# *Message of the Auditor-General of Pakistan*

I am pleased to present the Annual Audit Plan of the Department of Auditor-General of Pakistan (DAGP)/Supreme Audit Institution (SAI) of Pakistan for the Audit Year 2024-2025.

With the core values of Integrity, Quality and Partnership as our guiding principles and with the help of workforce consisting of diversified professionals, DAGP has been in the consistent pursuit of ensuring parliamentary oversight on the public funds, a responsibility entrusted to it by the Constitution of Pakistan.

The goal is achieved by an extensive exercise of various types of audits carried out throughout the year with definite timelines and in line with International Standards. Application of international best practices in the field of auditing has significantly enhanced the quality and reliability of our audit reports. The feedback from our stakeholders, media and public at large is given due importance while planning our field audit activities.

Besides strong emphasis on timely completion of the rigorous audit exercises during the year, the DAGP never lost sight of its other broader objectives relating to quality of our output i.e. introduction of information technology through Audit Management Information System, capacity building of the Department and continuous professional development of its personnel.

The new genre of Audit i.e Impact Audit introduced in the Annual Audit Plan 2023-24 has been carried on in the Audit Plan 2024-25 taking into account the important role as such audits are aimed at determining impact of initiatives or programs of government agencies. Specifically, impact audit focuses on determining the outcome results attributable to an initiative, defined as a new program or recent change to an existing program. By conducting impact audits we aim to provide valuable insights into the overall performance and efficiency of public sector programs. This includes examining the alignment of government initiatives with national development goals, evaluating the impact on targeted beneficiaries, and assessing the sustainability and long-term viability of projects. The continuation of impact audits reflects a progressive approach of DAGP to auditing that aligns with global trends and promotes sustainable development in Pakistan.

I would like to thank the DAGP team for their hard work in preparing and finalizing this plan. I am sanguine to say that the Department of Auditor-General of Pakistan would continue to strive to keep up and further improve quality of its output and enhance its pivotal role in ensuring parliamentary oversight of public funds.

# ***Our Work Programme***

## ***Our Strategic direction sets the context for our work***

The DAGP aspires for a public sector that is both efficient and responsible, aiming for a strong performance. Our overarching goal is to instill trust and confidence in the public sector among the Parliament and the people of Pakistan.

Our vision outlines our focus areas which contribute to accomplishing our long-term objectives. The Auditor General's directions are conveyed to the Field Audit Offices from time to time to steer the field audit operations as per vision of the AGP.

## ***We utilize our existing knowledge***

As auditors of every public organization, our role encompasses evaluating performance and accountability across the entire public sector. We regularly assess issues, risks, and opportunities throughout the public sector using the information gathered by our auditors and sector managers, risk monitoring and independent analysis of public sector performance. We draw on our previous reports, including inquiries, research reports, and audit results, as well as follow-up reports on the implementation of our recommendations by public organizations.

Our advisory groups and interactions with select committees and Parliament members provide valuable insights into sector-specific themes and issues. Our annual plan is based on the information currently available, but if new information or risks arise, adjustments may be made to our planned activities.

## ***We involve the public in our audit work***

The Auditor-General of Pakistan, recognizing the importance of public engagement and transparency in the audit process, has introduced a ground breaking initiative known as citizen participatory audit. This innovative approach aims to actively involve citizens in the audit activities conducted by the office. By including citizens in the audit process, the Auditor General seeks to enhance public trust, promote accountability, and ensure effective utilization of public resources.

The citizen participatory audit allows ordinary citizens to contribute their perspectives, insights, and local knowledge to the audit process. Through this initiative, citizens are given an opportunity to actively participate in the planning, execution, and evaluation of audits being part of an Audit Team. They can provide valuable inputs, identify potential areas of concern, and suggest improvements in the management of public funds. This bottom-up approach empowers citizens to become proactive stakeholders in ensuring transparency and accountability in public financial management.

Under this initiative, the Auditor General of Pakistan has established mechanisms to facilitate citizen participation throughout the audit cycle. Public awareness campaigns are conducted to inform Civil Society Organizations about the audit process and role of citizen in it. The office has also set up dedicated hotlines and online portals in addition to receive feedback, complaints, and suggestions from citizens. Additionally, citizen representatives are being invited to join audit teams and accompany auditors during field visits to observe the audit process firsthand.

The introduction of citizen participatory audit is a significant step towards strengthening democratic principles and good governance in Pakistan. By involving citizens in the audit process, the Auditor-General aims to foster a culture of transparency, accountability, and citizen-centric governance. This initiative not only empowers citizens but also enables them to actively contribute to the improvement of public financial management systems. Through increased citizen participation, the Auditor-General of Pakistan is paving the way for a more inclusive and effective audit framework that benefits the nation as a whole.

### ***We acknowledge the changing dynamics***

The Auditor-General of Pakistan recognizes that global economic cycles and external factors significantly impact the economy, consequently affecting Pakistani communities. Furthermore, the resilience of these communities is tested by climate change and adverse weather conditions. The aftermath of these events often involves extensive clean-up and rebuilding efforts, which can take months or even years to complete. As a result, there is a strong public interest in understanding how both local and central government authorities in Pakistan address these challenging circumstances.

As the custodian of public accountability and transparency, the Auditor-General is responsible for ensuring the efficient and effective use of public resources, even in times of crisis. In the aftermath of the floods, the Auditor-General conducts thorough audits to assess the utilization of funds allocated for relief and rehabilitation efforts. This includes examining the allocation of financial resources, evaluating the effectiveness of emergency response mechanisms, and scrutinizing the transparency and accountability of government agencies involved in flood management. By conducting these audits, the Auditor-General helps identify any mismanagement, financial irregularities, or deficiencies in the utilization of funds, ultimately contributing to improved governance, enhanced public trust, and the efficient recovery and

reconstruction of affected areas. The role of the Auditor-General of Pakistan becomes even more vital during such calamities, as it ensures that the resources allocated for flood relief reach the intended beneficiaries and are utilized effectively to minimize the impact of the disaster on the affected communities.

Many of the challenges faced by Pakistan require sustained attention over an extended period. The Auditor-General emphasizes the importance of public organizations in Pakistan adopting a long-term perspective. This necessitates leveraging high-quality data and information to inform planning and decision-making processes that yield better long-term outcomes for the country.

## ***Strengthening our Assurance Role***

The public audit system plays a vital role in enabling public organizations to report accurate and relevant information regarding their finances and performance. Transparent reporting allows these organizations to highlight their strengths and areas for improvement. This, in turn, allows Parliament and the public to hold them accountable for their performance.

Due to the critical nature of the public audit system in ensuring public accountability, it is essential to establish a sustainable and effective framework for conducting audit and assurance work for organizations overseen by the Auditor-General. This includes providing auditing standards, guidance, and advice to our appointed auditors, conducting quality assurance reviews to ensure compliance with these standards, and positioning the public audit system to effectively address future challenges and changing expectations in the audit profession.

### ***Public Sector reforms and new audit methodologies***

The Auditor-General of Pakistan introduced Impact Audit which is aimed at evaluating the effectiveness and impact of government programs and policies. This innovative approach goes beyond traditional financial and compliance audits by assessing the actual outcomes and societal impact of public initiatives. The introduction of impact audit marks a significant shift towards result-oriented governance and evidence-based decision-making in Pakistan.

Through impact audit, the Auditor-General seeks to answer critical questions such as whether the intended objectives of government programs have been achieved, whether the allocated resources have been utilized efficiently, and whether the desired impact on the lives of citizens has been realized. This comprehensive evaluation provides valuable insights into the effectiveness of public expenditure, enabling policymakers to make informed decisions and allocate resources strategically.

The introduction of impact audit signifies a paradigm shift in public sector accountability, as it focuses on the tangible impact of government actions rather than solely assessing financial compliance. By promoting transparency, efficiency, and evidence-based decision-making, impact audit contributes to the overall improvement of public service delivery and the welfare of Pakistani citizens.

## ***Maximizing impact with public organizations***

---

Maintaining trust and confidence in the public sector is of utmost importance for the Auditor-General of Pakistan, and it relies on effective performance and accountability systems. As the auditor of all public organizations in Pakistan, the Auditor-General holds a unique position to drive improvements in performance and accountability practices throughout the public sector. This includes highlighting examples of good practices in areas where the Auditor-General possesses specific expertise and interest.

By influencing positive changes in the accountability practices of public organizations, the Auditor-General's work supports the scrutiny role of Parliament and provides enhanced information for Pakistani citizens. In the upcoming year of 2024/25, the Auditor-General's focus will include:

- Influencing the public accountability system and supporting parliamentary scrutiny in Pakistan.
- Influencing the performance of public organizations to ensure effective delivery of services to Pakistani citizens.
- Advocating for more meaningful and useful performance reporting, which will improve the overall performance and accountability of the public -sector in Pakistan.
- Promoting a greater emphasis on value for money within the public sector of Pakistan.
- Encouraging public organizations in Pakistan to adopt a long-term perspective in their planning and decision-making processes to effectively address long-term challenges faced by the country.
- Supporting strong organizational integrity practices within public organizations in Pakistan, thereby fostering trust and confidence among Pakistani citizens in the public sector.

### ***Influencing public accountability and supporting parliamentary scrutiny***

We strive for substantial enhancements in the public sector's reporting on expenditures and accomplishments. The insights we gain from our work, including annual audits, are utilized to influence the public accountability system and offer assistance to select committees in Parliament for their scrutiny of public organizations.

In the upcoming year of 2024/25, we will continue to prioritize enhancing our guidance to select committees by offering comprehensive support in examining new and significant public organizations. This will include assessing their major spending areas and the quality of their performance reporting.

This work is part of our commitment to enhance our support to Parliament and our engagement with public organizations, aiming to improve their financial and performance reporting practices.

### ***Promoting enhanced and valuable performance reporting***

To ensure meaningful reporting, it is essential for the public to comprehend the services being delivered, their associated costs, and the positive impact resulting from their delivery. We aim to enhance the relevance and transparency of performance information and the reporting practices of public organizations.

Continuing our ongoing efforts, we will collaborate with and support the Treasury in improving the public sector's reporting of performance across various levels of operation. This includes comprehensive reporting on all-of-government funds/initiatives, cross-agency joint arrangements, and individual agencies.

### ***Promoting a long-term view***

Pakistan faces a range of long-term challenges, including those arising from climate change, disparities in outcomes, and shifting demographics. To effectively address these challenges, it is essential to adopt a long-term view in planning, decision-making, and fostering coordination across the government. This requires access to high-quality information and transparent reporting on progress to effectively respond to and overcome these challenges.

The Auditor-General of Pakistan is committed to promoting and encouraging long-term integrated planning within the public sector. In the coming years, the Auditor-General will leverage insights gained from auditing planning documents, including the long-term plans of various entities, to provide guidance on best practices and highlight public organizations that demonstrate a long-term perspective in their planning and decision-making processes.

Furthermore, the Auditor-General will collaborate with central agencies and other stakeholders to influence improvements in processes and tools for long-term planning and decision-making in Pakistan. If relevant, the Auditor-General will incorporate observations on the quality of long-term planning in performance audits. Additionally, in subsequent years, specific performance audits will be conducted to assess and examine the topic of long-term planning in greater detail. Through these efforts, the Auditor-General aims to support Pakistani citizens by promoting effective long-term planning and decision-making practices that address the country's long-term challenges.

## ***Supporting strong organizational integrity practices***

Sustaining public trust and confidence is crucial for the effective functioning and desired impact of public organizations, enabling them to achieve their stated objectives. Trust is cultivated and preserved by demonstrating competence, reliability, and honesty.

When any of these aspects come into question, trust can diminish. Therefore, it is imperative for public organizations to be perceived as upholding high standards of integrity.

Our aim is to provide support to the public sector in maintaining and enhancing ethical standards and integrity in their operations.
