provisions pointed out by Audit. The reply was not tenable as the applicable Guidelines were not implemented.

The DAC in its meeting held on December 19, 2023, directed the management to ensure utilization of funds for training purpose as per 2020 Guidelines. DAC further directed to submit a detailed report regarding utilization of funds to Audit. No further progress was reported till finalization of the report.

Audit recommends to devise a comprehensive plan for utilization of Training Fund for intended purposes.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2020-21 & 2019-20 vide para numbers 2.1.4.17, 2.1.7.11 & 2.1.7.23 having financial impact of Rs 2,051.442 million, Rs 600.226 million & Rs 385.977 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2518]

2.1.4.11 Non-realization of Production Bonus – Rs 2,142.822 million

According to Section 4.1.2 of Petroleum Policy, 2012, “Production Bonus of US\$ 7 million will be payable on a concession area on achievement of cumulative production of 100 MMBOE.” Further, according to Article XXIII of Shakardra PCA (Chanda field), “Production Bonus of US\$ 105,000 will be payable on a concession area on achievement of cumulative production of 30 MMBOE.” Furthermore, Article XXIII of Khipro PCA states that “production bonus of US\$ 5 million will be payable on a concession area on achievement of cumulative production of 100 MMBOE.”

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) did not recover Production Bonus amounting to Rs 2,142.822 million from three E&P companies (UEPL, PPL and OGDCL). These companies had achieved specified limit of cumulative production but did not pay Production Bonus. This resulted in non-realization of Production Bonus of Rs 2,142.822 million as detailed below:

Sr. No.	Name of company	Name of Block	Amount in US\$	Outstanding Production Bonus (Rs in million)
1	UEPL	Khipro	7,000,000	2086.000

2	OGDCL	Shakardra	105,000	31.290
3	PPL	Gambat South	50,535	14.149
4	PPL	Kandhkot	38,400	11.443
Total				2,142.882

Audit was of the view that weak monitoring oversight resulted in non-realization of Production Bonus.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that UEPL was facing severe financial distress due to its receivable issues and informed that it would pay Production Bonus upon receiving of its outstanding invoices. PPL was facing account opening issue with concerned Deputy Commissioner and OGDCL agreed to pay amount of Production Bonus.

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to ensure the recovery of Production Bonus from the companies. DAC further directed to ensure account opening in case of PPL and deposit the amount in case of OGDCL within one month. No further progress was reported till finalization of the report.

Audit recommends to expedite the recovery from the concerned companies. It is also recommended that the matter of bank account may be taken up at the higher level in order to start collection of the outstanding dues from E&P companies and ensure opening of DC / DCO bank account to transfer the funds besides strengthening of internal controls for collection of receipts.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21 & 2018-19 vide para numbers 2.1.4.20, 2.3.4.6, 2.1.7.9 & 2.1.5.15 having financial impact of Rs 286.451 million, Rs 1,985.000 million, Rs 2,124.731 million & Rs 1,291.470 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2517 & 2797]

2.1.4.12 Non / short-realization of Training Fund - Rs 426.370 million

According to Para 4 (i, ii & iii) of the Guidelines for Management and Utilization of Training Fund 2020, 30% of the annual obligation shall be deposited in DG (PC) Training Fund Bank Account, 30% of annual obligation shall be deposited in Provincial Government Account and 40% shall be earmarked by the operator for training of their Pakistani national employees. In case the operator fails to utilize the training fund as per the approved program,

a case for carry forward of such unutilized amount shall be submitted to DG (PC) who may consider the relevant factors and decide on a case to case basis. In case such carry forward is not approved, the unutilized amount shall be deposited in DG (PC) Training Account within seven (7) working days of such decision.

During audit of DG (PC) for the FY 2022-23, it was observed that 06 E&P companies did not pay Training Fund of Rs 192.401 million during the year 2022-23 on account of DG (PC)'s share and Provincial Government's share in respect of 34 Blocks. Further, it was also observed that three E&P companies neither spent Training Fund of four blocks of Rs 272.362 million nor submitted the amount to DG (PC) in pursuance of guidelines. This resulted in non / short-realization of Training Fund of Rs 464.763 million.

Audit was of view that weak regulatory oversight resulted in non / short-realization of Training Fund and non-deposit of unspent balance in DG (PC) Account.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that an amount of Rs 34.160 million had been recovered and verified by Audit and an amount of Rs 4.233 million was not due and an amount of Rs. 154.008 was under recovery. The management further stated that matter in order to identify the outstanding liabilities of Rs 272.362 million would be probed, then the companies would be directed to deposit the unutilized amount in DG (PC) Account. Audit contended that management was required to finalize the realization of Training Fund of Rs 426.370 million.

The DAC in its meeting held on December 19, 2023 directed the management to expedite the recovery of balance amount and to devise a mechanism for timely deposit of Training Funds. Para reduced to the extent of recovered / not due and verified amount of Rs 38.393 million. DAC also directed the management to pursue the matter with E&P companies and complete the action regarding deposit of un-spent amount in DG (PC) Account within 15 days. No further progress was reported till finalization of the report.

Audit recommends to expedite the recovery of balance amount and device a mechanism for timely deposit of Training Fund / un-spent balance in DG (PC) Account.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, vide para number 2.1.4.21 having financial impact of Rs 201.734 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2521, 2537 & 2541]

2.1.4.13 Short realization of Social Welfare Obligation - Rs 376.423 million

According to Annexure VII of the Pakistan Petroleum (Exploration and Production) Policy, 1994 and other policies introduced from time to time read with Clause 4 of Social Welfare Guidelines, 2021, “E&P companies will open a joint bank account with DCOs / DCs concerned and will deposit the Social Welfare contribution Fund within one month of signing of PCA and subsequently by 31st January each year. The amount of Social Welfare Funds pledged by the companies in their respective agreement and deposited in the joint account opened for the purpose are required to be utilized to give lasting benefits to the communities, where exploration is being carried out.”

During audit of DG (PC) for the FY 2022-23, it was observed that 10 E&P companies in 61 cases did not either deposit or short deposit Social Welfare Obligation in the joint accounts of the concerned DCOs / DCs. This resulted in short realization of Social Welfare Obligation of US\$ 1,472,667 equivalent to Rs 437.750 million.

Audit was of view that non-observance of policy guidelines resulted in non/short-realization of Social Welfare Obligation of Rs 437.750 million.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that an amount of Rs 24.951 million had been recovered, an amount of Rs 36.376 million was not due and efforts were being made for recovery of remaining amount of US\$ 1.094 million (Rs 376.423 million).

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to expedite the recovery of balance amount. DAC reduced the para to the extent of recovered / not due and verified amount of Rs 61.327 million. No further progress was reported till finalization of the report.

Audit recommends to recover the SWO from the companies concerned besides strengthening internal controls for collection of receipts.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 & 2018-19 vide para numbers 2.1.4.23, 2.3.4.6, 2.1.7.12, 2.1.7.25 & 2.1.5.20 having financial impact of Rs 491.943 million, Rs 1,985 million, Rs 245.771 million, Rs 112.190 million & Rs 61.550 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2526]

2.1.4.14 Non-realization of Licence and Lease Rent from E&P companies - Rs 53.941 million

According to Rules 27 & 38 of Pakistan Petroleum (Exploration and Production) Rules 2001 and Rules 29 & 41 of Pakistan Petroleum (Exploration and Production) Rules 2009 & 2013 respectively, “the licensee shall pay to the Government annually an advance Rent at prescribed rates for onshore and offshore areas.”

During audit of DG (PC) for the FY 2022-23, it was observed that various E&P companies in 98 cases did not pay Licence and Lease Rent of Rs 64.775 million but DG (PC) failed to recover the due amount from the defaulting E&P companies. This resulted in non-realization of Licence and Lease Rent amounting to Rs 64.775 million.

Audit was of the view that weak monitoring resulted in non-realization of Rent amounting to Rs 64.775 million.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that an amount of Rs 10.468 million had been recovered. An amount of Rs 0.366 million was not due. The recovery of remaining amount of Rs 53.941 million would be pursued.

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to expedite the recovery of balance amount within one month. DAC further directed the management to provide the date wise due and deposit amount of all licenses and leases for verification of Audit within three days. Para reduced to the extent of recovered and verified amount of Rs 10.468 million and not due amount of Rs 0.366 million. No further progress was reported till finalization of the report.

Audit recommends to recover Lease and Licence Rent from E&P companies besides implementing the decision of DAC. It is further recommended that DG (PC) must maintain a real time data of receivables of Licence and Lease Rent from E&P companies.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 & 2018-19 vide para numbers 2.1.4.22, 2.1.4.9, 2.1.7.3, 2.1.7.24 & 2.1.5.20 having financial impact of Rs 122.561 million, Rs 46.917 million, Rs 147.811 million, Rs 67.570 million & Rs 118.870 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2519 & 2773]

Exploration & Development Related Issues

2.1.4.15 Irregular operation of E&P leases due to non-renewal by DG (PC) -Rs 326,534.452 million

According to Rule 34 of Pakistan Petroleum (Exploration and Production) Rules, 1949, the initial term of lease was 30 years which could be renewed for another period up to 30 years. Later according to Rule 32 of Pakistan Petroleum Production Rules, 1986, the initial term of lease was reduced to 25 years with a possible renewal of 5 years.

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) did not take decision in respect of 38 expired leases during December 31, 2004 to June 26, 2023. The holders of these expired leases continued to extract and sell hydrocarbons amounting to Rs 326,534.452 million. This resulted in irregular operation of E&P leases due to non-renewal by DG (PC) as detailed below:

No of expired leased	Production during 2014-15 to 2022-23		Estimated value Amount (Rs in million)		
	Gas (MMCF)	Oil (BBL)	Gas	Oil	Total
38	7,829,579	223,264	136,205.958	190,328.494	326,534.452

Audit was of the view that due to week regulatory oversight expired leases were not renewed / extended despite lapse of periods up to 19 years.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that extensions / renewal of leases was examined / processed but could not be finalized due to various issues. The management further stated that extensions had been granted to 10 leases, in 6 leases reference were sent to Law Division, renewal of 4 leases would be granted subject to settlement of financial obligation and 5 leases had Windfall Levy Obligation issue.

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to get the stated stance verified from Audit. DAC also directed the management to take decisions as per applicable legislation and avoid pending the issues unnecessary. No further progress was reported till finalization of the report.

Audit recommends to fix responsibility on the person(s) at fault besides early decision on renewal of leases.

[DP No. 2532]

2.1.4.16 Non-recovery of 15% wellhead price due to non-renewal of leases – Rs 21,600.375 million

According to Section 32 of Pakistan Petroleum (Exploration and Production) Rules, 1986, “the lease shall be for the period for which application was made but not exceeding twenty-five years in respect of the on-shore areas and up to thirty years in respect of the offshore areas. The Government may renew the lease for a period, not exceeding five years.” Further, according to Rule 35 of Pakistan Onshore Petroleum (E&P) Rules 2013, “after the expiry of a lease period, the Authority may renew or re-grant, as the case may be, the lease for up to a further five years, provided the lease holder agrees, at least one year prior to the expiry of the lease period, to pay 15% of wellhead value of petroleum produced to the Federal Government. If such agreement is not concluded the Authority may invite bids from prequalified companies for the grant of a lease over the same, or substantially the same area as the expiring lease, for a term of ten years or such lesser period for which commercial production is expected.”

During audit of DG (PC) for the FY 2022-23, it was observed that development and production (D&P) lease in respect of following fields had completed maximum period of 30 years. However, DG (PC) did not take any decision as Authority on the renewal of the lease. As a result, the 15% of wellhead value was not recovered from the company in pursuance of Rule 35 of Pakistan Onshore Petroleum (E&P) Rules 2013 despite the fact that production was continued from the field. This resulted in non-recovery of Rs 23,959.539 million on account of 15% of wellhead value of the reservoir as detailed under:

(million)

Name of operator	Name of field	Date of award of D&P lease	30 years period completed	Value of remaining reservoir US\$	15% overhead value US\$	Amount (Rs)
OGDCL	Qadirpur	16.10.1990	15.10.2020	536	80.40	23,898.900
UEPL	Paniro	07.07.1992	06.07.2022	1.360	0.204	60.639
Total						23,959.539

Audit was of the view that due to weak implementation of regulatory framework neither leases were renewed on payment of 15% wellhead price nor bids were invited for award of lease.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that OGDCL had provided consent for payment of 15% additional wellhead value of the produced petroleum. However, matter of imposition of financial obligations had been referred to Law Division. The D&P lease would be

renewed accordingly. An amount of Rs 2,359.164 million on account of 15% wellhead value was recovered from OGDCL and same had been verified by Audit leaving a balance of Rs 21,600.375 million. Further, UEPL had also submitted consent for payment of 15% additional wellhead value and renewal of lease was under process.

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to pursue the case with Law Division and share the outcome with Audit. DAC further directed to recover 15% wellhead value at the time of extension. No further progress was reported till finalization of the report.

Audit recommends to renew the D&P leases and recover the 15% additional wellhead value of produced hydrocarbons.

[DP Nos. 2525 & 2529]

2.1.4.17 Revival of exploration licences without obtaining performance guarantee - Rs 10,620.750 million

According to Clause-xii of framework for revival of revoked petroleum exploration licenses through out of court settlement approved by the Federal Cabinet on December 08, 2022, the litigant company and / or the assignees (as the case may be) and / or in case of transfer of units or retention of a block shall provide appropriate guarantees proportionate to their resulting working interest, acceptable to the DG (PC) in accordance with the applicable Rules / PCA against the outstanding work commitment simultaneously with the revival of the block.

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) revived 11 exploration licenses as out of court settlements as per above framework. Out of these 11 blocks, regularization letters of only seven exploration licenses were issued having financial value of US\$ 35.700 million equivalent to Rs 10,620.750 million. However, performance guarantees which were required to be obtained from the licensees were not obtained by DG (PC).

Audit was of the view that regularization of blocks without obtaining performance guarantee was gross violation of framework approved by the Federal Cabinet.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that one of the licensees, PEL provided performance guarantee in the form of first or preferred lien on assets which was already in place for two blocks. In other cases, PEL and Dewan had been directed to provide the

performance guarantee. Audit contended that the stance regarding acceptance of old guarantees in form of first or preferred lien on assets for two blocks of PEL was not acceptable because the company provided lien on field which had not been developed despite lapse of 18 years.

The DAC in its meeting held on December 19, 2023 observed that the management had to work on its reply to audit observation in detail. DAC also observed that obtaining performance guarantee was a prerequisite for allowing access to the company in the field. DAC further, directed the management to submit detailed report to Audit for verification on case to case basis. No further progress was reported till finalization of the report.

Audit recommends to fix responsibility on the person(s) responsible for revival of exploration licences without obtaining performance bank guarantee.

[DP Nos. 2572]

2.1.4.18 Non-monetization of discoveries into production - 2,828.650 BCF gas

According to Rule 28 of Pakistan (Exploration and Production) Rules, 2001, the Government shall on being satisfied that a commercial discovery has been made and that the terms and conditions of the licence, including the work programme, have been duly observed and performed, or that the holder is in satisfactory progress with the work programme, grant a lease in respect of discovery area within the licence area granted to the applicant.

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) in 14 cases failed to bring discoveries in production. Four to twenty nine years had elapsed since these discoveries were made. This resulted in non-monetization of discoveries into production of estimated reserves of 2,828.650 BCF gas.

Audit was of the view that failure to bring the discovered hydrocarbons in production, portrayed the lack of commitment and weak monitoring. Had the production started from these discoveries been timely realized, the prevalent energy crisis could have been mitigated in addition to bringing revenue to national exchequer.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that the discoveries could not be developed due to various constraints e.g. low BTU, marginal discoveries, tight gas and security situation. DG (PC) made efforts on many fronts to exploit the discovered hydrocarbons i.e. review of Marginal Field Policy, interactive sessions with SNGPL and SSGC, meeting with E&P companies to expedite their development plan.

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to submit discovery wise revised reply incorporating the way forward regarding start of production from these 14 discoveries within three days. No further progress was reported till finalization of the report.

Audit recommends to expedite the efforts to bring the discoveries into production besides implementing the decision of DAC.

[DP No. 2524]

Others

2.1.4.19 Irregular payment of subsidy to export oriented sectors in violation of ECC's decision - Rs 28,224.000 million

According to ECC's decision dated July 25, 2022, there shall be quarterly review of the subsidy provided to export industry for both gas and electricity. A report will be prepared by the Petroleum Division providing list and amount of all captive units of export-oriented sector who are getting subsidy on account of supply gas / RLNG and subsidized electricity. The report shall be presented to ECC within one month. Further, ECC in its decision dated August 16, 2021, constituted a committee under the convenorship of the Minister for Energy to deliberate the issue of misuse of RLNG supply at concessional rates to export oriented industry and submit viable recommendations to ECC for consideration.

During audit of DG (Gas) for the FY 2022-23, serious irregularities were observed in supply of RLNG supply at concessionary rate to export oriented sector scheme which included (i) missing quarterly review of subsidy provided to export industry showing the list of entitled consumers, contractual load (ii) actual RLNG supplied along with consumer wise export data was not available (iii) verification with MoC and FBR was not ensured to ascertain that customers included in the claims had actually exported the goods manufactured by utilization of subsidized RLNG during the period of claim (iv) no mechanism for 3rd party audit / pre-audit of claims was devised. Despite all these shortcomings, DG (Gas) released Rs 28,224.000 million on account of subsidy claims in respect of subsidized RLNG during 2022-23. Further, report of the committee constituted by the ECC under the convenorship of Minister of Energy to address the issue of misuse of RLNG supply at concessionary rate was not provided to Audit.

Audit was of the view that due to weak monitoring by DG (Gas), subsidy claims were paid without proper pre-audit and instructions of the ECC were not complied with.

The matter was reported to the management in September, 2023. The management in its reply dated December 14, 2023 stated that verified claims were submitted to Finance Division on monthly basis before any release with all details related to each consumer

availing the tariff. Therefore, submission of separate report to the ECC was not required. The management further, stated that based on the recommendations of Committee constituted under Convenorship of MoE, a summary was submitted which was accordingly considered by the ECC. The reply was not tenable as no report was provided to Audit.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to take up the matter with competent forum for regularization of non-implementation of ECC's directives. No further progress was reported till finalization of the report.

Audit recommends to probe the irregularities and submit its findings before competent forum for appropriate action.

[DP No. 2513]

2.1.4.20 Un-authorized grant of marginal price incentives - Rs 3,945.399 million

According to Para E of Marginal Filed Guidelines 2013, the marginal price incentive will be granted on the fulfilment of prescribed conditions, which inter alia includes certification that such gas cannot be produced naturally through conventional method at commercial rates.

During audit of DG (PC) for the FY 2022-23, it was observed that DG (PC) granted price incentive to M/s PEL on Block-22 w.e.f. July 01, 2016 retrospectively despite the fact that company applied for incentive on June 03, 2020. Thereby, undue financial benefit of US\$ 13.273 million equivalent to Rs 3,945.399 million was extended to the company.

Audit was of the view that due to wrong enforcement of guidelines, DG (PC) allowed price incentives with retrospective effect in contravention of application of the company.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that operator was entitled to marginal field price subject to certification by third party. Third party had certified that field was marginal. Accordingly, approval was sought from the Secretary (Petroleum Division).

The DAC in its meeting held on December 19, 2023 directed the management to submit revised reply. No further progress was reported till finalization of the report.

Audit recommends to hold inquiry and fix responsibility on the person(s) at fault.

[DP No. 2672]

2.1.4.21 Non-taking over / un-authorized shifting of installation and facilities of depleted fields - Rs 3,015.408 million

According to Rule 69(2&3) of Pakistan Petroleum (Exploration and Production) Rules, 1986, “when a lease has expired or has been surrendered wholly or partly, or the use of installations and facilities has come to an end, the Government has the right to take over the permanent installations including related equipment in the lease area which are necessary for the production of Petroleum. This also comprises pipeline transportation and related facilities installed by the holder to secure shipment of Petroleum. At takeover, the installations, including equipment in the lease area, shall be in such condition as good oil industry practices indicate. No compensation will be given to the holder in case of such takeover.”

During audit of DG (PC) for the FY 2022-23, it was observed that the DG (PC) on behalf of Government failed to take over the permanent installations and facilities relating to Panjpir, Nandpur and Bahu fields of OGDCL valuing Rs 1,168.593 million which were surrendered during 2019-20 to 2022-23. Further, DG (PC) failed to observe the un-authorized shifting of plant & installation amounting to Rs 1,846.815 million by 04 E&P companies. This resulted in non-taking / illegal shifting of plant, machinery and installation valuing Rs 3,015.408 million in violation of rules.

Audit was of the view that due to weak monitoring by the Regulator, installations and facilities were not timely taken over and disposed-off.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that E&P Rules, 1986 were silent on relocation of installations during validity of lease. However, OGDCL had been informed not to relocate the installation without prior approval of Authority in future. Further, DG (PC) authorized GHPL to take over the installations and disposed-off the same on Government behalf. However, GHPL responded that the installation dismantling, retrieval of buried pipeline was not economical to dispose of. Subsequently, Government decided to withdraw its right and authorized OGDCL to decommission the Panjpir field.

The DAC in its meeting held on December 19, 2023 directed the Petroleum Division to conduct fact-finding inquiry to identify the facts and share report to Audit within three months. DAC further directed the management that in case of M/s MOL and POL, to provide the final position within 15 days. No further progress was reported till finalization of the report.

Audit recommends to conduct inquiry and fix responsibility on the person(s) at fault.

[DP Nos. 2540, 2542, 2543 & 2544]

2.1.4.22 Irregular retention of funds generated from sale of data in commercial bank account & non-utilization thereof - Rs 624.711 million

According to Section-V of Pakistan Petroleum (Exploration and Production) Policy 2012, “the funds generated through sale of technical data and unspent training amount generated under PCAs and PSAs shall be utilized for capacity building, strengthening of the Policy Wing and Ministry. Further, the Finance Division vide letter dated May 08, 2017 withdrew its earlier permission for opening of bank account for deposit of receipts from sale of data and advised that receipts generated through sale of technical data may be used / utilized through a Public Account under the Head G-Liabilities after getting the rules approved from CGA and Finance Division.”

During audit of DG (PC) for the FY 2022-23, it was observed that funds of Rs 624.711 million generated from the sale of technical data was available in Federal Treasury Account and National Bank of Pakistan instead of depositing the same in the Public Account under the Head G-Liabilities in violation of instructions of the Finance Division. Further, no financial rules regarding utilization of receipts generated from sale of technical data were framed by the Petroleum Division, due to which the funds could not be utilized for capacity building, strengthening of the Policy Wing and Ministry.

Audit was of the view that due to weak financial controls, funds could not be utilized due to non-framing of rules. Further, funds were kept in bank account in violation of the instructions of Finance Division.

The matter was reported to the management in September, 2023. The management in its reply dated December 12, 2023 stated that in May 2017, Finance Division withdrew its earlier stance and advised to maintain the “G-Liabilities” account for receipts generated through the sale of technical data. Petroleum Division decided to follow up with Finance Division to seek exemption from opening “G-Liabilities” account for transfer of funds and to continue with NBP account. Further, after grant of approval by Finance Division to continue with bank account in NBP, investment strategy would be devised.

The representative of the Finance Division was of the view that disciplinary action should be initiated against who had not implemented the instructions of 2017.

The DAC in its meeting held on December 19, 2023 directed the DG (PC) to immediately follow the instructions of Finance Division regarding closure of commercial bank account, deposit sale proceeds in Public Account and framing of financial rules for the purpose. No further progress was reported till finalization of the report.

Audit recommends to transfer the funds in Public Account, frame the rules and ensure utilization of funds.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide para numbers 2.1.4.19 having financial impact of Rs 600.087 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2523]

2.1.4.23 Inadmissible claim of expenditure against Royalty Processing Charges - Rs 290.015 million

According to Clauses 5.1.1 and 5.1.3 of Pakistan Petroleum Royalty Guidelines 2006, “the costs incurred from the point of production (wellhead) to the point of sales will be classified as Royalty Processing Charges and costs must relate to the period in which these are incurred on the basis of good accounting practices.”

During Special Audit of DG (PC) for the FY 2014-15, it was observed that E&P companies incurred expenditure of Rs 131.050 million against pension, leave encashment, bonus, catering, travelling expenses and land compensation etc. and claimed the same against Royalty Processing Charges (RPC). Audit held that the instant expenditure under RPC was not admissible as per guidelines. Further, in another case M/s MOL made short payment of Royalty of Rs 180.00 million by claiming operating / production expenses e.g. purchase of furniture, appliances, inventory incidental cost, well surface facility, road maintenance, security surveillance project and water treatment as capital expenditure. The depreciation / amortization on these items was subsequently claimed as RPC. This resulted in inadmissible claim of RPC amounting to Rs 311.050 million. Moreover, RPC guidelines, 2006 were also not got approved from the competent forum i.e. ECC by DG (PC).

Audit was of the view that weak monitoring by DG (PC) resulted in excess claim on account of RPC by the E&P companies and short payment of Rs 311.050 million on account of Royalty.

The matter was reported to Petroleum Division / DG (PC) in August, 2018. In the DAC meetings held on December 12, 2018 and August 06, 2019, DG (PC) reported recovery of Rs 21.035 million and the same was verified by Audit. It was further stated that the well head surface facilities were part of gathering system under Clause 5.1.6 of RPC Guidelines, 2006 and these could not be treated as wellhead cost. Audit contented that under Clause 5.1.10 of Guidelines *ibid*, gathering means cost associated with pipelines, associated pumps and compressors used to bring crude oil or natural gas from wells by separate lines to a central point. DAC directed the management to get the record verified on case to case basis besides effecting recovery of balance amount of Rs 290.015 million. No further progress was reported till finalization of the report.

Audit recommends to recover outstanding amount on account of Royalty from E&P companies besides improving monitoring by DG (PC).

[Para Nos. 4.3, 4.7 & 4.13 of draft SAR on RPC AY 2018-19]

2.1.4.24 Non-provision of financial information in Concession Management System by E&P companies

According to Clause 2.9 of the contract for the management and operations of Pakistan Petroleum, Exploration and Production Data Repository dated September 28, 2016, the contractor is responsible for maintaining and managing the Concession Management System (CMS) owned by DG (PC). The purpose of the CMS is to facilitate DG (PC) in managing Petroleum Concession Agreements, Production Sharing Agreements, licenses and lease deeds, as well as information related to operators, Royalty payments, Rent, Production Bonuses, Training Obligations, and other financial obligations arising from granted rights to E&P companies.”

During Information System audit of LMKR, it was observed that E&P companies refused to enter the data in CMS as E&P company database could not be linked with CMS. Further, management of DG (PC) and LMKR did not effectively address the issue of making concession management system fully functional as scanned copies of lease agreements nor financial information like Royalty, Rent, Production Bonuses, Training Obligations, etc. had been uploaded by DG (PC) in CMS.

Audit was of the view that weak internal controls resulted in failure to make Concession Management System functional.

The matter was reported to the management in July, 2023. The department provided irrelevant reply. The department should direct E&P companies to feed financial information in CMS. No further progress was reported till finalization of the report.

Audit recommends to take effective steps to make CMS functional.

[Para No. 5.1.1 of draft IS Report of LMKR]

Department of Explosives

2.1.4.25 Non-realization of renewal fee from licensees having more than two licenses

According to Clause 3(i) of SRO 42 (KE)/2020 dated April 21, 2020, the Chief Inspector or an Inspector of Explosives authorized by the Chief Inspector of Explosives in his behalf to collect fee for storage / dispensing petroleum products facility for renewal of Form K.

During audit of Department of Explosives for the FY 2022-23, it was observed that the department did not demand / realize the grant / renewal fee from (Form K) licensees having more than two licenses. This resulted in non-realization of Government revenue amounting to Rs 1.692 million based on 187 illustrative cases.

Audit was of the view that weak financial controls resulted in non-realization of Rs 1.692 million.

The matter was reported to the management in October, 2023. The management in its reply dated December 14, 2023 stated that as per SRO No. 139(KE)/2010 dated December 10, 2010 per product fee for grant of licenses in Form K of Petroleum Rules, 1937 had to be realized and same fee should be charged for the renewal of license.

The DAC in its meeting held on December 21, 2023 directed the management to take up the matter with Ministry of Law & Justice for clarification and get the stated stance verified by Audit. No further progress was reported till finalization of the report.

Audit recommends to recover the grant and renewal fee against each Form K issued to retail outlet.

[DP No. 2484]

2.1.4.26 Illegal operation of retail outlets of M/s AOSPL in Sindh

According to Rule 34 of Pakistan Oil (Refining, Blending, Transportation, Storage and Marketing) Rules 2016, “the Authority shall initially issue a license for a period of three years during which the marketing infrastructure i.e. storages, retail outlets and filling stations etc. as given in the work programme, shall be completed in accordance with the laid down technical standards.”

During audit of Department of Explosives for the FY 2022-23, it was observed that OGRA allowed M/s AOSPL marketing operations to the extent of Punjab and Kyber Pakhtunkhwa only vide its letter dated January 05, 2018. DoE issued Form K to 151 retail outlets and 14 construction approvals in Sindh to M/s AOSPL in contravention of OGRA’s approval.

Audit was of the view that DG (Explosives) issued Form K to operational sites of M/s AOSPL in Sindh province without concurrence of OGRA.

The matter was reported to the management in October, 2023. The management in its reply dated December 14, 2023 stated that provisional license was issued to M/s AOSPL by the Petroleum Division in year 2005 under which there was no restriction of limiting the marketing operation of the said company. After the issuance of OGRA letter dated January 05, 2018, the marketing operation of M/s AOSPL was restricted to the province of Punjab

and Sindh only. The reply was not tenable as two letters of OGRA having same number and date were provided to Audit, wherein, based on the storage capacity of Tarujaba and Sahiwal, marketing was allowed in Punjab and KP in one letter and in other letter permission was granted for Punjab and Sindh provinces.

The DAC in its meeting held on December 21, 2023 directed the management to conduct fact-finding inquiry and submit report to Audit within three months. No further progress was reported till finalization of the report.

Audit recommends to conduct fact-finding inquiry on the matter besides fixing responsibility on the person(s) at fault.

[DP No. 2490]

2.1.4.27 Non-initiation of any action against 679 retail outlets closed by the PSO

According to Rule 121 of Petroleum Rules, 1937, “every licence granted under these Rules shall be liable to be suspended or cancelled by order of the licensing authority for any contravention of the Act or of any Rule thereunder, or of any condition contained in such licence.”

During audit of Department of Explosives for the FY 2022-23, it was observed that PSO cancelled franchise agreements of 679 petrol pumps due to sale of products of other OMCs or petrol pumps were being run by using name and logo of other OMCs. These closed retail outlets had no valid franchise agreement or valid lease agreement. However, Department of Explosives did not cancel / suspend the licence of closed retail outlet of PSO. This resulted in operation of illegal retail outlets without having valid franchise agreements with any OMC.

Audit was of the view that due to weak monitoring controls, closed retail outlets were not cancelled by the Department of Explosives.

The matter was reported to the management in October, 2023. The management in its reply dated December 14, 2023 stated that most of the licenses of retail outlets had already been cancelled / expired and most of the retail outlets had been converted / transferred to other OMCs. For the verification of individual retail outlets, the concerned regional offices had been circulated with the list to confirm the position / status of retail outlets closed by PSO.

The DAC in its meeting held on December 21, 2023 directed the management to take disciplinary action against those who were responsible for not taking action on the request of PSO. Further, DAC directed to provide the updated status of closed retail outlets and get it verified by Audit. No further progress was reported till finalization of the report.

Audit recommends to fix responsibility on persons at fault and expedite cancellation of Forms K of retail outlets operating illegally

[DP No. 2491]

2.1.4.28 Non-initiation of action by the Department of Explosives against the CNG stations selling flare Gas

According to Rule 159 (7) of Mineral and Industrial Gas Safety Rules 2010, “an applicant for a new license in Form “B1” granted to manufacture / store / sale and dispense compressed natural gas in connection with dispensing unit for fuelling motor conveyances only.” Further, according to Rule 167 of Rules *ibid*, “no alteration shall be carried out in the licensed premises until the plan showing such alteration has been approved in writing by the Chief Inspector of Explosives.”

During audit of Department of Explosives for the FY 2022-23, it was observed that SNGPL and SSGC provided list of 25 CNG stations which used flare gas through mobile bowsers. The OGRA took action of cancellation / revocation of licenses after completing legal and codal formalities against such CNG stations and same was communicated to Department of Explosives vide letter dated February 22, 2023 to initiate necessary action against these stations and bowsers but Department initiated action against only 05 CNG stations out of 25 CNG stations.

Audit was of the view that due to weak monitoring the Department failed to take action against CNG stations using flare gas.

The matter was reported to the management in October, 2023. The management in its reply dated December 14, 2023 stated that most of the CNG station owners had filed court cases and matter was sub-judice in different courts.

The DAC in its meeting held on December 21, 2023 directed the management to get the relevant record verified on case to case basis by Audit and pursue the court cases vigorously. No further progress was reported till finalization of the report.

Audit recommends to expedite the action against CNG stations using flare gas through mobile bowsers besides pursuing court cases.

[DP No. 2498]

2.1.4.29 Illegal operation of 153 retail outlets by PSO

According to ECC’s decision No. ECC-107/9/2003 dated October 25, 2003, it was directed to maintenance specified stock by all OMCs for 20 days in relation to their projected marketing. Further, OGRA in its regulatory meeting 02 of 2017 held on August 04, 2017 approved criteria for establishment of retail outlets by the oil marketing companies

i.e. 2 MT / day as average benchmark for construction of maximum number of retail outlets by all the OMCs corresponding to their available back up storage infrastructure, province-wise.”

During audit of Department of Explosives for FY 2022-23, it was observed that PSO was operating 358 retail outlets in excess of limit allowed by OGRA in Punjab province. DoE had issued licences of 1,979 retail outlets in Punjab whereas OGRA had allowed 1,621 retail outlets on the basis of storage capacity. In another case 10 retail outlets of PSO were operating without Form K.

Audit was of the view that weak monitoring controls resulted in illegal construction of retail outlets without valid licence.

The matter was reported to the management in October, 2023. The management in its reply dated December 14, 2023 stated that sealing orders had been issued against 10 illegal retail outlets and the matter had been referred to Ministry to initiate inquiry. Further, 358 number of retail outlets had now been dropped to 143 after enhancement of storage capacity by PSO.

The DAC in its meeting held on December 21, 2023 directed the management to get the stated stance verified by Audit and expedite the matter in respect of 10 retail outlets of PSO with Petroleum Division for early resolution. No further progress was reported till finalization of the report.

Audit recommends to expedite the inquiry process against 10 illegal retail outlets and Ministry may direct PSO to enhance storage capacity.

[DP No. 2499]

Geological Survey of Pakistan (GSP)

2.1.4.30 Mis-procurement due to violation of PPRA Rules - Rs 131.773 million

According to Rule 8 of the Public Procurement Rules, 2004, “within one year of commencement of these rules, all procuring agencies shall devise a mechanism, for planning in detail for all proposed procurements with the object of realistically determining the requirements of the procuring agency, within its available resources, delivery time or completion date and benefits that are likely to accrue to the procuring agency in future. Further, according to Rule 12(2) of PPRA Rules 2004, all procurement opportunities over three million Pakistani Rupees should be advertised on the Authority’s website as well as in other print media or newspapers having wide circulation.

During audit of GSP for the FY 2022-23, it was observed that:

- i) Expenditure of Rs 124 million was incurred on procurement under the cost centre QA9085 without devising Annual Procurement Plan. It transpired that expenditure was incurred in haphazard manner in order to avoid surrender of saving; and
- ii) Tender was advertised on authority website on August 17, 2022 for procurement of spare parts/accessories for GSP, Islamabad. Later on, purchase order was issued to M/s Zebros International Quetta and an amount of Rs 7.773 million was paid to the vendor. The department did not advertise tender in the daily newspaper in violation of rules. The matter was also inquired and the inquiry committee in its report dated May 05, 2023 concluded that Rule 12(2) was violated due to human error and no responsibility was fixed.

Audit was of the view that non-observance of PPRA Rules resulted in mis-procurement of Rs 131.773 million.

The matter was reported to the management in September, 2023. In the DAC meeting held on January 19, 2024, the management stated that tender notice in one case was published on PPRA website but the same could not be appeared in press, surfaced after the repair work of the field vehicles had already been done by the successful (lowest) bidder. Therefore, the retendering option was not available. On the recommendation of the Committee, the technical officer heading the Procurement Branch was replaced from his assignment. In other case, funds of Rs 287 million were provided to the GSP under recurrent budget for Research and Development. The fund was used for Geo-scientific Survey Activities, Drilling Activities and Exploratory Operations. Audit's assertion that Exploratory Operation was the Core Activity of the department was factually incorrect, as Geo-scientific Surveys and laboratory work were also among the core activities of GSP. The Procurements of Goods and Services were made through multiple Tenders as per applicable PPRA rules.

The DAC directed the management to get the irregularity regularized from the Principal Accounting Officer and fix responsibility on the persons at fault and get the stated stance verified from Audit. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC besides fixing responsibility on person(s) at fault.

[DP Nos. 2612 & 2615]

2.1.4.31 Irregular re-appropriation of funds of exploratory operations - Rs 59.793 million

According to Rules 11 & 12 of GFR Vol -I, "each head of a department is responsible for enforcing financial order and strict economy at every step. He is responsible

for observance of all relevant financial rules and regulations both by his own office and by subordinate disbursing officers. A controlling officer must see not only that the total expenditure is kept within the limits of the authorized appropriation but also that the fund allotted to spending units are expended in the public interest and upon objects for which the money was provided.”

During audit of GSP for the FY 2022-23, it was observed that an amount of Rs 100 million was granted to GSP under the head 048104-A022-Research Survey and Exploratory Operations during 2022-2023. This head was meant for surveys and exploration. However, at the end of financial year the department not only surrendered an amount of Rs 24.707 million but also re-appropriated an amount of Rs 59.793 million in other heads which transpired that department did not perform exploratory operation. Further, re-appropriation was not done fairly as funds were diverted from core function to recurrent type of heads as detailed below:

(Rs in million)

Classification item	Budget Grant 2022-23	Surrender during the year	Re-appropriation (-)	Final Grant 2022-23	Total expenditure	Saving
Exploratory Operation	100	24.707	59.793	15.500	11.270	4.230

Audit was of the view that weak financial controls resulted in re-appropriation of funds in other heads in order to avoid surrendering.

The matter was reported to the management in September, 2023. The management in its reply dated October 13, 2023 stated that the re-appropriation had been done within approved demand for grant within non-employee related expenditure. Audit contended that budget allocation was already made under the expenditure heads related to (Travelling and Transportation of the filed parties) and re-appropriation of funds from the core activity of the department i.e. exploratory operation without keeping in view the object for which the money was provided. Thus, the management failed to enforce financial order and strict economy as per rules.

The DAC in its meeting held on January 19, 2024 observed that there were serious issues of weak financial management in GSP which resulted in non-observance of austerity measures, delay in adjustment of advances, mis-procurement in violation of PPRA Rules

and irregular re-appropriation of funds from core activity to operational heads. DAC directed the management to submit detailed reply with justification of re-appropriations. No further progress was reported till finalization of the report.

Audit recommends to justify re-appropriation of funds from exploratory operations.

[DP No. 2788]

2.1.4.32 Non-adjustment of advances paid to officers / officials - Rs 26.813 million

According to Para 7.3.1.7 of Accounting Policies and Procedures Manual (APPM), “the unspent balance of all advances, with the exception of the advances, as advised by the MoF, must be repaid before 30th June each year.” Further, as per Rule 11.8 of a Manual on Travelling Allowance Rules, 2013, “the advance should be adjusted through T.A. bill immediately on return to headquarters or on 30th June whichever is earlier.”

During audit of GSP for the FY 2022-23, it was observed that contingent and TA advance amounting to Rs 26.813 million was paid to officers/officials to meet out the expenditures for field work & projects up to June, 2023. However, despite lapse of FY 2022-23, adjustment bills were not submitted against these advances, thus the officers kept withheld Government money without adjusting the remaining unutilized amount at the end of year This resulted into non-adjustment of advances amounting to Rs 26.813 million.

Audit was of the view that weak financial controls resulted in non-adjustment of advances amounting Rs 26.813 million.

The matter was reported to the management in September, 2023. The management in its reply dated October 10, 2023 stated that advances were paid to the field officers to meet the expenditures such as POL, field coolies, repair of transport required to be incurred during field excursions as well as to the Drilling Engineers to meet the on-site expenditure of the Exploratory operations. Following the completion of Field / Drilling operations and upon the subsequent return of the officers from the field / drilling camps to their respective office, the adjustments accounts would be submitted to the DDO / Accounts section. As far as the recovery of TA/DA advances was concerned, the notices for recovery of advances had been issued to those officials who had not proceeded for field work as yet. No further advance would be granted to any official till adjustment / recovery of previously granted advance. Reply was not tenable as advances paid had not been adjusted / recovered.

The DAC in its meeting held on January 19, 2024 directed the management to conduct fact-finding inquiry with reference to SOPs for grant of advances and its adjustments and share the same with Audit. DAC further directed recover the unspent balance from concerned and adjust the advances within fortnight and get it reconciled from

Chief Account Officer and provide the same for verification. DAC further directed the management to adjust / recover the advance within two months. No further progress was reported till finalization of the report.

Audit recommends to expedite recovery / adjustments of advances and get it reconciled from Chief Account Officer besides providing the same for verification.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2019-20, 2020-21 & 2022-23 vide para numbers 2.17.21, Sr. No. 30 of MFDAC 2.1.4.27 & Sr. No.30 40, 41 of MFDAC respectively having financial impact of Rs 71.500 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2613, 2614 & 2621]

2.1.4.33 Mis-procurement due to issuance of purchase order before executing contract agreement with supplier - Rs 10.613 million

According to Clause 4 of purchase order dated February 27, 2023, vendor is required to execute contract agreement as mentioned in the tender documents on non-judicial stamp paper at the earliest before supply of items.

During audit of GSP for the FY 2022-23, it was observed that department awarded contracts to M/s GSN Pakistan for procurement of geological equipment through open tendering and issued a purchase order dated February 27, 2023 for Rs 10.613 million. As per condition of purchase order, the contract agreement was required to be executed before supply of items but the agreement was executed after supply of items. This position transpired that agreement was not executed in time as per terms and condition of the bidding documents.

Audit was of the view that due to weak contract management contract agreement was not executed as per general condition of tender documents.

The matter was reported to the management in September, 2023. In DAC meeting held on January 19, 2024, the management stated that the payment of the supplies was made only after the satisfactory report by the technical committee as per specifications of the items. Further, the payment to the vendor was made after the inking of contract agreement. Thus, without entailing any risk, the department secured a longer warranty duration.

The DAC directed the management to conduct fact-finding inquiry in the light of terms and conditions of tender documents and legal provisions of PPRA Rules. No further progress was reported till finalization of the report.

Audit recommends to conduct fact-finding inquiry and share with Audit

[DP No. 2624]

2.1.4.34 Inadmissible reduction in tax liability payable on income - Rs 2.798 million

According to Part III Reduction in Tax Liability of Income Tax Ordinance 2001, “income, or classes of income, or person or classes of person, enumerated below, shall be allowed reduction in tax liability to the extent and subject to such conditions as are specified hereunder. Tax payable by a full-time teacher or a researcher, employed in a non-profit education or research institution duly recognized by Higher Education Commission, a Board of Education or a University recognized by the Higher Education Commission, including Government research institution, shall be reduced by an amount equal to 25% of tax payable on his income from salary.”

During audit of GSP for the FY 2022-23, it was observed that employees of GSP claimed a rebate in income from salary being a researcher. However, most of the employees did not fall under category of researcher as per job description but they claimed a rebate in their Income Tax liability. The department paid total tax of Rs 11.193 million on account of salary during the year 2022-23 as per General Ledger. This resulted in inadmissible reduction in tax liability of Rs 2.798 million resulting in short payment of Income Tax.

Audit was of the view that weak financial management resulted in inadmissible reduction in tax liability of Rs 2.798 of employees who were not entitled for rebate as per law.

The matter was reported to the management in September, 2023. The management in DAC meeting dated January 19, 2024 stated that the Deputy Commissioner Inland Revenue Quetta vide its letter dated November, 19,2013 had clarified that the GSP, being a research organization declared by HEC, also falls under the category of Tax Exemption.

The DAC directed the management to recover the tax rebate amount from non-technical staff besides discontinuation of this practice forthwith. No further progress was reported till finalization of the report.

Audit recommends to recover the tax rebate amount from non-technical staff besides stopping granting benefit of rebate.

[DP No. 2617]

2.1.4.35 Non-observance of austerity measures resulting in non-curtailement of expenditure

According to Para 2 of Finance Division directions dated July 07, 2022, “Principal Accounting Officers shall ensure that consumption of utilities be reduced by 10%, existing entitlement for POL for Government functionaries be reduced by 30% and avoidable travel be curtailed by promoting use of zoom / video links.”

During audit of GSP for the FY 2022-23, it was observed that expenditure under Grant-035 (Current) on account of utilities and travel and transportation was not curtailed and the management failed to observe austerity measures for FY 2022-23. The department not only utilized budget grant pertaining to Utilities and Travel and Transportation by 99% but also enhanced original grant of these heads as detailed below:

(Rs in million)

Head of Accounts	Original Grant	Re-app (+)	Re-app (-)	Final Grant 2022-23	Actual Expenditure 2022-23	Utilization of fund 2022-23
A033-Utilites	18.384	12.442	1.143	29.682	29.64	99.86 %
A038-Travel & Transportation	80.262	15.466	2.978	92.75	91.856	99.04 %

Furthermore, when this utilization compared to original grant of the year 2022-23 was examined, it was found that the utilization of these heads had been 61 % higher in the utilities and 15 higher in the TA/DA heads.

Audit was of the view that non observance of austerity measures resulted into non curtailment of expenditure.

The matter was reported to the management in September, 2023. In DAC meeting held on January 19, 2024, the management stated that Budget Allocation of GSP for Non-Salary head was increased by Finance Division by more than 300% from Rs 164 million in 2021-22 to Rs 495 million in FY 2022-23 to enable the department to enhance its technical activities. Following the Austerity Measures of FD, no expenditure was incurred on account of Purchase of Vehicles, Machinery, Furniture, Newspapers, Refreshment etc. An amount of Rs. 24.706 million was surrendered as austerity cut on non-salary budget. Increase in expenditure on account of Utilities by 93.37% year on year basis was due to increase in electricity/gas rates. Further, increase in expenditure on account of Travel & Transportation by 332.20% was due to enhanced field work for performing technical activities.

The DAC directed the management to submit revised reply within one month along with month wise / head wise / office wise expenditure details to Audit. No further progress was reported till finalization of the report.

Audit recommends to submit revised reply along with month wise / head wise / office wise expenditure details to Audit.

[DP No. 2616]

2.2 Oil and Gas Development Company Limited

2.2.1 (A) Introduction

Oil and Gas Development Company Limited (OGDCL) was established in 1961 as a public sector corporation which was converted into a public limited company on October 23, 1997 under the Companies Ordinance, 1984. The company is engaged in exploration and development of oil and gas resources, production and sale of oil and gas and related activities. OGDCL is registered with Pakistan Stock Exchange and London Stock Exchange. GoP holds directly and indirectly 85.02 % of the paid-up capital of the company as on June 30, 2022.

(B) Comments on Company Performance

Exploration, Production and Financial performance of the OGDCL during the FY 2022-23 is given below:

i. Exploration and Drilling Activities

Name of Activity	2022-23	2021-22	2020-21	2019-20	2018-19	2017-18
Oil and Gas Discoveries	3	7	6	5	3	4
Exploration Licenses	57	57	59	51	49	51
Development & Production Lease	77	77	77	76	79	72
2D Seismic Survey - Line KM	1804	2,003	2,539	3,407	1,324	2,073
3D Seismic Survey - Line KM	765	601	600	-	620	792
Total Seismic Survey	2,569	2,604	3,139	3,407	1,944	2,865
Well Drilled (Exploratory / Appraisal, Development)	10	7	20	25	16	20

Cost of Dry & Abandoned Well (Rs in million)	7,161	7,657	8,373	10,026	6,092	10,086
Prospecting Expense	11,861	7,929	8,994	8,187	6,408	6,104
Exploration and Prospecting Expenditure (Rs in million)	19,022	15,586	17,367	18,213	12,500	16,190

ii. Financial Performance

Quantity sold		2022-23	2021-22	2020-21	2019-20	2018-19	2017-18
Crude Oil	'000' BBLs	11,854	12,528	13,230	12,919	14,555	14,867
Gas	MMCF	278,860	301,286	317,443	326,879	370,217	373,192
LPG	M. Tons	262,800	294,619	293,310	269,806	294,167	250,984
Sulphur	M. Tons	10,585	15,800	24,000	19,000	20,900	24,800
Financial Results		(Rs in billion)					
Net Sales		413.594	335.460	239.100	232.930	261.480	205.340
Other Revenues		154.692	50.690	20.270	39.880	37.150	19.080
Trade-debt		576.968	456.594	358.821	307.563	242.731	163.691
Overdue amount - Circular Debt		510.849	393.170	303.853	262.459	194.179	121.131
Profit before Taxation		383.772	232.520	128.990	144.360	176.600	112.630
Profit for the Year		224.617	133.780	91.530	100.940	118.390	78.740

(Source: Annual Audited Accounts)

iii Non-achievement of operational targets

Activity / Description	UoM	2022-23			2021-2022		
		Targets	Achieved	% age	Targets	Achieved	% age
Seismic Survey 2D+3D	Line Kms	3,150	2,569	82	4,075	2,000	49
Outsource		150	-	0	1,275	600	47
Total		3,300	2,569	79	5,350	2,000	48
Wells	No.	24	10	42	25	13	52
Net Oil Production	BOPD	37,530	31,320	83	40,000	35,220	88
Net Gas production	MMCFD	890	764	86	1,100	828	75

- i) Production of crude oil, gas, LPG and sulphur was decreased by 8.75%, 7.43%, 11.14% and 54.43% respectively in the FY 2022-23, as compared to previous year;
- ii) Net sales and profit after tax was increased by Rs 78,130.280 million and Rs 90,837.000 million due to impact of increasing international oil prices and rupee devaluation despite decline in production;
- iii) The exploration and prospecting expenditure increased to Rs 19,023.821 million in 2022-23 from Rs 15,585.757 million in 2021-22 (22.06% increase) despite decrease in company's exploration portfolio as evident from above table (Exploration and drilling activities). Seismic surveys were decreased to 1,804 Line km in 2022-23 from 2,003 Line km in 2021-22. No new exploration license and development & production lease during last three years;
- iv) The company's current assets stood at Rs 959,117.636 million as on June 30, 2022 comprising of trade receivables of Rs 576,968.545 million. Accumulation of huge receivables resulted in increase in debtor turnover to 411 days in FY 2022-23 from

218 days in FY 2017-18. This created liquidity issues which resulted in decrease in payment of dividend to shareholders as evident from dividend pay-out ratio which was reduced from 55% in FY 2017-18 to 16% in FY 2022-23 and cash dividend per share from Rs 10 in FY 2017-18 to Rs 8.55 in FY 2022-23.

- v) In 2013, the GoP approved issuance of TFCs by M/s Power Holding Limited (PHL) for principal Rs 82,000.000 million carrying interest rate KIBOR plus 1% for partial resolution of circular debt. As on June 30, 2023 overdue principal of Rs 82,000.000 million and interest amount of Rs 73,207.000 million were outstanding against M/s PHL; and
- vi) The management failed to meet the major targets set in its business plans (as reflected in table iii above) which showed that either the management was not serious towards achievements of targets or business plan was prepared ambitiously without keeping in view the ground facts.

[DP No. 2656]

2.2.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 757,230.553 million were raised during the current audit of OGDCL. This also includes recoverable amount of Rs 579,923.461 million. Summary of the audit observations classified by nature is as follows:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	-
A	Project & Procurement Management	66,946.304
B	Exploration & Drilling Management	66,086.813
C	Production Management	7,839.645
D	Financial Management	616,357.791
E	HR / Employees Related Irregularities	0

2.2.3 Compliance of PAC Directives

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	%age of Compliance
1994-95	19	14	5	74
1995-96	13	11	2	85
1998-99	9	4	5	44
1999-00	11	8	3	73
2000-01	29	24	5	83
2001-02	4	3	1	75
2002-03	5	3	2	60
2003-04	15	8	7	53

2019-20	21	18	3	86
2021-22	11	2	9	18
Total	507	406	101	80%

Overall compliance of PAC directives needs further improvement.

2.2.4 Audit Paras

Project & Procurement Management

2.2.4.1 Delay in installation of compression facilities resulting in production loss - Rs 44,167.182 million

According to Rule 38(B)(2) read with Rule 4 of Public Procurement Rules, 2004, the procuring agency shall make a decision with due diligence and in compliance with general principles of procurement like economy, efficiency and value for money. Further, as per recommendation of reservoir study for KPD-TAY gas fields, installation of compression facility will give benefit of incremental production of 42 MMCFD gas and 364 BBL/day condensate, if installed by 2022-23. In case of Dakhni gas field, installation of compression facility will give benefit of incremental production of gas 53,202 MMCF. In case of Qadirpur gas field, the Consultant recommended modification in existing compression facility and incremental revenue of USD 146.2 million till 2026-27 will be achieved if modification in compression is made in 2019-20. Moreover, according to Clause 6.4 of UCH-II GSA, installation of compression facility was required in seventh year of contractor i.e. 2021. As per recommendation of reservoir study, compression facility may be installed by March, 2023 to enhance delivery pressure which will also increase reservoir recovery from 51.6% to 60.1% by 584 BCF gas during the contractual period.”

During audit of OGDCL for the FY 2022-23, it was observed that the management delayed installation of compression facilities at four gas fields due to inefficient procurement process. The management failed to install compression facilities at KPD-TAY gas fields despite lapse of more than 04 years which resulted in production loss of 39,364 MMCF gas and 598,863 Barrels of Oil valuing Rs 21,744.200 million. One example of delay was fifteen months’ delay in start of 3rd Party Reservoir Merger Study. Similarly, there was two and half years’ delay in hiring of services of contractor for compression facility. At present the project is stalled due to non-allocation of foreign exchange by the Finance Division. However, the project would need another 16 months after opening of letter of credit.

Similar situations were observed in three other projects i.e. Dakhni-Soghri-Jhand gas fields, Uch gas field and Qadirpur gas field which resulted in production loss of 49.518 BCF gas valuing Rs 22,422.982 million from three fields. Although the compression facility was installed at Qadirpur in April, 2022 but it took 4 years after the reservoir study report was received (November 2018). During this period, production was declined from 83,846 MMCF to 61,979 MMCF. Moreover, situation in Uch gas field is critical as non-installation of compressor may result in supply of off- spec gas to Uch Power Private Limited and imposition of huge penalty ranging from US\$ 350,000 to US\$ 600,000 per day as per GSA.

Project was delayed because multiple reservoir studies were conducted during 2016, 2018 and 2021. Two tenders were floated; one was annulled in February, 2021 and second tender was floated with eight months delay.

Audit was of the view that procurement process in the organization was inefficient as it leads to unnecessary delays and wastage of resources in addition to production losses which in these cases amounted to Rs 44,167.182 million.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that project of such size required 3 to 5 years for execution. Audit contended that 03-04 years were taken in procurement of EPCC contractor after reservoir study and project would take further 16-18 months for completion after opening of Letter of Credit. These 03 gas fields were under rapid decline and due to delay substantial production loss was observed. Further, production from ten wells of KPD-TAY fields was stopped till June, 2023.

The DAC directed the management to follow up the process and submit detailed reply with supporting documents besides ensuring the timely installation of compression facilities. DAC further directed to rationalize the timeline for bidding process. No further progress was reported till finalization of the report.

Audit recommends to identify the gaps leading to persistent delay in finalization of important projects and consequent production loss and chalk out timelines for each stage of procurement to avoid such delays in future besides ensuring installation of compression facility at the earliest.

[DP Nos. 2633, 2641, 2662 & 2627]

2.2.4.2 Mis-procurement due to defective technical bid evaluation – Rs 15,281.475 million

According to Rule 4 read with Rule 29 of Public Procurement Rules, 2004, “procuring agencies shall ensure that the procurements are conducted in a fair and transparent manner the object of procurement brings value for money to the agency and the procurement process is efficient and economical.” Further, according to Clause 1.5(d) eligibility requirement of instructions to bidders (ITB) under Rule 29 *ibid*, “EPCC bidder shall have executed 2 projects each having value US\$ 60 million on EPCC basis in last 10 years. Bidder must submit details of such projects with relevant documentary evidence for their successful completion.” Furthermore, according to Bye-law 7(2) of PEC Construction

and Engineering Works 1987, the Council may issue licence to foreign contractor which is mandatory condition as per ITB Clause 1.5 (b) & (c).

During audit of OGDCL for the FY 2022-23, it was observed that the consultant changed the eligibility criteria of PEC licence after opening of the bids. In order to allow M/s Hong Kong Huihua Global Technology Limited (HHGTL) which had only provisional PEC license. Further, the same bidder submitted experience certificates of its parent company and the consultant accepted the same which was not covered under evaluation criteria set in instructions to bidders (ITB). It was also observed that as the bidder did not have the requisite number of completed projects against its experience. Even one project which the bidder claimed to have completed was provisionally accepted by E&P company. In another case relating to installation of compression facility at Dakhni gas field, similar situation was observed where M/s HHGTL was declared successful bidder. This resulted in award of contracts in violation of eligibility criteria for Rs 15,281.475 million.

Audit was of the view that non-observance of PPRA Rules 2004 in awarding contract valuing Rs. 15,281.475 million was considered mis-procurement.

The matter was reported to the management in September & October, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that submission of provisional PEC License during bidding was acceptable as per Clause 7(2) of PEC Bye-laws, 1987. The bid had been submitted by HHGTL on behalf of China Oil HBP Science and Technology Co. and contract had been awarded. Audit contended that M/s China Oil HBP Science and Technology Co. did not participate in the bidding and acceptance of parent company's experience not covered under ITB. Further, no reply was furnished regarding provisional completion certificate and submission of standard licence at the time of award of contract.

The DAC directed the management to get the legal basis of their stance relating to PEC license verified by Audit. DAC further directed the management to get it clarified from PPRA whether the experience of holding company could also be considered as that of subsidiary company for evaluation of bids. No further progress was received till finalization of the report.

Audit recommends to probe into the matter to fix the responsibility for violation of ITB and entertaining provisional certificate of PEC at the time of awarding contract.

[DP Nos. 2628 & 2642]

2.2.4.3 Non-opening of letter of credit resulting delay in imports of equipment and spare parts - Rs 7,407.683 million

According to Rule 39A of Public Procurement Rules, 2004, "where required the procuring agency may incorporate the provision of letter of credit (LC) and International

Chamber of Commerce incoterms (International Commercial Terms), in such processes where shipments and custom clearance are involved and where procuring agency's bank mitigate procurement risk in terms of quality assurance and delivery mechanism and bidder's bank in terms of its payments.”

During audit of OGDCL for the FY 2022-23, it was observed that in 116 cases OGDCL management completed procurement process for import of spare parts, equipment and other stores items for exploration & drilling activities. Being imported items, requests were generated to Finance Division for allocation of foreign exchange of US\$ 26,742,539 equivalent to Rs 7,407.683 million in various foreign currencies. The management could not get the requisite foreign exchange released from Finance Division despite lapse of more than 16 months. Resultantly, import of spare parts and equipment could not be finalized.

Audit was of the view that due to non-allocation of foreign exchange by Finance Division, delay in import of spare parts, ongoing E&P activities were affected badly and rapid decline in production could not be arrested.

The matter was reported to the management in September, 2023. The DAC in its meeting held on January 4 & 5, 2024 directed the management to pursue the matter with quarter concerned. No further progress was reported till finalization of the report.

Audit recommends to explore the options of import substitution for purchase of spares and consumables / chemicals or alternate mode of payments besides pursuing the matter with Finance Division through Petroleum Division.

[DP No. 2630]

2.2.4.4 Unjustified annulment of procurement of chemical due to unwarranted proceedings of Grievance Committee - Rs 89.964 million

According to Rule 48 of PPRA Rules 2004, the procuring agency shall constitute a committee comprising of odd number of persons to address the complaints of bidders and the GRC shall investigate and decide upon the complaint within ten days of its receipt.

During audit of OGDCL for the FY 2022-23, it was observed that on recommendation of Bidder Grievance and Redressal Committee (BGRC), the management annulled a tender for purchase of chemical. Audit contented that the proceedings of BGRC were unwarranted and against the provisions of PPRA rules, 2004 as complainant was not a bidder and. Further, BGRC did not complete its proceedings in ten days as required under the above rule. Due to delay in proceedings by 5 months the validity period of other bidders expired and the management had to go for re-tendering process. The re-tendering process

was finalized at cost of US\$ 1.062 million which was 34.90% higher than the estimated cost and 60.4% higher than the last purchase price. Thus, annulment of 1st tender resulted in delayed procurement and extra cost of Rs 89.964 million.

Audit was of the view that due to unwarranted and lengthy proceedings of BGRC and different stances of departments regarding performance of chemical, first tender was annulled resulting in re-tendering on higher cost amounting to Rs 89.964 million.

The matter was reported to the management in September, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that during technical evaluation, ex-vendor lodged grievance against change of solvent. The BGRC reviewed grievance to uphold transparency, prevent favouritism and to avert any irregularity in the tendering process.

The DAC directed the management to probe the matter and submit report to Audit within one month. No further progress was reported till finalization of the report.

Audit recommends to probe the matter besides expediting procurement of chemical to ensure smooth running of gas processing plant.

[DP No. 2631]

Exploration and Drilling Management

2.2.4.5 *Delay in monetization of 38 discoveries and 07 fields - Rs 61,872.079 million*

According to Article 30.1 of Model Petroleum Concession Agreement, “the operator shall conduct all exploration, exploitation, drilling, development, and production operations in accordance with Good International Oilfield Practices and the principles and standards as laid down in the Rules.”

During audit of OGDCL for the FY 2022-23, it was observed that the management as operator announced 55 discoveries during the period FYs 2009-10 to 2021-22 but remained unable to monetize 38 of them. An essential production of 194.584 MMCFD gas and 8,198.217 BPD oil worth Rs 49,125.079 million was expected to be injected in the system. Though these discoveries’ production from 17 remaining discoveries was also delayed for considerable period of time. OGDCL also remained unable to develop other 07 discoveries (i.e. where lease had been granted) since 2005-06 and production from these fields could not be started causing loss of potential revenue of Rs 12,747.000 million. This resulted in loss of potential revenue of Rs 61,872.079 million.

Audit was of the view that delayed monetization of discovered areas and fields rendered company's investment on exploration and drilling activities fruitless and loss of potential revenue.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management reported that production in 15 more discovered areas was started. Audit contended that details with evidence regarding start of production was not provided.

The DAC directed the management to submit detailed reply regarding status of 38 discovered areas, and 07 fields with respect to start of production and status of non-producing discoveries. No further progress was reported till finalization of the report.

Audit recommends to justify delayed monetization of discoveries besides expediting production by increased efforts.

[DP No. 2644]

2.2.4.6 Inefficient utilization of contractor rigs – Rs 2,543.976 million

According to Article 30.1 of Model Petroleum Concession Agreement, the operator shall conduct all exploration, and drilling operations in accordance with Good International Oilfield Practices. The operator shall endeavour to minimize exploration, development, production and operation costs. Further, according to Annual Business Plans for the FYs 2021-22 and 2022-23, operational targets for work over wells i.e. 25 and 24 respectively were fixed with the approval of BoD.

During audit of OGDCL for the FY 2022-23, it was observed that the management did not fully utilize the 7 contractor rigs. During FYs 2021-22 and 2022-23, these rigs were operated for only 2,135 days out of available 3,135 days (68% usage). The wastage was more pronounced in two of these rigs which operated for only 54% of the available time (937 days out of 1,731 days). Consequently, overall operational targets for drilling could not be achieved and only 09 wells could be drilled against a target of 13 assigned to contractor rigs. The expenditure of Rs 2,543.976 million spent on wasted days was not justified.

Audit was of the view that due to inefficient rig deployment schedule, drilling targets for last two years were not achieved despite incurrence of huge expenditure.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that extra days were consumed due to operational complications. Further, as per agreement, contractor was allowed lump sum

payment of 330 days at the rate of US\$ 16,020 per day during operational activities. However, during stacking / dismantling of rig no payment was made to contractor. Audit contended that specific rig-wise reply was not given and 46% wastage of time by 2 rigs was unjustified.

The DAC directed the management to submit category-wise use and rig-wise detailed reply to Audit. No further progress was reported till finalization of the report.

Audit recommends to justify inefficient utilization of contractor rigs and wastage of 46% operating time of two contractor rigs.

[DP No. 2640]

2.2.4.7 Unjustified expenditure on unutilized rigs - Rs 1,670.758 million

According to Article 30.1 of Model Petroleum Concession Agreement, “the operator shall conduct all exploration, exploitation, drilling, development, and production operations in accordance with Good International Oilfield Practices and the principles and standards as laid down in the rules. The operator shall endeavour to minimize exploration, development, production and operation costs. Further, according to Annual Business Plans for the FYs 2021-22 and 2022-23, operational targets for drilling of wells were 25 and 24 respectively were fixed with the approval of BoD.”

During the audit of OGDCL for the FY 2022-23, it was observed that the management did not rationalize expenditure on two company owned rigs which were not in use being out of order. A huge expenditure of Rs 732.623 million was incurred on rig number N-1 which performed only 03 jobs since August, 2021. It was also pointed out 124,540 litre of HSD valuing Rs 31.135 million was issued after its stacking in January, 2023. Similarly, an expenditure of Rs 907.000 million was incurred without any rationalization on rig number N-4 which was stacked in June, 2023 for repairing. This resulted in unjustified expenditure of Rs 1,670.758 million due to non-rationalization of huge rig crews and other expenses despite limited drilling operations. Moreover, no alternative arrangement was made to achieve the drilling targets and only 23 wells out of 49 planned wells were drilled during the FYs 2021-22 and 2022-23.

Audit was of the view that non-rationalization of expenditure on stacked rigs resulted in unjustified expenditure of Rs 1,670.758 million.

The matter was reported to the management in October, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that rig number N-1 was temporarily stacked due to shortage of consumable spares because of Government restrictions on imports, whereas rig number N-4 was affected with flood and substructure

was shifted to M/s Karachi Shipyard & Engineering Works for repair. Minimum crew was retained at number N-4. Audit contended that management did not prioritize the import of spares for rigs despite the allocation of foreign exchange of US\$ 12 million during FY 2022-23. No rationalization of expenditure and rig crew on stacked rig number N-1 was done and no documentary evidence of minimum rig crew at rig number N-4 was provided. Further, management did not take any decision regarding rig number N-1 for repair or its retirement.

The DAC directed the management to submit detailed justification and chronology of the events relating to rigs N-1 and N-4 with supporting documents within one week. No further progress was reported till finalization of the report.

Audit recommends to justify non-rationalization of rig crew and expenditure on two rigs and take early decision on stacked rig number N-1 for retirement besides putting rig number N-4 on operation after completion of repair work.

[DP Nos. 2637 & 2638]

Production Management

2.2.4.8 Excess transit losses and unverified quantity - Rs 3,084.953 million

According to Article 1.2 Appendix-A (Accounting Procedure) of Model Petroleum Concession Agreement, “the operator shall maintain and keep true and correct records of the production and disposition of all Petroleum under the Concession Agreement and the Joint Operating Agreement.”

During audit of OGDCL for the FY 2022-23, it was observed that during the period from 2019-20 to 2022-23, 7,248 MMCF gas produced valuing Rs 2,174.400 million and 2,417 barrels of crude oil valuing Rs 24.170 million could not be accounted for in the reconciliation statements. Moreover, there were exorbitant transit losses of 187,530 barrels of crude oil valuing Rs 886.383 million. This resulted in abnormal transit losses and unaccounted for quantities of crude oil and gas amounting to Rs 3,084.953 million

Audit was of the view that weak control mechanism resulted in huge discrepancies in production and actual sales and abnormal transit losses.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that the transit losses will be recovered from the carriage contractors and no reply was given relating to unverified quantities of oil and gas.

The DAC directed the management to provide justification for abnormal transit losses and to sort out unverified quantity of oil and gas besides submitting detailed report

on unverified quantity of gas with documentary evidence. No further progress was reported till finalization of the report.

Audit recommends to recover transit losses and sort out unverified quantities of oil and gas in order to ensure proper accountal of production.

[DP Nos. 2650]

2.2.4.9 Loss due to flaring of quality gas - Rs 2,386.692 million

According to Article 30.3 of Model PCA, “the operator shall not flare Natural Gas but shall use it commercially or for recycling.” Further, according to Article 1.2 Appendix-A (Accounting Procedure) of Model Petroleum Concession Agreement, “the Operator shall maintain and keep true and correct records of the production and disposition of all Petroleum under the Concession Agreement and the Joint Operating Agreement.”

During audit of OGDCL for the FY 2022-23, reconciliation of gas produced and sold revealed that the management flared 9,471 MMCF gas valuing Rs 2,386.692 million in Qadirpur gas field during the FYs 2019-20 to 2022-23. It was pointed out by JV partners of OGDCL during operational committee meeting dated December 18, 2019 that the gas being flared was quality gas and asked OGDCL to take remedial measures. The management failed to reduce flaring substantially resulting in loss to joint venture and national exchequer.

Audit was of the view that inaction for reduction of flaring of quality gas as highlighted by JV partners resulted in loss of Rs 2,386.692 million in four years.

The matter was reported to the management in October, 2023. The management did not submit relevant reply.

The DAC in its meeting held on 4 & 5 January, 2024 directed the management to submit detailed report on flared gas at Qadirpur field with documentary evidence. No further progress was reported till finalization of the report.

Audit recommends to probe the matter of flaring of quality gas at Qadirpur gas field and share detailed report with Audit.

[DP No. 2715]

2.2.4.10 Non-installation of procured ESPs resulted in non-achievement of production enhancement - Rs 2,368.000 million

According to Rule 4 read with Rule 38B(2) of Public Procurement Rules, 2004, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for

money to the agency. As per feasibility and economic viability, installation of 5 ESP, average oil production from the 05 wells would increase from 2,500 to 5,800 standard barrels and additional expected reserves are 9 million standard barrels with expected incremental revenue of approximately US \$81 million.”

During audit of OGDCL for the FY 2022-23, it was observed that management procured 05 Electrical Submersible Pumps (ESP) at total cost of Rs 474.224 million in January, 2022. However, the intended benefits from this procurement could not be achieved. One ESP could not be installed at all. Production was stopped altogether in two wells out of four where ESPs were installed. In remaining two wells where ESPs were installed the increase in production was only 26% of expected incremental production as per feasibility report. This resulted in non-achievement of incremental revenue of Rs 2,368.000 million. It was also observed that the management changed the contract condition for Factory Acceptance Test (FAT) after delivery of all ESPs. This created serious doubts about the performance of equipment purchased.

Audit was of the view that due to weak project management resulted in failure to achieve desired level of production.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that due to technical issue in Lashari Center-5 well, ESP was not installed and it was decided to install the ESP in upcoming development well Sono-9 by last week of Dec-2023. ESPs were pulled out from Pasakhi North-3 well and Sono-4 well due to technical issues.

The DAC directed the management to get the increase in production of Paskhi-2, Sono-4 and Sono-7 verified by Audit. DAC further directed to install the remaining two ESPs besides justification for non-conducting of factory acceptance test. No further progress was reported till finalization of the report.

Audit recommends to justify non-installation of ESPs and their sub-optimal performance. Changing the condition of non-conducting FAT may also be justified.

[DP No. 2651]

2.2.4.11 Non-achievement of production targets

According to Article 30.1 of Model Petroleum Concession Agreement, “the operator shall endeavour to maximize the ultimate economic recovery of Petroleum. Further, according to Annual Business Plans for the FYs 2020-21 to 2022-23, operational targets for production targets were fixed with the approval of BoD.”

During audit of OGDCL for the FY 2022-23, it was observed that the management could not achieve the targets set for the years 2019-20, 2020-21 and 2021-22. There was shortfall in achievement of production targets in 26 oil fields and 21 gas fields. This resulted in shortfall in production of 1,633,320 barrels of crude oil and 136,731 MMCF gas.

Audit was of the view that failure in taking timely initiatives for production enhancement and optimization resulted in shortfall in production of oil and gas.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that production from Uch and Qadirpur fields depended on the requirements of buyers and Qadirpur gas field had undergone decline at the rate of 13% during the period.

The DAC directed the management to ensure the achievement of targets and submit comprehensive report on shortfall in production on case to case basis. No further progress was received till finalization of the report.

Audit recommends to justify non-achievement of production targets and take initiatives for production enhancement and optimization.

Note: The issue was reported earlier also in the Audit Report for the Audit Year 2022-23 vide para number 2.2.4.37. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2648 & 2649]

Financial Management

2.2.4.12 Non-recovery of trade receivables from gas companies and refineries – Rs 576,968.545 million

According to Clause 7.02 of the GSPAs, the buyer of gas shall pay within 30 days of invoice in the designated bank account share of each partner and in foreign exchange within 45 days from the date of receipt of invoice. Similarly, as per COSA, the refinery shall pay due amount within two months from the date of receipt of invoice from each partner of the producing field.

During audit of OGDCL for the FY 2022-23, it was observed that an amount of Rs 576,968.545 million was outstanding as on June 30, 2023, mainly on account of inter- corporate circular debt from gas companies and power producers. An amount of Rs 30,897.796 million was also receivable from oil refineries. Major companies from which the recoveries were due were SNGPL, SSGC, Uch Power Private Limited and Attock Refinery Limited. Out of total receivables, an amount of Rs 351,614 million (61%) was outstanding beyond one year which included Rs 2,946.269 million pertaining to oil refineries and other consumers.

Audit was of the view that poor receivable management and non-resolution of circular debt issue resulted in non-recovery of outstanding amount of Rs 576,451.714 million.

The matter was reported to the management in October, 2023. In DAC meeting held on 4 & 5 January, 2024, the management stated that during the months of June and July 2023, GOP had partially settled the circular debt of Uch Power Limited wherein Pakistan Investment Bonds (PIBs) of Rs 22.600 billion and cash of Rs 7.800 billion was recovered. Audit contended that reported recovery was not got verified.

The DAC directed the management to follow up the recovery of outstanding amount besides getting the recovered amount verified by Audit. No further progress was reported till finalization of the report.

Audit recommends to expedite the recovery of outstanding amount besides pursuing the issue of circular debt with the Petroleum Division / Federal Government.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2019-20 vide para number 2.2.6.39 having financial impact of Rs 321,241 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2657]

2.2.4.13 Loss due to operation of uneconomical fields and non-rationalization of expenses – Rs 32,634.330 million

According to Article 30.1 of Model Petroleum Concession Agreement, “the operator shall endeavour to minimize exploration, development, production and operation costs and maximize the ultimate economic recovery of Petroleum.”

During audit of OGDCL for the FY 2022-23, it was observed that the company suffered heavy losses in 21 fields from 2017-18 to 2021-22 due to incurring huge expenses as compared to the revenue from those fields. The management however, did not initiate any corrective measures to improve the working of these fields, thus causing a loss of Rs 32,634.330 million to the company. Details of top loss-making fields involving 88.5% of total amount is given below:

(Rs in million)

Field name	Net Sales	Royalty	OPEX	Transport a-tion cost	Operating profit / (Loss)

Pirkoh	97.302	7.749	10,862.6 76	0	(10,773.123)
Tando Alam	7,145.078	530.330	12,345.8 07	119.248	(5,850.307)
Loti	4,196.155	303.578	7,378.56 2	183.300	(3,669.285)
Dhodak	1,471.090	157.892	5,066.85 6	3.586	(3,757.244)
Dakhni	15,318.85 5	1,816.14 8	16,338.3 22	46.601	(2,882.217)
Chak Naurang	2,376.392	292.612	2,817.43 1	29.972	(763.623)
Miano	1,539.178	134.837	2,154.12 5		(749.784)
Saand	716.514	93.017	1,056.98 3		(433.486)
Total					(28,879.071)

Audit was of the view that failure of company to rationalize the operating expenses resulted in loss of Rs 32,634.330 million.

The matter was reported to the management in October, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that major loss pertained to Pirkoh and Loti fields and management was making all out efforts to rationalize and reduce the losses although a few situations were not under the control of the company.

The DAC directed the management to get the profitability of Tando Alam complex verified by Audit. DAC further directed to make efforts to reduce the losses from these fields. No further progress was reported till finalization of the report.

Audit recommends to rationalize the expenditure in uneconomical fields.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2019-20 vide para number 2.2.6.68 having financial impact of Rs 47,749.652 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2659 & 2652]

2.2.4.14 Undue retention of funds of BESOS - Rs 3,800 million

According to orders of Supreme Court of Pakistan in case numbers C.A.421/2018, 422/2018 and 423/2018 dated October 22, 2020, Benazir Employees Stock Option Scheme (BESOS) was executed in breach of Article of 154 of the Constitution of the Islamic Republic of Pakistan. Further, according to the Privatization Commission of Pakistan and Finance Division instructions vide letter dated December 30, 2020 and 09 May 2022 respectively, fund maintained by PCP has been closed since December 2020, therefore, the amounts retained on account of Employees Empowerment Fund be directly deposited in the Federal Consolidated Fund maintained by Finance Division.

During audit of OGDCL for the FY 2022-23, it was observed that OGDCL Employees' Empowerment Trust (OEET) held shares worth Rs 33,459 million under the BESOS. In April, 2022, OEET transferred dividend amount of Rs 2,316 million and interest earned of Rs 1,484 million aggregating to Rs 3,800 million. However, the order of the Supreme Court of Pakistan was not implemented despite lapse of more than 3 years. This resulted in undue retention of funds of BESOS amounting to Rs 3,800 million.

Audit was of the view that management of OGDCL retained the BESOS amount of Rs 3,800 million in violation of orders of the Supreme Court of Pakistan, Privatization Commission of Pakistan and Finance Division.

The matter was reported to the management in October 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that matter was in discussion between OGDCL and GoP. The matter had been examined in detail by Ministry of Energy and Ministry of Finance. Audit contended that orders of Supreme Court of Pakistan, Privatization Commission and Finance Division were not complied with despite lapse of more than 3 years.

DAC directed the management to follow up the case with Finance Division. No further progress was reported till finalization of the report.

Audit recommends expeditious deposit of BESOS amount of Rs 3,800 million in Federal Consolidated Fund.

[DP No. 2658]

2.2.4.15 Non-settlement of insurance claim regarding TAL block warehouse fire incident - Rs 2,106.984 million

According to Article 22.2 of PCA read with Clause 10.2 of JOA, “operator shall duly file all claims with respect to insurance arranged and maintained by the operator and shall take all necessary and proper steps to collect the proceeds and properly apply them in accordance with the terms of this JOA.”

During audit of OGDCL for the FY 2022-23, it was observed that OGDCL was working interest owner of 27.76% in TAL block with JV partners of GHPL, PPL and MOL (operator). A fire incident occurred at TAL block’s warehouse located in Makori Central Processing Facilities on September 21, 2022 which caused damage to inventory / spares. Resultantly, operator filed an insurance claim with relevant insurers / loss adjuster based on initial estimates of US\$ 33 million equivalent to Rs 7,590.000 million having OGDCL’s share of Rs 2,106.984 million. However, this claim was yet to be realized despite lapse of twelve months.

Audit was of the view that weak JV management by OGDCL resulted in non-settlement of insurance claim through Operator regarding TAL block warehouse fire incident.

The matter was reported to the management in October, 2023.

The DAC in its meeting held on 4 & 5 January, 2024 directed the management to pursue the case vigorously and share the outcome with Audit. No further progress was received till finalization of the report.

Audit recommends to justify delay in settlement of insurance claim besides actively pursuing the case with operator for early recovery.

[DP No. 2655]

2.2.4.16 Non-recovery of share from Joint Venture Partners – Rs 847.932 million

According to Clause 18.2 of Model PCA, “the operator shall submit an itemized estimate of expenditures for each month and each Working Interest Owner shall pay to the operator its proportionate share of such estimated expenditures in monthly instalments. Each monthly instalment shall be paid as provided for in the Joint Operating Agreement.”

During audit of OGDCL for the FY 2022-23, it was observed that the management failed to recover its share of expenditure from its joint venture partners i.e. GHPL in Sinjhor, Nashpa, Guddu, Khuzdar North, Tando Allah Yar, Chanda, Khewari, Bitrisim, Pasni West, Orakzai and Tirah blocks amounting to Rs 1,273.851 million and KPOGCL in Tirah and Orakzai blocks amounting to Rs 1,340.155 million and Sindh Energy Holding

Company Ltd. (SEHCL) in Guddu block amounting to Rs 7.777 million aggregating to Rs 2,621.783 million.

Audit was of the view that weak Joint Venture management resulted in non-recovery of share of expenditure from JVP of Rs 2,621.783 million.

The matter was reported to the management in October, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that OGDCL made recoveries of Rs 1,273.851 million from GHPL and Rs 500 million from KPOGCL. Audit contended that recovery of Rs. 1,773.851 million had been verified and para had been reduced to Rs. 847.932 million.

The DAC directed to expedite the recovery of balance amount. No further progress was reported till finalization of the report.

Audit recommends to expedite the recovery of JVP share of Rs 847.932 million.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2018-19 vide para number 2.2.4.9 having financial impact of Rs 117.534 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2653]

2.2.4.17 Non preparation of Joint Accounts for Joint Ventures

According to Article 22.1 of Model Petroleum Concession Agreement, “the operator shall maintain correct and accurate records and accounts of all Expenditures made for Joint Operations, of all production obtained from the Area and of all property acquired for the Joint Account or disposed of in accordance with normal industry practices and the Accounting Procedure. The accounts shall be audited for the period from the Effective Date to end of the Calendar Year, and thereafter annually by an independent firm of chartered accountants selected by the Operator and approved by the Operating Committee. Copies of the audit reports shall be delivered to The President and to each of the Working Interest Owners within six Months of the end of each Calendar year.”

During audit of OGDCL for the FY 2022-23, it was observed that the company was operator in 45 JV exploration licenses. However, accounts of these JVs were not provided to Audit despite repeated reminders and pursuance. Later on, it was apprised by the management that accounts of 26 JVs were not prepared for the CY 2022.

Audit was of the view that poor joint venture management resulted in non-preparation of joint accounts and non-conducting of audit of 26 joint accounts for the CY 2022.

The matter was reported to the management in October, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that audit of 19 joint accounts had been completed for CY 2022 and shared with Audit. Remaining 26 joint accounts were in progress.

The DAC directed the management to complete the remaining joint accounts' audit expeditiously. No further progress was reported till finalization of the report.

Audit recommends to expedite the audit of joint accounts and provide the audited copies of JV accounts for audit scrutiny. It is also recommended that the timelines for completion of JV accounts may be strictly observed for better financial control.

[DP No. 2654]

HR / Admin Related Issues

2.2.4.18 Unauthorized absence from duty and joining without prior approval of MD/CEO

According to Rule 86 read with Rule 119(e & f) read with Rule 122 of OGDCL Service Rules, 2002, service of an employee may be terminated, if any employee leaves the company, without notice or absents himself from duty without leave, he shall be liable to be punished under relevant rules. Further, OGDCL's circular dated November 11, 2020, cases of authorized absenteeism joining / regularization of leave of officer up to 180 days will be approved by MD/CEO and beyond 180 days approving authority is BoD.

During Audit of OGDCL for the FY 2022-23, it was observed that 07 employees of OGDCL remained absent from duty without obtaining leave. Field / local management did not inform HQ in time and accepted the joining of the employees without prior approval of competent authority i.e. MD/CEO and BoD (for cases of more than 180 days' absence).

Audit was of the view that due to weak HR management, extension in EOL was regularized and absconder joined the office without prior approval of competent authority.

The matter was reported to the management in September, 2023. In DAC meeting held on January 4 & 5, 2024, the management stated that in one case ex-post facto approval of MD was sought, in another case employee was retired, in one case relating to absence of more than 180 days, BoD refused to regularize the absence period and in remaining 3 cases, ex-post factor approval of unauthorized absence was not sought.

The DAC in its meeting held directed the Petroleum Division to conduct inquiry and share report to Audit. No further progress was reported till finalization of the report.

Audit recommends to conduct inquiry and share report with Audit.

[DP No. 2663]

2.2.4.19 Irregular acceptance of resignation during the disciplinary proceeding

According to Rule 84 (d) of the OGDCL Employees Service Rules 2002, “no employee will be allowed to serve a notice on the company or resign or be relieved of his duties in case any disciplinary action is pending against him. The disciplinary action shall be deemed to be initiated against him from the time a charge sheet is served on him in respect of any act of misconduct on his part.”

During audit of OGDCL for the FY 2022-23, it was observed that an Assistant Engineer Software/System (Employee No. 303862) remained absent from duty w.e.f. August 04, 2022 without intimation. The officer in-charge reported this matter with a delay of one and half month on September 26, 2022. Subsequently disciplinary proceeding was initiated against the employee and an inquiry officer was appointed on September 15, 2022. The statement of allegation along with charge sheet was issued to the accused on September 26, 2022. As per provisions stated above resignation of the employee could not be accepted but on November 07, 2022 the management accepted his resignation w.e.f. August 15, 2022. The disciplinary proceedings against the accused were closed on November 25, 2022 in violation of above provisions.

Audit was of the view that weak HR management resulted in acceptance of resignation during the disciplinary proceeding in violation of Service Rules.

The matter was reported to the management in September, 2023. In DAC meeting held on 4 & 5 January, 2024, the management stated that resignation has been accepted in-principle before initiating inquiry i.e. charge sheet vide letter dated 26.09.2022. Audit contended that resignation was accepted on November 7, 2022 during the disciplinary proceedings.

The DAC took a serious view of non-compliance of OGDCL Service Rules and directed to take action against the responsible persons. No further progress was reported till finalization of the report.

Audit recommends to take action against the persons at fault in the light of decision of DAC.

[DP No. 2667]

2.3 Pakistan Petroleum Limited

2.3.1 (A) Introduction

Pakistan Petroleum Limited (PPL) is one of the oldest Exploration and Production (E&P) companies in the country having its registered office at PIDC House, Dr Ziauddin Ahmed Road, Karachi. The company was incorporated on June 05, 1950 after the promulgation of Pakistan Petroleum Production Rules, 1949. The principal activities of the company are exploration, development and production of Pakistan's natural reserves of oil and gas.

The company's current exploration and production portfolio is spread across Pakistan with international presence in UAE, Iraq and Yemen. PPL also holds mineral rights in Balochistan through Bolan Mining Enterprises (BME), a 50:50 joint operation between PPL and Government of Balochistan.

The company's shareholding is divided between the Government of Pakistan and general public, having 75 percent, and 25 percent shares of the company.

(B) Comments on Audited Accounts

The working results of the company for the FY 2022-23 as compared to previous years are given below:

Heads	2022-23	2021-22	2020-21
Sales	288,053.039	203,810.768	149,278.578
Operating Expenses & Royalties	96,153.786	71,773.587	63,003.338
Gross Profit	191,899.853	132,037.181	86,275.240
Field Expenditure and Other Operating Expenses	147,507.269	84,747.119	64,357.855
Other Income	17,404.708	14,190.164	4,080.091
Profit before Taxation	164,911.977	98,937.283	68,437.946
Taxation	67,690.363	44,584.587	16,154.752
Profit after Taxation	97,221.614	54,352.696	52,283.194

(Source: Consolidated Annual Audited Accounts)

- i) Operating expenses increased from Rs 40,755.673 million to Rs 49,277.810 million during FY 2022-23 as compared to 2021-22, registering an increase by 17.29%;
- ii) Field Expenditure and Other Operating Expenses substantially increased from Rs 84,747.119 million to Rs 147,507.269 million during FY 2022-23 as compared to the 2021-22, registering an increase of 74.05%;
- iii) Trade debts (receivables) increased from Rs 366,251.547 million in 2021-22 to Rs 513,488.874 million during FY 2022-23, registering an increase of 40%. Increase in trade debts reflects unsatisfactory receivable management; and
- iv) Trade and other payables increased from Rs 89,664.907 million to Rs 112,266.683 million during FY 2022-23, registering an increase of 25%.

2.3.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 505,836.613 million were raised in this report during the current audit of PPL. This amount also includes recoverable amount of Rs 420,441.466 million (circular debt) as pointed out by the Audit. Summary of the audit observations classified by nature is as under:

Overview of Audit Observations

(Rs in million)

The overall compliance of PAC directives needs to be further improved.

2.3.4 Audit Paras

Financial Management

2.3.4.1 *Non-recovery of outstanding amount from various customers - Rs 420,441.466 million*

According to Clause 17.3.1 of Gas Sale Agreement between PPL and various customers, the buyer shall pay seller's monthly invoice, excluding the Excise Duty and Sales Tax, within 30 days on receipt of invoice.

During audit of PPL for the FY 2022-23, it was observed that an amount of Rs 460,569.000 million was receivable against various customers, till June 30, 2023. Out of the total outstanding amount, an amount of Rs 292,157.000 million (i.e. 63.50%) was lying outstanding beyond 01 year and remaining amount of Rs 168,412.000 million had an age of less than one year. Outstanding amount beyond one year included an amount of Rs 290,881.000 million pertaining to circular debt of SSGC & SNGPL, Rs 1,107.000 million of refineries and Rs 169.000 million of M/s E-Gas.

Audit was of the view that due to poor financial management the management failed to recover the outstanding amount.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that Rs 40,127.534 million had been recovered and verified and efforts are underway to recover remaining amount of Rs 420,441.466 million.

The DAC reduced the para to the extent of recovered amount and directed to expedite the recovery of remaining outstanding amount. No further progress was received till finalization of the report.

Audit recommends to recover the remaining outstanding amount.

[PDP No. 2772]

Procurement Management

2.3.4.2 *Irregular award of contract without open competitive bidding - Rs 85.945 million*

According to Clause 12(2) of PPRA Rules, 2004, "all procurement opportunities over three million Pakistani Rupees should be advertised on the Authority's website as well as in other print media or newspapers having wide circulation. The advertisement in the

newspapers shall principally appear in at least two national dailies, one in English and the other in Urdu.”

During audit of PPL for the FY 2022-23, it was observed that management awarded direct contract on June 29, 2022 to M/s Ikon Science, Malaysia for “seismic reservoir study Block 2468-12 (Kotri)” for US\$ 151,000 equivalent to Rs 31.293 million and to M/s Geo Software, Malaysia for 3D Seismic Study in Kharan East Block, Balochistan on May 10, 2023 for Rs 54.652 million without open competitive bidding. This resulted in irregular award of contract without open competitive bidding - Rs 85.945 million.

Audit was of the view that weak procurement management resulted in award of contract without open competitive bidding.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that PPL awarded direct contract to M/s Ikon Science keeping in view their proprietary technology to investigate the potential of Deeper Tight Sands (Basal & Massive). In other case, M/s Geo Software was the only contractor to perform the required work for 3D Seismic Study in Kharan East Block in compliance with PPRA Rule 42C(ii).

The DAC directed Petroleum Division to conduct fact-finding inquiry and share the report with Audit. No further progress was received till finalization of the report.

Audit recommends to complete inquiry and fix responsibility on the person(s) found at fault for irregular award of contracts.

[PDP Nos. 2776 & 2795]

HR / Employee Related Irregularities

2.3.4.3 *Irregular appointment of the Head of Legal and Commercial by extending undue favour*

According to advertisement dated August 21, 2022 for Head of Legal and Commercial the ideal candidate should possess a law degree i.e. LLB or Juris Doctor from a reputable local or foreign university / institute recognized by the Higher Education Commission with at least 19 years of post-qualification relevant experience. Further, according to Clause 3.5.3 of HR Policy, Panel interviews shall be primarily used for assessing the suitability of experienced professionals against vacant position. To ensure an independent assessment of the candidates by the technical experts and HR, the appointing authority / MD will meet only the final shortlisted candidate(s) after 2nd level interview.

During audit of PPL for the FY 2022-23, it was observed that the management violated advertised criteria for appointment as Head of Legal and Commercial in Job Group-

12 by selecting a candidate with less experience as was advertised. Incumbent had an experience of 18 years and 9 months on the closing date of the application i.e. September 02, 2022 whereas the required minimum experience was 19 years. MD selected, the candidate having less than advertised experience and who was also ranked second and third by second level interview panel. This resulted in irregular appointment of Head of Legal and Commercial by extending undue favour.

Audit was of the view that while conducting the final interview, MD did not consider recommendations of 2nd level interview and extended favour in violation of the HR policy.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that hiring process was carried out in accordance with the Board's approved Recruitment Policy and the incumbent fulfils the advertised criteria. Audit contended that MD extended undue favour by ignoring recommendations of 2nd level interview panel and selected candidate having less than advertised experience.

The DAC directed Petroleum Division to probe the matter and submit report to Audit. No further progress was received till finalization of the report.

Audit recommends to probe the matter and report be shared with Audit.

[PDP No. 2779]

CSR Related Issues

2.3.4.4 Irregular spending of CSR funds - Rs 193.446 million

According to Clause 9(3) sector / areas of intervention and funding of PPL CSR Policy, PPL will consider innovative initiatives which are sustainable and beneficial for general public. The areas of social sector to be considered for financial assistance include Health, Education, Training & Research, water supply, water resources development and conservation.

During audit of PPL for the FY 2022-23, it was observed that an amount of Rs 193.446 million was utilized under CSR on provision of water through bowzers to Sui Town and village at Mazarani field. A detailed analysis of supporting vouchers revealed that major portion of this expense was related to operational cost of water pumping station at Khewali (KPS) which was meant for water supply to PPL's own facilities at Sui and therefore this expenditure could not be booked to CSR. Further, two different amounts of Rs 95.558 million and Rs 75.800 million as electricity charges were reported on November, 07, 2023 and November 24, 2023 respectively. 66% of this expenditure was booked to CSR without any basis. A total amount of Rs 440.600 million was spent on water supply in last 03 years.

Non-development of sustainable water supply resources in violation of CSR policy was also observed.

Audit was of the view that charging that amount to CSR which was spent on PPL's own operations was irregular and against spirit of CSR policy which required development of sustainable sources of water supply to the general public.

In DAC meeting held on January 15, 2024, the management stated that Rs 189.500 million was 66.66% allocated cost of total KPS Pumping Station's operational budget / cost i.e. Rs 285.660 million in FY 2022-23, which was actually the cost incurred on pumping water from Kashmore to Sui field instead of cost incurred on providing water to Sui Town through bowzer. The management stated that 66% of expenses incurred on water pumping station is charged to CSR, however, no justification or basis was provided for such allocation.

The DAC directed the management to submit revised reply along with evidence to substantiate their reply to Audit. DAC also directed the management to follow the provisions of CSR policy in letter and spirit. No further progress was received till finalization of the report.

Audit recommends that amount spent for CSR, should be clearly identified on the basis of actual work. The water supply system should be developed on sustainable basis. Amount already shown as booked under CSR should be got verified besides developing sustainable scheme to supply water to Sui town.

[DP No. 2774]

2.3.4.5 *Irregular utilization of CSR funds due to non-receipts of vouched accounts from NGOs and Institutions - Rs 112.797 million*

According to Para 8 of CSR Policy of PPL, collaborative partners shall provide all necessary financial and non-financial details to the PPL as and when required. Further, provision of substantial evidence of its work status with regard to the proposed initiative is essential to ensure transparency and accountability of CSR spending.”

During audit of PPL for the FY 2022-23, it was observed that CSR funds of Rs 124.440 million were utilized through NGOs and institutes, besides disbursement of Rs 8.247 million to the students directly. However, the management did not obtain vouched accounts and proof of spending from concerned institutions regarding enrolment / attendance of students funded through CSR. This resulted in irregular utilization of funds due to non-receipt of vouched accounts / proof of utilization of Rs 132.687 million.

Audit was of the view that weak internal controls resulted in irregular use of CSR funds.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that for communities living in remotest areas, flexible execution mechanism was agreed to engage reputable NGOs to become implementing partners to execute social welfare projects for locals. For disbursement of Scholarships, PPL as per its SOPs publish advertisements in the newspapers for wider circulation to select the deserving students on merit from its operational areas. During FY 2022-23, out of 159 higher professional education scholarships, 65 scholarships had been directly transferred to universities and out of 108 scholarships for students of class 9-12, 90 were directly transferred to academic institutes.

The DAC reduced the para to the extent of verified amount of Rs 19.890 million out of Rs 124.440 million and directed to submit the required documents for the remaining amount. DAC further directed the management to get the relevant record from the concerned institution and get it verified from Audit regarding enrolment / attendance of students. No further progress was received till finalization of the report.

Audit recommends to furnish the required documents for verification besides developing a robust monitoring mechanism to ensure transparent utilization of CSR funds.

[DP Nos. 2775 & 2778]

Contract Management Related Issues

2.3.4.6 *Loss due to non-finalization of Unitization Agreement - Rs 76,000.000 million*

According to Clause 64(1), (2) & (3) of Pakistan Onshore Petroleum (Exploration and Production) Rules, 2013, if a petroleum deposit extends across more than one license or lease area held by different holders of petroleum right, then such holders shall endeavour to agree to explore and exploit the deposit jointly in the most efficient manner. Joint exploration and development plans or where one of the deposits has already been developed, a joint unitization plan, together with agreement between them shall be submitted expeditiously to the Authority for approval. If the agreement on joint exploration and development or unitization plan referred to in sub-rules (1) and (2), is not reached at within a reasonable period of time, the Federal Government may, in the public interest, by notice in writing to all concerned parties, direct to finalize and submit for approval of the Authority relevant plan within the period stipulated in the notice.

During audit of PPL for the FY 2022-23, it was observed that issue of reservoir communication of straddled fields i.e. Shahdadpur, Adam West & Kinza operated by PPL

and Sutiari Deep, Salamat and Bakhsh Deep operated by UEPL could not be resolved since 2014. UEPL was extracting more gas from the interconnected reservoir depriving PPL from its share of gas. DG (PC) directed PPL and UEPL to submit a Unitization Agreement in July, 2018 for the Adam West & Salamat fields operated by PPL and UEPL respectively. This directive of DG (PC) was not implemented by UEPL. The matter relating to unitization of remaining 02 fields was also pending due to non-conduct of reservoir study. Resultantly, UEPL extracted 118 BCF gas from PPL's share valuing US\$ 400 million equivalent to Rs 76,000.000 million as per estimate of consultant.

Audit was of the view that weak follow up by PPL resulted in non-finalization of Unitization Agreements of straddled fields.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that it made the strenuous efforts for the resolution of the matter but now the matter was sub-judice in the Sindh High Court.

The DAC observed that the management was not fully prepared on the contents of the para. DAC directed the management to pursue the matter vigorously. DAC also directed DG (PC) to make efforts for resolution of the issue on urgent basis. No further progress was received till finalization of the report.

Audit recommends to pursue matter in the court of law and efforts be made for early finalization of Unitization Agreements.

[DP No. 2784]

2.3.4.7 Revenue loss due to lesser offtake by GENCO-II and non-allocation of gas to other customers - Rs 5,480.000 million

According to Clause 6.1 of Gas Sales Agreement for Kandhkot Gas Field executed on October 23, 2017 between PPL and Central Power Generation Company Limited, "the seller will supply 180 MMCFD gas according to specification, which will gradually be increased to 200 MMCFD per contract year."

During audit of PPL for the FY 2022-23, it was observed that GENCO-II had taken only 55,750 MMCF gas against the committed volume of 66,157 MMCF, resulting in less offtake of 10,407 MMCF gas from Kandhkot Gas Field. Due to less offtake by GENCO, PPL was forced to curtail its daily production of gas leading to revenue loss of Rs 5,480.000 million. However, management failed to identify alternate buyer of gas.

Audit was of the view that weak financial management resulted in less offtakes not only affected the company's revenue but also forced the company to curtail its production.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that the matter was being pursued for reallocation of gas from Kandhkot field to a customer other than Genco-II due to inability to offtake full potential from the field.

The DAC directed the management to continue the ongoing efforts to pursue with DG (Gas) to resolve the issue. No further progress was received till finalization of the report.

Audit recommends to adopt remedial measures for optimum production and take up matter with DG (Gas) for allocation of excess gas.

Note: The issue was also reported earlier in the Audit Reports 2020-21, 2021-22 and 2022-23 of Audit Year 2019-20, 2020-21 and 2021-22 vide para numbers 2.3.6.11, 2.3.6.3 and 2.3.4.2 having financial impact of Rs 11,529.542 million, Rs 6,678 million and Rs 21,142.107 million. Recurrence of same irregularity is a matter of serious concern.

[PDP No. 2785]

Others

2.3.4.8 *Blockage of funds due to unnecessary procurement - Rs 3,522.959 million*

According to Para 7.1(i) of Procurement Manual of PPL, “the schedule stock holding is based on re-order levels and re-order quantities (replenishment quantities), these levels are determined on the recommendation of respective user departments.” Further, according to Para 7.1(ii) of Manual *ibid*, “drilling / production related material for exploratory, development and workers wells will be procured on the work program.”

During audit of PPL for the FY 2022-23, it was observed that huge quantities of casing pipes was lying unconsumed in the store since 2003 as detailed below:

(Rs in million)

Sr. No.	Description	Year of Purchase	Amount
1	Casing pipes	Before 2003	113.166
2	Casing pipes	2004 to 2006	89.934
3	Casing pipes	2011 to 2015	1,287.313
4	Casing pipes	2016 to 2020	2,032.546
Total			3,522.959

Audit was of the view due to weak internal controls and poor inventory management, minimum / maximum / re-ordering stock levels were not fixed which resulted in unwarranted excessive procurement of casing pipes.

The matter was reported to the management in October, 2023. In DAC meeting held on January 15, 2024, the management stated that PPL exercised detailed checks to allocate the already present stock wherever technical specifications permit. Further, casing pipes also included some contingencies due to their long delivery period (more than 12 months) as non-availability / shortage during drilling operation may cause huge financial loss to the company. In E&P sector, outcome of the well drilling operation was usually unforeseeable, therefore, keeping contingent material for such situation was unavoidable.

The DAC directed the management to justify the inventory items, not used since long to Audit within one month. No further progress was received till finalization of the report.

Audit recommends to chalk out utilization plan and improve inventory management.

[DP No. 2793]

2.4 Pakistan State Oil Company Limited

2.4.1(A) Introduction

Pakistan State Oil was incorporated in 1976 under Companies Act, 1913 (Now Companies Act, 2017) as a result of merger of Premier Oil Company Limited and State Oil Company Limited. The company is a State Owned Enterprise, listed on Pakistan Stock Exchange and is governed by provisions of Marketing Petroleum Products (Federal Control) Act, 1974.

Pakistan State Oil Company Limited (PSO) is the largest Oil Marketing Company of Pakistan dealing with procurement, storage, sales and marketing of petroleum products. PSO has 51% market share and a widespread network comprising 3,528 retail outlets, 9 pipeline installations, 23 depots, refuelling facilities at 10 airports, 2 lubricant manufacturing facilities and LPG storage & bottling facilities. PSO is currently engaged in marketing and distribution of various POL products including Motor Gasoline, High Speed Diesel (HSD), Furnace Oil (FO), Jet Fuel (JP-1), Kerosene, CNG, LPG, Petrochemicals, and Lubricants. In addition, the company is entrusted with the responsibility of importing LNG through long term agreements with Qatar Gas (QG) and Qatar Petroleum (QP) since 2016 and 2021 respectively.

(B) Comments on Company Performance

The financial performance of the company for the last five years as per consolidated financial statement is given below:

(Rs in million)

Particulars	2022-23	2021-22	2020-21	2019-20	2018-19
Net Sales	3,539,155	2,541,730	1,223,678	1,108,358	1,154,298
Gross Profit	84,406	178,127	57,255	12,227	36,017
Other Revenues	16,796	25,348	19,415	10,210	7,559
Marketing & Administrative Exp.	22,041	17,765	15,737	14,806	12,414
Other Exp.	4,515	14,772	4,053	220	4,699
Operating Profit	74,208	165,832	55,981	7,749	26,257
Finance Cost	43,410	5,962	11,554	13,427	8,987

Share of profit from associates	869	690	575	545	200
Profit before Tax	29,929	160,560	45,003	(5,134)	17,477
Profit for the Year	9,816	95,723	29,557	(6,466)	10,587

(Source: Consolidated Annual Audited Accounts)

- i) Despite 24% increase in marketing and administration expenses, volumetric sales of MS (petrol), HSD (diesel) and Furnace Oil (FO) during the FY 2022-23 declined by 17%, 25% and 94% respectively as compared to FY 2021-22;
- ii) Gross profit was Rs 84.81 billion during the FY 2022-23, recording a decrease of 53% as compared to the previous financial year (FY 22: Rs 178 billion). Similarly, operating profit was Rs 74 billion, recording a decrease of 55% as compared to the previous financial year (FY 22: Rs 165 billion). Similarly, Profit after tax was Rs 9.82 billion during the current year which was Rs 95.72 billion during the FY 2021-22. Resultantly, PSO recorded a drastic decline of 90% in the net profit after tax as compared to previous FY of 2021-22;
- iii) There was a noticeable increase in financial cost which was Rs 43.4 billion during the current year with an increase of 628% as compared to previous FY (Rs 5.96 billion). Furthermore, the net profit translated into earning per share of Rs 19.85 (FY 21: Rs 194.35) which declined by 90% as compared to FY 2021-22; and
- iv) PSO is procuring LNG on take or pay arrangement from Qatar Gas under long term G-to-G contract, while there was no such arrangement between PSO and SNGPL. The company failed to execute the tri-partite agreement with SNGPL and SSGC. Due to capacity and operational constraints, PSO was unable to handle rising demand of petroleum products, increasing demurrage cost over the last years causing unnecessary outflow of foreign exchange from the national exchequer. Moreover, SNGPL was not paying LNG cost and resultantly, PSO had to borrow from the banks resulting in increased financial cost.

2.4.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 162,383.629 million were raised in this report during the current audit of PSO. This amount also includes recoverable of Rs 138,807.988 million as pointed out by the Audit. Summary of the audit observations classified by nature is as under:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	-
A	Financial Management	140,369.230
B	Procurement Related Issues	2,194.469
C	Non-Recovery of Dues	186.500
2	Others	19,633.430

2.4.3 Compliance of PAC Directives

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	%age of Compliance
1988-89	5	2	3	40
1993-94	7	4	3	57
1995-96	7	2	5	29

2019-20	13	8	5	62

2021-22	5	0	5	0
Total	219	144	75	66%

The overall compliance of PAC directives needs to be improved.

2.4.4 Audit Paras

Financial Management

2.4.4.1 Non-recovery of outstanding amount along with late payment surcharge from customers - Rs 138,807.988 million

According to terms of agreements executed between PSO and buyers of petroleum products, “buyers are liable to clear invoices within the prescribed period and in the case of failure of making payment LPS will also be imposed at the rate of KIBOR plus 2% to 4%.” Further, according to Credit Cards Policy of the PSO, “due date of payment of dues is 15th of each month for sole proprietors and 25th for Private, Public Ltd. companies and Government accounts.”

During audit of PSO for the FY 2022-23, it was observed that PSO trade debts due from various consumers i.e. GENCO, SNGPL, PIA, K-Electric, SSGC and Pakistan Railway etc. stood at Rs 493,115.158 million as on June 30, 2023. From this amount only Rs 1,6705.992 million was secured by way of security deposits and bank guarantees. Due to failure in timely recovery of receivables, PSO had to rely on borrowing which resulted in increase in payment of financial cost up to Rs 40,335 million for the FY 2023.

Audit was of the view that weak financial management put the organization at increased risk of default in payment to the suppliers.

The matter was reported to the management in September, 2023. The management in its reply dated December 29, 2023 reported recovery of Rs 354,307.17 million which was verified by Audit while balance amount of Rs 138,807.988 million was reported to be under recovery. Audit contended that management should take up the matter with Petroleum Division to resolve the issue of circular debt in order to mitigate the risk of default.

The DAC in its meeting held on January 17, 2024 reduced the para to the extent of recovered and verified amount and directed the management to pursue the remaining cases for early recovery. No further progress was reported till finalization of the report.

Audit recommends to make strenuous efforts for early recovery of outstanding amount.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2021-22 and 2022-23 vide para numbers 2.4.4.1 & 2.4.4.1 respectively having financial impact of Rs 13,375.77 million and Rs 33,871.18 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2461, 2467 & 2447(P)]

2.4.4.2 Non-deposit of unclaimed dividend in Federal Government account - Rs 1,561.242

According to Section 244 of the Companies Act, 2017, “where dividend has been declared by a company which remain unclaimed or unpaid for a period of three years from the date it is due and payable, the company shall give ninety days notices to the shareholders to file claim following by final notice to be published in two daily newspapers of which one will be in Urdu and one in English having wide circulation. If no claim is made before the company by the shareholder, the company shall deposit the unclaimed or unpaid amount to the credit of the Federal Government.”

During audit of PSO for the FY 2022-23, it was observed that the company reflected unclaimed dividend of Rs 1,561.242 million in its financial statements. However, the company did not deposit the unclaimed dividend in the Federal Government treasury in violation of above provision. This resulted in non-deposit of unclaimed dividend of Rs 1,561.242 million.

Audit was of the view that the company did not take appropriate action in compliance with Section 244 of the Companies Act, 2017.

The matter was reported to the management in September, 2023. The management in its reply dated December 29, 2023 stated that a profit bearing account with SBP / NBP was required for such deposit which had not been notified by SECP, so unclaimed dividend could not be deposited. Further, PSO had sought advice from chairman SECP vide letter dated February 21, 2023 for guidance in this regard and reply was awaited.

The DAC in its meeting held on January 17, 2024 directed the management to pursue the case with SECP. No further progress was reported till finalization of the report.

Audit recommends to pursue the matter with SECP vigorously and transfer the unclaimed amount to the credit of the Federal Government.

[DP No. 2462]

Procurement Related Issues

2.4.4.3 Award of contract at 69% higher than estimate - Rs 1,727.889 million

According to Section 4 of PPRA Rules, 2004, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical.”

During audit of PSO for the FY 2022-23, it was observed that the management awarded a contract to M/s Mepsanic for supply, installation, and maintenance of Dispensing Units for PSO retail outlets, for Rs 1,727.889 million. This bid exceeded the estimated value

of Rs 1,021.246 million by 69%. It was also observed that in 08 other cases, bids exceeding by less margins (18% to 42% of the estimated value) were rejected and retendering was initiated. However, in the instant case, the management awarded the contract for Rs 1,727.889 million to a bidder whose bid was 69% higher than the estimated cost.

Audit was of the view that award of contract at an exorbitant price was uneconomical.

The matter was reported to management in October 2023. The management in its reply dated December 29, 2023 stated that the difference between estimated cost and the awarded contract was due to fluctuation in US dollar rate and uncertain market conditions while equipment was directly associated with supply chain and re-tendering may have attracted even higher bid. The reply was not tenable as the analysis of acceptance of different bids by PSO revealed that there were no set criteria for comparison of bids with the estimates beyond which the case could be accepted or rejected. It is also pointed out that the time frame for which the estimate should remain valid has not been specified by PSO.

The DAC in its meeting held on January 17, 2024 directed the management to submit detailed revised reply to Audit justifying award of contract in excess of 69% of the estimate. No further progress was reported till finalization of the report.

Audit recommends that the company devise a criterion for validity period of their estimates and also fix a percentage of estimates beyond which the bid should not be accepted.

[DP No. 2440]

2.4.4.4 Irregular award of contracts - Rs 449.680 million

According to Rule 38 of PPRA Rules, 2004, “the bidder with the most advantageous bid, if not in conflict with any other law, rules, regulations or policy of the Federal Government, shall be awarded the procurement contract, within the original or extended period of bid validity.”

During audit of PSO for the FY 2022-23, it was observed that in 03 cases, the management inserted such conditions in the bidding documents which were against the spirit of competitive bidding. For instance, in one case, the bidders were restricted up to only one region despite his being lowest in two regions. In another case, the condition was inserted which stated that top three bidders would be awarded the contract, instead of most advantageous bidder. In third case, the contract was awarded through split on 60:40 ratio between the first and second lowest bidders. These actions resulted in a cumulative loss of Rs 3.630 million and irregular award of contracts for Rs 449.680 million.

Audit was of the view that insertion of such conditions which were against the spirit of PPRA Rules 2004 resulted in irregular award of contract for Rs 449.680 million.

The matter was reported to the management in September, 2023. The management in its reply dated December 29, 2023 stated that the contracts were awarded in accordance with Rule 29 of PPRA Rules 2004. The reply was not acceptable as Rule 29 envisaged that “failure to provide for an unambiguous evaluation criterion in the bidding documents shall amount to mis-procurement” and as these conditions were against the spirit of Rule 29, hence, the contracts were not awarded to the most advantageous bidders.

The DAC in its meeting held on January 17, 2024 directed the management to take up the matter with PPRA for clarification.

During verification dated January 22, 2024 the management informed that matter had been taken up with PPRA for clarification vide letter dated January 24, 2024. No further progress was reported till finalization of the report.

Audit recommends that PSO must ensure compliance of PPRA Rules in letter and spirit to safeguard interest of the company as well as the bidder.

[DP Nos. 2429 & 2431]

2.4.4.5 Issuance of second purchase order despite submission of forged documents by the vendor - Rs 16.900 million

According to Rule 4 of the PPRA Rules 2004, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical”. Further, according to Rule 10(1) of Rules ibid, “the procuring agency shall allow the widest possible competition by defining such specifications that shall not favour any single contractor or supplier nor put others at a disadvantage”.

During audit of PSO for the FY 2022-23, it was observed that M/s New Khalid Enterprises was awarded a contract for supply of tyres amounting to Rs 9.580 million. 92 out of 97 delivered tyres were not as per specifications but the vendor failed to replace the same. Later on, the management noticed that vendor had submitted forged documents in bidding process. Instead of initiating blacklisting proceeding, another purchase order, valuing Rs 16.900 million for supply of tyres was issued to him on September 09, 2022. This raised questions about the process of vendor evaluation, non-blacklisting and justification for issuing a new purchase order for Rs 16.900 million.

Audit was of the view that flawed technical evaluation resulted in award of second contract to a bidder who had already submitted forged document and failed to supply specified tyres.

The matter was reported to the management in September, 2023. The management in its reply dated December 29, 2023 stated that second purchase order was issued on September 9, 2022 prior to the blacklisting of supplier. Audit contended that on August 1, 2022, the vendor agreed to collect the off-spec tyres from locations while the other purchase order was issued to him on September 09, 2022 i.e. 40 days later while it was in knowledge of the management that the vendor has supplied off-spec tyres.

The DAC in its meeting held on January 17, 2024 directed the management to conduct fact-finding inquiry and share report to Audit within one month. No further progress was reported till finalization of the report.

Audit recommends to investigate the matter and share report besides fixing responsibility on the person(s) at fault.

[DP No. 2439]

2.4.4.6 Inefficient procurement process of PSO

According to Rule 4 of PPRA Rules, 2004, “procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical.”

During audit of PSO for the FY 2022-23, it was observed that the procurement process at PSO was not efficient. Delays were noticed in procurement process resulting in escalation of cost. For instance, one case was delayed by 03 years relating to procurement of Cathodic Protective (CP) system for pipelines. Cost of the procurement was enhanced from Rs 32.049 million to Rs 55.055 million due to delay. In another case relating to procurement of Rehabilitation of Tank at Sihala, delay in procurement resulted in enhancement of cost by 43.6% from Rs 28.876 million to Rs 41.48 million.

Another issue relating to inefficient procurement was that of change in conditions in bidding documents after opening of bids. A procurement case of Rehabilitation of Vertical Storage Tank was tendered three time. During second tendering, condition of construction experience mentioned in bidding documents was relaxed from 1000KL to 500KL capacity in the last five years. Resultantly, the bidder, who failed in first bid, was awarded the contract in third time bidding for Rs 22.805 million against an estimate of Rs 17.405 million. Another contractor was allowed to make changes in quoted rate after

opening of financial bids against the PPRA Rules. Resultantly, after change of rate of quoted bid, the bidder became the lowest and got the contract for Rs 40.470 million.

In case of procurement of sealing services at Kemari terminals, the conditions for qualification of bidders were frequently changed over different tenders for the same nature of job. Condition of time period without fatal accident was changed from 10 years to 5 years and then again to 2 years in different tenders. Resultantly, a bidder, rejected in one case, won two other cases of Rs 26.879 million.

Audit also noted that estimates were not prepared with proper care and diligence. Unusual bid offers ranging from 58% lower to 69% higher than estimates were received leaving question mark on estimated value.

Audit was of the view that delayed procurement, permission to change in rate after opening of financial bids and award of contracts to a non-compliant bidder occurred due to inefficient procurement process within the organization.

The matter was reported to the management in October, 2023. The management in its reply dated December 29, 2023, stated various reasons for discrepancies. Audit contended that the procurement process lacked consistency leaving room for arbitrary decisions. Further, changing the conditions of bid at a later stage created the issue of transparency.

The DAC in its meeting held on January 17, 2024 directed the management to submit revised reply with reference to delay in the procurement process. In case of change of bid, management was directed to get the matter regularized from the Board. While in another case, DAC directed to investigate the application of inconsistent technical evaluation criteria resulting in awarding of two contracts to a non-compliant bidder and to fix the responsibility on the person(s) at fault. No further progress was reported till finalization of the report.

Audit recommends to probe the matter in order to identify persons at fault besides providing complete record for verification. Audit also recommends a thorough analysis of the procurement process to identify loopholes and take steps for their redressal.

[DP Nos. 2430, 2435, 2449 & 2466]

Non-recovery of dues

2.4.4.7 Non-recovery of LNG cost from SNGPL - Rs 186.500 million

According to Section 5(5)(a) of Public Sector (Corporate Governance) Rules, 2013, “the principle of probity and propriety entails that company’s assets and resources are not used for private advantage and due economy is exercised so as to reduce wastage.”

During audit of PSO for the FY 2022-23, it was observed that SNGPL had withheld an amount of Rs 186.500 million from the payment of LNG claiming that the quantity of LNG received was less by 191,128 MMBTU than the quantity invoiced. The issue pertained to first five cargos of LNG received in 2015. However, the management of PSO could not get the issue resolved despite lapse of considerable time. This resulted in non-recovery of Rs 186.500 million from SNGPL.

Audit was of the view that the management's shortcoming in actively addressing and resolving challenges with SNGPL ultimately lead to financial loss.

The matter was reported to the management in October 2023. The management in its reply dated December 29, 2023 stated that the matter was pending with OGRA.

The DAC in its meeting held on January 17, 2024 directed the management to pursue the matter with OGRA. No further progress was reported till finalization of the report.

Audit recommends to pursue the matter of withheld amount with OGRA vigorously.

[DP No. 2447(P)]

Others

2.4.4.8 *Blockage of funds due to excess import of HSFO than quota allowed by OGRA - Rs 10,164.000 million*

According to Rule 37 of Pakistan Oil Refining, Blending, Transportation, Storage and Marketing Rules, 2016 “every oil marketing company shall maintain such minimum stocks of petroleum products as the Federal Government may, from time to time, by order in writing specify.” Accordingly, OGRA holds periodical product review meetings wherein it, keeping in view the stock position of POL products in the country, fixes quota of POL products to be imported by the OMCs.

During audit of PSO for the FY 2022-23, it was observed that the management exceeded the quota for import of High Sulphur Furnace Oil (HSFO) fixed by OGRA in various monthly product review meetings (PRM) on different occasions. OGRA allowed a cumulative figure of 260,000 M. Ton HSFO to be imported during the FY 2022-23. However, PSO imported a quantity of 469,285 M. Ton of HSFO, exceeding the allocated quantity by 209,285 M. Ton, valued at Rs 29.670 billion. This resulted in a blockage of funds due to excess import of HSFO than quota allowed by OGRA amounting to Rs 29,670 million.

Audit also observed that excessive inventories were being maintained by PSO during the year. Minimum mandatory stock requirement was 20 days average use as decided by ECC dated October 25, 2003. However, the management was maintaining a stock for

194 days cover on June 09, 2023 (409,123 M. Ton of furnace oil) which showed that excessive quantities of fuel were imported without keeping in view the consumption levels and allocations by PRM.

Further, there was a difference of 88,275 M. Ton of between sales figures calculated from inventory and tank-wise sale figures.

Audit was of the view that this ill-planned procurement has not only tied up funds but also put pressure on vital foreign exchange reserves on undue import.

The matter was reported to the management in October, 2023. The management in its reply dated December 29, 2023 stated that the imported HSFO included two cargoes from FY 2022 having quantity 137,589 M. Ton, scheduled for June, 2022 but were offloaded in July, 2022. Audit contended that there was still an excess quantity of 71,695 M. Ton valuing Rs 10,164.000 million. Due to this excess import, no HSFO and LSFO was imported from October, 2022 to June 2023. Moreover, no reply regarding difference between tank-wise sales and inventory sales was provided.

The DAC in its meeting held on January 17, 2024 reduced the para to the extent of verified record by Audit and directed the management to submit relevant record regarding justification for remaining excess procurement to Audit for verification.

During verification dated January 22, 2024 it was revealed that management failed to sale the procured furnace oil as inventory was increasing day by day and accumulated to 409,123 M. Ton with 194 days cover during June 2023. No further progress was reported till finalization of the report.

Audit recommends to justify the reasons for excess import of HSFO, blockage of funds as the company was facing acute shortage of funds and difference between sales figures.

[DP No. 2452]

2.4.4.9 Non-initiation of action against 754 illegal operative outlets resulting in non-imposition of penalty - Rs 7,540.000 million

[According to Rule 69 (1&2) of Pakistan Oil (Refining, Blending, Transportation, Storage and Marketing) Rules, 2016, a person, who contravenes any provisions of the Ordinance, these Rules, terms and conditions of the license, or the decisions of the Authority shall be punishable with fine which may extend to ten million rupees and in case of a continuing contravention with a further fine which may extend to one million rupees for every day during which such contravention continues.

During audit of PSO for the FY 2022-23, it was observed that the management pointed out 754 illegal outlets (Dabba Stations) working in different parts of the country. These outlets were selling POL products, using PSO logo illegally in violation of rules. Sale of POL products by these Dabba Stations under the umbrella of PSO logo not only affected good-will of the company but also had an adverse effect on the government revenue. Additionally, there was no check that the installed machinery and equipment were observing Health, Safety & Environment (HSE) standards posing serious safety hazards to the public life and property. Non-action against these illegal outlets resulted in non-imposition of penalty of Rs 7,540.000 million.

Audit was of the view that due to non-pursuance by the management, punitive action could not be initiated against the illegal outlets through the relevant authorities.

The matter was reported to the management in October, 2023. The management in its reply dated December 29, 2023 stated that those were not PSO outlets but illegal stations against which findings of a research were shared with CM Punjab, CS Punjab, DG Explosives, DG (Oil), and Chairman OGRA for necessary action.

The DAC in its meeting held on January 17, 2024 directed the management to pursue the matter on case to case basis. No further progress was reported till finalization of the report.

Audit recommends to adopt appropriate measures to get these petrol pumps closed permanently by taking up the matter with the concerned authorities including imposition of penalty. The management may also engage the Principal Accounting Officer in order to coordinate with the relevant provincial authorities.

[DP No. 2474]

2.4.4.10 Loss due to payment of demurrage charges - Rs 1,891.623 million

According to Article VIII (ii) (Demurrage) of General Terms and Conditions for Cost & Freight (C&F) or Cost, Insurance and Freight (CIF) sales of petroleum products agreement between PSO and Kuwait Petroleum Limited (KPC) on February 21, 2019 if the buyer fails to discharge the vessel within the laytime, the buyer shall pay demurrage to the seller, at the rate specified in the agreement.

During audit of PSO for the FY 2022-23, it was observed that the management imported 105 vessels of petroleum products. However, out of these, 57 vessels (i.e., 54%) could not be discharged in time resulting in imposition of demurrage charges of US\$ 6,143,321, equivalent to Rs 1,891.623 million. PSO had to bear a loss in the shape of demurrage charges to the tune of above stated amount.

Audit was of the view that late clearance of the shipments from the port resulted in payment of demurrage charges.

The matter was reported to the management in October, 2023. The management in its reply dated December 29, 2023 stated that more than 50% of the total demurrages were incurred during the first quarter of the FY 2023 due to unexpected flash flooding which resulted in decrease in sales. The reply was not tenable as late discharge of more than half of the vessels showed that management could not make a serious effort to avoid this loss. This also showed that the management was unable to make proper procurement plan in the wake of changing circumstances.

The DAC in its meeting held on January 17, 2024 directed the management to identify the reasons on case to case basis and get it verified from Audit. No further progress was reported till finalization of the report.

Audit recommends to take remedial action for the reduction of payment of demurrages besides fixing responsibility on the person(s) at fault.

[DP No. 2457]

2.4.4.11 Non-settlement of outstanding insurance claims - Rs 37.807 million

According to Section 118(I) of the Insurance Ordinance 2000, “it shall be implied term of every contract of insurance that where payment on a policy issued by an insurer becomes due and the person entitled thereto has complied with all the requirements, including the filing of complete papers, for claiming the payment, the insurer shall, if he fails to make the payment within a period of ninety days from the date on which the payment becomes due or the date on which the claimant complies with the requirements, whichever is later, pay as liquidated damages.”

During audit of PSO for the FY 2022-23, it was observed that in 11 cases, the management submitted insurance claims of Rs 37.807 million to NICL but failed to get the claims settled within stipulated time period. This resulted in non-settlement of outstanding insurance claims of Rs 37.807 million.

Audit was of the view that weak pursuance by the management resulted in non-settlement of outstanding insurance claims.

The matter was reported to the management in October, 2023. The management in its reply dated December 29, 2023 stated that 03 cases involving Rs 1.803 million were approved by NICL, 03 cases of Rs 4.671 million were settled, 04 cases of Rs 4.003 million were under process while one case of Rs 27.33 million was rejected by the NICL arguing that the loss occurred due to leakage

from pipeline which already required maintenance. Audit contended that the payment against approved cases was still pending whereas the reasons for settlement of three cases of Rs 4.671 million was not got verified from Audit. Further, as loss of Rs 27.33 million occurred due to negligence of management, hence, needed action against the person at fault.

The DAC in its meeting held on January 17, 2024 directed the management to get the recovered amount verified from Audit, expedite the recovery of balance amount and share the inquiry report of rejected case. No further progress was reported till finalization of the report.

Audit recommends to take concerted efforts to prioritize the resolution of the matter besides fixing responsibility on the person(s) at fault for rejected case.

[DP No. 2446]

2.4.4.12 Transportation of POL products through 8,523 non-compliant Tank Lorries in violation of Pakistan Oil Rules, 2016

According to Rule 53(viii & x) of Pakistan Oil (Refining, Blending, Transportation, Storage and Marketing) Rules, 2016, “all licensees, in relation to their regulated activity, shall carry out regulated activity in accordance with the technical standards (issued by OGRA vide SRO 900(i)/2009 dated October 19, 2009) applicable to the midstream and downstream petroleum industry”.

During audit of PSO for the FY 2022-23, it was observed that out of 12,598 tank lorries (from 466 cartage contractors) used by PSO for transportation of POL products, only 4,075 were compliant with OGRA standards on safety. It means that 8,523 tank lorries used by PSO did not adhere to OGRA’s technical standards.

It was also observed that the integrity tests required to be conducted for storage tanks, were not got conducted by the management leading to doubts about the integrity of these tanks. PSO was maintaining 253 tanks at 54 locations for which integrity tests were not conducted.

Audit was of the view that for safety and security of the general public and PSO personnel it is imperative that all the safety standards and precautionary measures were properly taken care off. By not complying with technical standards, the management puts at risk not only its property but also personnel.

The matter was reported to the management in September, 2023. The management in its reply dated December 29, 2023 stated that 700 tank lorries were delisted but were restored after nation-wide strike and on the directives of Ministry of Energy. Moreover, integrity assessment of both Horizontal and vertical tanks will be completed by the end of

2025 and 2026 respectively. Audit contended that both were critical issues and needed remedial steps for their resolution.

The DAC in its meeting held on January 17, 2024 directed the management to pursue the matter of non-compliant tank lorries with OGRA and to submit follow-up report of integrity test to Audit for verification. No further progress was reported till finalization of the report.

Audit recommends to resolve this long outstanding issue to mitigate the risks associated with non-compliant tank lorries by upgrading the same as per OGRA standards. Moreover, integrity tests of storage tanks may be conducted as per prescribed standards.

Note: The issue was reported earlier also in the Audit Reports for the Audit Years 2021-22 and 2022-23 vide para numbers 2.4.4.15 & 2.4.4.8 where the number of non-compliant tank lorries were 5,534 and 7,203 respectively. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2438 & 2471]

2.4.4.13 Non-observance of Health, Safety and Environment SOPs at PSO depots

According to Clause 9.1 of HSE Manual of PSO, “HSE Department conducts regular Audits of PSO facilities (including depots, installations, BM Offices, Lubricant Storage & Manufacturing Terminals and Aviation Stations) on a regular basis. The objective of HSE audit is to inspect the location, measure HSE awareness of the office staff, evaluate HSE standards being maintained at the facility and to identify areas for improvement and dig out opportunities through which the facility would be brought up to a level where safe and healthy working environment would be created for the workforce.”

During audit of PSO for the FY 2022-23, it was observed that internal audit department of PSO pointed out a number of deviations of SOPs with regard to Health, Safety, and Environment (HSE) at three locations (Chitral, PSO S/S 70 Globe, and Kotlajam Depots). These deviations, such as absence of an HSE coordinator and lack of necessary equipment, unavailability of a foam injection system on the tanks, lack of an oil-water separator at the facility, and failure to conduct integrity testing of the pipeline since its commissioning, pose significant risks. No concrete action was found on record to rectify the above deviations.

Audit was of the view that such non-compliance was a serious matter, reflecting a lack of diligence on the part of the HSE Department.

The matter was reported to the management in October, 2023. The management in its reply dated December 29, 2023 stated that upgradation of firefighting system was under process, provision of foam injection system on the tanks at Kotlajam Depot and Chitral

would be conducted in FY 2025 and FY 2026 respectively. For Kotlajam & Chitral depots, HR has been requested to replenish staff through hiring. At Globe PSO service station, actions have been taken by removal of CNG spreaders from site, shifting of Dispensing Units from the site to depot and initiation of process for replacement of leaky tank. While the spilled quantity was almost fully retrieved & faulty valve was also rectified and reprimand letters were served to all the concerned officials.

The DAC in its meeting held on January 17, 2024 directed the management to comply with the HSE SOPs. No further progress was reported till finalization of the report.

Audit recommends to fix responsibility for such non observance of HSE SOPs and promptly address the identified deficiencies.

[DP No. 2469]

2.5 Sui Northern Gas Pipelines Limited

2.5.1(A) Introduction

Sui Northern Gas Pipelines Limited (SNGPL) was incorporated as a private limited company in 1963 and was converted into a public limited company in January, 1964 under the Companies Act, 1913 (now Companies Act, 2017). The company is listed in Pakistan Stock Exchange Limited and deals with the business of purchase, transmission and distribution of natural gas. Direct and indirect shareholding of GoP is more than 57.96% with direct shareholding of GoP 31.68%. SNGPL is largest gas company in Pakistan having 7.559 million consumers and an extensive network of pipeline of 155,379 KMs in Punjab, Khyber Pakhtunkhwa and Azad Jammu & Kashmir.

Overall compliance of PAC directives was not satisfactory which needs immediate attention of the Principal Accounting Officer.

2.5.4 Audit Paras

UFG Related Issues

2.5.4.1 Loss due to UFG beyond permissible limit and loose control on SMSs - Rs 2,413.780 million

According to Clause 09 of UFG Manual, “it is responsibility of UFG Control Department to identify the grey areas on the basis of monthly SMS / regions-wise gas sales reconciliation reports. Areas with high percentage loss should be focused to have proper control over UFG losses.” Further, according to Clause 21.1 of the License of SNGPL issued by OGRA, “the licensee shall take all possible steps to keep the UFG within acceptable limits, which was 6.99% in DFRR 2021-22.”

During audit of SNGPL for the FY 2022-23, it was observed that SNGPL suffered UFG losses amounting to Rs 18,650.531 million (8.06%) against the allowable limit by OGRA of Rs 16,236.751 million (6.98%) during the FY 2021-22. Consequently, the company had to bear difference of allowable and actual UFG losses amounting to Rs 2,413.780 million. It was also observed that 22 SMSs contributed heavily, ranging from 8.93% to 100%, in total UFG losses of Rs 18,650.531 million. These 22 SMS caused loss of 11,426.648 MMCF of gas amounting to Rs 7,325.630 million. The management failed to arrest UFG losses as per allowable limits of OGRA and could not control UFG losses on 22 highlighted SMSs.

Audit was of the view that ineffective implementation of UFG reduction plan resulted in loss on 22 SMSs inflicting financial burden of Rs 2,413.780 million on SNGPL.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that due to continuous UFG control efforts by the company, UFG was reduced to great extent during FY 2021-22 as compared to FY 2020-21. The company was making continuous efforts to control UFG losses by carrying out leakage control, theft control program and resolving measurement errors. SMSs having higher losses were being monitored regularly and flows / pressures were optimally regulated as per consumption pattern to reduce UFG losses, besides other UFG control activities.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to enhance efforts to comply with the bench mark set by OGRA. DAC further directed to submit SMS wise detail report to Audit. No further progress was reported till finalization of the report.

Audit recommends to take tangible measures to bring UFG losses on identified SMSs within allowable limit of OGRA.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 and 2018-19 vide para numbers 2.5.4.1, 2.5.4.5, 2.5.6.2, 2.5.6.15 and 2.5.4.6 having financial impact of Rs 8,241.140 million, 13,657.150 million and Rs 10.698 million, Rs 16,302.596 million and Rs 10,445.485 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2789 & 2695]

2.5.4.2 Non-realization of gas pilferage charges along with LPS - Rs 286.861 million

According to the Para 10.1 read with Para 11.6.2 of Billing Manual, “GM (Billing) is responsible to ensure collection of company’s gas bills in respect of all categories of consumers. Further, as per Clause(e) of OGRA’s letter dated August 16, 2005 regarding procedure for dealing with theft of Gas cases, “the direct tapping including ‘self-reconnecting / connection cases shall be checked by company’s vigilance team on receipt of any information, preferably in association with a magistrate or judicial officer and police / army / paramilitary personnel’.”

During audit of SNGPL for the FY 2022-23, it was observed that the management detected 28 gas pilferage cases of various consumers which were using direct tapping, bypass connection, domestic connections used for commercial purpose, meter tempering and fake meter installation etc. Regional Detection and Evaluation Committees rejected application of these 28 consumers but the management failed to recover the amount of gas pilferage and LPS amounting to Rs 547.340 million.

Audit was of the view that weak recovery mechanism resulted in non-realization of gas pilferage charges and LPS.

The matter was reported to the management in September & October, 2023. The management in its reply dated December 27, 2023 stated that Rs 260.479 million was recovered and Rs 286.861 million was sub-judice in Gas Utility Court, Multan. The company was making efforts to liquidate the outstanding dues from the defaulting consumers.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to pursue the court cases vigorously and reduce the para to the extent of recovered and verified amount of Rs 260.479 million. No further progress was reported till finalization of the report.

Audit recommends to pursue the court case for early recovery besides ensuring recovery of remaining outstanding amount.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21 and 2018-19 vide para numbers 2.5.4.2, 2.5.4.8, 2.5.6.3 and 2.5.4.3

having financial impact of Rs 448.190 million, Rs 350.356 million, Rs 2,170.656 million, and Rs 5,866.762 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2673 & 2700]

Receivables Management

2.5.4.3 Non-recovery of cost of RLNG from SSGC - Rs 69,166.000 million

According to Sections 3 and 4(4) of Natural Gas Regulated Third Party Access (TPA) Rules, 2012 read with Clause No.7.1(a) of GTA executed between SNGPL and SSGC, “transportation service consists of taking delivery of the gas available by a shipper at one or more entry points along with the gas pipeline transportation system and delivering an equivalent quality of gas to shipper.” Further, according to Clause 7.6(v) of Rule *ibid*, “in no event shall SSGC be entitled to utilize the RLNG in the RLNG pipeline for delivery thereof to its other customers except with the prior written permission of SNGPL.”

During audit of SNGPL for the FY 2022-23, it was observed that SSGC delivered less RLNG than it received at its terminal. RLNG amounting to Rs 69,166 million was consumed by SSGC up to FY 2022-23 without intimating any demand to SNGPL. This resulted in non-recovery of cost of RLNG from SSGC amounting to Rs 69,166.000 million.

Audit was of the view that weak financial management resulted in non-recovery of cost of RLNG from SSGC.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that as per SSGC’s point of view, they withheld these amounts against volume handling loss claim and this claim would likely to be resolved after report of Consultants / Auditors appointed by OGRA. During FY 2022-23 SNGPL had issued invoices for Rs 102,321 million against RLNG withheld by SSGC and SSGC paid Rs 95,975 million there against. Audit required sharing the break up / aging of Rs 69,166 million from SSGC and report of 3rd party auditor appointed by OGRA.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to pursue the matter with OGRA for early finalization of 3rd party audit and resolve the issue. No further progress was reported till finalization of the report.

Audit recommends to pursue OGRA for early finalization of 3rd party audit and expedite recovery of RLNG cost from SSGC.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23, vide para number 2.5.4.4 having financial impact of Rs 47,524 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2712]

2.5.4.4 Non-recovery of outstanding gas charges from Power Sector - Rs 20,575.000 million

According to Clauses 3.13 & 3.14 of Billing Manual of SNGPL, “timely / maximum recovery of gas dues shall be arranged from all categories of consumers. Special attention was to be paid to recover gas dues from big industrial and general industrial consumers which contribute the major share of sales revenue. Billing Department shall forward lists of industrial / bulk supply / special domestic defaulters to Distribution Department for disconnection purposes every month.” Further, according to Clause 3.17 of Billing Manual, “security from disconnected consumers (all categories) should be deposited before re-connecting their gas supply.”

During audit of SNGPL for the FY 2022-23, it was observed that management failed to recover outstanding amount of gas charges from the 09 consumers of power sector. This resulted in non-recovery of outstanding gas charges of Rs 125,114.000 million.

Audit was of the view that weak financial management resulted in non-recovery of outstanding amount.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that an amount of Rs 104,539.000 million was recovered and remaining amount was under litigation / arbitration or related to circular debt.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to pursue the court case vigorously and get the recovered amount of Rs 6,600.000 million verified from Audit within 03 days. DAC reduced the para to the extent of recovered and verified amount of Rs 104,539.000 million. No further progress was reported till finalization of the report.

Audit recommends to get the recovered amount verified and pursue the court cases vigorously.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, vide para numbers 2.5.4.5, 2.5.6.19 and 2.5.6.5 having financial impact of Rs 23,322 million, 12,902.220 million and Rs 54,532 million, respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2691]

2.5.4.5 Non-recovery of subsidy on supply of gas to fertilizer companies - Rs 19,685.898 million

According to the ECC decision in case No. ECC-96/12/2022 dated March 30, 2022 ratified by the Federal Cabinet in case No.155/Rule-19/2022 dated April 02, 2022, “subsidized gas / RLNG shall be provided by SNGPL to M/s Fatima Fertilizer and Agritech”.

During audit of SNGPL for the FY 2022-23, it was observed that SNGPL management provided subsidized gas of Rs 14,885.424 million and Rs 19,470.571 million to two urea fertilizer plants in Punjab namely Fatima Fertilizer, Sheikhpura and Agritech, Mianwali respectively, aggregating to Rs 34,355.995 million from July, 2022 to January, 2023. The Government paid an amount of Rs 8,296.274 million to SNGPL as subsidy while Rs 26,059.721 million was still recoverable from Government. An amount of LPS of Rs 3,626.176 million was also recoverable for the period from July, 2022 to January, 2023. This resulted in non-recovery of subsidized gas including LPS amounting to Rs 29,685.898 million.

Audit was of the view that weak financial management resulted in non-recovery of subsidized amount.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that Rs 10.000 billion was recovered and efforts were made to recover the remaining amount.

The DAC in its meeting held on January 18 & 19, 2024, reduced the para to the extent of recovered and verified amount of Rs 10.000 billion. DAC directed the management to reconcile and expedite the recovery of balance outstanding amount. No further progress was reported till finalization of the report.

Audit recommends to take up the matter with Finance Division through Petroleum Division for early recovery of subsidy amount.

[DP No. 2703]

2.5.4.6 Non-realization of gas charges and security shortfall from defaulters - Rs 3,181.293 million

According to the Para 10.1 read with Para 11.6.3 (ii), 13.1 and 13.2 of Billing Manual, it will be the responsibility of GM (Billing) to ensure collection of company’s gas bills in respect of all categories of consumers and it will also be ensured that all industrial,

commercial and domestic consumers, whose bills exceed the security deposit, are disconnected immediately.

During audit of SNGPL for the FY 2022-23, it was observed that in 158 cases the management disconnected domestic, commercial and industrial connections due to non-payment of gas charges including GIDC, Sales Tax, and RLNG tariff adjustment charges etc. amounting to Rs 2,728.907 million. Further, in 177 cases security shortfall had not been recovered from CNG sector consumers of Rs 540.640 million. This resulted in non-realization of gas charges and security shortfall of Rs 3,269.547 million.

Audit was of the view that weak internal controls resulted in non-realization of gas charges along with RLNG tariff adjustment charges, GIDC, and Sales Tax etc.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that an amount of Rs 88.254 million was recovered from 04 industrial consumers while remaining cases were under litigation.

The DAC in its meeting held on January 18 & 19, 2024, reduced the amount in para to the extent of recovered and verified amount of Rs 88.254 million. DAC further directed the management to provide the detail of recovery and pursue the court cases vigorously besides providing copy of stay orders of Khyber Pakhtunkhwa CNG Association to Audit. No further progress was reported till finalization of the report.

Audit recommends to pursue the court cases and intimate the outcome to Audit.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23, 2021-22, 2020-21, 2019-20 and 2018-19 vide para numbers 2.5.4.6, 2.5.4.13, 2.5.6.4, 2.5.6.16 and 2.5.4.4 having financial impact of Rs 13,749.590, Rs 13,474.270 million Rs 86,146.550 million, Rs 58,049.650 million and Rs 18,252.320 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2683, 2686 & 2706]

2.5.4.7 *Loss due to late submission of information for encashment of bank guarantee - Rs 20.000 million*

According to terms and conditions of Bank Guarantee dated January 06, 2021, “guarantee shall remain in full force and affect for a period of two years. Claim, if any must be lodged with us before the expiry two months from the last mentioned date. That is to say claim must be lodged before January 04, 2016 failing which we shall be absolved of our liability whether or not you have suffered any loss”. Further, according to Clause 3.11 of Billing Manual of SNGPL, “timely / maximum recovery of gas dues from all categories of consumer is required to be arranged. Special attention is to be paid to recover gas dues from

big industrial and general industrial consumers which contribute major share of our sales revenue.”

During audit of SNGPL for the FY 2022-23 it was observed that management disconnected connection of M/s Fatima Enterprises due to non-payment of gas charges of Rs 47.100 million. The consumer filed writ petition on December 29, 2015 in the Lahore High Court Multan Bench which was dismissed with the direction “to en-cash bank guarantee and kept it as security of the installed meter and no disconnection of meter be made on account of security deposited”. The management was required to inform MCB for encashment of bank guarantee on or before January 04, 2016 but MCB was informed on January 12, 2016, therefore, MCB refused to en-cash the bank guarantee. The management filed a court case in the court of senior Civil Judge Multan which was pending. This resulted in loss of Rs 20.000 million due to late submission of information for encashment of bank guarantee.

Audit was of the view that slackness on the part of management resulted in loss of security deposit.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that the matter was in the court of Senior Civil Judge, Multan.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to pursue the court case vigorously. No further progress was reported till finalization of this draft para.

Audit recommends to conduct a fact-finding inquiry against the responsible for delay in submission of information to bank for encashment of bank guarantee and pursue the court case.

[DP No. 2685]

Assets Management

2.5.4.8 Failure to defend title of physically possessed Wah Transmission Store Land and Rent demand - Rs 352.800 million

According to Section 5(5)(a) of Public Sector (Corporate Governance) Rules, 2013, “the principle of probity and propriety entails that company’s assets and resources are not used for private advantage and due economy is exercised so as to reduce wastage.”

During audit of SNGPL for the FY 2022-23 it was observed that management purchased 12 Kanal land for Wah Transmission Store. The sale agreements were duly

registered with Registrar and got the land mutated on September 06, 1983. SNGPL received a legal notice for rent of Rs 352.800 million from 1985 to 2017 to be paid to petitioner who filed petition before Honourable, Lahore High Court, Rawalpindi Bench regarding encroachment by SNGPL on his legally owned land. As referred by the Honourable Lahore High Court Rawalpindi Bench, DC, Rawalpindi decided that SNGPL encroached the land since inception to date. As per orders issued by DC Rawalpindi, management of SNGPL did not submit any written reply in its support. This resulted in failure to defend the title of land of Wah Transmission Store before DC and rent demand of Rs 352.800 million by the petitioner.

Audit was of the view that weak asset management resulted in failure to defend the title of possessed Wah Transmission Land.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that impugned order issued by DC Rawalpindi had been challenged before the Lahore High Court, Rawalpindi Bench.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to pursue the court case vigorously. No further progress was reported till finalization of this draft para.

Audit recommends to pursue the case vigorously besides fixing responsibility on persons at fault.

[DP No. 2707]

2.5.4.9 Loss due to theft of gas pipe - Rs 90.000 million

According to Clause 4.3.5 of Store Manual of SNGPL, “every Store In charge will ensure that the material stacked in the pacing / cartons / crates / pallets is checked at regular intervals and in re-stacked at least once a year, so as to eliminate the chances of any material theft or misappropriation going unnoticed for a long period of time. The Store In charge will maintain record of such activity and submit completion report to GM (Stores).”

During audit of SNGPL for the FY 2022-23, it was observed that management carried out stock-taking on October 19, 2023 at Manga Store and found that 44,742 meters MS Pipe of 2” dia worth Rs 90.000 million had been stolen from Manga Store. This resulted in loss of Rs 90.000 million.

Audit was of the view that weak internal controls resulted in loss due to theft of gas pipe.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that the estimated loss of theft had been calculated

at Rs 380.000 million and matter was referred to FIA for investigation. Further, in order to determine the exact amount of loss multiple actions were taken immediately i.e. fact-finding enquiry and physical stock-taking.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to finalize the disciplinary proceedings against responsible besides pursuance of the case with FIA and Police for early conclusion of investigation and share the outcomes with Audit. DAC further directed to share the stock-taking and Internal Audit report for verification by Audit. No further progress was reported till finalization of the report.

Audit recommends to inquire the matter at Ministry level besides recovering the loss from the persons at fault.

[DP No. 2674]

Project Management

2.5.4.10 Non-completion of gas development jobs within stipulated time - Rs 7,499.132 million

According to budget instruction for the FYs 2020-21 for carrying out capital and revenue jobs, “job holder (head of project / distribution department) will be responsible for timely completion of jobs within stipulated period specified in job approval document. Further, according to Para 13 of Cabinet Division’s Development Wing Notification No. F.7 (2)(Dev)/2016 dated October 10, 2016, “the executing agencies shall ensure that the schemes are completed within the same year and the approved cost.”

During audit of SNGPL for FY 2022-23, it was observed that 139 development jobs costing Rs 7,499.132 million were in process during FY 2022-23. The required finances were already sanctioned and material was also issued to these jobs but these jobs could not be completed within same year. This resulted in non-completion of jobs having cost estimate of Rs 7,499.132 million.

Audit was of the view that poor project management, resulted in non-completion of jobs in time.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that the jobs could not be completed due to certain reasons like NOCs from NHA Railway, shortage of material, political constraints etc.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to submit revised reply with job wise details for verification of Audit. No further progress was reported till finalization of this draft para.

Audit recommends to ensure expeditious completion of jobs.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 and 2018-19 vide para number 2.5.4.8, 2.5.4.22, 2.5.6.34 and 2.5.4.7 having financial impact of Rs 15,030.490 million, Rs 18,383 million, Rs 28,394, 18,639 million and Rs 17,397 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2714]

2.5.4.11 Non-initiation of jobs due to non-arrangement of NOCs - Rs 1,728.809 million

According to Para 3.1 of Project Manual of SNGPL, “Land Section is required to arrange permissions / No Objection Certificates (NOCs) from outside agencies for pipeline crossings.”

During audit of SNGPL, for the FY 2022-23, it was observed that development / project jobs having sanctioned cost of Rs 1,728.809 million were started during the FY 2021-23. These jobs could not be completed as Lands Department could not arrange NOC for ROW or pipeline crossings from NHA, CDA, Railways or Irrigation department etc. This resulted in non-initiation of jobs of Rs 1,728.809 million.

Audit was of the view that due to weak managerial controls; resulted in no-arrangement of NOCs from other agencies after approval of jobs.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that Lands Department was continuously following the pending crossing matters from outside agencies like NHA, CDA, Railway or Irrigation Department for timely completion of subject jobs.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to pursue the matter with quarters concerned for early resolution. No further progress was reported till finalization of the report.

Audit recommends to arrange NOCs at planning stage and complete the jobs at the earliest.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21, 2019-20 and 2018-19 vide para numbers 2.5.4.8, 2.5.4.22, 2.5.6.10, 2.5.6.34 and 2.5.4.7 having financial impact of Rs 15030.490 million, Rs 18,383 million and Rs 28,394 million, Rs 18,639 million and Rs 17,397 million respectively. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2698]

2.5.4.12 Non-surrendering of savings due to over-estimation of projects - Rs 929.138 million

According to DG (Gas) notification dated June 2, 2005, criteria approved by Cabinet Committee on Energy CCE in 1992, was subsequently revised by the ECC of the Cabinet vide decision dated July 15, 2008 for supply of gas to new areas / towns. The portion of funds equal to the requirement over the criteria specified for undertaking the schemes shall be provided by Federal Government whereas cost within criteria shall be borne by company from its own resources.

During audit of SNGPL for the FY 2022-23, it was observed that management prepared cost estimates of 47 jobs on the basis of survey conducted and unit construction cost of MS pipe or PE pipes and funds were released to execution departments. The jobs were completed by incurring an expenditure of Rs 728.848 million against estimated cost of Rs 1,657.987 million. This showed that jobs were over-estimated to the tune of Rs 929.138 million due to which these funds could not be assigned to other jobs / schemes. This resulted in blockage of funds due to over-estimation of jobs amounting to Rs 929.138 million.

Audit was of the view that due to over-estimation of cost of jobs, funds of Rs 929.138 million were blocked which could be used for other purposes i.e. gas schemes, rehabilitation jobs, replacement of old network and rectification of leakages etc.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that the projects pertaining to the jobs highlighted in the audit para were at different stages of completion. The management contended that savings would be determined after completion of the whole scheme / project as there was likely hood that some jobs of the same scheme may exceed their original estimates / sanctioned amount.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to provide job wise status of schemes showing budget estimates, actual expenditure incurred, savings thereon and savings surrendered to the Government. No further progress was reported till finalization of the report.

Audit recommends to surrender the savings and implement the decision of DAC.

[DP No. 2689]

2.5.4.13 Non-completion of process of mutation of land in favour of company and non-adjustment of advances - Rs 574.256 million

According to Clause 3.2.1 of Project Manual of SNGPL, “award is announced by the Land Acquisition Collector, a copy of which is sent to SNGPL for getting the amount

adjusted against advances of relevant pipeline. After receiving award from Land Acquisition Collector, mutation in favour of company shall be carried out.”

During audit of SNGPL for the FY 2022-23, it was observed that management issued advances of Rs 737.540 million for purchase of land / right of way for various projects out of which Rs 163.284 million was adjusted by having mutation in favour of SNGPL. This resulted in non-completion of process of mutation of land in favour of company and non-adjustment of advances of Rs 574.256 million.

Audit was of the view that due to slackness on the part of management, advances were neither adjusted nor land mutated in favour of the company.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that mutation of awarded land was the responsibility of concerned Revenue Officials to mutate the land in favour of the company. However, the management was continuously following the mutation of acquired land with concerned Revenue Officials.

The DAC in its meeting held on January 18 & 19, 2024 observed that the company was showing laxity in resolution of this issue. DAC directed the management to identify the hurdles in the process and resolve these as early as possible. No further progress was reported till finalization of the report.

Audit recommends to ensure adjustment of advances besides completing the process of mutation of land as early as possible in favour of company.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2021-22, 2020-21 and 2018-19 vide Para No. 2.5.4.12, 2.5.4.27, 2.5.6.14 and 2.5.4.25 of Rs 337.492 million, of Rs 743.227 million and of Rs 302.150 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2709]

2.5.4.14 Non-completion of cost sharing gas development work jobs within stipulated time - Rs 499.218 million

According to Para 3.2 of budget instruction for the FYs 2018-19 & 2019-20 for carrying out capital and revenue jobs, “job holder (head of project / distribution department) will be responsible for timely completion of jobs within stipulated period specified in job approval document.

During audit of SNGPL for the FY 2022-23, it was observed that 40 cost sharing jobs having sanctioned cost of Rs 499.217 million were started during FYs from 2019-20

to 2022-23. The consumers had already deposited their 100% share in cost estimates in advance. But these jobs were not completed after lapse of period ranging from 01 to 03 years owing to want of material requirement or NOC. This resulted in non-completion of jobs having cost estimates of Rs 499.218 million.

Audit was of the view that due to weak project management, jobs were not completed as per plan.

The matter was reported to the management in September, 2023. The management in its reply dated December 27, 2023 stated that 40 jobs, which pertained to category of 100% cost recovery where network was laid in privately developed localities, 20 jobs pertained to the FY 2022-23, whereas, 10 jobs pertained to FY 2021-22. Out of highlighted jobs, 06 jobs were commissioned, whereas, work on remaining jobs was in progress. In most of the cases, the work was delayed due to requirement of NOCs or non-clearance of sites which was responsibility of the concerned Society.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to submit the job wise details of all 40 schemes along with supporting documents to Audit for verification and take necessary actions for early completion of schemes. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC and get the stated stance verified from Audit besides completing the jobs at the earliest.

[DP No. 2690]

2.5.4.15 Loss at Bannu West Project due to weak internal controls - Rs 213.240 million

According to Rules 7(1) & 2(b) of Public Sector Companies (Corporate Governance) Rules, 2013, the Board shall establish appropriate arrangements to ensure it has access to all relevant information, advice and resources necessary to enable it to carry out its role effectively. Significant issues like internal audit reports, including cases of fraud or major irregularities etc. shall be placed before the Board for its information and consideration, in order to formalize and strengthen the corporate decision-making process.

During audit of SNGPL, for the FY 2022-23, it was observed that certain irregularities / discrepancies were noticed in Banu West Project such as short account of inventory, non-availability of requisite material when needed and irregularities in hiring and payment to casual labour. These irregularities caused loss of 213.240 million.

Audit was of the view that weak internal controls resulted in loss of Rs 213.240 million.

The matter was reported to the management in November, 2023. In DAC meeting held on January 18 & 19, 2024, the management reported that initial inquiry was conducted, the result of which did not address the issue and de-novo inquiry was ordered. Audit contended that initial inquiry be shared with Audit and complete the de-novo inquiry at the earliest.

The DAC directed the management to finalize the de-novo inquiry and share the same with Audit within two months. No further progress was reported till finalization of the report.

Audit recommends to finalize the inquiry at the earliest and share the findings.

[DP No. 2711]

2.5.4.16 Non-recovery of cost overrun from the consumers on account of cost sharing jobs - Rs 74.452 million

According to Para 9.2.2 of Accounting Manual of SNGPL, “the duties and responsibilities of Area Accountant include arranging recovery from consumers after completion of cost sharing jobs.”

During audit of SNGPL for the FY 2022-23, it was observed that 71 consumers requested RLNG connections on 100% cost recovery basis. The management recovered Rs 523.586 million and actual cost of the jobs was Rs 598.038 million. Cost overrun of Rs 74.452 million could not be recovered from the consumers thereby causing a loss of Rs 74.452 million.

Audit was of the view that weak financial management resulted in non-recovery of cost overrun in these jobs.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that certain jobs had not been completed / commissioned. The management would recover the cost before provision of gas connections to the consumers as per prevailing procedure.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to expedite the efforts to recover the amount and share the outcomes with Audit. No further progress was reported till finalization of the report.

Audit recommends to recover the amount from the consumers at the earliest.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide Para No. 2.5.4.17 of Rs 16.200 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2708]

2.5.4.17 Non-refund of savings to consumers in cost sharing jobs - Rs 63.621 million

According to Para 9.2.2 of Accounting Manual of SNGPL, “the duties and responsibilities of Area Accountant include arranging recovery / refund from / to consumers after completion of cost sharing jobs.” Further, OGRA granted SNGPL license on September 03, 2003 to undertake the regulated activities i.e., transmission of natural gas and distribution and sale of natural gas. Furthermore, according to condition No. 5.2 of the Licensee, it is to be ensured the grant of 17.5% return on the value of its average net operating fixed assets for each financial year.

During audit of SNGPL for the FY 2022-23, it was observed that the management completed jobs with actual expenditure of Rs 250.892 million against recovered amount of Rs 314.513 million fetching savings of Rs 63.621 million. However, the management did not refund accrued savings to consumers.

Audit was of the view that weak financial management, resulted in non-refund of savings to consumers.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that audit was based on single job analysis of each consumer, however, it was to be noted that provision of gas connections to consumers involved execution of multiple jobs e.g. Pipeline and TBS. Based on the same premise, savings would be calculated if any.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to reconcile the job wise budget estimates with actual expenditure, incurred and ensure refund the savings to consumers. DAC further directed to improve the system of budgeting of schemes and possibilities of refunds of savings to customers. No further progress was reported till finalization of the report.

Audit recommends to improve job estimation mechanism besides final determination of savings and refund to consumers.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2021-22 vide Para No. 2.5.4.24 of Rs 611.210 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2692]

2.5.4.18 Non-surrender of savings of SDGs completed Job to Government - Rs 28.249 million

According to Para 14 of notification No.F.7(2)(Dev)/2016 dated October 10, 2016, “Guidelines for implementation of the Prime Minister’s Global SDGs Achievement Programme, savings against the schemes completed shall be surrendered immediately on completion of the scheme without waiting for closing of the financial year.”

During audit of SNGPL for the FY 2022-23 it was observed that job No. 19/35/001312 relating to Sustainable Development Goals (SDGs) was started during FY 2018-19 with sanctioned cost of Rs 57.125 million. The job was commissioned and completed on August 04, 2022 with a cost of Rs 28.875 million leaving saving of Rs 28.249 million which was not surrendered to the Federal Government.

Audit was of the view that weak financial management resulted in non-surrender of savings to Government.

The matter was reported to the management in November, 2023. The management in its reply dated December 27, 2023 stated that saving of the project was evaluated after completion of the whole project as there was a possibility that there was a saving in one project while the other job had exceeded the budget. Audit contended that the project may be completed and details of projects along with its savings be shared with Audit. No further progress was reported till finalization of the report.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to expedite the completion of projects and ensure early surrender of savings.

Audit recommends to complete the projects for early final determination and surrender of savings to Government.

[DP No. 2701]

2.5.4.19 Non-recovery of relocation charges from NHA and loss of MS Pipe recoverable from contractor - Rs 11.555 million

According to Para 13 of Cabinet Division’s Development Wing Notification dated October 10, 2016, the executing agencies shall ensure that the schemes are completed within the same year and the approved cost. Further, according to Clause 19 C & 21 of General Terms and Condition of the contract, any loss of material shall be responsibility of the contractors. Furthermore, according to SNGPL Multan Regional officer letter dated August

25, 2020 and dated February 10, 2023, estimated relocation charges of Rs 5.244 million was demanded from NHA.

During audit of SNGPL for the FY 2022-23 it was observed that SNGPL management failed to recover relocation charges from NHA of Rs 5.244 million. Further, the management sustained loss of Rs 6.311 million due to mishandling of MS pipe by the contractors. This resulted in non-recovery of Rs 11.555 million from NHA and the contractor.

Audit was of the view that weak vigilance resulted in non-recovery of loss from the contractors & NHA.

The matter was reported to the management in September, 2023. The management in its reply dated December 27, 2023 stated that the matter of recovery of relocation charges was being taken up with NHA Head office Islamabad. Further, the matter of recovery from contractor would be taken up with tender evaluation committee for resolution of issue. Audit contended that amount was required to be recovered from NHA as well as loss from the contractor.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to pursue the matter with NHA through Petroleum Division for recovery of loss and also resolve the issues with contractor within one month and share the outcomes with Audit. DAC further directed the management to fix the responsibility on the person responsible for not taking back the material from the contractor. No further progress was reported till finalization of the report.

Audit recommends to ensure recovery from NHA and the contractor.

[DP Nos. 2681, 2682, & 2699]

2.5.4.20 Non-preparation of mandatory PC-II

According to Para 1.53 of Manual of Development Projects 2010, issued by Planning Commission, PC-II is required for conducting surveys and feasibility studies, in respect of larger projects. Further, the Ministry of Planning & Commission vide letter No. 1(1)PW/PD/CMO/ Infra/1/PMIC dated March 25, 2020 directed that all projects costing 50 million to 500 million should be based on feasibility studies prepared by the professionals hired by the Ministries/Divisions/executing agencies for respective Project Management Unit / Planning Cell etc. According to Clause 6 of Manual-Projects 2021 issued by Planning Commission, the project is completed or closed when all the funds were utilized and objectives achieved or abandoned for any reason. At this stage, the project must be closed

formally, and reports prepared on its overall performance and results achieved using the PC-IV proforma.

During audit of SNGPL for the FY 2022-23, it was observed that Petroleum Division (DG Gas) did not prepare PC-II for the project “supply of 40 MMCFD Gas to Allama Iqbal Industrial City, Special Economic Zone, Faisalabad” costing Rs 785 million financed by Federal through PSDP. However, PC-1 was approved by DDWP without consideration of feasibility study. As per Manual *ibid*, PC-II was mandatory for project costing Rs 50.000 million to Rs 500.000 million and was required to be approved from DDWP before consideration of PC-1.

Audit was of the view that poor project planning resulted in non-preparation of PC-II, violating guidelines issued by the Planning Commission.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that PC-II was not prepared by SNGPL as no such instructions were given by the Ministry while planning the said project. Now project had been completed with actual cost of Rs 770.516 million against funds released of Rs 785.000 million. Audit contended that savings of Rs 14.484 million be surrendered to the Government immediately besides providing justification for non-preparation of PC-II.

The DAC in its meeting held on January, 18 & 19, 2024 directed the DG (Gas) to come up with reasons for non-preparation of PC-II. DAC further directed the management to pursue the matter with Planning Commission for early approval of PC-IV besides early finalization of accounts with respect to project. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC besides surrendering of savings to the Government.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, vide para number 2.5.4.19. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2710]

Regulatory Affairs

2.5.4.21 Unjustified legal and other expenses due to non-adherence with instructions of Regulator - Rs 131.000 million

According to Rule 17(h) of NGT Rules read with Section 8(1&2) of the OGRA Ordinance, 2002, “tariff should generally be determined taking into account a rate of return

as provided in the license, a prudent operation and maintenance costs, depreciation, Government levies and if applicable financial charges and cost of natural gas.”

During audit of SNGPL for the FY 2022-23 it was observed that management claimed legal expenses of Rs 264.000 million under DFRR for FY 2021-22 but the Regulator allowed only Rs 145 million meaning thereby an amount of Rs 119.000 million was disallowed which included an amount of Rs 61.000 million spent on arbitration. Further, Regulator rejected justification for increase of 40% in legal expenses RERR for the said year. Audit also observed that Rs 12.000 million spent on sponsorship of Chair at various Universities may also be regulated against tangible benchmarks. This resulted in unjustified expenses of Rs 131.000 million.

Audit was of the view that non-compliance with standards set by Regulator resulted in profit loss to the extent of disallowance of legal, professional and other charges by OGRA.

The matter was reported to the management in October, 2023. In its reply dated December 27, 2023, the management stated that despite disallowing by the Regulator, the expenditure incurred was duly approved by the BoD.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to seek clarification from Law Division through Petroleum Division regarding the power of BoD in allowing these expenditures after these had been disallowed by Regulator i.e. OGRA in light of SOE Act, 2023 and Corporate Governance Rules, 2017. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC besides developing benchmarks against sponsorship of Chairs in various Universities.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23, 2020-21 and 2019-20 vide para number No. 2.5.4.24, 2.5.6.19 and 2.5.6.46 having financial impact of Rs 2,237 million, 5,241 million and 1,694 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2704 & 2705]

Procurement Related Issues

2.5.4.22 Un-necessary procurement resulting in blockage of funds - Rs 971.894 million

According to Clause 17.1 of SNGPL Stores Manual, “the Coordinator (PB&MC) will coordinate with the Indenters that minimum number of slow moving and non-moving items remain in the company’s inventory.” Further, according to Clause 17.2.3 of Manual

ibid, “each Indenter will be asked to confirm that quantities being indented by them will be utilized within two years and will not fall in the slow and non-moving category.”

During audit of SNGPL for the FY 2021-22, it was observed that the management unnecessarily procured and maintained stock of non-moving / slow moving items valuing Rs 971.894 million which resulted in blockage of funds.

Audit was of the view that in-efficient inventory management resulted in blockage of funds amounting to Rs 971.894 million in the shape of slow moving and non-moving items.

The matter was reported to the management in June, 2023. The management stated that items of Rs 160.520 million had been issued for utilization, items of Rs 288.690 million were mandatory items whereas age-wise detail of items of Rs 522.680 million of slow and non-moving items was shared. Audit contended that utilization of items of Rs 160.520 million may be got verified from Audit. In case of mandatory items, as per last year audit report of 2022-23, management stated that items of Rs 152 million were mandatory so there was an increase of Rs 136.690 million (47%) in mandatory items which needed to be justified. No plan to dispose of or utilized the remaining items was shared with Audit.

The DAC in its meeting held on September 26, 2023 directed the management to carry out an exercise to identify the items which were required to be retained, utilized or disposed of and provide it to Audit for scrutiny up to December 31, 2023. No further progress was reported till finalization of the report.

Audit recommends to enhance the efficiency of inventory management to avoid accumulation of un-necessary purchase of material.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23, vide para number 2.5.4.29 having financial impact of Rs 368.737 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2365]

***2.5.4.23 Excess payment to M/s Solar Turbine for short-shipment
- Rs 105.637 million***

According to general terms of the contract, “the supplier is required to deliver the items as per delivery schedule from the receipt of purchase order or from the receipt of operative letter of credit. Furthermore, as per general terms to the contract, if the materials, as given in the order have not been dispatched / delivered on time and as per stipulations in the contract, SNGPL shall be entitled to recover 1% or 0.5% as the case may be of the total value of the delayed part of the material for each week of delay, by way of late delivery

charges and not by way of penalty subject to a maximum of 10% of the total value of the delayed part of the material.”

During audit of SNGPL for the FY 2021-22, it was observed that management issued two purchase orders to M/s Solar Turbine Europe UAE for the supply of spares for overhauling of 02 Central Engines (T-40/T-45) and 02 Saturn Engines of US\$ 1,463,438 and US\$ 179,887 respectively. The entire amount was paid by management for purchase orders despite short shipment of US\$ 370,658 equivalent to Rs 105.637 million was made by the supplier.

Audit was of the view that poor contract management resulted in excess payment and non-recovery of short-shipment from the contractor amounting to Rs 105.637 million.

The matter was reported to the management in June, 2023. The management in its reply dated September 22, 2023 stated that on arrival the consignment was burnt in the terrorist attack on June 08, 2014 inviting the Clause relating to force majeure.

The DAC in its meeting held on September 26, 2023 directed the management to recover the amount from supplier.

Audit recommends to recover the amount from supplier.

[DP No 2369]

2.5.4.24 Theft of industrial scrapped meters - Rs 28.762 million

According to Section 5(5)(a) of Public Sector (Corporate Governance) Rules, 2013, “the principle of probity and propriety entails that company’s assets and resources are not used for private advantage and due economy is exercised so as to reduce wastage.” Further, according to Clause 1.3.3 of Accounts Manual, “all insurance matter and claims will be handled by the Accounts department of SNGPL. Moreover, according to clause 1.3.10 of Accounts Manual “it is the duty of CFO to deal with banks and insurance companies regarding problems faced in day-to-day working”.

During audit of SNGPL for the FY 2021-22, it was revealed that 3,500 scrapped industrial meters were dispatched from central meter shop but only 400 meters were received at Manga store. FIR dated November 02, 2022 against certain employees was lodged at Police Station, Quaid-e-Azam, Industrial Area, Lahore. SNGPL management also lodged fidelity insurance claim of Rs 28.762 million with NICL which was pending.

Audit was of the view that weak internal controls resulted in theft of industrial meters.

The matter was reported to the management in June, 2023. The management in its reply dated June 15, 2023 stated that departmental inquiry was under process to probe the matter and FIR had been registered against the concerned official. The management further, informed on December 27, 2023 that initially loss was estimated to Rs 28.762 million and the same was communicated to NICL and accused were also arrested.

The DAC in its meeting held on September 26, 2023 directed the management to finalize the inquiry at the earliest and share the outcome with Audit. DAC in its meeting held on January 18-19, 2024 also directed management to pursue the case with NICL for settlement of claim within one month. DAC further directed to devise a mechanism to strengthen the security checks on stock and pursue the case vigorously. No further progress was reported till finalization of the report.

Audit recommends to conclude the inquiry, recover the loss from the accused at the earliest and share the out comes with Audit and settle the insurance claim with NICL besides devising a mechanism to strengthen the security checks on stock.

[DP Nos. 2377 & 2676]

HR / Employee Related Issues

2.5.4.25 Inaction against illegal network and non-finalization of disciplinary proceedings - Rs 35.427 million

According to Para 110.3 of the SNGPL HR Manual, company encourages all disciplinary issues to be handle as soon as they come in to notice. Where management undertakes disciplinary action, its intention is to ensure that breaches of the Policy in case of under-performance are handled fairly and uniformly and without unnecessary escalation.

During audit of SNGPL for the FY 2022-23, it was observed that management did not finalize disciplinary proceedings against the employees as detailed below:

- i) The management finalized inquiry / fact-finding on August 23, 2022 and issued charge sheet to Executive Accountant Peshawar (D) on December 15, 2022 wherein he was held responsible for wrong posting of suspense account amounts of Rs 29.160 million in the Account ID 6512473000.
- ii) GM (East & West), Lahore planned system rehabilitation program (SRP) for the FY 2021-22 without issuance of work orders and work of pipe laying on these jobs were not carried out till March, 2022. Thus, belated work orders for 48 jobs were issued in March, 2022 without approval and after revision of the rates. The fact-finding enquiry on this matter to carry out detailed investigation in the matter, fix the responsibility and determine the financial loss was still pending. This resulted in loss

due to payment of already work done at revised rates resulted in loss of Rs 6.267 million.

Audit was of the view that inefficient disciplinary mechanism resulted in non-finalization of disciplinary proceedings.

The matter was reported to the management in November, 2023. The management in its reply dated December 27, 2023 stated that inquiry in these cases were pending.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to finalize the inquiries within two months. No further progress was reported till finalization of the report.

Audit recommends to finalize the inquiry proceedings at the earliest.

[DP No. 2790]

Others

2.5.4.26 Inadmissible diversion of RLNG to domestic sector in summer months in violation of Winter Load Management - Rs 53,019.000 million

According to ECC decision dated November 27, 2018, “SNGPL was allowed to inject RLNG volumes for consumption by domestic and commercial consumers”. Further, according ECC decision dated May 11, 2018, “SNGPL and SSGC be allowed to manage gas loads on their system through RLNG-System gas swap mechanism”. Furthermore, Winter Load Management Plan for four months from November, 2022 to February, 2023 was issued by the Federal Government.

During audit of SNGPL for the FY 2022-23, it was observed that SNGPL diverted 17,858,314 MMBTU of RLNG from July, 2022 to October, 2022 and March, 2023 to June, 2023 to domestic and commercial consumers in violation of Gas Load Management Plan. For supply of indigenous gas, first priority was to be given to domestic sector and RLNG was required to be diverted only in case of higher demand than available for supply. SNGPL claimed the differential amount of Rs 53,019.000 million on account of diversion of RLNG in summer months.

Audit was of the view that Winter Load Management was meant for the months of November to February each year and diversion of RLNG to domestic and commercial consumers in other months did not come under the ambit of Winter Load Management and required specific approval of the competent authority.

The matter was reported to the management in November, 2023. The management in its reply dated December 27, 2023 stated that pursuant to GoP directions, SNGPL was obligated to supply blend of system gas and RLNG to 5 export oriented industrial sectors.

SNGPL informed MoE (Petroleum Division) that RLNG was being diverted as system gas for 09 to 10 months in a year. SNGPL was obligated to provide system gas to the consumers of Khyber Pakhtunkhwa, however, owing to insufficient gas even in summers months, RLNG had to be diverted to domestic consumers to meet the demand of high priority sector. The reply was not tenable as selling of RLNG gas as system gas during the months of summer did not come under the ambit of Winter Load Management.

The DAC in its meeting held on January 18 & 19, 2024 directed the management to submit the comprehensive reply regarding the matter for verification of Audit along with relevant record. No further progress was reported till finalization of the report.

Audit recommends to provide the approval of competent forum for diversion of RLNG gas as system gas during the months of summer and provide sales data for verification besides fixing responsibility for deviation from the policy.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23, vide para number 2.5.4.6 having financial impact of Rs 16,217 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2684]

2.5.4.27 Inadmissible grant of subsidy to CPPs without having co-generation facility - Rs 7,078.490 million

According to CCoE decision vide case No.91/04/2021 dated January 26, 2021, all such captive power plants connected with Power Grid (having electricity connections) will be disconnected from March 01, 2021 and before disconnecting gas supply to these industrial units, relevant DISCO would confirm in writing its technical viability to serve the sanctioned power load. Captive power plants not connected with Power Grid having no electricity connections shall submit their applications to respective DISCO for grid connectivity by March 31, 2021.

During special study on “Supply of RLNG to exports sectors on concessionary rates” for the FYs 2018-19 to 2021-22, it was observed that the management supplied RLNG to 60 CPPs which did not have co-generation facility on concessionary tariff (at US\$ 6.5/MMBTU) from April, 2021 to June, 2022 in violation of CCOE decision. Thereby, SNGPL extended undue benefit of concessionary rates to tune of Rs 5,035.344 million and excess blend of indigenous gas of Rs 2,043.146 million aggregating to Rs 7,078.490 million.

Audit was of the view that due to non-implementation of CCoE decision, undue benefit of Rs 7,078.490 million was extended to CPPs.

The matter was reported to Petroleum Division, DG (Gas) and SNGPL on April 28, 2023. In DAC Meeting held on September 27, 2023 the management of SNGPL stated that

breakup of 60 cases consisting of 5 consumers were co-generation consumers, 6 consumers had been disconnected, 13 consumers' cases for electricity load enhancement were with respective DISCOS and 36 consumers had provided stay orders against disconnection.

The DAC directed the management to get the stated stance verified by Audit within 15 days and give updated position relating to 13 CPPs where DISCOS action was to be finalized by December 31, 2021. DAC further directed to pursue 36 remaining court cases. No further progress was reported till finalization of the report.

Audit recommends to probe the matter for fixing responsibility for extending undue benefit besides expediting recovery proceedings against the CPPs.

[Para No. 2.3.4 of special study report on Supply of RLNG to Export
Sector at Concessionary Rate Audit Year 2023-24]

2.5.4.28 Irregular grant of subsidy due to inadmissible supply of RLNG to 02 meters at same premises – Rs 686.080 million

According to Para 67 of Sales Manual of SNGPL, applications for industrial gas connections for generating Captive Power shall be received on prescribed Proforma along with documents such as layout plan of factory premises, photocopy of registry of land / factory (in case of owner), photocopy of lease agreement (in case of tenant). Further, according to SNGPL's letters dated January 27, 2022 & dated December 22, 2021, two Captive Power Meters cannot be installed at same premises.

During special study on "Supply of RLNG to exports sectors on concessionary rates" for the FYs 2018-19 to 2021-22 it was observed that SNGPL management installed two meters at same premises of M/s JK Spinning Mills Ltd. Faisalabad in violation of Gas Sales Agreement. In this way, Export Oriented Unit (EOU) availed subsidy of Rs 766.444 million and Rs 686.080 million simultaneously from both meters. Resultantly, installation of 2nd meter at the same premises and inadmissible subsidy of Rs 686.080 million was given to the EOU.

Audit was of the view that due to weak internal controls and poor vigilance, undue benefit was given in installation and subsidy of Rs 686.07 million to EOU on second CPP connection for the same premises.

The matter was reported to Petroleum Division, DG Gas and SNGPL on April 28, 2023. In DAC meeting held on November 30, 2023, the management stated that in-house fact-finding inquiry was conducted and report was shared with Audit. Audit contended that vigilance report and reply of EOUs clearly depicted that two meters were installed at same premises.

The DAC directed the Petroleum Division to conduct fact-finding inquiry and share the report with Audit within three months. No further progress was reported till finalization of the report.

Audit recommends to probe the matter relating to provision of two CPP connections at the same premises besides initiating recovery proceedings.

[Para No. 2.3.7 of special study report on Supply of RLNG to Export
Sector at Concessionary Rate Audit Year 2023-24]

2.5.4.29 Loss due to non-deposit of advance tax collected from CNG stations resulting in imposition of default surcharge - Rs 316.507 million

According to Section 161 of the Income Tax Ordinance, “2001 “where a person collected tax under Division II of this Part 4 or Chapter XII or deducted tax under Division III of this Part 5 or Chapter XII fails to pay the tax to the Commissioner as required under Section 160, the person shall be personally liable to pay the amount of tax to the Commissioner.” Further, according to sub-section (1B) of the Ordinance *ibid*, “where at the time of recovery of tax under sub-section (1) it is established that the tax that was to be deducted from the payment made to a person or collected from a person has meanwhile been paid by that person, no recovery shall be made from the person who had failed to collect or deduct the tax but the said person shall be liable to pay default surcharge at the rate of twelve per cent per annum from the date he failed to collect or deduct the tax to the date the tax was paid.”

During audit of SNGPL for the FY 2022-23 it was observed that management collected advance tax from the CNG stations under Section 234 A of the Ordinance *ibid* along with gas charges during tax years 2008, 2009, 2011 and 2013 to 2021. But the management failed to deposit collected amount of Rs 2,031.012 million in Government exchequer within due time. Therefore, Tax Authorities imposed default surcharge of Rs 316.507 million on SNGPL due to late deposit of collected advance tax.

Audit was of the view that due to inactive financial management company was penalized with default surcharge.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that the company paid the amount to FBR as per advice of its Tax Consultant. Further, the company, aggrieved with the decision of Tax Authorities was pursuing the legal course against the said demand and currently the matter was pending before ATIR.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to probe the matter regarding late deposit of tax which resulted in extra liability of default surcharge. DAC further directed to fix the responsibility and share the same with Audit. No further progress was reported till finalization of the report.

Audit recommends to identify the responsible for non-depositing of advance tax collected from CNG consumers besides pursuing the case in the court of ATIR.

[DP No. 2687]

2.5.4.30 Absence of EOBI registration deprived the labour / workers - Rs 182.718 million

According to Section II(i) of the Employees' Old Age Benefits Rules 1976, wherein five or more persons are employed by the employer, directly or through any other person, whether on behalf of himself or any other person, or were so employed on any day during the preceding twelve months, and shall continue to apply to every such industry or establishment even if the number of persons employed therein is, at any time after this Act becomes applicable to it, reduced to less than five "Contribution shall be payable every month by the employer of the Institution in respect of every person in his insurable employment, at the rate of six percent of his wages in the prescribed manner.

During audit of SNGPL for the FY 2022-23, it was observed that management deducted EOBI contribution from hired casual / daily wages employees without registration of non-permanent employees with EOBI. The company kept on depositing huge amounts with EOBI as employer & employee contribution of Rs 182.718 million but did not get the beneficiaries registered with EOBI. This had deprived non-permanent / casual staff of the company of their right.

Audit was of the view that negligence of the management resulted in non-registration of casual employees.

The matter was reported to the management in November, 2023. The management in its reply dated December 27, 2023 reported that the temporary staff who became entitled to EOBI pension was being facilitated by submitting their complete record of engagement to EOBI and the benefit of pension was extended by the EOBI. It was expected that all the temporary staff would soon be registered with EOBI with effect from the date of their first engagement.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to get the stated stance verified from Audit. No further progress was reported till finalization of the report.

Audit recommends to register each employee / worker with EOBI and also make sure that the amount deducted from the employees had been deposited against the name of each employee registered with EOBI since the beginning of their employment.

[DP No. 2792]

2.5.4.31 Non-recovery of decreed amount from the defaulting consumers - Rs 157.003 million

According to Clause 3.11 of Billing Manual of SNGPL, “timely / maximum recovery of gas dues from all categories of consumer is required to be arranged. Special attention is to be paid to recover gas dues from big industrial and general industrial consumers which contribute major share of our sales revenue.”

During audit of SNGPL for the FY 2022-23, it was observed that management failed to recover gas charges of Rs 172.557 million from 12 consumers against whom recovery was decreed in favour of the company. Further, 02 cases were decided against SNGPL due to negligence and filing of case against irrelevant persons involving Rs 6.528 million. This resulted in non-recovery from the defaulting consumers amounting to Rs 179.085 million.

Audit was of the view that negligence on the part of management resulted in non-recovery.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that in 03 cases an amount of Rs 22.082 million was recovered and appeal in 02 cases was decided against the SNGPL.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to expedite the process of attachment of property of accused. Para was reduced to the extent of recovered and verified amount of Rs 22.082 million. DAC further directed the management to probe the matter regarding documents and share report to Audit. No further progress was reported till finalization of the report.

Audit recommends to pursue the court cases besides recovery of decreed amount.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2021-22 vide para number 2.5.4.17 having financial impact of Rs 332.18 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2702 & 2791]

2.5.4.32 Non-settlement of insurance claim - Rs 24.306 million

According to Clause 1.3.3 of Accounts Manual, “all insurance matter and claims will be handled by the Accounts department of SNGPL.” Further, according to Clause 1.3.10

of Accounts Manual, “it is the duty of CFO to deal with banks and insurance companies regarding problems faced in day-to-day working.”

During audit of SNGPL for the FY 2022-23, it was observed that the management failed to get insurance claim of Rs 24.306 million settled from National Insurance Company Limited even lapse of more than two years. This resulted in non-settlement of insurance claim amounting to Rs 24.306 million.

Audit was of the view that lack of liaison between NICL and SNGPL resulted in non-settlement of insurance claim.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 stated that loss was assessed by surveyor and joint survey reports of the same were awaited.

The DAC in its meeting held on January, 18 & 19, 2024 directed the management to pursue the case with NICL for settlement of claim within one month. DAC further directed to provide the details of loss due to fire at Accounts and Telecom Departments and take action against the person(s) responsible for delay. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC.

[DP Nos. 2675, 2677 & 2678]

2.5.4.33 Non-deposit of unclaimed dividend in Government Account - Rs 18.608 million

According to Section 244 of the Companies Act, 2017, “where dividend declared by a company remains unclaimed or unpaid for a period of three years from the date it is due and payable, the company shall give ninety days’ notice to the shareholders to file claim. If no claim is made by the shareholder, the company shall, after ninety days from the date of publication, deposit any unclaimed or unpaid amount as well as the proceeds from the sale of shares to the Federal Government in a profit-bearing account with the State Bank of Pakistan or National Bank of Pakistan.”

During audit of SNGPL for the FY 2022-23, it was observed that total dividend payable stood at Rs 230.526 million as on June 30, 2023. Out of this an amount of Rs 18.608 million for the FY 2018-19 was added as unclaimed dividend in current year as it was not paid since more than 3 years. This resulted in undue retention of unclaimed dividend of Rs 18.608 million by the company.

Audit was of the view that weak financial management resulted in non-deposit of unclaimed dividend of Rs 18.608 million to Federal Government. The same issue was raised

by Audit previously as well. However no remedial action was taken by the management so far.

The matter was reported to the management in October, 2023. The management in its reply dated December 27, 2023 that as required under Section 244 of the Companies Act, 2017, Federal Government had not yet notified any account for such deposit.

The DAC in its meeting held on January, 18 & 19, 2024 reiterated its early directives dated 05.01.2023 as the DAC directed the management to follow up the matter with Petroleum Division / Finance Division. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC.

Note: The issue was also reported earlier in the Audit Reports for Audit Years 2022-23 and 2021-22, vide para numbers 2.5.4.35 and 2.5.4.43 having financial impact of Rs 109.039 million and Rs 111.462 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2696]

2.6 Sui Southern Gas Company Limited

2.6.1(A) Introduction

Sui Southern Gas Company Limited (SSGC) is a public limited company incorporated in Pakistan and listed in Pakistan Stock Exchange. Shareholding of Government of Pakistan in the company is 53.18%.

Main activity of the company is transmission and distribution of natural gas in the provinces of Sindh and Balochistan. The company is also engaged in certain activities related to the gas business including manufacturing and sale of gas meters, construction contracts for laying of pipelines and transportation of RLNG to SNGPL. SSGC is serving more than 3.113 million consumers in Sindh and Balochistan through pipeline network of 47,520 KMs. The company is facing multiple problems that include governance issues, operational inefficiency, weak contract and project management that have suppressed the profitability and business growth of the company over the period of time. The company has not been able to finalize its accounts for the FY 2022-23 due to non-resolution of issues with Oil and Gas Regulatory Authority (OGRA) leading to non-determination of its revenue requirements for the aforesaid financial year.

2.6.1(B) Comments on Company Performance

Audited accounts for the financial years 2022-23 were not finalized till finalization of this report. Working results of the company for the financial year 2021-22 as compared to the previous years are tabulated below:

(Rs in million)

Head of Account	2021-22	2020-21	2019-20	2018-19
Sales (Net)	375,559	296,128	290,240	297,167
Other Income	17,280	19,463	15,769	14,410
Total Revenues	392,839	314,771	306,009	311,577
Cost of Gas	367,840	301,878	307,291	295,127
Expenses	32,734	11,757	19,987	34,812
Total Expenses	400,574	313,635	327,278	329,939
Total Profit or Loss	(11,444)	1,955	(21,269)	(18,362)

(Source: Annual Audited Accounts)

- i) Despite an increase of 26.82% in its sales, profit of the company was reduced and converted to loss during the FY 2021-22 (from profit of Rs 1,956 million to loss of Rs 11,444 million);
- ii) The company did not comply with the provision of the statement of compliance as required under serial No. 19 of Schedule-I of Corporate Governance Rules, 2013, where the performance evaluation of members of the Board including the Chairperson and the Chief Executive would be undertaken annually by the Government for which the Government was to enter into performance contract with each member of the Board at the time of his or her appointment;
- iii) As per Note 44, finance cost on short-term borrowing from banks increased by Rs 637.042 million from Rs 1,386.695 million to Rs 2,023.737 million for the year 2021-22. This reflected SSGC's increased dependence on short-term borrowing to meet its liquidity requirements;
- iv) As per Note 31 of Audited Financial Statements for the FY 2020-21, at the end of 2021-22, trade debts of the company, receivable from different stakeholders, were Rs 109,085 million. Out of this, an amount of Rs 102,295 million, which was 94 % of total outstanding trade debts, was unsecured;
- v) As per Note 18.1, trade and other payables increased by Rs 123,898 million in FY 2021-22 from Rs 387,937 million to 511,835 million;
- vi) Trade Debts and other Receivables increased from Rs 92,133 million to Rs 109,085 million as on June 30, 2022;
- vii) External auditors accorded a qualified opinion on the accounts of SSGC for the FY 2021-22 as detailed below.
 - a. The reason for the qualification was trade debts including receivables of Rs 29,652 million with LPS Rs 151 billion and Rs 25,312 million with LPS Rs 82 billion from K-Electric Limited (KE) and Pakistan Steel Mills Corporation (Private) Limited (PSML), respectively. Significant portion of such receivables included overdue amounts, which had been considered good by management. However, due to the adverse operational and financial conditions of PSML, disputes by KE and PSML with the company on LPS, total overdue amounts from KE and PSML were likely to be recovered and timeframe over which such recovery would be made; and
 - b. Interest accrued includes interest receivable of Rs 10,957 million and Rs 5,101 million from SNGPL and WAPDA, respectively. Due to dispute with WAPDA and SNGPL, company was unable to determine the extent to which the interest accrued amounts due from SNGPL and WAPDA were likely to be recovered and the timeframe over which such recovery will be made.

2.6.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 526,552.857 million were raised in this report during the current audit of SSGC. This includes recoverable amount of Rs 274,226.597

million as pointed out by Audit. Summary of the audit observations classified by nature is as follows:

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	
A	Distribution / UFG Losses Related Issues	23,808.844
B	Receivables Management	274,261.009
C	HR / Employee Related Irregularities	39.471
D	Procurement Related Issues	2,517.000
E	Project Management	11,030.756
F	Land Acquisition Related Issues	424.820
2	Others	214,470.957

2.6.3 Compliance of PAC Directives

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	%age of Compliance
1992-93	10	9	1	90
1994-95	2	1	1	50
2000-01	5	4	1	80
2002-03	8	7	1	88
2003-04	8	6	2	75
2006-07	13	10	3	77
2007-08	11	10	1	91
2010-11	27	20	7	74
2011-12	8	0	8	0

2012-13	2	0	2	0
2013-14	9	8	1	89
2014-15	3	0	3	0
2015-16	45	19	26	42
2016-17	39	6	33	15
2017-18	24	7	17	29
2018-19	14	0	14	0
2019-20	9	5	4	56
2021-22	2	0	2	0
Total	239	112	127	47%

The overall compliance of PAC directives needs improvement. Special attention is required for the years where 'NIL' compliance was reported in above table.

2.6.4 Audit Paras

Distribution / UFG Losses Related Issues

2.6.4.1 *Loss due to UFG beyond permissible limit - Rs 23,436.992 million*

According to Clause 21.1 of the License of SSGC issued by OGRA, “the licensee shall take all possible steps to keep the UFG within acceptable limits. Authority for this purpose, in consultation with the licensee and the experts, shall fix target of UFG for each financial year. Authority may fix UFG target separately for each regulated activity.”

During audit of SSGC for the FY 2022-23, it was observed that OGRA allowed Unaccounted for Gas (UFG) losses @ 6.97% for the FY 2021-22 but the company recorded UFG losses of 17.84%. Thus, the company sustained a loss of 10.87% UFG beyond that allowed by OGRA which amounted to Rs 23,436.992 million. It was also observed that the management could not prioritize the problematic areas which needed immediate and focused intervention. One way to identify such problematic areas was the reconciliation of gas supplied and billed at Town Boarder Station (TBS) level which was not done leading to continued loss of gas and subsequent revenue loss beyond the permissible limit of OGRA. Audit would like to quote the example of Karachi city, where the number of illegal gas consumers stood at 0.700 million causing a UFG loss of 10.000 BCF annually.

It was also observed that OGRA had set 30 Key Monitoring Indicators (KMIs) like number of visits to identify theft, FIRs registered, maintaining record of gas leakage etc, aimed at reduction in UFG to allow annual UFG allowance. However, during FY 2021-22 SSGCL could only achieve 75.84% of KMI target which showed lack of commitment on the part of management to control the UFG.

Audit was of the view that weak internal controls resulted in huge UFG losses of Rs 23,436.992 million.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that 25 BCF out of 45 BCF, UFG volume recorded in SSGC system was contributed by Balochistan and around 75% of all domestic gas meters in Quetta were tampered. The management of SSGC was continuously pursuing the MoE and the Provincial administration for the implementation of administrative measures to curb gas theft. Further, measures to carryout reconciliation at TBS level was being carried out.

The DAC in its meeting held on January 16, 2024, directed the management to submit region wise detail to Audit and three years trend analysis of UFG. DAC also directed to share the detail of TBS installed against targets as well as number of TBS equipped with

measuring instruments and without measuring instruments along with reason for non-reconciliation of gas at TBS level. DAC further directed the management to take steps to reduce number of illegal consumers. No further progress was reported till finalization of the report.

Audit recommends to take effective steps to reduce UFG and bring UFG losses within permissible limit besides implementing the decision of the DAC. It is also recommended that tangible steps may be taken to achieve KMI targets.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21 & 2021-22 vide para numbers 2.6.4.5, 2.6.6.10, 2.6.6.2 & 2.6.4.2 having financial impact of Rs 12,091 million, Rs 39,549.84 million, Rs 22,254 million & Rs 12,982.70 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2717, 2718, 2734 & 2740]

2.6.4.2 Non-recovery of gas charges decreed in favour of the company - Rs 256.166 million

According to Para No. 3.1 of Legal Services Policy, Legal Services Department is responsible to manage and look after the organization's legal matters and to give advisory service and strategic guidance, consultation and support on legal issues, ensuring legal and regulatory compliance.

During audit of SSGC for the FY 2022-23, it was observed that the management failed to recover gas charges of Rs 256.166 million from 58 consumers against whom recovery and declaratory cases had already been decided in favour of the company. The management failed to take necessary steps to ensure recovery of decided cases amounting to Rs 256.166 million.

Audit was of the view that due to negligence of the management, outstanding dues could not be recovered from the defaulters against whom cases were decided.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that efforts were being made to recover dues from defaulters.

The DAC in its meeting held on January 16, 2024, directed the management to recover the amount and get verified not due amount from Audit (especially against M/s Maxco) within a week. DAC further directed to share monthly progress report to Audit. No further progress was reported till finalization of the report.

Audit recommends to intimate reasons for slow pursuance of pending declaratory cases besides expediting recovery of declaratory cases.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2022-23 vide para number 2.6.4.5 having financial impact of Rs 574.093 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2723 & 2744]

2.6.4.3 Non-initiation of criminal proceedings against un-registered consumers involved in pilferage of gas - Rs 62.180 million

According to Clause D-3 of Procedure for dealing with theft of gas cases issued by OGRA in its letter dated August 16, 2005, “in case of strong evidences leading to confirmation of the act of theft, the company will disconnect the gas supply of the consumer / defaulter and will remove all devices which can facilitate the consumer / defaulter in illegal restoration of gas supply.” Further, according to Clause 3.1 of Billing Manual, “Billing Department is responsible to report theft cases to Consumer Relations Department for prompt and appropriate action.”

During audit of SSGC for the FY 2022-23, it was observed that in 14 cases various areas of Karachi, Hyderabad, Nawab Shah and Quetta, unregistered persons were using gas directly from distribution lines through illegal network. It was also observed that illegal supply of gas was continued to approximately 4,900 houses in different cases. The management estimated value of stolen gas to be Rs 62.180 million. Despite such huge network of illegal supply, no serious effort was found on record to identify the persons within SSGC responsible for gas theft. No recovery and criminal proceedings were initiated against un-registered persons involved in pilferage of gas.

Audit was of the view that weak network surveillance and ineffective management led to non-detection of laying of illegal network and pilferage of gas as well as non-initiation of criminal proceedings against theft of gas.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that FIRs had been lodged against the cases of direct use of gas by un-registered consumers.

The DAC in its meeting held on January 16, 2024, directed the management to pursue the criminal cases and get the efforts made in this regard verified by Audit. No further progress was reported till finalization of the report.

Audit recommends to pursue the criminal cases besides recovering the gas theft charges.

[DP Nos. 2739 & 2763]

2.6.4.4 Loss due to gas theft by consumers - Rs 53.506 million

According to Clause D-3 of Procedure for dealing with theft of gas cases, issued by OGRA in its letter dated August 16, 2005, “in case of strong evidences leading to confirmation of the act of theft, the company will disconnect the gas supply of the consumer / defaulter and will remove all devices which can facilitate the consumer / defaulter in illegal restoration of gas supply.”

During audit of SSGC for the FY 2022-23, it was observed that company suffered a loss amounting to Rs 67.815 million on account of gas pilferage by 95 domestic, commercial and industrial consumers.

(Rs in million)

Sr. No.	Category	No. of consumers	Amount
1	Commercial	64	49.752
2	Domestic	30	17.465
3	Industrial	01	0.598
Total		95	67.815

Audit was of the view that ineffective monitoring resulted in loss of Rs 67.815 million to the company in the shape of pilferage of gas.

The matter was reported to the management in August, 2023. The management in its reply dated January 12, 2024 stated that Rs 21.669 million had been recovered.

The DAC in its meeting held on January 16, 2024, reduced the para to the extent of recovered and verified amount of Rs 14.309 million and directed to expedite the recovery of balance amount of Rs 53.506 million. No further progress was reported till finalization of the report.

Audit recommends to recover the balance amount from domestic, commercial and industrial consumers.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21, 2021-22 & 2022-23 vide para numbers 2.6.4.4, 2.6.6.12, 2.6.6.12, 2.6.6.6, 2.6.4.13 & 2.6.6.4.2 having financial impact of Rs 6,784.948 million, Rs 971.92 million, Rs 1423.493 million, Rs 240.605 million & Rs 445.005 million. Recurrence of same irregularity is a matter of serious concern.

Receivables Management

2.6.4.5 *Non-recovery of outstanding dues from consumers - Rs 270,026.925 million*

According to Para 4.4.1 read with Para 4.4.7 of Natural Gas Consumer Service Manual, 2011 and Para 4.5 of SSGC Recovery Policies / Procedures, supply is disconnected if the customer commits a default in the payment of two consecutive monthly bills or where outstanding amount is not secured by the Gas Security Deposit (GSD) or surpass the GSD amount. Further, according to SSGC Recovery Policies / Procedures, “company will disconnect gas supply of a customer is defaulter of payment of regular gas bills or instalment of gas bill or any amount of gas supply deposit.”

During audit of SSGC for the FY 2022-23, it was observed that the management failed to recover outstanding amount of gas charges and Late Payment Surcharge (LPS) amounting to Rs 270,211.925 million from the power sector companies and industrial defaulters. The position is reported as under:

(Rs in million)

Organization	Principa l	LPS	Total
GENCO-I / GENCO-III / CPPA-WAPDA	3,197.00 0	5,379.000	8,576.000
ARL	42.000	0	42.000
K-Electric (Indigenous Gas)	29,653.0 00	146,761.00 0	176,414.0 00
Pakistan Steel Mills	23,052.0 00	61,600.000	84,652.00 0
Industrial defaulters (35 disconnected consumers)	527.925	-	527.925
Total	56,471.9 25	213,740.00 0	270,211.9 25

It may be pointed out that out of total recovery from industrial defaulters an amount of Rs 84,652.000 million was related to Pakistan Steel Mills Limited (PSML). An effort was made by both SSGC and PSML to partially offset the arrears through transfer of PSML land. However, the deal could not materialize due to slow follow up by SSGC. This resulted non- recovery of outstanding dues / settlement of Rs 270,211.925 million

Audit was of the view that weak financial management resulted in non- recovery / settlement of Rs 270,211.925 million.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that an amount Rs 185.673 million had been recovered and same had been verified by Audit. Further, it was also reported that company was vigorously pursuing PSML for recovery / settlement of outstanding dues.

The DAC in its meeting held on January 16, 2024 reduced the para to the extent of recovered and verified amount of Rs 185.673 million and directed to expedite the recovery of balance amount of Rs 270,026.925 million. No further progress was reported till finalization of the report.

Audit recommends to expedite the recovery process of outstanding dues.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2018-19, 2019-20, 2020-21, 2021-22 & 2022-23 vide para numbers 2.6.4.4, 2.6.6.12, 2.6.6.12, 2.6.6.6, 2.6.4.13 & 2.6.6.4.2 having financial impact of Rs 6,784.948 million, Rs 971.92 million, Rs 1423.493 million, Rs 240.605 million & Rs 445.005 million. Recurrence of same irregularity is a matter of serious concern.

[DP Nos. 2724, 2738, 2742 & 2750]

2.6.4.6 *Non-settlement of insurance claims - Rs 1,950.271 million*

According to Section 118 of the Insurance Ordinance, 2000, “it shall be implied term of every contract of insurance that where payment on a policy issued by an Insurer becomes due and the person entitled thereto has complied with all the requirements, including filing of complete papers, for claiming the payment, the Insurer shall, if he fails to make the payment within a period of ninety days from the date on which the payment becomes due or the date on which the claimant complies with the requirements, whichever is later, pay as liquidated damages.”

During audit of SSGC for the FY 2022-23, it was observed that the company sustained a considerable loss of infrastructure and material due to floods in various regions of Balochistan and Sindh provinces during the FY 2021-22 (Annexure-4). The management

lodged 24 insurance claims with NICL amounting to Rs 1,950.271 million. However, management could not get these claims settled till finalization of this report.

Audit was of the view that slackness of the management resulted in non-settlement of insurance claims of Rs 1,950.271 million.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that the delay in settlement of claims was due to the nature & quantum of loss. However, rigorous efforts were being made to ensure settlement of these claims.

The DAC in its meeting held on January 16, 2024 directed the management to expedite their efforts for settlement of insurance claims. No further progress was reported till finalization of the report.

Audit recommends to pursue the claims with NICL effectively for early settlement.

[DP No. 2716]

2.6.4.7 Non-recovery of gas transportation charges from SNGPL - Rs 1,579.401 million

According to Clause 3.2 of gas transportation agreement between SSGC and SNGPL dated January 26, 2014, regarding transportation of Zamzama field gas from Dadu delivery point to Sui delivery point, SNGPL was to pay the monthly tariff according to tariff invoices issued by SSGC to SNGPL for each month.

During audit of SSGC for the FY 2022-23, it was observed that SSGC did not recover an amount of Rs 1,579.401 million due on June 30, 2023 from SNGPL on account of gas transportation charges.

Audit was of the view that weak financial control and contract management resulted in non-recovery of Rs 1,579.401 million on account of gas transportation charges.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that SNGPL had been withholding payment of gas transportation charges linking it with the settlement of RLNG withheld amount relating to the period prior to May, 2020. That issue would be settled after finalization of OGRA consultant report and consequently the outstanding amount of gas transportation charges would be recovered.

The DAC in its meeting held on January 16, 2024 directed the management to pursue the matter. No further progress was reported till finalization of the report.

Audit recommends to pursue the matter with SNGPL for early recovery of outstanding amount.

[DP No. 2748]

2.6.4.8 Non-recovery of claim against off-spec gas - Rs 670.000 million

According to Section 4.1.6(3) of Petroleum Exploration and Production Policy, 2012, “where the specification and quality of the gas from an approved Extended Well Testing (EWT) is acceptable to the buyer, the gas price shall entail a 5% discount from the applicable gas price for on-spec gas and 10% for off-spec gas for that Zone.”

During audit of SSGC for the FY 2022-23, it was observed that the management filed claim of Rs 1,700.000 million against off-spec gas with operators of Rehman and Sinjhora gas fields. However, only an amount of Rs. 1,030.000 million could be realized leaving a balance of Rs 670.000 million till June 30, 2023.

Audit was of the view that poor financial management resulted in non-recovery of Rs 670.000 million on account of off-spec gas.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that the financial calculations of Sinjhora off-spec gas quantities from the field for the period January, 2013 to December, 2015 were finalized. Further, this involves Federal Board of Revenue due to credit notes which would not be accepted by FBR, beyond 180 days. In order to take the impact of credit notes both tax teams of SSGC and OGDCL were on board.

The DAC in its meeting held on January 16, 2024 directed the management to conduct internal fact finding inquiry to identify the reasons for delay in execution of the agreement and expedite the recovery within one month. No further progress was reported till finalization of the report.

Audit recommends to conduct internal fact finding inquiry to identify the reasons for delay in execution of the agreement and expedite the recovery besides pursuing the matter with OGRA.

[DP Nos. 2737]

2.6.4.9 Loss to Government exchequer due to non-deposit of Stamp Duty - Rs 34.412 million

According to Section 3 of the Stamp Act 1899, “instruments shall be chargeable with Duty of the amount indicated in schedule-I of the act *ibid.*”

During audit of SSGC for the FY 2022-23, it was observed that the management made connection agreement with 344,125 consumers during the FYs 2017-18 to 2022-23 in Karachi, Hyderabad, Nawab Shah, Sukkur and Larkana Regions. However, the management failed to deposit the stamp duty on account of these connection agreements. This resulted in loss to the Government amounting to Rs 34.412 million.

Audit was of the view that poor financial management resulted in non-recovery of Stamp Duty of Rs 34.412 million.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that SSGC would recover and deposit Stamp Duty @ Rs 100 from each customer who had been provided connection.

The DAC in its meeting held on January 16, 2024 directed the management to deposit due amount within one month and identify the person responsible for lapse. No further progress was reported till finalization of the report.

Audit recommends to collect the due amount of Stamp Duty and deposit the same in Government treasury besides fixing responsibility for this lapse.

[DP No. 2719]

HR / Employees Related Issues

2.6.4.10 Unjustified payment to employee appointed on fake degree - Rs 39.471 million

According to para 6.9.1 of the HR Manual of SSGC, employment offer from SSGC is subject to a positive background check of the candidate and his / her qualification and references. This includes, but is not limited to, NADRA verification, Police verifications, past employee reference checks, educational documents verification, etc.

During audit of SSGC for the FY 2022-23, it was observed that an employee serving in PARCO was transferred to SSGC on February 19, 2008 on deputation basis for a period of 02 years against the post of Secretary in Grade IV. The management absorbed the employee in the SSGC as Career Executive in Grade-IV after completion of 02 years deputation period. However, on October 18, 2017 i.e. after a lapse of 07 years, the management decided to get his education documents verified, as a result of which his matric certificate was found tampered. Show cause notice was served to the employee on January 25, 2019 but it took the management 3 years to finalize disciplinary proceeding and finally he was dismissed from service on December 21, 2022. This resulted in unjustified payment of pay and allowances amounting to Rs 39.471 million to the employee.

Audit was of the view that delayed decision making resulted in unjustified payment of pay and allowances amounting to Rs 39.481 million.

The matter was reported to the management in October, 2023. The management in its reply dated January 12, 2024 stated that the matriculation certificate was found tampered after verification from concerned Board. Consequently, the petitioner was issued show cause notice on dated January 25, 2019.

The DAC in its meeting held on January 16, 2024 directed the management to conduct fact finding inquiry regarding delay in the processing of disciplinary proceedings and also provide admissibility of Rule for absorption in SSGC and share report with Audit within one month. No further progress was reported till finalization of the report.

Audit recommends to conduct fact finding inquiry regarding delay in the processing of disciplinary proceedings and also provide admissibility of Rule for absorption in SSGC and share report with Audit.

[DP No. 2736]

Procurement Related Irregularities

2.6.4.11 Escalation in project cost due to defective procurement process - Rs 2,423.000 million

According to para 3 of Procurement Department Policy Document of SSGC, Procurement department is responsible for the procurement of goods, services and works to support the business activities at SSGC.

During audit of SSGC for the FY 2022-23, it was observed that the management initiated the procurement of line pipe in December 2016 for the transmission pipeline project of 24" x 31 KM through tender inquiry # SSGC/FP/TE/7746. After evaluation of the procurement process the lowest bidder i.e. M/s Baosteel Singapore PTE Ltd was awarded the purchase order on January 04, 2017. The management did not evaluate the tendering process as per SRO 827 which supports local engineering industry by encouraging procurement of locally manufactured goods.

Therefore, the local bidder i.e. M/s Crescent Steel obtained the stay order from the High Court of Sindh on awarding of contract to foreign bidder on the dispute of calculation of price preference as per SRO 827 with SSGCs. The case was decided on January 27, 2020 and court ordered that to float fresh tender and allowed participation of M/s Crescent steel. The management did not initiate the process from January, 2020 till September, 2021 and new tender was initiated in January, 2022 and Purchase Order No. 12//TKC/31034 dated December 27, 2023 was issued to M/s Crescent Steel. Non-evaluation of price as per SRO

827 resulted in delay of procurement of pipeline of 6 years consequently the project cost increased by Rs 2,423.000 million.

Audit was of the view that due to inefficiency and non-adherence to the provision of SRO 827 procurement process was put in litigation and procurement was delayed by six years which resulted in the escalation of project cost by Rs 2,423.000 million.

The matter was reported to the management in November, 2023. In the DAC meeting held on January 16, 2024 the management stated that BoD directed to conduct investigation through Internal Audit Department and that investigation had been completed. Further, M/s Crescent Steel & Allied Products Ltd. initiated litigation in Sindh High Court however, that was dismissed by the court.

The DAC directed the management to share the final Internal Audit Department report and decision of the Sindh High Court dated January 27, 2020 with Audit within 15 days. DAC further directed to provide the approval of BoD regarding change in scope of the project. Further, the management share the draft fact finding report, the report only narrates the reasons of delay in procurement process. In the inquiry report action against the responsible persons due to inefficiency and non-adherence to the provision of SRO 827 was not concluded.

Audit recommends to fix the responsibility on the persons at fault.

[DP No. 2732]

2.6.4.12 Blockage of funds due to excessive procurement - Rs 94.000 million

According to Rule 5(5)(a) of the Public Sector Companies (Corporate Governance) Rules, 2013, “the principle of probity and propriety entails that company's assets and resources are not used for private advantage and due economy is exercised so as to reduce wastage. The principle shall be adhered to, especially with respect to handling of public funds, assets, resources and confidential information by directors, executives and employees and claiming of expenses.”

During audit of SSGC for the FY 2022-23, it was observed that the management procured 22,000 meters of pipe from M/s Crescent Steel and Allied Products valuing Rs 1,032.423 million against the requirement of 20,000 meters. The management procured excess quantity of 2,000 meters which resulted in blockage of funds of Rs 94.000 million.

Audit was of the view that poor inventory control and inefficiency on the part of management resulted in blockage of funds amounting to Rs 94.000 million

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that extra 10% increase in length was ordered

keeping in view the requirement of actual survey / construction activities. Therefore, 2,000 meter additional pipe was procured and this was normal practice.

The DAC in its meeting held on January 16, 2024 directed the management to submit detailed report regarding inventory, standard practices and utilization of pipes to Audit within a week. No further progress was reported till finalization of the report.

Audit recommends to submit detailed report regarding inventory, standard practices and utilization of pipes besides improving inventory management.

[DP No. 2721]

2.6.4.13 Irregular purchase of indigenous gas without GSAs with E&P companies

According to provisions of Sale of Goods Act, 1930 and Contract Act, 1872 all agreements or contracts should be negotiated, entered into or amended on an arms' length basis and in accordance with the provisions of rules.

During audit of SSGC for the FY 2022-23, it was observed that the management purchased 203,622,629 MMBTU gas amounting to Rs 210,963.314 million from 45 fields without executing Gas Sale Agreements with E&P companies. In the absence of formal GSAs, purchase of gas of Rs 210,963.314 million was held irregular.

Audit was of the view that purchase of gas without entering into GSAs with E&P companies was irregular which puts the company at risk of legal complications.

The matter was reported to the management in November, 2023. In the DAC meeting held on January 12, 2024 the management stated that currently only 05 agreements were under deliberation with the respective E&P companies and 22 agreements were duly signed. Audit contended 09 agreements of Rs 113,753.314 million were verified by Audit whereas 36 agreements of Rs 97,210 million were still pending.

The DAC directed the management to share the finalized agreements and enhance the efforts to finalize the remaining agreements. No further progress was reported till finalization of the report.

Audit recommends that the practice of purchase of gas without entering into formal agreement may be avoided in future. The pending 36 agreements may be finalized immediately.

Note: The issue was reported earlier also in the Audit Report for Audit Year 2021-22 vide para number 2.6.4.20. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2753]

Project Management

2.6.4.14 Cost overrun due to non-completion of project in time- Rs 8,989.000 million

According to Para No. 3.1 of Project & Construction Department Policy Document, Projects and Construction department is responsible for construction of major gas pipelines and commissioning of gas into those pipelines across the province of Sind and Baluchistan.

During audit of SSGC for the FY 2022-23, it was observed that the BoD and OGRA approved the project of 30” dia x 125 Km pipeline from SMS Sindh University to Pakland on March 04, 2017 and November 07, 2017 respectively with budgeted amount of Rs 5,014 million. The project was aimed to receive indigenous gas of 247 MMCFD from gas fields of OGDCL, UEPL & PPL. As per project plan the project was to be initiated on February 24, 2017 and to be completed by December 30, 2018. SSGC could not complete this project despite lapse of more than 06 years as a result the cost of the project was increased to Rs 14,006.000 million. This resulted in increase of project cost by Rs 8,989.000 million.

Audit is of the view that poor project management of SSGC resulted in increase of project cost by Rs 8,989.000 million. Moreover, non-completion of subject gas pipeline project also resulted in non-injection of indigenous gas into system to cater to the shortage of energy in the country & saving of costly foreign exchange reserves spent on imported RLNG.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that project was delayed due to the non-clearance of Right of Way (ROW) by the Government of Sindh. Reply of the management is not tenable as the project was planned to complete in December 2018. Therefore, SSGC could have taken up this matter seriously with the concerned authorities and get resolved the issue in order to receive the 247 MMCFD indigenous gas from the fields of above companies which was cheaper than RLNG.

The DAC in its meeting held on January 16, 2024 directed the management to justify the delay in the project and complete the remaining work of the project at the earliest. No further progress was reported till finalization of the report.

Audit recommends to take necessary measures to complete the project so that the indigenous gas be injected in the transmission system of SSGC, besides fixing the responsibility on the persons at fault.

[DP No. 2731]

2.6.4.15 Non-commissioning of LPG Air Mix plant - Rs 762.066 million

According to section 155 (1) of Mineral & Industrial Gases Safety rules, 2010, no person shall fill any cylinder, vessel, and container with compressed gas and no cylinder, vessel and container filled with compressed gas shall be possessed by anyone except under and in accordance with the conditions of a licence granted under these rules.

During audit of SSGC for the FY 2022-23, it was observed that the management installed LPG Air Mix plant at BELA (Balochistan) in December 2018 with a cost of Rs 762.066 million. However, the installed LPG Air Mix Plant has not yet been commissioned due to non-adherence of the Mineral and Industrial Gases Safety (MIGS), Rules 2010. Therefore, the management could not get license from the Department of Explosives, resultantly LPG Air Mix Plant could not be commissioned despite lapse of 05 years.

Audit was of the view that poor project management resulted in non-commissioning of installed LPG Air Mix Plant.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that the construction and equipment installation activities at LPG air mix plant were completed in December, 2018, however, the issuance of NOC from Department of Explosives, was bottleneck in commissioning of the plant.

The DAC in its meeting held on January 16, 2024 directed the management to submit a comprehensive report regarding delay in issuance of license from the Department of Explosives. DAC further directed to prepare a detailed report regarding LPG air mix plants concerning their feasibility and actual performance. No further progress was reported till finalization of the report.

Audit recommends to take effective steps to operationalize LPG Air Mix plant besides implementing the decision of DAC.

[DP No. 2730]

2.6.4.16 Non-completion of schemes for supply of gas - Rs 657.321 million

According to approval dated September 24, 2021 and August 10, 2020, schemes for supply of gas / RLNG to two Special Economic Zones (SEZ) at Bin Qasim Industrial Park and Dhabeji were to be completed up to March 21, 2023 and December 18, 2021 respectively.

During audit of SSGC for the FY 2022-23, it was observed that the schemes for supply of 13 MMCFD gas / RLNG to Bin Qasim Industrial Park and 13.50 MMCFD gas / RLNG to Dhabeji (Special Economic Zones) were initiated with 100% funding of Rs 657.321 million from the Federal Government. However, these schemes were not completed within the stipulated time. Owing to non-completion of development schemes by SSGC

within the stipulated period the objectives of the GoP to boost the industrialization and creation of employment opportunity in Special Economic Zones could not be achieved.

Audit was of the view that poor planning and inefficient project management resulted in non-completion of gas supply schemes amounting to Rs 657.321 objectives of the GoP to boost the industrialization and creation of employment opportunity in Special Economic Zones could not be achieved

The matter was reported to the management in October, 2023. The management in its reply dated January 12, 2024 stated that supply of gas to Bin Qasim Industrial Park was delayed as Letter of Credit could not be opened for procurement of an important part of scheme i.e. filter separators. Further, the management was pursuing with the relevant stakeholders to resolve the issues for completion of gas supply schemes.

The DAC in its meeting held on January 16, 2024 directed the management to get their stance verified from Audit. DAC further directed the management to complete the project at the earliest and pursue the matter with quarters concerned. No further progress was reported till finalization of the report.

Audit recommends to take effective measures to complete the schemes for supply of gas to SEZs.

[DP Nos. 2725, & 2767]

2.6.4.17 Loss due to non-capitalization of assets - Rs 622.369 million

According to Rule 4(3) of Natural Gas Rules, 2002, “every licensee shall file a petition with the Registrar, along with the fees specified in Schedule II, to enable the Authority to review the total revenue requirement of the licensee for the financial year, after incorporation of actual changes in the well-head prices and other relevant factors, and to determine the licensee’s revised total revenue requirement for that financial year.

During audit of SSGC for the FY 2022-23, it was observed that assets of Rs 1,785.341 million pertaining to years prior to FY 2019-20 were not capitalized in the relevant years. However, these assets were capitalized in FYs 2020-21 to 2022-22. Therefore, the company remained debarred from return on these assets of Rs 622.369 million (1,785.341 million * rate of return 17.43% * 2).

Audit was of the view that in-efficiency / slackness of the management to capitalize the assets resulted in loss of Rs 622.369 million.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that Work in Progress of SSGC was recorded Rs 4,400.000 million in June, 2019 pertaining to FYs 2002-03 to 2018-19.

The DAC in its meeting held on January 16, 2024 directed the management to submit detailed reply to Audit within three days. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC besides fixing responsibility on the person(s) at fault.

[DP No. 2761]

Land Acquisition Related Issues

2.6.4.18 Unjustified Payment of cost of land - Rs 230.000 million

According to Para 3.1 of Manual of Land and Estate Department of SSGC, “the land department is responsible for initiating land acquisition process including issuance of advances to Land Acquisition Collector and their subsequent adjustment for construction of pipelines and mutation of acquired land in favour of company as per procedure given in project manual and Land Acquisition Act, 1894.”

During audit of SSGC for the FY 2022-23, it was observed that BoD approved a project on March 4, 2017 for laying of 125 Km pipeline from Sales Meter Station (SMS) Sindh University to Pakland to receive indigenous gas from various gas fields. In order to lay pipeline for this project, land was allotted and challan for payment Rs. 230.000 million was issued. However, on December 08, 2020, Planning & Development Department of SSGC pointed that the said land fell in category “C” but the proposed rate was based on category “A” land. Land and State Management Department did not consult Government of Sindh for revision of rates and made unjustified payment of Rs 230.000 million on July 22, 2022 despite objection by P&D Department.

Audit was of the view that due to poor financial control and slackness on the part of management, payment of land was made on the basis of category “A” despite that land fell under category “C”.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that the amount of Rs 230.000 million was the collective payment for the land area falling in 03 districts. However, reservation on land related to area falling in district Thatta involving an amount of Rs 195.700 million.

The DAC in its meeting held on January 16, 2024 directed the management to submit detailed record for verification. No further progress was reported till finalization of the report.

Audit recommends to inquire the matter and fix responsibility on the person(s) found at fault.

[DP No. 2766]

2.6.4.19 Non-mutation of acquired land - Rs 194.820 million

According to Para 3.1 of manual of Land and Estate Department of SSGC, “the land department is responsible for initiating land acquisition process including issuance of advances to Land Acquisition Collector and their subsequent adjustment for construction of pipelines and mutation of acquired land in favour of company as per procedure given in Project Manual and Land Acquisition Act, 1894.”

During audit of SSGC for the FY 2022-23, it was observed that in 15 cases the management did not initiate land mutation process despite the fact that payment was made for land acquisition. The management initiated and completed various gas supply projects on the acquired land, however, mutation of land in favour of company was pending despite payment of Rs 194.820 million.

Audit was of the view that inefficient land management put the organization at the risk of litigation.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that mutation of land was under process with different Revenue Offices in Sindh and Balochistan.

The DAC in its meeting held on January 16, 2024 directed the management to provide supporting documents along with the complete detail of each case to Audit within 15 days. No further progress was reported till finalization of the report.

Audit recommends to complete the process of mutation of land besides fixing responsibility for delay in completion of process of mutation of land on the person(s) at fault.

[DP No. 2728]

Others

2.6.4.20 Blockage of revenue due to pending litigation of 2,170 cases of Rs 184,486.000 million

According to Clause 3.1 of Legal Department Policy Document, “Legal Services (the department) is responsible to manage and look after the organization’s legal matters and to monitor, evaluate and track the progress of Company’s cases pending in different courts.”

During audit of SSGC for the FY 2022-23, it was observed that there were 2,170 litigation cases pending at various courts as on June 30, 2023. As per data provided by SSGC, an amount of Rs 184,486.000 million was involved in these cases. Some of the cases were more than 20 years old. Ineffective pursuance of these cases leads to piling up of litigation cases which not only increase the legal expenses but also keeps a large amount of revenue under litigation. This resulted in blockage of revenue due to pending litigation of 2,170 cases of Rs 184,486.000 million.

Audit was of the view that poor monitoring and pursuance of litigation cases resulted in huge pendency involving Rs 184,486.000 million.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that prolonged delay in reaching resolutions of litigation cases was not within SSGC's control. Audit contended that the cases could be brought to early conclusion through effective monitoring.

The DAC in its meeting held on January 16, 2024 directed the management to provide case-wise detail of all the cases and get it verified from Audit.

Audit recommends to provide case-wise detail of all the cases and get it verified from Audit besides evaluating the performance of the Legal Department and legal counsels.

[DP No. 2727]

2.6.4.21 Irregular supply of gas to K-Electric without GSA - Rs 29,653.000 million

According to the decision of Cabinet Committee on Energy dated April 23, 2018, SSGC and K-Electric will initiate the process for signing of Gas Sale Agreement (GSA) for gas as well as for LNG within 15 days.

During audit of SSGC for the FY 2022-23, it was observed that the management was supplying gas to K-Electric for its power generation plant without any GSA. The management failed to resolve the pending issue with K-Electric despite lapse of 06 years resulting in irregular supply of gas worth Rs 29,653.000 million.

Audit was of the view that weak internal controls resulted in irregular supply of gas to K-Electric without GSA.

The matter was reported to the management in November, 2023. The management in its reply dated January 12, 2024 stated that GSA was not finalized due to non-resolution of issues with K-Electric.

The DAC in its meeting held on January 16, 2024 directed the management to pursue the matter for early finalization of Gas Sales Agreement and recovery of outstanding dues. No further progress was reported till finalization of the report.

Audit recommends that the matter be pursued at PAO level for early finalization of Gas Sale Agreement in order to resolve the long outstanding issue.

Note: The issue was reported earlier also in the Audit Reports for the Audit Years 2018-19 & 2021-22 vide para numbers 2.6.4.2 & 2.6.4.20 having financial impact of Rs 38,798 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2741]

2.6.4.22 Undue retention of funds of BESOS - Rs 331.957 million

According to orders of Supreme Court of Pakistan in case numbers C.A.421/2018, 422/2018 and 423/2018 dated October 22, 2020, Benazir Employees Stock Option Scheme (BESOS) was executed in breach of Article of 154 of the Constitution of the Islamic Republic of Pakistan.

During audit of SSGC for the FY 2022-23, it was observed that BESOS was initiated on August 14, 2009, under which the government decided to distribute 12 percent of its equity among workers of SOEs to encourage stake and ownership, resulting in improved performance. As per above orders of Supreme Court of Pakistan, the management of SSGC was required to wind up the BESOS. However, this order by the Supreme Court was not implemented despite lapse of 03 years. This resulted in irregular retention of funds of BESOS of Rs 331.957 million.

Audit was of the view that management of SSGC retained the amount of Rs 331.957 million under BESOS in violation of orders of the Supreme Court of Pakistan.

The matter was reported to the management in September, 2023. The management in its reply dated January 12, 2024 stated that it was clear that BESOS had been declared to be ultra vires of Article 154 of the Constitution of the Islamic Republic of Pakistan and SSGC Employee's Empowerment Trust ought to be wound up accordingly. Therefore, trustees sought guidance from Petroleum Division in this regard. However, no reply had been received from them.

The DAC in its meeting held on January 16, 2024 directed the management to pursue the matter with Petroleum Division to resolve the issue. No further progress was reported till finalization of the report.

Audit recommends that the matter be pursued with Petroleum Division for early resolution of the issue in compliance of the Supreme Court decision.

2.6.4.23 Non-issuance of invoices to OGDCL on account of Gas Transportation Charges

SSGC and OGDCL entered into Gas transportation agreement whereas OGDCL is willing to use about 40 Km Pesh Bogi - Pirkoh segment of Pirkoh Sui Pipeline for the transportation of Loti gas on tariff consideration and SSGCL willing to operate and maintain the said pipeline for use by OGDCL to transport Loti Gas.

During audit of SSGC for the FY 2022-23, it was observed that OGDCL was using 40 km pipeline, Pesh Bogi-Pirkoh segment of Pirkoh Sui Pipeline for the transportation of Loti gas on tariff consideration, whereas SSGCL was responsible to operate and maintain the said pipeline for use by OGDCL to transport Loti Gas. Gas Transportation Agreement between SSGC and OGDCL expired in 2013 since than SSGC was not issuing invoices of Gas Transportation Charges to OGDCL consequently the amount was also not realized from OGDCL.

Audit is of the view that poor contractual management resulted in non-recovery of outstanding amount on account of gas transportation from OGDCL.

The matter was reported to the management in November 2023. The management in its reply dated January 12, 2024 stated that the non-issuance of invoices to OGDCL was due to the fact that the pipeline has been fully depreciated and “Depreciation” was a component in the formula/mechanism for calculation of monthly transportation and matter has been taken up with OGRA. The reply of the management was not tenable because the management could not resolve the matter despite lapse of 10 years consequently the due amount on account of transportation could not be realized.

The DAC in its meeting held on January 16, 2024 directed the management to pursue the matter with OGRA.

Audit recommends to pursue the matter with OGRA for early resolution of the issue.

2.7 Other Organizations

This chapter includes paras in respect of Pakistan Mineral Development Corporation Private Ltd. (PMDC), Government Holdings Private Ltd. (GHPL), Saindak Metals Ltd. (SML) and Sui Southern Gas Company-LPG (SSGC-LPG).

2.7.1 Pakistan Mineral Development Corporations Private Limited

2.7.1.1(A) Introduction

Pakistan Mineral Development Corporation (PMDC) was incorporated in 1974 under the Companies Act, 1913 (now the Companies Act, 2017) with an authorized capital of Rs 1,000 million. The company is engaged in the business of mining, exploration and development of mineral deposits. PMDC is the only federal entity under the administrative control of Ministry of Energy (Petroleum Division) engaged in prospecting, exploration, evaluation, mining, and marketing of minerals in the country.

PMDC gets exploration licenses and mining leases from the respective Provincial Governments. It undertakes all activities from prospecting to the marketing of the minerals in competition with other public and private sector mining companies. PMDC is operating 05 Salt Mines / Quarries and 04 Coal Mines which are spread over four provinces and it has the mining rights of the world's largest pink salt mines. The estimated reserves of salt and coal at various places are detailed below:

Projects	Location	Total Reserve (Tones)
Salt		
Khewara	Jhelum, 160 Km South of Islamabad	Over 1 billion
Makrach	Chakwal	37.085 million
Warcha	Khushab, 267 Km South of Islamabad	Over 1 billion
Kala Bagh	296 Km from Islamabad or 50 km from Mianwali	28.503 million
Jatta/BK	217 Km from Islamabad	Over 1 billion
Coal		

Collieries Degari	35 Km South East of Quetta	15.42 million
Sor-range	16 Km East of Quetta city	12.95 million
Sharigh	160 Km North-East of Quetta	28.97 million
Lakhra Collaries, Dadu	Hyderabad	54 million

(B) Comments on Audited Accounts

The working results of the company for the FY 2021-22 as compared to previous years are given below:

(Rs in million)

Particulars	2021-22	2020-21	2019-20	2018-19
Sales	2,817.044	2,855.235	2,694.172	2,432.621
Cost of Sales	(1,948.829)	(1,787.792)	(1,833.421)	(1,763.152)
Gross Profit/(Loss)	868.215	1,067.443	860.751	669.469
Administrative Expenses	(520.092)	(494.679)	(508.698)	(457.578)
Selling Expenses	(166.181)	(147.871)	(149.722)	(146.880)
Operating Profit/(Loss)	181.942	424.893	202.331	65.011
Other Income	1,189.078	456.864	198.485	405.697
Other expenses	(68.551)	(39.621)	(19.232)	(79.476)
Profit Before Tax	1,302.469	842.136	381.584	391.232
Provision for Taxation	(467.898)	(252.009)	(62.887)	(97.155)

Net Profit After Tax	834.571	590.127	318.697	294.077
----------------------	---------	---------	---------	---------

(Source: Annual Audited Accounts)

- i) Gross profit was Rs 868.215 million during the FY 2021-22, recording a decrease of 19% as compared to the previous financial year (FY 2020-21: Rs 1,067.443 million). Similarly, operating profit was Rs 181.942 million, recording a decrease of 57% as compared to the previous financial year (FY 2020-21: Rs 424.893 million);
- ii) Trade debts (receivables) increased from Rs 709.591 million in 2020-21 to Rs 895.727 million during FY 2021-22, registering an increase of 26%. Increase in trade debts indicates unsatisfactory position with regards to recovery of outstanding dues;
- iii) Trade and other payables increased by 46% to Rs 991.982 million in FY 2021-22 from Rs 677.498 million in FY 2020-21; and
- iv) Operating expense increased by 05% to Rs 520.064 million in FY 2021-22 from Rs 494.679 million in FY 2020-21.

2.7.1.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 1,208.100 million were raised in this report during the current audit of PMDC. This amount also includes recoverable amount of Rs 610.600 million as pointed out by the Audit. Summary of the audit observations classified by nature is as under:

Over view of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	
A	Contract Management	136.192
B	Procurement Related Irregularities	452.539

2021-22	02	-	02	0
Total	59	40	19	68%

Overall

compliance of PAC directives was not satisfactory which needs to be improved.

2.7.1.4 Audit Paras

Contract Management

2.7.1.4.1 Undue favour to excavation contractors due to non-recovery of cost of explosives – Rs 95.788 million

According to Clause 4.2 of Excavation Agreement, “explosives required by second party shall be provided by PMDC from its authorized magazine in such quantity as may be necessary and available with the PMDC, at actual cost-plus service charges at the rate of 10% and cost will be recovered from bills of contractor.”

During audit of PMDC for FY 2022-23, it was observed that the management supplied blasting powder (430,275 kg) and safety fuses (633,200 meters) to Salt Mines Warcha contractors at an approximated cost Rs 161 million. However, there was less recovery of costs of explosives from the excavation bills to the tune of Rs 21.101 million and Rs 65.979 million in FYs 2021-22 and 2022-23, respectively. The management cleared full payment of excavation bills without recovery of cost of explosives in violation of Excavation Agreement. This resulted in grant of undue benefit to the contractor of Rs 87.080 million and 10% service charges of Rs 8.708 million aggregating to Rs 95.788 million.

Audit was of the view that poor financial / contract management resulted in non-recovery of Rs 95.788 million due to undue favour extended to excavation contractors which impacted liquidity of PMDC.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that the matter was under resolution at the management level and would be placed before the Board for approval.

The DAC directed the management to recover the amount as per contract. No further progress was reported till finalization of the report.

Audit recommends to expedite recovery of cost as well as service charges.

[DP No. 2407]

2.7.1.4.2 Excess payment of excavation charges – Rs 40.404 million

According to Memo No. Prod/salt-Dev(WA)/160 dated April 14, 2006, “excavation rates were enhanced for new and existing facilities.” Further, according to Memo No. PMDC/EST/-143 dated June 12, 2014, BoD in its 155th Board meeting held on April 11, 2014, “extended the initial contract period for new salt mines to 5 years, with a possible 5 years extension based on satisfactory performance of the contractor. Further 2 years

extension will be granted for meeting targets and existing contractors under the new investor policy receive corresponding extensions.”

During audit of PMDC for the FY 2022-23, it was observed that management extended undue benefit to the contractor, M/s Maqsood Khan by converting his contract of Mine No. 06 allotted under old policy on December 19, 2005 into new Investor Policy, 2006 which was meant for under development mines. Further, the contract was extended unauthorizably for 03 years beyond maximum extendable contract period of 12 years instead of open competitive bidding under PPRA Rules. Moreover, excavation rates were enhanced multiple times in violation of contract. This resulted in payment of excess amount of Rs 40.404 million above the due amount under applicable rates of adjacent mines.

Audit was of the view that weak contract management resulted in excess payment of excavation charges of Rs 40.404 million to the contractor due to application of higher excavation rates as compared to prevailing / adjacent mine.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that at time of implementation of NIP, mine No. 06 was in development stage under old policy and to this effect its allotment was converted into new Investor Policy. Further, after expiry of 12 years of new Investor Policy, the BoD once allowed extension in November, 2018 for 03 years but in the next meeting the same was withdrawn as deleted from the minutes of the BoD. However, BoD in its meeting No. 201st held on January 18, 2021 decided that no extension would be granted under this policy and all the allotments would be concluded through competitive bidding.

The DAC directed the management to conduct fact-finding inquiry and submit report to Audit within two months.

Audit recommends to expedite the recovery of excess paid amount besides probing the matter.

[DP No. 2420]

Procurement Related Irregularities

2.7.1.4.3 Irregular award of contract and non-forfeiture of security deposit – Rs 354.992 million

According to Rule 40(1) of PPRA Rules, 2004, “without changing the cost and scope of work or services, the procuring agency may negotiate with the successful bidder (with a view to streamline the work or task execution, at the time of contract finalization) on methodology, work plan, staffing and special conditions of the contract.” Further, according

to Rule 19(b) of Rules *ibid*, “failure to fulfil contractual obligations may lead to blacklisting up to three years.”

During audit of PMDC for the FY 2022-23, it was observed that a tender for explosive items was awarded to M/s Chiniot Safety at Rs 648 per kg amounting to Rs 330.745 million for the period of six months from March 01, 2023 to August 31, 2023. As per tender documents the contract was required to be awarded for the period of one-year from February, 2023 to January, 2024 but contract was awarded for six months resulting in change of scope after bid evaluation. It was worth mentioning that M/s Chiniot Safety had previously defaulted in supplying the contracted quantity, causing significant revenue loss of Rs 2.000 billion in salt mine projects. Despite these defaults, the management did not initiate the blacklisting process under PPRA Rules, and allowed the contractor to participate again in tender process. Further, management failed to forfeit the security deposit of Rs 24.248 million, as per Clause 14 of the Excavation Agreement and the released security of Rs 8.86 million for the period December 01, 2020, to November 30, 2021. This resulted in irregular award of contract and non-forfeiture of security deposit of Rs 354.992 million.

Audit was of the view that weak procurement management resulted in irregular award of contract due to change in scope of contract as well as non-forfeiture of security deposits.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that as per Clause 14 of the tender documents, the management reserves the right to increase or decrease the quantities mentioned in the tender to any limit before placing the purchase order and to increase or decrease the contracted quantities up to 15% after the order was placed. The contract for gun powder and safety fuses was awarded to successful bidder M/s Chiniot Safety Fuses and M/s Araka Enterprises. Further, PMDC released the security after satisfactory report from the concerned projects. Further, the matter of release of security money for the period from February 01, 2022 to January 31, 2023 was pending.

The DAC directed the management to conduct fact-finding inquiry and submit report to Audit within two months.

Audit recommends to probe the matter besides fixing responsibility on the concerned and expedite recovery of security deposits.

[DP Nos. 2408 & 2409]

2.7.1.4.4 Irregular award of excavation contract without open competition – Rs 97.547 million

According to Clause 12(2) of PPRA Rules, 2004, “all procurement opportunities over three million Pakistani Rupees should be advertised on the Authority’s website as well as in other print media or newspapers having wide circulation. The advertisement in the newspapers shall principally appear in at least two national dailies, one in English and the other in Urdu. Further, Board of Directors of PMDC in its 201th meeting dated January 18, 2021, decided no extension / new allotment will be granted under new investor policy and PMDC to switch to raising contracts for excavation of minerals through competitive process.”

During audit of PMDC for the FY 2022-23, it was observed that management allowed the contractors to continue excavation work till finalization of new contracts in respect of Warcha Jansukh and Koriyan Mines despite expiry of their contracts under either new Investor Policy or tender contracts. The management failed to initiate the process of floating tenders under PPRA Rules before the expiry of contracts and contractors were paid Rs 93.356 million on account of excavation charges. Further, management granted extension of 05 years in five other excavation contracts related to Mines of Makrach project under new Investor Policy, 2006 despite the fact that Policy was abolished in January, 2021. In this regard, management was required to award the contracts through open competition under PPRA Rules as per direction of BoD. However, in defiance to Board’s directives, the Finance Department of PMDC allowed to proceed for payment of Rs 54.191 million of excavation charges to contractors. This resulted in irregular award of excavation contracts without open competition of Rs 97.547 million.

Audit was of the view that weak procurement mechanism resulted in irregular award of excavation contract without open competition and irregular extension of excavation contract under New Investor Policy.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that tenders were conducted and scrapped due to high prices. In the meantime, the affairs of the mines were continued on departmental basis on the lowest rates in vicinity till finalization of tenders in general. Further, the BoD in its 201th meeting held on January 18, 2021 decided that “going forward, no extension / new allotment would be granted under New Investor Policy. However, within the maximum of 12 years and the contracts already signed with the investors / contractors would be honoured.

The DAC directed the management to conduct fact-finding inquiry on case-to-case basis and submit report to Audit within two months. No further progress was reported till finalization of the report.

Audit recommends to probe the matter besides fixing responsibility on the persons at fault as well as ensure competitive bidding process.

[DP Nos. 2413 & 2416]

Receivables Management

2.7.1.4.5 Non-recovery of share of profit - Rs 610.600 million

According to Clause 5.1 of Agreement between PMDC and M/s MCC Huage Duddar Mining Company Private Ltd. (MHD) signed in 2003, “the profit accruing from project operations after the loans and supplier’s credits and the interests thereof have been fully repaid, shall be appropriated between MHD and PMDC in the ratio of 80:20 and in case the distributable profit in any financial year exceeds the projection of the M/s ENFI’s feasibility study by 20% or more the profit-sharing ratio for that year shall be changed 75:25.”

During audit of PMDC for the FY 2022-23, it was observed that PMDC did not receive its share of profit of US\$ 14.896 million for the calendar years 2016 to 2019 from MHD. The management did not make concrete efforts for early recovery despite lapse of 06 years. This resulted in non-recovery of its due share of US\$ 14.896 million equivalent to Rs 4,230.469 million.

Audit was of view that weak financial management and poor planning resulted in non-recovery of its share.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that an amount of Rs 3,612.262 million (US\$ 12.74 million) was received up to November 21, 2023. The efforts were being made to recover the remaining amount of Rs 610.600 million (US\$ 2.15 million).

The DAC reduced the para to the extent of recovered and verified amount of Rs 3,612.262 million (US\$ 12.74 million) and directed to expedite the recovery of outstanding amount of Rs 610.600 million (US\$ 2.15 million) within one month. No further progress was reported till finalization of the report.

Audit recommends to expedite the recovery of balance amount.

[DP No. 2417]

HR / Employee Related Issues

2.7.1.4.6 Excess payment of Bonus to employees - Rs 8.769 million

According to inter departmental memo No. PMDC/CA-2(4) dated May 03, 2023 issued by Company Secretary to DGM (F&A), BoD in its 224th meeting dated April 07, 2023, approved the recommendation of 10th finance meeting held on April 04, 2023 in respect of payment of one month's basic salary as profit bonus to all employees of PMDC.

During audit of PMDC for the FY 2022-23, it was observed that management paid Bonus at the rate of one month gross salary instead of one month basic salary for the FY 2021-22. The HR / Admin Department vide notification dated April 13, 2023 issued instructions for payment of Bonus @ one month salary before the approval of minutes of BoD meeting. As per procedure for issuance of implementation memos (191th BoD meeting dated February 13, 2020), implementation memo was required to be issued after signatures of the Chairman. In this case, memo for Bonus equal to one-month basic salary was issued by Company Secretary on May 03, 2023 whereas payment for Bonus equal to one month gross salary was made on April 13, 2023. This resulted in excess payment of Bonus of Rs 8.769 million to employees in violation of Board's directives / approved procedure.

Audit was of the view that weak internal controls resulted in excess payment of Bonus to employees.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that Bonus were paid in accordance with office order No. PMDC/CA-2 (4) dated May 03, 2023, as approved by the BoD.

The DAC directed the management to conduct fact-finding inquiry and submit the report to Audit within two months and get it regularized by the BoD. No further progress was reported till finalization of the report.

Audit recommends to expedite recovery of excess paid amount of Bonus besides fixing responsibility on the persons responsible for excess payment in violation of approved procedure of BoD.

[DP No. 2410]

2.7.1.4.7 Non-finalization of inquiry of employees

According to letter No. D.O.6(28)2011-DG-11 dated March 08, 2011 issued by Cabinet Secretariat Establishment Division, "the Prime Minister had been pleased to direct those measures should be taken to authenticate degrees / certificates of all Federal Government employees of the respective Ministries / Divisions, their attached departments, subordinates' offices and autonomous bodies under their administrative control." Further, as per judgment of Supreme Court of Pakistan (case 2009 SCMR 1492), "no leniency should be shown in favour of such employees possessing fake degrees. Supreme Court of Pakistan

recommended authorities to examine the possibility of getting registered criminal case against such employees so that in future no one should dare to commit such misconduct.”

During audit of PMDC for the FY 2022-23, it was observed that the management started the process of verification of academic degrees of all employees in FY 2022-23 wherein 03 degrees were found fake as relevant Educational Board did not verify their credentials / transcript. Therefore, the company initiated inquires against the concerned employees. The inquiry committee did not finalize the inquiry of 03 employees having fake degrees despite lapse of one year.

Audit was of the view that due to weak internal controls, the inquiry committee failed to finalize the inquiry against employees.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that inquiry was finalized and the disciplinary proceedings had been initiated.

The DAC directed the management to identify the persons responsible for non-verification of degrees during probation period and expedite the disciplinary proceedings.

Audit recommends to probe in the matter besides expediting the disciplinary proceedings.

[DP No. 2421]

2.7.1.4.8 Irregular appointment of Managing Director / Chief Executive Officer

According to Clause 2(1) and 3 of Public Sector Companies (Appointment of Chief Executive) Guidelines, 2015 read with Rule 5(2) of Public Sector (Corporate Governance) Rules, 2013, “every public sector company shall appoint its Chief Executive in accordance with Schedule-I to the Guidelines. While making appointment of the Chief Executive, the Board shall evaluate the candidates based on the fit and proper criteria specified in Schedule-II to the guidelines.

During audit of PMDC for the FY 2022-23, it was observed that hiring process for Chief Executive was initiated on February 21, 2021. HR Committee shortlisted 45 candidates from 105 applicants on May 19, 2021. Pursuant to Board interviews and evaluations, 06 candidates were selected based on weighted averages and sent to Petroleum Division on July 19, 2021. Later BoD quashed the Chief Executive hiring process on February 24, 2022 in its 218th meeting and decided to re-advertise on March 05, 2022. Audit observed following irregularities:

- i) Advertisement mentioned 5 years' experience, contrary to the requirement of at least 10 years' experience of Chief Executive or senior management level;

- ii) Shortlisting of two candidates were unjustified owing to irrelevant qualifications and insufficient experience;
- iii) Re-advertisement published in March, 2022 with the same criteria in defiance to Guidelines *ibid*;
- iv) Despite deficiencies, nomination of GM (HSE) along with other 02 candidates were forwarded for appointment on April 10, 2023;
- v) Acting Chief Executive extended the contract of GM, HSE in January, 2023 which was going to expire in February 02, 2023 and BoD appointed GM, HSE as Chief Executive on additional charge basis as stop gap arrangement in June, 2023; and
- vi) Finally, GM, HSE was appointed as regular Chief Executive in September, 2023 despite these irregularities.

Audit was of the view that weak HR management resulted in grant of undue favour to the incumbent as well as irregular appointment of Chief Executive.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that no undue favor was extended to GM (HSE) in granting Additional Charge of Acting MD by BoD. Further, minimum 10 years' experience was required under Guidelines whereas PMDC required overall 20 years' experience including five years' experience at Senior management level.

The DAC directed the management to submit detailed pointwise reply to Audit. No further progress was reported till finalization of the report.

Audit recommends to investigate the matter besides improving oversight of BOD.

[DP No. 2426]

Board Related Issues

2.7.1.4.9 Appointment of Chairman without approval from competent forum

According to Section 4(4) of Public Sector Companies (Corporate Governance) Rules, 2013 amended vide S.R.O. No. 275(I)/2017 dated April 21, 2017 and S.R.O. No. 715(I)/2019 dated July 01, 2019, "the Chairman of the Board shall be elected by the Board of Directors of the Public Sector Company. However, this provision shall not apply where Chairman of the Board is appointed by the Government."

During audit of PMDC for the FY 2022-23, it was observed that BoD in its 195th meeting held on June 17, 2020 and 200th BoD meeting held on December 10, 2020 elected two members as Chairman of BoD for distinct period without seeking approval of Federal Cabinet. Despite the fact that Petroleum Division approved both candidates as Director and not as Chairman of BoD. Further, while electing chairman in 195th meeting held on June 17, 2020, the Director of BoD (Joint Secretary, MoE-PD) informed the Board that such written nomination as Chairman from GoP was merely a precedent and not a requirement as per Rule 4(4) of the Public Sector Companies (Corporate Governance) Rules, 2013. This resulted in appointment of Chairman without approval from competent forum as well as payment of Rs 1.460 million as monthly cooperation fee, issuance of monthly fuel limit of 300 liters and allocation of locally assembled 1300cc car with driver to Chairman was unjustified.

Audit was of the view that weak regulatory oversight and laxity on the part of government nominated Directors resulted in appointment of Chairman without approval from competent forum.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that BoD conducted fair and transparent election process of the Chairman in its 195th meeting held on June 17, 2020 wherein the Board unanimously elected its Chairman. There was no mandatory legal requirement of any statutory rules and regulation that only Federal Cabinet could select the Chairman.

The DAC directed the management to get the legal opinion from Petroleum Division.

Audit recommends to seek legal opinion from Petroleum Division on competent forum for appointment of Chairman of BoD.

[DP No. 2425]

2.7.1.4.10 Deficient composition / role of BoD and its committees resulting in decline in core business activity

According to Section 4(2) of Public Sector Companies (Corporate Governance) Rules, 2013 amended vide S.R.O. No. 275(I)/2017 dated April 21, 2017 and S.R.O. No. 715(I)/2019 dated July 01, 2019, “Chairman has a responsibility to lead the Board and ensure its effective functioning and continuous development, he shall not be involved in day-to-day operations of the Public Sector Company.” Further, according to Rule 5(7) of *ibid*, “the Board shall also formulate significant policies of the Public Sector Company.”

During audit of PMDC for the FY 2022-23, it was observed that the BoD and its committees conducted total 158 meetings during last 03 years however, BoD and its

committees failed to effectively fulfill their responsibilities vested under rules as detailed below:

- i) Three Board committees were formed without observance of Rule 12(2) of *ibid*;
- ii) Fourteen BD committee meetings approved only one Business Plan of FY 2021-22, lacking alignment with primary objectives of the company;
- iii) Twenty-eight Board / Committee meetings in four months (Mar-Jun 2023) focused on general agendas, ignoring operational improvement;
- iv) Performance of senior management was not evaluated against set objectives and key performance indicators as per Rule 8(2).
- v) Weak monitoring led to non-achievement of production targets for salt ranging from 72%-83% and coal ranging from 62%-93% during Board tenure;
- vi) Board failed in succession planning as per Rule 12(c) which was evident as 12 interim MD appointments and 04 DGMs against 12 sanctioned posts;
- vii) PMDC failed to formulate significant policy, such as identifying / monitoring principal risks, procurement / marketing of goods, and asset / investment management as per Rule 5(7);

Audit was of the view that weak regulatory oversight resulted in ineffective role of BoD and its committees leading to decline in core business activity of the company.

The matter was reported to the management in November, 2023. In DAC meeting held on December 21, 2023, the management stated that the observation was noted for future compliance. Further, the present Board and management was working on the long-term development, operational plans, short term business and succession planning of PMDC. Furthermore, former Board took up urgent matters only besides the approval of budget estimates, annual audited accounts and conducting AGM.

The DAC directed the management to submit compliance report to Audit within one month. No further progress was reported till finalization of the report.

Audit recommends to improve corporate governance of the company.

[DP No. 2428]

2.7.2 Government Holdings (Private) Limited (GHPL)

2.7.2.1(A) Introduction

Government Holding Private Limited (GHPL) was incorporated as a private ltd. company on January 15, 2000 under the Companies Ordinance, 1984 (Now the Companies Act, 2017) and its registered office is situated at 5th Floor Petroleum House Ataturk Block, Islamabad. The company is fully owned and controlled by Federal Government through Ministry of Energy (Petroleum Division).

GHPL has two subsidiary companies i.e. ISGSL and PLL with 100% shareholding. GHPL holds working interests in Abu Dhabi Offshore Block 5 through Pakistan International Oil Limited (PIOL), a consortium of OGDCL, PPL, MPCL and GHPL. GHPL also acquired 8.33% equity stake in Reko Diq project on instructions of Government of Pakistan Reko Diq project is owned 50% by Barrick, 25% by three SoEs i.e. GHPL, OGDCL & PPL, 15% by Government of Balochistan on fully funded basis and 10% on free carried basis.

(Source: Annual Audited Accounts)

- i) GHPL's General and administrative expenses were within the range of 0.50% to 0.80% of net sales during the last four FYs. However, these expenses increased to 1.20% of net sales during FY 2022-23. These expenses also increased by 96% as compared to previous FY 2021-22. Major increase was noticed under heads of salaries and Business Development;
- ii) Exploration and prospecting expenditure for FYs 2022-23, 2021-22, 2020-21 and 2019-20 were Rs 447.90 million, Rs 685.93 million, Rs 561.33 million, and Rs 598.31 million respectively whereas there was no increase in production of oil, gas and LPG;
- iii) Trade receivables increased by 36% to Rs 191,708.859 million in FY 2022-23 from Rs 141,458.170 million in FY 2021-22, due to low recovery of revenue mainly from SNGPL and SSGC; and
- iv) Trade and other payables increased by 39% to Rs 26,207.000 million in FY 2022-23 from Rs 18,788.000 million in FY 2021-22.

2.7.2.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 99,319.408 million were raised in this report during the current audit of GHPL. Summary of the audit observations classified by nature is as under:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	
A	Investment Management Related Issues	89,550.000

B	HR / Employees Related Irregularities	19,348.000
C	Financial Management Related Issues	158.560
D	JV Related Issues	9,591.500

2.7.2.3 Compliance of PAC Directives

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	% age of Compliance
2010-11	03	-	03	-
2011-12	01	01	-	100
2012-13	03	03	-	100

Total	18	11	07	61

Overall compliance of PAC directives was not satisfactory which needs to be improved.

2.7.2.4 Audit Paras

Investment Management Related Issues

2.7.2.4.1 Investment in Reko Diq project without ensuring cash flows for future investment - Rs 89,550.000 million

According to Companies Act, 2017, “the business of the company shall be managed by the board.” Further, Finance, Procurement and Risk Management Committee of Board in its meeting held on August 25, 2022, apprised that estimated sales volume for the FY 2022-23 would decrease as major fields are on natural decline / depletion.

During audit of GHPL for the FY 2022-23, it was observed that BoD in its meeting held on June 15, 2023 resolved, in compliance of ECC’s decision dated March 15, 2022, that reserves of Rs 51.230 billion be reallocated back to accumulated profits and new reserves of Rs 20.000 billion be accumulated over next four years by setting aside Rs 5.000 billion each year for Reko Diq project. According to Board Audit Committee meeting held on May 10, 2023, phase-1 for development of Reko Diq would continue till year 2028 and production of copper and gold would start in 2028. The committed investment of GHPL for phase-1 would be US\$ 398 million (equivalent to Rs 89,550.000 million) over the next five years. GHPL also had other investment commitments in various ventures which require future financial cover. Audit contended that in this scenario GHPL invested in Reko Diq project without due diligence and position of cash flows was not properly assessed. Therefore, funds created to fulfil other objectives were also reversed to fund investment in Reko Diq project. Further, GHPL share of Rs 89,550.000 million in Reko Diq project would be paid in US dollars and provision for maintaining funds in US dollars was not created nor US dollar account was maintained by the management.

Audit was of view that weak financial management of GHPL resulted in commitment of investment in US dollars without ensuring availability of funds as well as requisite foreign currency.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that GHPL business was not exposed to any liquidity risk. The company maintains a healthy cash flow position which could be gauged by the fact that its cash and cash equivalents as of June 30, 2023, were US\$ 0.130 billion. GHPL had full capacity to fulfil its commitment towards the Reko Diq Project.

The DAC in its meeting held on December 22, 2023 directed the management to share the sensitivity analysis of liquidity of company and detail of dollar account with Audit. No further progress was reported till finalization of the report.

Audit recommends to ensure arrangement of funds to complete the Phase-I of Reko Diq project. Further, BoD direction to open US dollar account and to maintain funds in dollars be implemented.

[DP No. 2389]

HR / Employee Related Irregularities

2.7.2.4.2 Irregular grant of advance for purchase of vehicles - Rs 19.348 million

According to Para 4.5.2 relating to Advance for the Purchase of Vehicle under GHPL Service Rules, 2012, “the advance shall only be granted to an employee, excluding employees on contract and deputation, having minimum three (3) years of regular service period with the company.”

During audit of GHPL for the FY 2022-23, it was observed that the management granted advance for purchase of vehicles to six contract employees amounting to Rs 19.348 million during FYs 2019-20 to 2021-22 in violation of Service Rules as advance was admissible to permanent employees only.

Audit was of the view that weak internal controls resulted in grant of inadmissible advances to contractual employees for purchase of vehicles in violation of Service Rules.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that Vehicle Monetization Policy, 2012 was applicable to the contractual and permanent employees. In revised GHPL Service Rules effective from July 20, 2022, the clarity regarding vehicle loan had been duly approved by Board of Directors and implemented accordingly. Audit contented that the pointed-out cases were relating to “Advance for Vehicle” as clearly mentioned on the Sanction Documents and were not relating to monetization.

The DAC in its meeting held on December 22, 2023 directed the management to share the Policy with Audit for verification. No further progress was reported till finalization of the report.

Audit recommends to recover the outstanding balance of advances in lump sum besides getting in-admissible payment be regularized from BoD.

[DP No. 2398]

2.7.2.4.3 Extension in contract of Managing Director without approval from Federal Cabinet

According to Rule 5(2) of the Public Sector Companies (Corporate Governance) Rules, 2013 “the Board shall evaluate the candidates based on the fit and proper criteria and

the guidelines specified by the Commission for appointment to the position of the Chief Executive and recommend at least three candidates to the Government for its concurrence for appointment of one of them as Chief Executive of the public sector company, except where the Chief Executive is nominated by the Government. On receiving concurrence or nomination of the Government, as the case may be, the Board shall appoint the Chief Executive in accordance with the provisions of the Ordinance. The Board shall also be responsible for development and succession planning of the Chief Executive.” Further, according to Section 18(1) of State Owned Enterprises (Governance and Operations) Act, 2023 “the Board shall appoint a Chief Executive Officer to the state-owned enterprise under a performance based contract for a specified period.”

During audit of GHPL for the FY 2022-23, it was observed that BoD in its 179th meeting held on June 22, 2023 decided that the term of Managing Director be extended till the appointment of new Managing Director or 60 days whichever is earlier commencing from June 19, 2023 after expiry of contract of Managing Director on June 18, 2023. However, the extension was not got approved from the Federal Government as required by the rule *ibid*. It is worth mentioning that management had initiated process of recruitment of Managing Director and post was advertised on May 21, 2023.

Audit was of the view that weak regulatory oversight and laxity on the part of Directors in observance of law resulted in extension in tenure of Managing Director without approval of Federal Government.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that as per Section 18(1) of the SOE Act, 2023, the board was authorized to appoint MD. The contract of existing MD was accordingly temporarily extended by the board as the recruitment process for the appointment of regular MD / CEO through advertisement was going on.

The DAC in its meeting held on December 22, 2023 directed the management to refer the matter to Law Division for seeking clarification on audit observation.

Audit recommends that irregular extension in tenure of Managing Director be regularized / approved from the Federal Government.

[DP No. 2401]

Financial Management Related Issues

2.7.2.4.4 Provision of loans of Rs 150.000 million to subsidiary in violation of Companies Act, 2017

According to Section 199 (2 & 6) of Companies Act, 2017 “a company shall not invest in its associated company by way of loans or advances except in accordance with an agreement in writing and the return on such investment shall not be less than the borrowing cost of the investing company.”

During audit of GHPL for the FY 2022-23, it was observed that funds of Rs 150.000 million were paid by GHPL to ISGS on December 30, 2022 without any agreement as required under above mentioned provision. In 59th Board Audit Committee meeting held on June 13, 2023 it was informed by the management that GoP (Finance Division) will reimburse all operating expenses paid to ISGS and this loan of Rs 150 million was also provided by GHPL to ISGS on the instructions of GoP (Finance Division). If interest was charged on such loan by GHPL, it would be paid by GoP (Finance Division). This showed that loan of Rs 150.000 million was given to subsidiary in violation of Companies Act, 2017.

Audit was of the view that weak management resulted in grant of loan of Rs 150.000 million without keeping in view compliance of provision of Companies Act, 2017.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that funds were provided to ISGS as per decision of ECC as a stopgap arrangement, to meet the immediate funding requirements of ISGSL. These funds would be reimbursed as actual to GHPL by the Finance Division from GIDC funds within three months of the cash call made by ISGSL.

The DAC in its meeting held on December 22, 2023 directed the management to make agreement in the light of ECC decision.

Audit recommends to investigate the violation of the Companies Act, 2017 and remedial measure be taken for its implementation.

[DP No. 2392]

2.7.2.4.5 Irregular payment of foreign travel expenses - Rs 8.560 million

According to Para 5.1 of GHPL Service Rules 2012, “the employees shall be entitled to hotel accommodation, TA/DA and incidental allowances on official visit(s) as per the admissible rates. In the case of self-arrangement for accommodation, the consolidated TA/DA rate plus incidental allowance as per rates shall apply.”

During audit of GHPL for the FY 2022-23, it was observed that management paid foreign travel expenses to Managing Director, GHPL along with two Government officials for travelling to USA in January, 2023 in connection with litigation proceedings of Reko Diq. Audit contended that the expenses incurred by two Government officials were inadmissible as they were not employees of GHPL and their travel expenses should had

been borne by their respective departments. Further, these expenses were incurred on account of newly formed company i.e. PMPL which had to look after the affairs of Reko Diq project therefore, these expenses should be charged to the accounts of PMPL instead of GHPL. This resulted in irregular expenses of Rs 8.560 million on foreign travel.

Audit was of the view that due to weak internal controls, travel expenses of subsidiary company as well as officials relating to other departments were paid from GHPL funds.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that as per directions of Petroleum Division travel expenses were paid to complete Reko Diq investment formalities.

The DAC in its meeting held on December 22, 2023 directed the management to take up the issue with concerned offices for provision of certificates that expenses were not drawn from budgets of their respective offices.

Audit recommends to charge the travelling expenses to the accounts of PMPL and recover expenses from two Government officials.

[DP No. 2399]

2.7.2.4.6 Sale of LPG share of GHPL through JV operators without LPG sales agreements

According to Article 8.2 of Joint Operating Agreement of PCAs, “each of the working interest owners shall have the obligation to lift and separately dispose of its entitlement in all petroleum produced and / or stored at such times, in such quantities and in accordance with such procedures as may be agreed by all working interest owners.”

During audit of GHPL for the FY 2022-23, it was observed that GHPL was JV partner with other working interest owner in concessions and leases. GHPL authorised JV operators to sell LPG on its behalf, however, no LPG sale agreements were executed with POL, UEPL & OGDCL authorising them to sell GHPL’s share of LPG. During FY 2022-23 operators sold GHPL’s share of LPG of 46,197 M. Tone equivalent to an amount of Rs 10,978.290 million. This resulted in sale of LPG of Rs 10,978.290 million without executing LPG sales agreements as required under JOAs.

Audit was of the view that due to weak financial management, LPG sales agreements were not executed with operators by GHPL and without legal agreement for disposal of LPG, GHPL could not ensure recovery of sales revenue in case of any dispute between JV partners.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that LPG disposal agreements with PPL, UEPL and MOL had been executed whereas LPG disposal agreements with the rest of the operators had been finalized and were in the process of execution after seeking necessary approvals.

The DAC in its meeting held on December 22, 2023 directed the management to finalize the LPG agreements with OGDCL and POL and share the price comparison of executed agreements with Audit. No further progress was reported till finalization of the report.

Audit recommends to execute LPG sales agreement with operators at competitive prices besides implementing decision of DAC.

[DP No. 2396]

2.7.2.4.7 Non-conduct of audits of JVs accounts / related record by non-operators

According to Article 22.2 of PCA read with Clause 5(b) of JOA, “a non-operator, upon at least thirty days advance written notice to operator and other non-operator, shall have the right at its sole expense to audit the Joint Account and related records for any calendar year or portion thereof within twenty four months period following the receipt of the audited accounts of such calendar year.”

During audit of GHPL for the FY 2022-23, it was observed that GHPL did not conducted non-operator audit of 45 blocks out of 66 blocks / concessions. However, non-operator audit of 11 blocks was partially conducted. The minutes of Board Audit Committee revealed that internal audit department in last three and half years conducted non-operator audits of JV accounts resulting in credits / reversal of JV expenses to GHPL of over US\$ 600,000. Audit contended that non-operator audits were outstanding, despite the fact that as a result of non-operator audit, GHPL got credit / reversal of JV expenses of over US\$ 600,000 equivalent to Rs 165.000 million. It was also observed that internal audit department was working with 2 employees against the sanctioned post of 5 employees since 2019 despite the fact that GHPL had large portfolio of JVs.

Audit was of the view that weak oversight resulted in non-conduct of audit of JV's accounts / related record by non-operators.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that blocks were selected for non-operator audit on the basis of cost-benefit analysis. Audit requires that the working / evidence of factors for selection of non-operator audit along with statement showing time-gap as mentioned in reply may be shared with Audit.

The DAC in its meeting held on December 22, 2023 directed the management to complete JV audit activities and share the same with Audit. No further progress was reported till finalization of the report.

Audit recommends to complete the non-operator audit of the outstanding JVs.

[DP No. 2397]

JV Related Issues

2.7.2.4.8 Revenue loss due to delay in completion of Zafir Gas Processing Facility - Rs 8,453.000 million

According to Section 6 of Field Development Plan of Gambat South Block dated March 14, 2018, “the third gas processing facility (GPF-III) was to be installed near Wafiq X-1 location to cater the production of Wafiq X-1 and Zafir X-1 fields. The processing facility would be commissioned by October, 2018 and plant would be able to produce 40 MMSCFD of pipeline quality gas, 600 BBL/d of condensate and 12 M. Tones / day of LPG.”

During audit of GHPL for the FY 2022-23, it was observed that GHPL entered into Joint Venture with PPL (operator) in Gambat South Block with 25% share. According to Field Development Plan submitted to DG (PC) on March 14, 2018, PPL committed to install Zafir Gas Processing Facility (GPF-III) by October, 2018 for Zafir X-1 and Wafiq X-1 fields with capacity of 40 MMSCFD of pipeline quality gas, 600 BBL/d of condensate and 12 M. Tones / day of LPG. However, during TCM / OCM held in July 28, 2022, PPL informed that commencement of construction work of plant was subject to resolution of legal impediments / legal cases by the EPCC contractor.

Audit was of the view that non-completion of Zafir gas processing facility led to revenue loss of Rs 33,813.000 million to the JV, including GHPL’s share of Rs 8,453.000 million for the period from November, 2011 to June, 2023. GHPL could not play its part as JV partner which resulted in the loss of Rs 8,453.000 million to the organization. It may also be pointed out that extraordinary delay had resulted in lack of extraction of important domestic resource relying on imported products by that extent.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that contractor could not complete the facility within scheduled time despite follow up with the contractor therefore, operator terminated the contract in May, 2019. The contractor went into litigations against termination of contract at different forums and got stay order which were being pursued.

The DAC in its meeting held on December 22, 2023 directed the management to pursue the case vigorously.

Audit recommends to take up the matter with JV operator to find a solution to end litigation with contractor and share way forward / plan for completion of the project by the operator / JV partners with proposed completion date.

[DP No. 2381]

2.7.2.4.9 Delay in settlement of insurance claim of TAL block fire incident - Rs 1,138.500 million

According to Article 22.2 of PCA read with Clause 10.2 of JOA, “operator shall duly file all claims with respect to insurance arranged and maintained by the operator and shall take all necessary and proper steps to collect the proceeds.”

During audit of GHPL for the FY 2022-23, it was observed that a fire incident occurred on September 21, 2022 at TAL block’s warehouse, in which GHPL holds 15% working interest, caused extensive damage to inventory / spares. MOL (operator) filed an insurance claim with relevant insurers / loss adjuster based on initial estimates of US\$ 33 million equivalent to Rs 7,590.000 million having GHPL’s share of Rs 1,138.500 million. Further, operator developed consensus with all JV partners for the appointment of a single loss adjuster to assess the claims pertaining to all JV partners. However, this claim valuing Rs 7,590.000 million having GHPL’s share of Rs 1,138.500 million had yet to be realized despite lapse of more than fourteen months.

Audit was of the view that weak pursuance by GHPL, the management could not sensitize the operator on the issue.

The matter was reported to the management in September, 2023. The management in its reply dated December 11, 2023 stated that GHPL was actively pursuing the settlement of insurance claim and loss adjuster had verified the partial settlement based on procurements till July, 2023 amounting to approximately US\$ 13 million and this amount was expected to be received during December, 2023.

The DAC in its meeting held on December 22, 2023 directed the management to pursue the recovery of insurance claim.

Audit recommends to actively pursue the matter with JV operator for settlement of insurance claim.

[DP No. 2388]

2.7.3 Saindak Metals Limited (SML)

2.7.3.1(A) Introduction

Saindak Metals Private Ltd (SML) was incorporated in Pakistan as a private limited company on April 15, 1974 under the name of Resource Development Corporation Private Ltd. The name of the company was changed to Saindak Metals Private Ltd on October 03, 1993. SML was converted into public limited company on January 16, 1996. The registered office of the company is situated at Quetta and equity of the company is owned by GoP. The main objectives of the company are exploration, mining and metallurgical processing of copper, gold and other minerals located at Saindak in District Chagai, Balochistan.

SML leased its main plant to M/s MCC Resource Development Private Ltd (MRDL) of China for a period of ten years under the terms of lease contract dated November 30, 2001. The plant was handed over to MRDL on October 2, 2002. As per addendum No. 4 dated March 10, 2022 the lease agreement was extended up to October 31, 2037.

(B) Comments on Audited Accounts

The working results of the company for the FY 2021-22 as compared to previous years are as under:

(Rs in million)

Year	2021-22	% Inc / (Dec)	2020-21	% Inc / (Dec)	2019-20
Income	6,593.240	136.21	2,791.18	73.21	1,611.45
Administrative and general expenses	410.791	3.25	397.851	(4.777)	417.809
Share of Government of Balochistan	2,597.763	152.57	1,028.500	140.578	427.512

Total Comprehensive Income	2,437.076	72.783	1,410.48	41.75	995.017

(Source: Annual Audited Accounts)

- i) Administrative & general expenses increased by 3.25% from Rs 397.851 million in 2020-21 to Rs 410.791 million in 2021-22;
- ii) Books of accounts showed an outstanding liability of Rs 15,734 million to GoP. The said amount was repayable in instalments on demand to GoP, yet the repayment schedule of this liability had not been defined;
- iii) BoD expenses showed an increase of 321% from Rs 3.122 million in 2020-21 to Rs 13.142 million in 2021-22;
- iv) Trade and other payables of the company increased by 21.27% as they were Rs 59.480 million in 2021-22 as compared to Rs 49.045 million in 2020-21. Such a sharp increase in trade debts shows a weak credit policy of the management;
- v) The management placed an amount of Rs 17,338.258 million in 2021-22 and Rs 11,178.87 million in 2020-21 in short-term investments on interest rates of 7.76% to 15%. The surplus should had been placed in long-term investments to earn high profits; and
- vi) The company has a negative equity of Rs 504.991 million (2021: Rs 2,942 million) and an accumulated loss of Rs 504.992 million as of June 30, 2022 (2021: Rs 2,942 million). The company's current liabilities exceeded its current assets by Rs 2,371 million in 2021-22 as compared to Rs 5,337 million in 2020-21.

2.7.3.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 2,487.508 million were raised in this report during the current audit. Summary of the audit observations classified by nature is as under:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	-
A	Contract Management	15.610
B	Financial Management	2,471.898

2.7.3.3 Compliance of PAC Directives:

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	%age of Compliance
2010-11	3	3	0	100
2013-14	4	4	0	100
2015-16	4	0	4	0
2016-17	1	0	1	0
2017-18	4	4	0	100
2019-20	4	4	0	100
Total	20	15	5	75%

The overall compliance of PAC directives needs improvement.

2.7.3.4 Audit Paras

Contract Management

2.7.3.4.1 Finalization of lease contract without performance bank guarantee of US\$ 70,000 equivalent to Rs 15.610 million

According to Clause 20 of lease contract dated November 30, 2001, “on or before the effective date, lessee shall deliver to lessor the performance guarantee substantially in the form and substance set out in Annex-10 attached hereto duly executed by lessee or its parent company. Lessee’s failure to do so shall be deemed to constitute a breach and shall entitle lessor to terminate the Lease Contract.”

During audit of SML for the FYs 2019-20 to 2021-22, it was observed that addendum No. 4 was made at Islamabad on March 10, 2022 effective from November 1, 2022 between the SML and MCC/MRD L for the extension of the term of the lease contract until October 31, 2037 but Saindak Metals Limited management finalized the lease contract with MCC/MRD L without a performance bank guarantee. As per lessee contract Clause 5(i)(a) the annual rent payable by the lessee to the lessor starting from the date of effective shall be US\$ 700,000. This resulted in non-obtaining of a performance bank guarantee of US\$ 70,000 (US\$700,000 X 10%) Rs 15.610 million (70,000 x Rs 223).

Audit was of the view that weak financial management resulted in the execution of the lease contract without obtaining performance bank guarantee.

The matter was reported to the management in March, 2023. In DAC meeting held on September 26, 2023, the management stated that the company had written a letter to MCC/MRD L (Lessee) regarding the revalidation and submission of performance bank guarantee as soon as possible.

The DAC directed the management to submit revalidated performance bank guarantee within two months. No further progress was reported till finalization of the report.

Audit recommends to obtain re-validated performance bank guarantee from the contractor.

[DP No. 2321]

2.7.3.4.2 Non-compliance of contract regarding conducting pre-feasibility study for setting up copper refinery

According to Clause 6 of Addendum No. 2 dated May 18, 2011 of the lease contract signed between M/s Metallurgical Corporation of China Ltd (MCC) and SML, MCC/MRD L, at its own cost shall carry out a pre-feasibility study for setting up a copper refinery of an optimal size and at an appropriate site within Balochistan and submit the same to Government

of Balochistan as early as possible. If the refinery option is economically feasible and the GoB decides to go ahead with this venture, MCC/MRDL shall provide technical and financial support to GoB for its execution.

During audit of SML for the FYs 2019-20 to 2021-22, it was observed that contractual obligation of pre-feasibility study was not fulfilled by the MCC/MRDL management despite lapse of twelve years. The SML management failed to get the job done from the lessee as per contract.

Audit was of the view that in the absence of a pre-feasibility study, the objective of establishment of a copper refinery would remain elusive and the benefits that such a refinery could bring for the people of the area through employment generation and for the country. The refinery could add value to the current exports.

The matter was reported to the management in March, 2023. In DAC meeting held on September 26, 2023, the management stated that MCC/MRDL informed that they had already conducted discussions with SML and GoB, where GoB had provided essential conditions including copper refinery site option.

The DAC directed the management to submit a report to ensure implementation of Clause 6 of Addendum No. 2 dated May 18, 2011 regarding setting up a copper refinery within one week. No further progress was reported till finalization of the report.

Audit recommends to take disciplinary action against the officers / officials responsible for non-compliance of provisions of the contract besides ensuring setting up of copper refinery and submit report as per decision of DAC.

[DP No. 2324]

2.7.3.4.3 Non-compliance of Clause 10 of the lease contract regarding employment and training

According to Clause 10 of the lease contract with MCC / MRDL dated September 30, 2001, lessee hereby covenants with lessor that it shall employ only such expatriate professionals who have sufficient knowledge and expertise and such expatriates shall be replaced by qualified Pakistani staff gradually as provided in the employment plan. Further, according to agenda item No. 3 of minutes of SML / MRDL management meeting held on February 06, 2018, management noted that as per Clause 10 of agreement with MCC / MRDL after 10 years there should have been only 30-50 Chinese employees.

During audit of SML for the FYs 2019-20 to 2021-22, it was observed that as per agreement with MCC / MRDL, only 30-50 Chinese were required to be working at the project

site but more than 200 Chinese were employed violating contractual obligations and employment plan. This Clause was to be implemented in letter and spirit but MCC / MRDL violated it.

Audit was of the view that non-compliance of Clause 10 of lease contract resulted in unemployment and non-upgradation local human resource.

The matter was reported to the management in April, 2023. In DAC meeting held on September 26, 2023, the management stated that extensive on-job training had been imparted, with 800 trained staff transitioning to the local industry. SML management was monitoring activities and was satisfied with the employment and training conducted by MCC / MRDL.

The DAC directed the management to present evidence of Chinese trainers. DAC further directed to present a detailed report about the persons trained during the period and reduce the number of expatriates. No further progress was reported till finalization of the report.

Audit recommends to implement the Clauses of the contract regarding employment and training besides implementing the decision of DAC.

[DP No. 2330]

Financial Management

2.7.3.4.4 Non-implementation of BoD decision regarding CSR spending of Rs 1,872.000 million

According to Sr. No. 3.6 of minutes of 153rd BoD meeting of SML held on June 30, 2022, the board discussed the spending of 5% profit of SML being deposited in the GoB's account No. 01 against CSR and advised the management to take up the matter with GoB for ascertaining detail of the CSR amount spent. Board also advised the management to write a letter to the GoB to form a committee with SML representation to supervise the spending of funds of CSR for development in specified areas for which the amount is provided because under the rulers, SML is responsible for spending of CSR in the relevant areas and for intended purpose.

During audit of SML for the FYs 2019-20 to 2021-22, it was observed that an amount of Rs 1,872.000 million (US\$ 12.419 million) for the FYs 2013 to 2021 was provided to GoB for CSR. However, management of SML and MCC/MRD L had not devised any monitoring mechanism for spending of CSR funds. Further, the detail of projects / schemes on which CSR funds were spent was not provided to Audit. SML Board advised to the management to take up matter with GoB to constitute a committee for supervising the spending of the funds, but no progress had been made. This resulted in non-implementation of board's directives to constitute committee for supervision of the CSR funds of US\$ 12.419 million equivalent to Rs 1,872.000 million.

Audit was of the view that Petroleum Division had issued Social Welfare Guidelines for utilization of Social Welfare funds contributed by Exploration and Production companies' agreements for utilization in & around the license / lease areas in a fair and transparent manner. In the same manner, the guidelines for the utilization of CSR funds should had been framed.

The matter was reported to the management in March, 2023. In DAC meeting held on September 26, 2023, the management stated that the contractual agreement does not impose an obligation on SML to oversee the utilization or spending of these funds. The GoB has its own system to manage and control the budget allocated for CSR activities. It was important to note that the agreement does not include any Clause that grants SML, the authority or responsibility to monitor the spending of the CSR funds.

The DAC directed the management to take up the matter with GoB through the Petroleum Division.

Audit recommends to take up the matter with GoB through Petroleum Division to monitor the spending of the CSR funds.

[DP No. 2333]

2.7.3.4.5 Non-refund of Sales Tax on Services withheld by Balochistan Revenue Authority - Rs 407.000 million

According to Rule 28, of General Financial Rules, "no amount due to the Government should be left outstanding without sufficient reason".

During audit of SML for the FYs 2019-20 to 2021-22, it was observed that Balochistan Revenue Authority recovered an amount of Rs 407.000 million pertaining to the financial year 2018-2019 from SML by attaching accounts on the plea that it had provided services to M/s MCC/MRD L. SML filed appeal before Appellate Tribunal, Balochistan, against the decision of Commissioner (Appeals) of BRA. The appeal was decided in favour of SML on November 25, 2022 for refund of Rs 407.000 million to SML. The management

failed to recover this huge amount from BRA despite lapse of reasonable time, which prima facie, caused loss to the SML.

Audit was of the view that weak follow up resulted in non-refund of Sales Tax on Services withheld by Balochistan Revenue Authority.

The matter was reported to the management of SML in March, 2023. In DAC meeting held on September 26, 2023, the management stated that after favourable decisions, SML applied for refund of Rs 407.000 million withheld by BRA.

The DAC directed the management to pursue the refund case and get it verified from Audit. No further progress was reported till finalization of the report.

Audit recommends to pursue the matter with Balochistan Revenue Authority for early refund of withheld amount.

[DP No. 2325]

2.7.3.4.6 Imprudent investment of Rs 500.000 million in short term securities / bonds against Board's directives resulting in loss of interest income of Rs 192.898 million

According to Sr. No. 2.6 of the 115th Board's meeting held on September 08, 2012, regarding investment of Rs 500.000 million for the years 2012-13, "board appreciated the approach of the SML management in the best interest of organization and its survival in case of financial crises, as such the investment of Rs 500.000 million to be deemed as strategic investment and may be invested for 05 years. For the time being Rs 500.000 million may be invested in banks and Government securities / bonds to earn revenue / profit for the company. Director General (Mineral) and Additional Chief Secretary, GoB proposed, for investment of Rs 500.000 million business plan may be discussed in Board Finance Committee and same may be placed before the board for final approval."

During audit of SML for the FYs 2019-20 to 2021-22, it was observed that the management had received profit share of Rs 1,534.433 million for FY 2018-19 and Rs 2,710.397 million for FY 2019-20. The management invested these funds in short-term deposits of 3 to 12 months in different banks at 6.5% markup rates instead of investing in strategic investments / banks and Government securities / bonds for the long-term period at higher rates. This resulted in non-compliance of Board's directives regarding investment of funds in strategic investments as well as loss of interest income due to short-term investment at low rates as detail below:

(Rs in million)

Year	Share of profit received on	Profit share	long term interest rates on saving	Long-term investment Profits	Short term bank interest	Short-term investment profits	Difference
2019	September 18,	1,534.433	12.0	184.132	6.5%	99.738	(84.393)
2020	June 11, 2021	2,710.397	10.5	284.591	6.5%	176.175	(108.505)
			Total	468.958		275.914	192.898

Audit was of the view that weak financial management resulted in non-investment of funds in a strategic investment and loss of interest income.

The matter was reported to the management in April, 2023. In DAC meeting held on September 26, 2023, the management stated that it was committed to develop a comprehensive document for investment and it would be presented before board for approval. Subsequently, a strategic plan for long-term investment would be finalized. Newly formulated investment policies were also currently under the Board's deliberation. Once these policies finalized and approved by the Board, the management would subsequently explore the possibility of incorporating long-term investment strategies.

The DAC directed the management to share the agenda item and minutes of BoD meeting held on September 8, 2012 & February 12, 2020 along with reasons of non-compliance of Board's decisions to Audit for verification within one week. DAC further, directed the management to submit detailed revised reply including the decision of the board and the agenda presented before the board.

Audit recommends to submit detailed revised reply and share the agenda item, minutes of BoD meeting along with reasons of non-compliance of Board decisions to Audit for verification.

[DP Nos. 2328 & 2329]

2.7.4 SSGC LPG Ltd. (SLL)

2.7.4.1 Introduction

SSGC LPG Limited (SLL) started terminal operations in January, 2012 after acquisition of Progas assets in October, 2011. After which SLL started bottling operations in June, 2012 at the Port Qasim Plant and at the Hattar Plant in July, 2012. The first supply to the air mix segment (SNG) was made in April, 2012.

SLL is a fully integrated LPG marketing and distribution company capable of giving customers reliable and economic supply of product. Supply chain of the company extends from allocation from local producers and a fully owned import terminal at Port Qasim to supply consumer retail packs of LPG. Activities of the company start from the import of LPG extended to the storage, bottling, distribution and marketing of LPG both in bulk tanks and cylinders.

SLL has its main office in Karachi, regional offices in Islamabad, Lahore and a terminal office at Port Qasim, Karachi. Regional Distribution Centres are located in Haripur near Islamabad, Lahore. The company at present has 109 employees with qualified and experienced staff from the LPG industry. It has over 160 dealers nationwide.

2.7.4.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 593.113 million were raised in this report during the current audit. Summary of the audit observations classified by nature is as under:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	-
A	Procurement and Contract Related Issues	2.278
B	Others	590.835

2.7.4.3 Audit Paras

Procurement and Contract Related Issues

2.7.4.3.1 Irregular award of contract for procurement of services of Chartered Accountant - Rs 2.278 million

According to Section 20 of PPRA Rules, 2004, “the procuring agencies shall use open competitive bidding as the principal method of procurement for the procurement of goods, services and works.” Further, according to Rule 12(1) of ibid, “procurement over five hundred thousand Pakistani rupees and up to the limit of three million Pakistani rupees shall be advertised on the authority’s website in the manner specified by regulation by the authority from time to time. These procurement opportunities may also be advertised in print media, if deemed necessary by the procuring agency.”

During audit of SLL for the FYs 2019-20, to 2021-22, it was observed that the management incurred an expenditure of Rs 2.278 million on the procurement of services of Chartered Accountants firm for the audit of accounts for the FYs 2019-20 to 2021-22. The tender for these services were not uploaded on the authority as well as company’s website as detailed below:

(Rs in million)

Sr. No.	Name of Firm	Year of Audit	Amount
1	M/s Delottee	2019-20	0.884
2	M/s BDO Ebrahim & Co	2020-21	0.630
3	-do-	2021-22	0.764
		Total	2.278

Audit was of the view that the expenditure for procurement of services of Chartered Accountant Firms without uploading tender was irregular.

The matter was reported to the management in August, 2023. The management in its reply dated September 01, 2023 stated that SLL followed the procedure adopted by parent company and appointed the same auditors. Parent company i.e. SSGC appointed M/s Deloitte Yusuf Adil as their auditors till 2020 and SLL followed this practice. However, in 2021 SSGC changed auditors and appointed M/s BDO Ebrahim & Co therefore, SLL changed their auditors as per the recommendation of the Board.

The DAC in its meeting held on September 25, 2023 directed the management to take up the matter with PPRA for clarification. No further progress was reported till finalization of the report.

Audit recommends to implement the decision of DAC.

[DP No. 2361]

Others

2.7.4.3.2 Abnormal delay in refund of Income Tax of Rs 517.935 million

According to Section 170 of Income Tax Ordinance, 2001, “a taxpayer who has paid tax in excess of the amount which the taxpayer is properly chargeable under this Ordinance may apply to the Commissioner for a refund of the excess tax paid.”

During audit of SLL for the FYs 2019-20 to 2021-22, it was observed that the management paid Advance Income Tax in different years which had to be refunded from Income Tax Department. However, the same had been pending since 2012. Total refund of Income Tax amounting to Rs 517.935 million had been reflected in the Financial Statement as on June 30, 2022.

Audit was of the view that weak follow up by the management of SLL resulted in delay in getting refund of Income Tax.

The matter was reported to the management in August, 2023. The management in its reply dated September 01, 2023 stated that the company had regularly followed up the matter through its tax lawyers. All the previous returns of Income Tax were open and will now be finalized upon which the amount of refund will be determined by the tax department.

The DAC in its meeting held on September 25, 2023 directed the management to pursue the matter with FBR vigorously. No further progress was reported till finalization of the report.

Audit recommends to pursue the matter with FBR to finalize the case of refund of Income Tax.

[DP No. 2357]

2.7.4.3.3 Irregular payment of Signature Bonus to OGDCL for purchase of LPG - Rs 72.900 million

According to decision of OGRA dated June 22, 2018, “the Authority decides that LPG producers, in public or private sector, cannot charge signature bonus, as per approved LPG Policy.”

During audit of SLL for the FYs 2019-20 to 2021-22, it was observed that the company entered in sale purchase agreement with OGDCL (LPG producer) for procurement of LPG from February, 2017 to February, 2022 for 05 M. Tone per day for the period of 05 years and paid Signature Bonus of Rs 72.900 million to OGDCL. This resulted in irregular payment of Signature Bonus of Rs 72.900 million in violation of approved LPG policy.

Audit was of the view that weak financial controls resulted in irregular payment of Signature Bonus.

The matter was reported to the management in August, 2023. The management in its reply dated September 01, 2023 stated that the company approached OGDCL for getting the refund of the balance amount of Signature Bonus however, OGDCL replied that OGRA decision was prospective and OGDCL would not charge Signature Bonus in future. However, the amount already paid was for signing the contract for allocation of LPG and this amount or any part thereof would not be returned.

The DAC in its meeting held on September 25, 2023 directed the management to take up the matter with OGRA and conclude the matter within one month. No further progress was reported till finalization of the report.

Audit recommends to take up matter with OGDCL for refund of irregular paid signature bonus besides implementing the decision of DAC.

[DP No. 2354]

2.7.4.3.4 Non-compliance of the Public Accounts Committee (PAC) Directives

According to Para 1 of National Assembly Secretariat (Public Accounts Committee Wing) OM No. P.10 (4&7)/2012-PAC dated September, 03 2012, “the Public Accounts Committee directed in its meeting held on August, 29 2012 that the agenda and minutes of all the meetings of all the Executive Boards of all the State Corporations / Concerns, Autonomous and Semi-Autonomous Bodies, the audit of which may be conducted by the Auditor-General of Pakistan, must be brought on the websites of the said organizations immediately before and after holding the said meetings, accordingly.” Further, Part-2 of directions *ibid*, states that the Compliance Report on the above directives may be furnished to this Secretariat for the perusal of Public Accounts Committee.”

During audit of SLL for the FYs 2019-20 to 2021-22, it was observed that 27 meetings of BoD were held during the year. However, the management did not comply with

the PAC directives for uploading / publication of the minutes on its website. Audit contended that this shows clear violation of PAC directives by the management and reflects lack of transparency in the business of the company as BoD minutes were not made available to the stakeholders.

Audit was of the view that due to negligence of managements of the PSEs, the desired information was not available at website.

The matter was reported to the management in August, 2023. The management in its reply dated September 01, 2023 stated that the directives of PAC pertain to information which was not confidential nature and its dissemination may not be in the interest of the company and may also be in contravention of the Company Ordinance, 1984 and the Code of Corporate Governance. Therefore, it was not appropriate to legally comply with the directives of PAC.

The DAC in its meeting held on September 25, 2023 directed the management to implement the directives of the PAC.

Audit recommends to implement the PAC directives in letter and spirit.

[DP No. 2362]

Chapter-3
Cabinet Division

3.1 Oil and Gas Regulatory Authority

3.1.1 (A) Introduction

Oil and Gas Regulatory Authority Ordinance was established under Oil & Gas Regulatory Authority Ordinance, 2002. The objective of the Authority was to foster competition, increase in private investment and ownership in the midstream (storage & carrying) and downstream (storage & distribution) petroleum & gas industry of Pakistan, protect the public interest while respecting individual rights and to provide effective and efficient regulations for related matters. The Authority comprises of Chairman / Chairperson and three Members viz; Member (Gas), Member (Finance) and Member (Oil). They can serve for maximum of two terms, subject to retirement on attaining the age of 65 years. The Authority has the exclusive power to grant licenses for regulated activities with regard to Natural Gas, Compressed Natural Gas (CNG), Liquefied Petroleum Gas (LPG), Liquefied Natural Gas (LNG) and Oil sectors.

(B) Audit Profile of OGRA

Audit profile of OGRA under Cabinet Division is under:

(Rs in million)

Sr. No.	Description	Total No.	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
1	Formation / Autonomous Body (OGRA)	1	1	1,107.495	1,339.736

(Source: Annual Audited Accounts)

3.1.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 129,200.930 million were raised in this report during the current audit of OGRA. This amount also includes recoveries of Rs 210.973 million as pointed out by Audit. Summary of the audit observations classified by nature is as under:

Overview of Audit Observations

(Rs in million)

Sr. No.	Classification	Amount
1	Irregularities	-
A	Defective Financial Management	443.353
B	Violation of Rules / Regulations	128,757.577

3.1.3 Compliance of PAC Directives

Audit Year	Total Directives	Compliance Reported	Compliance Awaited	%age of Compliance
2006-07	5	4	1	80
2009-10	1	0	1	-
2010-11	7	7	0	100
2012-13	1	0	1	0
2013-14	14	12	2	86
2014-15	14	11	3	79
2015-16	3	1	2	33
2016-17	1	1	0	100
2017-18	27	16	11	59

2018-19	19	12	7	63
2019-20	13	4	9	31
Total	105	68	37	65%

The overall compliance of the PAC directives was very poor and required immediate attention of PAO.

3.1.4 Audit Paras

Financial Management

3.1.4.1 Non-deposit of surplus to the Federal Consolidated Fund - Rs 232.380 million

According to Section 17(4) of OGRA Ordinance, 2002, any surplus of receipts over the actual expenditure in a year, after payment of tax, shall be remitted to the Federal Consolidated Fund and any deficit from the actual expenditure should be made up by the Federal Government.

During audit of OGRA for the FY 2022-23, it was observed that the Authority did not deposit the surplus amount of Rs 232.380 million for the FY 2022-23 into Federal Consolidated Fund (FCF). It was also observed that OGRA has not complied with Treasury Single Account of the Government of Pakistan.

Audit was of the view that non-compliance of the Rules resulted in non-deposit of surplus receipts to the tune of Rs 252.380 million in FCF.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that surplus funds would be deposited after finalization of annual audited accounts. However, the Deputy Secretary (Expenditure Cabinet) emphasized that Finance Division on January 31, 2023 expanded the scope of Treasury Single Account and OGRA became part of Treasury Single Account, therefore cash management of OGRA would be dealt according to PFM Act, 2019.

The DAC directed OGRA to comply with requirements of PFM, Act, 2019 / Treasury Single Account. No further progress was reported till finalization of the report.

Audit recommends to deposit surplus in FCF besides ensuring the compliance of PFM, Act, 2019 regarding Treasury Single Account.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2020-21 & 2021-22 vide para numbers 3.1.7.3 & 3.1.4.3 having financial impact of Rs 1,026.259 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2605]

3.1.4.2 Short recovery of annual fee from OMCs, refineries and oil plants - Rs 210.973 million

According to Clause b of Schedule II of Pakistan Oil (Refining, Blending, Transportation, Storage and Marketing) Rules, 2016, annual fee of oil marketing companies, lubricant marketing companies and refineries is payable in advance at prescribed rate, for the first year and escalated with Government of Pakistan's CPI in subsequent years.

During audit of OGRA for the FY 2022-23, it was observed that Authority did not enhance the annual fee on the basis of escalation with Government of Pakistan's Consumer Price Index and continued to collect from 107 oil marketing companies (OMCs), lubricating marketing companies and 05 refineries, since 2018. This resulted in short recovery of annual fee to the tune of Rs 210.973 million.

Audit was of the view that weak financial management and non-observance of rules resulted in short recovery of annual fee.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that it had formulated Fee and Charges Rules, 2023 and sent to Cabinet Division on August 02, 2023 for vetting by Law and Justice Division. After promulgation of the said Rules, fee Clauses of all the rules would be amended and should be dealt accordingly. Audit contended that till the approval of new rules, the existing rules have to be followed.

The DAC was not satisfied with the stance of OGRA and directed that a fact-finding inquiry be carried out in the matter by the Joint Secretary (RA), Cabinet Division within one month. No further progress was reported till finalization of the report.

Audit recommends to fix responsibility on persons at fault and recover annual fee on escalation basis from 2018 onward.

[DP No. 2598]

Violation of Rules / Regulations

3.1.4.3 Undue delay in finalization of RLNG prices - Rs 103,082.892 million

According to Section 6(2)(r) of OGRA Ordinance 2002, "the Authority administers or establishes prices, for those categories of petroleum for which Federal Government establishes prices and may delegate the function to the Authority from time to time." The DG (Gas) vide letter No. DGO(AC)-5(235)/ 15-LNG-Vol.-I-Pt dated June 27, 2016 issued guidelines for determination of sales price of RLNG after approval from the ECC of the Cabinet and advise to implement the decision of ECC.

During audit of OGRA for the FY 2022-23, it was observed that the Authority failed to notify final RLNG price since the start of import of RLNG in 2015. This has resulted in multiple issues of payment between buyers and sellers of RLNG. For instance, an estimated

value for differential amount of Rs 103,082.892 million had accrued on SNGPL as payable to PSO and PLL. Further, SNGPL was also facing legal issues with the consumers of RLNG due to non-finalization of price.

Audit was of the view that the OGRA failed to discharge its regulatory function regarding notification of final RLNG price resulting in accumulation of huge amount of Rs 103,082.892 million.

The matter was reported to OGRA in August, 2023. In DAC meeting held on January 03, 2024, OGRA stated that scrutiny of data regarding determination of RLNG prices were at final stage and final RLNG prices would be notified by March, 2024.

The DAC directed OGRA to notify final RLNG prices at the earliest. No further progress was reported till finalization of the report.

Audit recommends to finalize RLNG prices without further delay and fix responsibility on the persons at fault for delay in finalization of price of RLNG.

[DP No. 2578]

3.1.4.4 Unjustified capitalization of meter replacement cost of SSGC despite failure to reduce UFG - Rs 15,147.195 million

According to Rule 17(h & J) of Natural Gas Rules, 2002, “tariff should generally be determined taking into account a rate of return as provided in the license, prudent operation and maintenance cost, depreciation, Government levies and if applicable, financial charges and cost of natural gas. And only such capital expenditure should be included in the rate base as is prudent, cost effective and economically efficient.”

During audit of OGRA for the FY 2022-23, it was observed that the Authority allowed SSGC the capitalization of Rs 12,000.000 million for replacement of 50% of its total domestic meters with new ones to reduce UFG from 2013-14 to 2018-19. These expenditures were capitalized and its incidence was passed on to general public. Despite this, UFG of SSGC increased to 18.28% from 13.82%. This resulted in unjustified determination of final revenue requirement amounting to Rs 15,147.195 million of SSGC despite failure to reduce UFG.

Audit was of the view that due to weak monitoring, the OGRA failed to protect interest of consumers because SSGC could not reduce its UFG losses despite incurring huge expenditure on meter replacement.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that factors contributing towards the UFG include

gas theft, leakages etc. The “meter replacement” activity serves as a contributing element within the broader UFG reduction strategy.

The DAC directed OGRA that legal provision regarding change / replacement of gas meters may be shared with Audit for verification. No further progress was reported till finalization of the report.

Audit recommends to justify capitalization of meter replacement cost without ensuring that their intended purpose was achieved or not.

[DP Nos. 2587]

3.1.4.5 Excess expenditure due to imprudent decision making by OGRA - Rs 10,454.696 million

According to Section 6(2)(u) of OGRA Ordinance, 2002, “the Authority shall oversee the capital expenditure to be made by licensees for natural gas in connection with any regulated activity pertaining to natural gas.”

During audit of OGRA for the FY 2022-23, it was observed that OGRA approved a project for laying of 230 Km pipeline of 18” diameter at total cost of Rs 18,495 million on June 24, 2022 for injection of gas of Bannu West gas fields in to SNGPL network. Member (Gas) pointed out that the similar purpose could be achieved through 70-100 kms instead of 230 km long pipeline. The issue was first communicated to SNGPL in July, 2022 and again in November, 2022. However, SNGPL replied on December 06, 2022 that the Authority raised query after lapse of 120 days and completion of 150 Km pipeline. This resulted in imprudent decision by the Authority leading to approval of project which was not cost effective with an excess cost of Rs 10,454.696 million.

Audit was of the view that lack of due diligence resulted in undue transfer of burden of Rs 10,454.696 million to the end consumers of SNGPL.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that selection of pipeline route did not necessarily mean selecting the shortest route.

The DAC was not satisfied with the stance of OGRA and decided that a fact-finding inquiry may be carried out at the level of Cabinet Division, within a month by Joint Secretary (RA) (Chairman) and Chief Finance & Accounts Officer (Member). No further progress was reported till finalization of the report.

Audit recommends to fix responsibility on persons at fault for slack pursuance and lack of due diligence.

[DP No. 2583]

3.1.4.6 Ineffective regulatory oversight of LPG sector - Rs 29.620 million

LPG (Production & Distribution) Rules, 2001 and Policy 2016 regulate the business of LPG in Pakistan wherein OGRA, as the regulator, has been assigned to fulfil the following conditions:

- i) Registration of authorized distributors of LPG marketing companies and maintaining their database (Clause 3.6.4 of Policy);
- ii) Ensuring provision of serial number of their cylinders to OGRA by LPG marketing companies each year, confirming that the cylinders have been properly tested as per requirement of the LPG Rules / Standards (Clause 3.6.7 of Policy); and
- iii) Ensure that no licensee shall operate its works including filling plants, storage, transportation and distribution of LPG unless the same are insured (Rule 27 of Rules).

Further, the Senate Standing Committee on Cabinet on February, 2023 directed OGRA to enhance penalty to be imposed on manufacturers selling sub-standard cylinders through legal provision. OGRA committed for establishment of dedicated enforcement department to safeguard the public interest and enforce safety standards in collaboration with local / district management.

During audit of OGRA for the FY 2022-23, it was observed that as per website of OGRA, 280 LPG marketing companies were operating in the country. Out of these, only 95 provided the list of their 5,924 authorized distributors. OGRA, however, could not register these distributors meaning thereby that it could not recover the registration fee from these distributors to the tune of Rs 29.620 million. OGRA could not ensure submission of list of distributors from remaining 185 companies.

Further, OGRA did not ensure compliance of policy regarding submission of annual list of their cylinders by marketing companies. OGRA also failed to take steps, as committed before Senate Standing Committee, for establishment of dedicated enforcement department for LPG safety. Moreover, OGRA did not provide details regarding insurance against loss and damage to the public life and property by LPG marketing companies.

Audit was of the view that due to weak monitoring of LPG sector resulted in revenue loss of Rs. 29.620 million and non-compliance of safety standards to safeguard human lives and property.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that it was constantly pursuing marketing companies for registration of their distributors and action against illegal LPG decanting shops, illegal

manufacturers fall under purview of the provincial / district authorities which involved sealing of illegal shops / registration of FIRs against the offenders. Further, it was stated that under the provisions of LPG Rules, 2001, the responsibility of insurance against loss and damage to the life and property was on the licensee. OGRA had been obtaining valid insurance certificate from the applicants / LPG companies. Audit contended that reply was not tenable as according to policy and licence conditions, companies were required to submit detail of cylinders to OGRA.

The DAC directed OGRA to ensure the availability of all the lists of authorized distributors immediately and to ensure compliance with LPG Policy, 2016. DAC further directed OGRA to ensure that a mechanism be developed for insurance of LPG marketing companies and the insurance certificates of all 280 LPG marketing companies were verified from Audit, without delay. No further progress was reported till finalization of the report.

Audit recommends to ensure compliance of LPG (Production & Distribution) Rules 2001 and Policy 2016 by the regulator.

[DP Nos. 2585, 2589 & 2594]

3.1.4.7 Irregular purchase of vehicles during ban period - Rs 22.024 million

According to Finance Division's direction dated February 27, 2023 "there shall be a complete ban on purchase of all types of vehicles till June, 2024".

During audit of OGRA for the FY 2022-23, it was observed that the Authority purchased four vehicles for Rs 22.024 million in violation of Government's instructions. This resulted in irregular purchase of vehicles during ban period.

Audit was of the view that non-compliance of Finance Division's instructions resulted in purchase of vehicles during ban period.

The matter was reported to the management in September, 2023. In the DAC meeting held on January 03, 2024, OGRA stated that Finance Division's referred OMs regarding austerity measure was not applicable on OGRA. Audit contended that since the expenses of the Authority directly linked with the FCF, therefore, it was bound to abide by these instructions.

The DAC directed OGRA to get the reported matter regularized from Finance Division. Besides, exemption may be sought from Finance Division in future. No further progress was reported till finalization of the report.

Audit recommends to get the matter regularized from Finance Division besides ending practice to violate directions of Finance Division in future.

Note: The issue was reported earlier also in the Audit Reports for Audit Years 2021-22 & 2022-23 vide para numbers 3.1.4.7 & 3.1.4.6 having financial impact of Rs 22.404 million. Recurrence of same irregularity is a matter of serious concern.

[DP No. 2606]

3.1.4.8 Irregular hiring of third-party inspector for CNG - Rs 21.150 million

According to Sections 48 (3) & (7) of PPRA Rules, 2004, “any bidder feeling aggrieved by any act of the procuring agency after the submission of his bid may lodge a written complaint concerning his grievances within seven days of announcement of the technical evaluation report and five days after issuance of final evaluation report.” Any bidder or party not satisfied with the decision of the GRC may file an appeal before the authority (i.e. PPRA) within thirty days of communication of the decision”. Further, according to Clause V of expression of interest for pre-qualification of third-party inspectors to inspect CNG works / installations / stations published in the daily Dawn Islamabad on December 07, 2019 “TPI should have no direct / indirect interest in the CNG industry.”

During audit of OGRA for the FY 2022-23, it was observed that the management invited applications for third party inspectors (TPI) of CNG in December 2019, in which six firms were qualified. One of the two disqualified firms namely M/s Askari Trading lodged complaint with Grievance Redressal Committee (GRC) after expiry of the stipulated seven days’ period. On rejection of its complaint by GRC, the firm filed the appeal before OGRA, which admitted it and set aside the decision of the GRC. As per PPRA Rules, appeal against GRC could only be lodged with PPRA and not OGRA. Subsequently, contract for inspection of 423 CNG stations was awarded to the firm for Rs 21.150 million in violation of set criteria.

Audit was of the view that due to non-compliance of PPRA Rules, the award of contract of Rs 21.150 million was irregular.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that conflict of interest about M/s Askari Trading was noted. The company made appeal before OGRA which was decided under Section 10 and 12 of OGRA Ordinance, 2002. However, CF&AO opined that contention of Audit was correct.

The DAC directed OGRA to refer the matter to PPRA for consideration and decision. No further progress was reported till finalization of the report.

Audit recommends to conduct a fact-finding inquiry and fix responsibility on persons at fault.

3.1.4.9 Defective determination of sales price of gas resulting in discrimination in sales prices for fertilizer sector

According to Section 8(1) of OGRA Ordinance 2002, “the Authority shall determine an estimate of the total revenue requirement of each licensee for natural gas engaged in transmission, distribution and sale of natural gas to a retail consumer for natural gas, in accordance with the rules, and on that basis advise the Federal Government the prescribed price of natural gas for each category of retail consumer for natural gas.” Further according to Section 8(4), “if the Federal Government fails to advise the Authority within specified time, the Authority shall notify in the official Gazette the prescribed price as determined by the Authority to be the sale price for the said category of retail consumers for natural gas.”

During audit of OGRA for the FY 2022-23, it was observed that OGRA increased sale price of gas w.e.f. January 01, 2023 for fertilizer producers on the system of SNGPL and SSGC to Rs 510 per MMBTU for feed-stock and Rs 1,500 per MMBTU for fuel on February 15, 2023. Gas was being supplied to fertilizer sector not only by SNGPL and SSGC but also by MPCL. However, the price for MPCL was not changed which was at Rs 302 per MMBTU for feed-stock and Rs 1,023 per MMBTU for fuel. From January, 2023 to June, 2023, MPCL supplied gas of 34.549 MMBTU for feed stock and 7.849 MMBTU for fuel stock to five fertilizer producers on its system. This resulted in reduction in GDS to be deposited by MPCL in the government exchequer.

Audit was of the view that unjustified decision of the Authority led to supply of gas to different fertilizer producers at different rates without any cogent reason.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that gas sales price was to be fixed by Federal Government and not by OGRA. Audit contended that there was disparity between different gas companies and needed to be addressed at appropriate level.

The DAC was not satisfied with the stance of OGRA and therefore directed to OGRA to arrange a presentation in this regard at the earliest possible. OGRA was further directed to furnish revised reply to audit in-consultation with DG (Gas), within a week, elaborating legal position. OGRA was also directed to provide a copy of license to Audit about MPCL.

Audit recommends that the issue of disparity should be taken at appropriate level and resolved.

3.1.4.10 Non-finalization of 632 appeals since 2015

According to Section 12(1) of Oil and Gas Regulatory Authority Ordinance 2002, “the Authority shall hear and decide the appeal, within ninety days from the date of its presentation”.

During audit of OGRA for the FY 2022-23, it was observed that the Authority was taking more than specified period of time in deciding fate of appeals against decision of designated officer on complaints against the gas utility companies or their consumers. It was noticed that 133 appeals were decided with a delay of more than 04 years. Further, 632 appeals were pending before the Authority for decision since 2015.

Audit was of the view that due weak regulatory oversight the Authority failed to protect interests of consumers and licensees.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that Authority made diligent efforts to decide maximum number of appeals during last fiscal year although it was an ongoing process and back log was being cleared out expeditiously.

The DAC directed OGRA to decide left over appeals expeditiously. No further progress was reported till finalization of the report.

Audit recommends to decide the appeals pending before the Authority at the earliest besides ensuring decision of appeals within stipulated time in future.

[DP No. 2579]

3.1.4.11 Non-conducting inspection of oil tankers and containers posing serious risk to human life and property

According to Section 6(2)(o) of OGRA Ordinance 2002, “the Authority shall safeguard the public interest, including the national security interest of Pakistan in relation to regulated activities in accordance with this Ordinance, Rules and Regulations.” Further, a committee of OGRA in its report on oil tanker accident at Ahmad Pur East (Bahawalpur) vide report dated July 06, 2017 recommended “OGRA to ensure implementation of the OGRA notified technical standards for road transport vehicle, container and equipment for transportation of Petroleum 2009 through its third-party inspectors or its own.” The committee also recommended that “each OMC to furnish a timeline action plan for conversion of tank lorries of their contractor to the applicable safety laws / rules and regulations in the shortest possible time period.”

During audit of OGRA for the FY 2022-23, it was observed that the Authority did not fulfil its responsibility for inspection of oil tankers and LPG containers as required by

the recommendations of the inquiry committee stated above. Mechanism for inspection to ensure adherence to technical standards and safety protocols by OMCs / LMCs was also not developed. By not conducting inspections the authority was putting lives and property of general public at risk.

Audit was of the view that lack of monitoring mechanism resulted in use of non-compliant vehicles for transportation of petroleum products.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that transportation through oil tankers was not a regulated activity and did not require OGRA's license under the Oil Rules, 2016. It was further elaborated that reported matter actually pertained to Department of Explosives. Audit contended that under OGRA Ordinance, it is the responsibility of Authority to safeguard the public safety.

The DAC directed OGRA to furnish revised reply to Audit, within a week, elaborating effort made by OGRA being regulator to safeguard human life while transporting petroleum products. No further progress was reported till finalization of the report.

Audit recommends to take corrective action to ensure compliance of technical standards and safety protocols for safety of human lives and property in future.

[DP No. 2577]

3.1.4.12 Ineffective regulatory oversight and non-compliance of LPG Policy and conditions of licences

According to Clause (viii) of License for construction of LPG storage and filling plant, "quarterly report on prescribed proforma shall be submitted to the authority on regular basis." Further, according to Clause (xii) of Filling and Marketing License of LPG, "monthly distribution report on the prescribed proforma shall be submitted to the authority on regular basis." Furthermore, according to Clause (xvi) of License for CNG station, "progress report will be submitted to Authority on regular basis." Moreover, according to Section 3.6.2 of LPG Production and Distribution Policy, 2016, "OGRA will also apprise the Petroleum Division about the implementation status of this Policy on a quarterly basis."

During audit of OGRA for the FY 2022-23, it was observed that Authority did not provide copies of reports / returns submitted by the licensees. The Authority also did not

ensure submission of reports / returns by the licensees in compliance with the conditions of licenses issued to licensees. Further, copies of reports about the implementation status of LPG Production and Distribution Policy, 2016 submitted to Petroleum Division were not provided to Audit. The non-provision of the returns / reports indicated that OGRA failed to ensure compliance of provisions of LPG Production and Distribution Policy, 2016 and conditions of licenses issued to CNG / LPG marketing companies.

Audit was of the view that due to weak monitoring, the Authority failed to enforce compliance of the conditions of licenses and provisions of LPG Production and Distribution Policy, 2016.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that monthly distribution reports were updated on regular intervals on monthly basis and also available on OGRA's website. Likewise, each file in respect of CNG stations was made available for perusal by the audit team. Hence, the question about improper performance of regulatory functions did not arise. Audit contended that reply was not tenable as OGRA did not ensure compliance with license conditions and LPG Policy, 2016 requiring submission of returns by the licensees. Further, licenses were issued under rules and compliance to license conditions was not only mandatory for licensees but also it was one of the core responsibilities of OGRA to ensure compliance.

The DAC directed OGRA to ensure compliance with license conditions and LPG Policy, 2016. No further progress was reported till finalization of the report.

Audit recommends to ensure compliance with license conditions besides, taking steps to improve monitoring mechanism and compliance with the Policy by the Regulator.

[DP No. 2595]

3.1.4.13 Non-determination of final wellhead gas price in respect of 73 fields

According to Rule 3 of Natural Gas Wellhead Price Regulations, 2009, "the Authority on its motion or upon application made to it by a producer or any interested person shall determine the well-head price in accordance with the terms and conditions of the relevant agreement and the well-head price so determined shall be notified in the official gazette."

During audit of OGRA for the FY 2022-23, it was observed that wellhead gas price data of DG (Gas) showed that Authority failed to notify the final wellhead gas prices in 73 cases. This resulted in non-determination of final wellhead gas prices of these fields.

Audit was of the view that due to weak regulatory oversight, the Authority failed to determine final wellhead gas price for the producers of natural gas which may lead to litigation in future.

The matter was reported to the management in September, 2023. In DAC meeting held on January 03, 2024, OGRA stated that wellhead prices were determined on completion of requisite documentation and due scrutiny. However, Audit suggestions had been noted.

The DAC directed OGRA to resolve the issue at the earliest. No further progress was reported till finalization of the report.

Audit recommends to ensure finalization of wellhead gas prices in the pointed out 73 cases without further delay.

[DP No. 2603]

3.1.4.14 Non-compliance of ECC decision regarding verification of RLNG diverted to domestic / commercial sector

According to ECC's decision dated July 03, 2020, OGRA was provisionally allowed recovery of RLNG revenue shortfall considering the month wise actual RLNG volumes diverted to domestic / commercial sectors by SNGPL and any amount available in the deferral account would also be adjusted while actualizing the RLNG sale price subject to verification of volumes supplied to domestic and commercial consumers by OGRA.

During audit of OGRA for the FY 2022-23, it was observed that funds amounting to Rs 81,554 million were released by DG (Gas) as subsidy to SNGPL on account of RLNG diversion to domestic sector from 2021-22 to 2022-23. As per ECC's decision, OGRA was required to verify RLNG volumes diverted to domestic / commercial sectors by SNGPL but the Authority failed to do the same despite lapse of more than 3 years. This resulted in non-verified payment of subsidy to SNGPL for RLNG diversion.

Audit was of the view that due to weak regulatory oversight, the Authority failed to verify RLNG diverted to domestic / commercial sectors which may lead to litigation in future.

The matter was reported to the management / DG (Gas) in September, 2023. DG (Gas) in its reply dated December 14, 2023 stated that as per SNGPL's claims, company had diverted RLNG of Rs 354.600 billion from 2018 to September, 2023. If any variation would be identified in third party audit report by OGRA, the same would be later adjusted.

Audit contended that payment on RLNG diversion without verification of actual monthly volume by OGRA was violation of ECC's instructions.

The DAC in its meeting dated December 20, 2023 directed the DG (Gas) to pursue the matter with OGRA for early finalization of 3rd party audit of RLNG and finalize / adjust the amount. No further progress was reported till finalization of the report.

Audit recommends to fix responsibility on the person(s) responsible for non-compliance of ECC's directives besides early finalization of 3rd party audit of RLNG.

[DP No. 2508]

THEMATIC AUDIT

Chapter-4

Thematic Audit

Licensing Regime of Department of Explosives

4.1 Introduction

Department of Explosives (DoE) issues licences to manufacturers, importers and exporters of explosives as well as for their transportation, storage and sale. Licenses are also issued for refining & blending of petroleum, handling of compressed / liquified gases, petrochemicals and other inflammable substances. DoE regulates and controls the production, handling, storage, transportation and use of explosives with a view to prevent accidents, unauthorized use, and potential threats to public security.

The licensing regime of DoE is instrumental in regulating the use of explosives for industrial and commercial purposes. Industries that commonly use explosives include mining, construction, quarrying and certain areas of exploration & production (E&P) sector where explosives are used in blasting, excavation and well perforation.

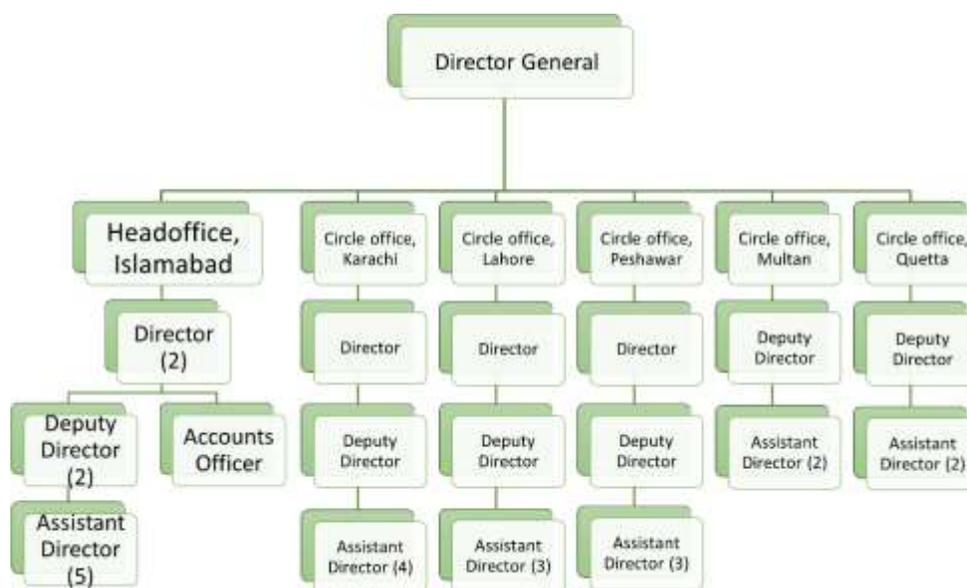

Realizing the importance of licensing regime of DoE with cross sectoral influences, thematic audit was undertaken to identify gaps and their probable solutions.

4.2 Background

DoE used to work under the Industries and Production Division. Its control was entrusted to Petroleum Division on April 14, 2020. Legal foundations for DoE were drawn from Explosives Act, 1884. Currently, Explosives Rules, 2010 are in place to govern manufacturing, storage, possession, sales, use, transport, import and export of explosives. Petroleum Act, 1934, Petroleum Rules, 1937, Carbide of Calcium Rules, 1937 and Mineral & Industrial Gas Safety Rules, 2010 authorize DoE to issue licence for storage, transport, sale and import of hydrocarbons.

On June 30, 2023, there were overall 29,363 active licences for hydrocarbon whereas 380 licences for explosives. Twelve types of licences are issued under Petroleum Rules and eight types of licences are issued under Explosives Rules.

Organizational Chart of DoE is as follows:

4.2.1 Types of Licenses issued under Petroleum Act, 1934

Form Name	Type of license
A	License for storage of mineral gas for distribution
B-1	License to manufacture / store / sale and dispense compressed natural gas
C	License to store Carbide of Calcium
K	License to store petroleum in a tank or tanks in connection with a dispensing unit for fuelling motor conveyances
L	License to import dangerous petroleum and to store petroleum in installations (Bulk Depots and in industries for self-consumption)
M	License to import and store dangerous petroleum otherwise than in bulk and to store otherwise than in bulk (a) non-dangerous petroleum in quantity exceeding 25,000 liters or (b) partly dangerous petroleum and partly non-dangerous petroleum

N	License to store and sale liquefied petroleum gas in a tank or tanks & dispense liquefied petroleum gas in connection with a dispensing unit for fuelling motor conveyances
O	License to import/store/sale liquefied petroleum gas in installation (Plants) for filling in cylinders
P	License to store liquefied petroleum gas of quantity exceeding to 100 liters for self-use in industries and other places
Q	License to transport petroleum product in bulk on land by mechanically propelled vehicle
R	License to transport liquefied petroleum gas in bulk on Land by mechanically propelled vehicle
S	License to transport compressed natural gas in bulk on Land by mechanical propelled Vehicle transport liquefied petroleum gas in bulk on Land by mechanically propelled vehicle

4.2.2 Types of Licenses issued Explosives Act, 1884

Form Name	Type of license
EL-01	License (a) to manufacture Explosives other than fireworks, gunpowder and ANFO at site. (b) To manufacture fireworks and or gunpowder more than 15 kgs
EL-02	License to possess and sell Explosives
EL-03	License to possess and use Explosives
EL-05	License To possess and sell from a shop small-arms nitro-compound not exceeding 25 kgs or fireworks not exceeding 200 kgs or gun powder not exceeding 50 kgs and safety fuse not exceeding 10000 meters

EL-06	License to transport petroleum product in bulk on land by mechanically propelled vehicle
EL-08	License to import Explosives
EL-09	License to export Explosives otherwise than by land
EL-10	Grant of public display of fireworks

4.3 Establishing the Audit Theme

4.3.1 Reasons for Selection

Intrinsic intricacies and sensitivities involved in licensing regime of DoE required detailed study of underlying dynamics to assess the effectiveness of controls for ensuring implementation of the stated purpose of licensing regime. Thematic Audit of DoE was aimed at evaluation of the process of granting, monitoring and enforcement of terms and conditions of licenses to regulate sensitive sectors of petroleum and explosives. Purpose of this audit was to assess whether the stipulated regulations were being followed effectively, identifying potential gaps, risks and weaknesses of the licensing process.

4.3.2 Purpose

Thematic Audit was to analyse functioning of licensing regime of DoE highlighting mismanagement in the process leading to public insecurity. Therefore, in the public interest it was required that the licensing process be examined to identify areas for improvement ensuring compliance with relevant regulatory standards. The focus of Thematic Audit was to ascertain whether safety measures were in compliance with applicable laws, regulations, and industrial standards and to review the processes related to grant, amendment, monitoring and renewal of all licenses under the administrative domain of the department.

4.3.3 Scope / Objective

The audit was conducted for the FY 2022-23 with the following scope:

- i) to check the strength of mechanism available for issuance, monitoring and enforcement of licenses;
- ii) to ascertain whether retail outlets of petroleum products are established after obtaining licenses from DoE or otherwise;
- iii) to assess compliance with terms and conditions for grant of permanent and short-term licenses under Explosives Rules, 2010;
- iv) to check whether Department had close liaison with other stakeholders i.e. OGRA, OMCs & District Authorities; and

- v) to check the internal controls of the Department with regard to collection of fees and dues accrued on account of licenses.

4.4 Legal framework Governing the Licensing Regime

The licensing regime of the DoE is governed under the following acts and rules:

- i) Explosives Act, 1884;
- ii) Explosives Rules, 2010;
- iii) Petroleum Act, 1934;
- iv) Petroleum Rules, 1937 (amended 2010);
- v) Carbide of Calcium Rules, 1937; and
- vi) Mineral and Industrial Gases Safety Rules, 2010.

In pursuance of above-mentioned legal instruments, DoE had notified detailed procedure for issuance, renewal, monitoring, inspections, inquiries, suspension and cancellation of licenses. Explosives and Petroleum Rules provide the required documents for each category of license. Licensing process involves various steps including verifications, NOCs, approvals of various Government departments and physical inspections by the respective regional office of DoE.

4.5 Stakeholders and governmental organizations identified as directly / indirectly involved

Following stakeholders and government organizations involved in licensing regime of DoE are enumerated as under:

- i) Ministry of Energy (Petroleum Division);
- ii) Oil & Gas Regulatory Authority (OGRA);
- iii) Ministry of Interior;
- iv) Concerned District Authorities;
- v) Defence Production Division;
- vi) Oil Marketing Companies (OMCs);
- vii) LPG / LNG / CNG Marketing Companies;
- viii) Explosives manufacturers, suppliers & users;
- ix) Public safety organizations i.e. fire-fighting departments, emergency response teams, and bomb disposal units; and
- x) General public.

4.6 Role of important organization

Petroleum Division

Petroleum Division is the administrative division of the DoE which makes amendments, frames rules, regulations, guidelines and policies to be submitted to the Federal Government for approval and circulation of the same amongst all stakeholders thereafter. Petroleum Division is responsible for issuance of instructions and directives to DoE from time to time in order to ensure that the Department carries out its operations with regard to vigilance of activities of the license holders. The division ascertains that the government policies and instructions are implemented as per rules and regulations through DoE. The subject of “explosives” had been devolved to provinces after 18th amendment in the Constitution of the Islamic Republic of Pakistan. However, Federal Government was still administratively controlling DoE. Its control to the respective provincial governments had not yet been transferred. DoE liaises with other governmental stakeholders through Petroleum Division.

OGRA

OGRA is, ab initio, enshrined with the task to regulate oil and gas sector in terms of qualitative and quantitative derivatives. It also issues marketing licenses to OMCs, CNG stations, LPG, LNG companies and gas utility companies. DoE authorizes Oil Marketing Companies (OMCs) for storage of petroleum products in such a manner to determine the establishment of number of retail outlets in the provinces in addition to ensuring security and safety of human lives and property. After July, 2021 DoE in close liaison with OGRA is ensuring implementation of retail outlets vs developed storage capacity.

Ministry of Interior

Ministry of Interior is responsible for enforcing law and order through provincial governments and Law Enforcement Agencies in order to safeguard human lives and property within the country. To ascertain the prime objective of security of the nationals of Pakistan, it extends guidelines, SoPs and instructions for manufacturing, storage, use and transportation of explosives within the country in consultation with DoE. No Objection Certificate (NOC) from Ministry of Interior is mandatory for grant of licenses for manufacturing, storage and sale of explosives and petroleum products.

Defence Production Division

Défense Production Division (DPD) procures and manufactures arms, weapons, ammunition, equipment, stores and explosives for defence forces. It also procures / imports warfare equipment and ammunitions from local and international manufacturers of explosives. In this way, DPD eliminates illegal production and procurement of explosives by unauthorized persons. DoE plays vital role in furthering the mandate of DPD by submitting cases to it for seeking No Objection Certificate before issuance of licenses for explosives under Explosives Rules, 2010.

District Authorities

An applicant, aspirant of establishing retail outlets for marketing and sale of petroleum products, applies to the concerned district authorities for seeking NOC for the site proposed. The District Authority i.e. Deputy Commissioner grants NOC to the applicant regarding establishment of retail outlets of petroleum products after obtaining necessary reports from concerned Assistant Commissioners, Highway Department, Civil defence, Sui Gas Company, Environment Department, Municipal Corporation, Electricity Utility Company, Irrigation Department, Telephone Department, Police Department, Forest Department, Revenue Department and Building Control Authority. Further, Rule 130 of Explosives Rules, 2010 and Rule 131 of Petroleum Rules, 1937 empower district authority to check and inform DoE of the action taken on any reports of infringements of the relevant Acts or the Rules.

4.6.1 Organization Financial

Federal Government provides recurring and non-recurring budget to the DoE. Non-tax receipt of the department includes license fees, renewal fees which become part of Federal Consolidated Fund. Detail of financials of the DoE for the last three years are given as under:

(Rs in million)

Sr. No.	FYs	Receipts		Expenditure	
		Target	Realized	Allocation	Expenditure
1	2020-21	350	662	91	86
2	2021-22	848	548	96	93
3	2022-23	2000	512	102	108

(Source: DoE Receipt and Expenditure Statements)

Department could not achieve receipt targets due to weak receipt collection mechanism and unrealistic receipt target.

4.7 Field Audit Activity

4.7.1 Methodology

Thematic Audit of Licensing Regime of Department of Explosives (DoE) was planned and conducted in accordance with the Government Auditing Standards based on guidelines of the International Organization of Supreme Audit Institutions (INTOSAI).

During the entire auditing cycle, the team followed a gradual and integrated approach which comprised planning at execution stage, examining compliance with laws, rules, regulations, instructions, computer-aided techniques, organizational files / documents and interviewing the various tiers involved. The audit methodology was based on structured approach starting from study of relevant rules and regulations, licensing process, organizational structure, previous audit reports and budget and expenditure statements of previous years. Field activity included analysing data of the license issued and receipts actualized, walk through the process, reviewed license applications and inspection reports.

4.8 Audit Analysis

4.8.1 Review of Internal Controls

Internal controls are the procedures and practices put in place by the department to ensure compliance with laws and regulations. The review of internal controls in the licensing regime of the DoE is an essential process to ensure the effectiveness and efficiency of the regulatory framework. This includes evaluating the adequacy and effectiveness of processes such as application processing, license issuance, monitoring and enforcement. Audit observed several potential internal control weaknesses i.e. shortage of human resource, weak logistics support, lack of automation and financial constraints badly effecting performance of the department. Under-staffed and insufficient number of territorial offices of DoE were hampering effective monitoring and inspection by the department. Thus, disabling the DoE to discharge its prime responsibilities in an effective and efficient manner weaknesses may compromise the effectiveness and integrity of the licensing process, potentially leading to safety and security risks. Internal audit mechanism did not exist in the department to provide assurance, identify risks, ensure compliance, improve operational efficiency and support the achievement of organizational targets.

4.8.2 Critical Review

Audit highlighted systemic flaws in the DoE's regulatory framework of explosives sector, in the wake of 18th amendment and its supervision practices and enforcement mechanisms. Federal Government was not authorised to get any legislation on the subject but the functions were not yet devolved to the provinces creating a dichotomy of authority. The department failed to enforce license conditions, allowing manufacturing companies to manufacture unlimited quantities of explosives during the year. The current system suffers from several shortcomings that hinder the efficient and effective regulation of Explosives

and pose serious safety risks. Gaps mentioned may pose a threat of blasts and damage to lives and property. The critical issues were identified during the course of audit are as under:

- i) Non-imposition of penalty on non-submission of fortnightly reports by licensees;
- ii) Issuance of licenses for possession and sale of explosives without security deposits;
- iii) Inadequate monitoring and supervision; and
- iv) Ineffective liaison with district authorities allowing illegal sale of petroleum products.

4.8.3 Significant Audit Observations

4.8.3.1 Illegal storage of explosives manufactured

According to SoPs issued by Ministry by Interior, EL-01 license holder (manufacturer) would store product in the magazine, for which specific EL-02 for storage (within factory area) had to be obtained. It was observed that licensee (No. RAD/490/E) stored explosives after manufacturing, at premises without having valid license EL-02 till July, 2023. This situation highlighted gaps in licensing regime which put life and property at risk.

[DP No. 2496]

4.8.3.2 Non-conduct of inquiry of blasts occurred at the licensed premises

Inquiry into serious accidents is mandatory for ascertaining the causes and circumstance of the accident and report should be issued as per Explosives Act, 1884. It was observed that two blasts on May 31, 2010 and March 21, 2012, occurred at premises of Licensee No. RAD/595/E having licence for manufacturing of Safety Fuse and Gun Powder. In these incidents four persons lost their lives and several other injured besides damage to the magazine. FIR was also registered on March 23, 2012 at Police Station Dumman, Chakwal. DoE did not conduct inquiry to identify the circumstances responsible for these blasts. This situation reflected weak enforcement of licensing terms and conditions.

[DP No. 2494]

4.8.3.3 Non-observance of mandatory safety conditions at the time of issuance of Form L licenses

Audit observed that Form L licenses were issued to 12 oil terminals at Karachi without fulfilling mandatory safety measures / conditions. Inquiry Commission on shortage of petroleum products in 2020, highlighted discrepancies in safety measures for oil terminals. Subsequently, an inquiry was conducted by Petroleum Division for probing issuance of licences to oil terminals without fulfilment of safety conditions. A Deputy

Director and Assistant Director were found guilty of misconduct and were dismissed from service. Penalty of Rs 9.208 million was imposed on involved oil terminals. During inquiry the cross examination and written statements revealed that licenses in Form “L” were issued without inspection and without observing the conditions under the law. This glaring violation of safety conditions highlighted serious breaches in licensing regime of DoE.

[DP No. 2488]

4.8.3.4 Cumbersome process of licensing

To obtain license from DoE is a cumbersome and time-consuming process. There were numerous NOCs, approvals and documents required that delay the issuance of licenses. This not only caused delay for businesses that require licenses for their operations but also created potential opportunities for clandestine activities involving explosives. This pointed out that licensing regime was not inclined towards ease of doing business. A streamlined and simplified licensing process would not only save time and resources but also enhance the department’s ability to monitor and regulate the explosives and petroleum industry effectively.

4.8.3.5 Missing provision of LPS in legal framework

There was no mechanism for recovery of outstanding amount from defaulters. Moreover, no default surcharge was included in the rules to discourage non-submission of fees in time. It was observed that the department did not recover the difference of annual renewal fee amounting to Rs 441 million from Licence No. RAD/173/E for the period from 2000 to 2011 till now. It is pertinent to mention here that without default surcharge the concept of time values of money was baseless.

4.8.3.6 Weak monitoring and supervision

Lack of regular monitoring and supervision is necessary for effective implementation of terms and conditions of license. The management reported that physical inspection of each licensee of explosives once in a year had been conducted but no such inspection reports were found on record. There should be a proper format of inspection reports i.e. stock taking report and checklist of safety measures. Sporadic incidents of blasts were found in record of DoE which could have been avoided through effective monitoring and supervision.

[DP No. 2501]

4.8.3.7 Lack of action on fortnightly reports

It is mandatory under license condition that every explosive licensee submits fortnightly report to DoE. The fortnightly reports submitted by licensees were required to

be evaluated and monitored as per license granted for manufacturing, possession and sale of the licensees in line with the quantities granted in license. Audit observed that these reports were not evaluated and were dumped in the office. The fortnightly report of Licence No. HZD/05/E showed less quantity of 160,000 meter and 337,250 meter of safety fuses than received from M/s Wah Associates and M/s Wah Blasting Associates respectively. It was serious issue which depicted that Department of Explosives was not performing its functions assigned under the law.

[DP Nos. 2489 & 2495]

4.8.3.8 Non-maintenance of computerised database

DoE was not maintaining computerized database for explosive records (manufacturing, sales, use, oil supply chain to account for opening / closing stocks, purchases and imports), number of retail outlets according to developed storage of OMCs and other movements. Further, the record of licenses of petroleum products granted, suspended and expired was also not maintained.

4.8.3.9 Missing recovery mechanism of Renewal Fee of licenses

Collection of fees from licensees is the responsibility of the DoE but it did not have a mechanism to recover the amount of renewal fees from the licensees well in time. It was observed that there was a significant variation between budget estimates and actual collection of receipts. This revealed that department collected 25.6% of target of receipt during FY 2022-23.

[DP No. 2480]

4.8.3.10 Issuance of licenses for possession and sale of explosives without security deposits

The applicant desirous to obtain a license in Form EL-02 for possession and sale of Explosives shall deposit a refundable security of half million rupees in usual head of account of the department of Explosives. It was observed that 09 licenses in Form EL-02 within the same premises having license in Form EL-01 had granted by the department without security. This resulted in non-deposit of security of Rs 4.5 million by the licensees.

[DP No. 2483]

Departmental Responses

- i) DoE replied that license No. RAD/490/E was granted as per Form EL-01 of Explosives Rules, 2010 in favour of M/s Wah Associates but EL-02 (No. RAD/527/E in Form EL-02) was granted on pointation on July 31, 2023;

- ii) DoE replied that explanations had been served to the concerned officers for non-conducting the inquiry in case of blasts;
- iii) DoE replied that as per recommendations of JIT only M/s FOTCO was penalized with penalty of Rs 1 million which the said company had already deposited. No such penalty was admissible upon the remaining oil terminals and the said cases were regularized while submitting the requisite particulars and fulfilling the requirement of Petroleum Rules, 1937;
- iv) DoE replied that the department followed the ease of doing initiative of the Federal Government and as per prevailing rules District Administration had the mandate to the NOCs which may cause delay in the issuance of licenses;
- v) DoE replied that if licensee did not submit renewal particulars on time, double fee would be charged and fee was not paid in the following month, license would be liable to pay three times of the license fee;
- vi) DoE replied that as per recommendations of the inquiry committee, M/s Wah Nobel Private Ltd. was directed to make modifications in the procedure of manufacturing of such explosives. Further, directions had also been issued to all regional offices for increasing the frequency of inspections to ensure compliance. DoE further, replied that there was shortage of staff for monitoring;
- vii) DoE replied that letter had been issued to Director, Regional Office, Peshawar for clarification from M/s Biafo Industries Private Ltd. regarding non showing / mentioning the actual quantity of safety fuse received from M/s Wah Blasting Associates, on receipt of explanation/clarification from M/s Biafo Industries Private Ltd. necessary action would be taken under Explosives Rules, 2010;
- viii) DoE replied that the software project was at planning phase and when it would be deployed, it would strengthen the regulatory regime of the department;
- ix) DoE replied that the revenue collection for the FY 2021-22 was Rs 550 million and in this context, DoE planned a target of Rs 600 million for the FY 2022-23 and the same was conveyed to Petroleum Division for onward submission to Finance Division but Finance Division conveyed a target of Rs 2,000 million which was not in line with factual position. Keeping in view high target given last year the ministry rationalized the targets for the year 2023-24 to Rs 1.100 billion; and
- x) DoE stated that all the licensees having license in Form EL-02 of Explosives Rules, 2010 within the same premises having license in Form EL-01 of Explosives Rules, 2010 have been directed to submit the refundable security of Rs. 0.500 million

4.10 Recommendations

Based on findings of Thematic Audit of the licensing regime of DoE, following recommendations are proposed to improve effectiveness, transparency, and efficiency of department:

- i) DoE may initiate the matter of devolution of the functions to provinces in line with the Constitution of the Islamic Republic of Pakistan. That would improve coordination between agencies engaged with the relevant legislation.
- ii) DoE may computerize the whole licensing regime enabling applicants to track their applications. This would ensure transparency and ease of doing business. Further, clear guidelines and timeframes for processing applications may be prescribed to ensure consistency and efficiency in the licensing process;
- iii) Monitoring and evaluation mechanism to ensure that licensees comply with safety protocols and regulations may be developed to ensure regular inspections, safety audits, and risk assessments to assess licensees' performance, identify potential violations and take prompt corrective measures when necessary;
- iv) There had to be a mechanism for imposing and identifying penalties through an automated system in addition to scrutiny of fortnightly returns and issuance of penalty notices to licensees for non-compliance;
- v) A risk assessment framework that categorizes licensees based on the potential risks associated with their activities may be developed. This model would allow DoE to allocate resources effectively, conduct more rigorous inspections and audits for high-risk licensees, and streamline the licensing process for low-risk applicants;
- vi) Collaboration and communication channels with other relevant stakeholders such as police, industry associations, and other government agencies need to be enhanced. This collaboration would foster information sharing, align regulatory efforts, and enable a more holistic approach to ensure the safety and security of Explosives materials and eradicate illegal sale of petroleum products; and
- vii) A comprehensive training program for both DoE staff and licensees may be devised. This training should focus on technical knowledge, safety protocols, and best practices for handling explosives. The department should also allocate adequate resources and invest in technology to support the licensing regime.

By implementing these recommendations, DoE could significantly improve its licensing regime. These measures would enhance monitoring, efficiency, and safety, ultimately reducing the risks associated with the handling and storage of explosives.

4.10 Conclusion

The licensing regime of DoE is complex and multifaceted involving several governmental and private stakeholders. Non-devolution of functions to the provinces despite lapse of considerable time after 18th amendment has created serious operational, monitoring and efficiency challenges for the department. Resultantly, reforms required to achieve the goal of best practices relating to licensing regime of DoE were not undertaken. Shortage of staff, manual record keeping, missing real time database, missing recovery mechanism for renewal of licenses and weak inspections regime are posing serious threats to the working of the department. The licensing regime is also influenced by various regulations, standards, and guidelines that aim to ensure the safe manufacture, handling, and use of explosives and encompasses various stakeholders such as manufacturers, importers, distributors, users, and regulators, who play a role in ensuring compliance with licensing requirements and safety standards. However, the licensing regime of DoE is a multifaceted landscape that requires careful attention to detail technical expertise and collaboration among different stakeholders to ensure the safe and responsible use of explosives. Licensing regime of DoE lacks proper monitoring and evaluation of licensees. However, areas of improvement include streamlining the licensing process and embracing digital solutions for efficiency.

Overall, Thematic Audit of the licensing regime of DoE has provided valuable insights into the shortcomings of the current system. The recommendations presented in the audit report can serve as a roadmap for DoE to enhance their licensing regime. The implementation of the recommendations would not only enhance the licensing regime but also build the trust of stakeholders and the public in the regulatory authorities. The licensing regime helps in maximizing the government's revenue by collecting fees from licensees. This revenue can then be utilized for the development of the country's infrastructure, social welfare projects, and economic growth.

IMPACT AUDIT

Chapter-5
Impact Audit
Development Scheme No. 842 - “Energy for All”

5.1 Introduction

With increasing population, Pakistan’s energy demand is also on the rise. The issue of clean domestic fuel is more pronounced in rural areas where 61.18% of the population lives⁶⁰. The natural gas provision can help in mitigating socio-economic hardships associated with the use of coal, wood and other conventional sources, which have their environmental impact as well. In cities, the population is concentrated and laying pipelines from their own resources is not an issue for gas distribution companies due to financial viability of such projects. However, when it comes to deprived areas, lack of business potential necessitates the intervention of the Government funding which is provided through Public Sector Development Programme.

Keeping in view the socio-economic development goals of the country, Government of Pakistan (GoP) initiated various development schemes for supply of natural gas to the deprived areas. Sui Northern Gas Pipelines Ltd. (SNGPL) and Sui Southern Gas Company Ltd. (SSGC) - two public sector gas utility companies engaged in transmission and distribution of natural gas – are entrusted with execution of these gas supply schemes. One of such schemes titled “Scheme No. 842 - Energy for All” was initiated in 2017-18 through Public Sector Development Programme (PSDP) at the cost of Rs 12,500.000 million.

5.1.1 Background of the Scheme

Impact audits have been started from the audit year 2023-24 by the office of the Auditor-General of Pakistan which aim at determining the impact of government initiatives or programs with special focus on determining the outcomes attributable to an initiative, new program or recent change to an existing program by separating other contributing factors or variables. The impact audit reports shall benefit the stakeholders in understanding the net results of the programs and initiatives in a more systematic manner and if timely addressed, shall lead to improving service delivery, financial management and better governance. “Scheme No. 842-Energy for All” was selected for impact audit to look into the impact of government spending with special reference to the transfer of benefits to the ultimate beneficiaries.

⁶⁰ Census of Pakistan, 2023

Feasibility studies of gas supply schemes, identified by the public representatives, are prepared by the relevant gas companies. Finance Division allocates funds to the relevant gas distribution company. “Scheme No. 842-Energy for All” included 44 schemes to supply natural gas to 221,655 deprived households. However, three (3) gas supply schemes were completed and 5,409 households were gassified by utilizing funds of Rs 286.039 million. Audit focused on the impact of these three gas supply schemes on the lives of the people who were provided natural gas through these schemes.

5.1.2 Role of the Project

One of the purposes of Gas Development Schemes was provision of gas to population of selected localities. Initially there were 44 schemes in the project. However, funds were released for only 34, which were to cater for 221,655 connections. The intended objective of the project was to shift from traditional fuel sources to natural gas for improved environmental, social and financial impact.

5.2 Overview

Impact Audit was undertaken in order to assess long term outcome of the gas development schemes i.e. “Scheme No. 842-Energy for All” under PSDP programme 2017-18. This Programme included 44 schemes with a financial outlay of Rs 8,377.530 million. Out of this amount, funds to the tune of Rs 5,890.870 million for 34 schemes were released for gasification of 221,655 households. A substantial amount of Rs 5,370.600 million for 25 schemes got lapsed resulting into non-provision of gas supply to 181,871 households. Merely three (3) out of remaining nine (9) schemes were completed. Under these three (3) completed schemes, 6,056 households were planned for gas supply. A total number of 5,409 households were gassified leaving a balance of 647 households.

Gas supply schemes were to be executed by both SNGPL and SSGC. SNGPL completed three (3) schemes while SSGC could not initiate development work.

5.3 Scope and Methodology

a. Scope

Impact Audit was carried out for three (3) completed schemes for gas supply to various villages of UC Darya Gali and UC Numbal of Tehsil Murree and UC Mangowal (selected villages) of District Chakwal. Since the schemes were planned and executed during the FY 2017-18, therefore, the scope was confined to the FY 2017-18. A total number

of 5409 households were provided with natural gas facility leaving 647 households without gas connections.

b. Methodology

Audit methodology comprised of following procedures:

- i) desk audit of feasibility reports, documents regarding funds released & surrendered;
- ii) analysis of funds allocated, released and utilized;
- iii) review of execution documents regarding completed schemes
- iv) analysis of targeted consumers;
- v) field visits and interview with consumers;
- vi) data collection through questionnaires; and
- vii) analysis of environmental, social and financial impact.

5.4 Findings

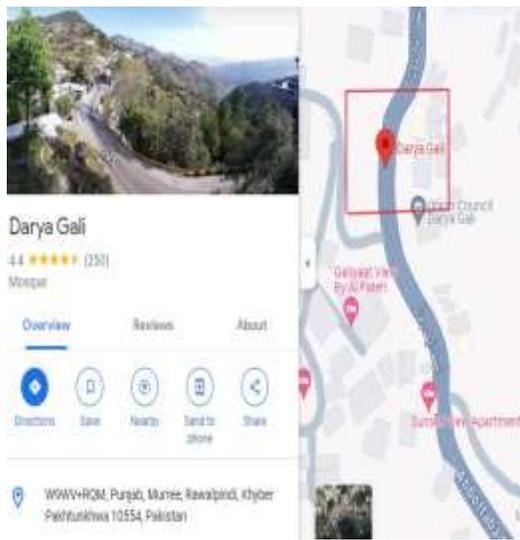

5.4.1 Impact Analysis of completed gas schemes

Questionnaire was framed and administered to obtain viewpoint of gas consumers regarding outcomes of gas supply. Data helped to assess the effectiveness of gas supply as enumerated below:

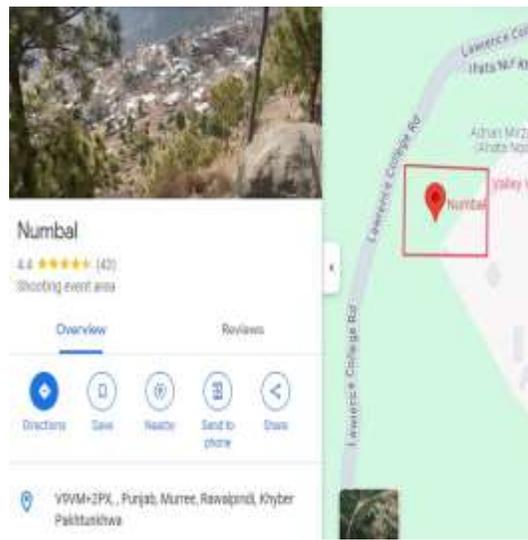

Financial impact

5.4.1.1 Financial impact to the resident of UCs Numbal and Darya Gali

There were 3,767 number of connections, out of which audit team conducted a survey by visiting 430 (11.41%) households of two Union Councils of Tehsil Murree namely Darya Gali and Numbal to assess the impact of gas schemes on the lives of the general public. Geographical location of these Union Councils is depicted in the following picture:

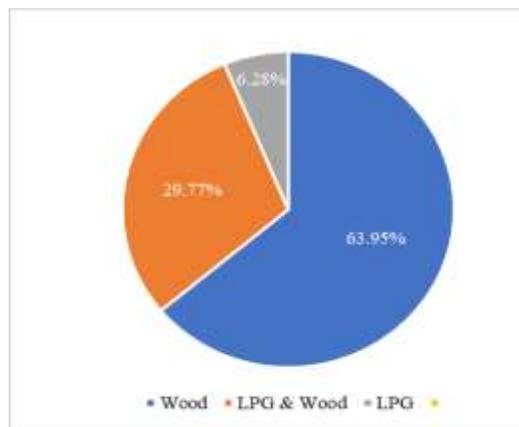

UC Darya Gali

UC Numbal

In a sample of 430 households, there was a population of 2,213. The survey revealed that 63.95% households were using wood, 29.77% were using mix of wood & LPG, remaining 6.28% were using LPG as their primary fuel source for cooking and heating prior inception of the schemes. A significant cost cutting impact was witnessed due to these schemes during the study. Following graphs showed comparative position of different types of fuel sources used by 430 households before provision of gas:

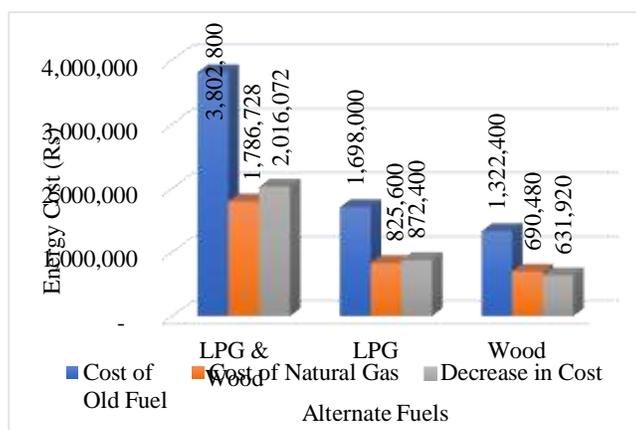

Fuel used before supply of natural gas

According to the survey results accumulated annual total cost of sample households of traditional fuel sources i.e. wood, LPG and coal in these localities was estimated at Rs 6.823 million (i.e. Rs 15,905 per household). The cost of fuel using gas was estimated at Rs

3.302 million (i.e. Rs 7,700 per household) after completion of the schemes. Thus, the cost of using gas is approximately 50% lower than the cost of using alternative fuels i.e. wood, LPG and coal. Gassified households were able to save 50% of their fuel cost after completion of these schemes enabling them to meet other expenses through savings.

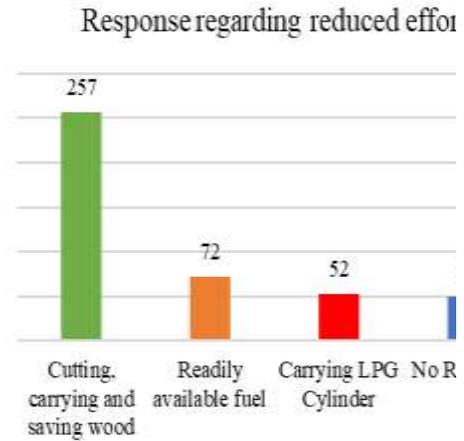

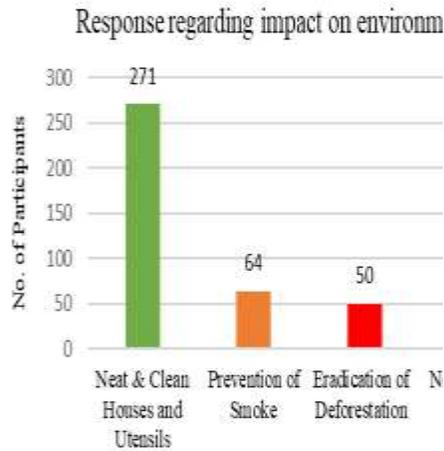

Cost comparison of different fuels is depicted below:

Social Impact

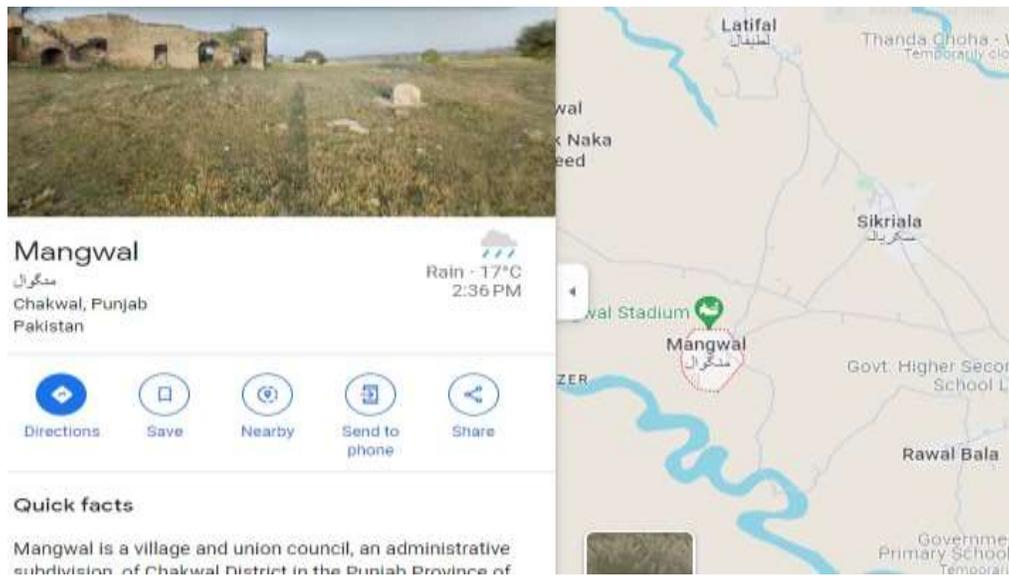

5.4.1.2 Villages of UCs Darya Gali and Numbal, Murree

The survey of 430 households revealed that 63.95% households were using wood, 29.77% were using mix of wood & LPG, remaining 6.28% were using LPG as their primary fuel source for cooking and heating before inception of the schemes. Analysis of data collected during survey indicated various improvements in their fuel collection, storage and transportation after completion of these schemes. Respondents reported that difficulties in the process of fuel availability, especially in winter season, like cutting, carrying and storing of wood / cylinders were resolved. Participants further responded an improvement in the cleanliness of house and utensils due to absence of smoke and improved living standard. Following graphs showed the responses of 430 participants of the survey:

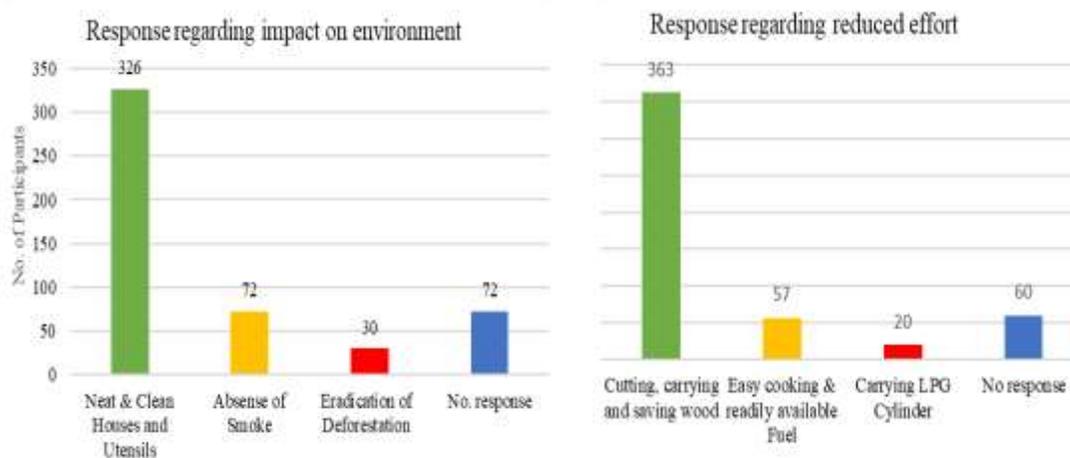

5.4.1.3 Villages of UC Mangowal, District Chakwal

There were 1,642 number of gas connections in UC Mangowal, District Chakwal. Audit team conducted survey by visiting 500 (30.15%) households having a population of 2,814. A large portion of people (87.47%) were using wood, 9.3% people were using mix of wood & LPG and remaining 3.23% were using only LPG as their primary fuel source for cooking and heating before introduction of gas schemes. Geographical location of the Union Council is depicted in the following picture:

The sample households mentioned various improvements after commissioning of gas scheme. Most of the respondents reported that the difficulties during the process for provision of wood i.e. cutting, carrying & storing issues were resolved. Some participants

opined improvement in cleanliness and living standards. Following figures depicts the different types of responses by 500 participants of survey after the provision of natural gas:

Environmental Impact

5.4.1.4 Reduction in CO₂ emission in Darya Gali, Numbal and Mangowal

Provision of gas to the consumers who were using alternative fuel previously brought positive impact on the environment of the area. Impact of provision of gas significantly reduced CO₂ emission and de-forestation. Data revealed the following impacts:

Locality	Total MMBTU of gas used	Equivalent No. of trees*	CO ₂ emission in case of wood usage (Tons)**	CO ₂ emitted by burning gas (Tons)***	Difference in CO ₂ emission (Tons)
UCs Darya Gali and Numbal	77,525	4,180	8,640	4,535	4,105
UC Mangowal	27,240	1,469	3,036	1,593	1,443
Total	104,765	5,649	11,676	6,128	5,548

*Burning 18.55 MMBTU gas can save one tree

**2.067 Ton CO₂ emitted on burning of one tree

***0.0585 Ton CO₂ emission by burning one MMBTU natural gas

The above table shows that provision of gas to the localities previously burning wood as source of fuel brought significant and beneficial impact on reducing carbon emissions. 104,765 MMBTU gas burned in the localities of three UCs which were estimated to be emitting 6,128 Tons of CO₂, as compared to 11,676 Tons of CO₂ in case of burning wood. Resultantly, 5,548 Tons of CO₂ emission were reduced each year. This reduction in CO₂ emissions is equivalent to planting approximately 5,649 trees. Simultaneously, 5,649 trees were saved meaning thereby enhanced absorption by 378.465 Tons of CO₂.

5.5 Conclusion

The impact analysis of completed gas schemes in various localities, namely UCs Darya Gali, Numbal, and Mangowal, reveals significant financial, social, and environmental benefits. However, only 03 out of 44 schemes were completed, highlighting the lack of realistic planning and execution. The comparison of alternate fuel before and after provision of natural gas highlights the transformative potential of gas development schemes as detailed below:

Condition without scheme	Condition with scheme
<p>The households using alternate fuel were previously facing the following problems:</p> <ul style="list-style-type: none"> i) LPG was more expensive and risky fuel, ii) Cutting, carrying and storing wood; iii) Burning wood creates smoke that makes houses and utensils black; iv) Carrying woods and LPG cylinders was time consuming activities; and v) More emissions of carbons from burning of woods. 	<ul style="list-style-type: none"> i) Gas was a relatively economical and clean source of energy as compared to alternatives like wood or LPG, which could reduce pollution and environmental impact in the areas; ii) People relied on firewood or other biomass for heating and cooking, however, supply of gas reduced deforestation and the strain on local ecosystems; iii) Supply of gas reduced storage space and cost of alternate fuels; iv) The use of gas for cooking led to better indoor air quality, reduced health problems associated with wood or biomass cooking methods; v) Expansion in the distribution network also increased job

	<p>opportunities and source of earning to locals; and</p> <p>vi) Beneficial impact on reducing carbon emissions.</p>
--	--

Audit recommended that based on the positive outcomes observed in the surveyed areas, there was a need to expand gas schemes to deprived communities. This expansion should prioritize areas with high reliance on traditional fuel sources and limited access to clean energy alternatives. For this purpose, incomplete gas development schemes may be completed to achieve the desired target for supply of gas to 221,655 households as envisaged in the feasibility reports.

By implementing these recommendations, Petroleum Division may accelerate the transition towards cleaner energy solutions, fostering sustainable development and improving the overall well-being of communities with ultimate target of mitigating the effects of use of traditional fuel sources.

**AUDIT REPORT
ON
THE ACCOUNTS OF
PUBLIC SECTOR ORGANIZATIONS
(TELECOMMUNICATION SECTOR)
AUDIT YEAR 2023-24
AUDITOR-GENERAL OF PAKISTAN**

DIRECTORATE GENERAL AUDIT (TELECOMMUNICATION SERVICES)

Chapter-1

Pakistan Telecommunication Authority

Cabinet Division

1.1 Introduction

A) Pakistan Telecommunication Authority (PTA) is a corporate body established on 1st January 1996 under Pakistan Telecommunication (Re-organization) Act 1996 as amended in 2006. The Authority is working under the administrative control of the Cabinet Division. Its accounts are audited by the Auditor-General of Pakistan under the provision of Section 15 of Telecommunication (Re-organization) Act, 1996. PTA's main functions are to:

- Act as regulator to implement deregulation policy of telecommunication services issued by the Government of Pakistan;
- Grant and renew licenses for any telecommunication system and services on payment of regulatory fee;
- Regulate the establishment, operation and maintenance of telecommunication systems and the provision of services in Pakistan;
- Promote and protect the interests of users, modernize telecommunication systems and provide a wide range of high quality, efficient, cost-effective and competitive telecommunication services in the country;
- Make recommendations for the Federal Government on policies for International Telecommunications; and
- Regulate arrangements amongst telecommunication service providers of revenue sharing derived from telecommunication services.

B) Comments on Budget and Accounts

- 1.1.1 According to Auditor-General's office letter No.574/43-R&SD/ SOP/2007Pt dated 01.12.2023, Pakistan Telecommunication Authority (PTA), being autonomous body of the Federal Government, while appointing the Chartered Accountant firm for annual audit of its financial statements, is required to obtain concurrence of the Auditor-General of Pakistan. However, PTA did not obtain the said concurrence from the office of the Auditor-General of Pakistan.
- 1.1.2 According to Note 2.5 to the Financial Statements, provisions are recognized in the statement of financial position when the Authority has a present legal or constructive obligation as a result of past events, it is probable that the outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of amount can be made. PTA pays pension, gratuity, accumulating compensated absences and post-retirement medical benefits to its employees as per approved policy. PTA has no present or past obligation to pay interest on these expenses. However, as per Note 5.3, PTA has recognized a provision of Rs 274.232 million as interest payable on these expenses in addition to the provision of their current service cost which has overstated its expenses.
- 1.1.3 According to Note 17.1 to the Financial Statements, the mark-up receivable on license renewal fee has increased from Rs 919.592 million (in 2022) to Rs 2,541.652 million (in 2023) with an increase of 176.4% which shows weak receivables management by PTA.

Table-I Audit Profile of PTA**(Rs in Million)**

S. No.	Description	Total Nos	Audited	Expenditure audited FY-2022-23	Revenue / Receipts audited FY-2022-23
1	Formations	09	01	3,449.65	93,105.849

16	SAR 2011-12	37	3	0	3	0
17	2012-13	39	2	0	2	0
18	SSRMR 2013-14	24	24	18	6	75
19	2014-15	29	15	7	8	47
20	2015-16	24	23	14	9	61
21	2016-17	27	20	17	3	85
22	2017-18	31	25	15	10	60
23	2018-19	14	8	2	6	25
24	2019-20	17	11	5	6	45

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

1.4 Irregularities

A. HR/Employees related irregularities

1.4.1 Irregular appointments and payment of pay & allowances – Rs 45.934 million

According to Regulation 14 of PTA Employees Service Regulations (ESR) 2008, “appointment on initial basis to all cadres and grades in the service shall be made by the Chairman on the basis of the recommendations of the Departmental Selection Committee to be constituted by the Chairman for the said purpose. Criteria, relevant / required qualifications, age, experience and other conditions / requirements for appointment to any post of the service shall be as laid down in Annex-B of the Regulations”.

PTA HQ under the Cabinet Division, Islamabad made appointments in various cadres and incurred an expenditure of Rs 45,934,238 on the pay and allowances of the employees during FY 2022-23.

Audit examined the recruitment record of twenty-three (23) cases on a test check basis and found that:

- i. The eligibility criteria mentioned in the advertisement and related to age, qualifications and experience were not compatible with the pre-requisites envisaged in the Annex-B of the Regulations.
- ii. In addition, PTA management appointed two Assistant Directors and one IT Officer for which relevant posts were not available in the Annex-B of PTA Employees Service Regulations 2008.

Audit contends that due to weak internal control framework the PTA management did not adhere to the Service Regulations and made irregular appointments and incurred irregular expenditure.

Audit reported the matter to the management and PAO during November, 2023. It was replied that the criteria for advertisement of the positions was approved by the Chairman in exercise of power conferred in the PTR, 1996 (Amended in 2006) and under relevant provisions of PTA ESR, 2008. The Chairman PTA was empowered to amend the criteria under the Service Regulations. It was further replied that available / vacant posts were utilized by virtue of its nomenclature and not by portfolios. Similarly, the posts of ITO and AD ICT were provided in Annex-B of the Regulations. The posts were advertised by specifying the job portfolio to attract the right pool of candidates to ensure the quality recruitment with the approval of Chairman.

The reply is not tenable. The Chairman PTA is empowered to make appointments under the criteria envisaged in Annex-B of ESR, 2008 which was violated. Further, the appointments were made against those posts which were not available in the attached Annex-B of the Regulations.

The matter was discussed in DAC meeting held on 20th December, 2023. The DAC directed PTA to get the relevant record in terms of quota etc. verified from audit. DAC further directed PTA to review the reported matter in depth and share the progress achieved with Audit within one month. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives / conduct of inquiry into the matter to fix responsibility.

(DP No. 5 & 31)

1.4.2 Inadmissible payment on account of allowances, gratuity, Eid reward and proficiency incentive - Rs 11.030 million

According to Finance Division (Regulation Wing) letter No. F.3 (2)R-4/2011, dated 14th July, 2017, the Prime Minister has revised the Management Position (MP) Salary Package including House Rent, Utilities and other perquisites. Besides, gratuity shall be paid to MP scales holders of one month's basic pay for each completed year of service. Further, Section 3(7) of PTR, 1996 (amended in 2006), states that the Member of the Authority shall be paid salary and be entitled to the privileges of an officer in MP-II and the Chairman shall be paid salary and be entitled to the privileges of an officer in MP-I.

PTA HQ under the Cabinet Division, Islamabad made payment of Rs 11,029,852 to Ex-Chairman and Members of the Authority on account of house rent, utilities, medical, orderly allowance, gratuity, Eid reward and proficiency incentive during FY 2022-2023.

Audit observed that the house rent, utilities, medical, orderly allowances, Eid reward and proficiency incentive paid to Ex-Chairman and Members of the Authority were in excess of the admissible allowances of MP-I and MP-II pay package. The scrutiny of End of Service Benefits further revealed that payment of gratuity was made to Chairman and Members of the Authority on completion of their tenures on the basis of gross salary instead of basic pay. Detail is given below:

S. No.	PDP No.	Description	Amount (Rs)
1.	07-24	Excess payment on account of allowances	3,371,665
2.	-do-	Excess payment on account of gratuity	3,362,040
3.	09-24	Payment of Eid Reward	2,871,816
4.	-do-	Payment of Proficiency Incentive	1,424,331

Total	11,029,852
--------------	-------------------

Audit is of the view that inadmissible payment to MP-I & II scales employees reflect weakness of the financial discipline and internal control framework.

Audit reported the matter to the management and PAO during November, 2023. It was replied that salary, house rent, utilities and other perquisites paid to Authority Members including Ex-Chairman during FY 2022-23 were in accordance with committee report regarding pay fixation of PTA Chairman / Members. It is pertinent to consider that the committee report was relying upon letter of Cabinet Division, which included clarification of Members and Chairman's salary components and other emoluments. Further, welfare schemes, End of Service benefits of Members of Authority are considered according to clarification and letter of Ministry of Finance dated 17.01.2017 and 28.07.2020 wherein it has been deliberated and clarified that such benefits will be according to PTA's ESR. Gratuity as provided in PESR is one month salary for each completed year, accordingly, the same was paid to all retiring members upon completion of their period.

The reply is not tenable. The Ex-Chairman and Members of the Authority were entitled to the salary package introduced for MP-I & MP-II scales holders as notified by the Federal Government in 2017. The PESR, as referred to in the reply, is for PTA Employees rather than the Chairman and Members of Authority. Moreover, the subject matter has already been reflected in the previous Audit Report and has been referred to PAC for decision.

The matter was discussed in DAC meeting held on 20th December, 2023. The DAC constituted a committee to review the case holistically and recommend way forward, within one month. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives / recovery of inadmissible excess payments.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2008-09, 2010-11, 2021-22 & 2022-23 vide Para(s) number 1.8, 1.26, 1.5.5 & 1.5.2 having financial impact of Rs 23.379 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 07 & 09)

1.4.3 Irregular appointment of Director Finance and expenditure - Rs 4.817 million

According to advertisement dated 31.03.2019 floated for the post of Director (Finance) and Annex-B of PTA Employees Service Regulations (ESR), 2008, at least one of the qualifications with minimum of ten (10) years post qualifications experience of managing and attaining all aspects of Accounting and Finance System is required. Regulation 92 *ibid* further states that a resignation shall be deemed to have been withdrawn, if it is withdrawn by an employee before its acceptance by the Chairman. A resignation withdrawn after its acceptance by the Chairman but before its becoming effective by relieving the employee shall be decided by the Chairman to treat the resignation as withdrawn or to pass orders of his relieving from the Service by giving effect to the resignation.

PTA HQ, under the Cabinet Division, Islamabad received thirty-five (35) CVs/applications against the advertised position and constituted a shortlisting committee accordingly. The committee short-listed nine (09) candidates as eligible for interview and selected Mr. Ubaid Tayyab as Director Finance, PTA. An expenditure of Rs.4.817 million was incurred on his pay and allowances since his appointment.

Audit observed that Mr. Ubaid Tayyab was shortlisted and selected for the post of Director (Finance) for three (3) years on contract basis despite the fact that his relevant information of domicile, province and qualifications/attested documents were missing as per shortlisting proforma. Further, the selected candidate was awarded experience marks without provision of ten (10) years relevant post qualifications experience certificate. Audit further observed that the incumbent joined PTA on 15.07.2019. On expiry of

service contract on 14.07.2022, he was asked to fill performance appraisal report for contract renewal but he informed the PTA management that he was not willing to continue his service in PTA; accordingly, his service contract was terminated on 07.07.2022. PTA reinstated the incumbent and extended his service contract on 14.07.2022 and regularized his break in service retrospectively in September, 2022 in violation of its own regulations.

Audit holds that irregular appointment against the post of Director Finance and subsequent reinstatement and extension in service contract of the incumbent in violation of PTA Service Regulations reflect weakness of the internal control framework, which must have enduring effects on the financial management of PTA.

Audit reported the matter to the management and PAO during November, 2023. It was replied that hiring of the officer was made in accordance with the relevant provision of PTA ESR, 2008. The advertisement was floated in newspaper for recruitment for the position of Director (Finance) on merit basis; therefore, the provision of domicile was not compulsory at the time of joining PTA. However, all relevant documents and other credentials were provided by the officer. With regard to resignation and its withdrawal under regulation 92 of PTA ESR, 2008, the officer did not resign and expressed his intention of non-renewal of his service contract, which was, later on, withdrawn and requested for extension in his contract.

The reply is not tenable. The incumbent benefitted unduly at each step during the hiring process. The ESR 2008 and advertisement provided for appointment of the Director Finance on the basis of quota which was overlooked by the management during shortlisting. He resigned willingly from his service as is evident from the noting file and the notification of de-hiring of services issued by PTA but, instead of fresh appointment, he was reinstated retrospectively and his service contract was extended in violation of the above stated rules.

The matter was discussed in DAC meeting held on 20th December, 2023. The DAC directed PTA to get the record verified from Audit immediately regarding academic qualification, experience, domicile, quota, resignation of the officer and notification of PTA to this effect. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 08)

B. Management of Accounts with Commercial Banks

1.4.4 Non-transfer of balances to Central Account-1 after adoption of TSA - Rs 13,992.738 million

According to Finance Division (Budget Wing) letter No. 2(5)/S.O(TSA)/2020/388 dated 16.07.2021 and Para 2 of Special Assignment Account Procedure, 2021, the Cash Management and Treasury Single Account Rules, 2020 are in force since 24.07.2020 with the approval of the Federal Government. Further, Finance Division (Budget Wing) letter No.1(1)S.O(TSA)/2020/47 dated 31.01.2023 states that under Section 30 of the Public Financial Management (PFM) Act, the scope of the TSA system is hereby extended to all Regulatory Authorities including Pakistan Telecommunication Authority.

The Treasury Single Account system requires closure of existing bank accounts maintained by the Ministries, Divisions, Attached Departments etc. and transfer of their balances to Central Account No.1 (Non-Food) maintained in the State Bank of Pakistan. The new cash management regime also requires organizations/authorities to re-align their existing financial and banking arrangements with the approved legal framework provided under the Constitution of Islamic Republic of Pakistan, 1973 and the Public Finance Management Act, 2019.

Audit examined the financial management and banking arrangements of PTA HQ under the Cabinet Division, Islamabad and found that PTA had neither closed its commercial bank accounts nor transferred the balances to the Central Account No.1 of the State Bank of Pakistan as reflected in the table below. Audit revealed that PTA did not, by and large, switch over to the newly introduced financial management regime of Treasury Single Account.

S. No	Name of Banks	Account No.	Account title	Amount (Rs)
01	NBP Jinnah Avenue Branch Islamabad	30009422 22	PTA collection Account	4,820,875,89 8
02	-do-	30009422 31	AJK De-Regulation A/c	8,061,798,94 9
03	-do-	30009423 11	AJK/GB USF A/c	1,110,063,12 0
Total				13,992,737,967

Audit reported the matter to the management and PAO during November, 2023. It was replied that Treasury Single Account system for regulatory bodies is different as compared to Ministries and allied departments in the first phase. As per information received from Finance Division, Treasury Single Account system for regulatory bodies involve sweeping arrangements, in which no action on the part of account holding organization i.e., PTA is required.

The reply is not satisfactory as PTA neither adopted TSA nor switched over to the sweeping arrangements as required by the Finance Division.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC directed PTA to refer the matter to Finance Division through Cabinet Division in the light of Audit Para for clarification. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

1.4.5 Unlawful retention of profit on CPF - Rs 70.566 million

According to Regulation 200 (6) of PTA Employees Service Regulations (ESR) 2004, “CPF shall be applicable w.e.f 1.7.2004. It will be at the rate of 5% of running basic pay from the employee. Equal amount shall be contributed by PTA, which will be payable to the employee at the time of retirement / repatriation / leaving the job along with profit / mark up earned on it. Regulation 103 *ibid* further states that after initial appointment, an employee shall be liable to contribute on monthly basis towards the CPF at the rate of 10% of the running basic pay, the equal contribution shall also be made by the Authority on monthly basis, which shall be payable to the Employee at the time of retirement/leaving the service without any profit/mark- up. Moreover, PTR, 1996 has no provision for investment.

PTA HQ under the Cabinet Division, Islamabad kept the Contributory Provident Fund (CPF) in a profit bearing account NIDA No.18-4 at NBP and earned accumulated profit of Rs 70,565,914 during FY 2022-23.

Audit observed that the PESR, 2004 provided for the disbursement of profit on CPF to the employees at the time of retirement, whereas the PESR, 2008 were silent on the profit disbursements. Audit revealed that PTA neither distributed the profit earned on CPF among the employees as per PESR, 2004 nor surrendered to Public Account.

Audit reported the matter to the management and PAO during November, 2023. It was replied that profit on CPF account was considered as other income of PTA. Income being part of P&L account, duly accounted for in reaching surplus of funds for any particular year. All surplus for any year as per Financial Statements of PTA are surrendered to FCF.

The reply is not tenable as the profit accumulated on CPF cannot be transferred to FCF without devised mechanism. Further, amount of CPF was a part of the Trust Fund and interest thereon required to be treated separately. Since the CPF amount remained in

PTA account for more than three years, therefore, it was required to be surrendered to Public Account.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC granted six months' time to PTA to streamline the accounting treatment / mechanism of CP Fund profit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2017-18 vide Para(s) number 1.4 having financial impact of Rs 43.107 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 44)

1.5 Others

1.5.1 Short deposit of receipts into Federal Consolidated Fund - Rs 1,662.803 million

According to Section 49(4) of Income Tax Ordinance 2001, amended through Finance Act 2014, the income from sale of spectrum licenses by PTA on behalf of the Federal Government after the first day of March, 2014 shall be treated as income of the Federal Government and not of the Pakistan Telecommunication Authority.

PTA HQ under the Cabinet Division, Islamabad collected a revenue of Rs. 37,029,615,491 from Cellular Mobile Operators on account of renewal of license fee during FY 2022-2023 and placed it in its Collection Account No.3000942222.

Audit observed that PTA deposited Rs 35,366,812,145 instead of the total collected amount into the Federal Consolidated Fund, which resulted in short deposit of Rs 1,662,803,346 as detailed below:

S. No	Particulars	Date of Receipt	Amount Received (Rs)	Amount Deposited (Rs)	Short Deposit (Rs)
01	M/s Zong 3 rd instalment	14.10.2 2	11,429,138,6 79	10,005,408,5 15	1,423,730,1 64
02	M/s Jazz 4 th instalment	19.01.2 3	11,093,255,2 24	10,962,390,5 56	130,864,668
03	M/s Telenor 4 th instalmen t	12.05.2 3	14,507,221,5 88	14,399,013,0 74	108,208,514
Total			37,029,615,4 91	35,366,812,1 45	1,662,803,3 46

Audit holds that due to weak financial discipline PTA short-deposited the receipts accrued on account of license renewal fee into FCF.

Audit reported the matter to the management and PAO during November, 2023. It was replied that the amount received from Cellular Mobile Operators (CMOs) on account of mark-up including instalment proceeds during FY 2022-23 was accrued in previous FY 2021-22. Resultantly, the accrued amount became part of Surplus for FY 2021-22 and was accordingly transferred to FCF. The remaining amount out of related instalment proceeds

in FY 2022-23 had accordingly been transferred to FCF; thereby making full deposit of the proceeds in FCF.

The reply is not tenable. The amount received from CMOs was not income of PTA and was required to be transferred in full as received, therefore, the question of booking accrual did not arise.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC directed PTA to get the record verified from Audit which inter-alia includes financial statements for FY 2021-22 and 2022-23 along with deposit Challans of FCF. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2014-15, 2015-16, 2017-18, 2018-19, 2022-23 and MFDAC Report(s) for Audit Year(s) 2021-22 vide Para(s) number 1.10, 1.41, 1.5.1, 1.6.1, 1.6.2 & 1.16 having financial impact of Rs 22,464.092 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 02)

1.5.2 Non-recovery of outstanding dues against telecom operators – Rs 389.219 million

According to License condition No. 4.1.2.2, the licensee shall pay a Universal Service Fund (USF) and R&D contributions at the rate of 1.5% & 0.5% of the Licensee's Annual Gross Revenue from Licensed Services for the relevant financial year, minus inter-operator costs and related PTA / FAB mandated payments. License condition No. 4.1.2 & 4.3.1 further states that the licensee shall pay the Annual License Fee (ALF) to the Authority in an amount equivalent to 0.5% of the Licensee's Annual Gross Revenue from Licensed Services within 120 days at the end of the financial year to which such fees or contributions relate. License condition 6.6 states that in addition to any other remedies available to the Authority, late payment of fees shall incur an additional fee calculated at

the rate of 2% per month or as determined by the Authority from time to time on the outstanding amount for each month or part thereof from the due date until paid.

PTA HQ under the Cabinet Division, Islamabad reflected an amount of Rs 414,397,544 on account USF, R&D, Annual License Fee (ALF), and Annual Radio Frequency Spectrum Fee (ARSF) in the receivable ledger including fine imposed upon three (3) mobile operators on account of quality of service during FY 2022-23.

Audit revealed that PTA recovered only Rs 25,178,838 on account of USF, R&D and ALF, leaving a balance of Rs 389,218,706 against the operators. Detail of outstanding dues is as under:

S.No.	PDP No.	Particulars	Amount (Rs)
01	22-24	USF and R&D Contributions	191,747,242
02	23-24	Annual Radio Frequency Spectrum Fee	125,912,804
03	25-24	Annual License Fee	40,808,660
04	29-24	Recovery Petitions against operators	7,750,000
05	06-24	Fine on account of Quality of Service	23,000,000
Total			389,218,706

Audit holds that due to weak receivables management, PTA did not realize the requisite contributions / amount within the given timelines.

Audit reported the matter to the management and PAO during November, 2023. It was replied that an amount of Rs 20.410 million on account of USF and R&D and Rs 4.769 million on account ALF has so far been recovered. Certain operators had deposited the amount directly to MoITT, however, intimation of recovery from MoITT was awaited. It was further replied that upon issuance of show cause notices and enforcement orders by the Authority, the operators obtained stay orders from Islamabad and Sindh High Courts. However, PTA is pursuing the court cases vigorously. Regarding recovery petitions the DROs referred back the matter to Authority and appeals of the operators are pending before the Authority.

The reply is not tenable as an amount of Rs 389.219 million is still outstanding against the operators.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC directed PTA to expedite recovery process of balance amount and pursue the cases in the relevant courts with all facts and data. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 6,22,23,25 & 29)

1.5.3 Irregular grant of LDI Licenses and non-deposit of receipts into FCF – Rs 300.825 million

According to Section 8 (1) of PTR, 1996 (Amended 2006), the Federal Government may, as and when it considers necessary, issues policy directives to the Authority, not inconsistent with the provisions of the Act, on the matters relating to telecommunication policy and the Authority shall comply with such directives. Further, Rule 6.1 of De-Regulation Policy, 2003 and Rule 5.2.7 Telecommunication Policy, 2015 requires that PTA shall prepare the requisite applications, license templates, information package and other necessary measures with the approval of Federal Government to

facilitate the licensing process. Moreover, Section 12(3) of PTR Act, 1996 (Amended 2006), requires that any surplus of receipts over the actual expenditure in a year shall be remitted to the Federal Consolidated Fund.

PTA HQ under Cabinet Division, Islamabad issued three (03) LDI licenses @ US\$ 500,000 each during FYs 2022-23 & 2023-24.

Audit observed that the licenses were issued without receipt of any Policy Directives and approval of the Federal Government. Audit further observed that receipt on account of LDI licenses was not deposited into Federal Consolidated Fund (FCF). Detail is as under:

S.No	Company Name	License Type	Jurisdiction	Date of License Issued	Amount (Rs)
01	Zeta Technologies	LDI	Pakistan	05.01.2023	107,975,000
02	HG Telecommunication	LDI	Pakistan	02.02.2023	96,425,000
03	Dynasty Telecom	LDI	Pakistan	17.08.2023	96,425,000
TOTAL					300,825,000

Audit holds that PTA did not adhere to the conditions of PTR Act, 1996 and issued LDI licenses without any approved licensing template, approval of the Federal Government.

Audit reported the matter to the management and PAO during November, 2023. It was replied that De-Regulation Policy, 2003 was being continued through

Telecommunication Policy, 2015 and entry to LDI market was unrestricted and open. MoITT vide its letter dated 10-06-2021 intimated that “TP 2015 and PTR, 1996 (Amendment) Act, 2006 empowers PTA to conclude the grant of new LDI Licenses with enhanced terms and obligations and no specific requirement of Federal Government Policy directive under Section 8(2) of PTR, 1996 deems necessary. Further, the revenue is recognized once licenses are issued upon successful compliance of all the requirements for obtaining a license and not only when initial fee is received.

The reply is not tenable. Section 8 (2) of PTR clearly defines that Federal Government may issue policy directives on such matters. PTA has accrual-based accounting system where revenue is recognized on accrual basis, whereas in the reply PTA has mentioned that revenue is recognized when licenses are issued upon successful compliance of all requirements which is the requirement of a cash-based accounting system.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC constituted a two members Fact Finding Inquiry Committee to inquire the matter within 15 days. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 03 & 21)

1.5.4 Less realization of Annual Radio Frequency Spectrum Fee – Rs 226.376 million

According to clause 4 (2) of De-Regulation Policy for Telecom Sector issued by Ministry of IT & Telecom Division in July, 2003, entry to Local Loop market will be unrestricted and open. Any person who requests for a license, and meets the licensing requirements, will be eligible to get a license on payment of prescribed fee which will be set at the Pak Rupee equivalent of US\$ 10,000 for a LL License.

PTA HQ under the Cabinet Division, Islamabad issued demand notices for payment of Annual Radio Frequency Spectrum Fee for WLL License / Services to different operators during FY 2022-23.

Audit observed that the operators deposited the requisite fee in Pak Rupee @ 58 per US\$ instead of selling rate of the US dollars prevailing on the day preceding the date of payment, which resulted in less realization of Rs 226,376,395.

Audit contends that due to weak financial discipline the management received less amount on account ARFS Fee and caused a huge loss to the national exchequer.

Audit reported the matter to the management and PAO during November, 2023. It was replied that in compliance to PAC directives in previous Audit Paras, PTA issued demand notices to the operators in US dollars. However, operators deposited Pak Rupees denominated amount within stipulated time. PTA had already initiated enforcement actions against the operators as per Section 23 of the Act for recovery of the said amount. However, two operators have assailed PTA demand in the court of law and have obtained stay order.

The management accepted the Audit contention; however, the record did not show any strenuous efforts for recovery and pursuance of enforcement orders.

The matter was discussed in the DAC meeting held on 20th December, 2023. DAC directed PTA to pursue the case in the court of law. DAC further directed PTA to seek an opinion from Law & Justice Division in the matter through Cabinet Division. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2012-13, 2022-23 and MFDAC Reports for Audit Year(s) 2020-21, 2021-22 vide Para(s)

number 1.14, 1.6.3, 1.1 & 1.3 having financial impact of Rs 960.078 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 04)

1.5.5 Irregular issuance of LDI License to M/s TWA - US\$ 500,000 (Pak Rs 142.125 million)

Clause 3.3.1(a) of LDI license template provided for deposit of nine (9) Performance Bank Guarantees within one month by the licensee. According to PTA letter No. PTA/LIC-WrL/LDI/1352/2019 dated: 01.12.2023, M/s TWA was required to surrender its CLS license before awarding of LDI license. According to Section 4 (f) of PTRRA 1996 (amended 2006), the Authority shall investigate and adjudicate on complaints and other claims made against licensees arising out of alleged contraventions of the provisions of this Act, the rules made and licenses issued thereunder and take action accordingly.

PTA under the Cabinet Division, Islamabad granted Long Distance International (LDI) license for Pakistan to M/s Transworld Associates (Pvt.) Ltd. (TWA) on 21.03.2023 (date of issuance of commencement certificate) subject to surrender of special license and submission of Initial License Fee (ILF) of US\$ 500,000/- (Equivalent to Pak Rs 142,125,000) within one month with nine (9) Performance Bank Guarantees.

Audit examined the files of licensing and found that:

- i. The Authority granted LDI license to M/s TWA despite the fact that M/s TWA neither deposited nine (9) Performance Bank Guarantees valuing US\$ 10 million nor surrendered the Cable Landing Station (CLS) License on the date of commencement of LDI as required under the PTA's instructions stated above.

- ii. M/s TWA had also signed interconnection & extension of connection services agreement with the proclaimed default M/s World Call Telecom.

Audit contends that PTA did not adhere to the conditions of PTR, 1996 and granted LDI license to M/s TWA without deposit of bank guarantees and surrender of CLS.

Audit reported the matter to the management and PAO during November, 2023. It was replied that LDI license has not been signed and issued to TWA till date as it has only deposited ILF after the approval of Authority to grant LDI license. License shall only be signed and issued after fulfilment of nine (9) PBGs. Moreover, field inspection report also revealed that there was no telecommunication service between TWA / World Call FLL. More to this, Director Operations, World Call also confirmed that World Call FLL has no business / SLA with TWA.

The reply is not tenable. The record transpired that the LDI license was approved and signed by PTA without obtaining PBGs and surrendering of CLS license. Besides, M/s TWA had signed interconnection & extension of connection services agreement with M/s World Call vide undertaking dated: 06.10.2022.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC directed PTA to get the relevant documents verified from Audit within three months. No further progress was reported till finalization of this report.

Audit suggests that a fact-finding inquiry be conducted as to why the LDI license was signed and granted without fulfilment of codal formalities to an operator who had business connections with a defaulted company, besides compliance of the DAC directives.

(DP No. 42)

1.5.6 Irregular change and insertions of new clauses in LDI license – US\$ 500,000 (Pak Rs 107.975 million)

According to Rule 5.2.3 of Telecommunication Policy 2015, the Federal Government in consultation with PTA will review the licensing policy framework, keeping in view the market state. Any proposed changes to the licensing regime will be made in consultation with the sector stakeholders and will be subject to approval by Federal Government. Rule 4.2.1 (b) of De-Regulation Policy, 2003 further states that the licensees will be permitted to lease infrastructure from PTCL or any other infrastructure owner on mutually agreed commercial terms, non-discriminatory to other licensees seeking the same facility. A long-term lease of 5 years or more will be acceptable in lieu of ownership.

PTA HQ under the Cabinet Division, Islamabad issued LDI license to M/s Zeta Technologies (Pvt.) Ltd. on 05.01.2023 wherein PTA had changed and included new clauses 3.2.6 to 3.2.8 in the LDI licenses under heading - Network Rollout Obligations.

Audit observed that PTA changed the template of the LDI license and included new clauses without the approval of the Federal Government as required under the Telecom Policy 2015.

Audit contends that, apart from soliciting the approval of the Federal Government, insertion of new clauses adversely impacts the business of Telecom Infrastructure Providers which is against the spirit of Section 5 (b) and 6 (a) of PTR, 1996 dealing with enforcement, monitoring and protecting the rights of licensees.

Audit reported the matter to the management and PAO during November, 2023. It was replied that with the insertion of enhanced terms and obligations in LDI License template, the scope of LDI License did not change and the licensing regime remained intact. There was a demand to increase the percentage of fiber-to-the-tower/site (FTTT/FTTS) to promote rapid modernization of telecommunication systems and services.

The reply is not tenable as any proposed changes to the licensing regime were to be made in consultation with the sector stakeholders and subject to approval by the Federal Government. Besides changing the scope of the template and causing infringement upon the rights of the licensees, the LDI licensees could avail the infrastructure laid by the telecom infrastructure providers.

The matter was discussed in the DAC meeting held on 20th December, 2023. The DAC directed PTA to share the outcome of Authority's review with Cabinet Division and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 43)

1.5.7 Poor quality of 4G/LTE services & non-compliant of confidence level of web page loading time

According to Regulation 4 of Cellular Mobile Network Quality of Service (QoS) Regulations, 2021, licensees are required to meet Webpage Loading Time threshold of 5 seconds. Further, according to Next Generation Mobile Service (NGMS) licenses, the licensees are required to meet the threshold of 100 dBm or above of Reference Signal Receive Power (RSRP) with 90% confidence level. Moreover, Regulation 10 (1) (2) of PTA Functions and Power Regulations, 2007, states that the Authority shall conduct inspections, surveys, tests or make surprise checks through its designated officers or conduct performance audit of quality of service of the licensee from time to time to ensure that users of telecommunication services get such quality of service as laid down in the license, regulations and Key Performance Indicators (KPIs).

PTA under the Cabinet Division, Islamabad published 4th quarter quality of service survey including webpage loading time on its website for general public and found cellular operators as non-compliant to QoS Regulations, 2021.

Audit observed from the samples of 4G/LTE strength based on the survey of selected routes that the operators were non-compliant both in auto detect and locked

modes and were providing poor quality 4G/LTE services. PTA did not take any action against the operators as per PTR, 1996 and PTA Functions & Powers Regulations, 2007.

Audit contends that non-compliance by the service providers with the above stated regulations deprived the subscribers of the quality telecom services.

Audit reported the matter to the management and PAO during November, 2023. It was replied that PTA conducted quarterly QoS Surveys across the country with an aim to identify the weak areas and shared results with CMOs for taking required remedial actions in order to improve delinquent KPIs upto licensed thresholds. Coverage redundancy is ensured by mobile operators by deploying layers of technology i.e. 2G, 3G and 4G so wherever 4G is not available the technology falls back to 3G. Conduct of surveys and subsequent actions on part of CMOs was a continuous process and services are ensured within the claimed coverage of CMOs.

The reply is not tenable. The poor quality of services was reported in the surveys conducted by PTA itself and non-compliance of the operators to regulatory framework was identified; however, no action was taken against the operators to improve the quality of services.

The matter was discussed in DAC meeting held on 20th December, 2023. The DAC directed PTA to arrange a presentation on the instant issue for Audit, within two months. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 40)

CABINET DIVISION

CHAPTER-2

FREQUENCY ALLOCATION BOARD (FAB)

Chapter 2

Frequency Allocation Board (FAB)

(Cabinet Division)

2.1 Introduction

A) Frequency Allocation Board (FAB), established on 1st January 1996 under the Pakistan Telecommunication (Reorganization) Act, 1996, is under the administrative control of the Cabinet Division and funded by PTA. Section 42 of Pakistan Telecommunication (Reorganization) Act 1996 provides for its accounts to be audited by the Auditor-General of Pakistan. FAB is managed by a Board appointed by the Government of Pakistan and follows the applicable recommendations of the International Telecommunication Union (ITU). Its main functions are to:

- Allocate and assign frequency spectrum to the public sector providers of telecommunication services and systems, radio and television broadcasting operations, public and private wireless operators, and others.
- Monitor the sphere and determine illegal users of frequencies and report to PTA for action under the Act.

B) Comments on Budget and Accounts

2.1.1 FAB management did not provide the annual audited accounts till finalization of the Report despite continuous pursuance by Audit. Hence, no comments on accounts could be offered.

Table-I Audit Profile of FAB**(Rs in Million)**

S. No	Description	Total Nos.	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
1	Formations	01	01	1,107.075	-

4	Foreign Aided Projects (FAP)	-	-	-	-

2.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 8.971 million were raised in this report during the audit of Frequency Allocation Board. Summary of the Audit observations classified by nature is as under:

Table-II Overview of Audit Observations

(Rs in Million)

S. No.	Classification	Amount
1	Non-production of record	-
2	Reported cases of fraud, embezzlement and	-
3	Irregularities	5.171
A	HR/Employees related irregularities	5.171
4	Value for money and service delivery issues	-
5	Others	3.800
Total		8.971

2.3 Status of Compliance with PAC Directives

S. No	Audit Year	FAB		Compliance		%age
		Total Paras	Total Directives	Received	Not Received	
1	1997-98	2	2	2	0	100
2	1998-99	5	5	5	0	100
3	1999-00	4	4	4	0	100
4	2000-01	3	3	2	1	67
5	2002-03	8	8	8	0	100
6	2003-04	5	5	4	1	80

7	2004-05	5	5	5	0	100
8	2005-06	10	9	9	0	100
9	2006-07	5	2	2	0	100
10	2007-08	3	3	2	1	67
11	2008-09	7	7	7	0	100
12	2009-10	7	7	7	0	100
13	2010-11	9	9	8	1	89
14	2013-14	11	11	10	1	91
15	2014-15	9	6	6	0	100
16	2015-16	5	3	3	0	100
17	2016-17	6	4	4	0	100
18	2017-18	10	8	6	2	75
19	2018-19	5	4	2	2	50
20	2019-20	12	8	8	0	100

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

2.4 Irregularities

A. HR/Employees related irregularities

2.4.1 Inadmissible payment of incentives – Rs 5.171 million

According to definition 2 (xxii) of FAB Employees Service Regulations, 2014, gross salary means “Monthly Pay and Regular allowances before subscriptions and deductions”. Further, Honourable Supreme Court of Pakistan in Para-5 of Civil Petition No.231-K of 2020 elaborates in Para-486 of the decision that the term ‘emoluments’ means the “emoluments which the officer was receiving immediately before his retirement and shall include; Pay as defined in FR 9 (21)(a)(i); Senior Post Allowance; Special Pay of all types of nature; Personal Pay; Technical Pay; Indexed Pay; Increment accrued during leave preparatory to retirement; and any other emoluments which may be specially classed as Pay”.

Islamabad High Court, Islamabad in W.P No.3084/2011 decided vide para 31(iii) that for the period w.e.f 01.03.2012 to 21.08.2015 the petitioner’s salary etc. shall be paid by FAB in the amount as payable to a BS-19 officer of FAB. Further, the Honorable Supreme Court of Pakistan in Civil Petition No.2894 of 2019 upheld the decision of the Islamabad High Court and decided to pay the emoluments for the period mentioned in para 31 (iii).

Audit observed that the case for payment of emoluments to the officer was initiated and referred to Legal Advisor FAB who opined that all regular allowances and pay would be paid to the petitioner as decided by the High Court and the Supreme Court of Pakistan. However, on the directions of Director (Finance) FAB, while calculating the pay & allowances for payment, included Reward Money, Proficiency Incentive, Leave

Encashment and POL Charges contrary to the advice of the legal advisor, ESR, 2014 and decision of the Court; thereby making inadmissible payment of fringe benefits of Rs 5,170,678 during FY 2022-23. Detail is given as under:

S.No.	Ledger Code	Description	Amount (Rs)
01	41352	Reward Money	1,213,978
02	41333	Proficiency Incentive	1,249,608
03	42315	Leave Encashment	1,677,480
04	44117	POL Charges	1,029,612
Total			5,170,678

Audit reported the matter to the management and PAO during November 2023. It was replied that Rao Abdul Waheed, Ex-Director was relieved from FAB service and was at the disposal of Cabinet Division. The officers did not draw salary or any other allowances from Cabinet Division for the period from 01.03.2012 to 21.08.2015. Therefore, the officer filed a petition in IHC, Islamabad which was decided in favour of the petitioner. FAB filed a Civil Petition No. 2894 of 2019 in the Supreme Court of Pakistan against the judgment of IHC. However, the Supreme Court upheld the decision of Islamabad High Court and dismissed the petition.

The reply is not convincing and therefore not acceptable. The Honourable Supreme Court adjudicated for payment of emoluments. The Legal Advisor of FAB opined that emolument meant Pay & Regular allowance, hence, payment of reward money, proficiency incentive, leave encashment and POL charges by the Finance Wing of FAB was inadmissible.

The matter was discussed in DAC meeting held on 21st December, 2023. The DAC directed FAB to seek opinion from Law and Justice Division and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No.51)

2.5 Others

2.5.1 Loss due to unauthorized use of FM Radio Frequency without valid License – Rs 3.800 million

According to Section 42 (1) of Pakistan Telecommunication (Re-organization) Act, 1996 and Regulation 4 (d) of Radio Frequency Spectrum (Allocation, Management & Monitoring) Regulations, 2021, the Board has the powers to investigate all complaints of interference and take appropriate action for effective clearance thereof. Rule 4 (3) (d) (iii) *ibid* further states that the Board shall have the powers to suspend and cancel the assignment of radio frequency to any operator or user upon the recommendation of the Authority or the PEMRA in case of licensee or proof sufficient to satisfy the Board that the operator or user has ceased its operations authorized under the Act, Ordinance and rules and regulations made thereunder and the license without approval of the Board, the Authority or the PEMRA.

FAB HQ under the Cabinet Division, Islamabad carried out technical monitoring survey during 1st quarter of 2023 and found unauthorized operation of FM Broadcast services in Mirpur, AJK. The monitoring report sent to PEMRA indicated that the License of M/s Rose Media had expired in 2017 and was not renewed as per FAB SP&M Record.

Audit observed that the frequency allocated to the licensee was operational without valid license and the FAB management and PEMRA did not take any action as per Act and Regulations due to which a loss of Rs 3,800,000 was caused to the national exchequer, as annual renewal fee at prescribed rate of Rs 400,000 along with a base price was not recovered from the operator for the last seven (7) years as detailed below:

S.No	Name of Operator	Bandwidth	Frequency Spot	Base Price (Rs)	Annual Renewal Fee (Rs)	Total amount (Rs)
01	M/s Rose Media	200kHz	90 MHz	1,000,000	2,800,000	3,800,000

Audit contends that due to weak monitoring and enforcement, the operator continued to use illegal frequency and FAB did not take any action against the operator.

Audit reported the matter to the management and PAO during November, 2023. It was replied that FAB monitors only the frequencies as per section 5(4) of Pakistan Wireless Board Act and forwards the reports to Authorities; in this case PEMRA, for enforcement action.

The reply is not tenable. Regulation 4 (d) of Radio Frequency Spectrum (Allocation, Management & Monitoring) Regulations, 2021, empowers the Board to suspend and cancel the assignment of radio frequency to any operator on the recommendation of the concerned authorities (PEMRA and PTA).

The matter was discussed in DAC meeting held on 21st December, 2023. The DAC directed FAB to share the relevant record with Audit for verification regarding action taken by PEMRA. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives and responsibility be fixed for allowing illegal use of Radio Spectrum.

(DP No.54)

2.5.2 Inadequate action by FAB against unauthorized usage of spectrum

According to Section 42 (1) of Pakistan Telecommunication (Re-organization) Act, 1996 and Regulation 4 (d) of Radio Frequency Spectrum (Allocation, Management & Monitoring) Regulations, 2021, the Board shall investigate all complaints of interference and shall take appropriate action for effective clearance thereof.

FAB HQ under the Cabinet Division, Islamabad forwarded monitoring reports to PTA for enforcement against illegal users including twenty (20) cases of unauthorized usage of spectrum during 2nd quarter of 2022 (October – December, 2022).

Audit reviewed the monitoring reports and observed that:

- i. FAB reported to PTA the misuse of frequency spots 3423 & 3429 located at Anwar Baloch Restaurant, Malir Bridge, Karachi by M/s Jazz. PTA referred back the case of M/s Jazz to FAB with the comments that above mentioned frequency spots were assigned and were under the use of Link-Dot-Net. FAB did not respond to the comments of PTA and left the case unattended.
- ii. M/s Telenor and Zong filed complaints to FAB against the installation of Cellular Signal Repeaters on different locations, causing interference in their respective IMT 900 MHz, 1800 MHz and 2100 MHz uplink frequency bands. FAB forwarded the complaints to Director (Enforcement Wireless) PTA during May, 2023 instead of taking action as per the Act and Regulations.

iii. FAB did not provide the list of illegal users of frequencies having complete information of the users addresses and contact numbers as identified by PTA Zonal office Karachi. PTA took actions in some cases but the illegal users denied to have used frequencies. Therefore, PTA suggested that in future joint Technical Monitoring would be carried out.

Audit contends that FAB did not perform its regulatory obligations of taking action against the illegal user of frequencies; instead, FAB reported the matter to PTA for action and shifted the responsibility on PTA.

Audit reported the matter to the management and PAO during November, 2023. It was replied that FAB conducts technical monitoring surveys by employing state-of-the-art monitoring equipment to monitor usage of frequency spectrum by wireless operators and identifies its unauthorized usage by providing complete details. Same is reported to the concerned authorities (PTA HQ / PEMRA HQ) for requisite enforcement action. It is reiterated that FAB is authorized to allocate, assign and monitor frequency spectrum all over Pakistan, however, enforcement does not form mandate of FAB.

The reply is not tenable. FAB has the powers under Rule 4(2)(d) of Radio Frequency Spectrum (Allocation, Management & Monitoring) Regulations, 2021 to investigate all complaints of interference and take appropriate action for effective clearance thereof.

The matter was discussed in DAC meeting held on 21st December, 2023. The DAC directed FAB to get the record verified in respect of reported twenty cases in collaboration with PTA. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives and responsibility be fixed for non-taking action against the illegal users.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2013-14, 2014-15 & 2015-16 vide Para(s) number 1.6, 2.8 & 2.4.2 with no financial

impact being para on the functions of the organization. Recurrence of same irregularity is a matter of serious concern.

(DP No. 63 & 66)

2.5.3 Allocation of free backhaul frequencies and non-formulation of AIP Framework

Paras 8.12.1, 8.12.2 & 8.12.3 of Telecommunication Policy, 2015 states that Administrative Incentive Pricing (AIP) will be introduced for microwave spectrum assignments. PTA will consult stakeholders on the framework for AIP prior to its approval by the Federal Government (MoIT). Para 8.8.1 *ibid* further states that spectrum will be allocated for digital microwave communication to provide backhaul for fixed and mobile services. The roll out of future technologies, in the absence of fibre, is likely to create a bottleneck in backhaul. With this in view, and before the bottleneck arises, the microwave spectrum will henceforth be allocated, assigned and charged to licensees and other users through Administrative Incentive Pricing (AIP) mechanism to ensure rational use of spectrum for the purpose.

FAB HQ under the Cabinet Division, Islamabad in its 48th Board's meeting approved earmarking of six (6) additional microwave backhaul channels to M/s CM Pak and Ufone. The record transpired that ISI supported the proposals for M/s CM Pak and Ufone for a period of one (1) year during the meeting with a suggestion to formulate AIP framework for Microwave Spectrum Assignments.

Audit observed that FAB allocated unrestricted free backhaul frequencies to the operators without finalization of AIP framework and fixing of fee as envisaged in Telecommunication Policy, 2015 which caused loss to the National Exchequer in the form of non-recovery of fee from the operators.

Audit contends that despite suggestion of the ISI, amid scarce state resources, provision of free allocation of frequencies to the operators in violation of the Policy reflect mismanagement and failure of Internal Controls.

Audit reported the matter to the management and PAO during November 2023. It was replied that the recommendations of the Board were conveyed to MoITT and PTA for formulation of the AIP framework as per Telecom Policy, 2015. The charging mechanisms and collection of fees from the telecom users was the mandate of PTA rather than FAB as per the Telecom Act, 1996. The AIP was proposed in the Telecom Policy, 2015, however, clause 8.7.3 of the same Policy states that the ASAF “Annual Spectrum Administrative Fee” will continue as defined in Section 4.4 and Appendix-B of the 2004 Mobile Cellular Policy till AIP is introduced consequent to the policy. Hence, no free spectrum is being used by the mobile operators.

The reply is not tenable. Para 8.8.1 of Telecom Policy, 2015 clearly mentions that allocation of backhaul frequencies will be charged to licensees and other users through Administrative Incentive Pricing (AIP) mechanism to ensure rational use of spectrum for the purpose. Further, the AIP framework was required to be formulated in consultation with all stakeholders and approval of the Federal Government which is still pending despite lapse of eight (8) years.

The matter was discussed in the DAC meeting held on 21st December, 2023. The DAC directed FAB to shift / refer the para to PTA and MoITT for response. No further progress was reported till finalization of this report.

Audit recommends that responsibility be fixed for allocation of free backhaul frequencies without finalization of AIP framework.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2017-18 vide Para(s) number 2.5.1 with no financial impact being para related to functions of the organization. Recurrence of same irregularity is a matter of serious concern.

(DP No.64)

MINISTRY OF DEFENCE PRODUCTION

CHAPTER-3

**NATIONAL RADIO &
TELECOMMUNICATION CORPORATION
(NRTC)**

Chapter 3

National Radio & Telecommunication Corporation (NRTC)

(MoDP)

3.1 Introduction

A) The National Radio & Telecommunication Corporation (NRTC) was established on 16th February, 1966 and was registered under the Companies Ordinance, 1984 as a Private Limited Company. NRTC falls under the administrative control of the Ministry of Defence Production. The Corporation is managed by a Board of Directors headed by Secretary, Ministry of Defence Production.

The main objectives of the Corporation include manufacturing and assembling of all kinds of radio and wireless sets for Defence Services, jamming solutions and production of batteries, eliminators and distribution point boxes for PTCL and NTC. Besides, the organization is also engaged in expanding its business for introduction of new products and IT solutions.

B) Comments on Budget and Accounts

3.1.1 According to Auditor-General's office letter No.574/43-R&SD/ SOP/2007Pt dated 01.12.2023, National Radio Telecommunication Corporation (NRTC), being autonomous body of the Federal Government, while appointing the Chartered Accountant firm for annual audit of its financial statements, is required to obtain concurrence of the Auditor-General of Pakistan. However, NRTC did not obtain the said concurrence from the office of the Auditor-General of Pakistan.

3.1.1 According to Note 32 to the Financial Statements, NRTC could not control its exchange (loss) on financial instruments as the same was increased from Rs 302.924 million (in 2022) to Rs 508.941 million (in 2023); thereby showing an increase of 68% as compared to the corresponding exchange loss of previous year. The increase

in exchange loss shows weak foreign exchange risk management by NRTC which, if not mitigated, would further erode the future profitability of the company.

3.1.2 According to Note 35.1 to the Financial Statements, the credit risk represents the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. However, the age analysis of the trade debts of NRTC showed that the credit risk was increased significantly as the trade debts past due over 180 days had increased from Rs 737.517 million (in 2022) to Rs 1729.79 million (in 2023); thereby showing an increase of 134.5%.

Table-I Audit Profile of NRTC

(Rs in Million)

AUDIT PARAS

3.4 Irregularities

A. Procurement related irregularities

3.4.1 Irregular procurement of equipment and renewal of software– Rs 179.092 million

According to Rules 12(2) of PPRs, all procurements over three million Pakistani Rupees should be advertised on the Authority’s website as well as in other print media or newspapers having wide circulation in at least two national dailies, one in English and the other in Urdu.

NRTC under the Ministry of Defence Production, Rawalpindi procured services for renewal of software license and test equipment viz, DC Power Supply, Digital Multimeter, Digital Oscilloscope, Signal & Spectrum Analyser, Network Analyzer and Signal Shark with ADFA2. NRTC incurred an expenditure of Rs 179,091,622 during FY 2022-23 as detailed below:

S.No	PDP No.	Description	Amount
1	147-2024	Renewal of software license from M/s A. Hamson	11,693,650
2	150-2024	Procurement of test equipment from M/s Rohde and Schwarz GmbH & Co.	145,642,844
3.	159-2024	Procurement of test equipment from M/s Nexus Telecom	21,755,128
Total			179,091,622

Audit observed that the services for renewal of software license and test equipment were procured without inviting open tenders.

Audit contends that the procurements were made in disregard to PPRs, 2004 (amended 2021), which reflects weak procurement and contract management.

Audit reported the matter to the management and PAO during November, 2023. It was replied that the procurements were made from the Original Equipment Manufacturers (OEM)/authorised distributors which were covered under Rule 42 (c), (ii) & (iii) of the PPRs 2004.

The reply is not tenable as multiple authorised distributors of PALO ALTO for renewal of software license existed in the market among which competition could be held. Similarly, multiple manufacturers/authorized dealers of the test equipment were available in the market. The services for renewal of software and the test equipment were neither sensitive nor emergently required to be acquired through direct contracting. Further, NRTC did not ensure price reasonablity while procuring the goods and services through direct contracting.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed that evidence of OEM's recommendation for renewal of software license from M/s A Hamsons, client requirement of procurement of test equipment from M/s Rohde and Schwarzs and M/s Nexus Telecom be got verified from audit, besides regularization of expenditure from the competent forum. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for the Audit Years 2018-19 and 2021-22 vide paras No.3.4.1 and 3.4.1 having financial impact of Rs 57.028 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 147,150 & 159)

3.5 Value for money and service delivery issues

3.5.1 Loss due to deduction of LD charges – Rs 264.643 million

According to the standard terms and conditions of the contracts, the LD charges up to 2%-10% on late delivery of supplies are deducted by the customers from all the payments made to NRTC.

NRTC under the Ministry of Defence Production, Rawalpindi executed different local and export contracts for supply of stores.

Audit examined the relevant record of various sales contracts and observed that NRTC did not deliver the requisite stores within the stipulated time due to which the clients deducted LD charges of Rs 264,642,520 as detailed below:

S. No.	Item #	Name of contractor	LD Charges (Rs)
1.	6	DGP (Army)	88,275,600
2.	10	Ministry of Defence, Saudi Arabia	145,176,000
3.	22	D.G C41 Directorate/ C&IT GHQ	14,480,416
4.	23	Director of Procurement (Navy)	5,520,120
5.	25	DGP Army GHQ	11,190,384
Total:			264,642,520

Audit contends that, due to imprudent contract management, NRTC did not deliver the requisite stores within the stipulated time and caused a loss of Rs 264,642,520 in the form of LD charges to the Corporation.

Audit reported the matter to the management and PAO during November, 2023. It was replied that the matter had been taken up with concerned authorities for revision of agreements and waiver off LD charges.

NRTC has accepted the audit contention; however, neither the contract agreements were revised nor LD charges were got waived off from clients till finalization of the Audit Report.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed NRTC management to take up the matter with the concerned departments/agencies for waiver of penalty of LD charges and get the record verified from audit.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in Audit Reports for Audit Years 2018-19, 2019-20, 2021-22 and 2022-23 vide paras no.3.5.3, 3.4.1, 3.5.1 and 3.5.1 having financial impact of Rs 76.663 million. Recurrence of same irregularity is a matter of serious concern.

(DP No.161)

3.6 Others

3.6.1 Non-receipt of mobilization advance in export contract- Rs 2,258.004 million (US\$ 8,164,313)

According to clause 1.4(i) of Export Contract No. FM&S/NRTC / NIA/23 dated 03.02.2023, the purchaser shall pay the supplier according to the payment mode stated hereunder, for the implementation of Part-I as provided in the schedules. The supplier shall be entitled to an advance payment equivalent to fifty percent (50%) of contract sum for Part-I as mobilization fee for commencement of the work. Further, clause 1.5(i) of the contract requires that the supplier shall be entitled to an advance payment equivalent to 35% of contract sum for Part-II as mobilization fee for commencement of work.

NRTC under the Ministry of Defence Production, Rawalpindi executed an export contract of US \$19,609,510 with National Intelligence Agency (NIA), Abuja of Nigeria on 03.02.2023 for provision and installation of various electronic equipment and allied solutions.

Audit observed that NIA of Nigeria was under contractual obligation to pay mobilization advance of Rs. 2,258,004,181 (USD 8,164,313) to NRTC for both parts of the contract before the commencement of work. The said mobilization advance was not received despite lapse of a considerable time. Audit further observed that NRTC issued foreign and local purchase orders of Rs 1,138,103,137 and made advance payments thereof including allied expenses on finalization of the contract.

Audit contends that due to imprudent contract management, NRTC incurred huge expenditure without receipt of mobilization advance as per contract.

Audit reported the matter to the management and PAO during November, 2023. It was replied that as per contract, 50% and 35% of mobilization advance was to be received for phase-I & II before commencement of the work. The payment got delayed due to change of Government in Nigeria, however, after stabilization of newly formed Government, the payment is expected to be received shortly. As regards to the procurement and allied expenditure, the amount was incurred for timely supplies without delays.

The reply is not tenable. The expenditure incurred in advance without receipt of mobilization advance as envisaged in the contract and without bank guarantee has increased the risk/exposure of NRTC to huge loss.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed NRTC management to make concrete efforts for implementation of the contract and receiving of the mobilization advance. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 140)

3.6.2 Non-recovery against delivered stores - Rs 2,097.602 million

According to terms and conditions of various sales contracts given in the table below, the customers were liable to make advance payments as well as payments against delivered stores to NRTC.

NRTC under the Ministry of Defence Production, Rawalpindi executed various sales contracts during FY 2022-23 and delivered the requisite stores to the clients as per terms and conditions of the contracts.

Audit observed that NRTC did not manage to recover an amount of Rs 2,420,941,670 on account of advance payment and payments against delivered goods from various customers as detailed below:

S. No.	Item No.	Organizations	Outstanding Amount (Rs)	Delivery Date
1.	2	MI Directorate	1,122,623,850	02.06.22
2.	4	CMA (DP) Rawalpindi	302,095,128	09.06.23
3.	12	Civil Works Organization	44,466,188	29.04.22
4.	13	Rawalpindi/GHQ	66,110,625	20.05.23
5.	14	F.C Baluchistan (North), Quetta	215,966,526	05.04.21
6.	16	S.S.P Logistics & Headquarters, Islamabad	34,000,000	17.04.23

7.	17	Director General Procurement (Army)	498,939,759	18.05.23
8.	27	D.G C41 Directorate/ C&IT Branch/GHQ	93,977,111	07.04.23
9.	28	NLC	36,277,881	23.08.22
10.	30	FC Corps	6,484,602	10.03.23
Total			2,420,941,670	

Audit contends that due to weak receivables management, NRTC failed to recover the receipts from its customers despite lapse of considerable time.

Audit reported the matter to the management and PAO during November, 2023. It was replied that an amount of Rs 323.340 million has been recovered and verified by audit against contracts at S. No 1&2.

The management has accepted the audit contention; however, NRTC did not make efforts to recover the captioned amount.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed to reduce the para to the extent of amount verified by audit. Further, efforts be made to recover the balance amount and the record may be got verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 160)

3.6.3 Loss due to non-incorporation of price variation clause– Rs 822.437 million

As per Clause-1b(2) of Chapter-V of DPPI-35, related to Price Variation Clause (PVC), if such a clause is unavoidable, variation in the contract price would be admissible only in so far as rise or fall in cost of labour and/or material is concerned and that to, 15% maximum variation for contracts on F.O.R (freight on road) basis, where import of raw material is involved to execute the contract.

NRTC under the Ministry of Defence Production, Rawalpindi executed two contracts with D.G Procurement (Army) on FOR basis as detailed below:

S.No	Contract No.	Rate/Unit	Qty	Date of Contract	Total value
01	08-0790-3- /0A	18,390,750/-	115	04.06.2021	2,114,936,250
02	08-0834-3-0	20,790,000/-	162	27.05.2022	3,367,980,000
Total					5,482,916,250

Audit examined the contracts documents and observed that:

- (i) The first contract was signed on 04.06.2021 when the exchange rate was Rs 155.30/\$, whereas the second contract was signed on 27.05.2022 when the exchange rate was Rs 202.60/\$; thereby leading to an exchange rate difference of Rs 47.30/\$ between the two contracts. NRTC supplied 115 GSRs at a total cost of Rs 2,114,936,250. Had the price variation of 15% been included in the contract, the contract amount would have increased to Rs 2,432,176,688. Due to non-inclusion of the PVC in the contract, NRTC sustained a loss of Rs 317,240,438 (Rs 2,432,176,688- Rs 2,114,936,250).

- (ii) The second contract was signed on 27.05.2022 when the exchange rate was Rs 202.60/\$, whereas the exchange rate at the end of FY 2022-23 was Rs 289/\$. NRTC supplied 162 GSRs for an amount of Rs 3,367,980,000. Had the price variation of 15% been included in the contract, the contract amount would have increased to Rs 3,873,177,000. Due to non-inclusion of PVC clause, NRTC sustained a loss of Rs 505,197,000 (Rs 3,873,177,000- Rs 3,367,980,000).

Audit contends that due to volatility of exchange rate and non-availability of forex hedging, it was inevitable for NRTC to include the Price Variation Clauses in both the contracts. However, due to non-inclusion of PVC in the contracts NRTC sustained a total loss of Rs 822,437,438

Audit reported the matter to the management and PAO during November, 2023. It was replied that NRTC made all out efforts to get the maximum increase in the prices through sales contracts. NRTC had to comply with the Invitation to tender conditions. In every quotation/tender NRTC mentions about the shorter price validity with prices conditional to the current dollar rate. The customers show reluctance to increase the price due to budget constraints at their end. However, in this particular case NRTC managed to increase the contract value by 13%.

The reply is not tenable as both the contracts were on 'FOR' basis and involved import of raw materials. Therefore, the PVC should have been included in the contracts to avoid the loss of exchange rate fluctuation.

The matter was discussed in the DAC meeting held on 07th December, 2023. The DAC directed that Cost of Production and Cost Variation Statement based on the exchange rate fluctuation be provided to audit. It was also directed that efforts be made to recover the exchange rate fluctuation from the customers. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

3.6.4 Loss due to exchange rate fluctuations –Rs 653.710 million

According to Exchange Fluctuation Clauses of two contracts No. 91/ET/2020-21 and 92/ET/2020-21 (Clause-15 in both the contracts) executed between the Director General Munitions Production Rawalpindi and NRTC, the exchange rates have been taken as 1 US\$ = Rs 162 &

Rs 166.958 respectively in both the contracts. However, any fluctuation in the rates of exchange at the time of opening of LCs and subsequent variation at the time of payment will be paid at the actual production of bank documents. In case of increase in US Dollar rate, the purchaser will make payment of the additional amount to the supplier, on allocation of funds from GHQ. Amount saved by NRTC (if any) due to reduction in US Dollar rates will be deposited into government treasury through TR.

NRTC under the Ministry of Defence Production, Rawalpindi executed two contracts with the Director General, Munitions Production, Rawalpindi for supply of Software Defined Radio (SDRs) sets on 28.06.2021. Both the contracts provided for fluctuation in exchange rates at the time of opening of LCs and subsequent variation at the time of payment on production of bank documents.

Audit observed that NRTC did not claim the fluctuation in exchange rates due to which NRTC sustained a loss of Rs 653,709,654 upon supply of stores as detailed below:

S.No	Contract No	Forex Value (\$)	Rate as per contract	Prevailing US\$ rate	Loss

					(Eq. Rs)
1	No.91/ET/2020-21/Army(28.06.2021)	8,301,839	Rs 162/\$	Rs207.12/\$	374,578,975
2	No.92/ET/2020-21/Army(28.06.2021)	6,950,119	Rs166.958/\$	Rs 207.12/\$	279,130,679
Total					653,709,654

Audit contends that due to weak contract management, NRTC failed to recover the difference in the exchange rates from the client and caused a loss to the Corporation.

Audit reported the matter to the management and PAO during November, 2023. It was replied that upon receipt of payments against both the referred contracts, case was immediately taken up with concerned agency for amendment in the contracts to cover the dollar exchange rate fluctuation.

The reply is invalid. Both the contracts envisaged clause-15 for payment of the exchange rate fluctuations and do not require amendment.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed to recover the amounts as per contractual terms and get the record verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in Audit Reports for Audit Years 2018-19, 2019-20 and 2022-23 vide paras no. 3.6.6, 3.5.3 and 3.6.3 having financial impact of Rs 136.410 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 142)

**3.6.5 Wasteful expenditure on account of supply of installation kits
–Rs 66.781 million**

According to terms and conditions of the Quotation No. SL/1-Gen/T-80UD/GHQ/2019 dated 13.12.2019, prices were F.O.R based and valid for 30 days. Further, payment terms were 50% advance and 50% after the delivery of store within six months after receipt of confirmed order.

NRTC under the Ministry of Defence Production, Rawalpindi, in response to request of C&IT (GHQ) dated 02.12.2019, offered the rate of Rs 247,132,883 for the proposed project of Post Trial Report-Fd Validation of SDRs Fitment in Tks T-80UD Tanks. In response, the C&IT Branch Sigs Directorate, communicated the approval for provision of installation kits in two phases.

Audit observed that NRTC made payments to the foreign and local suppliers amounting to Rs 66,780,705 without executing formal contract agreement and receiving any advance payment from the customer.

Audit contends that incurring huge expenditure without any formal agreement and without receiving any advance from the customer resulted in wasteful expenditure as the customer has not executed the contract till the completion of audit.

Audit reported the matter to the management and PAO during November, 2023. It was replied that activities on the part of NRTC with respect to said order were as per customer consent as per LOI/supply order. The case has been taken up with customer and pursuance at appropriate level is being made for formal contract signing.

The reply is not tenable as contract could not be executed for more than two years and significant cost was incurred on procurements against the subject order.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed to conduct a fact finding inquiry within three months to ascertain the reasons for delay in contract and for incurring the expenditure without execution of contract. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 144)

3.6.6 Loss to national exchequer due to less charging of sales tax – Rs 33.094 million

According to S.R.O. 179(1)/2023 dated: 14.02.2023, the Federal Government enhanced the rate of sales tax in respect of taxable goods falling within the purview of sub-section (1) of section 3 of the Sales Tax Act, 1990 from seventeen percent (17%) to eighteen percent (18%).

NRTC under the Ministry of Defence Production, Rawalpindi executed six (06) contracts with different clients for supply of defence related stores.

Audit scrutinized the record relating to sales contracts and observed that an amount of Rs. 33,093,590 was less claimed by NRTC from its customers in the sales tax invoices; thereby, causing a loss to the national exchequer. It is pertinent to mention that sales tax rate was revised from 17% to 18% during F.Y 2022-23.

Audit contends that due to weak financial discipline sales tax at lesser rates was charged to customers.

The matter was reported to the management and PAO during November, 2023. It was replied that amendment against 02x contracts to incorporate the change of GST rate from 17% to 18% was made. The case for amendment in remaining 04x contracts was also taken up with the concerned agencies. However, customer's view point considering the

non-allocation of additional funds cannot be subsided. NRTC assures making hectic efforts for recovery of remaining payments including 18% GST. Updated status will be shared with the Audit.

The management accepted the audit contention; however, no amount against the less receipt of GST has been received till date.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed to amend all contracts, the amount of sales tax be collected/deposited into national exchequer and get the record verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 143)

3.6.7 Loss due to imprudent contract management – Rs 29.800 million

According to clause 11 of the contract with Survey of Pakistan, Ministry of Defence, should the contractor fail to deliver the Aerial photography data within stipulated period of supply, on the expiry, the client shall be entitled at his option to take either of the actions: (a) To cancel the contract, at risk and expense of the Contractor. The contractor shall also be liable to bear any loss which client sustains on this account. (b) The firm has to pay liquidation damages for the period of delays in supply of Aerial photography data up to rate of 1% of the contract price per month or part of a month exceeding the original delivery period subject to the provision that the total liquidation damages thus levied will not exceed 10% of total contract price.

NRTC under the Ministry of Defence Production, Rawalpindi executed a contract of Rs 108,433,500 with the Survey of Pakistan, Ministry of Defence, for Cadastral Mapping (8-10 cm true ortho-rectified aerial photography) in the cities of Lahore and

Karachi in May, 2021. NRTC was under contractual obligation to carry out the work within 30 days from the date of signing of the contract.

Audit observed that the Survey of Pakistan paid an amount of Rs. 35,625,905 to NRTC against 15% mobilization advance and 10% payment on successful delivery of initial deliverables. Accordingly, NRTC incurred an expenditure of Rs 29,800,583 by making payment to the supplier for execution of the contract. Subsequently, the Survey of Pakistan cancelled the contract due to failure of NRTC to complete the contractual obligation. The Survey of Pakistan demanded the amount of Rs 35,625,905 back which was not returned by NRTC till finalization of this report.

Audit contends that due to imprudent contract management, NRTC sustained a loss of Rs 29,800,583 by making payment to the supplier. In addition, the Survey of Pakistan demanded its payment of Rs 35,625,905 back due to non-completion of the work within the stipulated time.

Audit reported the matter to the management and PAO during November, 2023. It was replied that efforts were being made to resume the contract. Besides, a recovery notice was also served on the vendor to make the loss good.

The management accepted the audit contention; however, the matter was not resolved till the date of audit.

The matter was discussed in the DAC meeting held on 7th December, 2023. The DAC directed to conduct a fact-finding inquiry to ascertain the reasons for cancellation of contract and person(s) responsible (if any). The DAC further directed to submit the FFI in the next Board's meeting. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DPs No. 141)

MINISTRY OF DEFENCE PRODUCTION

CHAPTER-4

TELEPHONE INDUSTRIES OF PAKISTAN

(TIP)

Chapter -4

Telephone Industries of Pakistan (TIP)

(MoDP)

4.1 Introduction

A) Telephone Industries of Pakistan (TIP) is a private limited company incorporated in 1953 under Companies Act 1913 (now Companies Act 2017). TIP is currently working under the control of Ministry of Defence Production as wholly owned subsidiary of NRTC. In pursuance of the Federal Cabinet's decision, National Radio Telecommunication Corporation (NRTC) acquired TIP in December, 2021.

TIP has redefined its objectives that include establishing, maintaining and operating an organization for the manufacturing and assembly of all kinds of electronic, electrical, security & surveillance, communication and IT, alternate energy and mechanical equipment for commercial and defence use.

B) Comments on Budget and Accounts

4.1.1 TIP management did not provide the annual audited accounts till finalization of the Audit Report; hence, no comments on accounts could be offered.

Table-I Audit Profile of TIP**(Rs in Million)**

S. No.	Description	Total Nos	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
1	Formations	01	01	3,210.089	2514.612
2	<ul style="list-style-type: none"> • Assignment Accounts • SDAs 	-	-	-	-
3	Authorities / Autonomous Bodies etc. under the PAO	01	01	3,210.089	2514.612
4	Foreign Aided Projects (FAP)	-	-	-	-

Classified Summary of Audit Observations

Audit observations amounting to Rs 2,863.721 million were raised in this report during the current audit of TIP. Summary of the audit observations classified by nature is as under:

Table-II Overview of Audit Observations**(Rs in Million)**

S.No	Classification	Amount
1	Non-production of record	-

2	Reported cases of fraud, embezzlement and misappropriation	-
3	Irregularities	2,863.721
A	Procurement related irregularities	406.955
B	Management of Accounts with Commercial Banks	2,456.766
4	Value for money and service delivery issues	-
5	Others	-
Total		2,863.721

4.3 Status of Compliance with PAC Directives

TIP				Compliance		%age
S. No.	Audit Year	Total Paras	Total Directives	Received	Not received	
				1	1990-91	
2	1992-93	19	19	19	0	100
3	1996-97	9	5	2	3	40
4	1997-98	4	4	4	0	100
5	2004-05	No audit para was printed in these Audit Reports.				
6	2005-06					
7	2006-07					
8	2007-08					
9	2008-09					
10	2009-10	13	4	4	0	100
11	2010-11	27	27	23	4	85
12	2013-14	19	2	1	1	50

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

4.4 Irregularities

A. Procurement related irregularities

4.4.1 Irregular expenditure on procurements – Rs 375.180 million

According to Rule 12 (2), all procurement opportunities over three million Rupees should be advertised on Authority's website as well as in other print media or newspapers having wide circulation. The advertisement in the newspapers shall principally appear in at least two national dailies, one in English and the other in Urdu.

TIP under the Ministry of Defence Production, Rawalpindi incurred an expenditure of Rs 375,180,621 on procurement of electrical cables, items, frames and other items of different specifications for Body Worn and Pakhtunkhwa Energy Development Organization (PEDO) projects during FY 2022-23.

Audit observed that TIP procured the items for Body Worn and PEDO projects on the basis of quotations instead of inviting tenders. Further, the frames were procured on the basis of single bid. Detail is given below:

S.No	PDP No.	Description	Amount (Rs)
01	100-24	Procurement of Cables	197,191,800
02	-do-	Procurement of Electric Items	44,248,716
03	-do-	Procurement of Frames	47,291,332
04	102-24	Procurement of items of different specifications for Body Worn project	86,448,773

Total	375,180,621
--------------	--------------------

Audit holds that electrical cables, items, frames and other items of different specifications were procured in violation of PPRs 2004 (amended 2021) which reflect weak procurement & contract management.

Audit reported the matter to the management during November, 2023. It was replied that in accordance with the terms of contract with PEDO, advance samples were required to be approved by the consultant (authorized by customer) before procurement. For this purpose, a committee was formed to get quotations from OEMs against the equipment (cables & Electrical Items) and after technical inspection, samples were submitted to customer for acceptance. After acceptance from the customer, equipment was purchased from OEM in case of electrical items and cables, whereas customized frames were procured through tender process. It was further replied that procurement for Body Worn Project was made from OEM / authorized rep against the project and as per requirement of the customer related to specific brand, hence, tender was not required.

The reply is not tenable. TIP obtained three quotations from different OEMs and the lowest one was forwarded to the client which was accepted by the client. Notwithstanding, many other OEMs for cable and electric items, neither quotations were obtained nor tender was invited. Tender (single stage two envelopes) was invited for procurement of frames; however, the procurement was made from a single bidder without technical evaluation on the plea that the bidder was financially lowest.

The matter was discussed in DAC meeting held on 6th December, 2023. The DAC directed TIP to get the record of calling quotations from vendors be verified from Audit within 3 days. The DAC further directed TIP to provide complete record i.e. ledger, OEM certificates, quotations and comparative statement for verification by Audit within 3 days.

Audit recommends implementation of DAC directives.

(DP No. 100 & 102)

4.4.2 Irregular/unjustified procurement of vehicles - Rs 31.775 million

According to Para 10 of Memorandum of Articles of Association of TIP, the management of the business of the Company shall be vested in the Directors and the Directors may exercise all such power and do all such acts and things, as the company is, by its Memorandum of Association or otherwise authorized to exercise or do and as are not hereby or by statute directed or required to be exercised or done by the company in general meeting.

TIP under the Ministry of Defence Production, Rawalpindi incurred an expenditure of Rs 31,775,000 on purchase of eight (8) new vehicles during 2022-2023 as detailed below:

S. No.	Description	Qty	Purchase Order No.	Name of supplier	Amount (Rs)
01	Suzuki Bolan	01	LP-958/L-7876/ 22 dated 13.09.2022	M/s Suzuki Motors, IBA	1,500,000
02	Suzuki Cultus	02	-do-	-do-	5,508,000
03	Hyundai Tucson AWD	01	LO-957/L7876/22 dated 13.09.2022	M/s Hyundai Islamabad	7,627,000

04	Honda City 1.5L	01	LP-1014/2022 dated 13.12.2022	M/s Honda Atlas Cars	4,559,500
05	Honda City CVT 1199 cc	01	LP-959/L- 7876/22 dated 13.09.2022	M/s Honda Atlas Cars	3,969,500
06	Honda City CVT 1199 cc	01	-do-	M/s Honda Atlas Cars	4,305,500
07	Honda City CVT 1199 cc	01	-do-	M/s Honda Atlas Cars	4,305,500
				TOTAL	31,775,000

Audit observed that:

- (i) The vehicles were purchased against the funds received for the projects transferred by NRTC for execution being subsidiary.
- (ii) The approved projects did not have provision for procurement of vehicles for TIP.
- (iii) The vehicles were purchased without approval of the Board of Directors and approved authorization and entitlement as per transport policy. The CEO of TIP was allowed 2200 CC vehicle against the entitlement of 1300 CC.

Audit contends that procurement of luxurious vehicles against project funds without the approval of Board, amid default financial position of TIP, reflects imprudent financial decisions and weakness of internal controls.

Audit reported the matter to the management and PAO during November, 2023. It was replied that being private limited company registered under Companies Act, 2017, the Board of Directors was empowered to exercise certain powers on behalf of the company including incurrence of capital expenditure. Under these provisions of the Companies Act, 2017, the BoDs approved the procurement of vehicles in its 202nd meeting and subsequently its expenditure was approved in 207th BoD's meeting.

The reply is not tenable. The Board approved the budget for the FY 2022-23 instead of approving procurement of vehicles along-with entitlement/authorization of vehicles.

The matter was discussed in the DAC meeting held on 6th December, 2023. The DAC directed the management to place the case in next meeting of the Board of Directors for approval of vehicles including authorization and entitlement of vehicles for each officer. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 105)

B. Management of Accounts with Commercial Banks

4.4.3 Recurring loss due to accumulative loan & accrued mark-up – Rs 2,456.766 million

According to National Bank of Pakistan (NBP) letter No. BR: TIP: Renewal dated 25.09.2007, the NBP approved renewal of credit facilities with the condition that disbursement would be permissible on payment of upto date mark-up; quarterly review of financial accounts of the company; and a registered charge on company's assets in line with total exposure of credit facilities. Furthermore, clause 8.04 of the agreement dated 14.09.2009 states that if the customer fails to pay the amounts as demanded, NBP shall have the right to enforce and realize the securities without limitation the guarantee, the demand promissory note, the hypothecated goods/mortgaged property(s) without intervention of court and to file suit(s) for the recovery.

TIP under the Ministry of Defence Production, Rawalpindi obtained two loans (demand finance facility) from National Bank of Pakistan amounting to Rs 1,177 million against Government Guarantees. Detail of the loans and accrued mark-up is as under:

S.No	Description	Amount (Rs)
01	Demand finance facility – 1	1,075,000,000
02	Demand finance facility – 2	102,149,000
03	Accrued mark-up upto 2022	1,224,029,325
04	Accrued mark-up upto 2023	55,588,600
	Total	2,456,766,925

Audit observed that TIP management did not pay a single instalment as well as interest on the loan to the National Bank of Pakistan, which resulted in recurring losses due to accumulation of loan & its interest amounting to Rs 2,456.766 million.

Audit opines that due to non-payment of loan, the interest amount is being compounded with each passing day having serious financial and legal repercussions for TIP.

Audit reported the matter to the management and PAO during November, 2023. It was replied that TIP management was concerned to resolve the issue as it created major hurdle in operations of the company as well as acquisition of business being a defaulting entity. For resolution of the issue, the case was being discussed at multiple levels. Recently, a meeting was held at HQ NRTC with delegation of NBP to discuss different options including rescheduling of loan on softer terms, waiver of accrued interest and balloon payments against principal amount.

The reply is not tenable as no strenuous efforts were made to settle the loan even after declaring TIP as a subsidiary of NRTC.

The matter was discussed in DAC meeting held on 6th December, 2023. The DAC directed the TIP management to expedite the efforts for resolution of the case with NBP and intimate the progress to Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2010-11 and MFDAC Report(s) for Audit Year(s) 2022-23 vide Para(s) number 6.10 & 4.1 having financial impact of Rs 1,399.291 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 104)

MINISTRY OF INFORMATION TECHNOLOGY & TELECOMMUNICATION

CHAPTER-5

ELECTRONIC CERTIFICATION ACCREDITATION COUNCIL (ECAC)

Chapter 5

Electronic Certification Accreditation Council (ECAC) (MoITT)

5.1 Introduction

A) The Electronic Transactions Ordinance (ETO) was promulgated in 2002. Under this Ordinance, Electronic Certification Accreditation Council (ECAC) was established and accordingly the notification of ECAC was issued on 18.09.2004 but the Council remained dysfunctional from 2007 to 2015. According to the Ordinance, the Certification Council shall comprise five members, with four members from private sector. One of the members shall be designated as the Chairman.

After a gap of eight years, realizing the importance of e-commerce, the Federal Government revived the Council in April, 2015. ETO provides a legal framework to recognize and facilitate documents, records, information, communications, and transactions in the electronic form and to provide accreditation to the certification service providers. With the development of e-commerce, regulatory laws have been made. The paper-based concept of identification, declaration and proof is carried through the use of digital signatures in an electronic environment based on Public Key Cryptography.

According to Section 20 of ETO, 2002, the funds of the Certification Council shall comprise (i) grants from the Federal Government; (ii) fee for grant and renewal of accreditation certificate; (iii) fee, not exceeding ten rupees for every certificate deposited in the repository; and (iv) fines. Further, as per Section 21 of ETO, 2002, main functions of the Council are to:

- Grant and renew accreditation certificates to certification service providers, their cryptography services and security procedures.
- Establish and manage the repository.
- Carry out research and studies in relation to cryptography services.
- Recognize or accredit foreign certification service providers.
- Encourage uniformity of standards and practices.
- Give advice in relation to any matter covered under this ETO, 2002 etc.

B) Comments on Budget and Accounts

Electronic Certification Accreditation Council (ECAC) management had not prepared the annual accounts since its revival in 2015 till finalization of the Audit Report. Hence, no comments on the accounts could be offered.

AUDIT PARAS

5.4 Others

5.4.1 Inadmissible payment on account of support services for PKI – Rs 78.310 million

According to Clause 31.1 of the contract agreement executed between NTC and M/s Ascertia Pvt. Ltd for establishment of Public Key Infrastructure (PKI) on turnkey basis, the contractor shall provide technical support services for all components (hardware/software) mentioned in the BOQ as per price schedule mentioned in attached annex-D of the contract. The details of SLA are mentioned in annex-F. Technical Support Services (TSS) contract shall be signed separately before issuance of Provisional Acceptance Certificate (PAC) in the light of annex-F terms and conditions of Service Level Agreement (SLA). Effective date of the start of TSS contract shall be from the date of issuance of PAC and quarterly payments shall be made by NTC through Director Datacom subject to satisfactory services by the contractor.

ECAC under the MoITT, Islamabad transferred an amount of Rs 546,834,859 for establishment of PKI including the cost of remote support services of Rs 78,309,671 for 4th& 5th years.

Audit examined the record and observed that NTC had executed the Service Level Agreement (SLA) with M/s Ascertia for remote support services only for three years. The provision of support services for the years 4th& 5th was optional as written in the SLA. The transfer of cost of remote support services for the years 4th& 5th by ECAC to NTC was in violation of the terms and conditions of the SLA.

Audit contends that due to weak financial discipline, ECAC transferred the cost of remote support services for the years 4th& 5th which come to be 2025-26 & 2026-27.

The matter was reported to the management and PAO during October and November, 2023. It was replied that ECAC would require continuous support from PKI vendor to run the critical software & infrastructure for the foreseeable future. Rates were locked in BoQ at the time of contract signing which represented proactive approach of the management. These technical support services for 4th & 5th year could not be acquired on such rates at a later stage.

The reply is not tenable. ECAC transferred the cost of remote support services to NTC in anticipation of the services provided by the service provider. As per SLA, payment to the service provider was required to be made on quarterly basis.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC directed the management to provide the detailed reply with breakup of the contractual period of three years and cost of next 4th & 5th years.

Audit recommends implementation of DAC directives.

(DP No. 92)

5.4.2 Non-conducting of foreign training despite payment of Rs 22.838 million

According to clause 11.2.1 of the contract agreement executed between NTC and M/s Ascertia Pvt. Ltd for establishment of ECAC Public Key Infrastructure (PKI) on turnkey basis, the contractor shall provide 10 days foreign training to ten (10) ECAC employees for components of the PKI Solution as per annex-G.

ECAC under the MoITT, Islamabad transferred an amount of Rs 546,834,859 to NTC for establishment of PKI including the cost of foreign training of Rs 22,837,848 for ten (10) employees. The training was scheduled to be held at the lab premises of M/s Ascertia at U.K.

Audit examined the record and observed that NTC did not conduct the foreign training of the employees of ECAC despite the transfer of funds and operationalization of the PKI project since January, 2023.

The matter was reported to the management and PAO during October and November, 2023. It was replied that approval of the foreign training was in the process from the relevant forum. NTC had been requested for its current status. After approval, training schedule would be shared with audit.

The reply is not tenable. Foreign training was planned and scheduled as per Project Implementation Plan (PIP) to be conducted during June and July, 2022.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC directed the management to conduct trainings as per contract agreement under intimation to audit.

Audit recommends implementation of DAC directives.

(DP No. 91)

MINISTRY OF INFORMATION TECHNOLOGY & TELECOMMUNICATION

CHAPTER-6

IGNITE NATIONAL TECHNOLOGY FUND

Chapter 6

Ignite National Technology Fund

(MoITT)

6.1 Introduction

A) The Federal Government of Pakistan established a Fund called the Research and Development Fund under sub-section (1) of section 33 C of Pakistan Telecommunication (Re-organization) (Amendment) Act, 2006. The Research and Development Fund shall be under the control of the Federal Government and the balance to the credit of the R&D Fund shall not lapse at the end of the financial year. The Research and Development Fund consists of:

- Grants made by the Federal Government
- Prescribed contribution by licensees
- Loans obtained from the Federal Government
- Grants and endowments received from other agencies

However, at present the Fund is entirely financed by the contributions from the licensees.

The Fund shall be utilized exclusively for the prescribed Research and Development activities in the field related to Information and Communication Technology and other expenditure incurred by the Federal Government in managing the Fund.

Federal Government in pursuance of sub-section (2) of section 57 of Pakistan Telecommunication (Re-organization) (Amendment) Act, 2006 approved the Research and Development Fund Rules, 2006 on 30.09.2006. In terms of Rule (4) *ibid*, MoITT established Ignite National Technology Fund Company – a non-profit Company limited by guarantee for implementation of research and development projects in the information and communication technology sector. The Company is managed by a Board of Directors headed by the Secretary of IT as its Chairperson to run the affairs of the Company.

B) Comments on budget and Accounts

6.1.1 As per Note-11 to the Financial Statements, Ignite management received a refund of Rs 31.445 million on account of scholarship/ unspent funds from students. However, disclosure of the total refund receivable was not given in the Financial Statements.

Table-I Audit Profile of IGNITE

(Rs in Million)

S No	Description	Total Nos	Audited	Expenditure audited (FY 2022-23)	Revenue/receipt audited (FY 2022-23)

9	2018-19	6	3	3	0	100
10	2019-20	9	9	6	3	67

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

6.4 Irregularities

A. Procurement related irregularities

6.4.1 Irregular award of contract of National Incubation Centre for Aerospace Technologies -Rs 968.889 million

According to rule 31(1) of PPRs 2004, no bidder shall be allowed to alter or modify his bid after the bids have been opened. However, the procuring agency may seek and accept clarifications to the bid that do not change the substance of the bid. Further, Rule 38B stipulates that the procuring agency shall consider single bid in goods, works and services if it- (a) meets the evaluation criteria, ensures compliance of specifications and other terms & conditions expressed in advertisement or bid solicitation documents; (b) is not in conflict with any provision of the Ordinance; (c) conforms to the technical specifications; (d) has financial conformance in terms of rate reasonability:

The Ignite Company under the MoITT invited proposals for establishment of National Incubation Centre, Rawalpindi for Aerospace Technologies on 30.04.2022. Only one proposal of M/s Netsol Technologies Limited was received which was qualified by the technical evaluation committee on 14.07.2022. The financial proposal of the bidder was opened on 17.08.2022. The bid evaluation committee found that there were computational errors, miscalculations of the amounts of withholding tax and GST as well as non-required expenses in the bid. The committee concluded that all the required corrections would change the substance of the bid which was not allowed under PPRs-2004 (amended 2021). An amount of Rs 93 million was paid to M/s Netsol Technologies during the FY 2022-23.

Audit examined the tender documents and observed that:

- i) The contract was awarded on the basis of single bid. Neither price reasonability of the financial proposal was ensured nor was any feasibility study with regard to calculation of provisional cost conducted.
- ii) The Ignite Company negotiated with the bidder, allowed him to remove the remuneration of five members of PMU and steering committee honorarium of Rs 33.567 million and allowed him to insert corrections pointed out by the bid evaluation committee.
- iii) Instead of retendering, the Ignite Company awarded the contract by reducing the bid amount from Rs 1149.206 million to Rs 968.889 million for establishment of NICAT, Rawalpindi.

Audit contends that the Ignite Company awarded an irregular contract in total disregard to the procurement rules, 2004.

Audit reported the matter to the management and PAO during October, 2023. It was replied that the Board in its 92nd meeting directed the management to obtain response from PPRA. In the light of the directions given by the Board, Ignite sought clarification from PPRA through letter dated 09.09.2022. PPRA responded that “Procuring Agency will rectify the obvious errors during evaluation process”. Based on the resolution of the BoD and PPRA response, the contract was awarded to M/s Netsol, Technologies for Rs 968 million.

The reply is not tenable. PPRA did not give opinion for acceptance of the bid; rather PPRA advised to rectify the obvious errors during evaluation process and stated that opinion of the PPRA might not be considered in any way as the regulatory concurrence for the instant procurement. Further, substance of the bid was changed due to elimination of items which were not allowed by the PPRA vide its clarification issued on 16.09.2022.

The matter was discussed in DAC meeting held on 11th January, 2024. The DAC after due deliberations pended the para.

Audit recommends that an inquiry be conducted at Ministry level to fix responsibility against those held responsible(s) and the outcome be shared with audit.

(DP No. 70)

6.5 Value for money and service delivery issues

6.5.1 Unjustified waiver of revenue contribution by NIC Quetta- Rs 33.434 million

According to clause 1.1.14 of Funding agreement signed between M/s LUMS and M/s Ignite Company, project portfolio means the detailed description and plan for the project approved for funding by the Company and attached to this agreement as Annexures. The Project Portfolio consists of project proposal approved by the Company (appendix A) Further, according to Financial Proposal for NIC Quetta, the bidder shall generate revenue for self-sustainability in the year 3,4 & 5.

The Ignite Company under the MoITT, Islamabad hired the services of M/s LUMS Lahore to establish and maintain National Incubation Centre (NIC) at Quetta. The agreement was signed on 21-02-2018 for five years. According to the financial proposal, LUMS Lahore was required to realize the revenue of Rs 33,434,940 (15,402,425 +18,032,515) in Year 4 & Year 5 for self-sustainability of NIC Quetta to offset operating expenses.

Audit observed that M/s LUMS Lahore failed to realize the revenue of Rs 33,434,940 during the years 4 & 5 to offset the operating expenses. Audit further revealed that M/s LUMS Lahore submitted waiver request to the Finance and Procurement Committee on the plea that NIC Quetta could not generate revenue due to COVID-19 pandemic; therefore, their realization of revenue could be waived off. The Finance and Procurement Committee approved the change request and waived off the revenue accordingly.

Audit contends that Ignite Company did not insert performance guarantee clause in the contract with M/s LUMS Lahore to take action against non-achievement of the

deliverable of revenue realization; instead, the Ignite Company waived off the revenue and affected the value it could add to the organization.

Audit reported the matter to the management and PAO during October, 2023. It was replied that the impact of COVID-19 on startups and businesses was profound, affecting their ability to generate revenue. The FPC, recognizing the exceptional circumstances, made a decision to waive off revenue during this period and this decision was subsequently endorsed by the Board itself.

The reply is not tenable. The Finance and Procurement Committee waived off the revenue of years 4th & 5th when Covid pandemic had ended. Non realization of the revenue and its waiver also impacted the financial proposal of the bidder upon which the tender was awarded.

The matter was discussed in DAC meeting held on 11th January, 2024. The DAC directed the Ignite management to obtain a detailed report showing the efforts made by the LUMS to generate the revenue for self-sustainability and share it with audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report for the Audit year 2021-22 vide para number 5.4.1 having financial impact of Rs 157.620 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 77)

6.6 Others

6.6.1 Non-capitalization of capex expenditure - Rs 302.257 million

According to Rule 14 of Corporate Governance Rules, 2013, the Chief Financial Officer shall be responsible for ensuring that appropriate advice is given to the Board on all financial matters, for keeping proper financial records and accounts, and for maintaining an effective system of internal financial control. Further, as per clause 10.1 of contract agreements all property, movable, immovable, tangible or otherwise acquired or purchased by utilizing sums representing the Grant, and all deliverables at any stage of the progress of the project and whether in draft form or completed (the “Equipment”) shall be assigned to the Company.

The Ignite Company under MoITT, Islamabad hired the services of M/s Fauji Fertilizer Company, M/s PTCL and M/s Netsol Technologies Ltd for establishment and maintenance of National Incubation Centers (NICs) at Faisalabad, Hyderabad and NICAT Rawalpindi respectively and transferred an amount of Rs 302.257 million to the vendors under the head-Capex to acquire physical assets as detailed below:

(Rs) in Million

S.No	Project Name	Capex Amount
01	NIC Faisalabad	76.625
02	NIC Hyderabad	107.645
03	NICAT	117.987
Total		302.257

Audit observed that neither the NICs capitalized the acquired physical assets in their books of accounts nor the Ignite Company recognized the capex funds released to the NICs in the financial statements of the Company.

Audit contends that as per contract agreement, the physical assets acquired by the NICs would become assets of the Ignite Company after completion of the projects. Since,

the NICs and the Ignite Company had not recognized the acquired physical assets, both NICs and the Ignite Company understated their physical assets in their financial statements.

Audit reported the matter to the management and PAO during October, 2023. It was replied that the Company prepared annual financial statements as per guidelines of Code of Corporate Governance, 2013 and International Accounting Standards. The accounting treatment of all NIC projects in Ignite books of accounts were audited by the external auditors such as KPMG and A.F. Ferguson & Co chartered Accountants and had issued an unqualified opinion.

The reply is not tenable. All the assets procured by the NICs were the ownership of the company and were required to be returned by the NICs to the Ignite Company on the completion of the contract period.

The matter was discussed in DAC meeting held on 11th January, 2024. The DAC directed the Ignite management to seek the opinion of an independent AAA rated CA Firm and share it with audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the MFDAC for the Audit year 2021-22 vide para number 5.12 having financial impact of Rs 606.576 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 72)

6.6.2 Non-recovery of outstanding dues on account of R&D Fund - 44.145 million

According to clause 4.1 of Long Distance International (LDI) License issued under Section 21 of the Pakistan Telecommunication (Re-organization) Act, 1996, the Licensee shall contribute to the R & D Fund, an amount calculated on the basis of 0.5% of the

Licensee's gross revenue from Licensed Services for the most recently completed financial year of the Licensee minus inter-operator payments and related PTA/FAB mandated payments. Further, clause 4.4.1 stipulates that the licensee shall make this contribution within 120 days at the end of financial year.

The MoITT, Islamabad maintained R&D Fund based on contributions from telecom operators, upon which the Ignite Company carried out operational and business activities and received Opex and Capex budgets.

Audit observed that R&D Fund Management failed to recover an amount of Rs 44,145,047 on account of R&D contributions against the billing issued to the telecom operators during FY 2022-23.

Audit contends that non-recovery of the R&D contributions from the telecom operators not only reflects weakness of the R & D Fund management but also affects the financial health of the Ignite Company.

Audit reported the matter to the management and PAO during October, 2023. It was replied that recovery from the operators is an ongoing mechanism. This Ministry has already requested PTA to initiate necessary actions for the recovery of the outstanding dues from operators. As of today, no recovery has been made from the operators and this Ministry has also issued reminders.

The reply is not tenable. The Fund was established to manage the affairs of the R&D fund. However, audit did not find any evidence of efforts made by the fund management to recover the outstanding dues.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC directed the Ignite management to recover the outstanding dues from the operators and get it verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

National Telecommunication Corporation (NTC)

(MoITT)

7.1 Introduction

A) National Telecommunication Corporation (NTC) was established on 1st January, 1996 under the Pakistan Telecommunication (Re-organization) Act, 1996. The Corporation is a corporate body, managed by a Management Board consisting of a Chairman and two other Members, appointed by the Federal Government. NTC is working under the administrative control of the Ministry of Information Technology and Telecommunication (MoITT). NTC maintains a Fund known as NTC Fund which consists of grants and loans etc.

NTC prepares its budget and submits it for approval of the Federal Government before 1st of June every year. Any surplus over receipts in a financial year is remitted to the Federal Consolidated Fund and any deficit from actual expenditure is made up by the Federal Government. The accounts of NTC are maintained in a form and format as approved by the Auditor-General of Pakistan. In addition to the audit by the Auditor-General of Pakistan, its accounts are also audited by the external auditors.

NTC's main function is to provide telecommunication services to its designated customers which include the federal and provincial governments, defence services and other government agencies and institutions as the Federal Government may determine.

B) Comments on Budget and Accounts

7.1.1 NTC management has submitted the audited Financial Statements for the FY 2018-19 on 26-12-2023. NTC management could not finalize its Financial Statements for the financial years 2019-20, 2020-21, 2021-22 & 2022-23 till the finalization of this Audit Report.

Table-I Audit Profile of NTC

(Rs in Million)

S. No	Description	Total Nos	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
1	Formations	11		11,746.560	11,709.100
2	<ul style="list-style-type: none">• Assignment Accounts• SDAs	-	-	-	-

4	Foreign Aided Projects (FAP)	-	-	-	-

7.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 9,253.743 million were raised in this report during the current audit of NTC. This amount also includes recoveries of Rs 1,012.593 million as pointed out by audit. Summary of the audit observations classified by nature is as under:

Table-II Overview of Audit Observations**(Rs in Million)**

S. No.	Classification	Amount
1	Non-production of record	-
2	Reported cases of fraud, embezzlement and	-
3	Irregularities (A+B)	566.098
A	HR/Employees related irregularities	97.811
B	Procurement related irregularities	468.287
4	Value for money and service delivery issues	-
5	Others	8,687.645
Total:		9,253.743

7.3 Status of Compliance with PAC Directives

S. No	Audit Year	NTC		Compliance		%age
		Total Paras	Total Directives	Received	Not Received	
1	1996-97	16	3	3	0	100
2	1997-98	11	11	11	0	100
3	1999-00	15	15	15	0	100
4	2000-01	17	17	17	0	100
5	2001-02	16	16	12	4	75
6	2004-05	16	16	16	0	100
7	SAR 2005-06	31	31	0	31	0
8	2005-06	15	15	15	0	100

9	2006-07	17	17	14	3	83
10	2007-08	13	7	0	7	0
11	2008-09	22	22	21	1	95
12	2009-10	18	18	7	8	39
13	2010-11	30	30	27	3	90
14	2011-12	98	98	19	79	19
15	2012-13	95	95	39	56	41
16	2013-14	40	40	5	35	13
17	2014-15	36	36	3	33	8
18	2015-16	18	18	2	16	11
19	2016-17	18	18	9	9	50
20	2017-18	23	23	15	8	65
21	2018-19	23	10	10	0	100
22	2019-20	19	19	3	16	16

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

7.4 Irregularities

A. HR/Employees related irregularities

7.4.1 Overpayment on account of illegal promotion-Rs 76.175 million

According to Regulation No. 2.26 of NTC Service Regulations, 2008, Corporation's employees who are not promoted for want of vacancy or do not have a channel of promotion and have remained in the same pay group in which they had joined/promoted for seven years, would be promoted to next higher pay-group, provided they qualify other criteria for promotion. Promotion under this rule shall be allowed once in a post. On promotion, the post shall automatically be upgraded with same job description, whereas the upgraded post shall be abolished. On retirement or leaving service of the corporation, the upgraded post shall be automatically reverted to post in original pay-scale.

NTC, HQ under the MoITT, Islamabad promoted ninety-seven (97) Engineering Supervisors and five (5) Building Overseers of Group-IV to Group-VII of various NTC Directorates with effect from 25.02.2014 vide three different notifications.

Audit observed that the officials were illegally promoted from Group-IV to Group-VII instead of Group-V in violation of the above stated regulations, which caused an overpayment of Rs. 76,174,596 on account of fixation of increased basic pay.

Audit reported the matter to the management and PAO during October, 2023. It was replied that ES and BO were promoted as per their channel of promotion mentioned in NTC Service Regulation, 2008. No undue benefit in promotion has been granted.

The reply is not tenable as two ‘grades’ promotions were made in violation of NTC Service Regulations, 2008 which were approved by the Finance as well as Establishment Divisions.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to submit detailed reply to PAO as well as audit. No further progress was reported till finalization of this report.

Audit recommends that the matter be inquired to arrive at factual position and fix responsibility against the responsible (s); besides, recovery of overpayment under intimation to audit.

(DP No.16)

7.4.2 Irregular appointment of staff through internal circulation - Rs 21.636 million

According to Policy Guidelines approved by NTC Management Board in its 73rd meeting held on 10th February, 2011, local vacancies may be published in local newspaper, regional vacancies in the region concerned and for wide publication advertisement may preferably be released on Sunday. Vacancies must be placed on government as well as NTC website and also circulated amongst NTC employees.

NTC, HQ under the MoITT, Islamabad appointed fourteen (14) employees through internal circulation. An expenditure of Rs. 21,636,480 was incurred on account of pay & allowances of the newly recruited employees with effect from 01.05.2022 to 30.06.2023.

Audit observed that the appointments were made through internal circulation instead of open advertisement and wide publicity in violation of the above rules.

Audit contends that non-adherence to Policy Guidelines approved by NTC Management Board led to irregular appointments.

Audit reported the matter to the management and PAO during August, 2023. It was replied that the appointments were made through internal circulation as per the provision of Rule No. 2.6(d)(iii) of NTC Service Regulations 2008.

The reply is not tenable. The appointments were made in violation of the approved policy guidelines, approved by the NTC management Board.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC took serious view of the appointment through internal circulation and directed the management to examine the case and submit a report to Ministry as well as audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Reports for Audit Year 2021-22 & 2022-23 vide paras No.6.4.2 & 7.5.1 having financial impact of Rs. 5.958 million. Recurrence of same irregularity is a matter of serious concern.

(DP No.255)

B. Procurement related irregularities

7.4.3 Irregular public-private partnership and payment - Rs 292.621 million

According to Rule 13 (3) of Public-Private Partnership Act (P3A), 2017, the implementing agency shall submit the bid documents and project proposal for approval of the Board of Public Private Partnership Authority. Rule 13 (4) ibid stipulates that once the project proposal is approved by the Board, the implementing agency shall procure the project in accordance with provisions of the Act.

NTC HQs under MoITT, Islamabad executed a Public-Private Partnership (P3) agreement with M/s Khazana Enterprises (Pvt) Ltd. (KEL) on 31.03.2021 for provision of

digital solution services. Services related to Pakistan Emergency Helpline (PEHL)-911 were also included through an addendum dated 01.10.2021. A payment of Rs. 292,621,451 was made to M/s KEL during FY 2022-23 on account of services provided for PEHL-911.

Audit examined the P3 agreement and found that the P3 agreement was executed with a non-licensed telecom operator (M/s KEL), without prior approval of the project proposal, bid documents and partnership agreement from the Board of Public Private Partnership Authority (P3A). Further, M/s KEL got registered with SECP on 01.01.2020 by providing a false information about its official address: 6-Race Course Road, NTC Regional Office Lahore; though at the time of registration M/s KEL was not the tenant of NTC.

Audit contends that NTC executed P3 agreement with M/s KEL in total disregard to P3A.

Audit reported the matter to the management and PAO during August, 2023. It was replied that departmental fact-finding inquiry had been ordered by MD NTC.

The management accepted the audit contention; however, outcome of the fact-finding inquiry could not be furnished till finalization of this report.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to complete the process of fact-finding inquiry before 31.01.2024 and outcome be shared with PAO & audit.

Audit recommends implementation of DAC directives.

(DP No.14)

7.4.4 Unauthorized expenditure incurred on media services - Rs. 117.020 million

According to Rule 12 (2), all procurement opportunities over three million Rupees should be advertised on Authority's website as well as in other print media or newspapers having wide circulation. The advertisement in the newspapers shall principally appear in at least two national dailies, one in English and the other in Urdu. Further, as per Rule 16-A (4), open and closed framework agreements may be made with the selected suppliers and service providers. Maximum duration of open framework agreements shall not be more than three years and the closed framework agreements shall not exceed one year.

Five (05) formations of NTC hired media services from six (06) telecom operators for provision of various telecommunication services to its subscribers. A payment of Rs. 117,019,828 was made to the service providers during FY 2022-23 as detailed below:

S. No.	PDP No.	Amount
1.	19-2024	102,657,091
2.	264-2024	14,362,737
Total		117,019,828

Audit examined the relevant record and observed that the media and circuits were hired without open tender and were allowed to provide services on extension basis beyond three years in violation of the above rules.

Audit contends that NTC hired and extended the services of media and circuits in total disregard to PPRs 2004.

Audit reported the matter to the management and PAO during August, 2023. It was replied against S.No.1 that the subject contract was signed in 2018 based on PPRA Rules applicable at that time which did not put any limitations on framework agreement. Now, after completion of previous contract timelines, fresh tender has been floated and new contract has been signed with successful bidder on 01-09-2023. With reference to M/s

Mispl Multan, M/s Wateen Telecom & M/s Nayatel relating to S.No.2, the arrangement for leasing of the services was availed from PTA licensed operators as per PTA regulations to facilitate NTC's designated customers.

The reply is not tenable as the works were awarded without open tenders and the contract agreements were extended beyond three years in violation of PPRs. Further, DAC in its meeting held on 17th & 20th January, 2023, while discussing PDP No. 18-2023 being similar in nature, directed the management that necessary clarification by specifying the contents of audit observation be obtained from PPRA under intimation to Audit. No clarification was sought till date.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC upheld its earlier decision dated 17 & 20.01.2023 and directed the management that necessary clarification by specifying the contents of audit observation be obtained from PPRA under intimation to Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Reports for Audit Year 2022-23 vide para-No.7.5.3 having financial impact of Rs 6.364 million. Recurrence of same irregularity is a matter of serious concern.

(DP No.19 & 264)

7.4.5 Mis-procurement of MIS solution - Rs. 58.646 million

According to Rule 42 (c) of PPRA, a procuring agency shall only engage in direct contracting if the following conditions exist, namely:- (i) the procurement concerns the acquisition of spare parts or supplementary services from original manufacturer or supplier: Provided that the same are not available from alternative sources; (ii) only one manufacturer or supplier exists for the required procurement: Further, Rule 40 (2) ibid

stipulates that Authority may determine the extent and types of negotiations on procurement by regulations.

Federal Seed Certification & Registration Department (FSC&RD) executed a contract agreement with NTC HQs for establishment of consumer sourcing seed authenticity system on 01.04.2022. NTC HQs outsourced the task through direct contracting to M/s Khazana Enterprises (Pvt) Ltd. (KEL) on 22.06.2023 to develop a solution, named, Digital Seed Tracking and Tracing Software. The financial proposal of M/s KEL of Rs. 88,009,999 was on higher side; therefore, the cost was negotiated with the firm through a negotiation committee to bring it within the permissible limit of the approved PC-1. M/s KEL agreed to reduce the cost to Rs. 58,646,000 and accordingly the contract was awarded. An advance payment of Rs. 32,106,200 was made to M/s KEL.

Audit examined the procurement documents and found that the contract was awarded through direct contracting and negotiations with M/s KEL.

Audit contends that MIS solution was neither sensitive item nor emergently required to be procured through direct contracting. Audit further holds that negotiations on the cost of the MIS solutions were not permissible under the PPRs. Moreover, M/s KEL was not the OEM of MIS solution.

Audit reported the matter to the management and PAO during August, 2023. It was replied that departmental fact-finding inquiry had been ordered by MD NTC. Outcome will be shared accordingly.

The management accepted the audit contention; however, the outcome the fact-finding inquiry could not be furnished till finalization of this report.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to complete the process of fact-finding inquiry before 31.01.2024 and share the outcome with PAO and Audit.

Audit recommends implementation of DAC directives.

(DP No.17)

7.5 Others

7.5.1 Un-authorized expenditure without approval of the budget - Rs 5,630.320 million

According to Section 12 of Pakistan Telecommunication (Reorganization) Act, 1996, NTC shall, in respect of each financial year, prepare its own budget and submit to the Federal Government three months before the commencement of every financial year for approval. As per Delegation of Powers (DoP) dated 01.01.1999, Director Finance & Budget, NTC was not delegated powers of financial concurrence. Further, as per para 3 of Establishment Division OM No. 3/15/2016-R-II dated 09.04.2021, “certain financial and administrative powers can only be exercised by an officer to whom additional/ current charge of the post is entrusted in the prescribed manner. An officer looking after the work cannot exercise such powers as he has not been delegated with such powers by the competent authority”.

NTC HQs submitted revised budget estimates for FY 2021-22 and budget estimates for FY 2022-23 to MoITT, Islamabad on 27.05.2022 for the approval of the federal government. NTC incurred an expenditure of Rs.5,630.320 million during the FY 2022-23.

Audit examined the budget proposals and observed that:

- i. NTC incurred an unauthorized expenditure of Rs. 5,630.32 million, as the budget for FY 2022-23 had not so far been approved by the federal government despite closure of the financial year.
- ii. NTC assigned the look after charge of the post of CFO, NTC to Director (Finance & Budget) w.e.f. 29.12.2022 in addition to his own duties. The incumbent Director granted financial concurrence of Rs.4,681,914,854 with effect from 29.12.2022 to 30.06.2023 as CFO in violation of the above instructions of Establishment Division as no financial powers were delegated to the Director.

Audit contends that due to weak financial discipline and internal controls NTC incurred un-authorized expenditure without approved budget and authorization of financial concurrence to the Director (Finance & Budget).

Audit reported the matter to the management and PAO during August, 2023. It was replied that the budget for FY 2022-23 is under process of approval and would be intimated to audit accordingly. It was further replied that to fill the post of CFO, matter has been taken up with MoITT for appointment of CFO either through direct induction or on deputation basis since Sept, 2019.

The reply is not tenable. The budget estimates for FY 2022-23 were not approved. Further, Director (Budget & Finance) couldn't grant financial concurrence under the rule. The position of CFO was not filled till finalization of the report.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to get the budget approved from the Cabinet Division through ECC. Further, post-facto approval of financial concurrence given by Board be provided to audit, besides approval of revised service regulation within 60 days. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No.11)

7.5.2 Un-authorized investment of NTC funds – Rs 1,950 million

Section 41 (9) of Pakistan Telecommunication (Re-organization) Act 1996, clearly states that “any surplus receipt over actual expenditure in a year shall be remitted to Federal Consolidated Fund (FCF) and any deficit from actual expenditure shall be made up by Federal Government”. Further, as per para 2 of Finance Division's letter dated 18.05.2022, no authority shall transfer public monies for investment or deposit from Government Account including the assignments accounts to other bank account without prior approval of the Federal Government.

NTC HQs under the MoITT, Islamabad invested a huge balance of Rs.1,950,000,000 through term deposit receipts (TDRs) in two commercial banks in May, 2023 as detailed below:

S. No	Name of Bank	Issue Date	Due Date	Amount (Rs)
01	Bank of Punjab, Blue Area, Islamabad	02-05-23	02-11-23	1,200,000,000
02	NBP Jinnah Avenue Islamabad	23-05-23	23-08-23	750,000,000
Total				1,950,000,000

Audit examined the investment of surplus funds and observed that:

- (i) NTC invested the surplus fund without authorization of Finance Division and in violation of the above stated rules.
- (ii) NTC was required to remit the surplus receipts to Federal Consolidated Fund as on 30.06.2023; instead NTC invested the surplus receipts on terms deposit basis in violation of the rules.
- (iii) NTC did not surrender the bank balances to the Finance Division under the new cash management regime introduced by the Federal Government w.e.f, July, 2020.

Audit contends that NTC invested funds in disregard to the provisions of Pakistan Telecommunication (Re-organization) Act, 1996 and instructions of Finance Division which reflects weak financial discipline.

Audit reported the matter to the management and PAO during August, 2023. It was replied that the Finance Division (Expenditure Wing) vide its letter dated January 02, 2023 has already declared NTC as an autonomous body of MoITT and at present, it is not included in TSA list. Accordingly, NTC has been allowed to operate as per existing arrangements till the finalization of TSA framework. However, the case has also been

forwarded to MoITT for further clarification from Finance Division vide letter dated November 16, 2023. Reply will be shared with Audit as and when received from MoIT.

The reply is not tenable. NTC did not furnish justification for investment of surplus funds. Besides, the Finance Division has already introduced a sweeping arrangement in lieu of TSA for autonomous bodies which was not adopted by NTC.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to seek necessary clarification, by specifying the contents of audit observation, from Finance Division under intimation to audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the MFDAC Report for Audit Year 2022-23 vide para-No.7.5.9 and Audit Reports for Audit Year 2012-13, 2013-14, 2014-15, 2015-16, 2017-18, 2018-19, 2021-22 vide paras No.5.13, 3.30, 5.11, 5.3.1, 5.5.1, 5.4.1 & 6.5.2 having financial impact of Rs 13,214.022 million. Recurrence of same irregularity is a matter of serious concern.

(DP No.12)

7.5.3 Non-recovery of revenue receipts – Rs 897.220 million

According to Rule 26 to 28 of GFR Vol-I, it is the duty of the departmental controlling officers to see that all sums due to Government are regularly and promptly assessed, realized and credited to accounts. No amount due to government should be kept outstanding without sufficient reason.

NTC under the MoITT, Islamabad provided telecommunication services to the designated customers including federal and provincial governments, defence services and other government agencies.

Audit examined the relevant revenue record of four (04) formations and observed that an amount of Rs 978,527,979 on account of building/ standard rents/electricity charges was not recovered by NTC from various telecom operators, government departments, Data Centre, tenants and unauthorized occupants etc during FY 2022-23. The detail of outstanding amounts as on 30.06.2023 is given as under:

S. No.	PDP No.	Description	Amount (Rs)
1.	13-24	Outstanding dues of PEHEL-911 project.	670,580,000
2.	249-24	Outstanding revenue against Data centre	127,032,466
3.	251-24	Non recovery of Quarter rent	1,359,696
4.	252-24	Outstanding dues from CDNS	4,017,523
5.	263-24	Non recovery of revenue receipts	65,516,833
6	250-24	Non recovery from PTCL	110,021,461
TOTAL			978,527,979

Audit contends that non-recovery of the dues from telecom operators, government departments, tenants, unauthorized occupants and Data Centre reflects weak financial discipline and receivable management.

Audit reported the matter to the management and PAO during August and September, 2023. It was replied that an amount of Rs 127.724 million was already recovered.

The management accepted the audit contention and recovered an amount of Rs 127.724 million, out of which an amount of Rs 103.308 million was verified by audit; therefore, the para was reduced to the extent of outstanding amount.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management that hectic efforts be made to recover the amount and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No.13, 249, 250, 251,252, & 263)

7.5.4 Unjustified disbursement of bonus – Rs 94.732 million

According to Regulation 3.7 of National Telecommunication Corporation Employees (Service) Regulations, 2008, NTC employees falling in the definition of workers shall be allowed bonus subject to earning of profit with the approval of NTC Management Board. The bonus for officers of NTC shall be paid with the concurrence of Finance Division. Further, as per Finance Division letter dated 14.07.2017, the salary package of Management Positions Scales (MP-Scales) had been approved by the Prime Minister which does not include payment of bonuses to MP-Scales officers.

NTC HQs under the MoITT, Islamabad approved and disbursed a bonus amount of

Rs.94,731,644 to its employees during FY 2022-23.

Audit observed that the bonus was paid without the approvals of the NTC budget for FY 2022-23 by the Federal Government, Finance Division and the NTC Management Board. Further, an inadmissible bonus payment of Rs. 466,950 was made to ex-MD NTC as he was appointed on MP-I scale by the federal government and could draw bonus with the prior approval of federal government.

Audit contends that NTC paid bonus to its employees in disregard to the NTC ESR-2008 and Finance Division's instructions.

Audit reported the matter to the management and PAO during August, 2023. It was replied that on the basis of performance of the Corporation, the honourable Federal Minister for Information Technology & Telecomm announced grant of bonus to all employees @ one month's basic pay during a ceremony held on 20-06-2023, with the direction to pay the same before Eid-ul-Azha. The case for grant of bonus for the Year 2022-23 to NTC employees will be placed before the NTC Management Board for its post-facto approval.

The reply is not tenable. NTC did not prepare financial statements to authenticate the profit earned. NTC also did not remit the profit earned to Federal Consolidated Fund to ensure that it had earned profit, upon which the bonus was allowed. Moreover, the management did not furnish reply for the bonus paid to the ex-MD NTC.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to provide the detail of profit earned amounting to Rs 811 million to audit. Further, the matter be placed before the Board for post-facto approval. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No.15)

7.5.5 Non-receipt of funds from Government of the Punjab for PEHEL-911 - Rs 57.849 million

According to clause 5 (a) of tripartite agreement among MoI, MoITT and NTC for the execution of PEHEL-911, payment will be made on yearly basis in advance in favour of NTC account subject to an approval in the prescribed manner. Further, as per Punjab Home Department Letter dated 10.07.2023, the Provincial Cabinet of Punjab province approved the closure of PEHEL-911 in its 18th meeting held on 21.06.2023.

NTC HQs under the MoITT, Islamabad executed a Public-Private Partnership agreement with M/s Khazana Enterprises (Pvt) Ltd (KEL) for provision of digital solution services on 31.03.2021. Services related to Pakistan Emergency Helpline (PEHEL) - 911 was also included through an addendum on 01.10.2021. A payment of Rs. 57,849,308 was made to M/s Khazana Enterprises during the FY 2022-23.

Audit examined the relevant record and observed that the contract was awarded to M/s KEL in anticipation of receipt of funds and execution of proper agreement with the Government of Punjab for provision of PEHEL services. Audit further revealed that the Government of Punjab closed the project as intimated vide above referred letter.

Audit contends that due to weak receivable and contract management NTC did not manage to receive the funds from the Government of the Punjab.

Audit reported the matter to the management and PAO during August, 2023. It was replied that decision of the Provincial Cabinet on the subject matter was under process. Further, payments to M/s KEL were made in accordance with NTC contract for the services rendered.

The reply is not tenable. NTC awarded the service contract to M/s KEL in anticipation of receiving funds and executing agreement with the Government of the Punjab.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management that hectic efforts be made to recover the outstanding amount under intimation to Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No.18)

**7.5.6 Non-recovery of outstanding dues from the subscribers –
Rs 57.524 million**

According to Rule 8 and 26 of GFR Vol-I, it is the duty of the departmental controlling officers to see that all sums due to government are regularly and promptly assessed, realized and duly credited in the Public Account. No amount due to government should be left outstanding without sufficient reasons, and where any dues appear to be irrevocable the orders of competent authority for their adjustment must be sought.

NTC under the MoITT, Islamabad provided telecommunication services to various subscribers of Working, Closed, WLL, Digital Subscriber Lines (DSL), Casual Telephone Connections, Primary Rate Interference (PRI) and Unidentified Connections.

Audit examined the record relating to outstanding dues in six (06) formations of NTC and observed that an amount of Rs163,560,025 was lying outstanding against various subscribers as on 30.06.2023 as detailed below:

S. No	Name of Unit	Amount (Rs)
------------------	---------------------	------------------------

1.	Director NTC Peshawar	52,682,545
2.	Director NTC Islamabad	41,161,808
3.	Director NTC Lahore	37,322,576
4.	Director NTC Karachi	16,518,625
5.	Director NTC Rawalpindi	11,398,334
6.	Director NTC Multan	4,476,137
Total		163,560,025

Audit contends that due to weak receivable management NTC failed to recover the captioned amount.

Audit reported the matter to the management and PAO during September and October, 2023. It was replied that out of observed amount of Rs.163.560 million an amount of Rs.106.036 million has been recovered. Hectic efforts are being made to recover the balance amount of Rs.57.523 million.

The management accepted the audit contention and recovered an amount of Rs 106,036,238 which was verified by audit; therefore, the para was reduced to the extent of outstanding amount.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management that hectic efforts be made to recover the remaining amount and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No.262)

MINISTRY OF INFORMATION TECHNOLOGY & TELECOMMUNICATION

CHAPTER-8

SPECIAL COMMUNICATIONS ORGANIZATION (SCO)

Chapter-8

Special Communications Organization (SCO)

(MoITT)

8.1 Introduction

A) Special Communications Organization was established in July, 1976 for the operation, expansion, maintenance and modernization of telecom system in Gilgit-Baltistan and Azad Jammu & Kashmir through an executive order of the Prime Minister of Pakistan on 10.05.1976. It is managed by a Project Management Board under the Chairmanship of Signal Officer-in-Chief. It falls under the administrative control of Ministry of Information Technology and Telecommunication (MoITT).

DG SCO exercises administrative and financial powers given in the Financial Budgeting, Accounting and Audit (FBA&A) Procedures as approved by the Project Management Board. Its accounts are maintained on the accounting system of erstwhile Telephone & Telegraph Department. CMA (FWO) is responsible for pre-audit and reconciliation of the expenditure of SCO with AGPR.

B) Comments on Budget and Accounts

8.1.1 SCO does not prepare Financial Statements on the pattern of state-owned enterprises (SOEs) and prepares statement of receipts and expenditure account only which is audited by this office and accordingly comments are offered. The expenditure statement of SCO for the FY 2022-23 revealed that there was a saving of Rs 10.728 million under different heads of accounts of Development and Non-Development expenditure which were not surrendered to the Finance Division. The budget system is not based on IPSAS standards. The budget system has been kept so flexible that unauthorized re-appropriations are being frequently made which results in mis-reporting of the revised budget estimates.

Table-I Audit Profile of SCO

(Rs in Million)

S. No	Description	Total Nos	Audited	Expenditure audited FY 2022-23	Revenue / Receipts Audited FY 2022-23
1	Formations	11	05	8,001.073	6,130.370
2	<ul style="list-style-type: none"> • Assignment Accounts • SDAs 	-	-	-	-
3	Authorities / Autonomous Bodies etc under the PAO	11	05	8,001.073	6,130.370
4	Foreign Aided Projects (FAP)	-	-	-	-

8.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 3,110.878 million were raised in this report during the current audit of SCO. This amount also includes recoveries of Rs 163.716 million as pointed out by audit. Summary of the audit observations classified by nature is as under:

Table-II Overview of Audit Observations**(Rs in Million)**

S. No.	Classification	Amount
1	Non-production of record	-
2	Reported cases of fraud, embezzlement and Misappropriation	-
3	Irregularities (A+B)	515.506
A	HR related irregularities	17.070
B	Procurement related irregularities	498.436
4	Value for money and service delivery issues	-
5	Others	2,595.372
Total:		3,110.878

8.3 Status of Compliance with PAC Directives

S. No	Audit Year	SCO		Compliance		%age
		Total Paras	Total Directives	Received	Not Received	
1	1992-93	22	22	18	4	82
2	1997-98	4	4	4	0	100
3	1999-00	7	7	7	0	100
4	2000-01	5	5	5	0	100
5	2001-02	5	5	5	0	100
6	2005-06	9	9	9	0	100
7	2008-09	14	14	14	0	100
8	2009-10	10	10	10	0	100
9	2010-11	16	16	13	3	81
10	2011-12	19	19	14	5	74
11	2012-13	28	28	14	14	50

12	2013-14	22	22	5	17	23
13	2014-15	10	10	3	7	30
14	2015-16	10	10	5	5	50
15	2016-17	6	6	3	3	50
16	2017-18	8	8	8	0	100
17	2018-19	13	8	8	0	100
18	2019-20	23	23	7	16	30

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

8.1 Irregularities

A. HR /Employee related irregularities

8.4.1 Inadmissible payments to project employees-Rs 12.507 million

According to Para No (xv) of Finance Division (Regulation Wing) Govt. of Pakistan letter No F.No.4(9) R-14/2008 dated 18.04 2008, this pay package will not be admissible to those project employees whose services/posts are transferred to the non-development side after completion of the project from the date of their transfer. Further, Para xvii *ibid* stipulates that, on transfer of project posts to the non-development side, such posts shall be filled in the prescribed manner in regular Basic Scale and incumbents of such posts shall be treated as fresh employees of the Ministries/Division/ Departments. Para xviii further describes that if an employee of the project is selected for a post on the non-development side, he will be appointed at the initial stage of the relevant basic pay scale, and his pay and services rendered in the project shall not be protected /counted for any purpose i.e. pay, pension and seniority etc.

SCO, HQ under the MoITT, Islamabad completed eleven (11) PSDP projects and were listed in the recurring category of projects. Audit selected a sample of five (5) projects and found that inadmissible payment of Rs 12,506,834 on account of pays and allowances was made to the project employees after irregularly transferring to recurring side as under:

- i. The projects posts were not filled in the prescribed manner as required to make fresh appointments under regular basic pay scales.
- ii. The pay and allowances on non-development side were required to be fixed at initial stage of respective basic pay scales but the management protected the pay of the project employees and fixed their pay and allowances at enhanced rates.

Audit holds that non-filling of the project posts in the manner prescribed for initial appointments, protection of the project pay and non-fixing of their pay at initial stage of the basic pay scales caused inadmissible payments that reflect weakness of the financial discipline and internal control structure.

The matter was reported to the management and PAO during September to December, 2023. It was replied that all project employees employed on development side were transferred to non-development on closing of respective projects and their services, pay and seniority were not counted for previous services rendered on development side. Furthermore, eleven PSDP projects were transferred to non-development side prior to instructions of Finance Division. However, point observed by audit staff (P&TS) is noted for future compliance.

The reply is not tenable as the projects were completed during FY 2022-23 and all the project employees were allowed to carry on with increased pay and allowances.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management that record relating to sanctioned posts approved by Establishment Division, advertisement, test, and pay fixation at initial pay of respective basic pay scale may be provided to audit for verification.

Audit recommends implementation of DAC directives.

(DP No. 187)

8.4.2 Irregular appointments and expenditure - Rs 4.563 million

According to Para 1e (iv) of Establishment Division Cabinet Secretariat, Islamabad's letter No F.53/1/2008-SP dated 11.05.17, appointment on regular basis of Contract/Contingent Paid/Daily Wage/Project Employees in Ministries, Division Sub-ordinate Offices/ Companies / Authorities, qualifications prescribed for a post shall be strictly followed. In case, a person does not possess the prescribed qualifications/ experience for the post he/she is applying for, he/she shall not be considered for the same. SCO advertised the posts as per following advertisements:

S. No	Advertisement	Name of Post	Required Qualifications	Experience
1	02.09.2022	Field technician	Diploma in Electrical/Electronics/Communication	Hands on Experience
2	09.11.2022	Sr. Project Manager	MBA Marketing	15-20 years exp. of Business Administration (Marketing)
3	03.07.2022	Field Engineer	BE/BSc/ Telecom	3 Years' experience of O&M Telecom
4	03.07.2022	Project Manager	BE/BSC (Telecom) HEC recognized University	Minimum 3 years' experience

SCO, HQ under the MoITT, Islamabad appointed ten (10) Field Technicians, Project Managers & Sr Project Managers. An amount of Rs 4,563,200 was paid to the employees during FY 2022-23.

Audit observed that the employees were irregularly appointed in disregard to the instructions /criteria conveyed by Establishment Division related to prescribed qualifications and experiences as well as the eligibility criteria mentioned in the advertisements.

Audit holds that non-filling of the project posts in the prescribed manner reflects weakness of the internal control structure.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the vacancies for appointment of field technician were advertised in newspapers having qualifications of DAE electronic/ electrical but the selected individuals having higher qualifications were appointed on low pay package in the interest of the organization.

The reply is not tenable as the appointments were made against the defined criteria mentioned in the instructions of Establishment Division and advertisements.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to strictly follow the criteria mentioned in PC-I and regularize the appointment /expenditure from PMB.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2019-20 vide para number 7.4.4 having financial impact of Rs 2.040 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 186)

B. Procurement related irregularities

8.4.3 Non-transparent hiring of consultancy services -Rs 298.437 million

According to Rule 38 of PPRs 2004 (amended 2021), the bidder with the most advantageous bid, if not in conflict with any other law, rules, regulations or policy of the Federal Government, shall be awarded the procurement contract, within the original or extended period of bid validity. Further, Rule 38A ibid stipulates that bid discount shall be omitted.

SCO, HQ under the MoITT, Islamabad awarded two contracts for consultancy services to M/s TPM Consultant and M/s A Hamson Pvt. Ltd during FY 2022-23 as detailed below:

(Rs in Million)

S.No	PDP No	Contractor Name	Original Bid	Discounted Bid
1	195-2024	M/s A Hamson	762.925	283.665
2	168-2024	M/s TPM Consultant	16.786	14.772
Total			779.711	298.437

Audit observed that:

- i. In the contract at S.No.1, M/s NERA had offered a bid price of Rs 283.665 million, whereas M/s A Hamson had offered a bid price of Rs 762.925 million. The SCO management did not award the contract to M/s NERA being lowest and held negotiations with both the bidders subsequently. M/s NERA reduced the bid price to Rs 271.949 million, whereas M/s A Hamson offered a discounted price of Rs 283.665 million, the SCO management awarded the contract to M/s A Hamson.

- ii. The contract at S.No 2 of the table was awarded to M/s TPM Consultant on the basis of single bid at negotiated price of Rs 14.772 million in violation of the PPRs-2004.

Audit contented that SCO mis-procured the consultancy services in total disregard to the procurement rules which reflects weak internal control structure.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the contract was awarded to M/s A Hamson (Pvt) Ltd. and M/s TPM Consultant after fulfilment of PPRA formalities. No negotiation was made with consultant; however, the Consultants themselves offered discounts before opening financial bids which was accepted as per PPRA Rule 38A.

The reply is not tenable. Rule 38 A of PPRs 2004 (amended 2021) provides for omission of bid discount.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC showed serious concerns for hiring of consultancy services and directed to conduct a fact-finding inquiry besides submission of revised reply along with documentary evidences to audit within one week.

Audit recommends implementation of DAC directives.

(DP No. 168 & 195)

8.4.4 Mis-procurement of Web Monitoring System –Rs 200 million

According to Rule 12(2) of PPRs-2004, all procurement opportunities over three million Pakistani Rupees should be advertised on the Authority's website as well as in other print media or newspapers having wide circulation. The advertisement in the newspapers shall principally appear in at least two national dailies, one in English and the

other in Urdu. Further, Rule 50 ibid stipulates that any unauthorized breach of these rules shall amount to mis-procurement.

The Special Communication Organization, HQ under the MoITT, Islamabad made an agreement with M/s Celmore Technologies (Pvt) Ltd, Islamabad for supply, installation, operation and maintenance of Web Monitoring Solution amounting to Rs 1,637,837,903 on 29.05.2023 for one year extendable for three years. SCO made a payment of Rs 200,000,000 under the head e-10 “Repair and Maintenance” to the contractor relating to Web Monitoring System. Audit observed that:

- i) The contract was awarded without inviting open tender.
- ii) The RFP and evaluated bid were neither available on record nor uploaded on PPRA web site.
- iii) 2% performance security was not obtained from the contractor.
- iv) The equipment was not propriety of the Licensee.
- v) Complete Beneficial Ownership documents from the contractor exceeding 50 million were neither obtained nor uploaded on PPRA Web Site.
- vi) 20% payment was shown made to the supplier upon delivery of hardware/software without documentary evidence.
- vii) The payment was made without approval from the Project Management Board (PMB) as the DG SCO was competent for payment of up to 80 million.
- viii) The renewed license and equipment etc were not provided by the vendor as at 30.06.2023.

Audit contends that SCO management did not adhere to the procurement rules, awarded the goods and service contract in a non-transparent manner due to weak internal control structure.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the tender was floated in two newspapers. Financial & Technical evaluations were signed by the board of SCO. M/s CETC is not registered in Pakistan and M/s Celmore is a co-partner of M/s CETC, therefore, M/s Celmore is hired for installation of WMS. The Approval for excess payment has already been accorded by PMB but minutes of PMB are awaited and will be shared on receipt.

The reply is not tenable as the contract was awarded in disregard to procurement rules in a non-transparent manner to M/s Celmore.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to provide complete documents uploaded on PPRA website, emergency certificate and PMB approval to audit for verification.

Audit recommends implementation of DAC directives.

(DP No. 180)

8.5 Others

8.5.1 Change of physical scope of projects without revision of PC-I- Rs. 1,195 million

According to para 2.46 of the chapter 2 of Manual for Development Projects, once approved, the procuring agency is required to implement the project in accordance with the PC-1 provisions. It has no authority to change or modify any approved parameters of the project.

SCO HQ under the MoITT, Islamabad executed two contracts with M/s A Hamson with a cost of Rs 283,651,152 and M/s ZTE with a cost of Rs 655,000,000 against the projects for Expansion of FTTH Services (GPoN) and Hybrid Power Solution (Solarization) respectively during FY 2022-23.

Audit examined the project documents, contract agreements and observed that:

- i For the Project titled, “Expansion of FTTH Services (GPoN)”, the PC-1 provided for expansion of FTTH services in three cities, namely, Muzafarabad, Mirpur & Gilgit but the contract agreement was signed for 12 new sites, namely, Gari Duppata, Baugh, Lasdana, Sharda, Chillum, Gakuch, Khaplu, Attmaqam, Tauobat, Naran, Bhimber & Karimabad without revision of PC-I. Audit noticed that equipment was purchased and payment was made thereof without laying of OFC.
- ii For the project, “Hybrid Power Solution (Solarization)”, sites were enhanced from 100 to 115 without revision of PC-I. Further, 100 Generator Sets were fixed in the PC-I, whereas SCO made agreement for 34 generators at a cost of Rs 162.056 million.

Audit contends that SCO changed the physical scope of the projects without revision of PC-I and purchased equipment without laying of OFC which reflects weakness of the contract management and internal control structure.

The matter was reported to the management and PAO during September to December, 2023. It was replied that FTTH Cards and ONTs were procured prior to laying of OFC due to ban on LC and without import of Cards laying of OFC could be useless. It was further replied that IPDR core was required to be installed at SCO H/Q and eleven (11) aggregate sites due to which PC-1 is being revised. Further, in case of Hybrid Power Solution (solarisation) for remote sites in GB was awarded to M/s ZTE for 100 sites not 115 sites. Due to various reason factors PC-I is being revised.

The management accepted the audit contention; however, evidence of revision of PC-1 could not be provided to audit.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to verify the record relating to the project sites and PC-I may be got revised from competent authority and get it verified from audit.

Audit recommends implementation of DAC directives.

(DP No. 182 &193)

8.5.2 Wasteful expenditure on procurement of LI/Web monitoring system - Rs 414.643 million

The PC-1 for the project, ‘Protection and Up-gradation of Pak China OFC for cross-border connectivity (Dassu - Danyore Alignment Project No. III/2020-21)’, approved on 06.04.2020 by DDWP, provided Rs 386.588 million for supply of LI/WMS equipment/system.

SCO HQ under the MoITT executed a contract agreement with M/s SNSKIES (Pvt) Ltd. for supply, installation, operation and maintenance of Web Monitoring Solution (“WMS”) for Up-gradation and Protection of Pak-China OFC project (dassu -danyore alignment) at a cost of Rs 414.643 million on 30.12.2020.

Audit examined the contract documents and terms and condition of the license and observed that the contract was awarded without the approval of SCO Project Management Board. Audit further observed that SCO did not renew the license of web monitoring system from M/s SNSKIES (Pvt) Ltd on its expiry after one year due to which the system remained idle and stopped working.

Audit holds that irregular execution of contract amid less appropriation of funds and non-renewal of the license from the proprietor reflect weakness of the internal control structure, due to which the Web Monitoring System didn’t run and the management failed to accomplish the project objectives.

The matter was reported to the management and PAO during September to December, 2023. It was replied that approval for excess payment has already been accorded

by the Project Management Board (PMB), however, minutes of PMB is awaited and will be shared on receipt. WMS was installed for one year. As per contract agreement for second and third years a sum of US\$ 994,079 was required to be paid to the contractor for the license which was not paid.

The management has accepted the audit contention; however, approval of PMB could not be provided till finalization of this report.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to provide approval of PMB and revised PC-I to audit for verification.

Audit recommends implementation of DAC directives.

(DP No. 205)

8.5.3 Non-payment of loan to EXIM Bank of China-Rs 358.407 million

According to Ministry of Finance, Revenue, Economic Affairs, Statistic & Privatization (Economic Affair Division) Govt. of Pakistan letter No F.1(189) EA/China-I/2009 dated 13.07.2016, interest rate @ 2 per annum, exchange risk fee against foreign loans relent @ 15% per annum inclusive of interest rate & exchange risk credit & commitment fee @ 0.2% per annum on the daily unutilized amount of loan will be payable by SCO against the loan agreement for cross border Optical Fiber Cable (OFC) System with Export-Import Bank of China.

SCO HQ under the MoITT, Islamabad acquired loan of US\$44 million from Export Import bank of China for the project “Construction of Cross Border Optical Fiber Cable (OFC) System between China and Pakistan for International Connectivity of

Voice/Data Traffic” during 2015 guaranteed by the Government of Pakistan. The project got completed on 01.03.2020.

Audit revealed that SCO didn't pay loan, commitment fee, exchange risk fee against foreign loan relent, management fee and interest thereon even after a lapse of eight (08) years which accumulated to a total liability of Rs 358,406,743 till date as per amortization schedule.

Audit contends that due to non-payment, the loan amount has compounded, which has caused a huge loss to the national exchequer.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the entire revenue earned by SCO was deposited in Govt. exchequer and no retention of money was made on this account. The applicable charges on account of loan to any other department from revenue were not allowed to SCO. Further, the case has already been taken up with MoITT and EAD for payment of loan liability by GoP.

The management accepted the audit contention; however, the loan liability to EXIM Bank has not paid as yet and the loan interest etc is piling up day by day.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to take up the matter with Economic Affairs Division through MoITT for setting up the modalities and get it verified from audit.

Audit recommends implementation of DAC directives.

(DP No. 190)

8.5.4 Unjustified expenditure without obtaining NOC for ROW- Rs 167.365 million

As per responsibility assignment matrix at S.No. 12 of the contract executed between SCO and M/s City Link Communications (Pvt) Ltd for replacement/deployment of 187 KM Optical Fibre Cable Network along Jaglote-Skardu via Shengus (Package-I GB), acquisition of NOC for Right of Way (ROW) from the concerned authority was the prime responsibility of the Contractor with the support of SCO.

SCO HQ under the MoITT, Islamabad made a contract agreement with M/s City Link Communications (Pvt) Ltd for replacement/deployment of 187 KMs Optical Fibre Cable Network along Jaglote-Skardu via Shengus (Package-I GB) for Rs 334.730 million on 21.05.2021.

Audit observed that NHA disallowed SCO to use its RoW without which laying of OFC at the given location could not be carried out. Audit, however, revealed that SCO paid Rs 167,365,000 to M/s City Links during FY 2022-23 against the contract and issued Provisional Acceptance Certificate (PAC) for execution of the work.

Audit contends that payment including RoW charges to the contractor without acquiring permission for use of RoW from NHA raises concerns about the authenticity of the expenditure and weakness of the contract management.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the Strategic Highway-1 Road from Jaglot-Skardu was approved by ECNEC including service gallery for SCO OFC. However, NHA did not construct service gallery despite repeated approach by SCO. After mutual negotiation, NHA allowed deployment of OFC along Jaglot - Skardu road which is functional and being used by SCO.

The reply is not tenable as no documentary evidence in respect of approval from NHA was provided till finalization of this report.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to obtain NOC for RoW from NHA and get it verified from audit.

Audit recommends implementation of DAC directives.

(DP No 179)

8.5.5 Non-receipt of O&M charges from M/s CMI-Rs 163.716 million (570,240 US\$)

As per capacity and price schedule-1 of contract agreement, US \$ 460,800 will be recovered from M/s China Mobile International (CMI /Zong) as annual O&M charges of the end-to-end Circuit in case of 100 G Circuit, & US\$ 109,440 in case of 20 G leased end to end capacity. Further, according to Section 40-C (1&2) of Public Finance Management Act, 2019, the revenue collection offices shall deposit the collections in Federal Consolidated Fund promptly without delay in prescribed manner under the head of account specified by the Finance Division in consultation with the Controller General of Accounts. Revenue collection offices shall not retain or appropriate the collected amounts to meet departmental expenditures.

SCO HQ under the MoITT, Islamabad executed tripartite agreement with CM Pak, Ltd and China Mobile International (UK), Limited on 19.12.2019 for supply of 100 G & 20 G lease circuit capacity respectively for provision of OFC based transmission Network Cable stationed at SCO node Khunjrab to SCO node at, Rawalpindi.

Audit observed that SCO neither recovered the O&M charges of Rs 163,715,904 (US\$ 460,800 + US\$ 109,440 x Rs 287.10 prevailing exchange rate) from M/s CMI nor remitted to Federal Consolidated Fund.

Audit contends that non-recovery of the O&M charges and its remission to the Federal Consolidated Fund in disregard to the above stated rules signify the weakness of the financial discipline and misreporting of revenue of SCO to the relevant quarters.

The matter was reported to the management and PAO during September to December, 2023. It was replied that a sum of USD 11,404,747 was paid by CMI as 15

years IRU on 31.12.2019 which was deposited in FCF. No O&M charges were included in Contract Agreement with CMI.

The reply is not tenable. O&M charges were duly included in the contract agreement as is evident from the criteria quoted above.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to provide the relevant record relating to recovered amount of O&M charges and get it verified from audit within one week.

Audit recommends implementation of DAC directives.

(DP No. 209)

8.5.6 Unauthorized laying of OFC at unapproved section-Rs 114.00 million

According to Para 6(C)(3) of PC-1 for the project, Up-gradation of transmission network and replacement of Optical Fibre Cable (OFC) in AJ&K & GB (Project No. I/2019-2020)", 855 Km Optical Fibre Cable will be laid in HDPE Duct at specified sections as per diagram at Annex-VI. Further, Rule 4 of PPRs-2004 stipulates that, procuring agencies, while engaging in procurements, shall ensure that the procurements are conducted in a fair and transparent manner, the object of procurement brings value for money to the agency and the procurement process is efficient and economical.

The Departmental Development Working Party (DDWP) under MoITT, Islamabad approved the PC-1 for "Up-gradation of Transmission Network and replacement of OFC at AJ&K and GB" amounting to Rs 1,780 million on 06.04.2020 for Chilas-Shatial, Shatial-Dareel Ghabar & Shatial-Tangir Phabat section having a stretch of 151 (65+40+46) KMs. The project was divided into three packages. The contract for package-3 Gilgit-Baltistan section was awarded to M/s Amanullah & Co. Ltd for laying of 70 KM Optical Fibre Cable Network at a cost of Rs 114 million on 21.05.2021.

Audit reviewed the relevant contract files and observed that:

- i. SCO changed the alignment and executed the contract with M/s Amanullah for laying of OFC at Gilgit- Gakhuch section for the same amount and same KMs which was not approved in the PC-I.
- ii. The record transpired that the road was under construction and no ROW was available for laying of OFC at Gilgit-Gakhuch section.
- iii. A payment of Rs 45,640,000 (15,000,000 + 19,230,000+11410,000) was made to the contractor for a package which was not included in the section list/diagram of the approved PC-I.

Audit contends that changing the alignment of the OFC, inclusion of a section unapproved in the PC-1 and award of contract thereof resulted in an unauthorized expenditure of Rs 114 million.

The matter was reported to the management and PAO during September to December, 2023. It was replied that 70 KMs of Shatial – Dareel Ghabar & Shatial – Tangir Phabat section was approved in PC-I, accordingly the contract was awarded to M/s Amanullah Khan & Co (Pvt). Gilgit to Gakhuch Section was neither approved nor contract was awarded to M/s Amanullah. No OFC was deployed at Gilgit - Gakuch Section.

The reply is not tenable as the contract was awarded to M/s Ammanullah for Gilgit-Gakuch section and payments were made against the same contract as evident from the invoices of the contractor.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to verify the record from audit.

Audit recommends implementation of DAC directives and matter be inquired to fix responsibility.

(DP No. 176)

8.5.7 Irregular utilization of contingency allocations - Rs. 85.793 million

As per para 2 (d) of FB&A procedure under head misc. expense grant, the grant and expense are lapsable at the end of financial year. The unspent balance will be deposited into Govt. Treasury.

SCO HQ under the MoITT, Islamabad drew a total amount of Rs 368,763,933 under the head-contingencies during FY 2022-23 and deposited in SCO lapsable account No 5412373 opened in NBP.

Audit observed that the amount was withdrawn on simple receipt basis without incurrance of expenditure and submitting of bills to CMA (FWO). Audit also revealed that SCO made payments out of the designated account opened in the National Bank of Pakistan throughout the year on account of contingencies bypassing the pre-audit checks at the counter of CMA (FWO). Audit further noticed that SCO withdrew an amount of Rs 85,793,018 on 27.6.2023 through cheques which was cleared during July, 2023 after close of financial year.

Audit contends that withdrawal of contingencies funds on simple receipt basis from CMA (FWO) without pre-audit checks of the expenditure reflect inefficient budgeting process, weak internal control and warrants immediate corrective action.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the Ministry allocated the required funds on 26.6.2023 and on the same day amount was claimed on contingent bill submitted to CMA (FWO). Due to public holidays of Govt. institutions the amount was credited on 03.07.2023.

The reply is not tenable. The funds were withdrawn without pre-audit checks by CMA (FWO). Further, the designated account of SCO in the NBP was a lapsable account, therefore, the cheques issued on 27.06.2023 were invalidated and could not be en-cashed after special permission of State Bank on 03.07.2023.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to provide the State Bank letter, procurement record and clearance of cheques to audit for verification.

Audit recommends implementation of DAC directives.

(DP No. 178)

8.5.8 Loss of land due to inadequate asset management - Rs.43.532 million

As per notification No REV-COMM-1(8)/97 dated 16.05.1998, the Chief Secretary Gilgit-Baltistan allotted Khalisa Land in favour of 63 CSB, SCO for construction of Telecommunication Buildings etc at various stations including Konodas, Gilgit.

The Chief Secretary Gilgit-Baltistan allotted four (04) properties to 63-CSB SCO, Gilgit-Baltistan for construction of Telecommunication Buildings as detailed below:

S.No	PDP No	Location	Land Area	DC Rate Per Kanal	Loss (Rs)
1	282-24	KIU	5K,8M	2,756,000	14,882,400
2	281-24	Jaglot	10 M	2,100,000	1,050,000
3	269-24	Tangir	34K,2 M	750,000	25,500,000
4	266-24	Shatial	1K,10 M	1,400,000	2,100,000
Total			39 K,18 M	-	43,532,400

Audit reviewed the land and building files and observed that 5 Kanal & 8 Marla land was illegally occupied by Karakorum International University, 10 marla at Jaglot was occupied by Local Government and 34 Kanal & 02 marla land at Tangir was occupied by a private person. In case of Shatial, payment was made for 1 Kanal & 10 marla land during 1984 but land was not acquired, Audit estimated the land value as per DC rate to the tune of Rs 43,532,400.

Audit maintains that due to inadequate asset management and weak internal controls, SCO sustained a huge loss of Rs 43,432,400.

The matter was reported to the management and PAO during September to December, 2023. It was replied that SCO was not in possession of any land, therefore, responsibility for non-transfer of land in the name of SCO and holding of possession could not be fixed against anyone.

The reply is not tenable. The land was allotted to SCO by the GB government and was in possession of SCO but the land was grabbed/ encroached upon by different private and government organizations.

The matter was discussed in the DAC meeting held on 15th January, 2024. In case of S No 1, 2 & 4, the DAC directed the management to chalk out the mechanism for asset management on the analogy of SUPARCO, besides recovery of alternate land /amount from the concerned agency under intimation to audit. In case S.No 3, the DAC directed to provide settlement agreement to audit.

Audit recommends implementation of DAC directives.

(DP No. 266, 269, 281 & 282)

8.5.9 Unauthorized payments out of revenue-Rs 36.686 million

As per Rule 23 of Public Financial Management Act, 2019, no authority shall incur or commit any expenditure or enter into any liability involving expenditure from the Federal Consolidated Fund and Public Account of Federation until the same has been sanctioned by a competent authority duly empowered.

SCO HQ under the MoITT, Islamabad executed Service Level Agreements (SLA) with M/s CARE (Pvt) Ltd and M/s Glowbug Tech. (Pvt) Ltd with costs of Rs. 9,093,750 and Rs 24,748,080 for provision of O&M of Lawful Interception (LI) Monitoring System and Premises DNS Solution on 22.06.2017 & 07.03.2022 respectively. A payment of Rs 33,841,830 million was made to both M/s CARE (Pvt) Ltd and M/s Glowbug Tech. (Pvt) Ltd. Further, PEMRA & PTA fee amounting to Rs 2,844,499 was also paid from revenue as detailed below:

S. No	PDP No	Subject	Amount (Rs)
1	197-24	Unauthorized payments out of revenue	33,841,830
2	198-24	Unjustified payment of from revenue	2,844,499
Total			36,686,329

Audit observed that unauthorized payments out of SCO revenue were made to the service providers on account of service level agreement fees instead of meeting the expenditure from recurring cost of the respective projects during FY 2022-23.

Audit holds that the service level agreement fees were required to be made from recurring budget heads but due to weak financial discipline, the fees were met out of SCO revenue account in violation of the afore-mentioned rule.

The matter was reported to the management and PAO during September to December, 2023. It was replied against S. No 1 that the allocated non-development budget was insufficient for POL and necessary spares and SCO network had expanded exponentially, therefore, SCO project management board (PMB) approved the payment of SLAs from revenue till the time necessary non-development funds were allocated to SCO. In case of S.No 2, regulatory payments were made from revenue to avoid late payment charges / suspension of services. As per FBA&A procedures SCO is authorized to make necessary regulatory payment.

The management accepted the audit contention, however, the authorization of necessary regulatory payment out of revenue under FBA&A procedures of SCO and its subsequent adjustment could not be verified to audit.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to regularize the expenditure from Finance Division and get it verified from audit.

Audit recommends implementation of DAC directives and cessation of the practice henceforth.

(DP No. 197 & 198)

8.5.10 Non-execution of civil work as per approved BoQ - Rs 16.230 million

As per Annex-I of the PC-I, an amount of Rs 20.062 million was fixed for acquisition of land, construction of buildings, civil works & allied equipment.

SCO HQ under the MoITT, Islamabad executed a contract agreement with M/s Amanullah & Co (Pvt) Ltd on 07.07.2021 for the project, 'Protection and Up-gradation of Pak-China OFC for cross border connectivity (Dassu-Danyore Alignment) at a cost of Rs 1,007,813,681 including an amount of Rs 20,000,000 for acquisition of land and construction of concrete building at Dassu.

The Audit Team visited the Dasu site physically and observed that:

- i. The contractor had executed the work of Rs 3,769,900 against the approved cost of Rs 20,000,000.
- ii. The contractor did not acquire the land for construction of node site despite receiving of payment thereof.
- iii. The contractor installed pre-fabricated shelter instead of construction of concrete building.
- iv. Installation of Air Conditioner and electricity meter, construction of car porch, complete boundary wall and lawn, green area and paving of tuff tiles were not carried out / executed.
- v. SCO paid full amount by issuing Final Acceptance Certificate despite the fact that the work was not executed in accordance with BoQ.

Audit contends that non-execution of the work according to the approved BoQ, altering the BoQ items without revision of the PC-I and issuing the Final Acceptance Certificate (FAC) without completion of work reflect weakness of the financial discipline and internal controls.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the pre-fabricated building was installed on emergency basis for early installation of equipment. 15 KVA solar was installed to provide 24-hours power equipment instead of purchasing land. All the other allied equipment is available at Node site. Revised PC-I for approval had already been prepared and would be shared after approval for verification.

The reply is not tenable. Non-acquisition of land despite payment of land cost, construction of pre-fabricated instead of concrete building without revision of PC-I and non-execution of BoQ items by the contractor reflect weak contract management, financial indiscipline and ineffective monitoring of the organization.

The matter was discussed in the DAC meeting held on 15th January, 2024. The DAC directed the management to quantify the actual work done by the contractor. Further, revised reply along with justification and revised PC-I be provided to audit for verification.

Audit recommends implementation of DAC directives.

(DP No. 170)

MINISTRY OF INFORMATION TECHNOLOGY & TELECOMMUNICATION

CHAPTER-9

UNIVERSAL SERVICE FUND (USF)

Chapter 9

Universal Service Fund (USF)

(MoITT)

9.1 Introduction

A) Federal Government established Universal Service Fund (USF) under Section 33A of Pakistan Telecommunication (Re-organization) (Amendment) Act, 2006 to provide the benefits of the telecom services across Pakistan. The main functions of the Fund are to:

- Bring the focus of telecom operators towards rural population and increase the level of telecom penetration significantly in the rural areas through effective and fair utilization of the Fund.
- Improve the broadband penetration in the country.
- Enhance e-services in rural as well as urban areas of the country.

The Fund is utilized exclusively for providing access to telecommunication services to the people in the un-served, under-served, rural and remote areas, besides other expenditure made by the Federal Government in managing USF. The Federal Government is responsible for the coordination and ensuring timely utilization and release of sums in accordance with the criteria as may be prescribed.

Federal Government in pursuance of Sub-Section (2) of Section 57 of Pakistan Telecommunication (Re-organization) (Amendment) Act, 2006 approved the Universal Service Fund Rules, 2006. In terms of Rule 10 *ibid*, MoITT established a non-profit company limited by guarantee for implementation of USF projects. The company is managed by a Board of Directors headed by Secretary, MoITT as its Chairperson to run its affairs.

B) Comments on Budget and Accounts

9.1.1 According to Auditor-General's office letter No.574/43-R&SD/SOP/2007Pt dated 01.12.2023, Universal Service Fund (USF) Company, being autonomous body of the Federal Government, while appointing the Chartered Accountant firm for annual audit of its financial statements, is required to obtain concurrence of the Auditor-General of Pakistan. However, USF did not obtain the said concurrence from the office of the Auditor-General of Pakistan.

9.1.2 According to Note 16.3.5 to the Financial Statements, the value of plan assets as on 30.06.2023 was recognized as Rs 125.822 million (in 2023) as compared to Rs 90.244 million (in 2022); thereby showing an increase of 39.4% in plan assets. The detail of increase in plan assets along with detail of investment made by the USF Company may be provided.

Table-I Audit Profile of USF

(Rs in Million)

S. No	Description	Total Nos	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
1	Formations	01	01	18,555.023	8,398.248
2	<ul style="list-style-type: none">• Assignment Accounts• SDAs	01	01	-	-
3	Authorities / Autonomous Bodies etc. under the PAO	01	01	18,555.023	8,398.248
4	Foreign Aided Projects (FAP)	-	-	-	-

9.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 30,775.499 million were raised in this report during the current audit of the USF Company. This amount also includes recoveries of Rs 176.845 million as pointed out by audit. Summary of the audit observations classified by nature is as under:

Table-II Overview of Audit Observations

(Rs in Million)

S. No	Classification	Amount
1	Non-production of record	-
2	Reported cases of fraud, embezzlement and misappropriation	-
3	Irregularities	20.654
A	HR/Employees related irregularities	20.654
4	Value for money and service delivery issues	3,741.000
5	Others	27,013.845
Total:		30,775.499

9.3 Status of Compliance with PAC Directives

USF & CO				Compliance		
S. No	Audit Year	Total Paras	Total Directives	Received	Not Received	%age
1	2011-12	40	40	25	15	63

2	2012-13	61	61	5	56	8
3	PAR 2013-14	41	41	2	39	5
4	2014-15	18	18	2	16	11
5	2015-16	11	11	3	8	27
6	2016-17	9	9	6	3	67
7	PAR 2016-17	24	24	17	7	71
8	2017-18	11	11	9	2	82
9	2018-19	9	7	7	0	100
10	2019-20	10	10	4	6	40

The above table reflects that the management has not shown adequate interest in complying with the PAC directives over the years.

AUDIT PARAS

9.4 Irregularities

A. HR/Employees related irregularities

9.4.1 Inadmissible payment on account of monthly fuel ceiling to USF employees – Rs 20.654 million

According to Rule 5 (5) of the Public Sector Companies (Corporate Governance) Rules, 2013, the Board shall establish a system of sound internal control which shall be effectively implemented at all levels within the Public Sector Company to ensure with the fundamental principles of probity and propriety, objectivity, integrity and honesty.

The USF Company under the MoITT, Islamabad paid vehicle monetization allowance amounting to Rs 13,532,784 to the officers above manager level. The Company also authorized monthly fuel ceiling against their private vehicles and paid an amount of Rs 20,654,248 to the same officers during FY 2022-23.

Audit contends that the authorization and payment of monthly fuel ceiling in addition to monetization allowance was inadmissible.

The matter was reported to the management and PAO during October and November, 2023. It was replied that monetization policy of fuel entitlement and vehicle monetization in lieu of official vehicle for all USF Manager and above officers was approved by the Board of Directors while approving HR Manual on the recommendation of Human Resource Governance Committee (HRGC).

The reply is not tenable. The USF Board did not allow paying both the facilities simultaneously to all officers above manager level.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC upheld its earlier directive of meeting held on 27.12.2022 and directed the management to refer the case to BoD in order to align it with the government policy.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the MFDAC Report for the audit year 2022-23 vide PDP No. 96-2023 having financial impact of Rs 12.960 million. Recurrence of same irregularity is a matter of serious concern.

9.5 Value for money and service delivery issues

9.5.1 Blockage of USF funds on account of mobilization advance— Rs 3,741 million

According to Para 5 of schedule 'D' of Service and Subsidy Agreements (SSA) made between USF Company and service providers (a) first milestone must be achieved within six (6) months of the Effective Date, (b) rest of three milestones must be achieved within twelve or eighteen months of the Effective Date (the Final Implementation Date). Further, as per clause 4.01 of Service and Subsidy agreement, apart from condition of force majeure, failure to meet the Final Implementation Date can result in imposition of one or more penalties by USF Company.

The USF Company Board under the MoITT, Islamabad approved award of twelve (12) Broadband and OFC contracts amounting to Rs 21,036,308,600 during its 83rd BoD meeting held on 22.09.2022. Accordingly, the CEO of USF Company signed the contracts with six (06) telecom operators during October, 2022. Mobilization advances @ 20% of contract values amounting to Rs 3,740,683,123 were paid to the service providers.

Audit examined the record of service and subsidy agreements and observed that the service providers failed to offer first milestone for technical audit till 30.06.2023 despite lapse of nine (09) months. Further, the service providers requested the USF Company for grant of 180 days extension in contracts on force majeure basis. Accordingly, the Company granted extension only in five contracts vide USF Management Committee's meeting held on 16.01.2023. Audit further noticed that the service providers in remaining seven (07) contracts also did not offer first milestones within due time.

Audit contends that the service providers failed to fulfil the contractual obligations despite advance mobilization payment by the USF Company.

The matter was reported to the management and PAO during October and November, 2023. It was replied that all of the projects highlighted by Audit have suffered from force majeure conditions of imports and opening of LCs. The mobilization advance was paid according to Schedule D of the Service and Subsidy Agreement within 15 days of effective date (date of signing of contract).

The reply is not tenable. The projects were approved by USF Board during September, 2022 and the contracts were awarded during October, 2022 despite the joint request of service providers on 28.07.2022 to postpone the bidding process due to economic situation of Pakistan, difficulties in opening of LCs and government restrictions on imports. The service providers signed the agreements and submitted requests for mobilization advance despite the fact that they knew that they could not offer the milestones due to the conditions mentioned above.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC directed the USF management that project wise detail showing progress be prepared within two weeks and provided to audit for scrutiny.

Audit recommends implementation of DAC directives and to fix responsibility.

(DP No. 121)

9.6 Others

9.6.1 Creation of un-justified commitments - Rs 26,837 million

According to Rule 2A(1)(a) of Public Sector Companies (Corporate Governance) Rules 2013, the business of the Public Sector Company is carried on with integrity, objectivity, due care and the professional skills appropriate to the nature of its activities. Further, as per Rule 21(6)(c) (i& iii) of aforesaid Rules, the Audit Committee may review quarterly, half yearly and annual financial statements of the Public Sector Company, prior to their approval by the Board focusing on the major judgment areas and the going concern assumption.

The USF Company under the MoITT, Islamabad awarded Broadband and OFC contracts to different service providers (telecom operators) for provision of telecommunication/data services to the people of un-served and under-served areas of Pakistan.

Audit observed that USF Company created huge commitment of Rs 61,656 million as on 30.06.2023 against the available funds of Rs 34,819 million with the Ministry and USF Company; thereby, creating a huge liability of Rs 26,837 million as detailed below:

(Rs in Million)

S. No.	Description	Amount	Remarks
1	USF Company payable commitments as on 01-07-2022	39,590	
2	Add commitments during the year 2022-23 (new projects)	22,066	
3	Total payable Commitments up to 30-06-23	61,656	(1+2=3)

4	Funds available with USF Co. for payment of commitments during 2022-23 (Rs 18,340+ Rs 923.676)	19,264	
5	Remaining commitments to be paid	42,392	(3-4=5)
6	Remaining Funds available with Fund account at Ministry and USF Co. as on 30-06-23 (Rs 13,638 + Rs 1,917)	15,555	
7	Balance of payable Commitments as on 30-06-23	26,837	(5-6=7)

Audit contends that due to improper planning and imprudent decisions by the Board, the USF Company increased the risk of going concern by awarding contracts in disregard to the fund position.

The matter was reported to the management and PAO during October and November, 2023. It was replied that an amount of Rs 57,211 million pertaining to USF funds was available in the Federal Consolidated Fund taken by the Federal Government in June, 2013. The USF Company challenged the matter in the Supreme Court of Pakistan whereby it was decided that the funds were exclusively meant for USF and could not be utilized for any other purpose by the Federal Government. Based on the funds of Rs 57,211 million available in the FCF, the USF Company did not over-commit on account of new subsidy projects.

The reply is not tenable as the Finance Division vide letter dated 06.07.2023 intimated the MoITT to obtain the balance amount of USF through annual

budgetary appropriations during next ten (10) years, which means that USF Company had expected receivable of Rs 5,700 million per year.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC directed USF management to prepare a separate contract wise detail showing break up of all the contracts. A report in this regard may be prepared, placed before the Board and also provided to audit.

Audit recommends implementation of DAC directives.

(DP No. 120)

**9.6.2 Non-recovery of outstanding dues of USF contribution –
Rs 176.845 million**

According to clause 4.1.2.2 of Long Distance International (LDI) License issued under section 21 of the Pakistan Telecommunication (Re-organization) Act, 1996, the Licensee shall contribute to the Universal Service Fund an amount calculated on the basis of 1.5% of the Licensee's gross revenue from Licensed Services for the most recently completed financial year of the Licensee minus inter-operator payments and related PTA/FAB mandated payments. Clause 4.1.2 further stipulates that the licensee shall make this contribution within 120 days of the end of financial year.

The MoITT, Islamabad maintained USF Fund based on contributions from telecom operators, upon which the USF Company carried out operational and business activities and received Opex and Capex budgets.

Audit observed that USF Fund Management failed to recover an amount of Rs 176,844,519 on account of USF contributions against the billing issued to the telecom operators during FY 2022-23.

Audit contends that non-recovery of the USF contributions from the telecom operators not only reflects weakness of the USF Fund management but it also affects the financial health of the USF Company.

The matter was reported to the management and PAO during October and November 2023. It was replied that recovery from operators is an ongoing mechanism. The MoIT is in process of issuing the letter to PTA, advising them to expedite the recovery process. Any update in the recovery process will be shared with audit.

The reply is not tenable. The Fund was established to manage the affairs of the USF fund. However, audit did not find any evidences of efforts made by the fund management to recover the outstanding dues.

The matter was discussed in the DAC meeting held on 11th January, 2024. The DAC directed USF Fund management to expedite the recovery and get it verified from audit.

Audit recommends implementation of DAC directives.

Telecommunication**

Chapter-10

**Impact Audit
Of**

USF Project “Broadband Sustainable Development Program- Khyber Lot”

Impact Audit of USF Project “Broadband Sustainable Development Program – Khyber Lot”

10.1 Introduction

The Broadband for Sustainable Development (BSD) Program, initiated by the Universal Service Fund (USF), is a telecom service-related program designed to bridge the digital divide by extending telecommunication services to un-served/under-served areas in Pakistan. The program became significant after the issuance of 3G and 4G licenses by the Federal Government; therefore, broadband data (internet) services were included as a mandatory component. The objective was to empower communities across the country with access to both voice and data communication so as to promote economic development and social inclusion.

The Broadband Sustainable Development (BSD) of Khyber Lot is a significant part of this program which focuses on the un-served areas within Khyber, Kohat, Karak and Hangu districts including erstwhile FR Peshawar and FR Kohat. The Khyber Lot comprises 720 Mauzas with an estimated rural population of 3.1 million⁶¹. Out of these Mauzas, approximately 70% was un-served area, which lacked basic telecommunications services/facilities. This un-served area accounted for 56.6% of the rural population in the Khyber Lot.

To address this digital divide and extend telecommunication services to these unserved areas, the Universal Service Fund (USF) entered into a contract with M/s Pakistan Telecommunication Mobile Limited (PTML), which operates under the brand name of Ufone on 23-10-2017.

The program aims at bringing voice communication and broadband internet connectivity to the people of the Khyber Lot and enhance their access to information, education, healthcare, and economic opportunities.

⁶¹ Schedule-C of Services & Subsidy Agreement (SSA) with M/s PTML

To sum up, the Broadband Sustainable Development, Khyber Lot program is a vital initiative of the Universal Service Fund under the MoITT to promote sustainable development and inclusivity in Pakistan's telecommunication infrastructure.

10.2 Overview

The program was initiated at a cost of Rs 1,985 million⁶² with a specific goal to provide essential telephony and data services including broadband Internet as well as necessary infrastructure such as fiber networks and community tele-centres (commonly known as Net Cafés) to the unserved areas in Khyber Lot. The program commenced on 23.10.2017, with a projected completion date of 22.10.2019. To ensure efficient and timely execution of the program, a milestone-based framework was formulated to provide a structured roadmap for the program. Accordingly, the program was divided into four milestones. The first milestone was required to be completed within six months from the date of signing of contract agreement, whereas the rest of the three milestones were to be accomplished during the ensuing eighteen (18) months. The program could not be concluded within the stipulated timeframe and was extended up to June-2020.

The uniqueness of the program was its funding model. It was financed through 1.5% contributions⁶³ made by the telecom operators, namely, cellular mobile operators, Long Distance & International operators, Local Loop etc. out of their adjusted revenues to USF and remarkably did not involve direct government funding. The USF hired telecom service providers through competitive bidding under reverse auction model, which encouraged healthy competition among various telecommunication companies like M/s Ufone, Jazz, Telenor, Zong, PTCL and Nayatel. Major projects were awarded to the cellular mobile operators during the currency of the program.

In short, the program's unique funding model, structured milestones, and competitive bidding process contributed to bridge the digital gap in the Khyber Lot region and led to the sustainability and efficiency of the program. Though the program achieved the intended objectives of providing broadband internet services in the unserved areas of Khyber Lot, yet more focus is needed to improve the coverage and data speed in the target areas.

⁶² Schedule-D of Services & Subsidy Agreement (SSA) with M/s PTML

⁶³ Rule 4(2) of USF Rules, 2006.

10.3 Scope and Methodology

The scope of the program covers the execution period starting from October, 2017 to June, 2020. To ascertain the impact of the program, Audit visited the USF Company H/Q, Islamabad and carried out site inspection of Khyber Lot. Audit noticed that the program accomplished the objectives of providing broadband services to the unserved population of the Khyber Lot but the quality of service in terms of data speed was deficient and did not serve the purpose of the people at large. Moreover, the erstwhile FATA region and the adjoining districts remained under continuous militancy threat which greatly affected people's lives. It is worth mentioning that modern telecom facilities did not exist before intervention of USF Company in the unserved area of Khyber Lot. In fact, the program targeted the provision of voice and internet services in 428 mandatory Mauzas; however, the population of the unserved area would have been deprived of the basic telephony, data services, uplift of online educational facilities, healthcare, economic growth and social bonding, had there not been provided broadband services by the company. It is pertinent to mention that the project of providing broadband internet services was awarded to M/s Ufone only in the target areas; therefore, the data collected reflect the status of broadband internet services to that extent.

The impact audit was carried out by adopting a mixed method approach, based on quantitative and qualitative methods and tools of data collection like field survey questionnaire, key stakeholders and government officials' interviews, drive testing and documents analysis. In addition, data from Pakistan Telecommunication Authority (PTA) and MoITT was also collected to see the tele-density in the Khyber Lot area. The audit team also collected and analyzed data on key indicators such as internet usage, economic activity and health and educational attainments.

10.4 Findings of Impact Audit

The findings of the impact audit are highlighted as under:

i. Improved broadband connectivity and effect on socio-economic life

The program has successfully achieved the intended objectives in terms of provision of consistent high speed broadband services in the unserved targeted areas of Khyber Lot which has increased access of the local population to reliable internet services; thereby creating positive life experiences and improving communication. As per audit survey⁶⁴ based on a sample of 100 respondents, 78% of the respondents of target area had smart phones; 68% of the respondents used voice and data facility, 57% used mobiles for access to public services, and 34% of the respondents opined that broadband services made their communication easy with others. 32% of the respondents were of the view that telecom services were helpful to interact with their relatives and enhanced individual participation in online community groups and pages; thereby fostering a sense of communal engagement. The program also influenced people's livelihoods by engaging them in online economic activities. As per audit survey, 22% of the respondents of target areas apprised that they used mobile services for their business expansion. The program was intended to enhance the use of e-commerce and social media platforms in the target areas in order to promote online business and social interaction. As per audit survey, 58% of the respondents replied that they used social media (Facebook and WhatsApp) for promotion and sale of products; thereby stimulating local economies and entrepreneurship. 12% of the respondents in the target area used mobile services for online shopping. The program also enhanced access of the local people to email and web browsing for gathering required information for multifarious purposes. As per audit survey, 16% respondents of the target areas used mobile service for obtaining information on social issues. Detail is given in Annex-II.

10.4.2 Increased digital literacy and skill

The program also contributed to increase in digital literacy and skills among the local population which has raised the likelihood of exploring new jobs and business opportunities through information technology and services online. As per audit survey, 40% of the respondents of target areas apprised that they used mobile phones and other equipment for e-learning, whereas 32% informed that broadband services were useful for

⁶⁴ Field Survey Results

studies and learning. The program also achieved the goal of promoting financial thinking and literacy through online services. 26% of the respondents of the target area used internet services for mobile banking facilities. The program also facilitated the farmers in acquiring the knowledge of agriculture economics and weather updates through information online.

10.4.3 Access to health information

Access to professional health-related information has enhanced the probability of receiving quality advice. The program effectively contributed to health awareness, consultation services and information accessibility in the target areas. As per audit survey, 13% of the respondents used internet for online health services.

10.5 Impact on connectivity

Broadband internet services did not exist before commencement of the program. Only fixed landline telephone service could work in certain areas without using Digital Subscriber Line (DSL) service. With the arrival of program, the local population got the facility of mobile broadband internet services as per details given in the table below:

Districts	Data Subscribers	Voice Subscribers
KOHAT	168,680	174,524
HANGU	75,122	70,486
KHYBER AGENCY	74,605	75,261
KARAK	59,848	63,377
FR KOHAT	19,648	19,294
FR PESHAWAR	9,782	7,811

Total	407,685	410,753
--------------	---------	---------

Source (Data received from M/s Ufone)

10.6 Problem areas of the program

The erstwhile FATA regions and their adjoining districts have been under continuous militancy which has greatly affected people’s lives and livelihood. The local population was deprived of the basic telephony and data services. The program provided the modern telecom facilities only in 428 mandatory Mauzas out of 729 Mauzas due to security situation and low population below the minimum threshold of 100 persons in the target Mauza. Besides, the quality of broadband internet services was not up to the mark. As per audit survey, 45% of the population opined that quality of voice was good with slow net speed.

10.7 Conclusion

The Broadband Sustainable Development Program in Khyber Lot, spearheaded by the Universal Service Fund (USF) was implemented in only 428 Mauzas instead of 729. In those Mauzas the programme has made significant strides in narrowing the digital gap and fostering socio-economic development in under-served regions. The initiative successfully achieved its core objectives, providing consistent high-speed broadband services to previously unconnected areas.

Despite commendable achievements, challenges persist. Security concerns in erstwhile FATA regions have limited the program's reach, leaving some areas untouched. Additionally, the quality of broadband services, particularly data speed, falls short of expectations for 45% of the surveyed population.

Moving forward, targeted actions are essential. Efforts to expand coverage should prioritize collaboration with law enforcement agencies to ensure secure deployment in previously inaccessible areas. Infrastructure upgrades and technological enhancements are imperative to address the identified deficiencies in data speed. Community engagement initiatives and awareness campaigns will play a pivotal role in maximizing the program's impact, promoting digital literacy, and unlocking economic opportunities.

Regular monitoring and evaluation, coupled with public-private collaboration, will be key to the program's sustained success. These measures will enable the refinement of strategies, ensuring that the benefits of connectivity reach a wider population, and fostering a resilient digital infrastructure that contributes to the region's sustainable development.

In conclusion, while the program has laid a robust foundation for connectivity and socio-economic empowerment catering the challenges, the targeted actions will be instrumental in realizing the full potential of the Broadband Sustainable Development Program in Khyber Lot.

**AUDIT REPORT
ON
THE ACCOUNTS OF
POSTAL SECTOR
MINISTRY OF COMMUNICATIONS
AUDIT YEAR 2023-24**

DIRECTORATE GENERAL AUDIT (POSTAL SERVICES)

Chapter-1

Pakistan Post Office Department

1.1 Introduction

A. PPOD stands as an institution deeply rooted in history, tracing its origin to the colonial era, making it one of the oldest government departments in the Sub-Continent. Since its inception, the PPOD has played a pivotal role in shaping communication, commerce, and financial transactions within Pakistan. As an integral part of the nation's infrastructure, the department has evolved to meet the changing needs of society, serving as a critical link that connects millions of people throughout the country.

PPOD was established as a service department under the Post Office Act, 1898. The department is headed by the Director General who is also Chairperson of the Pakistan Postal Services Management Board. The department consists of 09 Circles, each headed by a Postmaster General, based at Quetta, Karachi, Hyderabad, Multan, Lahore, Rawalpindi, Islamabad, Peshawar and Muzaffarabad. With a remarkable physical footprint, the PPOD boasts a network of 10,190 post offices, including 85 General Post Offices (GPOs) strategically managed by a workforce of 38,884 employees, including both regular and extra-departmental personnel. This extensive network ensures that the services provided by the PPOD reach urban centers and remote regions alike, making it a ubiquitous presence throughout the country.

The core functions of the Pakistan Post Office are diverse and expansive, encompassing both domestic and international postal services, as well as facilitating money orders. Beyond traditional postal activities, the PPOD operates as an agency on behalf of the Federal and Provincial Governments, undertaking essential tasks such as the collection of utility bills, payment of military pensions, tax collection, and managing Western Union transactions. The department is also entrusted with the secure delivery of crucial identification documents, including NADRA ID cards and passports. In addition to these functions, National Security Printing Corporation (NSPC), Karachi prints all types of postal stamps and revenue documents and Chief Controller of Stamps (CCS), Karachi supplies these documents/stamps to all postal formations. This multifaceted approach underscores the PPOD's commitment to providing comprehensive services that address the varied requirements of its extensive clientele.

B. Comments on Budget and Accounts

- i) PPOD incurred an expenditure of Rs 11,989.066 million under the heads of account A011- 2: Pay of other Staff and A012-1: Regular Allowances, against authorized amount of Rs 9,723.037 million under Grant No. 26 (PPOD) which resulted in excess expenditure of Rs 2,266.028 million during FY 2022-23.
- ii) An amount of Rs 6,592.562 million was reflected as cash with postmasters on the asset side of the balance sheet of PPOD. After discontinuation of LoC and introduction of Treasury Single Account (TSA) System, retention of cash by the post offices was unjustified; thereby overstating the PPOD's accounts.
- iii) An amount of Rs 111,592.420 million was disbursed on account of military pension through budget head - F01126 against released budget of Rs 154,480.094 million which resulted in unauthorized retention of Rs 42,887.673 million.
- iv) An expenditure of Rs 12,634.249 million incurred under the head - A01: Employee Related Expenses in Grant No.26 was not reconciled with Director Accounts, PPO, Lahore on monthly basis.
- v) PPOD is performing various agency functions on behalf of different government departments and other organizations but the accounting procedures of these agency functions were not approved from the Auditor-General of Pakistan. Therefore, the completeness and reliability of the receipts and payments could not be authenticated.
- vi) PPOD did not timely surrender savings of Rs 34.331 million under heads of account - A03: Operating Expenses, A04: Employees Retirement Benefits, A05: Grants, Subsidies, Write Off Loans & Advances and A13: Repair & Maintenance under Grant No.26 to the Finance Division due to which the funds got lapsed.

Table-1 Audit Profile of Pakistan Post Office Department**(Rs in Million)**

Sl. No.	Description	Total	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
1	Formations	127	52	1,846.036	5,193.487

1.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 222,066.888 million were raised in this report during the current audit of the Pakistan Post Office Department. This amount also includes recoveries of Rs 2,822.614 million as pointed out by audit. Summary of the audit observations classified by nature is as under:

Table-II Overview of Audit Observations**(Rs in Million)**

Sl. No.	Classification	Amount
1.	Reported cases of fraud, embezzlement and misappropriation	48.882
2.	Irregularities (A+B+C)	25,882.150

* Special Audit Report
**Special Study Report

The above table shows that PPOD is not complying fully with the PAC directives. The PAO needs to look into the large number of pending PAC directives and take steps for their early compliance.

AUDIT PARAS

AUDIT PARAS

1.4 Cases of fraud, embezzlement and misappropriation

1.4.1 Loss due to theft & misappropriation - Rs 48.882 million

According to Para 238 of Post Office Manual Vol-VIII, the Superintendent must inspect twice every year, each head office and second-class head office within the limits of his division. The inspecting officer will not be relieved of his responsibility for contributing to the commission of any fraud or defalcation of government money, which has remained undetected during the inspection by him. Further, Rule 23 of Serial No.7, Appendix-2 of GFR Vol-I describes that in all such cases, departmental proceedings should be initiated at the earliest against all delinquents even against a government servant being prosecuted in a Criminal Court.

In twelve (12) formations of PPOD under the Ministry of Communications, Islamabad the management detected 24 cases of fraud, misappropriation and embezzlement of government money in utility bills collection, value payable articles, pension payments and cash etc. and 16 cases of dacoity involving total amount of Rs 51,282,475 during FY 2022-23 as detailed in Annexure-III.

Audit observed that the PPOD management failed to recover the objected amount from the culprits. Further, disciplinary proceedings against the culprits as well as the negligent officers/officials were also not finalized despite lapse of considerable period.

Audit contends that non-recovery of the embezzled/ misappropriated amount and non-conclusion of disciplinary proceedings against the culprits and negligent officers/officials raised serious concerns about across the board accountability and adherence to procedures, which reflected weakness of the internal controls and indifferent attitude of the management in finalizing the fraud cases.

The matter was reported to the management and PAO during August to December, 2023. It was replied that an amount of Rs 2,405,403 had been recovered and efforts were underway to recover the remaining amount. During verification, the said amount was verified, leaving an outstanding balance of Rs 48,882,072. The amount of the para was accordingly reduced to the extent of verified amount.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to finalize the inquiry at the earliest, take disciplinary action, pursue the cases with Police/FIA, fix responsibility, effect recovery and record in terms of the recovered amount be provided for verification. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2018-19 to 2022-23 vide para(s) number 3.1.1, 1.4.1 to 1.5.7, 1.4.1 to 1.4.3, 1.4.1 to 1.4.3 & 1.4.1 to 1.4.5 respectively having financial impact of Rs 2,990.67 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 152)

1.5 Irregularities

A. HR/Employees related irregularities

1.5.1 Unjustified payments against illegal recruitments - Rs 1,764.80 million

According to Establishment Division's letter dated 26th July, 2022, the appointing authority of the concerned Ministry/ Division/Department/Organizations shall ensure completion of all procedures and codal requirements in letter & spirit in line with the recruitment policy while making recruitment and will be held responsible for illegality, if any. Moreover, according to Cabinet Committee instructions circulated vide case No. CCIR-17/7/21 dated 18th March, 2021 regarding re-organizing the Federal Government proposal and abolition of posts, all Ministry/Division shall abolish posts in BPS-1 to BPS-15 that have remained vacant for more than one year. However, the posts to be abolished will not include posts that are vacant due to transfer/posting and positions meant for promotion. Moreover, the posts where recruitment process is already under process shall also be exempted till finalization of the process.

DG PPOD under the Ministry of Communications, Islamabad forwarded two summaries to Establishment Division for grant of No Objection Certificate for recruitment in PPOD through Ministry of Communication on 7th and 22nd July, 2022 on the ground that 3938 posts (BPS-01 to 15) out of 28995 total sanctioned posts were lying vacant and the Department was facing problems to handle its operations. Resultantly, Establishment Division allowed PPOD to make recruitments against the vacant posts.

Audit examined the relevant record and observed that:

- i) After transfer of saving bank accounts and certificates to CDNS and military pension on Direct Credit System, PPOD was required to rationalize the working strength keeping in view the volume of work to minimize the ERE. Instead, PPOD made new appointments and would incur an operational cost of Rs 19,436.56 million during FY 2023-24 as compared to the operational cost of Rs 17,671.760 million incurred during FY 2022-23.
- ii) Finance Division vide its letter dated 30th September, 2022 directed PPOD to submit the funds availability status so as to ensure provision of employees related expenditure for the new appointments, as Finance Division was not in a position to allocate additional funds due to prevailing financial crunch but no such detail was shared with Finance Division and the recruitments were made.

- iii) Establishment Division allowed PPOD to fill in 3938 posts of BPS-1 to 15, whereas recruitment was made against 4252 posts; thereby causing excess recruitment of 314 posts.
- iv) The Establishment Division issued NOC on 22nd July, 2022 with validity period of six months which was extended twice for two months each on 16th November, 2022 and 14th February, 2023. The validity period of NOC expired in May, 2023, whereas the process of recruitment was completed in July, 2023.
- v) In addition, the Secretary, Ministry of Communications abolished 2646 posts lying vacant in PPOD vide letter dated 16th June, 2021 in compliance to Cabinet Committee's above stated instructions. PPOD also filled in the positions against the abolished posts in blatant violation of the Cabinet Committee's instructions and abolition orders of Secretary, MoC.

Audit contends that, as a consequence of non-adherence to recruitment rules, No Objection Certificate of Establishment Division and instructions of Finance Division and Cabinet Committee, PPOD made irregular excess appointments of 314 employees, besides appointments against the abolished posts; thereby affecting the fiscal position of the PPOD.

The matter was reported to the management and PAO during October to November, 2023. It was replied that (i) staff was engaged to complete the process of transferring of accounts to CDNS whereas PPOD is still disbursing pension in 56 GPOs. (ii) the case for grant of funds on new recruitments was taken up with the Finance Division through MoC. (iii) the Establishment Division issued two NOCs for recruitment in different cadres against 3937 posts plus remaining vacant posts. In the light of provision contained in the NOC, some new posts reported by the Circle offices were included in the advertisement (iv) the maximum time of NOC and extensions was consumed by the stay order of Peshawar High Court, therefore, the process was not completed within stipulated time (v) PPOD had sanctioned strength of 31635 as per annual report of 2019-20 and 2646 posts were abolished leaving the sanctioned strength to 28081 as mentioned in PPOD annual report 2021-22.

The reply is not tenable as transfer of saving bank accounts to CDNS and conversion of pension to DCS in 29 GPOs had been completed. The query of Finance Division regarding expenditure on pay and allowances was not addressed. The word "plus" was not included in both NOCs granted by the Establishment Division. Audit contention regarding delay in recruitment process was accepted by the management. No record regarding abolished posts was provided during verification.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to conduct inquiry and fix responsibility on those held responsible. Appointments made in excess of NOC issued by the Establishment Division as well as expenditure on account of pay & allowances be got regularized from competent forums under intimation to Audit. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 04)

1.5.2 Irregular appointments of staff

According to the instructions contained in Para 1.1 (xvii) of Chapter 3 of Esta Code, the appointing authority of the concerned Ministry/ Division / Department/ Organization shall ensure completion of all the procedural & codal requirements in letter & spirit in line with the Recruitment Policy while making recruitments and will be held responsible for illegality, if any. Moreover, Para 236 (1) & (2) of Post Office Manual Vol. IV stipulates that no vacancy will be offered to any candidate on the waiting list after all the vacancies advertised in the press have been filled in fully.

PPOD under the Ministry of Communications, Islamabad made fresh appointments in BPS 1 to 15 under different cadres during FY 2022-23 as detailed in Annexure-IV.

Audit examined the relevant record in twenty-four (24) formations of PPOD and observed that:

- i) All the appointments were made without hiring the services of testing agency and conducting of centralized screening test.
- ii) 255 officials were recruited in excess of the posts advertised in the press and without NOC from the Establishment Division. These posts were got vacated through temporary transfer of employees to other units and the fresh appointees were adjusted against the promotion quota. The transferred employees held liens in their parent offices but fresh recruitments from waiting list were made against these posts. Thus, two persons were appointed against the same post.
- iii) The prescribed quota of women, ex-service men, disability and minorities etc. was also not observed during recruitment process.
- iv) Appointments of drivers in excess of prescribed age limit and without availability of valid driving licenses were made. Similarly, typing speed of LDCs was less than the prescribed limit of 30 words per minute. In some cases, typing test record was not provided.

Audit contends that appointments of employees over & above the sanctioned posts, without obtaining the required NOC from the Establishment Division and non-observance of prescribed quota represents of violation of recruitment rules & procedures.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the process of short listing through testing agencies

was discontinued after Islamabad High Court Judgement. Further, as per clause 13 of the advertisement, the competent authority reserves the right to cancel recruitment process, increase/ decrease the number of posts as per recruitment against any post at any stage without assigning any reason. Furthermore, all the quota were fully observed like ladies, ex-servicemen, disable and minorities etc.

The reply is not tenable as (i) decision of Islamabad High Court was not provided (ii) the recruitment of excess posts was made without NOC from the Establishment Division (iii) audit possesses sufficient evidences for non-observance of prescribed quota.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. DAC directed the management to conduct inquiry, fix responsibility on those held responsible. Appointments made in excess of NOC issued by the Establishment Division as well as expenditure on account of pay & allowances be got regularized from competent forums under intimation Audit. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 157)

B. Procurement related irregularities

1.5.3 Irregular award of contracts to courier companies – Rs 2,868.390 million

According to Rule 18 of the Financial Management and Powers of Principal Accounting Officers Regulations, 2021, “prior consultation with Finance Division shall be made while initiating legislative proposals having financial implications, relating to establishment of funds, revenue, cess, levy, fee, deductions, remissions and agreements”. Further, PPSMB in its 44th meeting held on 7th August, 2019, had approved the EMS Plus and foreign Parcel’s Tariff by adding profit @ 20% of total cost (instead of 10% as proposed) applicable from 1st January, 2019.

The Prime Minister of Pakistan directed all the government departments, as conveyed by Cabinet Division vide its letters dated 20th March, 2018 and 10th April, 2019, to avail the services of Pakistan Post for mailing their domestic and international correspondence to boost up its revenue. Instead of leveraging its substantial workforce, healthy infrastructure and expertise to render these services internally, PPOD outsourced the mailing services to four private companies, namely, M/s. Focus Technology, DHL, Universal Logistics Services, and FedEx Express on 1st April, 2022. Each company offered its rate in dollars for booking of EMS plus articles at postal counters. A payment of Rs. 2,868,389,781 was made to these companies during FY 2022-23.

Audit examined the procurement record and observed that:

- i) Agreements with private companies were executed without prior consultation with the Finance Division, as it had financial implications.
- ii) Payments to courier companies were made from the postal receipts instead of the regular budget head - A03919-4: Payment to Others for Services Rendered. It is pertinent to mention that prior to FY 2019-20, payments to courier companies would be made from the aforementioned regular budget head.
- iii) PPOD’s share was calculated Rs 186,982,673 instead of due share of Rs 228,85,883 @ 20%. Thus, an amount of Rs 41,103,210 was less calculated and realized during FY 2022-23 in violation of the decision of the PPSMB.
- iv) The amount of service charges was deposited into postal accounts instead of crediting to the Federal Consolidated Fund.

Audit contends that outsourcing the core postal services to private companies by PPOD, despite having substantial infrastructure, workforce and heavy investments of Rs 346.864 million during the last five years in Express Mail Track and Trace System (EMTTS) being requirement of Universal Postal Union, reflects the failure of the

management to deliver and accomplish the objectives envisioned by the Prime Minister of Pakistan.

The matter was reported to the management and PAO during October to November, 2023. It was replied that PPOD did not outsource its core function and EMS Plus service was launched with the approval of the executive committee of the Board. As no budget was involved in EMS Plus service, therefore, approval of Finance Division was not obtained. Further, the service charges of PPOD on EMS Plus were required to be calculated on balance amount after deduction of GST @ 15% whereas Audit has calculated the share of PPOD on total collection (including GST).

The reply is not tenable as (i) EMS Plus service was launched without the concurrence of Finance Division (ii) Payment to courier companies was made from revenue of the department instead of regular budget (iii) Service charges of PPOD were not realized according to prescribed formula.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to refer the case to Finance Division keeping in view the audit observations. It further directed to provide record regarding realization of service charges at prescribed rates to audit for verification. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 02 & 21)

1.5.4 Irregular procurement of printing from Pakistan Post Foundation - Rs 155.252 million

According to ECC's decision conveyed by Ministry of Communications vide its letter No. 1(8)/98-P. O, dated 2nd July, 1998, the rates of Printing Corporation of Pakistan (PCP) should be obtained along with rates of Pakistan Post Foundation (PPF) for healthy competition. Further, ECC in its meeting held on 23rd August, 2011 endorsed its earlier decision dated 2nd July, 1998 subject to the condition that a summary examining the whole issue holistically should be brought before the ECC in a subsequent meeting by the Cabinet Division.

Eight (08) formations of PPOD under the Ministry of Communications, Islamabad got incurred an expenditure of Rs 155,251,711 on account of printing of stationery and forms from M/s Pakistan Post Foundation (PPF) during FY 2022-23. Detail is as under:

Sl. No.	Item No	Formations	Amount (Rs)
01	03	PMG Islamabad	7,249,598
02	10	PMG Lahore	58,688,789
03	11	PMG Rawalpindi	29,475,000
04	04	PMG Peshawar	14,728,058
05	05	PMG Quetta	763,800
06	01	PMG Hyderabad	7,270,826
07	04	CCS Karachi	25,934,600
08	05	PMG Karachi	11,141,040
Total			155,251,711

Audit observed that printing of stationery and forms was carried out through M/s PPF without obtaining rates from M/s PCP in violation of ECC's instructions. Further, PPOD also failed to place the issue of printing from PPF before ECC in its next meeting as required under the ECC's instructions.

Audit contends that non-compliance with ECC's decisions and non-adherence to procurement rules deprived PPOD of competitive rates. In fact, PPOD entered into direct contracting with M/s PPF in violation of PPRA rules.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the case was taken up with ECC through Ministry of Communication on 25th October, 2023.

The management accepted the audit contention; however, PPOD did not place the issue before ECC despite lapse of twelve years.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to pursue the case with ECC for re-consideration in the light of PPRA rules, 2004. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) and MFDAC Report for Audit Year(s) 2020-21, 2021-22 & 2022-23 vide para(s) number 1.5.1, 1.5.2 & 44 respectively having financial impact of Rs 299.148 million. Recurrence of same irregularity is a matter of serious concern.

1.5.5 Irregular award of procurement contract to M/s. KPMG – Rs 89.100 million

According to Rule 28 of Public Procurement Rules, 2004, “the date of opening of bids and the last date for the submission of bids shall be the same. Bids shall be opened at the time specified in the bidding documents. The bids shall be opened at least thirty minutes after the deadline for submission of bids”.

DG PPOD under the Ministry of Communications, Islamabad hired the services of M/s. KPMG Taseer Hadi & Company as transaction advisor for conducting feasibility study for up-gradation/revamping/re-engineering of Pakistan Postal Logistics express and mail business on Public Private Partnership (P3) basis. The agreement was signed on 1st January, 2022 at a cost of Rs 89,100,000 with completion period of 40 weeks in four phases.

Audit examined the relevant record and observed that:

- i) As per advertisement, the last date for submission and opening of bids was 6th May, 2021, whereas technical proposals of the bidders were opened on 26th May, 2021.
- ii) As per vetted agreement by Law Division, 35% payment of the total contractual amount was to be paid to Transaction Advisor in phase-I, whereas in signed agreement this amount was enhanced to 45% by altering the vetted agreement.
- iii) The timeframe given to the Transaction Advisor for completion of the job was also altered from 12 weeks to 16 weeks.
- iv) The Transaction Advisor did not complete the feasibility study within 40 weeks and applied for 9-months extension in contract. No penalty clause was included in the agreement to safeguard the public interest as the Transactional Advisor failed to accomplish deliverables within the given timelines.

Audit contends that deviation from the PPRA rules undermined the principle of transparency and fairness. The alteration in the contract clauses damaged the trust and credibility of the department. Audit further maintains that non-completion of feasibility study within stipulated time would result in time and cost overruns of the project.

The matter was reported to the management and PAO during October to November, 2023. It was replied that (i) the bids were opened on 6th May, 2021 and signature of tender committee were available on each envelope (ii) KPMG did not agree on 35% payment in first phase, therefore, draft agreement with 45% payment in first phase was again sent to Law Division which was vetted (iii) as regard enhancement of overall completion period, 40 weeks time was not changed (iv) in order to complete the pending deliverables by the KPMG, 31 weeks extension was given.

The reply is not satisfactory and hence not acceptable as the technical evaluation committee was constituted on 18th May, 2021, therefore, question of signature of tender committee on bid envelopes on 6th May, 2021 did not arise. Further, documentary evidence in support of alteration in terms and conditions of payment as well as completion period within 40 weeks duly vetted by the Law Division were not provided. Moreover, no penalty clause was included in the agreement for delay completion of work.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed to conduct a fact-finding inquiry by CF&AO of Ministry of Communications within 15 days and submit its report to PAO and Audit. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 27)

1.5.6 Irregular procurement of goods and services-Rs 56.314 million

According to Rule 12(2) of Public Procurement Rules, 2004, “all procurement opportunities over three million Pakistani rupees should be advertised on the Authority’s website as well as in other print media or newspapers having wide circulation. The advertisement in the newspapers shall principally appear in at least two national dailies, one in English and the other in Urdu”. Rules 9 ibid further stipulates that a procuring agency shall announce in an appropriate manner all proposed procurements for each financial year and shall proceed accordingly without any splitting or regrouping of the procurements so planned. Further, according to Para 441 of Post Office Manual Vol-II, PMG was competent to make temporary arrangement for conveyance of mail for three months provided that the amount of subsidy is not more than that paid to the previous contractor.

Seven (07) formations of PPOD under the Ministry of Communications, Islamabad made different procurements/agreements for printing work, conveyance of mail, hiring of security companies and made payments to the vendors worth Rs 56,313,662 during the FY 2022-23 as detailed in Annexure-V.

Audit examined the relevant record and observed that:

- i) Three (03) formations made procurements without calling open tenders and in splitting manners to avoid the tendering process and sanction of the next higher authority.
- ii) PMG Multan awarded the contracts for conveyance of mail on five mail lines to M/s PPF @ Rs 31.35, Rs 32.79, Rs 27.13, Rs 26.45 and Rs 28.67. PPF discontinued the services for SME w.e.f 11th December, 2022 and temporarily the contracts on

these mail lines were awarded to M/s Al-Rehman Transport, Lahore @ Rs 95 per KM in violation of the above codal provisions.

- iii) PMG Karachi awarded the procurement contract to the 3rd lowest bidder M/s Shaheen Janitorial Services, Karachi.
- iv) PMG Muzaffarabad floated tenders for hiring security services for one year but the contract was signed for three years in violation of tender documents.
- v) CCS Karachi awarded the procurement contract without advertisement in two national dailies.

Audit contends that bypassing open tendering processes, splitting of procurements, and awarding of contracts to the highest bidders indicate a risk of favoritism, reduced competition and potential financial inefficiencies. Besides, violations in advertising tender notices in national dailies compromise transparency and impact the effective and efficient use of public funds.

The matter was reported to the management and PAO during September to December, 2023. PMG Lahore replied that tender for conveyance of mail could not be made due to non-availability of mail. PMG Multan replied that due to shortage of time and non-receipt of funds under relevant head, emergent arrangements were made without calling tenders. Besides, PPF discontinued the service due to non-payment, therefore, temporary arrangements were made for conveyance of mail. PMG Karachi replied that initial tender was awarded to lowest bidder but due to un-satisfactory performance of vendor, contract was terminated and was awarded to 3rd lowest bidder as the 2nd lowest bidder was disqualified. CCS Karachi replied that tenders for transportation of parcels and stamp boxes were advertised in the print media, whereas in another case the procurement was made on need basis. PMG Muzaffarabad replied that at the time of advertisement, period of contract was correctly mentioned as one year but erroneously written in contract as three years.

The reply is not tenable as the procurements were made in violation of PPRA rules.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to inquire the matter, fix responsibility on those found responsible(s) under intimation to audit. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2018-19, 2019-20, 2021-22 & 2022-23 vide para(s) number 3.2.9, 1.6.7, 1.5.2 & 1.5.3 respectively having financial impact of Rs 225.427 million. Recurrence of same irregularity is a matter of serious concern.

(DPs No. 156, 175)

1.5.7 Illegal award of service contract to M/s. PPF-Rs 51.474 million

According to Rule 12 of Public Procurement Rules, 2004, “all procurement opportunities over three million rupees should be advertised on the Authority’s website as well as in other print media or newspapers having wide circulation. The advertisement in the newspapers shall principally appear in at least two national dailies, one in English and other in Urdu”. Further, Article 21 & 40(C)(2) of PFM Act, 2019 require that all Ministries and Divisions, their attached departments and subordinate offices and all public entities if so, required by their statutes, shall arrange remittances in the FCF without delay. Moreover, according to Clause 7 of the agreement between PPOD and M/s PPF, the Institutional Franchised Postmaster shall maintain out of his own capital and initially credit an amount of rupees twenty-five thousand (Rs 25,000) as prepaid advance at 16 designated GPOs of the Circles/Regions.

M/s PPF was enlisted as Institutional Franchised Postmaster vide agency No IFPO-1-001 for booking of national and international mails. An agreement between PPOD and M/s. PPF was executed for establishment of 1000 Institutional Franchised Post Offices (IFPO) throughout the country on 7th February, 2020.

Audit examined the relevant record and observed that:

- i) M/s. PPF was enlisted with PPOD as Institutional Franchised Postmaster without inviting open tenders.
- ii) DG PPOD executed illegal contract and allowed M/s PPF to deduct an amount of Rs 30,699,358 as commission and Rs 222,102 as incentive from the revenue of the PPOD in violation of PFM Act.
- iii) 831 x Institutional Franchise Postmasters deposited Rs 25,000 each with M/s. PPF instead of 16 designated GPOs under the control of PPOD. It is worthy to mention that M/s PPF did not deposit the collected amount of pre-paid advance amounting to Rs 20,775,000 to PPOD.
- iv) The agreement made with M/s. PPF was not vetted by the Law & Justice Division and was returned to MoC with the request to confirm that requirements of PPRA rules or Public Private Partnership Authority Act were not applicable to the contract or otherwise. The query was not addressed by the PPOD.

Audit maintains that the situation highlights a significant lapse in compliance with public procurement rules and contract management which leads legal consequences for those responsible for the agreement.

The matter was reported to the management and PAO during September to December, 2023. It was replied that (i) the accounting procedures have been revised in line with the postpaid pattern instead of deducting commission at source and would be implemented after signing of the addendum agreement with M/s PPF. (ii) the maintenance of prepaid account at GPO for collection of prepaid advance was not possible due to non-digitalization of postal and account services at GPO, therefore, this account was now maintained at PPF Headquarters. (iii) the current agreement was revised and furnished to Law & Justice Division for vetting which pointed out some observations therein. In compliance of these observations, addendum agreement was drafted and being executed. (iv) M/s PPF was registered as IFPO in accordance with existing scheme duly approved by PPSMB.

The reply is not tenable as PPOD made agreement with PPF without considering the advice of committee who suggested that there was no provision in rules to deduct commission from revenue and advised to seek approval of the competent authority before launching of scheme. PPOD did not realize prepaid advance in contravention of the contract clause. The revised agreement was not vetted by Law & Justice Division, rather, it raised queries regarding execution of contract without observance of PPRA rules & Public Private Partnership Act which was not addressed by PPOD as yet. Further, the existing franchise scheme was introduced for individuals, whereas PPF being an organization did not fall under this scheme.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to submit revised reply in the light of audit observation up to 28th January, 2024. No further progress was intimated till finalization of this report.

Audit recommends that the matter be inquired to fix responsibility against those at fault(s). Audit further recommends that the agreement made with M/s. PPF be reviewed and vetted from the Law & Justice Division under intimation to audit.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2021-22 & 2022-23 vide para numbers 1.6.2 & 1.8.13 respectively having financial impact of Rs 93.639 million. Recurrence of same irregularity is a matter of serious concern.

(DPs No. 11, 26, 38)

C Management of Accounts with Commercial Banks

1.5.8 Unauthorized opening of accounts in National Bank of Pakistan-Rs 20,855.721 million

According to Rule 30 of the Public Financial Management Act, 2019, “the Finance Division, with the approval of the Federal Government, shall notify policy and rules under this Act to prescribe an effective cash management system for all public entities and special purpose funds leading to treasury single account”.

Finance Division allowed PPOD to open three accounts in NBP for PPOD’s agency/commercial functions (PPOD-I), Zero balance account for disbursement of military pension (PPOD-II) and Zero balance account for drawl of budget payments (POD-III) vide its letter dated 25th June, 2021.

Audit examined the record of banking matters and revealed that DG PPOD under the Ministry of Communications opened two more accounts in National Bank of Pakistan without the authorization of Finance Division wherein debit and credit entries of Rs 20,855.721 million were made, details of which are as under:

(Rs in Million)

Description	Title of Accounts	Debit	Credit	Total
Western Union Account	3181169352-National Income Daily Account (profitable)	5978.430	6136.777	12,115.207
Money Order Account	417937-2126-Current Account	4,252.896	4,487.618	8,740.514
Total		10,231.326	10,624.395	20,855.721

Source: Bank Statements

Audit contends that PPOD did not comply with the provision of PFM Act, 2019 and violated the instructions of Finance Division for keeping the public money in the single treasury account.

The matter was reported to the management and PAO during October to November, 2023. It was replied that PPOD performed more than one agency functions and had several agency partners. The funds were provided by Western Union rather than the Government of Pakistan as per Section 4(4) of Treasury Single Account Rules, 2020. The opening of WU account in NBP did not violate the rules of GoP as the PFM Act was applicable to public money only; therefore, there was no legal binding to obtain ex-post facto approval of Finance Division.

The reply is not tenable as the Western Union is one of the agency functions performed by PPOD on commission basis for which Finance Division had already allowed

opening of commercial bank account (PPOD-I). Moreover, stance of PPOD regarding opening of separate money order account was not provided.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management that case regarding opening of accounts for Western Union & Money Orders be referred to the Finance Division for getting approval under intimation to audit. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 01)

1.6 Value for Money and Service Delivery Issues

1.6.1 Recurring loss due to retention of un-remunerative post offices – Rs 492.526 million

According to Para 891(1) of Post Office Manual Vol-IV, no experimental Post Office may be sanctioned for a period longer than six months at a time and no extension of experimental period may be sanctioned unless there is a reasonable hope that the office will prove self-supporting at the end of two years.

PPOD under the Ministry of Communications, Islamabad opened 8,989 sub-offices and EDBOs throughout the country for provision of postal services to the general public, out of which some post offices were opened on the guarantee of the district government and general public.

Audit examined the record of thirty-nine (39) formations of PPOD on test check basis and observed that the department sustained a loss of Rs 492,583,476 during FY 2022-23 due to retention of 1,160 un-remunerative post offices under the administrative jurisdiction of respective Divisional Superintendents. Further, 51 guaranteed post offices were running in losses against which an amount of Rs 24,858,359 was not recovered from the guarantors.

Audit contends that due to imprudent and unjustified opening of post offices, the government incurred a huge loss instead of adding value for money and improving the service delivery.

The matter was pointed out to the management during August to December 2023. It was replied that an amount of Rs 57,000 had been recovered from guarantors and efforts were underway to recover the remaining amount. During verification, the said amount was verified leaving, an outstanding balance of Rs 492,526,476. The amount of the para was accordingly reduced to the extent of verified amount.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024.

The DAC directed the management to devise a strategy for making the un-remunerative post offices as profitable, besides recovery of loss from the guarantors of post offices under intimation to audit. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2020-21 and 2022-23 vide para number 1.8.4 and 1.8.6 having financial impact of Rs 626.700 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 121)

1.7 Receivables

1.7.1 Non-recovery of penalties – Rs 661.788 million

According to Para 8 of agreement executed between PPOD and PPF on 07.02.2020, the institutional Franchise Postmaster shall keep full and proper books of accounts electronically or manually showing neatly and clearly all transactions, following the prescribed procedure relating to maintenance of accounts correctly and shall remit regularly at its own expenses all money, due to Pakistan Post on very next working day from the transaction at the prescribed hours. In case failure/delay to deposit on the next day all moneys and cash received on account of booking of articles, a penalty equal to the amount due shall be levied per day of default and recovered from the Institutional Franchise postmaster.

PPOD under the Ministry of Communications, Islamabad made agreements with M/s PPF for opening of 1000 Institutional Franchise Post Offices (IFPOs) and different service providers for supplies, printing, transportation of mail and hiring of services of security guards as detailed in Annexure- VI. Accordingly, penalty clauses were incorporated in the agreements for non-completion of tasks within given timeframe.

Audit examined the relevant record and observed that:

- i) M/s PPF did not deposit the cash receipt with PPOD on next day of collection as per terms & conditions of agreement. The said cash was deposited with a delay of 1 to 36 days but penalty amounting to Rs. 655,465,875 (sale amount Rs 32,868,932) was neither imposed nor recovered by the PMG Lahore.
- ii) In five (05) formations of PPOD, the service providers failed to complete the given tasks within stipulated period but penalty amounting to Rs 6,343,810 was neither imposed nor recovered.

Audit is of the view that failure to impose and recover the penalty for the delayed deposit of cash, non-completion of tasks within stipulated timeframe indicates financial indiscipline and weak contract management within the PPOD.

The matter was reported to the management and PAO during September to December, 2023. It was replied that (i) revised agreement, accounting procedure and division of payment mechanism was underway with M/s PPF (ii) an amount of Rs 21,194 had been recovered and efforts were underway to recover the remaining amount. During verification, the recovered amount was verified, leaving an outstanding balance of Rs 661,788,491. The amount of the para was accordingly reduced to the extent of verified amount.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to finalize the revised agreement within one month and get it vetted from Law & Justice Division. It further directed to recover the due amount of penalty up to 15th February, 2024 and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DPs No. 41 & 150)

1.7.2 Non-recovery of printing and establishment charges – Rs 467.679 million

According to Article 5 of PT&T, IAC Volume-I and Para 8 of GFR Volume-I, it is the duty of the administrative department concerned to see that the dues of Govt. are correctly and promptly assessed, collected and paid into the treasury.

Chief Controller of Stamps Karachi got printing of all types of non-postal stamps from National Security Printing Corporation (NSPC) on behalf of various departments of Federal & Provincial Governments and raised the debit bills of printing and establishment cost for recovery from concerned organizations.

Audit observed that Chief Controller of Stamps, Karachi did not recover printing and establishment charges of Rs 531,072,125 from various departments of Federal and Provincial Governments during FY 2022-23.

Audit contends that failure to recover printing and establishment charges raises serious concerns regarding financial oversight and adherence to rules. This lapse not only compromises the timely collection of government dues but also poses a risk to financial discipline and accountability.

The matter was reported to the management and PAO from September to December, 2023. It was replied that an amount of Rs 63,393,334 had been recovered and efforts were underway to recover the remaining amount. During verification, the recovered amount was verified, leaving an outstanding balance of Rs 467,678,791. The amount of the para was accordingly reduced to the extent of verified amount.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to recover the remaining amount and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DPs Nos.178 & 180)

1.7.3 Non-recovery of rent, pension contribution and postage charges from M/s PLICL – Rs 455.699 million

According to Article 5 of PT&T, IAC Volume-I and Para 8 of GFR Volume-I, it is the duty of the administrative department concerned to see that the dues of Govt. are correctly and promptly assessed, collected and paid into the treasury

A Strategic Alliance Agreement was signed between Pakistan Post Office Department and Postal Life Insurance Company Limited on 1st July, 2021. As per agreement, PPOD will provide support to PLICL for the use of physical assets, manpower resources and any other facilities as may be necessary during transition phase.

Audit examined the relevant record for the FY 2022-23 and observed that:

- i) 120 official and residential accommodations of PPOD were being utilized by the PLICL under different Circles of PPOD without executing lease agreements due to which rent amounting to Rs 148,584,096 could not be realized from PLICL.
- ii) 512 employees of PPOD were on deputation to PLICL but their pension contributions amounting to Rs 88,865,760 was not received from PLICL.
- iii) PPOD did not recover postage charges of Rs 218,249,999 from PLICL for transmission of mail after the portfolio transfer. The postage charges were worked out on the basis of management cost of PLI for the FY 2020-21.

The matter was reported to the management and PAO from October, to November, 2023. It was replied that a draft agreement was sent to PLICL for signature and recovery of rent. Further, all PMGs had been directed to recover the outstanding postage charges.

The management partially accepted the audit contention; however, the lease agreement was not finalized despite lapse of three years due to which the rent could not be realized. Further, no reply could be furnished for recovery of pension contribution.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to finalize the lease agreement with PLICL within 15 days. It further directed to recover the amount of postage charges and pension contributions from PLICL and get it verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2021-22 & 2022-23 vide para(s) number 1.7.2 & 1.7.3 respectively having financial impact of Rs 442.129 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 20)

1.7.4 Non-deduction of taxes at source – Rs 465.424 million

According to Section 153(1)(b) of Income Tax Ordinance 2001, income tax @ 3% of the gross amount payable was required to be deducted from vendors in the case of transport services, freight forwarding services, air cargo services and courier services etc. Further, according to Serial No. 32 of second schedule of the Sales Tax on Services Ordinance relating to Islamabad Capital Territory, 15% sales tax on services was required to be deducted from vendors for provision of transportation through pipeline and conduit services.

PPOD under the Ministry of Communications, Islamabad made payments to different contractors, vendors, saving bank account holders and deducted taxes on behalf of FBR and provincial sales tax authorities.

Audit observed that nine (09) formations of PPOD did not deduct income tax, education cess on income tax and provincial sales tax on services amounting to Rs 465,423,668 during FY 2022-23. The detail is as under:

Sl. No.	PDP No	Name of Formation	Description	Amount (Rs)
1	10-24	DG PPO, Islamabad	Non-deduction of income tax at source	91,397,343

2	22-24	DG PPO, Islamabad	Non-deduction of provincial sales tax on services	367,789,976
3	123-24	PMGs Rawalpindi, Quetta, Karachi & GPOs Karachi, Bahawalnagar, Mirpur AJK & Gulshan e Iqbal, Karachi	Non-deduction of Income Tax/GST	1,818,191
4	199-24	PMG AJK, Muzaffarabad	Non-deduction of Education Cess on Income Tax	4,418,158
Total				465,423,668

Audit opines that non-deduction of taxes at prescribed rates from contractors, vendors and saving bank account holders represent a potential tax liability for the PPOD and can result in penalties and interest charges for non-compliance with tax regulations.

The matter was reported to the management and PAO during August to December, 2023. It was replied that Income Tax and Sales Tax for the FY 2020-21 and FY 2021-22 were transferred to FBR by the courier companies, whereas the Punjab Sales Tax on Services Act, 2012 was not applicable on services rendered by M/s PPF. Further, the case has been taken up with FBR for refund of education cess. In other cases, it was replied that the amount of tax would be deducted.

The reply is not tenable as documentary evidence in support of deduction and transfer of taxes from the payments made to courier companies and exemption for non-deduction of taxes from PPF were not provided during verification.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to provide documentary evidence regarding deduction and transfer of income/sales tax to FBR for verification. It further directed to pursue the case with FBR regarding refund of education cess. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2018-19, 2019-20, 2021-22 & 2022-23 vide para(s) number 3.4.7 to 3.4.9, 1.8.3, 1.7.5 to 1.7.6 & 1.7.4 respectively having financial impact of Rs 484.808 million. Recurrence of same irregularity is a matter of serious concern.

(DPs No. 10, 22, 123 & 199)

1.7.5 Non-recovery of postal dues -Rs 268.254 million

According to Article 5 of PT&T, IAC Volume-I and Para 8 of GFR Volume-I, it is the duty of the administrative department concerned to see that the dues of Govt. are

correctly and promptly assessed, collected and paid into the treasury.

PPOD under the Ministry of Communications executed different kinds of agreements for provision of services with various departments, agencies, and autonomous bodies and received service charges on monthly basis according to agreed rates. Moreover, PPOD also rented out its properties to different organizations and private persons.

Audit observed that forty-four (44) formations of PPOD did not recover the postal dues on account of courier services & rent from tenants amounting to Rs 301,153,064 during FY2022-23. The detail is as under:

PDP No.	Name of Formation	Description	Amount (Rs)
34-24	GPO Lahore	Non-recovery of commission charges from utility companies	22,464,272
51-24	Controller IMO (P), Karachi	Non-recovery from foreign postal administrations	98,395,112
82-24	41 formations (Annex-VII)	Non-recovery of postal dues	175,259,770
177-24	CCS, Karachi	Non-recovery of rent from M/s PPF	5,033,910
Total			301,153,064

Audit contends that due to weak financial management, PPOD could not recover postal dues despite provision of postal services to different organizations.

The matter was reported to the management and PAO during August to December, 2023. It was replied that an amount of Rs 23,519,898 had been deposited into FCF, whereas an amount of Rs 9,379,110 was not due. During verification, an amount of Rs 32,899,008 was verified, leaving an outstanding balance of Rs 268,254,056. The amount of the para was accordingly reduced to the extent of verified amount.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to recover the outstanding amount and get the property vacated from M/s PPF under intimation to Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2018-19, 2019-20, 2021-22 & 2022-23 vide para(s) number 3.4.3, 1.8.2, 1.7.3 & 1.7.2 respectively having financial impact of Rs 861.040 million. Recurrence of same irregularity is a matter of serious concern.

(DPs No. 34,51, 82 & 177)

1.7.6 Non-encashment of postal orders and deposit into treasury – Rs 90.275 million

According to Para 325 of the Post Office Guide, before a postal order can be paid, the name of the payee and the name of the office of payment must be filled in and the order

must be properly receipted. Postal order be crossed, payment will be made through a bank and if the name of bank be added, payment will be made only through that bank.

DG PPOD under the Ministry of Communications, Islamabad published an advertisement in print media for recruitment of vacant posts. As per Clause 5 of the advertisement, each application form shall be accompanied by a postal order or ACG-17 receipt worth Rs 500 in the name of respective authority for each vacancy.

Audit observed that PPOD received 180,549 applications along with Postal Orders/ACG-17 receipt amounting to Rs 90,274,500 (180,549 x Rs 500). The said postal orders were neither encashed nor deposited into Federal Treasury and were still lying with the postal authorities.

Audit contends that non-encashment of postal orders and non-deposit into treasury raises questions about transparency and proper handling of public monies.

The matter was reported to the management and PAO during October and November, 2023. It was replied that an amount of Rs 20,811,177 was received on ACG-67 and deposited into treasury. All the Circle Offices had been directed to en-cash the postal orders immediately and amount thereof be deposited into treasury.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to get the postal orders en-cashed within 30 days and deposit into FCF under intimation to Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 48)

1.7.7 Illegal retention of amount of taxes - Rs 189.311 million

According to Para 13 of the Accounting Procedure issued by DG PPOD vide letter dated 21st December, 2022, the Chief / Senior Postmaster of collecting GPO will daily transfer the whole amount of GST & withholding tax in the designated account No. 4178563145 titled "Pakistan Post Agency Functions" maintained with NBP through payment advice, after issuance of proper sanction memo. Moreover, as per revised Accounting Procedure for collection of customs duty issued by DG PPOD dated 4th July, 2023, cash collection available with the GPOs may be deposited into the bank account separately mentioning dedicate / proper code number opened specifically keeping in view the nature of collection i.e. sales tax on CDL/CDP and custom duty on CDL/CDP after deduction of service charges.

PPOD under the Ministry of Communications, Islamabad collected taxes on different postal services and payments made to different contractors and vendors on behalf of FBR and provincial sales tax authorities.

Audit observed that twenty-one (21) formations of PPOD collected an amount of Rs 247,702,870 on account of income tax, sales tax and custom duty, out of which an amount of Rs 64,534,610 was transferred to the designated bank account No. 4178563145 titled “Pakistan Post Agency Functions”, whereas an amount of Rs 189,310,585 was illegally retained in the departmental treasuries. The detail is as under:

PDP No.	Name of Formation	Description	Amount Collected (Rs)	Amount Transferred (Rs)	Amount Retained (Rs)
77-24	21 Formations (Annex-VIII)	Non-deposit of sales/ income tax	107,279,175	47,824,436	65,597,064
78-24	DG PPO	Non-deposit of custom duty	140,423,695	16,710,174	123,713,521
Total			247,702,870	64,534,610	189,310,585

Audit contends that non-transfer of taxes to concerned tax authorities resulted in misreporting of the tax receipts in the financial statements of the PPOD, besides reflection of weak financial order and internal control structure.

The matter was reported to the management and PAO during August to December, 2023. It was replied that the custom duty of Rs 56,804,854 and sales tax of Rs 30,896,477 stand transferred to FBR.

The reply is not tenable as no documentary evidence was provided regarding deposit of the said amount into designated account of NBP and its subsequent transfer to FBR.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to deposit the amount of taxes/custom duty and record thereof be provided to audit for verification. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DPs No. 77 & 78)

1.7.8 Non-deposit of recovered amount into FCF–Rs 158.682 million

According to Para 7(1)(s) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, Principal Accounting Officer is responsible for

proper record of all assets, liabilities, commitments, revenues and expenditures to be maintained under the relevant rules, regulations, procedures and approved format.

PPOD under the Ministry of Communications, Islamabad made disbursement of Rs 156,000.000 million on account of military pension as agency function through post offices on behalf of the Finance Division and Controller Military Accounts (CMA). Thirty-four (34) post offices made recoveries of Rs 158,681,719 on account of overpayments as well as misappropriations during FY 2022-23.

Audit observed that PPOD did not deposit the recovered amount into FCF and was retained in the postal treasuries till finalization of this report.

Audit contends that due to weak financial discipline and internal controls PPOD failed to deposit the recovered amount into FCF promptly as required under the PFM Act, 2019.

The matter was reported to the management and PAO during August to December, 2023. Some of the formations replied that amount recovered from military pensioners had been deposited into agency functions account maintained with NBP. In some cases, it was replied that recovered amount had been utilized for payment of pension, whereas in some cases amount was still lying in postal treasuries.

The reply is not tenable as the recovered amount was not transferred to FCF.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to deposit the recovered amount into FCF and get it verified from audit.

Audit recommends implementation of DAC directives.

(DP No. 110)

1.7.9 Unauthorized deduction of withholding tax - Rs 37.410 million

According to Section 236 (4) of Income Tax Ordinance 2001, government entities are exempted from payment of withholding tax.

DG PPOD under the Ministry of Communications, Islamabad opened a national income daily account No. 3181169352 in National Bank of Pakistan (NBP), Islamabad for receiving foreign remittances from western union. PPOD earned profit of Rs 187,319,052 on deposits during FY 2022-23.

Audit examined the relevant record and observed that the bank made unauthorized deduction of withholding tax of Rs 37,410,483 on profit as income of the federal government was exempted from tax.

Audit opines that PPOD did not take up the matter with the NBP HQ or SBP against unauthorized deduction of withholding tax which reflects weakness of the financial discipline.

The matter was reported to the management and PAO during October to December, 2023. It was replied that the matter was taken up with the NBP to reimburse the amount of withholding tax.

The management accepted the audit contention; however, the issue was not resolved as yet.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to pursue the case with NBP for reimbursement of withholding tax amount deducted on profit under intimation to Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 16)

1.7.10 Non-recovery of overpaid amount from military pensioners- Rs. 28.092 million

According to Article 5 of PT&T, IAC Volume-I and Para 8 of GFR Volume-I, it is the duty of the administrative department concerned to see that the dues of Govt. are correctly and promptly assessed, collected and paid into the treasury.

Twenty-eight (28) formations of PPOD under the Ministry of Communications, Islamabad made an overpayment of Rs 30,618,578 on account of inadmissible increases in pension, wrong calculation of arrears of pension and payments of pension exceeding the admissible rates to various military pensioners.

Audit observed that PPOD did not recover the overpayments made to military pensioners till 30th June, 2023 as detailed in Annexure-IX.

Audit contends that due to weak financial discipline and internal controls PPOD failed to recover the overpayments.

The matter was reported to the management and PAO during August to December, 2023. It was replied that an amount of Rs 2,526,084 had been recovered and efforts were underway to recover the remaining amount. During verification, the recovered amount was verified, leaving an outstanding balance of Rs 28,092,494. The amount of the para was accordingly reduced.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024.

The DAC directed the management to recover the remaining amount and get it verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 93)

Others

1.8.1 Irregular/unauthentic disbursement of military pension – Rs 156,000.00 million

As per Para (xiii) of the pension payment procedure issued by the Finance Division vide letter dated 12th May, 2022, a monthly payment account would be provided by GPOs to the PPOD (H/Q) along with request for next month release. The payments made from pension account maintained in NBP would not be made part of monthly accounts. However, GPOs shall render lists of payees along with amounts paid to Director of Accounts, PPOD for record and reconciliation.

DG PPOD under the Ministry of Communications, Islamabad opened pension account No. 418059527 in the National Bank of Pakistan (NBP) on the instructions of Finance Division (Budget Wing) in July, 2022. An amount of Rs 156,000.000 million was transferred in this account for payment to military pensioners during FY 2022-23 as detailed in Annexure –X.

Audit examined the relevant record and observed that:

- i) GPOs did not provide authenticated lists/figures of funds released for military pension and disbursement thereof duly authenticated by the concerned PMGs to DG PPOD.
- ii) GPOs also did not share the list of pension payments with Military Accountant General (MAG) for reconciliation as required under Para (xvi) of the procedures.
- iii) The comparison of data of military pension payments of DG PPOD and SAP revealed a huge variation. The SAP data showed excess payment of Rs 75,569,765 than authorization of funds in respect of some GPOs, whereas in some GPOs an amount of Rs 1,932,701,040 was shown as savings. The GPOs did not take pain to reconcile the variation with Director of Accounts, PPOD Lahore on monthly basis.
- iv) Finance Division released funds of Rs 156,327.158 million and against this allocation an amount of Rs 161,443.686 million was paid to pensioners. Thus, an amount of Rs 5,116.528 million was disbursed in excess of the allocation.
- v) The GPOs withdrew excess pension funds from NBP account without actual requirement and retained in the postal treasuries.
- vi) Date noting work of disbursement of pension was not made in the ledgers. Therefore, chance of double payments cannot be ruled out.

- vii) Recoveries made on account of overpayments of military pension were not deposited into FCF and were kept in the postal treasuries.
- viii) Pension payment orders of some pensioners were not available on record but pension was disbursed to them regularly.
- ix) Life/non-remarriage certificates were not obtained from the pensioners.
- x) The signatures of pensioners were not obtained on Post Saving Bank (PSB) 7/8 (withdrawal forms) in some cases.

Audit contends that due to weak financial discipline and non-adherence to the prescribed procedures, GPOs disbursed irregular pension payments without veracity of required documents and adequate supporting evidences which raise concerns about transparency in the pension payment process.

The matter was reported to the management and PAO during August to December, 2023. It was replied that reconciliation of military pension payment was underway and all PMGs had been directed to maintain comprehensive record of all pension payments, including authenticated lists of payees, date noting work and pension payment orders.

The management accepted the audit contention; however, no action was taken to reconcile and authenticate the pension payments till finalization of this report.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to reconcile all pension payment figures pointed out by audit and the reconciled record be got verified from Audit. It further directed to take action against the persons responsible for making payment without availability of PPOs, date noting, life/non-marriage certificates and signatures of pensioners on PSB 7/8 forms under intimation to Audit.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report(s) for Audit Year(s) 2018-19 to 2022-23 vide para(s) number 3.2.1, 1.9.3, 1.9.1 to 1.9.3, 1.8.2 & 1.8.5 respectively having financial impact of Rs 39,499.923 million. Recurrence of same irregularity is a matter of serious concern.

(DPs No. 18, 19, 111, 125, 154 & 155)

1.8.2 Non-clearance of liabilities –Rs 17,213.568 million

According to Para 7(1)(s) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, Principal Accounting Officer is responsible for proper record of all assets, liabilities, commitments, revenues and expenditures to be maintained under the relevant rules, regulations, procedures and approved format.

PPOD under the Ministry of Communications, Islamabad hired the services of M/s 360 Technologies for maintenance of express mail, track & trace system, international postal services, mobile delivery update & complaint management system with call center. PPOD also hired postmasters for running EDBOs and printed revenue documents through NSPC. PPOD also performed agency function for collection of bills on behalf of different utility companies. All these activities involved huge expenditure and payables on the part of PPOD as detailed in Annexure - XI.

Audit examined the relevant record and observed that:

- i) PPOD did not pay service charges to M/s 360 Technologies as per terms and conditions of contract and created an accumulative liability of Rs 108,727,208 as on 30th June 2023, due to which the vendor claimed a 2% penalty of Rs 103,346,145 as per clause 31.4 and 34 of the agreement.
- ii) PPOD collected utility bills on behalf of utility companies but did not transfer the amount of Rs 16,471,000,000 to respective utility companies till date of audit.
- iii) Chief Controller of Stamps, Karachi, did not pay an amount of Rs 633,840,699 on account of printing of revenue documents to NSPC; thereby creating liability for PPOD.

Audit contends that due to weak financial discipline PPOD did not make payments to vendors, postmasters and utility companies and created a substantial financial liability.

The matter was reported to the management and PAO during September to December, 2023. It was replied (i) the payment to vendor will be made shortly (ii) the matter is being pursued with Finance Division through MoC for release of funds to clear the outstanding liabilities of utility companies. (iii) due to shortage of funds liabilities of previous year did not clear.

The reply is not tenable as the outstanding liabilities were not cleared by the PPOD.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to submit revise reply in case of M/s 360 Technologies keeping in view the audit observation. It further directed to clear the pending liabilities of utility companies and M/s NSPC and record thereof be got verified from Audit. No further

progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para number 1.8.1 having financial impact of Rs 25,839.500 million. Recurrence of same irregularity is a matter of serious concern.

(DPs No. 28, 129 & 182)

1.8.3 Non-deposit of amount drawn through LOC into FCF-Rs 4,906.995 million

According to Articles 22 and 23 of the PFM Act, 2019, “the operation of the Federal Consolidated Fund and the Public Account of the Federation shall vest in the Finance Division under the overall supervision of the Federal Government and no authority shall incur or commit any expenditure or enter into any liability involving expenditure from the Federal Consolidated Fund and Public Account of the Federation until the same has been sanctioned by a competent authority duly empowered”. According to the old cash management regime of PPOD, the Director Accounts Postal Accounts, Lahore would circulate to all GPOs and heads of all Postal Circles and would prescribe maximum and minimum limits to be retained for official business under Articles 78 and 81 of PT & T IAC Vol-1.

The Finance Division restricted/disallowed PPOD’s direct access to the Central Account-1 (non-food) and discontinued practice of withdrawal of funds through letter of credit (LoC) with effect from 1st August, 2021 vide its letter dated 25th June, 2021.

Audit examined the relevant record and observed that:

- i) The maximum cash balance limit in shape of imprest money drawn by 85 GPOs (excluding the amount lying in more than 4,000 sub post offices) through LoCs amounting to Rs 2,165,520,000 was available with PPOD as on 30th June, 2022 which was not deposited into Account No. 1 (non-food).
- ii) GPO Islamabad withdrew cash of Rs1,760 million through LoC and transferred it to seven (07) GPOs of AJK Circle. The GPOs retained the said amount till end of June, 2022 instead of depositing into Account No. 1 (non-food) despite the fact that the new cash management regime was introduced and the GPOs and its sub-offices were required to close their bank accounts opened in NBP.

- iii) PPOD disbursed an amount of Rs. 978,990,434, drawn from Account No. 1 (non-food) through LoC, on behalf of Western Union for the period starting from 1st July, 2022 to 25th August, 2022. PPOD placed the amount, reimbursed by Western Union, in the National Bank of Pakistan instead of crediting to Account-1 (non-food).
- iv) GPO Lahore recovered an amount of Rs 2,485,176 on account of adjustment of emergent advance and recovery made against loss and fraud cases which was not deposited into Account No. 1 (non-food).

Audit contends that failure to deposit imprest money, retention of substantial cash balances, and recovery made by GPO Lahore reflects weak financial discipline and non-adherence to the new cash management regime.

The matter was reported to the management and PAO during August to December, 2023. It was replied that (i) non-deposit of amount drawn through LoC into FCF was a deviation by field formations. The cash limits were fixed by PMGs and they would be in a better position to clarify disposal of such cash (ii) PMG, Muzaffarabad had been directed to deposit the LoC amount into FCF (iii) the disbursed amount on behalf of Western Union from 1st July, 2022 to 25th August, 2022 stands transferred to Account No.1.

The reply is not tenable as (i) Finance & Revenue Account of the PPOD for the FY 2022-23 showed that cash amounting to Rs 6,593 million was lying in postal treasuries as on 30.06.2023 (ii) the audit stance has been accepted by the management in case of PMG Muzaffarabad but the amount was not transferred into Account No. 1 as yet. (iii) no documentary evidence regarding transfer of amount into FCF was provided for verification.

The matter was also discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to constitute a high-level committee to reconcile the figures and subsequently transfer the amount to FCF under intimation to Audit. No further progress was reported till finalization of this report.

Audit recommends taking immediate corrective actions, including strict adherence to the new cash management regime, prompt deposit of imprest money and recovered amounts into Account-1 (non-food) and closure of bank accounts opened after the changed cash management regime.

(DPs No. 03, 05, 08, 43, 79 & 135)

1.8.4 Unauthorized utilization of funds - Rs. 4,071.223 million

According to para 7 (I) of the Financial Management and Powers of Principal Accounting Officers Regulations, 2021, the Principal Accounting Officer shall be responsible to adhere to and enforce the principles of financial propriety including the compliance of laws, rules, regulations, maintain high standard of prudence, vigilance due diligence and ensuring value for money while incurring expenditure and collecting government receipts.

PPOD under the Ministry of Communications, Islamabad performed various agency and core functions related to disbursement of military pension, collection of utility bills, money orders and revenues through provision of postal services.

Audit examined the relevant record and observed that thirty-seven (37) formations of PPOD collected an amount of Rs 4,071.223 million on account of LoC, utility bills collection, money orders and postal revenue. PPOD did not deposit these collections into FCF and designated agency functions accounts; rather, these amounts were utilized for making different agency payments without authorization. The detail is as under:

(Rs in Million)			
Sl. No.	PDP No.	Description	Amount
1	53-24	Unauthorized payment of military pension and utility companies without authorization of funds	859.894
2	54-24	Unauthorized payment to military pensioners from postal receipts	81.517
3	132-24	Unauthorized utilization of funds allocated through LOC	1755.592
4	133-24	Unauthorized utilization of collection of money orders	581.923
5	149-24	Unauthorized utilization of revenue for other payments	139.121
6	164-24	Unauthorized utilization of revenue towards money order payments	653.176
Total			4,071.223

Audit contends that unauthorized payment out of postal revenue, agency function receipts and LoC reflect weakness of financial discipline and internal control structure.

The matter was reported to the management and PAO during August to December, 2023. It was replied that due to non-availability of accounting procedures, the payments of military pension, money orders and Western Union were made from utility bills collection and postal receipts. However, a high-powered committee has been constituted for reconciliation of these payments.

The reply is not tenable as these payments were made without authorization of funds.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to conduct inquiry and fix responsibility on those found responsible for making payments without authorization of funds. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives / transfer of the amounts to their respective heads of accounts.

(DPs No. 53, 54, 133, 132, 149 & 164)

1.8.5 Non-deposit of revenue into the Federal Consolidated Fund –Rs 2,861.952 million

Article 21 & 40(C)(2) of Public Financial Management Act, 2019 requires that all Ministries and Divisions, their attached departments and subordinate offices and all public entities if so, required by their statutes, shall arrange remittances in the Federal Consolidated Fund (FCF) without delay, of all revenues as required by Article 78 of the Constitution and the Controller General of Accounts shall be responsible for its proper accounting. The revenue collection offices shall not retain or appropriate the collected amount to meet departmental expenditure except through budgetary mechanism as provided under articles 80 to 83 of the Constitution.

PPOD under the Ministry of Communications, Islamabad collected postal revenue of Rs 7,547.005 million during FY 2022-23 through sale of postage stamps, booking of registered letters/parcels, franking machine and commission from agency functions etc.

Audit observed that forty-nine (49) formations of PPOD did not deposit/transfer the collected postal revenue of Rs 3,121,739,025 into the Federal Consolidated Fund as detailed in Annexure-XII. Audit further revealed that the formations utilized the postal revenue without authorization to cover various departmental expenses such as payments of Western Union, money orders and utility companies.

Audit contends that non-transfer of postal revenue into Federal Consolidated Fund reflects weak financial discipline and misreporting of the postal receipts in the financial statements of PPOD, for PPOD recognized the postal receipts in the financial statements but did not transfer to the FCF as required under PFM Act, 2019.

The matter was reported to the management and PAO during August to December, 2023. It was replied that an amount of Rs 92.080 million had been deposited into FCF, whereas an amount of Rs 167.707 million was not due and efforts were underway to

recover the remaining amount. During verification, an amount of Rs 259.787 million was verified, leaving an outstanding balance of Rs 2,861.952 million. The para was accordingly reduced to the extent of verified amount.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to submit revise reply keeping in view the audit observation. The amount involved be transferred to FCF and record be got verified from audit up to 31st March, 2024. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives/conduct of inquiry into the matter to fix responsibility.

Note: The issue was also reported earlier in the Audit Report for Audit Year 2022-23 vide para number 1.8.3 having financial impact of Rs 1,704.920 million. Recurrence of same irregularity is a matter of serious concern.

(DP No. 81)

1.8.6 Unjustified drawl of pension funds and excess expenditure – Rs 2,507.031 million

According to Rule 7(1)(L) of the Financial Management and Powers of Principal Accounting Officers Regulations 2021, the Principal Accounting Officer shall be responsible to sanction expenditure as per the delegated financial powers. Such sanctioning of expenditure shall not exceed the allocated budget. Prior to approving of expenditure sanction, principal accounting officer shall ensure that the required budget is available in the relevant head of account. Sanctioning of expenditure shall be based on the purpose for which the funds are allocated.

Finance Division granted special permission to draw funds for payment of employee related expenditure and pension to defense forces from Account No. 1 (non-food) vide its letter dated 30th June, 2022. DG PPOD made authorization of funds for the month of June paid in July, 2022 and the Director Accounts Pakistan Post, Lahore issued letter of credit in favour of all GPOs for drawl of funds.

Audit examined the relevant record and observed that:

- i) 47 GPOs withdrew funds of Rs 9,575.164 million from Account No. 1 (non-food) through LoC, and disbursed Rs 7,987.071 million on account of pension; thereby withdrawing excess amount of Rs 1,588.093 million without justification and actual requirement. The surplus amount was required to be returned to Account No. 1 (non-food).
- ii) 36 GPOs withdrew funds of Rs 5,182.483 million from Account No. 1 (non-food) and disbursed Rs 6,101.421 million on account of pension; thereby making

unexplained excess payment of
Rs 918.938 million.

Audit maintains that withdrawal of significant amounts from Account No. 1 (non-food) without proper justification or adherence to budgetary allocations raises concerns about financial discipline. The unexplained excess payments highlight a lack of oversight in the approval and sanctioning of expenditure.

The matter was reported to the management and PAO during August to December, 2023. It was replied that reconciliation of military pension payment was under process and after completion of reconciliation, the source of excess expenditure, if any, would be identified. No stance was provided regarding withdrawal of surplus amount from FCF.

The reply is not tenable as PPOD failed to make timely reconciliation and identify the items of excess expenditure.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to reconcile the figures keeping in view the audit observation and record thereof be got verified from Audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives/conduct of inquiry into the matter to fix responsibility.

(DPs No. 25, 97, 101, 102, 128, & 142)

1.8.7 Illegal retention of blank certificates – Rs 2,097.329 million

According to Finance Division (Budget Wing) letter No.17(1) GS-1/2012-Vol-II-65 dated 13th January, 2021, the work of Special Saving Schemes, Certificates and Saving Bank Accounts was withdrawn from PPOD and it was directed that all such accounts be transferred to Central Directorate of National Savings.

PPOD under the Ministry of Communications, Islamabad was operating saving bank schemes as agency function on behalf of Finance Division on commission basis. This function was withdrawn from the PPOD and transferred to CDNS.

Audit observed that the blank defence saving certificates, special saving certificates and regular income certificates of different denominations amounting to Rs 2,097,328,700 were lying in the stock of PPOD and were not transferred to CDNS despite close of this scheme by the Finance Division.

Audit opines that retention of blank certificates can be misused and warranted for loss, fraud or theft.

The matter was reported to the management and PAO during August to December, 2023. It was replied that all blank savings certificates would be returned to CDNS after compilation of record.

The reply is not acceptable as blank saving certificates were not transferred to CDNS despite lapse of a considerable time.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to transfer the blank certificates to CDNS and record thereof be got verified from Audit up to 30.03.2024. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives

(DP No. 80)

1.8.8 Unjustified Western Union Payments out of postal receipts and non-adjustment – Rs 1,452.594 million

The Finance Division restricted/disallowed PPOD's direct access to the Central Account-1 (non-food) and discontinued practice of withdrawal of funds through letter of credit (LoC) with effect from 1st August, 2021 vide its letter No.1(10) S.O (TSA)/350/2021 dated: 25th June, 2021.

DG PPOD under the Ministry of Communications, Islamabad instructed all PMGs vide its letter dated 16th June, 2023 that GPOs could withdraw money and make payments from July to November, 2022 against Western Union Account and adjust/charge the same on receipt side of the summary. Accordingly, 76 GPOs withdrew huge amounts of Rs. 1,452,594,294 from the Western Union Account during FY 2022-23.

Audit examined the relevant record and found that:

- i) DG PPOD did not comply with the above stated instructions of Finance Division and allowed, in the first instance, making payments on account of Western Union transfer services from postal receipts such as utility bills and money orders and then ordered to withdraw the paid amounts from Western Union Accounts and adjust against irrelevant heads of receipts in the summary; thereby leading to misreporting of the postal receipts.
- ii) The record transpired that payments of Western Union were made before receipt of remittances of Western Union transfer services.

Audit contends that payments on account of Western Union transfer services from postal receipts and subsequent withdrawals and adjustments against irrelevant heads of receipts reflect weakness of the financial discipline and internal control structure of PPOD.

The matter was reported to the management and PAO during October and November, 2023. It was replied that department made stop gap arrangement for only five (05) months to avoid public complaints and all amounts drawn from Western Union Account had been adjusted against the relevant head of accounts.

The reply is not tenable as payments were made from other sources without authorization. Further, during verification the adjustment particulars of two (02) GPOs were provided out of 76 GPOs.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to fix responsibility for making payment of Western Union without authorization. It further directed that adjustment particulars be provided to audit for verification. No further progress was intimated till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 06)

1.8.9 Unauthorized drawl of funds through Letter of Credit - Rs 985.618 million

According to Rule 13 of General Financial Rules, in the discharge of his ultimate responsibilities for the administration of an appropriation or part of an appropriation placed at his disposal, every Controlling Officer must satisfy himself not only the adequate provisions exist within the departmental organization for systematic internal checks calculated to prevent and detect errors and irregularities in the financial proceedings of its subordinate officers and to guard against waste and loss of public money and stores, but also that the prescribed checks are effectively applied.

Finance Division vide its letter dated 15th April, 2022 released 50% payment amounting to Rs 25,000 million for clearance of pending liabilities of 19 utility companies. DG PPOD allocated this amount for 19 utility companies and forwarded the list of allocation to Director of Accounts, PPOD Lahore for issuance of letter of credit in favour of lead GPOs.

Audit observed that sixteen (16) lead GPOs withdrew an amount of Rs 25,985,617,742 from Account No. 1 (non-food) against the authorization of Rs 25,000,000,000, thereby; withdrawing excess amount of Rs 985,617,742.

Audit contends that the unauthorized drawl of funds indicates inadequate financial oversight and internal controls within the PPOD.

The matter was reported to the management and PAO during October and November, 2023. It was replied that the matter related to PMGs, Lahore, Islamabad, Multan, Peshawar, Hyderabad, Karachi and Quetta. DG PPOD allocated funds for distribution among 19 utility companies and forwarded a list to Director of Accounts, PPO

Lahore for issuance of letter of credit in favour of Lead GPOs and upon completion of reconciliation of all receipts and payments, the drawn amount would be adjusted.

The reply is not tenable. The PPOD withdrew unauthorized funds from LoC and disbursed to the utility companies.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to provide relevant record to Audit for verification. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives/conduct of inquiry into the matter to fix responsibility.

(DP No. 12)

1.8.10 Irregular re-appropriation of funds and non-surrender to Finance Division – Rs 395.154 million

According to Finance Division (Budget Wing) letter dated 4th August, 2022, no re-appropriation shall be made from employee related expenses to any other head of account of non-employee related expenses and no re-appropriation of funds shall be allowed in any case during the last month of the financial year. Further, according to instructions contained in Finance Division (Expenditure Wing) letter dated 7th July, 2022 regarding austerity measures for FY 2022-23, the PAO shall ensure that existing entitlement for POL for government functionaries be reduced by 30%. Further, according to instructions contained in Finance Division (Expenditure Wing) letter dated 7th July, 2022 regarding austerity measures for FY 2022-23, there should be complete ban on purchase of physical assets.

DG PPOD under the Ministry of Communications, Islamabad made re-appropriation of funds amounting to Rs 431,153,698 during FY 2022-23. The re-appropriation was held irregular due to the following reasons:

- i) An amount of Rs 35,729,466 was re-appropriated from employee related expenditure to operating expenses such as bank fee, utilities and rent of office/residential buildings. Further, an amount of Rs 18,711,000 was also re-appropriated in June, 2023 in violation of Finance Division's above stated instructions.
- ii) 30% cut imposed by Finance Division on POL as austerity measure was not implemented; in addition, an expenditure of Rs 42,003,388 was incurred in excess of the actual authorization by re-appropriating funds from other head of accounts.

- iii) An amount of Rs 441,500,000 was allocated under head A05 – (obligatory payments for families of deceased employees), out of which an amount of Rs 195,928,284 was re-appropriated to other heads of accounts, due to which liabilities of deceased employees could not be cleared.
- iv) Finance Division allocated an amount of Rs 350,000,000 under head A09- Expenditure on acquiring physical assets. DG PPOD made re-appropriation of Rs 102,781,560 from this head to A04: Employees Retirement Benefits and A05: Grants, subsidiaries, write off loans instead of surrendering the funds to Finance Division.

Audit maintains that non-adherence to budgetary appropriations and making unauthorized re-appropriations thereof reflect weak financial discipline and non-compliance to the instructions of the Finance Division.

The matter was reported to the management and PAO during October and November, 2023. It was replied that (i) the budget was not re-appropriated from ERE to Non-ERE (ii) the re-appropriation of funds on account of POL was made on the request of the concerned formations with the approval of Chairman/Director General due to increase in fuel prices (iii) the saving under head A05- Grants, Subsidies & Write Off Loan/Advances (Prime Minister's Financial Assistance Package) was withdrawn and major portion of the saving was re-appropriated to head A03902: Printing & Publications (iv) no specific instructions were received from Finance Division to surrender the savings accrued under Head - A09: Expenditure on Acquiring of Physical Assets.

The reply is not valid. Audit contends sufficient evidence of re-appropriations made from ERE to Non-ERE. DG PPOD has accepted the audit contention of re-appropriations in POL and obligatory payment heads. Moreover, the instructions of Finance Division regarding austerity measures were self explanatory.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to submit revised reply keeping in view the audit observation within one week. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives/conduct of inquiry into the matter to fix responsibility. Audit further recommends that the amount involved be got regularized from Finance Division.

(DP No. 17)

1.8.11 Unauthorized utilization of funds allocated for clearance of PLICL liabilities -Rs 282.919 million

According to Rule 12 of the General Financial Rules, a controlling officer must see not only that the total expenditure is kept within the limit of the authorized appropriation but also that the funds allocated to spending units are expensed in the public interest and upon objects for which the money was provided. In order to maintain a proper control, he should arrange to be kept informed not only of what has actually been spent from an appropriation but also what commitments and liabilities have been and will be incurred against it.

DG PPOD under the Ministry of Communications, Islamabad demanded an amount of Rs 50,402,000,000 from Finance Division for clearance of pending liabilities of 19 utility companies including PLICL. Finance Division vide its letter dated 15th April, 2022 released 50% funds of Rs 25,000,000,000 for payment to utility companies and PLICL.

Audit observed that DG PPOD allocated this amount for 19 utility companies including an amount of Rs 282,918,687 for payment to PLICL and forwarded the list to Director of Accounts, PPOD for issuance of LoC to GPO Islamabad. The Lead GPO Islamabad did not pay the allocated amount to M/s PLICL in violation of the instructions of Finance Division.

Audit opines that due to weak financial discipline PPOD did not make payments to M/s PLICL and created a substantial financial liability.

The matter was reported to the management and PAO during October and November, 2023. It was replied that PMG Islamabad had been directed to explain the reasons for non-payment to PLICL.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to inquire the matter regarding non-clearance of pending liabilities of M/s PLICL and record thereof be provided to Audit for verification within 15 days. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

1.8.12 Unlawful drawl of cash on paper chits – Rs 46.329 million

According to Para 7 (1) (b) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, the Principal Accounting Officer shall be responsible for use of resources and shall ensure the effective, efficient, economical and transparent use of funds, budget, assets and human resources available to him, in accordance with relevant policies, rules and regulations, for achieving services. Further, the PAC in its meeting held on 5th and 7th November, 2001 directed the PAO to evolve some institutional arrangement to stop the practice of drawl of public money on paper chits on permanent footing.

Finance Division made annual allocations under Grant No. 26 of PPOD to meet its operational expenditure. PPOD drew unlawful funds from the treasury due to the following reasons:

- i) Twenty-seven (27) formations of PPOD drew illegal amount of Rs 40,028,682 simply on paper chits from postal treasuries during FY 2022-23.
- ii) CPM, GPO Peshawar drew unlawful cash of Rs 6,300,000 from the postal treasury simply on paper chits with the approval of PMG, KP on 1st August, 2023 to meet the expenditure of recruitment process, the supporting evidence of which was not available on record.

Audit contends that drawl of public money merely on paper chits is unlawful and contrary to the canons of financial propriety. This malpractice was seriously viewed by the Public Accounts Committee in its meeting held on 5th and 7th November, 2001 and had directed to discontinue the practice henceforth.

The matter was reported to the management and PAO during August to December, 2023. It was replied that paper chits amounting to Rs 17,451,681 had been adjusted.

The reply was not tenable as responsibility for unlawful retention of paper chits was not fixed against person (s) at fault.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to inquire the matter and fix responsibility on those

found responsible for drawl of government money on paper chits under intimation to audit.
No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DPs No. 131 & 170)

MINISTRY OF COMMUNICATIONS

POSTAL LIFE INSURANCE COMPANY LIMITED

Chapter -2

Postal Life Insurance Company Limited (PLICL)

2.1 Introduction

A. PPOD was operating Postal Life Insurance (PLI) on behalf of Ministry of Finance in the past on no-profit no-loss basis. The Government of Pakistan converted PLI into a company by the name of Postal Life Insurance Company Limited (PLICL) and incorporated it under the Companies Act, 2017. The company was registered with the Securities and Exchange Commission of Pakistan (SECP) as a life insurer under the Insurance Ordinance, 2000 on 26th August, 2020. The Company started its business on 2nd April, 2021 with limited scope of life insurance coverage only.

PLICL is managed by the Board of Directors (BoD) under the administrative control of Ministry of Communications and is headed by a Chief Executive Officer (CEO) who is assisted by two General Managers based at Lahore & Karachi. It has three Regional Directorates located at Multan, Peshawar & Quetta. The main objectives of the Company are to:

- i) Carry out all kinds of insurance business relating to life insurance.
- ii) Take over assets, liabilities including policy holders' liabilities determined as on the transfer date in accordance with the insurance regulatory framework prescribed under the Insurance Ordinance, 2000 and relevant rules/regulations/directives/circulars/ guidelines/ contracts and undertakings of Postal Life Insurance under the vesting orders passed by the Federal Government.
- iii) Carry on, in Pakistan and elsewhere, all kinds of family takaful businesses and generally every kind of family takaful and family re-takaful businesses whether now known or hereafter to be devised subject to such restrictions as imposed by the Insurance Ordinance, 2000.
- iv) Transact the business of life insurance Company including sale and purchase or re-purchase of annuities, a reversionary interest and life or other interests of uncertain duration or commencement, and endowments for children, and sickness insurance, and all other business pertaining to or commonly transacted by life insurance companies.

B. Comments on Budget and Accounts

- i) As per Note 11.1 of the financial statements as on 31st December, 2022, an amount of Rs 13,302.238 million was shown as accrued interest on the GoP Fund under the head - Other loans and receivables. However, no amortization schedule existed between the Finance Division and PLICL to ensure the timely release/appropriation of the accrued amount.
- ii) As per Note 11.2 of the financial statements as on 31st December, 2022, the amount of receivables on account of insurance premium from PPOD increased from Rs 244.159 million (2021) to Rs 877.656 million (2022). This 272% surge in non-receivable raises questions about the efficiency of the company's receivable management.
- iii) As per Note 29 of the financial statements as on 31st December, 2022, despite a notable surge in revenue of Rs 10,053.417 million in 2022 as compared to Rs 7,362.123 million in 2021, the Company experienced a substantial decline of 50% in overall profit. This alarming trend strongly signals a deficiency in cost control measures or the absence of comprehensive cost planning within the company's operational framework.
- iv) Despite the released budget grant of Rs 934.500 million under the Cost Centre "IB0521-Grants for PLIC Liabilities" PLICL managed to utilize funds amounting to Rs 925.074 million which resulted in lapse of Rs 9.426 million.

Table-1 Audit Profile of Postal Life Insurance Company Limited**(Rs in Million)**

Sl. No.	Description	Total Nos.	Audited	Expenditure audited FY 2022-23	Revenue / Receipts audited FY 2022-23
01	Formations	52	03	620.010	1,052.550

2.2 Classified Summary of Audit Observations

Audit observations amounting to Rs 3,611.116 million (including non-budgeted payments) were raised in this report during the current audit. This amount also includes recoveries of Rs 921.398 million as pointed out by audit. Summary of the audit observations classified by nature is as under:

Table-II Overview of Audit Observations**(Rs in Million)**

Sl. No.	Classification	Amount
1.	Reported cases of fraud, embezzlement and misappropriation	0
2.	Irregularities	965.376
A	HR related irregularities*	965.376
B	Management of Accounts with Commercial Banks	0
3.	Value for money and service delivery issues	0
4.	Receivables	921.298
5.	Other Irregularities	1,724.442
Total:		3,611.116

* The paras related to special study report 2022-23 have been included in HR chapter

2.3 Status of Compliance with PAC Directives

Audit of the entity was started in Audit Year 2021-22, however, the reported paras of PLICL have not been discussed in the Public Accounts Committee as detailed below:

Sl. No.	Audit Report Year	Total Paras	Total No. of directives	Compliance			% of Compliance
				Received	Partial	Not Received	
1	2021-22	08	-	-	-	-	
2	2022-23	06	-	-	-	-	

AUDIT PARAS

2.4 Irregularities

A HR/Employees related irregularities

2.4.1 Un-necessary borrowing of employees on deputation – Rs 941.266 million

According to Rule 2A(C) of Public Sector Corporate Governance Rules, 2013, the public sector company is managed by a sufficient number of persons who are fit and proper persons to hold the positions which they hold.

PLICL under the Ministry of Communications, Islamabad hired the services of 711 postal employees (BPS-01 to 16) on deputation basis w.e.f 1st July, 2021 to run its operations and incurred an expenditure of Rs 941.266 million against such appointments.

Audit examined the relevant record and observed that:

- i) Services of the employees were hired without assessing actual requirement of the organization as the staff was not involved in the selling of insurance policies and allied businesses of the Company.
- ii) Additionally, 108 postal employees were borrowed without justification on deputation basis as pointed out by BoD in its meeting held on 29.06.2021.

Audit opines that borrowing of these postal employees did not add value or contribute to the efficient functioning of the organization, they being uninvolved in core activity, which reflected weak HR management and an undue financial burden on the organization.

Audit reported the matter to the management and PAO during May and June, 2023. It was replied that according to the strategic alliance agreement between PPOD and PLICL signed in July, 2021, PPOD would support and facilitate PLICL during transition phase for effective and efficient operations of the Company which included deputation of employees also. Therefore, more than 700 staff was hired on deputation.

The reply is not tenable as the staff was hired on deputation basis from PPOD without assessing the actual requirement, including the services of 108 surplus employees who had no contribution towards the business of the Company; rather they over-burdened the operational cost of the Company.

The matter was discussed in the DAC meeting held on 1st August, 2023. The DAC directed the management to review its actual requirement of staff hired on deputation from

PPOD and only required staff be retained under intimation to audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(Para No. 4.2.1 of SSR 2022-23)

2.4.2 Irregular appointment of Chief Executive Officer and payment - Rs 24.110 million

PLICL advertised the post of Chief Executive Officer in print media with the terms and conditions, (i) the candidate must have minimum 20 years experience, 10 years of which must be at senior management level in the technical department of insurance or re-insurance company (ii) must have spent 5 years as a key officer in a leadership role in the insurance industry as defined in Insurance Companies and Prudent Management Regulations, 2012.

PLICL under the Ministry of Communications, Islamabad appointed Mr. Muhammad Naeem Akhtar as CEO of the PLICL and paid an amount of Rs 24.110 million (Rs 1,095,910*22 months) on account of pay & allowances during 22 months of his tenure.

Audit examined the appointment files and service profile of the incumbent CEO and observed that:

- i) The CEO was irregularly appointed in contravention to the eligibility criteria as mentioned in the advertisement. As per his service profile, he did not work at any senior management level in the technical department of an insurance or re-insurance company.
- ii) He managed two insurance brokerage businesses in the UAE as CEO in the last 8 years which was completely different from the insurance company management and operations.

Audit opines that the CEO was appointed in total disregard to his credentials and the advertised criteria which reflects weak internal control structure and HR management of the Company.

Audit reported the matter to the management and PAO during May and June, 2023. It was replied that PPOD and the Consultant hired for the company were involved in the appointment of the Chief Executive Officer; therefore, the comments could be sought from PPOD.

The reply is not tenable. The CEO was hired on the recommendations of the interim BoDs of the PLICL.

The matter was discussed in the DAC meeting held on 1st August, 2023. The DAC directed PPOD and PLICL management to provide detailed reply keeping in view the audit observations. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives/conduct of inquiry into the matter to fix responsibility.

(Para No. 4.2.2 of SSR 2022-23)

2.5 Receivables

2.5.1 Non-realization of premium & administrative expenses - Rs 921.298 million

According to Clause 2 of Annexure B of the agreement made between PLICL & PPOD, all collection received in preceding week excluding per transaction fee will be credited to PLICL's Bank Account next Monday, or first working day in case of Monday is bank holiday. Further, as per Para 4.7 (d) of the agreement between PLICL and Pakistan Railways (PR), premium shall be payable by PR to PLI (now PLICL) on monthly/quarterly/annually in advance. However, if premium by PR to PLI is not paid within the period mentioned above, then insurance coverage will be lapsed and PLI shall not be liable for the same.

PPOD collected premiums through GPOs on behalf of PLICL during FY 2022-23 which was providing group insurance coverage to the employees of government of the Punjab, Pakistan Railways and WASA, Faisalabad.

Audit examined the relevant agreements and receivable files of PLICL and observed that:

- i) Premium of Rs 433,729,826 collected by PPOD was not transferred to PLICL's main account as on 30th June, 2023.
- ii) Group insurance premium of Rs 410,932,211 was outstanding against Pakistan Railways and Government of the Punjab.
- iii) Administrative expenses of Rs 76,636,212 were not recovered from WASA Faisalabad & Pakistan Railways.

Audit contends that due to weak receivable management, PLICL could not recover the premium amounts and administrative expenses from these organizations/governments.

The matter was reported to the management and PAO during September to December, 2023. It was replied that the matter was taken up with the concerned quarters for early realization of premium and administrative expenses.

The management accepted the audit contention; however, no substantial efforts were found available on record to recover the outstanding amounts despite lapse of a considerable period.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to pursue the case with concerned departments for early realization of premium amount and administrative expenses and get the record verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 94,215 & 216)

2.6 Others

2.6.1 Non-settlement of individual insurance claims - Rs 1,011.063 million

According to Section 118(1)(2) of Insurance Ordinance, 2000, all claims are required to be sanctioned and paid to the insurant within ninety (90) days. Further, the insurer shall, if he fails to make the payment within a period of ninety days from the date on which the payment becomes due or the date on which the claimant complies with the requirements, whichever is later, pay as liquidated damages the sum of which shall be calculated at monthly rates at the rate five per cent higher than the prevailing base rate.

PLICL under the Ministry of Communications, Islamabad generated 13,845 Payment Sanction Orders (PSOs) amounting to Rs 2,497.329 million on account of insurance claims during FY 2022-23.

Audit examined the relevant record and observed that PLICL settled 7,853 claims amounting to Rs 1,486.266 million during FY 2022-23. The Company failed to settle 5,992 insurance claims amounting to Rs 1,011.063 million; thereby creating a huge liability for the Company.

Audit contends that due to weak insurance claim management system PLICL did not settle huge claims and created liability beside potential liquidated damages on the Company. Moreover, non-settlement of insurance claims within due time also impacted the goodwill of the company.

The matter was reported to the management and PAO during October to December, 2023. It was replied that sufficient funds were not allocated by Finance Division as committed in promissory note, therefore, liabilities could not be cleared.

The reply is not tenable as the Insurance Ordinance, 2000, provides for sanctioning and payment of all claims within ninety (90) days.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to take up the case with Finance Division for release of funds to clear the pending liabilities of the insurants under intimation to audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 67)

2.6.2 Unauthorized re-appropriation of funds from public account –Rs 679.00 million

According to Section 17 (4) of the Insurance Ordinance, 2000, all liabilities (including policy liabilities) of a life insurer arising out of the conduct of the business of a statutory fund shall be treated as liability of that fund.

Finance Division vide its letter dated 2nd April, 2021 issued promissory note and permitted that funds amounting to Rs 48,000 million accumulated as on 30th October, 2020 would be provided to the PLICL for payment of claims/liabilities of the insurants. During FY 2021-22, the Finance Division released one liner budgetary grant under head IB0521 for PLI liabilities of Rs 8,000 million under demand No. 26-Communications Division.

Audit observed that the Ministry of Communications, Islamabad vide its letter dated 28th April, 2022 made unauthorized re-appropriation of Rs 679 million from the head - IB0521- Grant for PLI liabilities, to meet the expenses of pay and allowances of National Highways and Motorways Police (NH&MP). Audit also noticed that the re-appropriation was made without the prior approval of the BoDs.

Audit contends that re-appropriation made from Public Account, meant for settlement of insurance claims, to another Grant related to NH&MP reflects weak financial discipline and internal control structure.

The matter was reported to the management and PAO during May and June, 2023. It was replied that re-appropriation was made by the Ministry within the budgetary grant No. 26 on the availability of sufficient savings under the relevant cost center which did not affect the balance of promissory note until the same was not utilized.

The reply is not tenable as the funds were provided for clearance of pending

liabilities of the insurants. Further, the re-appropriation also affected the balance of promissory note as it had been booked as an expense in the PLICL accounts.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to produce relevant record for verification to audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives/conduct of inquiry into the matter to fix responsibility besides adjustment of the amount against the Communication Division's Grant and its crediting into PLICL account.

(DP No. 106)

2.6.3 Non-deposit of Zakat into Central Zakat Account – Rs 34.379 million

As per Ministry of Poverty Alleviation & Social Safety Divisions' instructions, all the Zakat Collection Controlling Agencies (ZCCAs) are required to deduct the Zakat at prescribed rate. The amount so deducted is required to be deposited in Central Zakat Account No CZ-08, being maintained at the State Bank of Pakistan. A copy of return Form CZ-08A is also required to be provided to Cabinet Secretariat Poverty Alleviation & Social Safety Division after depositing the amount.

PLICL under the Ministry of Communications, Islamabad deducted Zakat at the time of payment of insurance claims which accumulated to the tune of Rs 34.379 million as on 30th June, 2023.

Audit observed that the amount of Zakat was not deposited in the designated account till finalization of this report.

Audit contends that non-adherence to Cabinet Secretariat's instructions resulted in blockage of public funds.

The matter was reported to the management and PAO during October to December, 2023. It was replied that payment of Zakat could not be made due to release of second quarter budget.

The reply is not tenable as the amount of Zakat had already been deducted from the claims of insurants and no budgetary allocation was required for this purpose.

The matter was discussed in the DAC meeting held on 17th & 18th January, 2024. The DAC directed the management to transfer the amount of Zakat into Central Zakat

Account and get it verified from audit. No further progress was reported till finalization of this report.

Audit recommends implementation of DAC directives.

(DP No. 62)

THEMATIC AUDIT REPORT
ON
ASSET MANAGEMENT OF
PAKISTAN POST OFFICE DEPARTMENT

3. Thematic Audit on Asset Management of Pakistan Post Office Department

3.1 Introduction

The Pakistan Post Office Department (PPOD) stands as an institution deeply rooted in history, tracing its origins to the colonial era, making it one of the oldest government departments in the Sub-Continent. Since its inception, the PPOD has played a pivotal role in shaping communication, commerce, and financial transactions within Pakistan. As an integral part of the nation's infrastructure, the department has evolved to meet the changing needs of society, serving as a critical link that connects millions of people across the country.

The core functions of the Pakistan Post Office are diverse and expansive, encompassing both domestic and international postal services, as well as facilitating money orders. Beyond traditional postal activities, the PPOD operates as an agency on behalf of the Federal and Provincial Governments, undertaking essential tasks such as the collection of utility bills, payment of military pensions, tax collection, and managing Western Union transactions. The department is also entrusted with the secure delivery of crucial identification documents, including NADRA ID cards and passports. This multifaceted approach underscores the PPOD's commitment to providing comprehensive services that address the varied requirements of its extensive clientele.

With a remarkable physical footprint, the PPOD boasts a network of 10190 post offices, including 85 General Post Offices (GPOs) strategically managed by a workforce of 38884 employees, including both regular and extra-departmental personnel. This extensive network ensures that the services provided by the PPOD reach urban centers and remote regions alike, making their mark throughout the country.

Against the backdrop of its rich history and diverse services, the PPOD has recognized the critical importance of effective asset management. Asset management, in the context of the PPOD, involves the systematic oversight of physical infrastructure, procurement decisions, utilization, maintenance, and disposal of assets. The goal is to maximize the value and benefits of these assets throughout their lifecycle, ensuring operational efficiency, cost minimization, and the effective functioning of postal services nationwide.

Motivated by a commitment to enhance operational efficiency and address previous audit observations, the PPOD has undergone a thematic audit focused on its asset management practices. The audit aims to evaluate the physical verification of assets, the

implementation of lease and tenancy policies, safeguards against loss or damage, efficient asset usage, timely maintenance and replacement, proper disposal procedures, regular updates to the asset register, appropriate insurance coverage, and robust controls for the procurement of new assets.

As the thematic audit unfolds, it will shed light on the strengths and challenges within the PPOD's asset management framework, providing insights that can guide the department toward further improvements. The findings of this audit are crucial for ensuring the resilience, efficiency, and responsible management of assets within the Pakistan Post Office Department, contributing to its continued legacy as a vital national institution.

3.1.1 Background

The roots of the PPOD can be traced back to the colonial era, specifically the Post Office Act of 1898, which laid the foundation for organized postal services in the region. During this period, the focus was primarily on establishing a network for the timely and secure exchange of letters and parcels, with a rudimentary approach to asset management.

Following the partition in 1947 and the creation of Pakistan, the PPOD inherited/acquired 4,155 office/residential buildings, 120 vacant plots and 431 vehicles. Over the time, the PPOD evolved beyond traditional postal services, took on additional agency functions on behalf of the federal and provincial governments such as utility bill collection, tax collection, and Western Union transactions and acquired physical assets i.e. IT equipment, furniture & fixture etc. to meet the requirements of the department; however, these acquired assets were not reflected in the balance sheet and annual report. It is pertinent to mention that the diversification in physical assets added complexity to asset management which required a broader strategic approach to oversee a range of assets used for various purposes.

The legal framework governing the PPOD's operations, including the Post Office Act of 1898, the Pakistan Postal Services Management Board Ordinance 2002, and other relevant regulations could play a pivotal role in shaping the asset management landscape, provided compliance with these regulations had been ensured for transparency and accountability for asset management.

In short, the thematic audit on asset management was conducted to signify a contemporary approach to further enhance operational efficiency, minimize costs, and to position the PPOD on a path of continued success in the emerging postal operations.

3.1.2 Establishing the Audit Theme

(i) Reasons of selection

The decision to conduct a thematic audit on the asset management of the Pakistan Post Office Department was motivated by a variety of factors such as consistent identification of mismanagement, litigation, encroachment and fraudulent sale of PPOD assets. The selection of the thematic audit of PPOD asset management is connected to SDGs -16, read with targets 16.4, 16.5 and 16.6. SDG-16 pertains to promoting peaceful and inclusive societies for sustainable development, providing access to justice for all and building effective, accountable and inclusive institutions at all levels. The target given under SDG-16.4 stipulates, “By 2030, significantly reduce illicit financial and arms flows, strengthen the recovery and return of stolen assets and combat all forms of organized crime”, SDG 16.5 ibid describes, “Substantially reduce corruption and bribery in all their forms”, SDG 16.6 mentions “Develop effective, accountable and transparent institutions at all levels”.

3.1.3 Purpose / Objectives

The purpose of the thematic audit of PPOD asset management was to identify mismanagement, encroachment, corruption, theft & losses and report them to the PPOD management, Principal Accounting Officer and the Public Accounts Committee for Parliamentary oversight. The major objectives as approved in the terms of reference by the Office of the Auditor-General are to evaluate that:

- Assets are physically verified on a regular basis and that any discrepancies are identified and investigated.
- Lease and Tenancy Policy of PPOD has been implemented.
- Controls are in place to safeguard assets against loss, damage, or theft.
- Assets are being used efficiently and effectively, and that there is no misuse or unauthorized use.
- Assets are being maintained in good condition and that any repairs or replacements are made in a timely manner.
- Disposal of assets is done in accordance with departmental policies and procedures, and that all necessary approvals are obtained.
- Asset register is updated regularly, and that there are appropriate reconciliation procedures in place.
- There is appropriate insurance coverage for assets, where applicable.
- There are appropriate controls in place for the procurement and receipt of new assets, including the verification of specifications and quality.

3.1.4 Scope

The scope of the thematic audit “Asset Management of PPOD” covers the acquisition of physical assets by Pakistan Post Office Department during the period starting from August, 1947 to June, 2023 with the objectives to conduct the audit in the light of the above-mentioned approved TORs. The audit teams visited the PPOD headquarters, Circle offices and selected GPOs in order to collect information related to the selected theme. The focus of the audit was to ascertain whether the assets of the government were being safeguarded/managed in an effective manner in different field formations of PPOD.

3.2. Legal framework governing the Theme

The PPOD falls under the administrative control of Ministry of Communications and operates under Pakistan Postal Services Management Board (PPSMB). PPOD is headed by the Director General who is also the Chairman of PPSMB. Following is the list of documents that provide a legal framework:

- Post Office Act, 1898
- Pakistan Postal Services Management Board Ordinance 2002
- Initial Account Code (Volume I & II)
- Post office Manual (Volumes I-VIII)
- Federal Treasury Rules
- Public Financial Management Act, 2019
- Agreements of agency functions executed with different departments of Federal and Provincial Governments

3.3. Stakeholders and governmental organizations identified as directly / indirectly involved

Following stakeholders are directly or indirectly involved in relation to the subject thematic audit.

- Ministry of Communications
- Public Accounts Committee
- Auditor-General of Pakistan
- Pakistan Post Office Department
- Federal and Provincial Governments and their departments
- General public

3.4. Role of important organization

Ministry of Communications (MoC)

PPOD falls under the administrative control of Ministry of Communications. The Ministry monitors the overall working of Pakistan Post Office Department, reviews the postal policies from time to time and is responsible for implementation of the directives of the Federal Government. MoC also oversees the litigations of PPOD and issues directions for vigorous pursuance of assets related cases for early and favourable disposal.

Public Accounts Committee (PAC)

The Public Accounts Committee (PAC) plays a pivotal role in ensuring parliamentary oversight on the asset management of government departments including PPOD through the Audit Reports of the Auditor- General of Pakistan. The Public Accounts Committee examines Auditor- General's Reports and takes notice of public petitions, media reports and issues suo-moto notices on matters of public importance.

Auditor-General of Pakistan (AGP)

The Department of Auditor-General is the Supreme Audit Institution (SAI) in the country for ensuring public accountability and fiscal transparency in governmental operations. The SAI aims at bringing improvement in the financial discipline and internal control framework of the executive departments for minimizing the possibility of waste, mismanagement and fraud.

Pakistan Post Office Department (PPOD)

PPOD has a prime role in Asset Management being controlling department and is under obligation to manage and safeguard its assets. The PPOD management is also responsible for approval of its initiatives from Federal Government through PPSMB and its administrative ministry.

3.5. Organization's Financials

PPOD being government department is responsible to prepare its own budget every year and submits it to the Federal Government through its administrative Ministry. All receipts of PPOD form the part of Federal Consolidated Fund. PPOD incurs expenditure against the budget grant No. 22 of the Ministry of Communications through formal allocation by Finance Division. Previously, PPOD would incur its budget through Letter of Credit (LoC) and had direct access to Account No. 1 (Non-Food). Since July, 2022, the Finance Division discontinued the old cash management regime and introduced the new cash management of regime of Treasury Single Account and directed PPOD to make spending through the counters of AGPR.

Revenue of PPOD from its core operations and performance of agency functions forms major sources of receipts. Postal operations include delivery of national and international mail, payment of money orders, sale of stamps/postal orders etc. whereas, major agency functions of PPOD include utility bills collection, printing of stamps on behalf of Federal and Provincial Government Departments, money remittance services through Western Union and NBP etc. upon which PPOD receives commission.

3.6. Field Audit Activity

3.6.1 Methodology

Thematic Audit of Asset Management of PPOD was carried out by adopting the mixed method approach based on qualitative and quantitative data. The data was collected from various sources such as PPOD web site, annual reports / annual accounts and previous audit reports. Audit teams also visited the PPOD headquarters, Circles Offices and selected GPOs included in Audit Plan 2023-24 and consulted the relevant record during compliance audit related to mismanagement, theft and losses of the PPOD assets. The field work was completed in November, 2023. The audit teams also consulted Permanent and Planning Files of PPOD.

3.6.2 Audit Analysis

(i) Review of Internal Controls

PPOD has an established internal control structure based on Departmental Manuals, instructions and relevant applicable rules and regulations. However, audit observed that the internal control structure was ineffective in safeguarding the PPOD assets from losses. The controls for ownership, security, utilization and physical verification of assets were not operative. Further, the fixed assets register was not prepared and periodical inspections were not carried out. Though the internal audit wing exists in PPOD, yet it is not functional as no internal audit reports were prepared and submitted to the management.

(ii) Critical Review

Thematic Audit of the PPOD for the FY 2022-23 unearthed a disconcerting pattern of negligence and inefficiency in the management of assets. This critical review delves into the audit findings, emphasizing the significant areas of concern and outlining the potential risks and implications for the department.

One of the paramount issues highlighted in the audit pertains to the non-acquisition of ownership documents for a substantial number of assets. Specifically, 585 postal buildings and residential quarters, valued at Rs 84,065 million, lacked adequate ownership documentation. This oversight poses a considerable risk to the department, introducing uncertainties about legal ownership and creating a fertile ground for potential disputes. The absence of clear ownership records not only jeopardizes the department's credibility but also raises questions about the integrity of its asset management practices.

Moreover, the under-utilization of prime properties in major cities emerged as a missed opportunity for revenue generation and organizational financial health. The audit findings reveal that certain assets in strategic locations remained dormant, failing to contribute to the department's revenue stream. This inefficiency is not only a financial setback but also reflects a lack of strategic vision in maximizing the potential of valuable assets.

Illegal encroachment on 248 postal properties across Pakistan constitutes a critical lapse in safeguarding measures. This breach exposed the department to various risks, including potential financial implications, legal actions, and liabilities. The failure to protect these assets from encroachment signifies a breakdown in security protocols, highlighting the need for immediate corrective actions to secure and reclaim these properties.

A systematic approach to record-keeping and periodic inspections was notably absent in the PPOD asset management. This deficiency hampers the assurance over the existence, ownership, and completeness of assets. Without a robust record-keeping system and regular inspections, the department is vulnerable to inaccuracies, mismanagement, and

potential losses. Strengthening these processes is imperative for ensuring accountability and transparency in asset management.

The audit also raises concerns about the failure to secure assets through insurance. In the event of damage or loss, the absence of insurance coverage exposes the department to significant financial risks. This lack of foresight in safeguarding assets further underscores the need for a comprehensive risk management strategy to protect the department's financial interests.

The prolonged utilization of PPOD assets by M/s PLICL without a finalized agreement is a glaring lapse in strategic foresight. This not only raises questions about the terms of use but also reflects a lack of diligence in formalizing agreements that safeguard the department's interests. Clear and finalized agreements are essential to ensure transparency, legal compliance, and fair compensation for the use of departmental assets.

Emergency response procedures were found to be non-existent, indicating a gap in organizational preparedness. The absence of a structured approach to respond to emergency events or circumstances poses significant risks.

Improper maintenance of civil structures, as evidenced by the severe deterioration of postal buildings and residential quarters, indicates a systemic failure in preserving valuable assets. Neglecting maintenance not only compromises the structural integrity of these assets but also indicates a lack of commitment to responsible asset management.

In this backdrop, the audit findings present a comprehensive overview of the challenges and deficiencies in the asset management practices of the PPOD. Urgent corrective actions are imperative to enhance financial resilience, operational efficiency, and responsible asset management. Addressing the identified issues will not only strengthen the department's credibility but will also position it for sustainable success in the dynamic landscape of postal operations.

(iii) Significant Audit Observations

(a) Non-acquisition of ownership documents of postal properties

According to Rule 7(1)(s) of the Financial Management and Powers of Principal Accounting Officers Regulations, 2021, the Principal Accounting Officer is responsible for proper record of all assets.

PPOD inherited/acquired 4,155 postal buildings and residential quarters following the partition of Pakistan in August, 1947.

Audit observed that PPOD did not acquire the ownership documents of 585 postal

buildings and residential quarters worth Rs 84,065 million despite lapse of few decades after the partition of Sub-Continent. Audit contends that without proper ownership documents, it is challenging for PPOD to prove the legal ownership of the properties in case a dispute arises between PPOD and any claimants which can cause loss to the department. Further, non-availability of ownership documents of postal buildings also impacts accuracy and completeness of financial reporting.

(b) Non-utilization of assets

Federal Cabinet in its meeting held on 17th August 2021 approved the lease and tenancy policy of PPOD. The main purpose of the Policy was to generate revenue to meet its increasing requirements of infrastructure development, maintenance, operational and management cost etc.

PPOD has a large infrastructure of buildings, rest houses and plots/open spaces etc. Most of these properties/plots, located at prime locations in the major cities of the country, are lying vacant or unutilized.

Audit observed that 29 properties (21 vacant plots and 8 Rest houses/inspection quarters) were identified for leasing by PPOD which could not be materialized due to weak planning and financial management. Audit contends that PPOD could generate reasonable revenue in form of rental/leasing proceeds, had these properties been rented out. Non-utilization of PPOD assets reflects weak assets management which deprived the department of an alternate source of revenue to improve its financial health.

(c) Illegal encroachment on postal properties

According to para 7 (1) (o) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, the Principal Accounting Officer is responsible for safe custody of assets including maintenance of assets and inventory registers. Principal Accounting Officer shall ensure that the maximum possible returns are achieved on each and every asset falling under the oversight of the Ministry or Division, department, subordinate office.

PPOD has a large infrastructure of buildings, rest houses and plots/open spaces etc. Most of these properties/plots, located at prime locations in the major cities of the country, are lying vacant or un-utilized.

Audit observed that 248 properties of PPOD were encroached upon by outsiders throughout Pakistan but no appropriate and timely action was undertaken to safeguard the prime assets and has put the PPOD at financial risk. Audit is of the view that PPOD may

incur expenses related to property restoration, legal actions against encroachers, and potential liabilities arising from accidents or incidents that may occur on the encroached properties.

(d) Utilization of postal assets by M/s PLICL

A Strategic Alliance Agreement was signed between Pakistan Post Office Department and Postal Life Insurance Company Limited on 1st July, 2021. As per Clause 2.2 of agreement, Pakistan Post will provide support to PLICL for the use of Physical assets, manpower resources and any other facilities as may be necessary during transit phase.

One hundred twenty (120) official/residential properties and fifty-seven (57) vehicles of PPOD were being utilized by PLICL. Audit revealed that PPOD did not sign any lease agreement with PLICL in respect of these assets despite lapse of almost three years. Due to non-finalization of agreement, rent of properties under utilization of PLICL worth Rs 148.584 million could not be realized.

(e) Improper maintenance of civil structure

According to para 7 (1) (o) of Financial Management and Powers of Principal Accounting Officers Regulations, 2021, the Principal Accounting Officer is responsible for safe custody of assets including maintenance of assets and inventory registers. Principal Accounting Officer shall ensure that the maximum possible returns are achieved on each and every asset falling under the oversight of the Ministry or Division, department, subordinate office.

Audit observed that the external conditions of the postal buildings and residential quarters in postal colonies were severely deteriorated. This decline is indicative of a systemic failure in conducting essential repair and maintenance works necessary for the preservation of these valuable assets. The requisite measures to address the wear and tear of these structures were not adopted. Such proactive measures could mitigate not only the potential financial burdens associated with comprehensive rehabilitation but could also uphold the organizational commitment to responsible asset management and infrastructure upkeep.

(f) Non-maintenance of record relating to physical assets

According to Para 7 (o) of the Financial Management and Powers of Principal Accounting Officers Regulations, 2021, the Principal Accounting Officer (PAO) is responsible for safe custody of assets including maintenance of assets and inventory

register. PAO shall ensure that the minimum possible returns are achieved on each and every asset falling under the oversight of the Ministry or Division, Department and subordinate offices.

Audit also focused on the management and maintenance of the physical assets procured by the Pakistan Post Office Department including vehicles, power generators, AC units, furniture and fixtures, computers, laptops, printers, scanners, photocopiers, and fax machines. It was observed that these assets were not adequately maintained. Moreover, periodic inspections of physical assets are vital to provide assurance that all assets are accurately reflected in the stock register, physically exist, and remain within the custody of the department. However, it was noticed that PPOD had not established any formal procedures for conducting regular inspections of its assets, and consequently, no corresponding reports were generated.

Due to absence of proper maintenance procedures and physical inspection reports, audit was unable to ascertain the assurance regarding the existence, ownership, custody, and completeness of the assets and equipment. Effective management of assets is crucial for ensuring accountability and the lack of maintenance practices hinders the ability to validate key aspects such as asset ownership, current location, and accurate recording.

(g) Un-secured assets

According to Section 166(3) of Insurance Ordinance 2000, all insurance business relating to any public property, or to any risk or liability appertaining to any public property, shall be placed with the National Insurance Company Limited only and shall not be placed with any other insurer. Further, Finance Division (Expenditure Wing) vide letter dated 26th September, 2022 issued directions for implementation of Section 166 (Law) of Insurance Ordinance, 2000.

During the course of audit, it was observed that PPOD did not comply with the statutory framework and specific directives issued by the Finance Division (Expenditure Wing) on 26th September, 2022 in safeguarding and non-insuring its owned and acquired physical assets, encompassing vehicles, buildings, machinery, furniture, fixtures, and equipment which exposed the department to potential financial losses in the face of unforeseen events, placing the financial stability and sustainability of PPOD at risk.

3.7 Recommendations

Audit recommends that the:

- i) PPOD should promptly initiate the process of acquiring ownership documents for postal buildings and residential quarters by taking up the matter with relevant authorities to transfer the property titles in the name of PPOD.

- ii) PPOD should develop and implement a comprehensive asset utilization policy in alignment with the approved Lease and Tenancy Policy, 2021. For this purpose, a systematic approach may be adopted to identify, assess, and utilize vacant or un-utilized properties for generating revenue through leasing or renting.
- iii) PPOD must adopt anti-encroachment drive in collaboration with security and law enforcement agencies to safeguard postal properties against encroachers.
- iv) Lease agreement with M/s PLICL for the utilization of PPOD's properties and vehicles may be expedited and terms and conditions, including rent etc. may be finalized explicitly.
- v) Repair and maintenance of deteriorated postal buildings and residential quarters be made by making adequate financial allocations in order to prevent the wear and tear of the properties.
- vi) PPOD must institute a proper record-keeping system for all physical assets and schedule periodical inspections to ensure the accuracy of asset information, including ownership, condition, and utilization details.
- vii) PPOD must develop and implement a comprehensive insurance policy for its physical assets to forestall any financial loss arising from possible damage of assets.

3.8 Conclusion

The audit findings highlight significant deficiencies in the PPOD's asset management system and safeguarding practices; thereby posing considerable financial and operational risks. To address these risks, the PPOD should urgently prioritize the acquisition of ownership documents for the identified postal properties, implement a comprehensive asset utilization policy to generate revenue from vacant properties, strengthen anti-encroachment measures, and establish a comprehensive record-keeping system for all physical assets. Additionally, the department must expedite the formalization of agreements with M/s PLICL, ensure comprehensive insurance coverage, develop and disseminate emergency response procedures and allocate resources for the timely repair and maintenance of deteriorated postal buildings.

The thematic audit of PPOD asset management reveals critical shortcomings in its asset management practices, financial oversight, and adherence to regulatory obligations. Of paramount concern is the non-acquisition of ownership documents for 585 postal buildings and residential quarters, valued at Rs 84,065 million. This oversight not only jeopardizes the department's ability to assert legal ownership in potential disputes but also introduces uncertainties impacting the accuracy and completeness of financial reporting.

Equally significant is the under-utilization of PPOD's vast infrastructure, including

29 identified properties, highlighting weak planning and financial management. The untapped revenue potential through leasing or renting these properties accentuates a missed opportunity for the department to fortify its financial health. This non-utilization underscores inherent deficiencies in asset management practices, warranting immediate rectification.

Audit further revealed the illegal encroachment on 248 postal properties nationwide, a situation exacerbated by PPOD's failure to take timely and appropriate action. This places the department at considerable financial risk, with potential expenses looming for property restoration, legal actions, and liabilities arising from incidents on the encroached properties.

A critical lapse in compliance is evident in the non-adherence to Section 166(3) of the Insurance Ordinance 2000, leaving PPOD's extensive assets unprotected in the face of unforeseen events. This not only exposes the department to potential financial losses but also jeopardizes its overall financial stability and sustainability.

Additionally, the audit highlights the non-finalization of lease agreements with Postal Life Insurance Company Limited (PLICL) for the utilization of 120 properties and 57 vehicles, resulting in unrealized rent amounting to Rs 148.584 million. This failure to formalize agreements reflects inadequate contractual oversight and financial management.

Lastly, the improper maintenance of civil structures, as observed in the deteriorated conditions of postal buildings and residential quarters, indicates a systemic failure to conduct essential repairs. Proactive measures are imperative to mitigate potential financial burdens associated with comprehensive rehabilitation, aligning with responsible asset management practices.

Audit underscores the urgent need for the Pakistan Post Office Department to institute comprehensive reforms. Addressing these deficiencies requires immediate action in asset management, financial oversight, and regulatory compliance. The recommendations presented in the audit findings serve as crucial guidelines for strengthening financial discipline, ensuring accountability, and securing the long-term sustainability of the department. Immediate and concerted efforts are imperative to mitigate potential risks, uphold legal and regulatory standards, and augment the financial well-being of the Pakistan Post Office Department.
